Pill, Blair's. An empirical preparation of colchicum, much used in England in cases of gout.

Pill, Blaud's. These pills, proposed by M. Blaud as antichlorotic, are formed as follows: — Take of *gum tragacanth,* in powder, six grains; *water,* one drachm. Macerate in a glass or porcelain mortar, until a thick mucilage is formed, and if it be desired to prevent the formation of peroxide of iron, and to make the pill similar to those of Vallet, substitute a drachm of powdered sugar for the mucilage. Add afterwards of *sulphate of iron,* in powder, half an ounce. Beat well until the mixture is homogeneous, and add *subcarbonate of potass,* half an ounce. Beat until the mass becomes of a deep-green colour, and of a soft consistence. Divide into 48 (?) pills. Dose, one a day; gradually increasing to two, and afterwards to three.

Pill, Blue, Pilulæ hydrargyri — p. Brandreth's, Pilulæ aloes et cambogiæ — p. Calomel, Pilulæ hydrargyri chloridi mitis — p. Camboge, Pilulæ cambogiæ compos. — p. Dinner, see Pilulæ aloes et kinæ kinæ.

Pill, Dinner, of Mr. Mayo. This is composed of *P. Rhej,* gr. iv; *Sodæ Carb.* gr. j.

Pill, Everlast'ing. A pill once in vogue, and said to be composed of metallic antimony. It was believed to have the property of purging as often as it was swallowed. A lady having swallowed one of these pills, became seriously alarmed at its not passing. "Madam," said her physician, "fear not; it has already passed through a hundred patients without any difficulty."— Paris.

PILLAR, *Pi'la, Colum'na, Columel'la,* (F.) *Pilier.* A name given to several parts; as the *pillars of the velum palati, diaphragm,* &c.

*PILON,* Pilum.

PILOSELLA, Hieracium pilosella — p. Alpina, Hieracium pilosella.

PILOSUS, Pileous.

PILOUS, Pileous.

PIL'ULA, plural *Pilu'læ.* Diminutive of *pila,* 'a ball.' *Sphærid'ion, Catapo'tion, Catop'otum, Sphæ'rion, Gongyl'ion, Gon'gylis, Gongylid'ium.* A pill. (F.) *Pilule.* A simple or compound medicine, weighing from one to five grains, of a firm consistence and spherical form; intended to be swallowed at once, without chewing. The *Pill* differs from the *Bolus,* the latter being softer and larger.

Medicines are often given in the form of pill,

on account of their disagreeable taste and odour. *Pilula*, also, means a *Pilular mass*.

PILULÆ EX ALOE, P. aloes compositæ—p. de Aloe et cambogiâ, P. aloes et cambogiæ.

PILULÆ ALOËS, *P. Aloet'icæ, Pilulæ ex Aloë et Sapo'nĕ, Aloet'ic Pill,* (F.) *Pilules d'aloes* ou *aloétiques. (Aloes in pulv.; saponis,* sing. ℥j; *syr.* q. s. to form 240 pills.—Ph. U. S.) Dose, gr. x to xx, in habitual costiveness.

PILULÆ ALOES ET ASSAFŒ'TIDÆ, *Aloetic and Assafœtida Pills. (Aloes, assafœtidæ, saponis,* sing. ℥ss; *aquæ,* q. s. to form 180 pills.—Ph. U. S.) Purgative and stomachic. Dose, gr. x.

PILULÆ ALOES ET CAMBO'GIÆ, *P. de Aloë et Cambo'giâ, P. Hydrargo'gæ Bon'tii, Pill of Aloes and Camboge. (Aloes, cambog., gum. ammoniat.,* āā p. æ. Make into a powder. Dissolve in vinegar; pass through a cloth; express the residuum strongly; and afterwards evaporate, in a water-bath, to a pilular consistence.—Ph. P.) Purgative; used in dropsy. Dose, gr. xij to xxx.

*Peter's Pills*—a nostrum—are formed of *aloes, jalap, scammony,* and *camboge,* of each equal parts.

The basis of *Morrison's Pills,* often called *Hygiène Pills,* of *Brandreth's Pills,* and *Moffat's Pills,* is said to be aloes, with camboge, scammony, &c.

*Rush's Pills* were formed of *calomel, aloes,* and *camboge,* with *oil of mint.*

PILULÆ ALOES ET COLOCYN'THIDIS, *P. ex Colocynth'idĕ cum aloë, P. Aloes cum Colocynthidĕ, P. coc'cinæ, P. cocchii, P. colocyn'thidis compos'itæ, P. cocciæ mino'res, Pill of Alocs and Colocynth. (Pulp. coloc.* ℥ss; *aloes hepat., scammon,* āā ℥j; *sapon.* ℥ij; *ol. caryoph.* ℥j; *syrup.* q. s.—Ph. D.) Cathartic. Dose, gr. v to x or more.

*Foth'ergill's Pills* consist of *aloes, scammony, colocynth,* and *oxide of antimony.*

PILULÆ ALOES COMPOS'ITÆ, *Pilulæ ex Aloë, Compound Aloetic Pills. (Aloes spic. extract. cont.* ℥j; *ext. gentianæ,* ℥ss; *olei carui,* gtt. xl; *syr.* q. s.—Ph. L.) These are sometimes, also, called *Family pills, Antibilious pills,* &c.

PILULÆ DE ALOE ET FŒ'TIDIS, *P. Benedic'tæ Fulleri, Pill of aloes and fetid gums, Pilulæ ecphrac'ticæ, Female pills, Pilulæ aloes martia'les,* (F.) *Pilules bénites de Fuller. (Aloes socotr., sennæ, assafœtidæ, galbani,* āā ℥ij; *myrrh,* ℥iv; *croci, macis,* āā ℥j; *ferri sulphat.* ℥iss. Reduce to powder separately, and add *ol. succin.* gtt. viij; *syr. artemisiæ,* q. s.—Ph. P.) Purgative, and given in hysteria. Dose, gr. xv to xx.

*Whytt's Pills,* given in similar cases, consisted of *chloride of iron, aloes, extract of horehound,* and *assafœtida.*

PILULÆ ALOES ET JALAP'Æ, commonly called *Anderson's pills, Anderson's Scots' pills, Scotch pills. (Aloes Barbad.* ℔j; *rad. helleb. nigr., rad. jalapæ, potassæ subcarb.* āā ℥j; *ol. anisi,* ℥iv; *syrup. simpl.* q. s.—Gray.) Dose, gr. x to xxx.

A committee of the Philadelphia College of Pharmacy recommend the following: *Aloes Barbadens.* ℥xxiv; *saponis,* ℥iv; *colocynthid.* ℥j; *cambogiæ,* ℥j; *ol. anis.* f℥ss.

PILULÆ ALOES ET KINÆ KINÆ, *P. stomach'icæ P. ante cibum, Pill of aloes and cinchona,* (F.) *Pilules gourmandes. (Aloes socotr.* ℥vj; *ext. cinchon.* ℥iij: *cinnam.* ℥j; *syrup. absinth.* q. s.—Ph. P.) Stomachic and laxative. Dose, gr. x to xx.

*Lady Creepigny's pills, Lady Webster's pills, Lady Hesketh's pills,* and the *Pilulæ stomach'icæ Mesuës* (Ph. L. 1635), resemble these.

*Frank's pills,* much employed, also, as '*dinner pills,*' or,—to use the language of the eccentric Kitchener—as '*peptic persuaders,*' are said to be much used, under the name *Graines de santé,* in various parts of Europe. They consist of *aloes, jalap,* and *rhubarb,* with *syrup of wormwood* as an excipient.

PILULÆ ALOES MARTIALES, P. de aloe et fœtidis.

PILULÆ ALOES ET MYRRHÆ, *P. aloes cum myrrhâ, P. de aloë et myrrhâ, Rufus's* or *Ruffus's pills, Common pills, Pilulæ Rufi* seu *Ruffi, P. commu'nes, Pills of aloes and myrrh. (Aloes,* ℥ij; *croci,* in pulv. ℥ss; *myrrh,* ℥j; *syr.* q. s. to form 480 pills.—Ph. U. S.) Cathartic and emmenagogue. Dose, gr. x to xx.

*Hooper's pills*—possessed of similar properties—according to one of Gray's formulæ, are made as follows; *Ferri sulph., aquæ,* āā ℥viij. Dissolve. Add *aloes Barbad.* ℔ij and ℥viij; *canellæ albæ,* ℥vj; *gum myrrh,* ℥ij; *opopanacis,* ℥iv. The committee of the Philadelphia College of Pharmacy recommend the following form: *Aloes Barbadensis,* ℥viij; *ferri sulphatis exsiccat.* ℥ij, ℥iss, vel *ferri sulph. crystall.* ℥iv; *ext. helleb. nigr.* ℥ij; *myrrh,* ℥ij; *saponis,* ℥ij; *canellæ,* in pulv. tritæ, ℥j; *zingib.* in pulv. tritæ, ℥j.

*Speediman's pills* consist of *aloes, myrrh, rhubarb, extract of chamomile,* and *essential oil of chamomile;* and the *Pills of Barthez,* of *aloes, myrrh, musk, camphor,* and *balsam of Peru.*

PILULÆ DE ALOE ET SAPONE, P. aloeticæ.

PILULÆ ALOES CUM ZINGIB'ERĔ, *Pill of aloes and ginger. (Aloes hepat.* ℥j; *rad. zingib.* in pulv. ℥j; *sapon. Hispan.* ℥ss; *ol. ess. menthæ pip.* ℥ss.—Ph. D.) In habitual costiveness. Dose, gr. x to xx.

PILULÆ AMMONIURE'TI CUPRI, *Pills of Ammoniuret of copper, Pilulæ cupri,* (F.) *Pilules d'ammoniure de cuivre. (Ammoniur. cupri,* in pulv. ten. trit. gr. xvj; *micæ panis,* ℈iv; *aquæ carbonatis ammoniæ,* q. s. Beat into a mass, and divide into xxxij pills.—Ph. E.) Tonic and antispasmodic, in epilepsy, &c. Dose, one pill twice daily; gradually increasing the dose.

PILULÆ ANTE CIBUM, P. aloes et kinæ kinæ.

PILULÆ ANTIBILIO'SÆ, *Barclay's Antibil'ious pills. (Extract de colocynth,* ℥ij; *resin of jalap,* ℥j; *almond soap,* ℥iss; *guaiac,* ℥ij; *emetic tart.* gr. viij; *oils of juniper, carraway, and rosemary,* āā iv drops; *syrup of buckthorn,* q. s. to form 64 pills.) Dose, two or three.

*Dixon's Antibilious pills* are formed of *aloes, scammony, rhubarb,* and *tartarized antimony.*

PILULÆ ANTIHERPETICÆ, Pilulæ hydrargyri submuriatis comp.—p. Antihystericæ, P. galbani compositæ.

PILULÆ ANTISCROPHULO'SÆ, *P. ex ox'ido stib'ii et hydrar'gyri sulphure'to nigro compos'itæ. (P. scammon., hydrarg. sulphur. nigr.* āā ℥ij; *antimonii oxidi albi, milleped., sapon. amygdalin.* āā ℥iij; *extract. glycyrrh.* ℥v. Make into a mass.—Ph. P.) Dose gr. iv to xx.

PILULÆ ANTISPASTICÆ, P. galbani compositæ—p. Assafœtidæ compositæ, P. galbani compositæ.

PILULÆ ASIAT'ICÆ, *Asiat'ic pills, Tanjore pills. (Acid. arsenios.* gr. lv; *piper. nigr.* pulv. ℥ix; *acaciæ,* q. s. ut fiant pil. 800. Each pill contains about one-fifteenth of a grain of arsenious acid. These pills are employed in India for the cure of syphilis and elephantiasis.

PILULÆ ASSAFŒ'TIDÆ, *Assafet'ida pills. (Assafœtid.* ℥iss; *saponis,* ℥ss. Beat with *water* so as to form a mass to be divided into 240 pills.—Ph. U. S.)

PILULÆ BALSAM'ICÆ, *P. Docto'ris Morton. (Milleped,* pulverisat. ℥xviij; *gum. ammon.* ℥xj; *acid. benzoic.* ℥vj; *croci, balsam. Peruv.* āā ℥j; *balsam. sulph. anisat.* ℥vj. Mix.—Ph. P.) Tonic, expectorant, and balsamic.

Pilulæ Benedictæ Fulleri, P. de aloe et fœtidis.

Pilulæ Cambo'giæ Compos'itæ, *P. de guttâ gaman'drâ, P. hydrago'gæ, Gamboge pills, Pilulæ gummi guttæ aloet'icæ, Compound camboge pills,* (F.) *Pilules de gomme gutte composées. (Cambogiæ contritæ, aloes spicat. extrat. contriti., pulv. cinnam. comp.* sing. ℥j; *saponis,* ʒij.—Ph. L.) Cathartic. Dose, gr. x to xx.

*Morrison's pills* are said by Dr. Paris to be nothing more than the above, with the addition of a small portion of *cream of tartar.*

Pil'ulæ Cathar'ticæ Compos'itæ, *Compound cathartic pills.* (*Ext. colocynth. comp.* in pulv. ℥ss; *ext. jalapæ,* in pulv., *hydrarg. chlorid. mit.* āā ʒiij; *gambog.* in pulv. ℈ij. M. Form into a mass with *water,* and make into 180 pills.—Ph. U. S.) Three for a dose.

Pilulæ Cocchii, P. aloes et colocynthidis—p. Cocciæ minores, P. aloes et colocynthidis—p. Coccinæ, P. aloes et colocynthidis—p. Colchici et digitalis, P. Lartigues'—p. Colocynthidis compositæ, P. aloes et colocynthidis—p. ex Colocynthide cum aloe, P. aloes et colocynthidis—p. Communes, P. aloes et myrrhæ—p. Cupri, P. ammoniureti cupri.

Pilulæ Copa'ibæ, *Pills of copaiba.* (*Copaib.* ʒij; *magnesiæ,* recenté præpar. ʒj. Mix, and set aside till it concretes into a pilular mass, to be divided into 200 pills.—Ph. U. S.) Each pill contains nearly five grains of copaiba. Two to six for a dose.

Pilulæ de Cynoglos'so, *P. de extrac'to o'pii. (Pulv. rad. cynogloss., semin. hyoscyam. alb., extract. opii vinos.* āā ʒiv; *pulv. myrrh.* ʒvj; *oliban.* ʒv; *croci., castor.,* āā ʒiss; *syrup opii,* q. s.—Ph. P.) Anodyne. In cough, &c. Dose, gr. iv to gr. viij.

Pilulæ Depurantes, P. hydrargyri submuriatis compos.—p. Ecphracticæ, P. de aloe et fœtidis.

Pilulæ Ferri Carbona'tis, *Pills of carbonate of iron, Vallet's pills, Vallet's ferruginous pills. (Ferri sulph.* ʒviij; *sodæ carbonat.* ʒx; *Mel. despumat.* ʒiij; *sacchar.* ʒij; *aquæ bullientis,* Oij; *syrup.* q. s. Dissolve the sulphate of iron and carbonate of soda, each in a pint of the water, and to each solution add a fluidounce of syrup; then mix the two solutions in a bottle just large enough to contain them; close it accurately with a stopper, and set it by, that the carbonate of iron may subside. Pour off the liquid, and having washed the precipitate with warm water, sweetened with syrup in the proportion of fʒj of the latter to Oj of the former, until the washings no longer have a saline taste, place it upon a flannel cloth, and express as much water as possible; then mix it with the honey and sugar. Lastly, heat the mixture in a water-bath, until it attains a pilular consistence.—Ph. U. S.)

Pilulæ Ferri Compos'itæ, *Compound pills of iron, Pilulæ ferri cum myrrhâ,* (F.) *Pilules de fer composées. (Myrrh.* in pulv. ʒij; *sodæ subcarb., ferri sulph.* āā ʒj; *syrup,* q. s. Mix, to form 80 pills.—Ph. U. S.) Tonic. Dose, gr. x to xx.

Pilulæ Ferri Iod'idi, *Pills of iodide of iron. (Ferri sulphat.* ʒj; *Potass. iodid.* ℈iv; *tragacanth.* pulv. gr. x; *sacchar.* pulv. ʒss. Beat with syrup into a mass, to form 40 pills.—Ph. U. S.) Dose, one to three, where a tonic and eutrophic is indicated.

Pilulæ Ferri cum Myrrhâ, P. Ferri compositæ—p. Fœtidæ, P. galbani compositæ.

Pilulæ Gal'bani Compos'itæ, *P. assafœtidæ compos'itæ, P. fœtidæ, P. gummo'sæ, P. e gummi, Compound galbanum pill, Pilulæ antispasticæ, P. antihyster'icæ, P. myrrhæ compos'itæ, Gum pill. (Galban., myrrhæ,* āā ʒvj; *assafœtidæ,* ʒij; *syrup.* q. s. to form 240 pills.—Ph. U. S.) Antispasmodic and emmenagogue. Dose, gr. x to xx.

Pilulæ Gummi, P. galbani compositæ—p. Gummi guttæ aloeticæ, P. cambogiæ compositæ—p. Gummosæ, P. galbani compositæ—p. de Guttâ gamandrâ, P. cambogiæ compositæ.

Pilulæ ex Helleb'oro et Myrrhâ, *P. ton'icæ, Bacher's pills, Tonic pills of Bacher, Pills of hellebore and myrrh. (Ext. helleb. nig., myrrh.* āā ʒj; *fol. cardui benedict.* in pulv. ʒiij. M.—Ph. P.) Tonic and emmenagogue. In dropsical, cutaneous, and verminous affections. Dose, gr. iv to gr. viij.

*Matthews's pills,*—*Starkey's pills,* are formed of *rad. helleb. nigr., rad. glycyrrh., sapon. Castill., rad. curcumæ, opii purif., syrup. eroci,* āā ʒiv; *ol. tereb.* q. s. ut fiat massa.—Gray.

Pilulæ Hydragogæ, P. cambogiæ compositæ—p. Hydragogæ Bontii, Pilulæ aloes et cambogiæ.

Pilulæ Hydrar'gyri, *P. mercuria'les, Mercurial pill, Blue pill,* (F.) *Pilules de Mercure. (Hydrarg. purif.* ʒj; *conf. rosæ,* ʒiss; *glycyrrh.* pulv. ʒss. Rub the quicksilver with the confection, until the globules disappear; then add the liquorice powder, and beat the whole into a uniform mass, to be divided into 480 pills.—Ph. U. S.) Antisyphilitic; mercurial;—in large doses, purgative.

A purgative pill, much prescribed by Mr. Abernethy, and called *Abernethy's pill,* consisted of *pil. hydrarg.* gr. x; *jalap,* pulv. gr. xx; *syrup rhamni,* q. s. ut fiant pil. vj. Two were given at night, and the next morning a wineglassful of *infusum sennæ.*

Pilulæ Hydrar'gyri Chlo'ridi Mitis, *Pills of mild chloride of mercury, Calomel pills. (Hydrarg. chlorid. mit.* ʒss; *acaciæ,* in pulv. ʒj; *syrup.* q. s. ut fiant pil. 240.—Ph. U. S.) Each pill contains one grain.

Pilulæ de Hydrargyro, Scammo'nio et Aloe, vulgo Mercuria'les, (F.) *Pilules Mercuricles* ou *de Mercure, Scammonée et Atoes. (Hydrarg. purif.* ʒj; *mellis,* ʒxj. Rub until the globules disappear; then add *aloes Socot., scammon.* āā ʒij; *macis, cinnam.* āā ʒij. Make into a mass.—Ph. P.) *Uses,* same as the last, but they are more purgative. Dose, gr. viij to xxx. These pills are nearly the same as the *Pastilles de Renaudot.*

Pilulæ ex Hydrargyro Muriatico miti cum Sulphure Stibiato Aurantiaco, Pilulæ hydrargyri submuriatis compositæ.

Pilulæ Hydrargyri Submuriatis Compositæ, *Pilulæ ex stib'io et hydrar'gyro, P. antihepat'icæ, P. ex hydrargyro muriat'ico miti cum sul'phure stibia'to auriantiaco, P. resolven'tes cum mercurio, P. depurantes, P. hydrargyri submuriatis, Compound pills of submuriate of mercury, Calomel pills, Plummer's pills, Red pill. (Hydrarg. submur., antimon. sulphur. precipitat.* sing. ʒij; *guaiac. gum resin. contrit.* ʒiv; *spirit rect.* ʒss. Beat together.—Ph. L.) Mercurial, and reputed to be diaphoretic and alterative. Dose, gr. v to x.

*Leake's pilula saluta'ria* resembles these. It is used in syphilis.

Pilulæ Mercuriales, P. hydrargyri, P. de hydrargyro, scammonio et aloe—p. Doctoris Morton, P. balsamicæ—p. Myrrhæ compositæ, P. Galbani compositæ.

Pilulæ Opia'tæ, *P. Theba'icæ, Opiate pills, Common night pills, Anodyne pills, Nepen'thes opia'tum,* (F.) *Pilules opiacées. (Opii,* p. 1; *ext. glycyrrh.* p. 7; *fruct. myrt. piment.* p. 2. Mix.—Ph. E.) Five grains contain gr. ss of opium.

PILULÆ OPII, P. saponis cum opio—p. de Extracto opii, P. de cynoglosso—p. ex Oxido stibii et hydrargyri sulphureto nigro compositæ, Pilulæ antiscrophulosæ—p. Resolventes cum mercurio, P. hydrargyri submuriatis compos.—p. de Rhabarbaro, Pilulæ rhei compositæ.

The stomachic nostrum, sold under the name of *Moseley's pills*, consists merely of *rhubarb* and *ginger*.

PILULÆ QUI'NIÆ SULPHA'TIS, *Pills of sulphate of quinia*. (*Quin. sulph.* ℥j; *acaciæ*, in pulv. ʒij; *mel.* q. s. ut fiant pilulæ 480.—Ph. U. S. Each pill contains a grain of the sulphate of quinia.

PILULÆ RHEJ, *Pills of rhubarb*. (*Rhej.* pulv. ʒvj; *saponis*, ʒij. M. et fiant pil. 120.—Ph. U. S.) Each pill contains three grains of rhubarb.

PILULÆ RHEI COMPOS'ITÆ, *P. de Rhabar'baro, Compound rhubarb pills*. (*Rhei*, pulv. ʒj; *aloes*, pulv. ʒvj; *myrrh.* pulv. ʒiv; *ol. menthæ pip.* fʒss. Beat into a mass, with *syrup of orange-peel*, to form 240 pills.—Ph. U. S.) Laxative and stomachic. Dose, gr. x to xx.

*Griffitt's pills*, so called after Dr. S. P. Griffitts, of Philadelphia, who prescribed them as a tonic aperient, were formed as follows:—*Rhej*, pulv. ʒiss; *ferri sulph.* ʒss; *saponis*, ℈ij; *aquæ*, q. s. ut fiat massa in pil. xl dividenda. Dose, three or four at bedtime.

PILULÆ RUFI, P. aloes et myrrhæ—p. Salutariæ, Leake's, see Pilulæ hydrargyri submuriatis compositæ—p. Saponaceæ, P. saponis cum opio—p. Saponis compositæ, P. saponis cum opio.

PILULÆ SAPO'NIS CUM O'PIO, *P. sapona'ceæ, Pills of soap and opium, P. sapo'nis compos'itæ*, (F.) *Pilules de savon et d'opium*. (*Opii*, ʒss; *sapon.* ℥ij. M.—Ph. U. S.) Five grains contain one of opium.

The Pharmacopœia of the United States has a form for the *Pilulæ opii, Opium pills*, as well as for the *Pilulæ saponis compositæ*; the only difference between them being in the proportion of the ingredients. The following is the formula for the Pilulæ opii:—*Opii*, pulv. ʒj; *saponis*, gr. xij. Beat with water into a mass to form 60 pills.

PILULÆ E SCILLÂ, P. scillæ compositæ.

PILULÆ SCILLÆ COMPOS'ITÆ, *P. scillit'icæ, P. scillæ cum zinzib'ere, P. e scillâ, Compound squill pill*. (*Scillæ*, pulv. ʒj; *zingib.* pulv., *ammoniac.* pulv. ää ʒij; *saponis*, ʒiij; *syrup.* q. s. ut fiant pil. 120.—Ph. U. S.) Dose, two pills. Expectorant and diuretic. Dose, gr. x to xx.

PILULÆ SCILLÆ CUM ZINGIBERE, P. scillæ compositæ—p. Scilliticæ, P. scillæ compositæ—p. ex Stibio et hydrargyro, P. hydrargyri submur. compos.—p. Stomachicæ, P. aloes et kinæ kinæ.

PILULÆ STRYCH'NIÆ, *Pills of Strychnia*. (Very pure *strychnine*, 2 gr.; *conserve of roses*, ʒss. Make into 24 pills.) One or two for a dose.

PILULÆ E STY'RACE, *Storax Pills*. (*Styracis pur.* ʒiij, *opii purif., mellis, croci*, sing. ʒj. *Ph. D.*) Six grains contain one of opium.

PILULÆ SUBLINGUALES, Hypoglottides.

PILULÆ DE TEREBIN'THINÂ, *Turpentine Pills*. Made of turpentine boiled in 3 times its weight of water, until, when thrown into cold water, it forms a soft paste, which has the properties of turpentine, and has been administered in gleet, &c.

PILULÆ THEBAICÆ, P. opiatæ—p. Tonicæ, P. ex Helleboro et myrrhâ.

PIL'ULAR, *Pilula'ris*; from *pilula*, 'a pill.' Relating to pills,—as 'a *pilular* mass,' '*pilular* form,' &c.

*PILULES*, Pilulæ—*p. Agrégatives*, see Aggregate—*p. d'Aloes* ou *aloétiques*, Pilulæ aloeticæ—*p. d'Ammoniure de cuivre*, Pilulæ ammoniureti cupri—*p. Bénites de Fuller*, Pilulæ de aloe et fœtidis—*p. de Fer composées*, Pilulæ ferri compositæ—*p. Ferrugineuses de Vallet*, see Ferri protocarbonas—*p. Gourmandes*, Pilulæ aloes et kinæ kinæ—*p. de Mercure*, Pilulæ hydrargyri—*p. de Mercure, &c.*, Pilulæ de hydrargyro, et scammonio et aloe—*p. Mercurielles*, Pilulæ de hydrargyro, scammonio et aloe—*p. Opiacées*, Pilulæ opiatæ—*p. de Savon et d'Opium*, Pilulæ saponis cum opio.

*PILULIER* (F.) *Pill Machine*. An instrument invented by the Germans for rolling and dividing pills. Also, the earthen pot in which pills are preserved.

PILUM, *Pistil'lus, Pistillum, Hyp'eros, Cer'cis*, (F.) *Pilon*. A pestle. A wooden, iron, bell-metal, marble, agate, porcelain, or glass instrument for beating or dividing substances in a mortar.

A *spring pestle* is one attached above to a spring, so as to take off the weight, and thus lessen the labour of pounding.

PILUS, Capillus, Caul, Hair.

PIMELE, Fat.

PIMELECCHYSIS, Pimelorrhœa.

PIMELICUS, Fatty.

PIMELI'TIS, from πιμελη, 'fat,' and *itis*, denoting inflammation. Inflammation of the adipous tissue.

PIMELODES, Fatty.

PIMELO'MA, from πιμελη, 'fat.' A fatty swelling.

PIMELORRHŒ'A, *Pimelec'chysis*, from πιμελη, 'fat,' and ῥεω, 'I flow.' A morbid discharge or disappearance of fat.

PIMELORTHOPNŒ'A, *Piorthopnœ'a*; from πιμελη, 'fat,' ὀρθος, 'upright,' and πνεειν, 'to breathe.' Dyspnœa, practicable only in the erect attitude, owing to fat.

PIMELO'SIS, *Obes'itas nim'ia*, from πιμελη, 'fat.' Conversion into, or formation of, fat,—as *Pimelo'sis hepat'ica*, 'fatty degeneration of the liver.'

PIMELOSIS HEPATICA, Adiposis hepatica—p. Nimia, see Polysarcia.

*PIMENT*, Capsicum annuum—*p. Royal*, Myrica gale.

PIMENTA, see Myrtus pimenta.

PIMENTÆ BACCÆ, see Myrtus pimenta.

PIMENTO, see Myrtus pimenta.

PIMIACULA, Labia pudendi.

PIMPERNEL, BLUE, Scutellaria lateriflora—p. Red, Anagallis—p. Scarlet, Anagallis arvensis—p. Water, Veronica beccabunga.

PIMPILIM, Piper longum.

PIMPINEL, see Pimpinella—p. Italian, Sanguisorba officinalis.

PIMPINELLA ALBA, P. saxifraga—p. Angelicæfolia, Ligusticum podagraria.

PIMPINEL'LA ANI'SUM, *Anise plant, Anisum, A. officina'lē* seu *vulga'rē, Sison ani'sum, A'pium ani'sum, Sola'men intestino'rum, Ane'sum*, (F.) *Anis. Family*, Umbelliferæ. *Sex. Syst.* Pentandria Digynia. A native of Egypt. The seeds, *Ani'sum*, (Ph. U. S.) *Sem'ina Ani'si, Au'iseed*, have an aromatic odour; and a sweetish, warm, grateful taste. They are carminative, and used in dyspepsia and in tormina of infants. Dose, gr. xv to ʒj, bruised. The oil,—OLEUM ANI'SI, (F.) *Huile d'anis*—is officinal. Dose, gtt. v to xv. Most of the oil used in this country under the name of *Oil of Anise* is said to be obtained from *Illicium Anisatum*.

PIMPINELLA, GREATER, P. magna—p. Hircina, P. Saxifraga—p. Laterifolia, Sion ammi.

PIMPINEL'LA MAGNA seu *nigra* seu *major* seu *rubra; Greater Pimpinel'la; Tragoseli'num magnum* seu *majus, Daucus, Cyan'opus*, (F.) *Boucage majeur*. The root has been extolled as diuretic

and resolvent, as well as in erysipelatous ulcerations, tinea capitis, rheumatism, &c.

Pimpinella Major, P. magna—p. Nigra, P. magna—p. Nostras, P. saxifraga—p. Officinalis, Sanguisorba officinalis—p. Rubra, P. magna.

Pimpinella Saxif'raga, *Sax'ifrage, Burnet saxifrage, Pote'rium sanguisor'ba, Sorbastrel'la, Tragoseli'num, T. saxif'raga, Pimpinel'la hirci'na* seu *umbellif'era* seu *alba* seu *nostras*, (F.) *Boucage mineur, Petit B., Pimprenelle.* The root has an unpleasant smell, and hot, pungent, bitterish taste. It has been recommended as a stomachic; and as a stimulating gargle in paralysis of the tongue.

Pimpinella Umbellifera, P. saxifraga.

PIMPLE, Papula.

PIMPLED, Papulose.

*PIMPRENELLE*, Pimpinella saxifraga—*p. Noire*, Sanguisorba officinalis.

PIN. Perhaps from *pennum*, low Latin; or from *spina; Spina fer'rea, Acus capita'ta*, (F.) *Épingle.* An iron or brass instrument, generally of a small size, pointed at one extremity, and having a head at the other. It is used, in Surgery, to fix rollers and dressings; and occasionally in sutures.

*PIN À PIGNON*, see Pinus picea.

PINASTELLUM, Peucedanum.

PINASTER, Pinus sylvestris.

*PINCÉ*, Pinched.

*PINCE LITHODRASSIQUE*, see Lithodrassic.

*PINCÉE*, Pugillus.

PINCERS, Forceps.

*PINCETTES*, Forceps.

PINCHED, *Contrac'tus*, (F.) *Pincé, Grippé.* An epithet applied to the face, when the features are contracted or shrunken; as in violent abdominal affections, or during intense pain.

PINCKNE'YA PUBENS, *P. Pubes'cens, Georgia Bark, Bitter Bark, Florida Bark, Fever tree.* This bark has been used in Georgia in the cure of intermittents, and successfully. It is a powerful bitter. Dose of the powder, ʒj.

PINDARS, Arachis Hypogea.

PINE APPLE, Bromelia ananas—p. Aphernousli, Pinus cembra—p. Ground, Lycopodium complanatum—p. Ground, stinking, Camphorosma Monspeliaca—p. Mountain, see Pinos mughos—p. Mugho, see Pinus mughos—p. Sap, American, Hypopitys lanuginosa—p. Stone, Pinus pinea—p. Sugar, see Arrow Root.

PINEA, Pinus pinea.

PINE'AL, *Pinea'lis*, from *pinus*, 'a pine.' That which resembles a pine-apple.

Pineal Gland, *Glandula pinea'lis, Cerebral epiph'ysis, Cona'rium, Conoi'des corpus, Penis cer'ebri, Corpus turbina'tum, Virga* seu *Turbo cer'ebri*, is a small body, of a conical shape; pale red or grayish colour; and soft consistence; situate between the fornix and the tubercula quadrigemina. It almost always contains sabulous particles, *Sab'ulum cona'rii:* when these are grouped together over the base of the gland, they form the *Acer'vulus Cer'ebri* of Sömmering, *A.* seu *Lapil'li glan'dulæ pinea'lis.* From its anterior part arise two medullary striæ, which proceed over the posterior commissure; coast along the optic thalami, and unite at the anterior pillar of the fornix,—the *habe'næ* or *reins of the pineal gland.*

The uses of the pineal gland are unknown. Descartes supposed it to be the seat of the soul!

PINEI, see Pinus pinea.

PINEOLI, see Pinus pinea.

PINEUS PURGANS, Jatropha curcas.

PINGUEC'ULA, *Pteryg'ium pinguē* seu *lar-da'ceum*, from *pinguis*, 'fat.' 'fatty.' A small, whitish-yellow tumour in the sclerotic conjunctiva and subjacent areolar tissue, close to the margin of the cornea on its nasal or temporal side; so called from its being supposed, but erroneously, to be of a fatty nature.

PINGUE'DO, Fat—p. Renalis, Nephridion.

PINGUIC'ULA VULGA'RIS, *P. alpi'na, Sanic'ula monta'na, S. Eboracen'sis, Vi'ola palus'tris, Dodecath'eon Plin'ii, Butter-wort, Yorkshire San'icle. Family*, Personneæ. *Sex. Syst.* Diandria Monogynia. The unctuosity of this plant has caused it to be applied to chaps, and as a pomatum to the hair. Decoctions of the leaves, in broths, are used by the common people in Wales as a cathartic.

PINGUID, Fatty.

PINGUIDINOUS, Fatty.

PINGUIN, Bromelia pinguin.

PINGUITUDO, Polysarcia adiposa.

PINHOLE PUPIL, see Pupil, pinhole.

PINHONES INDICI, Jatropha curcas.

PINK, CAROLINA, Spigelia Marilandica.

Pink Dye. *Stripped safflower*, ʒj, *subcarb. of potass.* gr. xviij, *spirit of wine* ʒvij; digest for two hours; add *distilled water* ʒij: digest for two hours more, and add *distilled vinegar* or *lemon juice* q. s., to reduce it to a fine rose-colour. Used as a cosmetic.

Pink, Ground, Silene Virginica—p. Indian, Spigelia Marilandica—p. Wild, Silene Virginica.

PINNA, Ala, Pavilion of the ear—p. Marina, see Bissus.

PINNACULUM FORNICIS GUTTURALIS, Uvula.

PINNÆ HEPATIS, Lobes of the liver—p. Naris, see Nasus.

PINNULA, *Aileron.*

PINNULÆ HEPATIS, Lobes of the liver.

PINO'LI. (S.) A preparation used for subsistence on long journeys in the West. It is parched corn, beaten or ground very fine, and sweetened with sugar, to be used with water, and drunk on the march. It is the *cold flour* of the Indians, and early Western pioneers.

PIÑONCILLO TREE, Castiliognia lobata.

PINUS A'BIES, *P. exce'lsa* seu *picea, A'bies, Abies rubra* seu *excelsa* seu *picea, El'atē thelei'a, Pice'a, Norway Spruce Fir, Yew-leaved Fir. Nat. Ord.* Coniferæ. *Sex. Syst.* Monœcia Monadelphia. The tops are used in making *Spruce Beer.*

*Essence of Spruce, Essen'tia Abie'tis*, is a fluid extract, prepared by decoction from the twigs of this species of fir. From this is made *Spruce Beer.*

This fir affords the Burgundy pitch and common frankincense. 1. *Bur'gundy Pitch, White pitch, Pix Burgun'dica, Pix alba, Resi'na abie'tis hu'mida, Resi'na alba humida, Pini abie'tis resina spontē concre'ta, Pix ar'ida, Pix abieti'na, P. abietis* (Ph. U. S.,) (F.) *Poix blanche, Poix grasse, P. jaune, P. de Bourgogne.* This prepared concrete juice is of a close consistence, rather soft, of a reddish-brown colour, and not unpleasant smell. It is very adhesive to the skin; and, consequently, forms excellent plasters for remaining upon the part for some time;—as in cases of affections of the chest. 2. *Abie'tis Resi'na*, (Ph. L. since 1809.) *Thus, Common Frankincense, Perrosin, Thus fœmini'num, T. vulga'rē, Olib'anum vulgarē* seu *sylves'trē, Resina abietis sicca, Resin of the Spruce Fir.* It is solid, dry, brittle; externally, brownish-yellow; internally, whitish. Used in plasters like the last.

Pinus Abies, see P. picea—p. Alba, P. picea.

Pinus Balsame'a, *A'bies balsame'a* seu *bal-*

*samif'era, Peu'cea balsame'a.* The tree which affords the *Canada Balsam, Balsamum Canaden'sē* seu *de Can'ada, Resina strobili'na, Terebinth'ina Canaden'sis, Pini balsame'a, Canada Turpentine* or *Balsam, Balsam of Fir,* (F.) *Baume de Canada,* is one of the purest turpentines. It has the common properties of those substances.

PINUS CANADEN'SIS, *Abies Canaden'sis, Hemlock Spruce.* A tree, which is abundant in Canada, Nova Scotia, and the more northern parts of New England, and is found in the elevated and mountainous regions of the Middle States. The pitch—*Pix Canadensis, Canada Pitch, Hemlock Pitch*—obtained from it is commonly known under the name *Hemlock Gum.*

PINUS CANDICANS, P. Picea.

PINUS CEMBRA, *P. Monta'na, Aphernous'li Pine.* It yields an agreeably scented turpentine:—the *Carpa'thian Balsam, Bal'samum Carpath'icum, B. Lib'ani, Carpath'icum, Briançon Tur'pentine.* The nuts, *Cembro nuts, Nu'dei Cembræ,* have an eatable kernel, and yield oil. The shoots yield *Riga Balsam* by distillation.

PINUS DAMAR'RA, *Ag'athis Damarra,* grows in the East India Islands. The juice speedily concretes into a very hard resin,—the *Damarra turpentine.*

PINUS EXCELSA, P. abies—p. Gallica, P. picea.

PINUS LARIX *A'bies larix, Larix, L. commu'nis* seu *decid'ua* seu *Europæ'a* seu *pyramida'lis.* The *Larch,* (F.) *Mélèze.* From this tree exudes *Or'emberg gum, Bri'ançon manna, Gummi lar'icis* seu *Oremburgen'sē* seu *Uralen'sē, Manna Brigantī'na* seu *laricea.* It also yields, by boring, *Common Venice Turpentine, Resina Lar'icis, Terebinthina Ven'eta* seu *larici'na, Pini Lar'icis resi'na liq'uida,* (F.) *Térébenthine de Vénise, M. de Mélèze.* It is usually thinner than the other sorts of turpentine.

PINUS MUGHOS. The *Mountain* or *Mugho Pine, Pinus Pumil'io.* From the extremities of the branches exudes the *Resina Strobili'na,* of the Germans, or *Hungarian Balsam.* It is also obtained, by expression, from the cones. By distillation, the Hungarian balsam affords the *Krumholz oil, Oleum Templinum.*

PINUS PALUSTRIS, see Pinus sylvestris.

PINUS PICE'A, *P. Abies, A'bies, A. picea* seu *pectina'ta* seu *Gal'lica* seu *alba* seu *can'dicans* seu *vulga'ris* seu *taxifo'lia, European Silver Fir Tree, El'ate,* (F.) *Sapin commun.* By piercing the tubercles of the bark of this fir, the *Strasburg Turpentine* is obtained:—the *Resi'na Abie'tis,* (Ph. L. before 1809,) *Oleum Abietis, Terebinth'ina Argentoraten'sis.*

PINUS PINASTER, see P. sylvestris.

PINUS PI'NEA, *Stone Pine, Pinea, Pinus, P. uber'rima* seu *sati'va.* The nuts, *Zirbel nuts, Pine nuts, Nu'clei Pi'neæ, Pinei, Pine'oli,* (F.) *Pin à pignons,* are eaten raw, or preserved like almonds. They are, also, used in emulsions.

PINUS PUMILIO, see Pinus Mughos—p. Sativa, P. pinea.

PINUS SYLVES'TRIS, *Pinas'ter, Peucē, Scotch Fir.* This pine, as well as *P. marit'ima,* (*P. Pinaster*) and other species of Pinus, affords common turpentine and its oil, resin, tar, and pitch. 1. *Common Turpentine of Europe, Terebinth'ina, T. vulga'ris, T. commu'nis, Resina pini, Bijon, Horse Turpentine, Bordeaux Turpentine,* (F.) *Térébinthine de Bordeaux, Térébinthine commune,* is obtained by wounding the tree in hot weather. It is used, chiefly, as a dressing for wounds, &c., in horses, and for the distillation of the oil, (see Oleum Terebinthinæ.) The *white Turpentine,* or *common Turpentine of America—Terebinth'ina,* Ph. U. S.—is produced chiefly from *Pinus palustris* and *P. tæda,* and perhaps from other species inhabiting the Southern States. When the oil is distilled with water, yellow resin, or *Rosin,* (*Resi'na,* Ph. U. S.)—*Resina flava*—is left, which is only used in the formation of ointments and plasters: if without the addition of water, the residuum is common resin or Colophony. 2. When the cold begins to check the exudation of the common turpentine, part of it concretes in the wounds. This is called, in France, *Gallipot, Barras;* and *White Rosin, Resina alba,* when hardened after long exposure to the air. 3. When the old trees are subjected to distillation, in a coarse manner, Tar is obtained—*Hygropissos, Pissa, Pix ce'dria, Resi'na pini empyreumat'ica liq'uida, Terebinth'ina empyreumat'ica, Alchitram, Alchitu'ra, Cedria, Pix liquida,* (F.) *Goudron, Brai liquide.* Tar water, *Aqua Picea, A. Picis, Infu'sum Picis liq'uidæ* seu *Picis empyreumaticæ liquidæ, Po'tio pice'a,* (F.) *Eau de Goudron,* was, at one time, a fashionable remedy in numerous complaints, and its use has been revived, since its virtues have been presumed to be owing to creasote. It is employed chiefly in pulmonary affections, and the vapour has been recommended in phthisis and other diseases of the lungs. It is used externally as a detergent. 4. *Common Pitch, Pix nigra, Black Pitch, Burnea, Burnia, Stone Pitch, Pix sicca, P. atra, P. nava'lis, Topissa, Palimpis'sa, P. ar'ida* (Ph. L. before 1809), (F.) *Poix navale, P. noire,* is obtained by inspissating tar. It is used only as a resolvent in plasters.

PINUS TÆDA, see P. sylvestris—p. Taxifolia, P. picea—p. Uberrima, Pinus pinea—p. Vulgaris, P. picea.

*PIONE,* Pæonia.

PIONY, Pæonia.

PIORTHOPNŒA, Pimelorthopnœa.

*PIOULQUES,* (F.) A kind of sucking-pump, invented by Louis, for extracting water that had entered internal cavities, in cases of drowning. A useless instrument.

PIPE-PLANT, Monotropa uniflora.

PIPER, see Piper nigrum.

PIPER ALBUM *Leucopiper, White Pepper,* is black pepper freed from its cuticle.

PIPER AUGUSTIFOLIUM, Matico—p. Aromaticum, P. nigrum—p. Betel, Betel—p. Brazilianum, Capsicum annuum—p. Calecuticum, Capsicum annuum.

PIPER CAPEN'SE, a South African species, has all the properties of the peppers, and, in appearance and taste, greatly resembles cubebs. It possesses, too, similar virtues.

PIPER CARYOPHYLLATUM, see Myrtus pimenta—p. Caudatum, P. cubeba—p. Chiapæ, see Myrtus pimenta.

PIPER CUBEB'A, *Per'sea cubeba, Laurus cubeba, Litsæa cubeba* seu *piperi'ta.* A native of Java and Guinea. The odour of these berries—*Cubeba, Com'peper, Compeba, Cubal sini, Piper cauda'tum, Baccæ Piperis glabri, Cubeb Pepper, Tailed Pepper, Cuma'mus,* (F.) *Poivre-à-queue, Quabebe*—is aromatic; taste at first cooling, afterwards pungent. The active principle is an essential oil—*Oleum Cubebæ,* oil of cubebs—which is officinal in the Pharm. U. S. The properties of the cubeb are stimulant and purgative. It is used only in gonorrhœa, Dose, from ℈j to ʒj, in powder, three or four times a day; of the volatile oil, 10 or 12 drops.

'Turkey yellow berries,'—the dried fruit of the *Rhamnus Catharticus*—are often substituted for cubebs.

PIPER GUINEENSE, Capsicum annuum—p. Hispanicum, Capsicum—p. Indicum, Capsicum annuum—p. Jamaicense, see Myrtus pimenta.

PIPER LONGUM, *Macrop'iper, Acapat'li, Catutrip'ali, Pim'pilim, Long Pepper,* (F.) *Poivre*

*long.* As we receive the berries, they consist of the unripe fruit dried in the sun; and are small, round grains, disposed spirally on a cylindrical receptacle. They are stimulant, carminative, and tonic, like the other peppers. Dose, gr. v to ℈j.

PIPER LUSITANICUM, Capsicum annuum—p. Murale, Sedum.

PIPER METHISTICUM, see Ava.

PIPER NIGRUM, *Melanop'iper, Molagoco'di, Lada, Piper aromat'icum, Piper* (Ph. U. S.), *Black Pepper,* (F.) *Poivre noir.* Black pepper is the unripe fruit dried in the sun. *Virtues,* same as those of the other peppers.

PIPER ODORATUM JAMAICENSE, see Myrtus pimenta—p. Tabascum, see Myrtus pimenta—p. Turcicum, Capsicum annuum.

PIPERI'NA, *Piperi'num, Pip'erine, Piperin.* A resinoid substance, obtained from the piper nigrum by M. Œrstadt, in which a part of the virtues of the pepper resides. It has been employed, like the quinia, in intermittents, and successfully.

PIP'EROID, *Piperoï'dum, Zingib'erin.* A yellow syrupy mass obtained by exhausting ginger root by ether. It is soluble in ether, alcohol, and oils, and may be given in tincture, sugar, lozenge, or syrup, in cases where ginger is indicated.

PIPEROPAS'TUS; from πεπερι, 'pepper,' and πασσειν, 'to strew.' Strewed with pepper,—socks, for example, where it is desirable to excite the surface of the feet.

PIPETTE. 'A small pipe.' In Pharmacy, a small tube terminating in a perforated point, which is passed into a liquid to be removed, from the surface of a precipitate, for example. The liquid is drawn into the tube by applying the mouth to the free extremity.

PIPIN'NA, *Men'tula parva.* A small penis.

PIPPERIDGE BUSH, see Oxycantha Galeni.

PIPSISSEWA, Pyrola umbellata—p. Spotted, Pyrola maculata—p. White, Pyrola maculata.

PIPTONYCHIA, Onychoptosis.

*PIQUETÉ,* see *Sablé.*

*PIQURE,* Puncture, Wound, punctured.

PISA, (CLIMATE OF.) Pisa has long been celebrated as one of the most favourable climates in Italy for the consumptive. It is genial, but somewhat oppressive and damp. It is softer than that of Nice, but not so warm; less soft, but less oppressive than that of Rome.

PISCIARELLI, MINERAL WATERS OF. A spring at Monte Secco, in Italy, between Lake Agnano and Solfatara. It is thermal (100° Fahr.), sulphureous, and carbonated, and is chiefly used in old ulcers, leucorrhœa, chronic diarrhœa, and in cutaneous affections.

PISCID'IA ERYTHRI'NA, *Jamaica Dogwood.* A small branching tree, common in most of the West India Islands;—Diadelphia Decandria of Linnæus. It is used in the West Indies to poison fish. It appears to be an acro-narcotic, and has been used in the form of a tincture of the bark of the root in toothach.

PISCINA, *Baignoire.*

PISCIV'OROUS, *Piscivorus, Ichthyoph'agous, Ichthyoph'agus,* from *piscis,* 'a fish,' and *voro,* 'I eat.' Feeding or subsisting on fish.

PIS'IFORM, *Pisiform'is,* from *pisum,* 'a pea,' and *forma,* 'shape.'

PISIFORM'E, OS, *Os lenticula're, Os orbicula're, Os extra or'dinem carpi,* (F.) *Os hors du rang,* is the fourth bone of the first row of the carpus. It is round, and gives attachment to the tendon of the cubitalis anterior, and to the anterior transverse ligament of the carpus. It is articulated, behind, with the os cuneiforme.

PISO, Mortar.

PISSA, see Pinus sylvestris.

PISSASPHAL'TUS, *Pissasphal'tum, Mineral Pitch,* from πισσα, 'pitch,' and ασφαλτος, 'bitumen.' (F.) *Poix minérale.* A thicker kind of *Petroleum* or *Rock oil;* formerly employed as a vulnerary. It is synonymous with *Glu'tinous bitu'men, Malta bitu'men,* and *Mineral tar.*

PISSELÆ'UM, *Oleum Pici'num,* from πισσα, 'pitch,' and ελαιον, 'oil.' An oily matter obtained from boiling pitch, and used for the same purposes as tar.

PISSELÆUM INDICUM, Petroleum.

*PISSEMENT DE SANG,* Hæmaturia.

*PISSENLIT,* Leontodon taraxacum.

PISSE'ROS, from πισσα, 'pitch.' Ancient name of a cerate, prepared of *olive oil, oil of roses,* and *dried pitch.* It was, also, called *Cera'tum pica'tum,* and *C. tetraphar'macum.*—Hippocrates.

PISSI'TES, *Vinum pica'tum.* Same etymon. A wine prepared from tar and the must of the grape. It was regarded to be stomachic.

PISSOSIS, Malacia.

PISSWEED, Anthemis cotula.

PISTACHIO NUTS, see Arachis hypogea, Pistacia vera.

PISTACIA CHIA, P. lentiscus.

PISTA'CIA LENTIS'CUS, *P. Chia, Terebin'thus lentiscus, Lentiscus vulga'ris;* the *Mastich Tree. Family,* Terebinthaceæ. The wood of this tree abounds with the resinous principles of mastich; and a tincture made from it has been used in the cure of dyspeptic affections, gout, and dysentery. It yields, by incision, the resin *Mastich, Resi'na Lentisci'na, Men'frigē, Masti'chē, Mastix, Pistaciæ Lentis'ci Resi'na.* This resin has an agreeable smell when heated: is almost insipid; in globular, irregular, yellowish, semi-transparent masses; soluble in ether; partially so in alcohol. It is stimulant, and has been used in old coughs, and gleet, and is chewed to sweeten the breath. It is sometimes, also, employed, to stop holes in carious teeth.

PISTACIA NARBONENSIS, P. lentiscus—p. Reticulata, P. lentiscus.

PISTACIA TEREBIN'THUS, *P. Narbonen'sis* seu *reticula'ta* seu *vera, Turpentine Tree, Hab-el-Kalimbat, Terebinthus vulga'ris, Terminthos.* The tree which affords the *Cyprus Turpentine, Resi'na Terebin'thi, Terebinth'ina vera, T. Chia, T. Cypr'ia,* (F.) *Térébinthine de Chio.* This substance is classed amongst the resins. It is procured by wounding the bark of the trunk. The best Chio turpentine is of about the consistence of honey; very tenacious, clear, and almost transparent; of a white colour inclining to yellow, and of a fragrant smell; moderately warm to the taste, but free from acrimony and bitterness. It resembles in virtues the other turpentines.

PISTACIA VERA. Name of the tree which affords the *Nux Pistacia. Pista'chio nuts* have a sweetish, unctuous taste, resembling that of sweet almonds. Like these, they afford an oil, and may be formed into an emulsion.

PISTILLUM, Pilum.

PISTOLOCHIA, Aristolochia pistolochia.

PISTORIENSIS GLADIUS, *Bistouri.*

PISUM, *Pisum sati'vum, Pea, Garden pea,* (F.) *Pois, P. cultivé.* The seeds of the pea, *Fam.* Leguminosæ, *Sex. Syst.* Diadelphia decandria, are much employed as an aliment, both in the fresh and dried state. They are farinaceous, and, when dried, not easy of digestion.

PIT, Pock mark—p. of the Stomach, *Fossette de cœur.*

PITAY'A BARK. This bark is preferred in Colombia to any other. It contains a new vegetable alkali, to which the name *Pitayine* has been given.

PITAYINE, see Pitaya bark.

PITCAITHLEY, MINERAL WATERS OF. These saline springs, at Pitcaithley, about four miles from Perth, Scotland, contain chlorides of sodium and calcium.

PITCH, Colophonia — p. Black, see Pinus sylvestris — p. Burgundy, see Pinus abies — p. Canada, see Pinus Canadensis.

Pitch Cap, see Depilatory.

Pitch, Common, Pinus sylvestris—p. Hemlock, see Pinus Canadensis — p. Jew's, Asphaltum — p. Mineral, Pissasphaltum.

Pitch Plaster, see Depilatory, Emplastrum picis.

Pitch, Stone, see Pinus sylvestris — p. White, see Pinus abies.

PITHYRIASIS, Pityriasis.

PITHYRINUS, Acerosus, Furfuraceous.

PITTA'CIUM. A pitch plaster, from *πιττα*, 'pitch.'

PITTING, Pock mark.

PITTOSIS, Malacia.

PITTO'TA. Medicines in which pitch is the chief ingredient.

PITTSBURG, MINERAL WATERS OF. A chalybeate mineral spring, situate about four miles south-west of Pittsburg, in Pennsylvania. It contains chloride of sodium, chloride of magnesium, oxide of iron, sulphate of lime, and carbonic acid.

PITUITA, Mucus, Phlegm—p. Narium, Nasal mucus.

PITU'ITARY, *Pituita'rius*, from *pituita*, 'phlegm.' Concerned in the secretion of mucus or phlegm. A name given to several parts.

Pituitary Body, P. Gland.

Pituitary Fossa, *Fossa Pituita'ria*. A depression on the cerebral surface of the sphenoid bone, which lodges the pituitary gland. It is called, on account of its shape, *Sella Turc''ica*, *Ephip'pium*. Chaussier calls it *Fossa supra-sphenoïda'lis*, from its situation.

Pitu'itary Gland, *Glan'dula Pituito'sa* vel *pituita'ria*, *Glandula basila'ris*, *Lacu'na* vel *Appendic'ula cer'ebri*, *Hypoph'ysis* seu *Appendix cer'ebri*, *Pituitary body*, *Corpus pituita'rē*; — *Appendice sus-sphenoïdale du cerveau*, (Ch.) A small, round body; the anterior portion of which is of a cineritious yellow hue, and the posterior, which is smaller, is whitish and pulpy. Its functions are unknown.

Pituitary Membrane, *Schneide'rian Membrane*, *Membra'na pituita'ria*, *M. olfacto'ria*. The mucous membrane which lines the nasal fossæ, and extends to the different cavities communicating with the nose. In the nasal fossæ, the membrane appears formed of two layers, intimately united; — the one in contact with the bone is fibrous;—the other is free at one surface. The latter is a mucous membrane, on which papillæ are not easily distinguishable, but which contains them, as well as a number of very small mucous follicles, that open into the cavity of the nares. On penetrating the maxillary, frontal, sphenoidal, and ethmoidal sinuses, the membrane becomes very thin, transparent, less vascular, and seems reduced to its mucous layer. The pituitary membrane receives the impression of odours, by means of the expansion of the olfactory nerves upon it. It is the seat of smell.

PITU'ITOUS, *Pituito'sus*; from *pituita*, mucus or phlegm. Consisting of, or resembling, or full of mucus or phlegm.

PITYRI'ASIS, from *πιτυρον*, 'bran;' *Lepido'sis Pityriasis*, *Pityris'ma*, *Pithyri'asis*, *Herpes furfura'ceus*, *H. farino'sus*, *Porri'go* (of some,) *Tin'ea furfura'cea*, *T. porrigino'sa*, *Furfura'tio*, *Furfuris'ea*, *Dandriff*, *Dandruff*, (F.) *Teigne*, *Dartre*, *Dartre furfuracée volante*; — a very superficial affection; characterized by irregular patches of thin scales, which repeatedly exfoliate and recur; but which never form crusts, or are accompanied with excoriations. It is not contagious. It occurs under three or four varieties of form.

Pityriasis, Porrigo — p. Nigra, Melasma — p. Versicolor, Chloasma.

PITYRISMA, Pityriasis.

PITYROIDES, Furfuraceus.

PITYRON, Furfur.

*PIVOINE*, Pæonia.

PIV'OTING. In dentistry, an operation, which consists in fastening in a new crown upon the root of a tooth by means of a piece of gold wire, called 'a *pivot*.'

PIX, Sperm — p. Abietina see Pinus abies — p. Abietis, see Pinus abies — p. Alba, see Pinus abies — p. Arida see Pinus abies, and Pinus sylvestris—p. Atra, see Pinus sylvestris—p. Brutia, Brutia — p. Burgundica, see Pinus abies — p. Canadensis, see Pinus Canadensis — p. Cedria, see Pinus sylvestris — p. Græca, Colophonia — p. Liquida, see Pinus sylvestris—p. Navalis, see Pinus sylvestris — p. Nigra, see Pinus sylvestris — p. Sicca, see Pinus sylvestris.

PLACE'BO, 'I will please.' A medicine, prescribed rather to satisfy the patient than with any expectation of its effecting a cure.

PLACEN'TA. A Latin word, signifying a *Cake*. *P. uteri* seu *uteri'na* seu *uteri car'nea*, *Hepar* seu *Jecur uteri'num*, *Caro* seu *Affu'sio orbicularis*, *Maza*. A soft, spongy, vascular body, adherent to the uterus, and connected with the fœtus by the umbilical cord. It is not in existence during the first period of the embryo state, but its formation commences perhaps with the arrival of the embryo in the uterus. It is generally considered to have two portions, one *fœtal*, and the other *maternal*. The fœtal consists of highly vascular villi and tufts, which contain the inosculating loops of the umbilical arteries and umbilical vein of the fœtus. The maternal portion is considered by Dr. Reid to consist, essentially, of a large sac formed by the inner coat of the vascular system of the mother, into which the maternal blood is poured by the curling arteries of the uterus, and from which it is returned by the utero-placental veins. The tufts and villi of the fœtal placenta are ensheathed by this inner coat of the maternal vascular system; and, according to Prof. Goodsir, two distinct sets of nucleated cells—one maternal and the other fœtal—separate the maternal and fœtal portions where they come in contact, one set of which are probably, he thinks, concerned in the separation of nutritive matter from the maternal blood, and the other destined to convey it into the vessels of the fœtus. The placenta is formed of several *lobes* or *cotyledons*, which can be readily distinguished from each other on the uterine surface; but towards the fœtal surface are confounded into one mass. It is composed of the umbilical vessels, areolar tissue, and whitish, resisting filaments, which are vascular ramifications obliterated. Lymphatic vessels have also been presumed to exist in it; and nerves have been traced, proceeding from the great sympathetic of the fœtus.

The main function of the placenta appears to be like that of the lungs in the adult. It admits of the blood of the fœtus being *shown* to that of the mother, and undergoing requisite changes. It may, also, be an organ for nutritive absorption, as observed above.

Placen'ta Cruoris, see Blood — p. Febrilis.

Ague cake — p. Oblata, P. prævia — p. Obvia, P. prævia.

Placen'ta Præ'via, (from *præ*, 'before,' and *via*, 'way,') *P. ob'via*, *P. obla'ta*. Presentation of the placenta; a condition which gives rise to *unavoidable hemorrhage* from the uterus. The safety of the female depends upon speedy delivery.

Placenta Sanguinis, see Blood — p. Uteri Succenturiata, Decidua.

PLACEN'TAL, *Placenta'lis*. Relating, or appertaining to, the placenta.

PLACENTI'TIS, *Placunti'tis*, *Placoï'tis*, *Inflamma'tio placen'tæ*. A hybrid word — from *placenta*, and *itis*, a suffix denoting inflammation. Inflammation of the placenta.

PLACEN'TULA, 'a little cake.' A rudimental placenta. The placenta of an abortion.

PLACOITIS, Placentitis.

PLACUNTITIS, Placentitis.

PLADAROMA, Pladarosis.

PLADARO'SIS, *Pladaro'ma*, *Pladar'otes*, from πλαδαρος, 'soft.' A soft tumour on the eyelid, unaccompanied with redness or pain.

PLADARÔTES, Pladarosis.

*PLAFOND DES VENTRICULES DU CERVEAU*, Corpus callosum.

PLAGA, Ictus, Wound.

PLAGIOBOL'IA, *Planobol'ia*, from πλαγιος, 'to one side,' and βαλλειν, 'to throw.' Imperfect emission of sperm into the vagina. Emission to one side; sometimes practised to render impregnation less probable.

PLAGUE, from πληγη, *plaga*, 'a stroke.' *Pestis*, *P. orienta'lis*, *P. bubona'ria orientalis* seu *inguina'ria*, *P. contagio'sa*, *P. acutiss'ima*, *P. sep'tica*, *P. Glandulo'sa*, *P. Ade'no-septica*, *P. inguinaria*, *Pestil'itas*, *Ephem'era pestilentia'lis*, *E. mortif'era*, *Lues inguina'ria*, *Clades glandula'ria*, *Phthora*, *Pestilen'tia*, *Lues*, *Loimos*, *Febris ade'no-nervo'sa*, *Lœmos*, *Lœmē*, *Lœ'mia*, *Lœmop'yra*, *Chaosda*, *Anthra'cia Pestis*, *Anthracotyphus*, *Febris pes'tilens*, *Syn'ochus pestilentia'lis*, *Typhus pestis*, *T. pestilentia'lis*, *T. gravis'simus*, *T. anthra'cicus*, *T. Bubon'icus*, *Exanthe'ma pestis*, the *Pest*, *Levant plague*, *Septic* or *glan'dular pes'tilence*, (F.) *Peste*, *Typhus d'Orient*, *Fièvre du Lévant*. An eminently malignant disease; endemic in the Levant; frequently epidemic, and destroying at least two-thirds of those it attacks. It is a fever of the most aggravated kind, with affection of the lymphatic glands of the groin or axillæ, and carbuncles. Its miasmata — it has been conceived—adhere to different organic textures, to woollen goods, clothing and furniture; and may thus be transported to a considerable distance; but this is not certain. The mean duration of the disease is six or seven days; some die in twenty-four hours, others not till ten or twelve days. Pathological anatomy has afforded little light with respect to it. Various means have been used for arresting it, but none have seemed to be pre-eminently distinguished. The great point is, to watch the indications as they develop themselves; and to treat the case, in general, like one of typhus gravior. It is universally agreed that the suppuration of the buboes should be aided as far as practicable. For preventing the importation and spread of the plague, the *Quar'antine Laws* have been instituted; and when the disease has actually appeared, a *cordon sanitaire* has been drawn round the infected district, so as to prevent all communication.

Plague, Cold. A severe form of congestive fever, seen in the Southern States. Bilious pneumonia, in which there is no reaction, has been, also, so called.

Plague Mark, Plague token.

Plague, Pali. A malignant fever, greatly resembling Plague, which prevailed in Rajpootana after July, 1836.

Plague Spot, Plague token.

Plague Token, *Plague mark*, *Plague spot*. A mark by which one struck with the plague was known. Perhaps the early stage of carbuncle in unfavourable cases. It is described as a small tubercle — *Bossa* — somewhat resembling a wart, callous and more or less deficient in sensibility, varying in size from that of a millet-seed to that of a bean.

PLAGULA, Compress, Pledget, Splint.

*PLAIE*, Wound — *p. d'Arme à feu*, Wound, gunshot — *p. d'Arquebusade*, Wound, gunshot — *p. Contuse*, Wound, contused — *p. Envenimée*, Wound, poisoned — *p. par Arrachement*, Wound, lacerated — *p. à Lambeaux*, see Flap.

PLANANTHUS FASTIGATUS, Lycopodium selago — p. Selago, Lycopodium selago.

PLANARIA LATIUSCULA, Distoma hepaticum.

*PLANCHER* (F.), 'floor.' In anatomy, the inferior wall or boundary of a cavity.

*PLANCHER DU CERVEAU*, Tentorium.

PLANCUS, Leiopus.

PLANE, Plexus — p. Mesial, see Mesial.

PLANET-STRUCK, see Sideratio.

PLANE'TES, *Plane'ticus*, *Plan'icus*, *Errabun'dus*, *Errat'ic*. An epithet given to diseases, whose returns are irregular — especially to intermittent fever; *Planetes Febris*, *F. Errat'ica*, *F. Erro'nea*, *F. Vaga*.

PLANETICA ARTHRITIS, Gout, wandering.

PLANICUS, Planetes.

PLANIPEDES, Steganopodes.

PLANITIES PEDIS, Sole.

PLANOBOLIA, Plagiobolia.

PLANTA NOCTIS, Hydroa, Sudamina — p. Pedis, Sole — p. Prima pedis, Tarsus.

PLANTA'GO, *P. Major*, *Centiner'via*, *Arnoglos'sum*, *Septiner'via*, *Polyneu'ron*, *Heptaplew'ron*, *Planta'go latifo'lia* seu *major* seu *vulga'ris*, (F.) *Plantain commun*. *Family*, Plantagineæ. *Sex. Syst.* Tetrandria Monogynia. The leaves have been said to be refrigerant, attenuant, substyptic, and diuretic.

Plantago Aquatica, Alisma plantago.

Plantago Coron'opus, *Coronopo'dium*, *Cornu cervi'num*, *Stella terræ*, *Plantago*, *Buckshorn Plantain*. Properties like the last.

Plantago Nitida, P. psyllium.

Plantago Psyl'lium, *P. nit'ida*, *Psyl'lium*, *P. erec'tum*, *Pulica'ris herba*, *Crystal'lion*, *Cynomoi'a*, *Branching Plantain*, *Fleawort*, (F.) *Herbe aux puces commune*. The seeds have a nauseous, mucilaginous taste, and no remarkable smell. The decoction of the seeds is recommended in hoarseness and roughness of the fauces.

Plantago Vulgaris, Plantago.

PLANTAIN, BRANCHING, Plantago psyllium — p. Buckshorn, Plantago coronopus — *p. Common*, Plantago — *p. d'Eau*, Alisma plantago — p. Rattlesnake, Goodyera pubæscens — p. Robin's, Erigeron bellidifolium — p. Tree, Musa paradisiaca — p. Water, Alisma plantago, Unisema deltifolia.

*PLANTAIRE*, Plantar musele — *p. Grêle*, Plantar musele.

PLANTAR, *Planta'ris*, from *planta*, 'the sole of the foot.' That which relates or belongs to the sole of the foot. This name has been given to several parts.

Plantar Aponeuro'sis, *P. fas'cia*. A thick, dense, resisting aponeurosis; of a triangular shape, and superficially situate, which occupies

the middle and sides of the sole of the foot, and furnishes insertions to several of the muscles of the region, either directly or through the medium of septa, which it sends between them.

Plantar Arch, see Plantar arteries.

Plantar Arteries. These are two in number, and arise from the extremity of the posterior tibial artery. They are distinguished into:—The *internal plantar artery*, situate above the abductor pollicis pedis. It extends from the termination of the posterior tibial to the trunk of one of the collaterals of that toe. The *external plantar artery* is larger than the preceding, and ought to be considered as the termination of the posterior or tibial. Situate above the flexor communis digitorum pedis, it extends from beneath the calcaneum to the posterior extremity of the last metatarsal space. When it has reached this part, it turns from without inwards; advances towards the posterior extremity of the first metatarsal bone, and anastomoses with the perforating branch of the *dorsalis tarsi*. In the first part of its course, it furnishes calcaneal, articular, muscular, and adipous branches. The second portion of the artery is called the *Plantar Arch* or *Cross*. It gives branches in all directions. The inferior and posterior have received no name. The superior—three in number—are the *posterior perforating arteries*. The anterior branches are larger, and there are commonly four. They furnish the *anterior perforating*, and the *collaterals* of the last four toes.

Plantar Cross, see Plantar arteries—p. Fascia, P. aponeurosis.

Plantar Ligaments. A name given to the inferior ligaments, which unite the bones of the tarsus and metatarsus, to distinguish them from the superior, called *dorsal*.

Plantar Muscle, *Planta'ris*, *P. grac''ilis*, *Tibia'lis grac''ilis*, *Exten'sor tarsi minor*, (F.) *Plantaire*, *P. Grêle*, *Jambier grêle*, *Petit fémoro-calcanien*, (Ch.) A muscle, situate at the posterior part of the leg. It is long, thin, and narrow. Above, it is attached to the posterior part of the external condyle of the os femoris: below, it terminates by a long tendon, which is attached to the posterior and inner part of the calcaneum. This muscle extends the leg on the foot, and conversely. It can, also, assist in the flexion of the leg on the thigh.

Plantar Nerves. These are two in number, and are furnished by the termination of the posterior tibial nerve. They are distinguished into — 1. The *internal plantar nerve*, which extends from the inferior part of the tibial nerve to both sides of the first three toes, and the inner side of the fourth. It furnishes, also, branches to the abductor of the great toe; to the short flexor of the toes; to the accessory; to the short flexor of the great toe, the lumbricales, &c. 2. The *external plantar nerve* proceeds from the termination of the posterior tibial to the posterior extremity of the 5th metatarsal bone, and gives branches to the flexor brevis digitorum pedis, the accessory and the abductor of the little toe. This trunk subsequently divides into two branches; — the one—*profunda*—is distributed to the short flexor of the great toe: the interosseus and abductor pollicis pedis: the other — *superficialis* — sends filaments to the short flexor of the little toe, the two sides of that toe, the outer side of the 4th, and the last lumbricalis.

Plantar Regions or Surfaces are different regions or surfaces of the sole of the foot. Three are generally reckoned, — the *internal*, *middle*, and *external*.

Plantar Veins follow a similar arrangement.

PLANTARIA, Dengue.

PLANTARIS, Plantar, P. muscle—p. Superficies pedis, Sole—p. Verus, see Flexor longus digitorum pedis profundus perforans (accessorius.)

PLANTARIUM, Pubes.

*PLANTE DU PIED*, Sole.

*PLANTI-SOUS-PHALANGIENS*, Lumbricales pedis—*p. Tendino-phalangiens*, Lumbricales pedis.

PLANUM AFONEUROTICUM DIAPHRAGMATIS. The tendinous expansion of the diaphragm.

Planum Os, from *planus*, 'soft, smooth.' The papyraceous or orbitar plate of the ethmoid bone was formerly so called.

Planum Pedis, Sole.

Planum Supe'rius Linguæ. The upper surface of the tongue.

PLANU'RIA, from πλανος, 'wandering, false,' and ουρον, 'urine.' Discharge of urine through unwonted ways.

*PLAQUEMINIER D'EUROPE*, Diospyros lotus.

*PLAQUES GAUFRÉES*, Peyeri glandulæ—*p. Laiteuses*, see *Taches laiteuses*.

PLASMA, Liquor sanguinis.

PLASMEXHIDRO'SIS, from *plasma*, the *liquor sanguinis*; εξ, 'out of,' and 'ιδρωσις, 'perspiration.' Exudation of the plasma of the blood from the vessels.

PLASTER, Emplastrum — p. Adhesive, Emplastrum resinæ, Sparadrapum adhesivum — p. Adhesive, Baynton's, see Emplastrum resinæ—p. Adhesive, of pitch and resins, Emplastrum de pice et resinis glutinans — p. Ammoniacum, Emplastrum ammoniaci—p. Ammoniacum with mercury, Emplastrum ammoniaci cum hydrargyro — p. Aromatic, Emplastrum aromaticum — p. Asafœtida, Emplastrum asafœtidæ — p. of Belladonna, Emplastrum belladonnæ — p. Blister, Blister —p. Isinglass, see Sparadrapum adhæsivum — p. Issue, Sparadrapum pro fonticulis—p. Lead, Emplastrum plumbi —p. Machine, *Sparadrapier*—p. Mercurial, Emplastrum hydrargyri—p. of Mercury, compound, Emplastrum hydrargyri compositum—p. Nuremberg, Emplastrum Norimbergense — p. Opium, Emplastrum opii — p. Pitch, see Depilatory — p. Pitch, comp., Emplastrum picis compositum — p. Resin, Emplastrum resinæ — p. of Red oxide of iron, Emplastrum oxidi ferri rubri — p. Soap, Emplastrum saponis — p. of Spanish flies, compound, Emplastrum lyttæ compositum—p. Sticking, Emplastrum resinæ—p. Strengthening, Emplastrum ferri, Emplastrum oxidi ferri rubri — p. Warm, Emplastrum calefaciens — p. Wax, Emplastrum ceræ.

PLASTIC, *Plas'ticus*, *Formati'vus*, *Form'ative*, from πλασσω, 'I form.' That which forms, or serves to form.

Plastic Element. One which bears within it the germs of a higher form. — Gerber.

PLASTIC FORCE. The generative or formative power in organized bodies. It is also called *Nisus formati'vus, Vis* seu *Virtus plas'tica* seu *formati'va, Vis essentia'lis* seu *reproductiva, Fac'ultas formatrix* seu *nutrix* seu *auctrix* seu *vegetati'va; Blas alterati'vum, Motus assimilationis, An'ima vegetati'va, Plasticism'us, Virtus formatrix, Plastic''itas, Plastic''ity, Force of Nutrition, F. of assimilation, Force of Form'ation, Force of vegeta'tion, Puissance du moule intérieur* (Buffon), Bildungstrieb, *Germ-force* of the Germans.

PLASTIC LYMPH, Liquor Sanguinis—p. Surgery, Morioplastice.

PLASTICIMUS, Plastic Force.

PLASTICITAS, Plastic Force.

PLASTICITY, Plastic Force.

PLASTILYTIC, Antiplastic.

PLASTILYTICUM (HÆMATOLYTICUM), Spanæmic.

PLATA, Scapula.

PLATANO, Musa Sapientum.

PLATANTHE'RA ORBICULA'TA, *Large round-leaved Orchis;* indigenous. *Order* Orchidaceæ; flowering in July. The leaves are large, soft and fleshy, and are used, in certain places, for dressing blisters.

PLATANUS, Musa paradisiaca.

PLATEA, Bothriocephalus latus.

PLATES, MANSFORD'S, see Galvanism.

PLATIAS'MUS, from πλατυς, 'broad.' Excessive development of the lips, causing the articulation to be imperfect.

PLATINA, Platinum.

PLAT'INUM, *Plat'ina*, from (S.) *plata*, 'silver.' The preparations of platinum resemble in their therapeutical properties those of gold. The BICHLO'RIDE, *Plat'ini Bichlo'ridum*, made by dissolving *platinum* in *aqua regia*, and the DOUBLE CHLORIDE of PLATINUM and SODIUM, *So'dii chloroplat'inas, Chloroplat'inate of So'dium*, prepared by dissolving *bichloride of platinum* and pure *chloride of sodium*, in proper proportions, in water, evaporating and crystallizing,—are the preparations used. They are not much prescribed.

PLATULA, see Pediculus.

PLATYBREGMATE, see Cranium.

PLATYCORIA, Mydriasis.

PLATYCORIASIS, Platycoria.

PLATYNO'SIS, from πλατυς, 'broad.' *Amplifica'tio.* Morbid extension of parts.

PLATYOPHTHALMON, Antimonium.

PLATYPOLIA, see Kyllosis.

PLATYPUS, see Kyllosis.

PLATYS'MA, from πλατυς, 'broad.' Any thing broadly extended. A spread plaster.

PLATYS'MA MYOÏDES, *P. Myo'des, Mus'culus cuta'neus, M. subcuta'neus* (Winslow), *Quadra'tus genæ* vel *latis'simus colli, Expan'sio muscalo'sa, Tetrago'nus, Stomoman'icon*, (F.) *Thoraco-maxillo facial, Thoraco-facial* (Ch.), *Peaucier.* A muscle situate superficially on the lateral parts of the neck. It is flat, broad, and quadrilateral. Its fibres, which are all parallel to each other, pass obliquely downwards, and from without inwards. They arise from the areolar tissue, which covers the anterior and superior part of the chest; pass before the clavicle, and proceed to attach themselves at the interior part of the symphysis menti, at the external oblique line of the jaw, and at the commissure of the lips. The fibres of this last insertion form a distinct fasciculus, called by some anatomists *Mus'culus Riso'rius Santori'ni.* The platysma myoides depresses the commissure of the lips, and carries it outwards. It contributes, also, to the depression of the lower jaw. When it contracts, it wrinkles the skin of the neck transversely.

PLATYSTER'NOS, from πλατυς, 'broad,' and στερνον, 'the sternum.' One who has a broad well developed chest.—D. Pechlin.

PLATYS'TOMUS; from πλατυς, 'broad,' and στομα, 'mouth.' One who has a broad mouth.

PLAUTUS, Leiopus.

PLECHAS, Perinæum.

PLECTANÆ, Cornuà uteri.

PLEC'TANE, *Plica, Plegma, Plexus.* A fold; a plexus. Also, a cornu of the uterus.

PLEC'TRUM. The styloid process of the temporal bone. Also, the uvula, and the tongue.—Castelli.

PLEDGET, (D.) Plagghe, *Plumace'olus, Linteo'men, Plag'ula*, (F.) *Plumaceau, Plumasseau.* A small compress or *gâteau* of lint—(the filaments arranged parallel to each other)—flattened between the hands after the extremities have been cut off or folded down. It is applied over wounds, ulcers, &c., to preserve them from the contact of the air, to retain dressings *in situ*, and to absorb the discharges.

PLEGE, Blow, Ictus.

PLEGMA, Plectane, Plexus.

PLEGOMETER, Pleximeter.

*PLEIN*, (F.) 'Full.' The middle part of a roller.

PLEIOMASTHUS, Polymasthus.

PLEIOMAZIA, see Polymasthus.

PLENA MULIER, Pregnant.

PLENITUDE, Fulness.

PLENITUDO, Plethora.

PLENCK'S DEPILATORY, see Depilatory, Colley's.

PLEONEC'TICA ATHYM'IA SEU MELANCHO'LIA. A form of insanity characterized by a desire for gain or by covetousness.

PLEONEC'TICUS, from πλειον, 'more,' and εχειν, 'to have.' Covetous. Desirous to acquire: hence *mania pleonectica.*

PLERO'SIS, from πληρης, 'full;' also *Replet'io, Refec'tio, Reple'tion.* Restoration of flesh after sickness. Plethora.

PLEROTICUS, Incarnans.

PLES'MONÉ, *Plenitu'do, Sati'etas, Sati'ety.* Intemperance. A condition the opposite to that of hunger.

PLESSER, Plexor.

PLESSIMETER, Pleximeter.

PLETHOMER'IA, from πληθος, 'many,' and μερος, 'a part.' Superabundance of parts, as in the case of six fingers to one hand.

PLETHO'RA, from πληθω, 'I fill.' *Polyæ'mia, Polyhyperhæ'mia, Panhyperæ'mia, Polychym'ia sanguin'ea, Angeioplero'sis, Angioplero'sis, Erythræ'mia, Erythro'sis, Hæmatopletho'ra, Hæmopletho'ra, Plenitu'do, Multitu'do, Redundan'tia, Reple'tio, En'chyma, Comple'tio, Pleth'ory, Reple'tion, San'guineness, Fulness*, (F.) *Abondance, Rédondance.* The word *plethora*, which means repletion, *Plero'sis*, expresses a superabundance of blood in the system, or in some part of it:—hence the division of plethora into *general* and *local;* the latter being called, according to its seat, *cerebral, pulmonary, uterine*, &c. The principal symptoms of plethora exist in the circulatory system; such as redness of the surface, swelling of the veins, increase in the fulness of the pulse, in the strength of the heart's pulsations, &c., with spontaneous hemorrhages occasionally. With these are usually united general heaviness, torpor, lassitude, vertigo, tinnitus aurium, flushes of heat, &c. The blood of plethoric persons differs from healthy blood in the smaller ratio of water which it contains, and especially in the augmentation of the red corpuscles.

The tendency to plethora, or its actual existence, must be obviated by purgatives, proper diet,

exercise, &c.; and, if the danger from it be pressing, by blood-letting. This is, however, a doubtful remedy for general plethora, as it increases hæmatosis.

PLETHORA, LOCAL, Hyperæmia.

PLETHOR'IC, *Pletho'ricus, Polycæ'mic, Polycæ'micus, Sanguine, Sanguineous,* (F.) *Pléthorique.* Same etymon. Full of blood. Relating to or affected with plethora.

PLETHORICUS, Plethoric.

PLETHORY, Plethora.

PLETHOS, Satiety.

PLEUMON, Pulmo.

PLEUMONIA, Pneumonia.

PLEURA, *Pleurum, Pleuro'ma,* 'the side, a rib.' *Membra'na pleurit'ica succin'gens* seu *costas succin'gens, Membra'na* seu *Tu'nica costalis* seu *subcosta'lis, Hypopleu'rios,* (F.) *Plèvre* ou *Pleure.* The pleuræ are two thin, diaphanous, perspirable membranes, which line each side of the chest, and are reflected thence upon each lung. Like all serous membranes — to which class they belong—each represents a sac without aperture. From the junction of the pleura of each side the mediastina are formed. That portion of the pleura which lines the parietes of the chest is called *Pleura Costa'lis;* the portion that covers the lungs, *Pleura Pulmona'lis.* The arteries of the pleuræ are from the the intercostals, internal mammaries, phrenic, inferior thyroid, &c. The veins correspond with the arteries. They are, also, supplied with lymphatics, but nerves are not traceable in them.

*Pleura* is also used for *Cavity of the Pleura, Saccus Pleuræ.*

PLEURÆ. The sides of the chest.

PLEURAL, *Pleura'lis, Pleu'ricus, Pleu'rites.* That which concerns the pleura; — as a *pleural* fistula;—*pleural* cavity, *pleural* hemorrhage, &c.

PLEURALGIA, Pleurodyne.

PLEURAPOPHYSES, Costæ veræ, see Costa.

PLEURAPOSTEMA, Empyema.

PLEURARTHROC'ACĒ, from πλευρα, 'a rib,' αρθρον, 'a joint,' and κακος, 'bad.' Caries of the ribs.

*PLEURE,* Pleura.

PLEURESIA, Pleuritis.

*PLEURÉSIE,* Pleurisy.

PLEURESIS, Pleuritis.

*PLEURÉTIQUE,* Pleuritic.

PLEURICUS, Pleural.

PLEURIS, Pleuritis.

PLEURISY, Pleuritis.

PLEURISY, BILIOUS, *Pleuri'tis bilio'sa.* Pleurisy accompanied with bilious symptoms; — the effect of duodenitis or duodeno-hepatitis.

PLEURISY, FALSE, Pleurodynia.

PLEURISY, HEAD. A ridiculous term, occasionally used by the vulgar, in the Southern States especially, for bilious pneumonia before the pneumonitic phenomena are developed, and whilst the head is prominently affected.

PLEURISY, HEMORRHAGIC, Hæmatothorax — p. Rheumatic, Pleurodynia — p. Root, Asclepias tuberosa.

PLEURISY, TYPHOID, *Pleuri'tis typhoï'des* seu *typho'des* seu *typho'sa.* Pleurisy accompanied by adynamic symptoms.

PLEURITES, Pleural.

PLEURIT'IC, *Pleurit'icus, Pleurit'ical,* (F.) *Pleurétique;* same etymon as *pleuritis.* Relating or appertaining to pleuritis — as *'pleuritic* pain.'

PLEURI'TIS, from πλευρα, 'the pleura;' *Morbus latera'lis, M. pleurit'icus, M. Costa'lis, Empres'ma Pleuritis, Pleuris, Pleure'sis, Pleure'sia, Pleuritis costa'lis* seu *vera, Pleurit'ica Febris, Cauma Pleuri'tis, Passio pleurit'ica, Inflamma'tio Pleuræ, Pleurisy, Inflamma'tion of the Pleura,* (F.) *Pleurésie, Fièvre pleurétique, Inflammation de la Plèvre,* may be acute or chronic. Perhaps the most violent of all internal inflammations is the active form; known by acute, lancinating pain in one side of the chest, increased by inspiration, by coughing, and often by pressure; dyspnœa, the inspirations short and frequent; cough dry, or with little expectoration; and difficulty of lying on the affected side. Symptoms, attending the phlegmasiæ in general, strongly marked.

*Physical Signs.* There is seldom any perceptible alteration in the exterior of the chest. When effusion has taken place to a great extent, the signs will be similar to those of chronic pleurisy. The motion of the affected side is diminished, and the vibrations of the voice cannot be detected by the hand. There is more or less dulness of sound on percussion, the dulness diminishing or disappearing by change of position. On auscultation, the inspiration is feeble, distant, or inaudible; but change of position modifies it. Egophony is usually present, when the effusion is in moderate quantity, and is best heard over a portion of the thoracic parietes, represented by a band of three inches, running from below the inferior margins of the scapula in the direction of the ribs to the sternum. Simple pleurisy rarely attacks both sides at once: when such is the case, the presence of tubercles may be suspected.

Formerly, a *true pleurisy* meant one seated in the pleura: a *mediastinal pleurisy,* one situated in the anterior mediastinum; and *false pleurisy* or *rheumatismal pleurisy,* that which occupies the intercostal muscles. The last has received the name *Pleurodyn'ia;* that of *pleurisy* being exclusively appropriated to inflammation of the pleura. Pleurisy has also been distinguished into *dry* and *humid,* according as it is or is not accompanied by expectoration. *Humid* or *moist pleurisy* is now properly regarded as a complication of pleurisy with pulmonary catarrh. It is the *catarrhal pleurisy* of some. The majority of the species of pleurisy, admitted by Sauvages, consist of complications.

The causes of pleurisy are like those of other internal inflammations. It may terminate by resolution, effusion, or suppuration.

CHRONIC PLEURISY, which has been particularly described by Bayle, Broussais, and Laënnec, most commonly terminates by a serous or purulent effusion, which sometimes simulates hydrothorax; at others, phthisis pulmonalis. It may form slowly, without evident symptoms; or it may succeed acute pleurisy. In the former case, vague pains are felt in the chest, with small, dry cough, oppression at intervals, shivering, irregular febrile symptoms, and hardness of pulse.

*Physical Signs.* The affected side is smoother, more rounded and motionless; the intercostal spaces are dilated and filled up, or may even protrude slightly. In very chronic cases, however, the affected side may be smaller. The triangular space above the clavicle and the depression immediately above the sternum are often drawn downwards on the diseased side. No vibration is experienced by the hand when the patient speaks. The parietes of the thorax are sometimes œdematous, and fluctuation may be occasionally felt between the ribs. On percussion the sound is dull, or if clear, only so in the upper portions of the chest. On auscultation, there is an absence of the usual sounds over the affected parts, excepting occasionally transmitted sounds. There are no physical signs that can enable us to know whether pus or serum is effused into the chest. The introduction of a grooved needle through the intercostal space, as recom-

mended by Dr. Thomas Davies, would of course settle the question.

On *dissection* of those who have died of pleurisy, the pleura is found thickened, red, inflamed, and covered with membranous exudations or false membranes. Sometimes it seems cartilaginous and ossified. Its cavity frequently contains serous or sero-purulent effusions.

The acute form of the disease requires the most active treatment. General blood-letting, to such an extent as to make a very decided impression on the system, and repeated if necessary. This is the most important agent. After the violence of the disease has been got over, counter-irritants will be found highly beneficial; as well as when it has passed into the chronic state. The cough may be relieved by demulcents.

Sauvages has given the name Pleuri'tis Ventosa, and Pringle that of Pleurodyn'ia Ventosa, to a pain behind the false ribs, attributed to the presence of air in the intestines.

Pleuritis Bronchialis, Bronchitis — p. Costalis, Pleuritis — p. Diaphragmatica, Diaphragmitis — p. Humida, Bronchitis — p. Muscularis, Pleurodynia — p. Notha, Pleurodynia — p. Pericardii, Pericarditis — p. Pulmonis, Pleuropneumonia—p. Rheumatica, Pleurodynia—p. Spuria, Pleurodynia—p. Spuria simulata, Pleurodynia—p. Typhoides, see Pleuritis, (biliosa) — p. Vera, Pleuritis.

PLEUROCE'LĒ, from πλευρα, 'the pleura,' and κηλη, 'a tumour.' *Hernia of the pleura, Hernia pleu'rica et pulmona'lis.* This name, employed by Sagar, is inaccurate, as the pleura never protrudes alone. It only forms a hernia, when it serves as an envelope to the lung, to tumours, or to purulent collections, which have protruded from the thoracic parietes.

PLEUROCOLLE'SIS, from πλευρα, 'the pleura,' and κολλαω, 'I glue.' An adhesion between the pleura costalis and pleura pulmonalis.

PLEURODYNE, Pleurodynia.

PLEURODYN'IA, *Pleural'gia, Pseudo-pleuri'tis, Pseudo-pleurisy, Pleurod'ynē, Autal'gia doloro'sa, A stitch, Pain in the side, Stitch in the side, Parapleuri'tis; Stethorrheu'ma, Rheumatis'mus pec'toris, Pleuri'tis rheumat'ica, P. muscula'ris, P. spu'ria, False Pleurisy, Rheumat'ic* or *rheumatis'mal pleurisy, Pleuri'tis notha* seu *spu'ria* seu *spu'ria simula'ta, Pneumo'nia exter'na, Lagonop'onos, Thoracod'ynē, Dolor Pec'toris exter'nus,* (F.) *Point de côté, Douleur de côté;* from πλευρα, 'the side or pleura,' and οδυνη, 'pain.' A spasmodic or rheumatic affection, generally seated in the muscles of the chest, and, ordinarily, in the intercostals. It is usually augmented by outward pressure, inspiration, coughing, exertion, moving the thorax, and sometimes even the corresponding arm. It is unaccompanied by fever, cough, or dyspnœa, excepting under the form of a *stitch,* when dyspnœa exists. It is, generally, by no means obstinate, and yields promptly to warm applications and to cupping or leeches. If it still resist, a blister will, almost always, remove it.

Pleurodynia Ventosa, Pleuritis ventosa.

PLEUROMA, Costa, Pleura.

PLEUROPATHI'A, from πλευρα, 'the pleura,' and παθος, 'a disease.' A disease of the pleura.

PLEUROPERIPNEU'MONY, *Pleuroperipneumo'nia, Pleuropneumo'nia, Pneumonopleure'sis, Pneumonopleuri'tis, Pleuritis pulmo'nis, Pneumo'nia pleuritis.* Inflammation occupying the pleura and the lung at the same time. Pleurisy and peripneumony existing simultaneously. *Physical signs.* A dull sound is yielded by percussion for a variable extent over the more dependent portions of the affected side. The loss of sound is partially modified by change of position. The respiratory murmur on auscultation is very feeble or absent inferiorly; higher up, the crepitation or bronchial respiration of pneumonia may be detected; round the root of the lung, and near the inferior angle of the scapula, egophony is generally present. There is seldom much enlargement of the affected side, or displacement of the adjacent organs, as in the case of simple chronic pleurisy.

PLEUROPNEUMA, Pneumathorax.

PLEUROPNEUMONIA, Pleuroperipneumony.

PLEUROPNEUMONITIS, Pleuroperipneumony.

PLEUROPYESIS, Empyema.

PLEURORRHŒ'A, from πλευρα, 'the side,' and ρεω, 'I flow.' Accumulation of fluid in the pleura.

Pleurorrhœa Chylosa, Chylothorax—p. Lymphatica, Hydrothorax — p. Purulenta, Empyema — p. Sanguinea, Hæmatothorax—p. Serosa, Hydrothorax.

PLEURORTHOPNŒ'A, from πλευρα, 'the side,' ορθος, 'erect,' and πνεω, 'I respire.' Pain of the side, which does not permit the patient to breathe, except when in the vertical position.

PLEUROSO'MUS, from πλευρα, 'side,' and σωμα, 'body.' A malformation in which the fissure is somewhat lateral, with eventration extending chiefly upon the upper part of the abdomen and upon the chest; the upper extremity of the fissured side being more or less atrophied. —Vogel.

PLEUROSTO'SIS, from πλευρα, 'the pleura,' and οστεον, 'a bone.' Ossification of the pleura, or in the cavity of the pleura. *Osteopleu'ria.*

PLEUROTETANUS, Pleurothotonos.

PLEUROTHOT'ONOS, *Pleurot'onos, Pleurotet'anus, Tetanus latera'lis,* from πλευροθεν, 'laterally,' and τονος, 'tension.' A variety of tetanus, in which the body is curved laterally by the stronger contraction of the muscles of one side of the body.

PLEUROTONOS, Pleurothotonos.

PLEURUM, Costa, Pleura.

*PLÈVRE,* Pleura.

PLEXIM'ETER, *Plexom'eter, Plegom'eter, Plessim'eter,* from πλησσω, 'I strike,' and μετρον, 'measure,' 'a measure of percussion.' An ivory plate of a circular or ovoid shape, from an inch and a half to two inches in diameter, and about one-sixth of an inch in thickness. It has either a raised rim or edge, or projecting handles on its upper side, to permit its being held between the finger and thumb of the left hand, whilst it is struck with the right. It is used in percussion of the chest. A piece of metal, a coin, or the finger of the left hand may be used with equal advantage.—See Percussion, mediate.

PLEXOMETER, Pleximeter.

PLEXOR, from πλησσω, 'I strike.' *Plessor.* Any instrument employed in percussion. The ends of the fingers of the right hand brought together are the best *plexor;* as the finger of the left is, perhaps, the best *pleximeter.*

PLEXUS, *Plegma, Plec'tanē, Planē, Retē,* from *plecto,* 'I interlace,' 'I entwine.' (F.) *Lacis.* A network of blood vessels or of nerves. The nervous plexuses, *Implicatio'nes reticula'res* seu *Textus nervorum* belong — *some* to the system of encephalic nerves—*others* to that of the great sympathetic; whilst some, as the pharyngeal, seem to be formed of the two sets. The plexuses represent complex networks, with more or less

loose meshes, formed by the numerous and diversified anastomoses of the nervous filaments; from which proceed other branches, that are distributed to organs, or to other plexuses.

Plexus, Cardiac, Cardiac plexus—p. Carotid, see Carotid nerve — p. Choroides, see Choroid — p. Ciliaris, Ciliary ligament—*p. Cœliaque*, Cœliac plexus — p. Coronarius ventriculi, Gastric plexus — p. Coronary, see Cardiac plexus, and Coronary plexus — p. Gangliformis semilunaris, Cœliac plexus—p. Ganglioformes, Ganglions, nervous—p. Glandiformes, Ganglions, nervous—p. Glandulosi Peyeri, Peyeri glandulæ — p. Hederaceus, Corpus pampiniforme — p. Hepaticus, Hepatic plexus—p. Infra-thyroideal, see Thyroideal veins —*p. Lombo-abdominal*, Lumbar plexus — p. Pharyngeal, see Pharyngeal nerve—p. Pneumogastricus, see Pneumogastric nerves—p. Retiformis, Corpus cavernosum vaginæ—p. Reticularis, Bulbus vestibuli, Choroides plexus—p. Solar, Cœliac plexus — *p. Sous-mésentérique*, Hypogastric plexus — *p. Testiculaire*, Spermatic plexus— *p. Trachélo-sous-cutané*, Cervical plexus—p. Vasculosus funiculi spermatici pampiniformis, Corpus pampiniforme.

PLICA, from *plicari*, 'to be knit together.' *Tricho'sis plica, Tricho'ma, Tricæ, T. Incuborum, T. Scrofo'rum, Plica Polonica, P. Polon'ica Juda'ica, P. Cachec'tica, P. Saxon'ica, Affec'tio Sarmat'ica, Matted hair, Plaited hair, Trichom'atose hair, Lues Sarmat'ica, L. Polon'ica, L. Trichomat'ica, Helo'sis, Helo'tis, Cir'ragra, Cir'rhagra, C. Polono'rum, Ecphy'ma tricho'ma, Morbus Cirrho'rum, Plica caput Medu'sæ, Plica longicau'da latera'lis, Coma Cæsa'rea, Kolto, Rhopalo'sis, Plica'tio, Plicatu'ra*, (F.) *Plique, P. Polonaise.* A disease endemic in Poland, Lithuania, and other parts of Northern Europe; so called on account of its being characterized by interlacing, twisting, and agglutination or matting of the hair. By some it has been regarded as a disease; by others, as the want of attention to cleanliness. However this may be, it generally appears upon the hair of the head, but sometimes in that of other parts, as the beard, the hair on the axilla, pubes, &c. Alibert admits three species of plica. 1. *Plica multiform'is* or *Plica caput Medu'sæ*, in which the hairs are mixed and agglutinated in greater or less masses; and this has been again subdivided into two varieties, according as the meshes are almost straight (*P. C. M. lacinia'ta*, (F.) *Plique en lanières*) or much twisted (F.) *P. en vrilles.*) 2. *Plica longicau'da*, (F.) *Plique solitaire* ou *à queue;* when the hair is united into a single long mass, and 3. *Plica ccspito'sa*, (F.) *Plique en masse*, in which the hairs are matted into one large, shapeless mass. Pinel places this disease amongst the *Cutaneous phlegmasiæ;* but it is far from demonstrated, that it is the result of inflammation of the skin. Certain it is, however, that the tangling of the hair is symptomatic of an affection — *sui generis* — of the dermoid system. The idea that it is entirely owing to want of cleanliness, as has been conceived by some, is not tenable.

Plica, Plectane — p. Cachectica, Plica — p. Caput Medusæ, Plica—p. Longicauda lateralis, Plica — p. Lunata, Valvula semilunaris — p. Polonica Judaica, Plica — p. Saxonica, Plica — p. Semilunaris, Valvula semilunaris.

PLICATIO, Plica.

PLICATURA, Plica.

PLICATURÆ CEREBRI, Gyri cerebri.

PLICHOS, Perinæum.

PLIN'THIUM, πλινθιον. A machine invented by one Nileus, which was formerly employed in the reduction of fractures and luxations. Scultetus describes it in his *Armamentarium Chirurgicum.*

*PLIQUE*, Plica—*p. Polonaise*, Plica.

PLOCARIA CANDIDA, Fucus amylaceus.

*PLOMB*, Plumbum.

*PLOMB*, (F.) The sulphuretted gas disengaged from privies, which proves fatal at times to the nightmen, (F.) *Vidangeurs*, engaged in emptying them.

*PLOMB, ACÉTATE ACIDE DE*, Plumbi superacetas—*p. Blanc*, Plumbi subcarbonas—*p. Blanc de*, Plumbi subcarbonas—*p. Carbonate de*, Plumbi subcarbonas — *p. Chlorure de*, Plumbi chloridum — *p. Iodure de*, Plumbi iodidum — *p. Nitrate de*, Plumbi nitras — *p. Oxide de, fondu*, Plumbi oxydum semivitreum—*p. Oxide rouge de*, Plumbi oxydum rubrum—*p. Oxide semi-vitreux de*, Plumbi oxydum semivitreum.

*PLOMBAGINE*, Graphites.

PLOMBIÈRES, MINERAL WATERS OF, *Fontes medica'ti Plumba'rii, Thermæ Plumbariæ.* Plombiéres is a town in the department of the Vosges, 17 leagues from Nancy, and two from Remiremont. Here are several sources of thermal water. That which is called *Saponaceous* (F.) *Savonneuse*, is formed of the subcarbonate and sulphate of soda, chloride of sodium, silica, carbonate of lime, and much vegeto-animal matter. This last component, when held in solution by means of the subcarbonate of soda, gives to the water an unctuous character. This is the origin of its name. The waters of Plombiéres are employed as solvents in engorgements of the abdominal viscera, and as alteratives in chronic diseases of the skin.

PLORATIO, Lachrymatio.

PLORATUS, Lachrymatio.

PLOTUS, Leiopus.

PLUGGING (Sw.) *Plugg*, (F.) *Tamponnement.* The act of stopping a hole. The introduction of a plug of lint or rag into a wound or natural cavity — as the uterus or vagina — to arrest hemorrhage; or of some substance into a carious tooth to prevent toothache.

PLUM, Prunum, Prunus domestica—p. Assyrian, Sebestina.

PLUMA, Lanugo.

*PLUMACEAU*, Pledget.

PLUMACEOLUS, Pad, Pledget.

*PLUMASSEAU*, Pledget.

PLUMBAGO, Graphites, Persicaria.

Plumba'go Europæ'a, *P. lapathifo'lia* seu *undula'ta, Dentaria, Crepanel'la, Squama'ria, Dentela'ria, Leadwort*, (F.) *Dentelaire, Herbe au Cancer. Family*, Plumbagineæ. *Sex. Syst.* Pentandria Monogynia. The root was formerly much esteemed as a cure for the toothache, like the *Pel'litory of Spain*, which is also called *Dentaria.*

PLUMBI ACETAS, P. superacetas—p. Acetas dilutum alcoholicum, Liquor plumbi subacetatis dilutus — p. Acidulus siccus, Plumbi superacetas —p. Carbonas, P. Subcarbonas.

Plumbi Chlo'ridum, *Chloride of Lead*, (F.) *Chlorure de Plomb.* This salt of lead has been used in the form of lotion and ointment in cancerous ulcerations.

Plumbi Deutoxydum Rubrum, P. oxydum rubrum — p. Hydriodas, P. Iodidum — p. Iodhydras, P. Iodidum.

Plumbi Iod'idum, *Plumbi Iodure'tum* seu *Hydri'odas* seu *Hydroïodas* seu *Iodhydras, Plumbum ioda'tum* seu *Hydroïod'icum, Iodide* or *Iodu'ret of Lead*, (F.) *Iodure de Plomb, Iodure plombique.* This salt is formed by the double decomposition of *iodide of potassium* and *nitrate*

*of lead.* It is used in scrofulous affections internally and externally. Dose, three or four or more grains. It is officinal in the Pharmacopœia U. S. for 1851.

PLUMBI IODURETUM, P. Iodidum.

PLUMBI NITRAS, *Plumbum nit'tricum, Nitras plumb'icus, Nitrum saturni'num, Nitrate of lead,* (F.) *Nitrate de Plomb.* A salt formed by the action of *diluted nitric acid* on *litharge.* Nitrate of lead has the same medical action as the other soluble salts of lead, and is a valuable antibromic. It has been used, also, as an excitant antiseptic to wounds, ulcers, &c., and is the basis of Ledoyen's disinfecting liquid.

PLUMBI NITROSAC'CHARAS, *Nitrosac'charate of lead.* (*Sacchar.* p. j; *Acid. nitric.* p. ij; *Aquæ* p. x.) Beat together in a porcelain dish as long as chemical action continues: dilute the liquor with water, neutralize with chalk, and to the filtered solution add acetate of lead so long as a precipitate is formed. Collect, wash, and dry the precipitate, which is saccharate of lead. Dissolve in dilute nitric acid, (one part acid to nineteen of water,) filter and evaporate to form crystals, which are transparent, of an amber colour, and in regular hexagonal plates or prisms.

Advised as a solvent of phosphatic calculi.

PLUMBI OXYDUM ALBUM, Plumbi subcarbonas —p. Oxydum carbonatum per acidum acetosum, Plumbi subcarbonas — p. Oxydum fusum, Pl. oxydum semivitreum.

PLUMBI OXYDUM RUBRUM, *Min'ium, Miltus, Deutox'ydum plumbi rubrum, Superox'ydum Plumbo'sum, Plumbum oxyda'tum rubrum, Sandix, Sandyx, Red lead,* (F.) *Oxide de plomb rouge.* It is sometimes used to kill vermin.

PLUMBI OX'YDUM SEMIVIT'REUM. *Lithar'gyrus, Lithargyrum, Lithargyr'ium, Oxydum plumbi fusum, Spuma argent'i, Semi-vit'rified oxyd of lead or litharge, Calcito'sa, Cath'mia,* (F.) *Oxide de plomb fondu, Oxide de plomb semivitreux,* (a yellow protoxyd of lead, prepared by heat, combined with carbonic acid.) It occurs in scales of a whitish-red colour, and semi-vitrified. It is employed for pharmaceutical purposes, as in the *Liquor plumbi acetatis, Emplastrum plumbi,* &c. Formerly, the *Litharge of gold, Chrysi'tis, Mas'sicot,* and *Litharge of silver, Almariab,* were distinguished in commerce. These were merely ordinary litharge, resembling gold or silver in colour.

PLUMBI SUBCAR'BONAS, *Car'bonas plumbi, Plumbi Carbonas* (Ph. U. S.), *Plumbum carbonicum, Magiste'rium plumbi, Oxydum plumbi album, Cerussa, Æru'go plumbi, Psimmyth'ion, Psymmython, Simmitium, Flake white, Blanca, Gersa, If'fides, Subcar'bonate of lead, Cerusse, White lead,* (F.) *Carbonate de plomb, Blanc de plomb, Plomb blanc,* (prepared by exposing spiral rolls of lead to the fumes of vinegar, in vessels placed in dung.) It is inodorous; has a sweet taste; is brittle; friable; snow white, and of a minute, scaly texture. It is astringent and sedative, and is sprinkled on parts affected with local inflammation, or to prevent chafing in children. It is also used in the formation of ointments and plasters.

PLUMBI SUPERACE'TAS, *Cerus'sa aceta'ta, Plumbi acid'ulus siccus, Plumbi acetas* (Ph. U. S.), *Sal* vel *sac'charum Satur'ni, Superac''etate of lead, Plumbum ace'ticum, Dulce'do Satur'ni, Acetas plum'bicum crystallisa'tum, Sal plumbi, Sugar of lead, Protoac''ctate of lead,* (F.) *Acétate acide de plomb, Sel* ou *sucre de Saturne.* (*Plumb. carb.* ℔j, *Acid acetic.* cong. 1½. Boil the lead with the acid till it is saturated; then strain through paper, and evaporate to a pellicle, that crystals may be formed. Wash the crystals and dry on blotting-paper. *Ph. L.*) The acetate of lead has a sweet, styptic taste; a very white colour, and silky lustre. It is astringent; and, in *weak* solution, cooling and sedative; in *strong,* stimulant. It is given internally, in visceral and other hemorrhages, combined with opium, and is used externally, in solution, in inflammation, burns, bruises, gonorrhœa, &c. Dose, gr. ss to iss.

PLUMBI TANNAS, see Tannin.

PLUMBICUM ACETAS CRYSTALLISATUM, Plumbi superacetas.

PLUMBOSUM SUPEROXYDUM, Plumbi oxydum rubrum.

PLUMBUM, *Molyb'dos, Molibdus, Saturn'us, Capricor'nus,* (F.) *Plomb.* Lead. A solid metal of a bluish white colour; more malleable than ductile; soft enough to be scratched by the nail; very fusible and oxydizable, when heated in the air, and existing, in nature, under a number of different shapes; the principal of which are those of sulphuret and oxyd. S. g. 11.352.

Its use is to form oxides and salts. In its metallic state, it has no action upon the body; but when oxydized or united with an acid, it acts, in large doses, as a powerfully astringent poison.

PLUMBUM ACETICUM, Plumbi superacetas — p. Album, Tin—p. Candidum, Tin—p. Carbonicum, Plumbi subcarbonas — p. Cinereum, Bismuth, subnitrate of — p. Hydroiodicum, Plumbi Iodidum — p. Iodatum, Plumbi Iodidum — p. Nitricum, Plumbi nitras — p. Oxydatum rubrum, Plumbi oxydum rubrum.

PLUMS, SEEDED, see Diospyros Virginiana — p. Winter, see Diospyros Virginiana — p. Yellow, see Diospyros Virginiana.

PLUNGE BATH, see Bath.

PLUNGING SIPHON, see Siphon.

PLUNKETT'S CAUSTIC FOR CANCERS, Plunkett's Ointment.

PLUNKETT'S OINTMENT, *Plunkett's Caustic for Cancers.* This empirical cancer remedy consists of *Arsenious acid, Sulphur,* and the powdered flowers of the *Ranunculus flammula* and *Cotula fœtida;* — levigated and made into a paste with the white of egg, and applied, on a piece of pig's bladder, to the surface of the cancer.

PLURAL BIRTH, see Multiparous.

PLUTEA. Avicenna gives this name to duplicatures of the dura mater, such as the *Falx cerebri.*

PLUTONIUM, Barium.

PNEOBIOMANTIA, Docimasia pulmonum.

PNEOBIOMANTICA, Docimasia pulmonum.

PNEUMA, Air, Life. See Pneumatic Physicians.

PNEUMAPOSTE'MA, *Pneumonaposte'ma, Abscessus pulmo'num;* from πνευμων, 'the lung;' and αποστημα, 'abscess.' Abscess of the lung.

PNEUMATELECTASIS, Atelectasis pulmonum.

PNEUMATHORAX, Pneumothorax.

PNEUMAT'IC, *Pneumati'cus, Pneumat'ical,* from πνευμα, 'life, air.' Relating to pneuma, air or health.

PNEUMAT'IC PHYSICIANS, *Pneumat'ici.* Name given to a sect of physicians, at the head of whom was Athenæus, who made health and disease to consist in the different proportions of an element —which they called *Pneuma,* πνευμα—to those of the other elementary principles. This πνευμα was a fancied spiritual principle, which the Stoics regarded as an element, different from water, air, earth and fire;—the sole elementary principles previously admitted.

PNEUMAT'ICA, from πνευμα, 'air.' Appertaining to the breathing. Discases of the respiratory function; — the second class in Good's

system of nosology. Agents that act on the respiratory organs.—Pereira.

PNEUMATICAL, Pneumatic.

PNEUMATOCELE, Physocele.

PNEUMATO'DES, from πνευμα, 'wind,' and ειδος, 'resemblance.' One distended with air, or who breathes with difficulty, owing to an accumulation of flatus in the digestive tube; or, according to others, owing to emphysema.

PNEUMATOMETER, Spirometer.

PNEUMATOMPHALOCELE, Pneumatomphalus.

PNEUMATOM'PHALUS, *Pneumatomphalocel'lē*, from πνευμα, 'flatus,' and ομφαλος, 'the umbilicus.' Umbilical intestinal hernia, containing a considerable quanty of flatus.

*PNEUMATOSE*, Pneumatosis—*p. Péritonéale*, Tympanites.

PNEUMATO'SIS, *Aëro'sis*, from πνευμα, 'air.' *Flatus*, (F.) *Maladie venteuse*, *Pneumatose*. Flatulence. Flatulent distention of the stomach or bowels, or both. Sauvages uses the word synonymously with emphysema. It is now generally employed for every abnormous collection of gaseous matters in any part of the body.

Pneumatosis, Emphysema — p. Abdominis, Tympanites — p. Enterica, Colica flatulenta — p. Pulmonum, Emphysema of the lungs — p. Ventriculi, et Pneumatosis enterica, Flatulence.

PNEUMATOTHORAX, Pneumothorax.

PNEUMECTASIS, Emphysema of the Lungs.

PNEUMOCACE, Necropneumonia.

PNEUMOCHOLOSIS, Pneumonia (bilious).

PNEUMOCHYSIS, Œdema of the lungs.

*PNEUMOËCTASIE*, Emphysema of the lungs.

PNEUMOGAS'TRIC, *Pneumogas'tricus*, from πνευμων, 'the lung,' and γαστηρ, 'the stomach.' Belonging to the lungs and stomach.

Pneumogastric Nerves, *Eighth pair of nerves* (*Tenth pair* of some), *Par vagum*, *Pars vaga*, *Nervus vagus* seu *ambulato'rius* seu *pneumogas'tricus* seu *dec'imus* seu *sympath'icus me'dius*, *Middle sympathet'ic*; because it is distributed especially to the organs contained in the chest and abdomen. This nerve arises from behind the eminentiæ olivariæ and near the corpora restiformia by one or two rows of filaments, regularly arranged. These filaments unite to form a flat cord, which issues from the cranium by the foramen lacerum posterius; behind the glossopharyngeal nerve. At its exit from the cranium, the pneumogastric nerve has the appearance of a very compact plexus—*Plexus gangliform'is*, *Ganglion of the superior laryngeal branch*, of Sir Astley Cooper. It then descends along the neck, deeply seated on the outside of the carotid artery and the internal jugular vein. When it has attained the lower part of the neck, it enters the chest, gliding behind the subclavian vein, and passing on the right side, in front of the subclavian artery, and, on the left, before the arch of the aorta. It proceeds, at first, backwards, increasing in size. Afterwards, it passes from behind the bronchia to the œsophagus, which it accompanies through the diaphragm, and terminates on the stomach. In the neck, the pneumogastric nerve anastomoses with the spinal, glosso-pharyngeal, great hypo-glossal, and great sympathetic nerves; and furnishes, 1, a *pharyngeal branch*, 2, a *superior laryngeal*, 3, *cardiac branches*. In the chest, it gives off, 1, the *inferior laryngeal* or *recurrent*, 2, the *pulmonary plexus*, and, 3, the *œsophageal branches*. On entering the abdomen, the œsophageal branches, which terminate the pneumogastric, are distributed upon the stomach, and give numerous filaments to that viscus, to the hepatic, cœliac, gastro-epiploic, and solar plexuses. Some go, also, to the pancreas, liver, gall-bladder, duodenum, &c.

PNEUMOG'RAPHY, *Pneumogra'phia*, from πνευμων, 'the lung,' and γραφη, 'a description.' The part of anatomy that describes the lungs.

PNEUMOL'OGY, *Pneumolog''ia*, from πνευμων, 'the lung,' and λογος, 'a discourse.' An anatomical treatise on the lungs. An anatomical description of the lungs.

PNEUMOMETER, Spirometer.

PNEUMOM'ETRY, *Pneumomet'ria*, from πνευμων, 'the lung,' and μετρον, 'measure.' Measurement of the capacity of the lungs for air. See Spirometer.

PNEUMON, Pulmo.

PNEUMONALGIA, Angina pectoris.

PNEUMONATELECTASIS, Atelectasis pulmonum.

PNEUMONECTASIS, Emphysema pulmonum.

PNEUMONEMPHRAX'IS, from πνευμων, 'the lung,' and εμφραξις, 'obstruction.' Congestion and infarction of the lungs.

PNEUMO'NIA, *Empres'ma pneumoni'tis*, *Pleumo'nia*, *Peripneumo'nia*, *Pneumo'nia peripneumo'nia*, *Pneumoni'tis*, *Pulmo'nia*, *Pulmona'ria*, *Inflamma'tio pneumon'ica*, *I. pec'toris acu'ta*, *I. pulmo'num*, *Pneumos'tasis*, *Pneu'mony*, *Peripneu'mony*, *Inflammation of the lungs*, *Lung-fever* (vulgarly), *Febris pneumon'ica*, (F.) *Inflammation des poumons*, *Fièvre pneumonique*, *F. péripneumonique*, *Fluxion de poitrine*, *Inflammation du parenchyme pulmonaire*. The chief symptoms of pneumonia are:—pyrexia, accompanied by pain, sometimes obtuse, at others pungent, — in some part of the thorax; pulse more or less quick and hard, according to the violence and extent of the local disorder; pain, aggravated by the cough, which, with dyspnœa, exists throughout the disease. At first, the expectoration is difficult and painful; but, in the course of a few days, it becomes free, and the oppression of breathing is mitigated. When the inflammation, instead of going off by resolution, passes on to suppuration, rigors are experienced; the respiration becomes more oppressed, but less painful, and a sense of weight is felt on one of the pleuræ. Pneumonia may, also, terminate by gangrene—but this rarely happens, — by induration and by hepatization.

*Physical Signs.* First Stage, (F.) *Engouement.* Diminution of the sound is generally observed over the affected part on percussion; auscultation exhibits an equal, dry, crepitating *râle*, which is best heard at the close of a deep inspiration, and on coughing. The respiratory murmur is intermingled with the crepitant *râle*, or it may be absent. In the neighbourhood of the affected parts it is natural or puerile. The voice and cough are rather more resonant than usual. Second Stage, (F.) *Hépatisation rouge*. When *hepatization* has occurred, the motion of the affected side is impeded, and immediately above the sternum and in the corresponding triangular space on either side, there is often an evident depression. Percussion is dull over the affected part in every position of the patient. On auscultation, the crepitation is found to be replaced by bronchial respiration. The respiratory murmur is louder in the other portions of the lung, the voice and cough are more resonant, and the heart's action is more distinct. Third Stage, (F.) *Hépatisation grise*. When suppuration supervenes, the same signs persist; but usually the voice and cough are less resonant, and a coarse, mucous *râle* is heard. When gangrenous or suppurative cavities are formed, they present the ordinary signs.

The prognosis must be guarded. It is not a

disease which we can always subdue. Great extent of inflammation; very considerable oppression; orthopnœa, and difficult expectoration are unfavourable symptoms. The most active treatment is of course necessary. General bleeding forms the sheet-anchor,—employed so as to make a decided impression on the system, and repeated, if necessary; local blood-letting; nauseating doses of antimonials; purgatives; and when the violence of the inflammation has been got under, — counter-irritants, &c. Chronic pneumonia sometimes succeeds the acute, and, at others, occurs accidentally. It must be managed on general principles. Small bleedings, especially locally; and counter-irritants of all kinds are indicated.

Pneumonia Biliosa, P. bilious.

Pneumonia, Bilious, *Pneumo'nia bilio'sa, Pneumocholo'sis.* Inflammation of the lungs, accompanied by gastric fever, and not uncommonly by typhoid symptoms; — *Pneumotyphus, Pneumo'nia typhoï'des* seu *typho'des* seu *typho'sa, Putrid, typhoid, adynamic,* or *erysipel'atous pneumo'nia.*

Pneumonia, Erysipelatous, P. bilious — p. Gangrænosa, Necropneumonia — p. Hypostatica, Pneumonypostasis — p. Intermittens, Pneumotyposis — p. Lobular, see Lobular — p. Notha, Peripneumonia notha—p. Pleuritis, Pleuropneumonia — p. Putrid, P. bilious — p. Typhodes, P. bilious — p. Typhoid, P. bilious—p. Typhosa, P. bilious, Necropneumonia — p. Vesicular, Bronchitis, vesicular.

PNEUMONIC, Pulmonic.

PNEUMON'ICA. Diseases affecting the lungs, their membranes or motive power; characterized by irregular, impeded, or painful respiration. The second order of the class Pneumatica of Good.

PNEUMONIC'ULA, diminutive of pneumonia. A slight inflammation of the lung.

PNEUMONICUS, Pulmonic.

*PNEUMONIE,* Pneumonia — *p. Disséminée,* see Lobular—*p. Lobulaire,* see Lobular—*p. Mamelonnée,* see Lobular.

*PNEUMONIE DES AGONISANTS, Pneumonie hypostatique.* The hyperæmic engorgement, which takes place in the lungs during the last moments of life, has been so termed. It would seem to be hyperæmia rather than inflammation.

PNEUMONIT'IC, *Pneumonit'icus.* Of, or belonging to pneumonitis, or inflammation of the lungs.

PNEUMONITIS, Pneumonia.

PNEUMONOCARCINO'MA, from *πνευμων,* 'the lung,' and *καρκινωμα,* 'cancer.' Cancer of the lungs.

PNEUMONOCE'LĒ, from *πνευμων,* 'the lung,' and *κηλη,* 'rupture.' Hernia of the lung.

Pneumonoce'le Diaphragmat'ica Inter'na. Hernia of the lung through the diaphragm.

Pneumonocele Exter'na seu Thorac''ica, Hernia through the parietes of the chest.

Pneumonocele Thoracica, Pn. externa.

PNEUMONŒDEMA, Œdema of the lungs.

PNEUMONOMELANOSIS, see Melanosis.

PNEUMONOPHTHISIS, Phthisis pulmonalis.

PNEUMONOPHTHOE, Phthisis pulmonalis.

PNEUMONOPLEURESIS, Pleuroperipneumony.

PNEUMONOPLEURITIS, Pleuroperipneumony.

PNEUMONORRHAGIA, Hæmoptysis.

PNEUMONORRHŒA, Hæmoptysis.

PNEUMONOSCIR'RHUS, from *πνευμων,* 'the lung,' and *σκιρρος,* 'induration.' Induration of the lungs.

*PNEUMONOSES, Pneumoses.*

PNEUMONY, Pneumonia.

PNEUMONYPOS'TASIS, *Pneumo'nia hypostat'ica.* Pneumonia in a depending portion of the lung, caused by lying on the back.

*PNEUMOPÉRICARDE,* Pneumo-pericardium.

PNEUMO-PERICARD'IUM, *Pneumo-pericardi'tis,* (F.) *Pneumo-péricarde,* from *πνευμα,* 'air,' and *περικαρδιον,* 'pericardium.' Laënnec designates, under this name, the effusion of air into the cavity of the pericardium.

PNEUMOPHTHISIS, Phthisis pulmonalis.

PNEUMOPHYMATA, Tubercles of the lungs.

PNEUMOPLEURESIS, Pleuroperipneumony.

PNEUMOPTHOE, Phthisis pulmonalis.

PNEUMORRHAGIA, Hæmoptysis — p. Interna, Hæmatothorax.

PNEUMOSEPSIS, Necropneumonia.

*PNEUMOSES,* from *πνευμων,* 'the lung.' A term under which Alibert comprises every morbid affection of the lungs.

PNEUMOTHO'RAX, *Pneumatho'rax, Pneumatotho'rax, Emphyse'ma pec'toris, Asthma aërium, A. emphysemat'icum, Dyspnœ'a pneumat'ica, D. physothorac''ica, Physothorax, Aërothorax, Aëropleurie* (Piorry), from *πνευμα,* 'air,' and *θωραξ,* 'the thorax.' An accumulation of air in the cavity of the pleura. A complaint generally sudden in its invasion and fatal in its character. In many instances, along with the air, a liquid is effused,—*Hydropneumothorax.* The disease may be spontaneous and simple, but in a large proportion of cases it is complicated with pleurisy and pulmonary tubercles. The signs vary according as there is, or is not, a communication between the pleura and the bronchia. The affected side gives a hollow, tympanitic sound, even where the thickness of the parietes of the thorax is great. When the effusion is considerable, the affected side is dilated, but there is no *râle* of any kind. When a gaseous and a liquid effusion are present at the same time, the sound on percussion is found to be clear at the superior part of the thorax, but dull inferiorly; hence, by varying the position of the patient, and by consequence that of the contained fluids, the seats of the clear and the dull sound will be varied. When the gaseous effusion is owing to a fistulous communication between the pleura and bronchia, the metallic respiration and resonance are heard; and if there be both gaseous and liquid effusion, with a fistulous communication, in addition to these signs there is the *tintement métallique.* The presence of liquid can always be ascertained by succussion. See Emphrysema of the lungs.

PNEUMOT'OMY, *Pneumotom'ia,* from *πνευμων,* 'the lung,' and *τεμνω,* 'I cut.' Dissection of the lungs.

PNEOMOTYPHUS, Pneumonia, typhoid.

PNEUMOTYPO'SIS, *Pneumo'nia intermit'tens,* from *πνευμων,* 'the lung,' and *τυπος,* 'a stamp, a type.' Pneumonia characterized by periodicity.

PNEUOBIOMANTIA, Docimasia pulmonum.

PNEUSIOBIOGNOSIS, Docimasia pulmonum.

PNEUSIOBIOSCOPE, Docimasia pulmonum.

PNEUSIS, Respiration—p. Pertussis, Pertussis — p. Singultus, Singultus — p. Tussis, Tussis.

PNEUSOMETER, Spirometer.

PNIGALION, Incubus.

PNIGMOS, Orthopnœa, Strangulation.

PNIGOPHOBIA, Angina pectoris, Suffocation.

*PNIX,* Orthopnœa, Strangulation.

PNOE, Aura.

PNŒUM. A nostrum of Dr. Samuel Hahnemann, the founder of the 'Homœopathic System,' which consisted — it is said — of borax only!

PNOOCOLYTICUS, Asthmatic.

*POCHE DES EAUX*, see Liquor Amnii, and Parturition.

POCK, from Teut. pocca, '*pock* or little pouch.' A pustule of smallpox.

Pock, Kine, Vaccina.

POCKFRETTEN, see Pockmark.

POCKHOLE, Pockmark.

POCKMARK, *Pockhole*, *Scrobic'ulus Vari'olæ*, *Cica'trix Variolæ*. The mark or *pit* or *pitting* left from a smallpox pustule. One pitted with smallpox is said to be *pockfretten*.

POCKY. Infected with, or appertaining to, or resembling, smallpox or syphilis.

POC'ULUM ABSINTHIA'TUM. This was regarded, in remote ages, as a wholesome beverage; the *absinthium*, or 'wormwood,' being supposed to act as an antidote to drunkenness.

Poculum Amatorium, Philter — p. Diogenis, Palm — p. Emeticum, Goblet, emetic.

POD'AGRA, *Podarthri'tis*, *Podorrheu'ma*, *Podal'gia*, from πους, 'the foot,' and αγρα, 'seizure.' Pain which attacks the feet. Gout, situate in the articulations of the foot. It has, also, been used in a more extensive signification synonymously with *gout*.

Podagra Aberrans, Gout, (wandering) — p. Arthritis, Gout — p. Retrograda, Gout, (retrograde.)

PODAGRARIA, Ligusticum podagraria — p. Ægopodium, Ligusticum podagraria.

PODAGRIC, *Podag'rical*, *Podag'ricus*, *Arthrit'icus*, *Arthrit'ic*, *Gouty*, (F.) *Goutteux*. Relating or belonging to gout. Affected with gout.

PODALGIA, Gout, Podagra.

PODALYRIA TINCTORIA, Sophora tinctoria.

PODANENCEPHALIA, see Podencephalus.

PODARTHRITIS, Podagra.

PODARTHROC'ACĒ, from πους, 'the foot,' αρθρον, 'an articulation,' and κακος, 'bad.' Caries of the articulation of the foot.

PODENCEPHALIA, see Podencephalus.

PODENCEPH'ALUS, *Podanenceph'alus*, from πους, 'the foot,' and κεφαλη, 'the head.' A monster whose brain is placed outside the skull, and seems to be supported on a pedicle, which traverses the summit of the skull. This state of monstrosity is termed *Podanencepha'lia*, or more properly, *Podencepha'lia*.—G. St. Hilaire.

PODEX, Anus.

PODŒ'MA; from πους, 'foot,' and οιδημα, 'a swelling.' Œdema of the foot.

PODOL'OGY, *Podolog''ia*, from πους, 'the foot,' and λογος, 'a discourse.' A description of the foot. A treatise on the foot.

PODOPHYL'LUM PELTA'TUM, *Podophyll'lum*, *Anapodophyll'um Canadensē*, *May-apple*, *Mandrake*. *Family*, Podophylleæ. *Sex. Syst.* Polyandria Monogynia. A common plant throughout North America. The fruit is eatable, and esteemed by many. The leaves are said to be poisonous. The root or rhizoma, *Podophyllum* (Ph. U. S.), is purgative in the dose of 20 grains. It has also been used as an anthelmintic.

Podophyllum Monta'num, *Mountain May-apple*, *Mandrake*, *Wild Lemon*, *Duck's foot*, *Raccoon Berry*, *Yellow Berry*, *Ground Lemon*, has the same properties.

PODORRHEUMA, Podagra.

PODOTHE'CA, from πους, 'a foot,' and θηκη, 'a receptacle, a sheath.' The cuticle of the foot. An anatomical preparation. *Chirothe'ca*, has been used for the cuticle of the hand.

*POÊLETTE*, Cup.

POĒ'PHAGUS; from ποη, or ποα, 'a plant, an herb,' and φαγω, 'I eat.' One who subsists on herbs or vegetables. The act of subsisting or feeding on herbs or vegetables is called *Poëphag''ia*. Hence Strabo calls the Irish ποηφαγοι.

POGON, Beard.

POGONI'ASIS, *Pogo'nia*, from πωγων, 'the beard.' A female beard. Also, great strength or quantity of beard. A female having a beard —*Vira'go*.

POGO'NIUM, diminutive of πωγων, 'beard.' A weak or small beard.

POHON ANTIAR, Upas.

*POI*. A favourite aliment in the Sandwich Islands. It is a sort of paste made from the root of the Kalo—*Arum esculen'tum*.

*POIDS ET MÉSURES*, Weights and measures.

*POIGNÉE*, Manipulus.

*POIGNET*, Carpus.

*POIL*, Hair.

*POILETTE*, Cup.

*POILS*, see Typha latifolia.

*POING*, Fist.

*POINT*, Stitch.

Point, Blistering. A name given by Dr. Rush to an indeterminate period in the course of a continued fever, intermediate between the stages of high excitement and collapse, in which blisters will—he thought—usually produce unequivocally good effects.

*POINT DE CÔTÉ*, Pleurodynia.

*POINTS LACRYMAUX*, Lachrymalia puncta.

*POIRE*, see Pyrus communis.

*POIREAU*, Allium porrum.

*POIRIER*, Pyrus communis.

*POIS*, Pisum—*p. à Cautère*, see Fonticulus — *p. Chiche*, Cicer arietinum—*p. Cultivé*, Pisum — *p. à Gratter*, Dolichos pruriens—*p. Patate*, Dolichos tuberosus.

POISON, *Phar'macon*, *Phar'macum*, *Tox'icum*, *Vene'num*, *Virus*, *Delete'rium*, *Venena'tion*, (F.) *Poison*. A generic name for all substances which, when introduced into the animal economy, either by cutaneous absorption, respiration, or the digestive canal, act in a noxious manner on the vital properties or the texture of organs. Hence we speak of *fever poison*, *cholera poison*, &c.. Poisons exist in the three kingdoms of nature: but those which proceed from animals are often called *venoms*, as the venom of the viper, scorpion, tarantula, &c.; whilst those that are the products of disease have the name *virus*. In common parlance, therefore, *poison* is restricted to deleterious articles, furnished by the mineral and vegetable kingdoms. Orfila has divided poisons into four classes. 1. Acrid, Ir'ritating, Corro'sive, or Escharot'ic, such as the concentrated acids and alkalies; mercurial, arseniacal, cupreous, and antimonial compounds, cantharides, &c. 2. Narcot'ic; those that act particularly upon the brain; as hyoscyamus, opium, &c., but without inflaming the organ with which they come in contact. 3. Narcot'ico-Acrid or Acronarcot'ic;—those that act on the brain, but, at the same time, irritate the parts to which they are applied; as aconite, belladonna, &c. 4. Septic or Putres'cent;—those furnished by the animal kingdom. See Venom and Virus. Various classifications, of a similar character, have been recommended by different toxicologists: but they are liable to the objection, that they throw substances together whose physiological action on the system is very different. It is, indeed, difficult to avoid unnatural compression of matters into places not properly belonging to them, in all such arrangements.

The following table, which exhibits a *coup d'œil* of the chief poisons, with most of the circumstances of importance connected with them, is not free from these objections.

## TABLE, EXHIBITING THE SYMPTOMS, TREATMENT, AND MODE OF DETECTING THE VARIOUS POISONS, MINERAL, VEGETABLE AND ANIMAL.

*N. B. In all cases the Stomach-Pump should be used as soon as possible.*

## I. INORGANIC POISONS.

| Poisons. | Symptoms. | Treatment. | Tests. |
|---|---|---|---|
| ACIDS.<br>*Acetic Acid.*<br>*Citric Acid.*<br>*Muriatic Acid.*<br>*Nitric Acid.*<br>*Sulphuric Acid.*<br>*Tartaric Acid.*<br>*Oxalic Acid.* | The acids, generally, are strong corrosive poisons. Sour, acrid taste, burning in the throat, which is increased by pressure, swallowing, or coughing; eructation, and excruciating pain in the stomach; more or less corrugation of the lining membranes of the mouth and primæ viæ; excoriation about the mouth or such other parts of the skin as the acid may have touched. The matter vomited effervesces with carbonate of lime. The countenance becomes glazed, extremities cold and clammy; convulsions and death. Nitric acid occasions yellow stains, and sulphuric acid, black. | The carbonates of soda, potassa, lime and magnesia, are all antidotes to the acids; calcined magnesia also. They are to be used with the following restrictions: for the acetic, citric, muriatic, sulphuric, and tartaric acids, they may be used indiscriminately. For the nitric and oxalic, carbonates of magnesia and lime can alone be employed with safety. In the case of sulphuric acid, water should not be drunk, on account of the great heat which is produced by their mixture. Subsequent inflammation to be treated by ordinary means.<br>The carbonates of the alkalies and of magnesia and lime have the inconvenience, that a large quantity of gas is extricated in the stomach.<br>Ammonia is an antidote; but it should not be employed in a very concentrated form. Liquid chlorine has also been found efficacious. The cold *douche* to the head has been recommended. | *Sulphuric acid* is known by a white precipitate with any salt of baryta, insoluble in nitric acid.<br>*Muriatic acid* is known by a white precipitate with nitrate of silver, insoluble in nitric acid, which turns black by the action of light.<br>*Nitric acid* gives rise to orange-coloured fumes, when copper is placed in it, and an ability to dissolve gold when mixed with muriatic acid.<br>*Acetic acid* exhales the odour of vinegar.<br>*Citric acid* blackens when heated.<br>*Tartaric acid* precipitates crystals, with a solution of potassa; and a white precipitate is thrown down by lime-water.<br>*Oxalic acid* gives a white precipitate with lime-water, which, when heated, is converted into carbonate of lime. |
| *Prussic Acid.*<br>*Oil of Bitter Almonds.*<br>*Laurel Water.* | Is a sedative poison; nausea, giddiness, debility, hurried pulse, weight and pain in the head; eructations having the flavour of the acid; spasms, tetanus, contractile pupil; convulsions, death. | | *Prussic acid* exhales the odour of peach-kernels; forms a white precipirate with nitrate of silver neutralized with an alkali, gives a blue precipitate with the persalts of iron. |
| ALKALIES and their SALTS.<br>Ammonia,<br>*Strong Liquor* or *Water of.*<br>*Muriate of Ammonia* or *Sal Ammoniac.*<br>Potassa.<br>*Caustic Potassa*, and *Liquor Potassæ.*<br>*Carbonate of Potassa*, or *Pearl Ash*, and *Salt of Tartar.*<br>*Nitrate of Potassa* or *Saltpetre.*<br>*Sulphuret of Potassium* or *Liver of Sulphur.*<br>Soda. | Violent, caustic, acrid taste; great heat in the throat, with destruction of its lining membrane; difficult and painful deglutition; vomiting of bloody matter, which turns the yellow of turmeric brown; acute pain in the stomach; cold sweats, weakness, hiccough; violent colic pains, with purging of bloody stools and membranous flakes; death.<br>The nitrate of potassa will not manifest the effect with turmeric paper. The carbonates, when vomited, will effervesce with acids; and the liver of sulphur will give rise to eructations of sulphuretted hydrogen. | The vegetable acids, such as vinegar, lemon juice, citric and tartaric acid in solution are antidotes to the alkalies and their carbonates. The fixed oils, such as castor, linseed, almond and olive, form soaps with the free alkalies, and therefore destroy their caustic effects.<br>Poisoning by nitrate of potassa to be treated on general antiphlogistic principles; mucilaginous drinks.<br>Liver of sulphur is said to be decomposed and neutralized by common salt. The liquid chloride of soda will also decompose it. | The alkalies are known by their action on turmeric paper: restoring the colour of litmus, which has been reddened by an acid.<br>Carbonates are known by their effervescence with an acid; some of them affect the turmeric paper Sal ammoniac gives out the pungent odour of ammonia, when mixed with quicklime.<br>Nitrate of potassa decrepitates and deflagrates when thrown on hot coals.<br>Liver of sulphur emits the odour of sulphuretted hydrogen when dissolved, or when treated with an acid. |
| EARTHS and COMPOUNDS.<br>Baryta.<br>*Carbonate of Baryta.*<br>*Chloride of Barium.*<br>*Nitrate of Baryta.*<br>Lime. | Analogous to those of the corrosive metals. Violent burning in the stomach, vomiting, gripes, diarrhœa; excessive muscular debility, headache, convulsions, death. Lime differs from baryta in being a pure irritant. | The sulphates of soda and magnesia are prompt and effective antidotes to all the poisonous salts of baryta. Phosphate of soda will also counteract their effects. Lime may be neutralized by dilute acids. Carbonic acid, in soda-water, effervescing draught or yeast, it is supposed, would answer a good purpose. The fixed oils may be employed either for baryta or lime, when not in a compound state. | Baryta and its salts invariably give a white precipitate, insoluble in acid, with a soluble sulphate,<br>Lime, when dissolved, gives a white precipitate with oxalic acid. Also with carbonic acid or a soluble carbonate. The same of baryta. |

| Poisons. | Symptoms. | Treatment. | Tests. |
|---|---|---|---|
| ALCOHOL.<br>*Brandy. Wines, and all Spirituous Liquors.* | Intoxication, and when taken very freely, complete insensibility, with apoplexy or paralysis of one side; the countenance swollen and of a dark-red colour; the breathing difficult, and often stertorous, with a peculiar puffing out of the lips; the breath smells of liquor, which will distinguish the symptoms from those of spontaneous apoplexy. | A powerful emetic of white vitriol, or tartar emetic, should be got into the stomach as soon as possible; and if the person has lost the power of swallowing, a flexible catheter or tube should be the means of conveying it thither. The vomiting should be encouraged as much as possible with warm water; and large and active glysters of salt and water should be thrown up. The patient should be placed erect, and if the countenance and other appearances be not improved after these means have been used, the jugular vein may be opened, and cold wet cloths applied to the head, particularly if the body be hotter than natural. If the extremities become cold, warmth and friction should be perseveringly used. | |
| VOLATILE OILS.<br>*Creasote.*<br>*Dippel's Animal Oil.*<br>*Oil of Tar.*<br>*Oil of Tobacco.*<br>*Oil of Turpentine.*<br>*Fusel Oil.* | General action, that of irritant poisons. Burning pain, vomiting, pungent taste, purging, &c. The oils of turpentine and tobacco affect the nervous system; the peculiar odour of each oil will be manifested in the matter vomited. | Creasote is immediately coagulated by albumen Dippel's animal oil may be counteracted with dilute acids and the fixed oils. The other oils have no particular antidotes, and their effects must, therefore, be counteracted upon general principles. | No better mode of recognizing these substances exists, than that derived from their peculiar odour. Dippel's oil has the pungent odour of ammonia; creasote and oil of tar, a peculiar smell of smoke; the odour of tobacco and turpentine are well known; and fusel oil has a peculiar, offensive, suffocating odour. |
| GASES.<br>*Carbonic Acid*, or *Fixed Air.*<br>*Carbonic Oxide.*<br>*Fumes of Burning Charcoal.*<br>*Chlorine.*<br>*Sulphuretted Hydrogen.* | Chlorine produces, when inhaled, violent irritation of the organs of respiration; cough, bloody expectoration, inflammation of the lungs, and permanent pulmonary disease. The other gases, although producing some effect on the respiratory organs, act as poisons, in consequence of their sedative agency. The symptoms, therefore, are those of apoplexy, or narcotic poisoning. | The antidotes to chlorine are the cautious inhalation of ammonia, or sulphuretted hydrogen. The inflammatory symptoms from chlorine to be treated on general principles. For the other gases, cold affusions to the head, blood-letting, artificial respiration. | Chlorine is recognized by its peculiar odour and bleaching properties. Sulphuretted hydrogen, by its fetid smell, and the rapid blackening of lead. Carbonic acid, by its occasioning turbidness in lime-water placed in its atmosphere. Carbonic oxide, by the blue colour of its flame. |
| IODINE.<br>*Iodide of Potassium.* | Irritant symptoms; burning pain in the throat, lacerating pain in the stomach, and fruitless efforts to vomit; suffusion of the eyes; excessive pain and tenderness of the epigastrium. | Iodine combines with starch, and forms an insoluble compound. The prompt administration of starch, wheat flour, or other vegetable matter containing fecula, beat up in water, is recommended. Iodide of potassium has no antidote. Vomiting should be promoted by draughts of warm water, and inflammation be subdued by general treatment. | Iodine is known by its odour, and the formation of a blue precipitate, when brought in contact with a cold solution of starch. Iodide of potassium gives a crystalline precipitate, with tartaric acid in excess. The supernatant fluid will give the blue colour to starch. |
| METALS.<br>Antimony.<br>*Tartar Emetic.*<br>*Chloride*, or *Butter of Antimony.*<br>*Oxide of Antimony.* | Vomiting. If vomiting do not occur promptly, violent irritant effects are produced. Burning pain in the pit of the stomach; Purging; colicky pains, sense of tightness in the throat, violent cramps; repeated recurrence of vomiting. | If vomiting have not been produced, it should be brought about by tickling the fauces, and administering copious draughts of warm water. Astringent infusions, such as of galls, oak bark, Peruvian bark, act as antidotes, and should be given promptly; powdered yellow bark may be used, until the infusion is prepared. | Antimony in solution is best distinguished by the peculiar orange-red precipitate, which it forms with sulphuretted hydrogen or solutions of the hydrosulphates. Free alkalies produce white precipitates. The muriate is known by a white precipitate, when it is poured into water. In its solid forms, it may be known by the formation of white fumes, when heated, which redden litmus. It may also be converted into chloride, and then precipitated by adding water. |

| Poisons. | Symptoms. | Treatment. | Tests. |
|---|---|---|---|
| **Arsenic.**<br>*Arsenious Acid*, or *White Arsenic.*<br>*Orpiment*, or *Yellow Sulphuret of Arsenic.*<br>*King's Yellow.*<br>*Realgar*, or *Red Sulphuret of Arsenic.*<br>*Fly Powder.*<br>*Fowler's Solution.*<br>*Arsenical Paste.*<br>*Arsenical Soap.*<br>*Arsenite of Copper, Scheele's Green.* | Violent burning pain in the region of the stomach and bowels; tenderness on pressure; retching: vomiting; sense of dryness and tightness in the throat; thirst; hoarseness and difficulty of speech; the matter vomited, greenish or yellowish, sometimes streaked with blood; diarrhœa; tenesmus; sometimes excoriation of the anus; urinary organs occasionally affected with violent burning pains and suppression; convulsions and cramps; clammy sweats; lividity of the extremities; countenance collapsed; eyes red and sparkling; delirium; death. | The hydrated peroxide of iron diffused through water; or the precipitated carbonate; or the rubigo ferri, in very fine powder, to be administered every five or ten minutes, until relief is obtained. This is particularly efficacious when the *white arsenic* has been swallowed. If the arsenic have been taken in the form of Fowler's Solution, lime-water, in copious draughts, may be given. For either of the other forms, emetics of sulphate of zinc; diluents; demulcents, such as flaxseed tea, infusion of slippery elm, &c. Counter-irritants may be used to relieve the spasm, and violent pain in the stomach. Bleeding, as promoting absorption, should not be employed until the stomach is completely evacuated. | If the suspected substance can be obtained free from organic matter, the presence of arsenic may readily be shown by boiling it in distilled water, filtering, and testing with, 1st. Ammoniaco-sulphate of copper. 2d. Ammoniaco-nitrate of silver. (*Hume's Test*) 3d. Sulphuretted hydrogen gas. The first will produce a *green* precipitate; second, a *pale yellow* precipitate; third, a *bright yellow* precipitate, if arsenic be present. A portion of the powder, or one of these precipitates, carefully and thoroughly dried, is then to be mixed with charcoal and exsiccated carbonate of soda, to be placed in a small glass tube, closed at one end, and then to be heated to a red heat in the flame of a lamp. The arsenic will be reduced, and sublime in the upper part of the tube, forming a dark crust, having considerable lustre on its exterior surface, resembling polished steel. By gently heating this crust in a very small flame, crystals of white arsenic will be formed, having a high adamantine lustre.<br>If organic matter be present, it must be entirely destroyed, by heating the substance with nitro-muriatic acid. After this has been done, and a clear, transparent solution in distilled water has been obtained, the subsequent process is as above indicated. If arsenious acid be submitted to the action of nascent hydrogen, it is deoxidized, and the metallic arsenic, thereby obtained, combining with hydrogen, forms arsenuretted hydrogen gas. (*Marsh's Test.*)<br>Add to a suspected solution a few drops of pure chlorohydric acid, and place in it a slip of bright copper; no change occurs until the liquid is brought to the boiling point, when, if arsenic be present, even in small quantity, the copper acquires an iron-gray coating, from the deposit of that metal. Remove the slip of copper; wash it in water, dry it and gradually heat it in a reduction tube, when arsenious acid will be sublimed in minute octohedral crystals. The test succeeds with powdered arsenic, the arsenites, arsenic acid, the arseniates, and orpiment. It will even separate the arsenic from arsenite of copper, and from common lead-shot. *Reinsch's Test.* |
| **Bismuth.**<br>*Nitrate of Bismuth.*<br>*Pearl Powder.*<br>*Oxide of Bismuth.* | Similar to those produced from other irritant poisons. General inflammation of the whole alimentary canal; suppression of urine; hiccough, disagreeable metallic taste; vomiting; cramps; delirium: death. | Milk, and sweet mucilaginous drinks are recommended. Leeches, general bleeding; glysters; fomentations to be employed on the general principles of treatment for inflammatory symptoms. | Bismuth is known by the formation of a white precipitate, when its solution in nitric acid is poured into water; and by the formation of a black precipitate with sulphuretted hydrogen gas, and hydrosulphates in solution. |
| **Copper.**<br>*Sulphate of Copper Blue Vitriol.*<br>*Acetate of Copper, Verdigris.*<br>*Carbonate of Copper, Blue Verditer.*<br>*Arsenite of Copper Scheele's Green.*<br>*Food cooked in dirty copper vessels*, or *pickles made green by copper.* | Very similar to those produced by arsenic. Coppery eructations and taste. Fatal cases are generally terminated by convulsions, palsy, insensibility. | Albumen to be administered in either of its forms which can be most readily obtained, as milk or whites of eggs. Vinegar should *not* be given. The inflammatory symptoms are to be treated on general principles, and so of the nervous. | The presence of copper is readily shown in solutions. By ammonia a beautiful bluish precipitate is thrown down, which dissolves in an excess of the precipitant, and the solution has a rich blue colour. A bright iron bar, introduced into solutions of copper, occasions the separation of the copper, in a metallic form, which deposits itself upon the iron. |

| Poisons. | Symptoms. | Treatment. | Tests. |
|---|---|---|---|
| **Gold.**<br>*Chloride of Gold.*<br>*Fulminating Gold.* | Very analogous to those of other irritant poisons. This substance communicates a pink stain to the flesh, and patches of that colour may be found about the lips, and inside the mouth. | The salts of gold are decomposed by sulphate of iron; and this has, therefore, been recommended as an antidote. Inflammatory symptoms to be treated on general principles. | Chloride of gold is very readily decomposed, and the gold separated in a metallic state. Protosulphate of iron, nitrate of silver and protochloride of tin, all answer this purpose. The precipitated powder will be found insoluble, except in nitro-muriatic acid. |
| **Iron.**<br>*Sulphate of Iron, Copperas, Green Vitriol.*<br>*Chloride of Iron.* | Symptoms of irritant poisoning; colic pains, constant vomiting and purging. Violent pain in the throat, tension of the epigastrium, coldness of the skin, and feebleness of the pulse. | Carbonate of soda would be a most excellent antidote to either of these substances. Mucilaginous drinks might also be employed; and particular symptoms relieved by general treatment. | Iron is recognised by a bluish-black precipitate, with tincture of galls; rich blue, with prussiate of potassa; and a greenish or reddish precipitate, with the free alkalies or their carbonates. |
| **Lead.**<br>*Acetate of Lead, Sugar of Lead.*<br>*Carbonate of Lead, White Lead.*<br>*Red Oxide, or Red Lead.*<br>*Litharge.*<br>*Wines sweetened by Lead.*<br>*Water which has been kept in Leaden vessels.*<br>*Acid food, cooked, or left standing in vessels glazed with Lead.* | Irritation of the alimentary canal; spasm; nervous symptoms; paralysis, either partial or complete. When taken for some time, in small quantity, violent and obstinate colic; rigidity of abdominal muscles, cramps; remission of pain; obstinate constipation, urine diminished, saliva increased; countenance anxious and gloomy. If relief be not promptly obtained, giddiness, debility, torpor, coma, convulsions and death. The paralysis affects generally the upper extremities. | Sulphate of magnesia and phosphate of soda are both good antidotes for the soluble salts of lead. For the solid forms, dilute sulphuric acid may be drunk. These are applicable to the irritant forms of poisoning by lead. In the chronic form, or colica pictonum, purgatives and anodynes are resorted to; venesection; and external applications to relieve the cramps. The use of strychnia is recommended for the paralysis. | Soluble salts of lead yield a white precipitate with sulphates and carbonates in solution. Salts of chromic acid and iodide of potassium occasion a yellow precipitate. Sulphuretted hydrogen; a black precipitate. If solid, the lead may be converted into a state of solution by nitric acid, and the dilute solution be tested as above. |
| **Mercury.**<br>*Corrosive Sublimate.*<br>*Cyanide of Mercury.*<br>*Nitrate of Mercury.*<br>*White Precipitate.*<br>*Red Oxide, or Red Precipitate.*<br>*Sulphate, or Turbith Mineral.*<br>*Vermilion, or Red Sulphuret.* | Violent symptoms of irritant poisoning; harsh metallic astringent taste; burning pain in the stomach; vomiting and purging frequently of bloody matter; often irritation of the urinary organs, and sometimes suppression; tightness and burning in the throat, occasionally so great as to prevent speech; countenance not always pale, but sometimes flushed; tendency to doze; stupor, convulsions and death. | Albumen, in some form, must be promptly administered; either white of eggs beaten up with water, milk, or wheat flour beaten up. The inflammatory symptoms to be counteracted by the usual means. Gold, finely mixed in dust, with fine iron filings. (?) | The free alkalies differ in their precipitates from solutions of mercury. Potassa gives, with corrosive sublimate, a yellowish one; ammonia, a white; lime-water, an orange; and sulphuretted hydrogen, a black. If a drop of the solution be placed on a piece of gold, and touched with a knife or key, the mercury will be reduced, which amalgamates with the gold, producing a white spot. The nitrate of mercury gives a black precipitate with the free alkalies. All the solid forms of mercury are volatile, and may be reduced by heating them in a glass tube with charcoal and carbonate of soda, when the metallic mercury will sublime, and may be collected in a globule. |
| **Silver.**<br>*Nitrate of Silver, or Lunar Caustic.* | Those of other irritant poisons. | Chloride of sodium, or common salt, immediately decomposes this substance, and destroys its activity. Antiphlogistic treatment is to be employed for the inflammatory symptoms. | Nitrate of silver is distinguished by the formation of a white precipitate, insoluble in nitric acid, with chloride of sodium; a gray precipitate with ammonia, which is redissolved in an excess of ammonia; yellow precipitate with phosphate of soda. The precipitate of chloride of silver, obtained by adding muriate of soda to the nitrate of silver, is readily reduced, and the metallic silver obtained, by mixing it with dilute sulphuric acid and granulated zinc. |
| **Tin.**<br>*Chloride of Tin.*<br>*Solution of Tin, used by Dyers.*<br>*Oxide of Tin, or Putty Powder.* | The same as those from other irritant poisons, and a peculiar tanned appearance of the villous coat of the stomach. | Milk to be given copiously, and the subsequent treatment to be regulated by the symptoms. | The chloride precipitates vegetable colouring matter; also albumen and gelatin. The white oxide is precipitated from its solution by free alkalies; with sulphuretted hydrogen gas, a brown precipitate. |
| **Zinc.**<br>*Oxide of Zinc.*<br>*Sulphate of Zinc, White Vitriol.*<br>*Acetate of Zinc.* | Violent vomiting; astringent taste, burning pain in the stomach; pale countenance; cold extremities; dull eyes; fluttering pulse. Death seldom ensues, in consequence of the emetic effects. | The vomiting may be relieved by copious draughts of warm water. Carbonate of soda, administered in solution, will decompose the sulphate of zinc. Milk and albumen also act as antidotes. General principles to be observed in the subsequent treatment. | A white precipitate is thrown down by the free alkalies from the soluble salts of zinc, which becomes yellow when strongly heated—recovering its white colour on cooling. Sulphuretted hydrogen occasions a white precipitate. |

| Poisons. | Symptoms. | Treatment. | Tests. |
|---|---|---|---|
| PHOSPHORUS. | Symptoms of irritant poisoning; pain in the stomach and bowels; vomiting, diarrhœa, tenderness and tension of the abdomen. | An emetic to be promptly administered; copious draughts containing magnesia in suspension; mucilaginous drinks; general treatment for inflammatory symptoms. | Phosphorus is known by its ready inflammability, luminousness at ordinary temperatures, and alliaceous odour. |
| GLASS, or ENAMEL. | If taken in very coarse powder, it produces irritation and inflammation of the bowels. | Large quantities of crumb of bread should be eaten, to envelop the particles. (?) An emetic of sulphate of zinc should then be given, and vomiting be promoted by demulcent drinks. | |

# II. ORGANIC POISONS.

## I. VEGETABLE POISONS.

| Irritant Poisons. | Symptoms. | Treatment. |
|---|---|---|
| Anemone *pulsatilla*. Wind Flower.<br>Arum *maculatum*. Wake Robin.<br>Bryonia *dioica*. Bryony.<br>Caladium *seguinium*. Dumbcane.<br>Calla *palustris*. Water Arum.<br>Caltha *palustris*. Marsh Marigold.<br>Chelidonium *majus*. Celandine.<br>Clematis *vitalba*. Virgin Bower.<br>Convolvulus *jalapa*. Jalap.<br>Convolvulus *scammonia*. Scammony.<br>Croton *tiglium*. Purging Croton.<br>Cucumis *colocynthis*. Colocynth.<br>Cyclamen *Europæum*. Sow Bread.<br>Daphne *gnidium*. Spurge Flax.<br>Daphne *mezereum*. Mezereon.<br>Delphinium *staphisagria*. Stavesacre.<br>Dioica *palustris*. Swamp leather-wood.<br>Equisetum *hyemale*. Scourgrass.<br>Euphorbia *officinarum*. Euphorbium. Spurge.<br>Gratiola *officinalis*. Hedge Hyssop.<br>Hippomane *mancinella*. Manchineel.<br>Hura *crepitans*. Sand Box.<br>Hydrocotyle *vulgaris*. Marsh Pennywort.<br>Jatropha *curcas*, Indian Nut.<br>Jatropha *manihot*. Cassada.<br>Juniperus *sabina*. Savin (oil of).<br>Juniperus *Virginiana*. Bed Cedar (oil of.)<br>Momordica *elaterium*. Squirting Cucumber.<br>Narcissus *pseudo-narcissus*. Daffodil.<br>Pastinax *sativa*. Common Parsnep.<br>Pedicularis *palustris*. Marsh Lousewort.<br>Phytolacca *decandra*. Poke.<br>Piper *cubeba*. Cubebs.<br>Plumbago *Europæa*. Toothwort.<br>Ranunculus *acris*, and other species. Crowfoot.<br>Rhododendron *chrysanthemum*. Oleander.<br>Ricinus *communis*. Castor Oil Plant.<br>Sambucus *ebulus*. Elder.<br>Sedum *acre*. Stone Crop.<br>Stalagmitis *cambogioides*. Gamboge.<br>Tanacetum *vulgare*. Tansy (oil of.) | The general effects of this class of vegetable poisons are; — an acrid pungent taste, with more or less of bitterness, excessive heat, great dryness of the mouth and throat, with sense of tightness there; violent vomiting, the efforts being continued even after the stomach is emptied; purging, with great pain in the stomach and bowels; pulse strong, frequent, and regular; breathing often quick and difficult; appearances of intoxication; the pupil of the eye frequently dilated, insensibility resembling death; the pulse becomes slow and loses its force, and death closes the scene.<br>If applied externally, many of them produce violent inflammation of the skin, with vesications or eruptions of pustules. | If vomiting have been occasioned by the poison, and the efforts are still continued, they may be rendered easier by large draughts of warm water, or thin gruel; but if symptoms of insensibility have come on without vomiting, it ought to be immediately excited by the sulphate of zinc, or some other active emetic substance, and after its operation a sharp purgative should be given. After as much as possible of the poison is got rid of, a very strong infusion of coffee, or vinegar diluted with water, may be given with advantage. Camphor mixture with ether may be taken frequently, and if insensibility be considerable, warmth, frictions, and blisters, may be employed. If inflammation or other dangerous consequences have been induced, they are to be treated upon general principles.<br>The fruit of Fevillea Cordifolia has been recommended as a powerful antidote against vegetable poisons; it is to be used in as recent a state as possible. (?)<br>N. B. Bromine, chlorine, and iodine are said to be antidotes to the alkaloids generally. |
| ACRO-NARCOTIC.<br>Æthusa *cynapium*. Common Fool's Parsley.<br>Aconitum *napellus*. Monkshood.<br>Agaricus, five species. Mushrooms (poisonous).<br>Amanita *muscaria*. Mountain Ash.<br>Taxus *baccata*. Yew. | The narcotic vegetable poisons, if taken into the stomach or applied to a wound, occasion the following effects:—stupor; numbness; heaviness in the head; desire to vomit, slight at first, but afterwards insupportable; a sort of intoxication, stupid air, pupil of the eye dilated; furious or lively delirium, sometimes pain; convulsions of different parts of the body, or palsy of the limbs. The pulse is variable, but at first generally strong and full; the breathing is quick, and there is great anxiety and dejection, which, if not speedily relieved, soon ends in death. | The stomach to be effectually evacuated, by giving four or five grains of tartar emetic, or from ten to twenty of the sulphate of zinc, repeated every quarter of an hour, till the full effect is produced. These means may be assisted by tickling the throat with a feather or the finger. Large and strong glysters of soap dissolved in water, or of salt and gruel, should be speedily administered, to clear the bowels, and assist in getting rid of the poison; and active purgatives may be given after the vomiting has ceased. When as much as possible of the poison has been expelled, the patient may drink, alternately, a tea-cupful of strong hot infusion of coffee, and vinegar diluted with water. If the drowsiness, which is sometimes extreme, and the insensibility bordering on apoplexy, be not remedied by these means, blood may be taken from the jugular vein, blisters may be applied to the neck and legs, and the attention be roused by every means possible. If the heat declines, warmth and frictions must be perseveringly used. Vegetable acids are on no account to be given *before* the poison is expelled, and it is desirable that but little fluid of any kind should be administered.<br>N. B. Bromine, chlorine, and iodine are said to be antidotes to the alkaloids generally |
| POISONOUS MUSHROOMS.<br>Agaricus *muscarius*. Fly Agaric.<br>Agaricus *piperatus*. Pepper Agaric.<br>Agaricus *necator*. Deadly Agaric.<br>Agaricus *bulbosus*. Bulbous Agaric.<br>Agaricus *chantarellus*. Champignon. | Nausea, heat, and pain in the stomach and bowels, with vomiting and purging, thirst; convulsions, and faintings; pulse small and frequent; delirium; dilated | The stomach and bowels to be cleared by an emetic of tartarized antimony, followed by frequent doses of Glauber's or Epsom salt, and large, stimulating glysters. After the poison is evacuated, ether may be administered, with smal., |

| Poisons. | Symptoms. | Treatment. |
|---|---|---|
| | pupil, and stupor; cold sweats, and death.<br>Poisonous mushrooms may be distinguished from the edible by their botanical characters, and by the following criteria. The former grow in wet, shady places, have a nauseous odour; are softer, more open, and porous; have a dirty-looking surface, sometimes a gaudy colour, or many very distinct hues, particularly if they have been covered with an envelope; they have soft, bulbous stalks, grow rapidly, and corrupt very quickly. | quantities of brandy and water; but if inflammatory symptoms manifest themselves, such stimuli should be omitted, and other appropriate means be had recourse to. |

## 2. ANIMAL POISONS.

| | Symptoms. | Treatment. |
|---|---|---|
| POISONOUS FISH.<br>Balistes *monoceros*. Old wife.<br>Cancer *astacus*. Crawfish.<br>Cancer *ruricolus*. Land Crab.<br>Clupea *thryssa*. Yellow-billed Sprat.<br>Coracinus *fuscus major*. Gray Snapper.<br>Coracinus *minor*. Hyne.<br>Coryphæna *splendens*. Dolphin.<br>Mormyra. Blue Parrot Fish.<br>Muræna *major*. Conger Eel.<br>Mytilus *edulis*. Mussel.<br>Ostracion *globellum*. Smooth Bottle Fish.<br>Perca *major*. Barracuda.<br>Perca *venenosa*. Grooper.<br>Perca *venenata*. Rock Fish.<br>Physalia. Portuguese Man of War.<br>Scomber *cæruleus*. Spanish Mackerel.<br>Scomber *maximus*. King Fish.<br>Scomber *thynnus*. Bonetta.<br>Sparus *chrysops*. Porgee.<br>Tetrodon *sceleratus*. Tunny.<br>Tetrodon *ocellatus*. Blower. | In an hour or two, or often in a much shorter time, after the fish has been eaten, a weight at the stomach comes on, with slight vertigo and headache, sense of heat about the head and eyes, considerable thirst, and often an eruption of the skin (urticaria), and in many cases death. | An emetic should be speedily administered, or, in the absence of it, vomiting may be excited, by tickling the throat with the finger, and taking large draughts of warm water. After full vomiting, an active purgative should be given, to remove any of the noxious matter that may have found its way into the intestines. Vinegar and water may be drunk after the above remedies have operated, and the body may be sponged with the same. Water, made very sweet with sugar, to which ether may be added, may be drunk freely as a corrective, and a very weak solution of alkali has been recommended to obviate the effects of the poison. If spasm ensue; after evacuations, laudanum, in considerable doses, is necessary. If inflammation should occur, the usual means of removing it must be employed. |
| POISONOUS SERPENTS.<br>Boa *crotaloides*. Copperhead.<br>Cenchris *mockeson*. Mockeson.<br>Cerastes *nasicornis*. Horned Viper of Western Africa.<br>Coluber *berus*. Viper.<br>Coluber *prester*. Black Viper.<br>Crotalus, (5 species) Rattle Snake<br>Scytale *pisciverus*. Water Viper. | A sharp pain in the wounded part, which soon extends over the limb or body; great swelling, at first hard and pale, then reddish, livid, and gangrenous in appearance; faintings, vomitings, convulsions, and sometimes jaundice; pulse small, frequent, and irregular; breathing difficult, cold sweats, the sight fails, and the intellectual faculties are deranged. Inflammation, and often extensive suppuration and gangrene, followed by death. | A cupping-glass to be applied over the wound, or a moderately tight ligature above the bites, and the wound left to bleed after being well washed with warm water; the actual cautery, lunar caustic, or butter of antimony, to be then applied freely to it, and afterwards covered with lint, dipped in equal parts of olive oil and spirit of hartshorn. The ligature to be removed if the inflammation be considerable. Warm, diluting drinks, and small doses of ammonia or hartshorn, to cause perspiration; the patient to be well covered in bed, and a little warm wine given occasionally. If gangrene be threatened, wine may be given more freely, and the bark should be had recourse to. Arsenic, the principal ingredient in the Tanjore Pill, has been strongly recommended. |
| CANTHARIS VESICATORIA.<br>Spanish, or Blistering Fly.<br>Lytta *vittata*. Potato Fly. | Nauseous odour of the breath; acrid taste; burning heat in the throat, stomach, and abdomen; frequent vomitings, often bloody, with copious bloody stools; excruciating pain in the stomach; painful and obstinate priapism, with heat in the bladder, and strangury or retention of urine; frightful convulsions, delirium and death. | Vomiting to be excited by drinking sweet oil, sugar and water, milk, or linseed tea, very freely. Emollient glysters should be administered, and if symptoms of inflammation of the stomach, kidney, or bladder supervene, they must be subdued by appropriate treatment.<br>Camphor dissolved in oil may be rubbed over the belly and the thighs. |
| VENOMOUS INSECTS.<br>Tarantula.<br>Scorpio. Scorpion.<br>Vespa *crabro*. Hornet.<br>Vespa *vulgaris*. Wasp<br>Apis *mellifica*. Bee.<br>Culex *pipiens*. Gnat.<br>Œstrus *bovis*. Gad-fly | In general, the sting of these insects occasions only a slight degree of pain and swelling; but occasionally the symptoms are more violent, and sickness and fever are produced by the intensity of the pain. | Hartshorn and oil may be rubbed on the affected part, and a piece of rag, moistened in the same, or in salt and water, may be kept upon it till the pain is removed. A few drops of hartshorn may be given frequently in a little water, and a glass or two of wine may be taken. The sting may, in general, be removed by making strong pressure around it with the barrel of a small watch-key. |

| | Symptoms. | Treatment. |
|---|---|---|
| SALIVA OF THE RABID DOG. | At an uncertain interval after the bite, generally, however, between the twentieth day and three or four months, pain or uneasiness occurs in the bitten part, though the wound may have been long healed. Anxiety, uneasiness, languor, spasms, horror, disturbed sleep, difficult respiration succeed, and are soon very much increased; violent convulsions affect the whole body, hideously distorting the muscles of the face; the eyes are red and protruded, the tongue swells and often hangs out, and viscid saliva flows from the mouth; there is pain in the stomach, with bilious vomitings, a horror of fluids, and impossibility of drinking them. All these symptoms are aggravated till the sufferer is relieved by death. | Hydrophobia is more easily prevented than cured; indeed, it is doubted whether it ever has been cured. Mercury, arsenic, opium, musk, camphor, acids, wine, vegetable and mineral alkali, oil, various herbs, and many other remedies whose effects are quite opposite, have been employed, but none can be relied on. Large blood-lettings, the warm and cold bath, and almost every other remedial agent, have been tried without success.<br>The bitten part should be completely cut out, even after it has healed, if the symptoms have not yet come on; the part should then be immersed in warm water, or be washed with it as long as it will bleed, and, after the most persevering ablution, caustic should be applied to every part of the surface, and then the wound covered with a poultice, and suffered to heal by granulation.<br>No milder discipline can ensure safety. |

The most energetic poisons are used therapeutically, and often with considerable advantage. They have, of course, to be administered in extremely small doses; to avoid producing poisoning.

POISON-BERRY TREE, Melia azedarach—p. Italian, Liquor arsenicalis—p. Morbid, Virus—p. Oak, Rhus toxicodendron—p. Root, Cicuta maculata—p. Vegetable, Upas—p. Vine, Rhus radicans.

POISONING, *Venefic''ium, Toxica'tio, Intoxica'tio, Entoxis'mus, Entoxicis'mus, Pharmacei'a, Malefic''ium, Venena'tion*, (F.) *Empoisonnement, Intoxication*. The art of applying a poisonous substance to any of the textures in a dose capable of occasioning more or less serious symptoms. Rigorously speaking, therefore, if a physician, in treating any case, employs a deleterious medicine in a small dose, which, owing to particular circumstances, produces unpleasant symptoms, he may be said to have poisoned. The term is, however, generally restricted to poisoning by design.

*Poisoning* has also been used, by a few, to denote the series of symptoms resembling those produced by certain poisons, which occasionally follow the use of substances that are generally innoxious. Overloading the stomach with indigestible food, has, for example, given occasion to symptoms resembling those produced by a narcotic poison, and the effect has been termed *poisoning*.

*Secret poisoning* was, at one time, practised as an art. It consisted in administering medicines, which should act as *slow poisons*, and gradually undermine the strength and life. Its agency was far from being so extensive as was imagined.

POI'SONOUS, *Tox'ical, Nox'ius*; having the qualities of a poison.

POISONS, ACRO-NARCOTIC, P. narcotico-acrid—p. Corrosive, P. acrid—p. Escharotic, P. acrid—p. Irritating, P. acrid—p. Putrescent, P. septic.

*POIVRE D'EAU*, Polygonum hydropiper—*p. de Guinée*, Capsicum annuum—*p. d'Inde*, Capsicum annuum—*p. de Jamaique*, see Myrtus pimenta—*p. Long*, Piper longum—*p. Noir*, Piper nigrum—*p. Petit*, Vitex—*p. à Queue*, Piper cubeba—*p. Sauvage*, Vitex.

*POIX BLANCHE*, see Pinus abies—*p. de Bourgogne*, see Pinus abies—*p. Grasse*, see Pinus abies—*p. Jaune*, see Pinus abies—*p. Minérale*, Pissasphaltum—*p. Navale*, see Pinus sylvestris—*p. Noire*, see Pinus sylvestris.

POKE, Phytolacca decandra—p. Indian, Veratrum viride—p. Stink, Dracontium fœtidum—p. Weed, Phytolacca decandra, Veratrum viride.

POLANIS'IA GRA'VEOLENS, *Clammy weed, Stinkweed, Wormweed, Clammy Mustard, False mustard*. An indigenous plant, *Nat. Ord.* Capparideæ; *Sex. Syst.* Dodecandria Monogynia—which blossoms in summer, and is found in every part of North America. To the whole plant have been ascribed anthelmintic properties.

POLECAT WEED, Dracontium fœtidum.

POLEMO'NIUM REPTANS, *False Jacob's Ladder, Greek Vale'rian, Sweat-root. Order*, Polemoniaceæ; indigenous, flowering in May; has been used as a diaphoretic and expectorant.

POLENTA, Alphiton.

POLES, Chalazæ.

POLEY MOUNTAIN, OF CANDY, Teucrium Creticum—p. Mountain of Montpelier, Teucrium capitatum.

POLIATER, from πολις, 'a town,' and ιατρος, 'a physician.' A physician exercising his profession in a town, by the appointment of the government.—Castelli.

POLICE', MED'ICAL, *Politi'a med'ica, Politobiotherapi'a, Medici'na polit'ica, State med'icine, Polit'ical med'icine*. Hygienic rules established, or to be established, for the prevention of disease, and to contribute to the progress of medicine. The salubrity of districts, especially during the existence of spreading disease, is greatly ensured by an efficient medical police.

POLICLIN'ICA, from πολις, 'a town,' and κλινη, 'a bed.' Treatment of diseases in a town.

POLIO'SIS, *Tricho'sis polio'sis, Spilo'sis polio'sis, Canit''ies*. Hair prematurely gray or hoary. The state of becoming gray.

POLITIA MEDICA, Police, medical.

POLITOBIOTHERAPIA, Police, medical.

POLIUM CAPITATUM, Teucrium capitatum.

POLIUM CRETICUM, Teucrium Creticum—p. Montanum, Teucrium capitatum.

POLLEN, (L.) *Pollen, Pollis*, παλη, 'dust.' The fecundating dust contained in the anthers of flowers, which is dispersed on the stigma.

POLLEX, *Au'ticheir, Prom'anus, Dig''itus primus* seu *magnus*, from *pollere*, 'to have much strength.' (F.) *Pouce.* The first of the fingers in size and strength. It is asserted that the term *poltroon* is derived from *Poll'icē trunca'to*;—the Romans who were desirous of being exempted from military service being accustomed to cut off the thumb, and thus render themselves unfit to handle arms.

Pollex, see Digitus.

Pollex Pedis, *Hallus, Hallux.* The great toe.

POLLINC'TOR, *Pollinc'ter*, (L.) In antiquity, an anointer, dresser, or embalmer of the dead.

POLLINCTURA, Embalming.

POLLIS, Pollen.

POLLOD'IC, *Pollod'icus*; from πολυς, 'many,' and 'οδος, 'a way.' An epithet proposed by Dr. Marshall Hall for a course of nervous action proceeding from one point in many directions to every other.

POLLOM, LITTLE, Polygala paucifolia.

POLLU'TION, *Pollu'tio*, from *polluo*, 'I profane.' The excretion of the seminal liquor or sperm at other times than during coition. When occasioned by a voluntary act, it is called simply *Pollution* or *Masturbation*; when excited during sleep, by lascivious dreams, it takes the name *Nocturnal pollution, Exoneiro'sis, Oneirog'mos, Oneirog'onos, Oneirogonorrhœ'a, Exoneirog'mus, Spermatoclem'ma, Spermatoclep'sis, Spermatolep'sis, Spermatolip'sis, Gonorrhœa dormien'tium, G. oneirog'onos, G. vera, G. libidino'sa, Profluv'ium sem'inis, Spermatorrhœ'a, Paronir'ia salax, Night pollution*, (F.) *Pollution involontaire.*

*POLLUTION INVOLONTAIRE*, Pollution—p. Nocturnal, Pollution—p. Self, Masturbation—p. Voluntary, Masturbation.

POLY, *Polys*, πολυς, 'many, full.' Hence:

POLYACTIUM TRISTE, Pelargonium triste.

POLYÆMIA, Plethora.

POLYÆMIC, Plethoric.

POLYÆMICUS, Plethoric.

POLYANHÆMIA, Anæmia.

*POLYANHÉMIE*, Anæmia.

POLYANTH'ES TUBERO'SA, *Amarucachu.* The root is cut into slips and laid upon the bites of serpents by the Peruvian Indians.

POLYBLEN'NIA, from πολυς, 'much,' and βλεννα, 'mucus.' Excessive secretion of mucus.

POLYBREPHIA, Pregnancy, complex.

POLYCARP'Æ, from πολυς, 'many,' and καρπος, 'fruit.' A division of cutaneous diseases of the family Eczematosen, of Fuchs, including Psoriasis, Lichen, Herpes, and Impetigo.

POLY'CERAS, from πολυς, 'many,' and κερας, 'horn.' A monstrous animal having many horns.—Gurlt.

POLYCHO'LIA, *Pericho'lia, Hypercho'lia*, from πολυς, 'much,' and χολη, 'bile.' Superabundance of bile; such as is supposed to exist in bilious fevers.

POLYCHREST'US, from πολυς, 'much,' and χρησιος, 'useful.' Having many virtues. An ancient name for certain medicines considered to be useful in many diseases.

POLYCHRONIUS, Chronic.

POLYCHY'LIA, from πολυς, 'much,' and χυλος, 'juice.' *Polychy'mia.* Fulness of juices.

POLYCHYMIA, Polychylia—p. Sanguinea, Plethora.

POLYCLIN'ICA, from πολυς, 'much,' and κλινη, 'bed.' Provided with many beds;—as an hospital.

POLYCOR'IA, from πολυς, and κοον, 'the pupil.' The state in which there is more than one pupil.—Von Ammon.

POLYCYE'SIA, *Polycye'sis*, from πολυς, 'many,' and κυησις, 'pregnancy.' Frequent or quickly recurring pregnancies: also, compound pregnancy.

POLYDAC'TYLUS, *Perissodac'tylus*, from πολυς, 'many,' and δακτυλος, 'a finger.' One who has a supernumerary finger or fingers, or toes.

POLYDIP'SIA, from πολυς, 'much,' and διψη, 'thirst;' *Sitis morbo'sa* seu *inten'sa, Polypo'sia, Dipso'sis avens, Excessive thirst*, (F.) *Soif excessive.* A constant desire for drinking, with a sense of dryness in the mouth and throat. It is mostly symptomatic of fever, inflammation, dropsy, excessive discharges, &c., and is so much a part of diabetes, that it has been called Polydipsia.

POLYG'ALA, from πολυς, 'much,' and γαλα, 'milk;' *P. vulga'ris, Common Milkwort. Family*, Rhinanthoideæ. *Sex. Syst.* Diadelphia Octandria. The leaves are bitter, and are used in the same cases as the polygala amara.

Polygala Ama'ra, *P. amarel'la* seu *vulga'ris, Bitter Milkwort.* A powerful bitter; and, consequently, tonic. Its reputed virtues are balsamic, demulcent, and corroborant. The *Polygala rubel'la*, or *Bitter Polygala* of the United States, has the same virtues.

Polygala Amarella, P. amara—p. Bitter, see P. amara—p. Grandiflora, P. senega.

Polyg'ala Paucifo'lia, *Triclisper'ma grandiflo'ra, Dwarf Milkwort, Little Pollom, Evergreen Snakeroot*, (F.) *Polygale naine*, possesses the same properties as P. Senega.

Polyg'ala Sen'ega, *P. Virginia'na* seu *grandiflo'ra, Sen'eka, Rattlesnake Milkwort, Senega* or *Rattlesnake root*, (F.) *Polygale de Virginie* ou *de Seneca.* The bark is the active part of the root. Its taste is at first acrid, and afterwards very hot and pungent. It was once esteemed to be specific against the poison of the rattlesnake and in pleurisy, pneumonia, &c., after the inflammatory action had been got under. It has been given also in humoral asthma, chronic rheumatism, dropsy, croup, amenorrhœa, &c. According to Peschier, it contains three particular principles, *Polyg'aline* or *Sen'egine, Isol'usine*, and *Polyg'alic Acid.* Dose, gr. 30 to 40 of the powder.

Polygala Serpenta'ria. A shrub of Caffraria, the root of which is considered by the natives as a sure antidote against the bites of venomous serpents.

Polygala Virginiana, P. senega—p. Vulgaris, P. amara.

POLYGALAC'TIA, *Polyga'lia*, from πολυς, 'much,' and γαλα, 'milk.' Superabundant secretion of milk; galactia.

*POLYGALE NAINE*, Polygala paucifolia—*p. de Virginie*, Polygala Virginiana.

POLYGALIA, Polygalactia.

POLYGALINE, see Polygala senega.

POLYGONATUM, Convallaria polygonatum—p. Anceps, Convallaria polygonatum—p. Multiflorum, Convallaria multiflora—p. Uniflorum, Convallaria polygonatum—p. Vulgare, Convallaria polygonatum.

POLYG'ONUM, *P. avicula're*, from πολυς, 'much,' and γονη, 'seed.' *P. centino'dium* seu *erec'tum, Centino'dia, Centumno'dia, Bindweed, Sanguina'lis Corrig''iola, Sanguina'ria, Knotgrass, Knotweed*, (F.) *Renouée, Trainasse, Centinode. Family*, Polygoncæ. *Sex. Syst.* Octandria Trigynia. This grass is said to be a feeble astringent.

Polygonum Acre, P. hydropiper.

Polygonum Bistor'ta, *P. bistortoï'des, Bistorta, Colubrina, Offic''inal Bistort, Great Bistort* or *Snakeweed.* The root is a powerful astringent and tonic; and, as such, has been used in internal hemorrhage, atonic diarrhœa, ague, &c. Dose, gr. xv to ʒj.

Polygonum Bistortoides, P. bistorta—p. Centinodium, P. aviculare.

Polygonum Divarica'tum; *Eastern Buckwheat plant.* The roots, reduced to a coarse meal, are said to be much used as an article of diet by the Siberians.

Polygonum Erectum, P. aviculare.

Polygonum Fagop'yrum, *Fagop'yrum, F. esculent'um, Trit'icum Fagi'num, Buckwheat,* (F.) *Sarrasin, Blé noir.* The grain of this plant constitutes a principal article of food with the inhabitants of Russia, Germany, and Switzerland. It is much used in the United States.

Polygonum Hydrop'iper, *P. acrē, Hydropiper, Persica'ria urens, Mercu'rius terres'tris, Poor Man's Pepper, Biting Arse-smart, Lakeweed, Water-pepper,* (F.) *Poivre d'eau.* The leaves of this plant have an acrid, burning taste, and resemble those of the arum. They have been recommended as possessing antiseptic, aperient, and diuretic virtues. The fresh leaves have been applied externally as a stimulating cataplasm.

Polygonum Hydropiperoïdes, P. punctatum.

Polygonum Persica'ria, *Persicaria, P. minor* seu *mitis, Plumba'go, Arse-smart,* (F.) *Persicaire douce.* This plant is said to possess vulnerary and antiseptic qualities. It has been given in wine to arrest gangrene.

Polygonum Puncta'tum, *P. hydropiperoï'des, Water pepper* of America, *Smartweed,* possesses similar properties to Polygonum hydropiper, and is occasionally used internally in gravel, and externally in chronic ulcers. A fluidrachm of the saturated tincture has been extolled in amenorrhœa.

Polyg'onum Virginia'num, *Wand-spiked Persica'ria Virgin'ia Bistort;* indigenous; is astringent, diuretic, and tonic.

POLYGROMA Staphyloma.

POLYHI'DRIA, *Polyi'dria, Polyi'dro'sis,* from πολυς, 'much,' and 'ιδρως, 'sweat.' Excessive sweating.

POLYHYDRIA, Hydrops.

POLYHYPERHÆMIA, Plethora.

POLYIDRIA, Polyhidria.

POLYIDROSIS, Polyhidria.

POLYLYMPHIA, Anasarca.

POLYMASTH'US, *Pleiomas'thus,* from πολυς, 'many,' and μασδος, 'breast.' A monster having several breasts.—Gurlt. The condition has been called *Polyma'zia,* and *Pleioma'zia.*

POLYMAZIA, see Polymasthus.

POLYMERIA, Polymerismus—p. Promiscua translativa, Transposition of the viscera.

POLYMERIS'MUS, *Polymer'ia,* from πολυς, 'much,' and μερος, 'a part.' A monstrosity, which consists in the existence of supernumerary organs; as a sixth finger of the hand.

POLYNEURON, Plantago.

POLYOP'SIA, *Pol'yopy,* from πολυς, 'much,' and οψις, 'sight.' Vision is so called, when multiple.

POLYOPY, Polyopsia.

POLYOREX'IA, from πολυς, 'much,' and ορεξις, 'appetite.' Excessive appetite or hunger. A genus in the gastroses of M. Alibert.

POLYPE'RIA, from πολυς, 'much,' and πηρος, 'mutilated.' Congenital misconstruction of various parts or organs.—Good.

POLYPHA'GIA, *Multivoran'tia,* from πολυς, 'much,' and φαγω, 'I eat.' Voracity. Faculty of eating or subsisting on many kinds of food. See Boulimia.

POLYPH'AGOUS. Relating or appertaining to polyphagia.

POLYPHARMACI'A, *Polypharm'acy;* from πολυς, 'much,' and φαρμακον, 'a medicine.' The prescribing of too many medicines. A prescription, consisting of a number of medicines; hence the name *Polyphar'macus,* given to one who is in the habit of prescribing a number of medicines, and whose prescriptions are loaded with ingredients. The term is taken in bad part.

POLYPHYSIA, Flatulence.

POLYPIFORM CONCRETIONS, see Polypus.

POLYPIONIA, see Polysarcia—p. Infantum, see Polysarcia.

POLYPLAS'TIC, *Polyplas'ticus,* from πολυς, 'much,' and πλασσω, 'I form.' That which has many shapes.

Polyplastic Element, in histology, is one which does not retain its primary shape; but undergoes transformation into others.—Gerber.

POLYPODI'TES. Wine impregnated with polypody.

POLYPO'DIUM, *P. Vulga'rē, P. Virginia'num* seu *pinnatif'idum, Filic'ula dulcis, Common Pol'ypody, Fern root, Rock Brake, Brake root.* This fern grows in the clefts of rocks, walls, &c., in both hemispheres. It was formerly regarded as a cholagogue, and was given in head diseases. It is not used now.

Polypodium Adiantiforme, see Calagualæ radix—p. Ammifolium, see Calagualæ radix—p. Argenteum, see Calagualæ radix—p. Calaguala, Calagualæ radix—p. Coriaceum, see Calagualæ radix—p. Dentatum, Asplenium filix fœmina—p. Filix fœmina, Asplenium filix fœmina.

Polypo'dium Filix Mas, *Aspid'ium Filix Mas, A. depas'tum* seu *ero'sum, Filix pinna'ta, Pteris, Athyr'ium Filix Mas, Blechnon, Polyrrhi'zon, Blancnon Oriba'sii, Lonchi'tis, Filic'ula, Male Polypody* or *Fern, Filix mas, F. non ramo'sa denta'ta, Nephro'dium crena'tum, N. Filix mas, Polys'ticum callip'teris, P. filix mas,* (F.) *Fougère mâle. Nat. Ord.* Filices. *Sex. Syst.* Cryptogamia Filices. The rhizoma of this plant has been much extolled as an anthelmintic, and in cases of tænia. It was the basis of a once celebrated remedy—*Madame Nouffer's,* but, perhaps, more of the efficacy was to be attributed to the active purgatives by which it was followed than to the fern. Dose, ʒij to ʒiij of the powdered solid part of the root; followed in the morning by a strong cathartic of camboge or jalap. An ethereal extract has been proposed by Dr. Peschier, of Geneva.

Polypo'dium Inca'num, *Pol'ypody, Rock Brake;* indigenous; has been considered demulcent, cathartic and anthelmintic.

Polypo'dium Incisum, Asplenium filix fœmina—p. Molle, Asplenium filix fœmina—p. Pennatifidum, P. vulgare—p. Politum, see Calagualæ radix—p. Trifidum, Asplenium filix fœmina—p. Virginianum, P. vulgare—p. Vulgare, Polypodium.

POLYPODY, Polypodium incanum—p. Common, Polypodium vulgare—p. Male, Polypodium filix mas.

POL'YPOID, *Polypoï'des;* from polypus, and ειδος, 'form.' Having the shape of, or resembling, a polypus.

POLYPORUS IGNIARIUS, Boletus igniarius—p. Officinalis, Boletus laricis.

POLYPOSIA, πολυποσια, from πολυς, 'much,' and ποσις, 'drink.' Great thirst—desire for drink. Polydipsia.

POLYPOUS, *Polypo'sus:* same etymon as the next. Relating, or belonging to, or resembling polypus.

POL'YPUS, *Pseudometamorpho'sis polypo'sa*, from πολυς, 'many,' and πους, 'a foot.' A name given to tumours, which occur in mucous membranes especially; and which have been compared to certain zoophytes. Polypi may form on every mucous membrane. They are most commonly observed in the nasal fossæ, pharynx, and uterus; more rarely in the stomach, intestines, bronchial tubes, bladder, and meatus auditorius externus. They vary much in size, number, mode of adhesion, and intimate nature. Accordingly, they have received various appellations; *mucous, soft, vesic'ular*, when their substance has been soft, spongy, vesicular, and, as it were, gorged with fluid. Others have been called *hard;* and these have been distinguished into *fibrous* or *fleshy*, and into *scirrhous* or *cancerous*. *Fibrous* polypi, *Pol'ypi fibro'si, Inopol'ypi*, are of a dense, compact texture, and whitish colour. They contain few vessels, and do not degenerate into cancer. The *scirrhous* or *carcinom'atous* are true cancerous tumours, painful and bleeding. They present all the pathological changes which belong to cancerous affections, and the prognosis is of course unfavourable.

The mode of treating polypi must differ according to their character. The means used to destroy them have been, 1. To subject them to the action of certain astringent powders or solutions, to obtain their resolution. 2. *Cauterization* or the application of the actual cautery or caustics. 3. *Excision* or ablation with a cutting instrument. 4. *Extirpation* with the fingers or with the polypus forceps. 5. A *ligature*, put round them so as to prevent their nutrition. A seton has, also, been sometimes used to gradually destroy the pedicle.

The term POLYPI, *Pseudopol'ypi, Cardi'tis polypo'sa, Pol'ypiform Concre'tions*, (F.) *Concrétions polypeuses* ou *polypiformes* ou *sanguines du Cœur, Hémocardioplasties*, (Piorry,) has likewise been applied to collections of blood—fibrinous concretions — found in the heart or great vessels after dissolution. These were once, erroneously, regarded as morbid. The presence of these concretions may be suspected, when in the course of an acute or chronic affection of the heart, or at the close of chronic diseases in general—especially those of the lungs — the heart's action becomes suddenly tumultuous, obscure, and accompanied with a soft bellows' murmur, whilst the general symptoms indicate the effects of obstructed circulation. The right cavities are most frequently affected.

POL'YPUS BRONCHIA'LIS, *Bronchlemmi'tis, Bronchi'tis membrana'cea, B. plastic, Bronchial Croup, Chronic Croup* (?) *Pseudo-mem'branous Bronchitis*. A membraniform secretion in the bronchial tubes of a diphtheritic character, having the shape, when unexpectorated, of the bronchia. It is the result of inflammation of the lining membrane of those tubes.

POLYPUS CARNOSUS, Sarcoma—p. Fibrosus, see Polypus — p. Uteri, Metropolypus.

POLYRRHIZON, Polypodium filix mas.

POLYRRHŒA, Profluvium.

POLYSAR'CIA, *Polysarco'sis*, from πολυς, 'much,' and σαρξ, 'flesh.' *Carnos'itas, Polysoma'tia, Adelipa'ria, Corpulen'tia, Steati'tes*. Excessive corpulency. Authors have distinguished two varieties of this: — POLYSARCIA CARNO'SA, *Cor'pulency*, and P. ADIPO'SA, *Polypio'nia, Pimelo'sis nim'ia, Pachys'mus, Pachyn'sis, Obes'itas, Hyperpim'elē, Lipa'ria, Adipo'sis, Polysar'cia faginc'sa, Empymc'lium polysar'cia, Baryso'mia, Barysomat'ica, Lipo'sis, Lipar'otes, Lipas'ma, Pinguitu'do, Pin'guitude, Obes'ity*, (F.) *Obésité, Embonpoint excessif*. A severe regimen and exercise are the best preventives. Children are occasionally met with of unusual fatness, in spite of every care. This morbid deposition has been termed *Polypio'nia infantum*, and *Chloro'sis gigante'a*.

POLYSARCIA VISCERUM, Physconia adiposa.

POLYSARCOSIS, Polysarcia.

POLYSIA'LIA; from πολυς, 'much,' and σιαλον, 'saliva.' Excessive discharge of saliva.

POLYSOMATIA, Polysarcia.

POLYSPAS'TON, from πολυς, 'much,' and σταω, 'I draw.' A powerful instrument for reducing luxations. — Gorræus.

POLYSPER'MIA; from πολυς, 'much,' and σπερμα, 'sperm.' Richness or fulness of sperm.

POLYSTICUM CALLIPTERIS, Polypodium filix mas—p. Filix Mas, Polypodium filix mas.

POLYSTOMA PINGUICOLA, see Worms——p. Venarum, see Worms.

*POLYTRIC*, Asplenium trichomanoides.

POLYT'RICHUM, from πολυς, 'much,' and θριξ, 'hair.' *Polyt'richon, Polyt'richum vulga're, Adian'tum au'reum, Golden Maiden-hair*, (F.) *Perce-mousse*. It is possessed of astringent properties, and was formerly given in diseases of the lungs, and in calculous affections.

POLYTRICHUM COMMUNE, Asplenium trichomanoides.

POLYTROPH'IA, from πολυς, 'much,' and τρεφω, 'I nourish.' Abundant or excessive nutrition.

POLYURESIS, Diabetes.

POLYURIA, Diabetes.

POLYU'RICUS, from πολυς, 'much,' and ουρον, 'urine.' Sauvages calls—*Ischu'ria polyu'rica*—a kind of ischuria, caused by accumulation of urine in the bladder.

POMA, Drink — p. Chinensia, see Citrus aurantium.

POMACEUM, Cider.

POMA'TUM, *Pomma'tum*, (F.) *Pommade, Liparolé*. A pharmaceutical preparation, employed only externally; which differs but little from an ointment, except in having generally less consistence. It is usually made aromatic, and coloured to render it more agreeable.

*Common Pomatum* is made of *lard*, 12℔s; *suet*, 4℔s; *essence*, ℥viij.

POMATUM AD LABIA DEMULCENDA, Cerate for the lips — p. Epispasticum flavum, Unguentum lyttæ medicatum aliud — p. Epispasticum viride, &c., Unguentum lyttæ medicatum — p. for the Lips, Cerate for the lips—p. Nitricum vel oxygenatum, Unguentum acidi nitrosi — p. Saturni, Unguentum plumbi superacetatis.

POMBALEA IPECACUANHA, see Ipecacuanha.

POMEGRANATE, Punica granatum.

POMILIUS, see Nanus.

*POMMADE*, Pomatum—*p. d'Alyon*, Unguentum acidi nitrosi—*p, Antipsorique de Jasser*, Unguentum sulphuris compositum—*p. d'Autenrieth*, Unguentum antimonii tartarizati—*p. de Cyrillo*, Unguentum muriatis hydrargyri oxygenato medicatus — *p. Épispastique jaune*, Unguentum lyttæ medicatum aliud — *p. Épispastique verte*, Unguentum lyttæ medicatum—*p. de Garou*, Unguentum epispasticum de daphne gnidio.

*POMMADE DE GONDRET, P. ammoniacale de Gondret* (F.), *Gondret's Counterirritant, Gondret's ammoniacal Caustic. Liq. ammon.* p. ij; *Sevi*, p. j; *Ol. amygdal.* p. j; M. Used to excite a speedy revulsion in cases of chronic affections of the brain, incipient cataract, amaurosis, &c., as well as to cauterize the integuments deeply.

The above formula, is that of the French Codex, but, according to M. Trousseau, it is much too hard for use, unless the weather is warm.

He proposes *two formulæ*, one for summer, the other for winter. In the *former* he directs three parts of *lard*, one of *suet*, and four of *liquor ammoniæ;* in the *latter*, equal parts of *lard* and *liquor ammoniæ*.

*POMMADE POUR LES LÈVRES*, Cerate for the lips—*p. Ophthalmique* (Regent's,) Unguentum ophthalmicum — *p. Oxygénée*, Unguentum acidi nitrosi — *p. Stibiée*, Unguentum antimonii tartarizati.

*POMME*, see Pyrus malus — *p. d'Adam*, *Pomum Adami*—*p. d'Amour*, Solanum lycopersicum — *p. Épineuse*, Datura stramonium — *p. de Merveille*, Momordica balsamica — *p. Mousseuse*, Bedegar—*p. de Terre*, Solanum tuberosum.

*POMMES HÉMORRHOÏDALES*, see Viscum album.

*POMMETTE*, see Malæ os.

*POMMIER*, Pyrus malus.

POMPH'OLYX, from πομφος, 'a bladder.' A small vesicle on the skin. An eruption of *bullæ* or *blebs*, appearing without any inflammation around them, and without fever. It is the *Ecphlysis Pompholyx* of Good. See Pemphigus.

Pompholyx, Tutia, Zinci oxydum.

POMPION, Cucurbita pepo.

POMUM ADA'MI, (F.) *Pomme d'Adam*, *Adam's Apple*. The projection formed by the thyroid cartilage in the neck — of males particularly. It is so called from a notion that it was caused by the apple sticking in the throat of our first parent.

Ponum Amoris, Testicle—p. Hierosolymitanum, Momordica balsamina — p. Melongenæ, see Solanum melongena — p. Mirabile, Momordica Balsamina — p. Spinosum, Datura stramonium.

*PONCTION*, Puncturing.

POND SHOVEL, Unisema deltifolia.

PONDERA ET MENSURÆ, Weights and measures.

PONDUS, Pudibilia — p. Pharmaceuticum, see Weights and Measures.

*PONGITIF*, Pungent.

PONS CEREBELLI, Pons Varolii — p. Hepatis, see Lobulus anonymus — p. Sylvii, Quadrigemina Tubercula — p. Tarini, Tarini pons.

Pons Varo'lii, *Pons Cerebel'li*, *Corpus annula're*, *Proces'sus annularis*, *Prominen'tia annula'ris cer'ebri*, *Eminen'tia annularis*, *Varo'li's bridge*, *Nodus enceph'ali* vel *Cer'ebri*, *Cerebral protu'berance*, *Protuberan'tia annula'ris Willisii*, (F.) *Protubérance cérébrale*, *P. annulaire*, *Mésencéphale*, *Mésocéphale*, *Pont de Varole*, *Annular protuberance*. An eminence at the upper part of the medulla oblongata, first described by Varolius. It is formed by the union of the crura cerebri and crura cerebelli.

Pons Zygomaticus, Zygomatic arch.

*PONTE*, see Parturition — *p. Périodique*, see Parturition.

PONTEDERIA CORDATA, Unisema deltifolia.

PONTICUM ABSINTHIUM, Artemisia Pontica.

POPLAR, AMERICAN, Liriodendron — p. Balm of Gilead, Populus Candicans — p. Black, Populus — p. Tree, Liriodendron — p. Tulip-bearing, Liriodendron.

POPLES, *Gare'tum*, *Garretum*, *Ignys*, *Ig'nyē*, *Suffra'go*, *Fossa genu*, *Fossa poplita'a*, the *Ham*, the *Hough*, *Hock*, (F.) *Jarret*, from *post*, and *plico*, 'I fold.' The posterior part of the knee joint. The ham forms what is called the *popliteal region* or *space*.

POPLITÆUS, Popliteal muscle.

*POPLITÉ*, Poplitæus muscle.

POPLITEAD, see Popliteal aspect.

Popli'te'al, *Poplita'us*, *Poplit'ic*, from *poples*, 'the ham.' That which relates to the ham. A name given to various parts.

Popliteal Artery — *Popliteal portion of the crural*, — (Ch.) is really a continuation of the femoral, which changes its name on passing through the adductor magnus muscle. It descends a little obliquely outwards into the hollow of the ham, and extends from the commencement of the lower third of the thigh to the end of the upper quarter of the leg, where it terminates by dividing into the *posterior tibial* and *peroneal* arteries. In the ham, it gives off the three *superior articular arteries;* and, at the top of the leg, the arteries of the gemini muscles or *gemini branches*, (F.) *branches jumelles*, the *two inferior articular arteries*, and the *tibialis antica*.

Popliteal Aspect. An aspect towards the side on which the *poples* or ham is situated. Barclay. *Poplite'ad* is used by the same writer adverbially, and signifies 'towards the popliteal aspect.'

Popliteal Fossa, Poples.

Poplite'al Glands, *Glan'dulæ poplitæa*. Lymphatic glands, four in number, seated in the popliteal region or space.

Popliteal Muscle, *Poplitæus Muscle*, *Muscle Jarretier*, *Fémoro-popliti-tibial*, (Ch.,) *Subpoplitæus*, (F.) *Muscle poplité*, is seated in the popliteal region. It is triangular, long, flat; and is inserted, on the one hand, by means of a strong tendon, into the tuberosity at the outer condyle of the femur, terminating below at the upper part of the posterior surface of the tibia. This muscle bends the leg on the thigh, and, reciprocally, the thigh on the leg. When the leg is bent, it causes it to turn, in rotation, inwards.

Popliteal Nerves. They result from the bifurcation of the sciatic, and are two in number, viz. 1. The *external popliteal*, *Peroneal nerve*, *Branche péronière*, (Ch.) It is smaller than the internal; turns to the outside of the fibula at the upper part of the leg, and divides into the *musculo-cutaneous branch*, *nerf prétibio-digital*, (Ch.) and the *anterior tibial*, *nerf prétibio-susphalangétaire*, (Ch.) 2. The *inter'nal poplite'al nerve*, *Branche tibiale*, (Ch.) which is larger than the other, and seems to be the real continuation of the sciatic nerve. It descends vertically into the hollow of the ham; and passes beneath the aponeurotic arch of the solaris muscle, beyond which it takes the name *tibial nerve*. It furnishes the *external saphena nerve*, and a number of branches, that are distributed to the posterior muscles of the leg. It then passes to the sole of the foot to be divided into two branches, called *Plantar nerves*.

Popliteal Region, Poples — p. Space, Poples.

Popliteal Vein has the same arrangement as the artery behind which it is situate.

POPLITIC, Popliteal.

POPONAX, see Pastinaca opoponax.

POPPY, CELANDINE, Stylophorum diphyllum — p. Corn, red, Papaver rhœas — p. Heads, see Papaver—p. Horn, Stylophorum diphyllum—p. Juice, Meconium—p. Prickly, Argemone Mexicana—p. Spotling, Cucurbalus Behen—p. Thorn, Argemone Mexicana — p. White, Papaver — p. White, capsule, see Papaver.

POP'ULUS, *Populus nigra*, *Ægei'ros*, *Achero'is*, *Black poplar*, (F.) *Peuplier noir*. The young *buds*, *oculi* or rudiments of the leaves, which appear in the beginning of spring, were formerly used in an officinal ointment — the *unguen'tum popule'um*. It was, also, recommended in chronic affections of the lungs.

The bark of *Pop'ulus Tremuloï'des*, *American aspen*, of P. Trem'ula seu *pen'dula*, *European aspen*, and of Populus Can'dicans, *Balm of Gilead*

*Poplar*, is antiperiodic, and furnishes *salicin* and *populin*, in which the properties probably reside.

Populus Balsamifera, see Fagara octandra—p. Candicans, see Populus—p. Pendula, P. tremula—p. Tacamahaca, see Fagara octandra—p. Tremula, see Populus—p. Tremuloides, see Populus.

*PORCELAINE*, Essera, Urticaria.

PORCELLIO, Oniscus.

PORCELLUS, Oniscus.

PORCULUS, Oniscus.

PORCUPINE DISEASE, Ichthyosis.

Porcupine Men, *Echinoder'mi*. Persons have been so called in whom the cuticle is produced in the form of pointed prolongations, as if it had been moulded on the papillæ, like the shorter and blunter quills of the porcupine.

PORCUS, Vulva.

PORDE, Crepitation.

PORE, *Porus*, *In'terstice*, *πορος*, 'a passage.' Anatomists have given this name to the openings at the extremities of vessels at the surface of different membranes. Exhalant Pores have been supposed to exist in the exhalants, to transmit the fluids exhaled.—Absorbent Pores are employed in taking up parts that have to enter the circulation. Pores exist in the cuticle; yet Humboldt, with a powerful magnifying-glass, was unable to observe them. The pores of the skin have also been called *spira'cula*.

POREBLIND, Myopic.

PORI BILIA'RII, *Ductus bilia'rii*, *Sur'culi fell'ei*. Ducts which receive the bile from the penicilli of the liver, and convey it to the hepatic duct.

Pori Cuta'nei, P. *Exhalan'tes* seu *Sudorif'eri* seu *Resorben'tes*. The pores of the skin.

Pori Exhalantes, P. cutanei—p. Pulmonum, Cellules, bronchic—p. Resorbentes, P. cutanei—p. Sudoriferi, P. cutanei.

POROCE'LE, from *πωρος*, callus,' and *κηλη*, 'a tumour.' A hard tumour of the testicle or its envelopes.

POROMA, Induration.

POROMPHALOCELE, Poromphalon.

POROM'PHALON, *Poromph'alus*, *Poromphaloce'lē*, from *πωρος*, 'hard,' and *ομφαλος*, 'the navel.' Umbilical hernia with hard and thickened parietes.

POROS, Canal.

POROSIS, Chalaza, Induration.

POROT'IC, *Porot'icus*, from *πωρος*, 'callus.' A remedy believed to be capable of assisting the formation of callus.

PORPHYRA, Purpura—p. Græcorum, Petechiæ—p. Hæmorrhagica, Purpura hæmorrhagica.

PORPHYRISMA, Scarlatina.

PORPHYRISMUS, Scarlatina.

PORPHYRIZATION, Levigation.

PORPHYRO-TYPHUS, see Typhus.

PORPHYRU'RIA, *Porphyu'ria*; from *πορφυρα*, 'purple,' and *ουρον*, 'urine.' A state of the urine—*pur'puric urine*—in which it deposits the remarkable colouring matter—*pur'purine*—in association with urate of ammonia.

POR'PHYRY, *Porphyri'tes*, from *πορφυρα*, 'purple.' A species of very hard, compound rock, susceptible of considerable polish, and used in the fabrication of mortars and slabs for the apothecary.

Porphyry, Black, Ophites.

PORPHYURIA, Porphyruria.

*PORRACÉ*, Porraceous.

PORRA'CEOUS, *Porra'ceus*, *Pra'sinus*, from *porrum*, 'a leek.' (F.) *Porracé*. Having the green colour of the leek. An epithet given to certain excreted matters,—the sputa, bile and fæces particularly.

*PORREAU*, Allium porrum.

PORRECTUM, Lever.

PORRET, Allium porrum.

*PORRIGINE*, Porrigo favosa.

*PORRIGINEUX*, Porriginous.

PORRIGINOSUS, Porriginous.

PORRIG''INOUS, *Porrigino'sus*, (F.) *Porrigineux*. Appertaining to porrigo.

PORRI'GO (L.), 'scurf or scall in the head.' *Tin'ea*, *Favus*, *Furfura'tio*, *Fur'fures*, *Ecpye'sis porrigo*, *Phlysis porrigo*, from *porrigere*, 'to spread.' (F.) *Teigne*, *Rache*. Some of the varieties are contagious. It is principally characterized by an eruption of the pustules, called favi and achores, unaccompanied by fever.

Porrigo Decal'vans, *Tricho'sis a'rea*, *Area*, *Alope'cia area'ta*, *A. partia'lis*, *A. circumscrip'ta*, *Phytoalope'cia*, *Tyr'ia*, *Tyro'ma*, *Ophi'asis*, *Tin'ea tondens*, *Herpens tonsu'rans*, *Limited* or *partial Baldness*, consists of patches of baldness without decay or change of colour in the surrounding hair, the exposed parts of the scalp being glabrous, white, and shining. The morbid condition sometimes spreads, so that the patches coalesce, rendering the baldness extensive. To a vegetable growth found at the roots of the hair in Tinea tondens, Malmstèn of Stockholm has given the name *Trichoph'yton tonsu'rans*. The treatment consists in keeping the scalp cleared by constant shaving, and in the steady application of some stimulating liniment or ointment.

Porrigo Favo'sa, *Ce'rion*, *Favus*, *Ecpye'sis porrigo favosa*, *Tinea favosa*, *Sca'bies cap'itis favosa*, *Melice'ra*, *Melice'rum*, *Melice'ria*, *Mellifa'vium*, *Porrigophyte*, *Honey-comb Scall* or *Tetter*, (F.) *Teigne faveuse*, *Porrigine*. This consists in an eruption of pustules common to the head, trunk, and extremities, pea-sized, flattened at the top, in clusters, often uniting; discharge, fetid; scabs, honey-combed; the cells filled with fluid. It occurs both in early and adult life. Modern researches have satisfied some observers, that the crusts of favus are of vegetable nature, and formed of a parasitic plant, belonging to the genus *mycoderm'a*, for which Remak has proposed the name *Achorion Schönleini*. The point is not, however, settled. The treatment of this variety must consist in the exhibition of laxatives and the mildest stimulating ointments, such as the *Ung. zinci*, *Ung. hydrargyri præcipitat. alb.*, &c. Eczema of the hairy scalp is often confounded with Porrigo.

Porrigo Fur'furans, *Ecpyesis porrigo furfura'cea*, *Tinea furfuracea*, *Tinea porrigino'sa*, *Pityri'asis Tricho'sis furfura'cea*, *Teigne furfuracée* (Alibert), commences with an eruption of small achores, the fluid of which soon concretes and separates in innumerable, thin, laminated scabs, or scale-like exfoliations. It is attended with a good deal of itching and some soreness of the scalp, to which the disease is confined. It occurs chiefly in adults. In the treatment, the scalp must be kept shaved. The part must be washed repeatedly with soap and water, and an oiled silk cap worn. The nature of the ointments used must vary according to the period of disease and the irritability of the part affected. *Zinc ointment*;—one made with the *Cocculus indicus*;—the *Sulphur ointment*;—*Citrine ointment* and *Ung. hydrargyri nitrico-oxydi*; *Tar ointment* and *Nitric acid ointment* have all been found useful. Should inflammation or discharge arise, these applications must of course be intermitted.

Porrigo Larvalis, P. lupinosa.

Porrigo Larva'lis, *Crusta lac'tea*, *Ecpye'sis*

*Porrigo crusta'cea, Menti'go, Achor, Tin'ea lac'tea, T. Fa'ciei, Milky scall* or *Tetter, Lactu'men, Lacti'go,* (F.) *Croûte de lait, Croûte laiteuse, Feux volages, La Graine.* This is, almost exclusively, a disease of infancy. It commonly appears first on the forehead and cheeks, in an eruption of numerous, minute, whitish achores on a red surface. These break and discharge a viscid fluid, which becomes incrusted in thin, yellowish, or greenish scabs. The patches spread, until the whole face becomes, as it were, enveloped in a mask; hence the epithet *larvalis.* The disease is rather a variety of Eczema. Sometimes the eruption appears on the neck and breast; and, occasionally, on the extremities. In general, the health of the child does not suffer, but the eruption is always attended with much itching and irritation. The treatment consists in mild, tepid ablution, and the application of gently stimulating ointments, as of the oxydum zinci. The bowels must be kept in a soluble state by small doses of calomel, or by rhubarb and magnesia.

Porrigo Lupino'sa, *Tin'ea lupi'na, Scabies cap'itis, Ecpye'sis porrigo lupino'sa, Porri'go larva'lis, Impeti'go figura'ta, Tin'ea granula'ta, T. muco'sa, Crusta lactea* (of some), *Ment'agra infan'tum,* (F.) *Teigne, Dartre crustacée flavescente,* consists of minute pustules in small patches, mostly commencing on the scalp; the patches terminate in dry, delving scabs, resembling lupine seeds; the interstices often covered with a thin, whitish, and exfoliating incrustation. It occurs chiefly in early life, and requires the same treatment as the last.

Porrigo Scutula'ta, *Tin'ea granula'ta, Ecpye'sis porrigo galea'ta, Tinea fico'sa, Acho'res* seu *Sca'bies cap'itis, Ringworm of the Scalp, Scalled head,* (F.) *Teigne annulaire, T. en anneau, T. nummulaire.* It commences with clusters of small, light, yellow pustules, which soon scab off; and, if neglected, become hard by accumulation. If the scabs be removed, the surface is left red and shining, but studded with slightly elevated points. If not attended to, it involves the whole head. It occurs in children three or four years of age, and is very unmanageable. The rules laid down under *Porrigo furfurans* must be here still more perseveringly enforced. The whole tribe of stimulating ointments may be used in succession. No one will always succeed, and hence the necessity of change, provided advantage should not seem to follow any particular application. The *Unguentum ad Scabiem,* of Banyer, sometimes cures, when others fail.

PORRIGOPHYTE, Porrigo favosa.

PORRUM, Allium porrum, Thymion.

PORRUS, Sarcoma, Thymion.

PORTA, πυλη, *Pylē,* 'a gate.' The part of the liver where its vessels enter as by a gate. Also, the Vulva.

Porta Jecoris, Porta vena.

Porta Vena, *Vena portæ, V. porta'rum* seu *porta'lis, Rama'lis vena, Jan'itrix, Vena magna* seu *quæ ad portas est* seu *stelechiæ'a* seu *lac'tea* seu *ostia'ria, Porta Jec'oris, Porta, Vena arterio'sa* seu *arteria'lis, Manus Jec'oris* seu *he'patis, Vena ad portas.* The *System of the vena porta* or the *Abdom'inal venous system,* (F.) *Veine porte, Porte veine,* is a vascular apparatus of black blood, situate in the abdomen, and resulting from two distinct orders of vessels, united into one common trunk. 1. One of these trunks, much more extensive than the other, has received the name *Vena porta abdomina'lis,* because it arises from all the organs enclosed in the cavity of the abdomen, except the kidneys and bladder; and in the female, the uterus. The *Abdominal vena porta* has two principal roots, the *splenic vein* and the *superior mesenteric,* which have their ramifications in all the digestive organs. 2. The other trunk, destined solely to the liver, has been called the *Hepat'ic vena porta.* It appears to be a continuation of the abdominal vena porta, and proceeds towards the inferior surface of the liver. Opposite to the transverse fissure of that organ, it divides, like an artery, into two branches, which, by their union, seem to form a canal or duct, called by some the *Sinus of the vena porta.* These branches are distributed in the substance of the liver, whither they are accompanied by a prolongation of the fibrous capsule of that organ, —the capsule of Glisson. The different branches of the vena porta are devoid of valves. See Liver.

PORTAL, from *porta,* 'a gate.' Relating to the porta of the liver, — as the *portal* system, or system of the vena porta. By extension, the term has been applied to an analogous system of vessels in the kidney. See Kidney.

Portal Fissure, see Liver — p. System of the Kidney, see Kidney — p. Veins of the Kidney, see Kidney.

*PORTE-AIGUILLE, Acutenac'ulum, Needle-carrier, Needle-bearer,* from (F.) *porter,* 'to carry,' and *aiguille,* 'a needle.' An instrument for accurately laying hold of a needle, and giving it greater length, when it is so fine and small that it cannot be held by the fingers. It is of steel or silver, about two inches long, and throughout the whole, almost, of its length, divided into two branches, so as to form a kind of forceps, capable of being closed by means of a sliding ring. A modification of this instrument was devised by Dr. Physick for taking up deep-seated arteries beyond the reach of a tenaculum or common needle. It consists of a forceps so constructed as to hold in its extremity a needle armed with a ligature. The handles of the forceps are fastened together, temporarily, by a spring or catch; and, when the needle is fairly deposited beneath the vessel, it is disengaged from the forceps and drawn out, leaving the ligature behind, which can be tied without difficulty.

*PORTE-BOUGIE,* (F.) A silver canula similar to that of a trochar, except that it is longer. It is used for conducting bougies into the urethra.

*PORTE-CAUSTIQUE, Porte-pierre* — *p. Feuille,* Subscapularis.

*PORTE-LIGATURE,* from *porter,* 'to carry,' and *ligature.* An instrument for conveying a ligature to deep-seated parts.

*PORTE-MÈCHE* (F.), from *porter,* 'to carry, and *mèche,* 'a tent.' An instrument for carrying tents or *mèches* deeply into fistulous openings, or sinuses, to the bottom of ulcers, &c. It is a wire of silver or steel, four or five inches long, having a notch at one extremity, and a button at the other.

*PORTE-MOXA,* (F.) A small instrument for keeping the moxa applied to a part to be cauterized. It consists of a metallic ring—separated from the skin by three supports of ebony—to which a handle is adapted.

*PORTE-NŒUD* (F.), from *porter,* 'to carry.' and *nœud,* 'a knot.' An instrument for carrying a ligature round the base or pedicle of a tumour.

*PORTE-PIERRE* (F.), *Porte-caustique, Caustic bearer.* An instrument similar to a *porte-crayon* for carrying lunar caustic.

*PORTE-SONDE,* (F.) An instrument resembling a porte-crayon, employed for holding the style or *sonde,* and inserting it more readily into the nasal duct, during the operation for fistula lachrymalis.

*PORTE-VEINE,* Porta Vena.

PORTER, Cerevisia.

PORTIO DURA, Facial nerve — p. Inter duram et mollem, Portio Wrisbergii—p. Intermedia Wrisbergii, Portio Wrisbergii—p. Media inter portionem duram et portionem mollem, Portio Wrisbergii.

Portio Mollis, Auditory nerve.

Por'tio Wrisber'gii, *Portio interme'dia Wrisber'gii, Portio media inter portionem duram et portionem mollem, Portio inter duram et mollem,* (F.) *Faisceau intermédiare de Wrisberg, Intermédiaire de Wrisberg.* A small, white fasciculus, intermediate between the portio mollis and portio dura of the seventh pair of nerves, which was first described by Wrisberg. The Chorda Tympani is supposed by some to emanate from this nerve.

*PORTION COSTO-TRACHÉLIENNE DU SACRO-SPINAL,* Longissimus dorsi—*p. Écailleux* ou *squameux du temporal,* Squamous portion of the temporal—*p. Lombaire du plexus crural,* Lumbar plexus.

*PORTION GODRONNÉE DE LA CORNE D'AMMON.* A name given by Vicq d'Azyr to a small, denticulated cord, of a compact tissue and granular appearance, which unites the cornu ammonis to the paries of the lateral ventricle.

PORTONARIUM, Pylorus, Duodenum.

PORTULA'CA, *Andrach'nē, Al'lium Gal'licum, Portula'ca olera'cea, Purslane,* (F.) *Pourpier cultivé.* This plant abounds with a watery and somewhat acid juice; and is often put into soups or pickled with spices. It is regarded as antiseptic and aperient.

POROUS, Callus, Meatus — p. Acusticus, Auditory canal, internal.

PORUS OP'TICUS. An opening in the centre of the cribriform lamella of the sclerotic, through which the central artery of the retina enters the eyeball.

POSCA, Oxycrate.

POSE, Coryza.

POSIMOS, Potable.

POSITION, FALSE, False position.

POSOL'OGY, *Posolog''ia, Dosiolog''ia,* from ποσος, 'quantity,' and λογος, 'a discourse.' Indication of the doses in which the different articles of the materia medica ought to be exhibited.

POSSET, *Posse'tum,* from (L.) *posca,* 'sour wine and water.' Milk curdled with wine, or any acid, or treacle. A preparation of beer and milk; *Zythog'ala.*

Posset, Sack, see Sack—p. Sago, see Sago.

POSSETING, Regurgitation (of Infants).

POSTBRACHIALE, Metacarpus.

POSTCARPIUM, Metacarpus.

POSTE'RIOR ANNULA'RIS. An external, interosseous muscle, which arises from the corresponding sides of the metacarpal bones of the ring-finger and little finger, and is inserted into the inside of the tendon on the back of the ring-finger. Its *use* is to draw the ring-finger inwards.

Posterior Auris, Retrahens auris.

Posterior In'dicis Manûs. An internal, interosseous muscle, which arises from the inner or ulnar side of the metacarpal bone of the fore-finger, and is inserted into the inside of the tendon on the back of the fore-finger. Its *use* is to draw the fore-finger inwards.

Posterior Indicis Pedis, *Abduc'tor Indicis Pedis* An external, interosseous muscle, which arises from the contiguous sides of the metatarsal bones of the fore-toe, and second of the small toes, and is inserted into the outside of the root of the first bone of the fore-toe. Its *use* is to pull the fore-toe outwards.

Posterior Me'dii Dig''iti Manûs. An external, interosseous muscle, which arises from the corresponding sides of the metacarpal bones of the middle and ring-fingers; and is inserted into the inside of the tendon on the back of the middle finger. Its *use* is to draw the middle finger inwards.

Posterior Medii Dig''iti Pedis, *Abductor medii digiti pedis.* An external, interosseous muscle, which originates from the contiguous sides of the metatarsal bones of the second and third of the small toes, and is inserted into the outside of the root of the first bone of the second of the small toes. Its *use* is to pull the toe outwards.

Posterior Ter'tii Dig''iti, *Adduc'tor tertii digiti.* An external, interosseous muscle, which arises from the contiguous sides of the metatarsal bones of the third and fourth of the small toes, and is inserted into the outside of the root of the first bone of the third of the small toes. Its *use* is to pull the toe outwards.

POSTHE, Penis, Prepuce.

POSTHET'OMIST, *Posthet'omus,* from ποσθη, 'prepuce,' and τομη, 'incision.' One who performs the operation of circumcision.

POSTHETOMY, Circumcision.

POSTHIA, Hordeolum.

POSTHIOPLAS'TIC, *Posthioplas'ticus,* from ποσθη, 'the prepuce,' and πλασσω, 'I form.' An epithet applied to the operation for restoring the prepuce.

POSTHI'TIS, from ποσθη, 'the prepuce, the penis,' and *itis,* the termination for inflammation. Inflammation of the prepuce or penis.

POSTHIUM, Prepuce.

POSTHON'CUS, from ποσθη, 'the prepuce or penis,' and ογκος, 'a tumour.' Swelling of the prepuce or penis.

POSTHOPLAS'TICA, from ποσθη, 'prepuce,' and πλαστικος, 'formative.' The art of making a new prepuce.

POST'HUMOUS, from *post,* 'after,' and *humus,* 'the ground.' Occurring after death.

Posthumous Child. One born after the death of its father, or taken from the dead body of its mother, as by the Cæsarean section.

POST-MORTEM. 'After death;' as 'a *post mortem* or necroscopic examination.'

POST-NATUS. In the old law writers, the second son.

POST-PARTUM. 'After delivery.' As '*post partum* hemorrhage.'

POSTPOSIT''IO. Delay in the return of a paroxysm. It is opposed to *anticipatio,* which means the return of a paroxysm earlier than its accustomed hour.

In this sense, we speak of an *anticipating,* and a *postponing* (*Febris hysterct'ica*) intermittent.

POSTREMA, Uterus.

PO'TABLE, *Potab'ilis,* from *potare,* 'to drink.' *Pot'imos, Potos, Pos'imos,* 'drinkable.' Water is said to be potable, when it contains atmospheric air; is not brackish; and has no mineral impregnation of consequence.

POTASH. So called from the pots or vessels in which it was made;—*Vegetable alkali, Gastrinum.* Also, Potass.

Potash of Commerce, *Potassa impu'ra, Impure potassa, Alu'men cati'num, Cin'eres Rus'sici, Subcar'bonas potas'sæ impu'rus, Potas'sæ car'bonas impurus,*—the *Pearlash* of commerce, is prepared from the ashes of land-plants by calcination, solution in water, filtration, and evaporation. It usually consists of subcarbonate of potass,

sulphate of potassa, chloride of potassium, silex, oxide of iron, &c.

From the ashes of lees of wine, and from vine-twigs, a much purer alkali is obtained. It is called *Cinis infecto'rius, C. fœcum, Cin'eres clavella'ti, Alu'men fœcum, Cin'eres gravella'ti,* (F.) *Cendres gravélées, Cendres de sarment.*

Another variety of the alkali is afforded by burning argol in a crucible; afterwards powdering and calcining it, till it is nearly white; then dissolving in water, filtering, and evaporating. It is called *Salt of Tartar, Sal Tar'tari, Kali præpara'tum e tar'taro, Kali e tartaro, Subcar'bonas potassæ puris'simus, Potas'sæ subcar'bonas e tar'taro.* Lastly, when wormwood is burnt to ashes, dissolved in water, filtered, and evaporated to dryness, it affords another variety of vegetable alkali, the *Sal absin'thii* or *Salt of wormwood.*

Impure potash is used for preparing the subcarbonate for medical use.

POTASS, Potassa, Potassa fusa, Potash. The protoxide of potassium.

POTASSA, ACETATE OF, Potassæ acetas — p. Bichromate of, Potassæ bichromas — p. Bisulphate of, Potassæ supersulphas—p. Bitartrate of, Potassæ supertartras — p. Carbonate of, Potassæ carbonas — p. Carbonate of, pure, see Potassæ subcarbonas—p. Chlorate of, Potassæ murias hyperoxygenatus — p. Chromate of, Potassæ chromas — p. Chromate of, neutral, Potassæ chromas — p. Chromate of, yellow, Potassæ chromas.

Potas'sa cum Calcē, *Potass with lime, Calx cum cali puro, Caus'ticum commu'nē for'tius, Lapis infernal'is* sive *sep'ticus, Kali caus'ticum cum calcē, Potas'sa opē calcis para'ta et ignē fusa, Lapis caus'ticus,* (F.) *Potasse préparée avec la chaux, P. à la Chaux, Pierre a cautère.* (*Potassæ, Calcis* āā ℥j. Rub together, and keep in a well-stopped bottle. Ph. U. S.) Used for the same purposes as the next, but more manageable; being less deliquescent.

Potassa, Euchlorate of, Potassæ murias hyperoxygenatus — p. Ferrocyanate of, Potassii ferrocyanuretum — p. Ferroprussiate of, Potassæ cyanuretum.

Potassa Fusa, *Potassa, Kali caus'ticum, Fused potass, Caus'ticum commu'nē acer'rimum, Kali purum, Al'kali vegetab'ilē fixum caus'ticum, Causticum alkali'num, C. commu'nē, C. Potentia'lē, C. Sali'num, Hydras ka'licum, Hydras potas'sæ puræ fusæ, Potassæ hydras, Lapis caus'ticus, Lapis causticus chirurgo'rum, Lapis inferna'lis alcali'nus, L. sep'ticus, Rupto'rium commu'nē, Fixed veg''etable alkali, Hydrate of Potassa,* (F.) *Potasse caustique.* (Prepared by evaporating solution of potass to dryness in an iron vessel.) This preparation is generally run into cylindrical moulds, covered with paper, and kept in well-corked vessels. It is powerfully escharotic, and is used for forming issues, curing strictures, &c.

Potassa, Fused, Potassa fusa—p. Hydriodate of, Potassæ hydriodas — p. Hydrobromate of, see Bromine—p. Hydrocyanate of, Potassii cyanuretum—p. Hyperoxalas, Potass, oxalate of—p. Hypertartras, P. supertartras — p. Impura, Potash of commerce — p. and Iron, tartrate of, Ferrum tartarizatum—p. with Lime, Potassa cum calce—p. Liquida, Liquor potassæ — p. Mephite of, Potassæ subcarbonas—p. Monochromate of, Potassæ chromas—p. Muriate of, Potassæ murias—p. Nitrate of, Potassæ nitras — p. Ope calcis parata et igne fusa, Potassa cum calce — p. Oxymuriate of, Potassæ murias hyperoxygenatus — p. Prussiate of, Potassii ferrocyanuretum — p. and Soda, Tartrate of, Soda, tartrate of — p. Subcarbonate of, Potassæ subcarbonas — p. Sulphate of, Potassæ sulphas — p. Sulphate of, acid, Potassæ supersulphas—p. Sulphuret of, Potassæ sulphuretum—p. Supercarbonate of, Potassæ carbonas—p. Supersulphate of, Potassæ supersulphas — p. Supertartrate of, Potassæ supertartras — p. Tartrate of, Potassæ tartras.

POTASSÆ ACE'TAS, *Acetas kali, Oxytar'tarus, Acetas lixiv'iæ* seu *ka'licum, Al'kali tar'tari ace'to satura'tum, Alcali vegetab'ilē cum acet-; Magiste'rium tartari purgans, Terra folia'ta Tartari, Kali aceta'tum, Sal diuret'icus, Sal Sennert'i, Ac''etate of potass, Arca'num tartari,* (F.) *Acétate de potasse.* (*Acid. acetic.* Oj, *Potassæ carbon,* q. s. Mix and add, by degrees, enough acetic acid to saturate the alkali. Then filter and evaporate till a pellicle is formed, which is to be dried upon bibulous paper; evaporate again in a water-bath, and, removing the pellicles, dry. — Ph. U. S.)

It is cathartic and diuretic. Dose, ℥j to ℥ij, or more.

Potassæ et Aluminæ Sulphas, Alumen — p. Biantimonias, Antimonium diaphoreticum — p. Bicarbonas, Potassæ carbonas.

Potas'sæ Bichro'mas, *Kali chro'micum rubrum* seu *ac''idum* seu *bichro'micum, Bichro'mate of potas'sa.* Procured by adding *sulphuric, nitric,* or *acetic acid* to a solution of the *neutral chromate,* and setting it aside to crystallize. It is a violent irritant poison; and has been used as a caustic in cases of morbid growths, in the proportion of from half a drachm to a drachm of the salt to from an ounce to an ounce and a half of water.

Potassæ Bisulphas, P. supersulphas — p. Bitartras, P. supertartras.

Potassæ Car'bonas, *Kali aëra'tum, Bicar'bonas potassæ, Potas'sæ bicar'bonas* (Ph. U. S.) *Deutocarbonas potassii, Carbonate, bicar'bonate,* or *supercar'bonate of potassa.* This is not caustic, like the subcarbonate of potass, and hence, has been preferred to relieve acidity. (*Potass. carbon.* ℔iv, *Aquæ destillat.* Ox. Pass carbonic acid through the solution until it is saturated, and filter. Evaporate at a heat not exceeding 160°, and dry the crystals on bibulous paper. Carbonic acid is obtained from marble by the addition of dilute sulphuric acid. — Ph. U. S.) Dose, gr. x to ℥ss. It is used in forming the soda powders, as well as for its antacid properties.

Potassæ Carbonas, P. subcarbonas — p. Carbonas impurus, P. subcarbonas — p. Carbonas purus, sec P. subcarbonas—p. Chloras, P. murias hyperoxygenatus—p. Chloruretum oxydatum, P. murias hyperoxygenatus.

Potas'sæ Chromas, *Kali chro'micum flavum* seu *neutra'lē, Neutral yellow Chromate,* or *Monochromate of potassa.* Prepared by igniting a mixture of four parts of native *chromite of iron* (chrome-iron ore) and one part of *nitre;* dissolving out the chromate of potassa by *water,* and crystallizing. It has been used as an emetic, expectorant and diaphoretic. Dose, as an emetic, from two to four grains; as an expectorant, from ⅛th to ½ grain. In the proportion of one drachm to 32 ounces of water, it has been used as an antiseptic wash — called by Jacobson, *Liquor conserva'trix.*

Potassæ Citras, *Citrate of potassa.* (*Acid. citric.* ℥x, *Potass. bicarb.* ℥xiv, *Aq.* q. s. Dissolve the acid in the water; and after effervescence has ceased, strain and evaporate to dryness. The salt is deliquescent, and must be kept in well-stopped bottles. Ph. U. S.) It possesses the refrigerant properties of the neutral salts, and may be given in fever, when to do little or nothing is the most advisable course. Dose, gr. x to ℥ss.

Potassæ et Ferri Tartras, Ferri tartarizatum — p. Hydras, Potassa fusa.

Potassæ Hydri'odas, *Potassæ Protohydri'o-*

*das, Potas'sii protoxi'di hydri'odas, Kali Hydriodin'icum, K. Hydriod'icum, Hydriodas Ka'licus, Hydri'odate of potass,* (F.) *Hydriodate de potasse.* If a solution of potass be poured on iodine, an iodate and hydriodate are formed. These may be separated by means of alcohol, which only dissolves the latter of these salts. The hydriodate, or rather the *Iodide of Potas'sium, Kalium Ioda'tum, Potassii Ioduretum* seu *Io'didum,* (F.) *Iodure de potassium,* may be obtained by evaporation. When the *Iodide of potassium* is dissolved in water, it becomes the *Hydriodate of Potassa.* The following is the formula in the Ph. U. S. *Potass.* ℥vj; *Iodin.* in pulv. ℥xvj; *Carbon. ligni* in pulv. subtiliss. ℥ij; *Aq. bullient.* Oiij. Dissolve the potassa in the water; add the iodine gradually, stirring until the solution becomes colourless, and continue the additions until the liquid remains slightly coloured from excess of iodine. Evaporate to dryness, stirring in the charcoal towards the close. Rub to powder, and heat to dull redness in an iron crucible, keeping up the temperature for 15 minutes. When cool, dissolve out the saline matter with pure water, filter the solution, evaporate and set aside to crystallize. By evaporating and crystallizing as before, an additional quantity of crystals may be obtained. Virtues, — those of iodine.

Potassæ Mu'rias, *Sal Digesti'vus* vel *Sal febrif'ugus Syl'vii, Muriate of Potass, Spir'itus salis mari'ni coagula'tus.* Bitter and refrigerant.

Potassæ Mu'rias Hyperoxygena'tus, *Potassæ Chloras, P. oxymu'rias, Oxymu'riate* or *hyperoxymu'riate of potass, Chlorate of potas'sa, Euchlo'rate of potass, Alcali vegetab'ilē sali'todephlogistica'tum, Chlorure'tum potas'sæ oxyda'tum, Haloï'dum oxygena'tum, Oxyge'no-Chlorure'tum potas'sii, Protochlo'rate of potas'sium, Kali chlo'ricum, Chloras Ka'licus depura'tus,* (F.) *Chlorate de potasse.* It has been regarded as antineuropathic, and as an alterative purifier of the blood and humours. It is of doubtful efficacy. Dose, 3 to 6 grains or more.

Potas'sæ Nitras, *Nitrate of Potass, Nitrum, Sal nitrum, Nitre, Saltpetre, Sal petræ, Salse'do mucrum, Sanguin'ea, Berenic''ium, Halini'trum, Protoni'trate of Potas'sium, Nitrate of protox'ide of Potassium, Kali ni'tricum, Nitras ka'licum, Nitras lixiv'iæ,* (F.) *Nitrate de potasse.* Obtained from the putrefaction of animal matters, in contact with calcareous or alkaline earths, by elixiviation; adding, if necessary, wood-ashes to supply the alkaline basis. It is formed, in an impure state, by nature, in warm climates.

It is diuretic and refrigerant, and, in large doses, purgative; externally, cooling and detergent. Dose, gr. x to ʒss. In large doses it is an acrid poison.

Potassæ Nitras Fusus Sulpha'tis Paucil'lo Mixtus, *Sal prunel'læ, Crystal'lus minera'lis, Nitras potas'sæ cum sul'phurē fusus, Nitrum tabula'tum, Lapis Prunel'læ, Sore-throat salt, Min'eral crystal, Anod'ynum minera'lē.* Nitrate of potass, mixed with a little sulphate of potass and run into moulds. Its properties are those of nitre.

Potassæ Ox'alas, *Superox'alate of Protox'ide of Potas'sium, Ox'alas Acid'ulum Potas'sæ* seu *Potas'sæ acid'ulus* seu *ba'sicus, Superox'alas ka'licum, S. Potassæ, Hyperoxalas Potassæ, Sal Acetosel'læ, Oxa'lium, Kali oxal'icum acid'ulum, Ox'alas subpotas'sicus, Oxalate of Potass, Salt of Sorrel.* Prepared from the juice of wood sorrel. It is refrigerant, and is used to make lemonade, &c.

Potassæ Oxalas Acidulum, Potass, oxalate of—p. Oxymurias, P. murias hyperoxygenatus—p. Protohydriodas, P. hydriodas — p. Puræ fusæ hydras, Potassa fusa — p. et Sodæ tartras, Soda, tartrate of.

Potassæ Subcar'bonas, *P. Car'bonas* (Ph. U. S.), *Subcar'bonas Kali, Car'bonas Potassæ, Kali præpara'tum, Sal Herba'rum, Calca'reous Tartar, Sal Planta'rum, Subcarbonate of Potass, Sal Tar'tari, Sal Absin'thii, Mephite of Potass,* &c. (See Potash.) A filtered solution of the *impure subcarbonate, Potas'sæ car'bonas impu'rus* (Ph. U. S.) *Pearl-ash* (see Potash,) evaporated to dryness. This deliquescent salt is given in the same cases as the potassæ carbonas, than which it is more caustic and disagreeable.

The Parisian codex has a *Subcar'bonas Potas'sæ ex tar'taro combus'to, vulgo Sal Tartari* or *Salt of Tartar* — it is the *Potassæ carbonas purus, Pure Carbonate of Potassa,* Ph. U. S.; a *Subcarbonas Potassæ ex deflagran'tibus simul tar'tratē acid'ulo et Nitrate Potassæ paratus, vulgo Nitrum ex tartaro fixum;* and a *Subcarbonas potassæ ex deflagran'tē cum Carbo'nibus Nitra'tē Potassæ paratus, vulgo Nitrum fixum.* They are all used like the preceding.

Potassæ Subcarbonas Impurus, Potash of commerce.

Potassæ Sulphas, *Kali vitriola'tum, Sulphas Kali, Kali sulphu'ricum, Lixiv'ia vitriola'ta, Nitrum vitriolatum Schroederi, Sal Sapien'tiæ, Sal Tar'tari Sulphura'tum, Specif'icum Paracel'si, Spi'ritus vitrioli coagula'tus Mynsichti, Protosulph'ate of Potas'sium, Al'kali vegeta'bilē vitriolatum, Sal de duobus, Arca'num duplica'tum, Nitrum vitriola'tum, Tar'tarum vitriolatum, Panace'a Ducis Holsa'tiæ, Panace'a duplica'ta, Sal Polychres'tus, Sulphate of Potass,* (F.) *Sulfate de potasse.* (The salt, that remains after the distillation of nitric acid, dissolved; the excess of acid saturated with subcarbonate of potass and crystallized.) Purgative and diuretic. Dose, ʒss to ʒj as a laxative. In a large dose it has proved an irritant poison.

Potassæ Sulphas cum Sul'phurē; *Sal Polychres'tus Glase'ri, Lixiv'ia Vitriola'ta Sulphu'rea.* (Formed by deflagrating nitrate of potass with sublimed sulphur.) Same virtues as the last. Dose, gr. xv to xxx.

Potassæ Sulphure'tum, *Potas'sii Sulphure'tum, P. tersulphure'tum, Kali sulphuretum, Hepar Sulph'uris sali'num, H. sulphu'ris vulga'rē, Sulphure'tum lixiv'iæ, S. ka'licum, Hepar Sulphuris, Liver of Sulphur, Sulphuret of Potass,* (F.) *Sulfure de potasse, Sulfure de potassium sulfaté, Foie de Soufre.* (*Sulphur.* ʒj, *Potassæ carb.* ʒij. Rub them together, and place the mixture in a covered crucible upon the fire until they unite.) It has been employed in affections of the chest, as an expectorant, in the dose of from ʒss to ʒj, largely diluted; but it is chiefly used as a bath or wash in cases of itch, tinea capitis, and other cutaneous affections.

Potassæ Superoxalas, Potassæ oxalas.

Potassæ Supersul'phas, *P. Bisulphas, Sal enix'um, Supersulphate of Potass, Sal febrif'ugus of Lem'ery, Acid Sulphate of Potass, Bisulphate of Potass, Super-protosulphate of Potas'sium,* (F.) *Bisulfate, de Potasse.* (The salt remaining after the distillation of nitric acid, dissolved, strained, and crystallized.) It is refrigerant and purgative. Dose, ʒss to ʒij.

Potassæ Supertar'tras Impu'rus, *Tar'tarus crudus, Tar'tarum, Lapis vini, Magneti'nus, Pedagra, Tartar,* (F.) *Tartre cru, T. brut.* It is called, also, *Tartarum rubrum* and *Red Argol,* when obtained from red wines; *Tartarum album* or *White Argol,* when from white wines. Tartar is the saline deposit from wines as they become aged; which attaches itself to the sides of the casks and bottles in which they are kept. It

consists of a considerable quantity of acidulous tartrate of potass, tartrate of lime, silica, alumen, oxyd of iron, manganese, and a red colouring matter, if the wine be red. It is chiefly used for the preparation of cream of tartar.

Potassæ Supertar'tras, *Crystal'li Tar'tari, Tartras Acid'ulus Potassæ purus, Supertar'trate of Protox'ide of Potas'sium, Potas'sæ Bitar'tras* (Ph. U. S.), *P. tartras ac''ida, Bitartrate* or *Supertartrate of Potass, Hypertartras Potassæ, Tartras superpotas'sicus, T. subpotas'sicus, Crystals of Tartar, Cremor Tar'tari, Cream of Tartar* (when in powder,) *Supertar'trate of Potass,* (F.) *Tartrate acide de potasse, Crème de Tartre.* (The tartar of wine purified.) It requires 120 parts of water at 60° to dissolve it. It is mildly purgative, refrigerant and diuretic. Dissolved in water, with a small quantity of white wine, some sugar and lemon-peel, it forms an agreeable beverage in febrile diseases, under the name of *imperial.* Dose, as a diuretic, ℥j to ℥ij; as a purgative, ℥ss to ℥j.

Potassæ Tartras, *Kali tartariza'tum, Al'cali fixum tartarisatum, Tar'tarum solu'bilē, Tartarus tartariza'tus, Lixiv'ia Tartarisa'ta, Sal Panchres'tum, Tartras Kalinus, T. lixiv'iæ, Sal vegetab'ilis, Alkali vegetab'ilē tartarizatum, Tartrate of Potass, Soluble Tartar,* (F.) *Tartrate de Potasse.* (*Potassæ carbon.* ℥xvj; *Potassæ Bitartrat.* in pulv. subtiliss. ℔iij, vel q. s., *aquæ bullientis,* cong. Dissolve the carbonate of potassa in the water, add the bitartrate to saturation, and boil; filter, evaporate till a pellicle forms, and set aside to crystallize. Pour off the liquid; dry the crystals on bibulous paper, and keep in closely-stopped bottles. — Ph. U. S.) A saline cathartic in the dose of ℥ij to ℥j.

Potassæ Tartras Acida, P. supertartras—p. Tartras acidulus purus, P. supertartras — p. Tartras stibialis seu stibiosus, Antimonium tartarizatum.

*POTASSE, ACETATE DE,* Potassæ acetas — *p. Bisulphate de,* Potassæ supersulphas — *p. Caustique,* Potassa fusa — *p. à la Chaux,* Potassa cum calce — *p. Chlorate de,* Potassæ murias hyperoxygenatus — *p. Hydriodate de,* Potassæ hydriodas — *p. Liquide,* Liquor potassæ — *p. Nitrate de,* Potassæ nitras — *p. Préparée avec la chaux,* Potassa cum calce — *p. et de Soude, tartrate de,* Soda, tartrate of — *p. Sulfate de,* Potassæ sulphas, *p. Sulfure de,* Potassæ sulphuretum — *p. Tartrate de,* Potassæ tartras — *p. Tartrate, acide de,* Potassæ supertartras.

Potas'sii Bro'midum, *Potas'sæ hydrobro'mas,* (F.) *Bromure de Potassium, Bromide of potassium.* (*Bromin,* ℥ij; *Ferri fili,* ℥j; *Potass. carbon.* ℥ij and ℥j, vel q. s.; *Aq. destillat.,* Oiv. Add the iron filings and bromine to a pint and a half of the water; stirring for half an hour. Apply a gentle heat, and when the liquor assumes a greenish colour, add gradually the carbonate of potassa, dissolved in Oiss of the water, until it ceases to cause a precipitate. Continue the heat for half an hour, and filter. Wash the precipitate with the remaining water, boiling hot, and filter. Mix the liquors and crystallize by evaporation. Ph. U. S.) Virtues: — those of iodide of iron.

Potassii Cyanidum, P. Cyanuretum.

Potas'sii Cyanure'tum, *P. Cyan'idum, Cyanuret of Potassium, Hydrocy'anate of Potassa,* (*Potassii Ferrocyanur.,* in pulv. ℥viij; *Potass. Carbonat.,* ex siccat., ℥iij. Mix intimately and throw into a deep iron crucible, heated to redness; keep up the heat till effervescence ceases, and the fused mass concretes, of a pure white colour, upon a warm glass rod dipped into it; then pour out the liquid carefully into a shallow dish, to solidify, stopping before the salt becomes contaminated with the precipitated iron. Break up the mass whilst warm, and preserve in well-stopped bottles. Ph. U. S.) Used in the same cases as the hydrocyanic acid. Dose, a quarter of a grain.

Potassii Deuto-carbonas, Potassæ carbonas.

Potassii Ferrocyanure'tum, *P. Ferrocyan'idum, Ferrocy'anide* or *Ferrocyan'uret of Potassium, Ferrocy'anate of Potassa, Ferroprussiate of Potassa, Prussiate of Potassa,* (F.) *Protocyanure jaune de fer et de potassium, Cyanure de fer et de potassium.* The yellow double cyanuret of potassium and iron, the salt from which the cyanuret of potassium is obtained by calcination. It is not much used in medicine. It has been advised as an astringent in the colliquative sweats of phthisis, in leucorrhœa, &c.; but it does not seem to be possessed of much activity. Dose, 10 or 15 grains every four or five hours.

Potassii Hydrargyro-iodidum, *Potassæ Iodohydrar'gyras, Hydrargyrum biiodatum cum kalio iodato, Kalium iodatum hydrargyratum, Iodhydrar'gyrate of Potassium, Hydrargyro-iodide of Potassium.* This salt is made by the combination of *iodide of potassium* with *red iodide of mercury.* Its properties are similar to those of the iodides of mercury, but in a less degree.

Potassii Iodidum, Potassæ hydriodas — p. Iduretum, Potassæ hydriodas — p. Oxygeno-chloruretum, Potassæ murias hyperoxygenatus — p. Protoxidi hydriodas, Potassæ hydriodas—p. Sulphuretum, Potassæ sulphuretum — p. Tersulphuretum, Potassæ sulphuretum.

POTASSIUM. Same etymon as potash. The metallic base of potassa.

Powder, Vien'na, is composed of equal parts of quicklime and potassa cum calce. In using it, it is made into a paste—*Vienna paste*, (F.) *Caustique de Vienne*—with spirits of wine, and is applied on the diseased part, previously circumscribed by a hole cut in a sticking plaster.

To be left on from 10 to 20 minutes, according to the depth of the eschar required. Used in cases of lupous ulceration.

By fusing the potass and lime, and raising the heat so as to cause ebullition, the caustic may be run into cylinders:—when it is called *Caustique-Filhos, Caus'ticum Viennen'sē fusum Filhos*, from the name of the author of the process.

Powders, Castillon, so called from the name of the physician who first proposed them. They are formed of *sago*, in powder; *salep*, in powder; *tragacanth*, in powder, each, four parts; *prepared oyster-shells*, one part, *cochineal*, half a part, divided into powders of one drachm each; one of which is given three or four times a day as a demulcent in diarrhœa and dysentery.

Powders, Soda, *Pul'veres effervescen'tes*, (F.) *Poudres gazifères simples*. (*Sodæ carb.* ℥ss, in each *blue* paper; *tartaric acid*, gr. xxv in each *white* paper; for half a pint of water.) A pleasant, cooling drink; taken during the effervescence.

*Seidlitz Powders*, (F.) *Poudres gazifères laxatives* ou *Poudres de Seidlitz*, contain one or two drachms of tartrate of potassa and soda, added to the alkali in the blue paper.

POWER, Faculty—p. Inherent, Irritability—p. Tonic, Irritability.

POZZUOLI, MINERAL WATERS OF. Pozzuoli is in the neighbourhood of Naples. The springs are, 1. *Acqua della pietra*, Temp. 91° Fah. 2. *Acqua di Cavalcanti*, Temp. 100°. *A. di subveni homini*, Temp. 102°; *A. del cantarello*, Temp. 86 to 89°; and that of the Temple of Serapis in Pozzuoli, Temp. 102 to 107°. The last contains carbonic acid, carbonates of lime, magnesia, alumina, and iron, carbonate of soda, chloride of sodium, sulphate of lime, and silica.

PRACTICE OF PHYSIC, Therapeutics.

PRACTITIONER, GENERAL, Surgeon apothecary—p. Irregular, see Irregular—p. Regular, see Regular—p. Routine, Routinist.

PRÆBIUM, Dose.

PRÆCAUTIO, Prophylaxis.

PRÆCIPITANS MAGNUM, Sepia.

PRÆCIPITATUM ALBUM, Hydrargyrum præcipitatum.

PRÆCIPITATUS RUBER, Hydrargyri nitrico-oxydum.

PRÆCISIO PRÆPUTII, Circumcision.

PRÆCOCIA, Prunus Armeniaca.

PRÆCOCITY, Præotia.

PRÆCOGNITIO, Prognosis.

PRÆCORD'IA, from *præ*, 'before,' and *cor*, 'the heart.' The diaphragm; also, the thoracic viscera, and the epigastrium.

Præcor'dial or Precordial Region, *Re'gio præcordiaca* seu *præcordia'lis*, is the epigastric region. Also, and more properly, the region of the heart. A line drawn from the inferior margins of the third ribs across the sternum, passes over the valves of the pulmonary artery a little to the left of the mesial line, and those of the aorta are behind them, but about half an inch lower down. A vertical line, coinciding with the

left margin of the sternum, has about one-third of the heart, comprising the upper portion of the right ventricle, on the right, — and two-thirds, comprising the lower portion of the right ventricle and the whole of the left, on the left. This is the præcordial region.

PRÆCORDIUM, *Fossette du cœur* — p. Pedis, Metatarsus.

PRÆCOX MATURITAS, Præotia.

PRÆCUSTODIA, Prophylaxis.

PRÆDICTIO, Prognosis.

PRÆDISPOSITIO, Predisposition.

PRÆDIVINATIO, Mantia.

PRÆDOMIN'IUM; from *præ*, 'before,' and *dominus*, 'a lord.' Predominance of one thing over another.

Prædomin'ium Aquæ. A predominance of watery fluid,— *Tenu'itas aquo'sa.*

Prædominium San'guinis Arterio'si. A predominance of arterial blood, *Arterios'itas san'guinis.*

Prædomin'ium San'guinis Veno'si, *Venos'itas San'guinis.* Predominance of venous blood.

PRÆFOCATIO, Orthopnœa, Suffocation — p. Faucium, Angone—p. Matricis, Angone—p. Uterina, Angone.

PRÆFOCATION, Strangulatio uterina.

PRÆGNANS, Pregnant.

PRÆGNAS. Pregnant.

PRÆGNATIO, Fecundation, Pregnancy.

PRÆGNATUS, Fecundation, Pregnancy.

PRÆGNAX, Pregnant.

PRÆGUSTATIO, *Avant-gout.*

PRÆHENSIO, Prehensio.

PRÆLIN'GUA. The anterior part or tip of the tongue.

PRÆLIUM, Coition, Press, Tourniquet — p. Arteriale, Tourniquet.

PRÆLUMBARIS, Prelumbar.

PRÆNOTIO, Prognosis.

PRÆNUNTIATIO, Prognosis.

PRÆPARATIO, Preparation—p. Chyli, Chylification.

PRÆPARATUM, Preparation.

PRÆPOTEN'TIA, from *præ*, 'before,' and *potens*, 'powerful.' Great power or strength.

Præpoten'tia Viri'lis. Great, or too great procreative power on the part of the male.

PRÆPOTIO, Propotismos.

PRÆPUTIALIS, Preputial.

PRÆPUTIUM, Prepuce.

PRÆSAGIUM, Mantia.

PRÆSCIENTIA, Prognosis.

PRÆSCITIO, Prognosis.

PRÆSCRIPTIO, Prescription.

PRÆSEPIOLUM, Alveolus.

PRÆSEPIUM, Alveolus.

PRÆSERVATIO, Prophylaxis.

PRÆSERVATIVUM, Amuletum.

PRÆSERVATO'RIA INDICA'TIO. A preservative indication; one proper for preventing the development of disease.

PRÆSERVATORIUS, Prophylactic.

PRÆSPINALIS, Prespinal.

PRÆTIBIALIS, Pretibial.

PRAIRIE BUSH, STINKING, Ptelea trifoliata—p. Pines, Liatris.

PRASINUM VIRIDE, Cupri subacetas.

PRASINUS, Porraceous.

PRASI'TES, from *prasium*, 'horehound.' Wine in which the leaves of horehound have been infused.

PRASIUM, Marrubium.

PRASUM, Allium Prasum.

PRAXIS, Action.

Praxis Med'ica. The practical exercise of the healing art.

PRECIPITATE, RED, Hydrargyri nitrico-oxydum — p. White, Hydrargyrum præcipitatum.

PRECIPITA'TION, *Præcipita'tio*, (F.) *Précipité*, from *præcipitare*, (*præ*, 'before,' and *caput*, 'the head,') 'to throw *headlong*.' The action by which a body abandons a liquid in which it is dissolved, and becomes deposited at the bottom of the vessel. The matter, so thrown down or precipitated, is called a *precipitate*.

*PRÉCIPITATION DE LA MATRICE*, Procidentia uteri.

*PRÉCIPITÉ BLANC*, Hydrargyrum præcipitatum.

PRECORDIAL, Præcordial.

PRECUR'SORY, *Præcurso'rius*; from *præ*, 'before,' and *curro*, *cursum*, 'I run.' That which precedes.

Precur'sory or Premon'itory Signs or Symptoms, (F.) *Signes précurseurs, S. avant coureurs*, are those which indicate an approaching disease.

PREDISPONENT CAUSES, see Causes, predisponent.

PREDISPOSIT''ION, *Prædisposit''io, Semin'ia morbo'rum* (Gaubius); from *præ*, 'before,' and *disponere*, 'to dispose.' (F.) *Imminence morbide.* That constitution or condition of the body, which disposes it to the action of disease under the application of an exciting cause. Thus, in hereditary diseases, the conformation is such, that but a slight exciting cause may be required to produce them. When the disease arises solely from the predisposition, or under the additional influence of an extremely slight exciting cause, it is, by some, termed a *disposition.*

PREDOR'SAL, *Prædorsa'lis*, from *præ*, 'before,' and *dorsum*, 'the back.'

Prædorsal Region of the vertebral column is the anterior surface of the dorsal region.

*PRÉ-DORSO-ATLOÏDIEN*, Longus colli.

*PRÉ-DORSO-CERVICAL*, Longus colli.

PREG'NANCY, *Prægna'tio, Prægna'tus, Imprægna'tio, Ingravida'tio, Ingravida'tion*, from *præ*, 'before,' and *genere*, 'to beget.' *Hysterocye'sis, Gravid'itas, G. uteri'na, En'cymon, Cye'sis, Encye'sis, En'cysis, Encymo'sia, Cyopho'ria, Gesta'tion, Fœta'tion, Utero-gesta'tion;* (F.) *Grossesse.* The state of a female who has within her a fecundated germ, which gradually becomes developed in or out of the uterus. When placed in the cavity of the uterus,—by virtue of the vital principle which animates it, it becomes attached to the inner surface of that viscus, and obtains from it indirectly the nutriment necessary for its gradual development, during the space of ten lunar months or two hundred and eighty days — the ordinary *term* or *duration* of *gestation*, although the period may be protracted to 300 days or upwards, — at the expiration of which parturition occurs. Pregnancy is commonly limited to a single fœtus: at times, the uterus contains two or three.—See Reproduction. Occasionally, one or two moles—the degenerated products of conception—alone occupy the uterus:—at other times, a fœtus likewise exists. In certain cases, and owing to accidental circumstances, the fecundated ovum remains in the ovarium, or is arrested in the Fallopian tube. Pregnancy has, accordingly, been distinguished into, 1. *Natural* or *uterine*, when the fœtus is carried in the cavity of the womb: and, 2. *Preternatural* or *extra-uterine, Exfœta'tion, Concep'tio vitio'sa, Paracye'sis* seu *Eccye'sis, Ecthysterocye'sis, Echthysterocye'sis, Dysto'cia, Dyscye'sis* seu *Gravid'itas extra-uteri'na*, (F.) *Grossesse-contre-nature*,—when it occurs in the ovarium, tube, or cavity of the abdomen.

During pregnancy, the female experiences remarkable changes in the condition of her organs

and functions. The genital apparatus is, of course, most affected. The uterus changes its shape, situation, size, and texture. The usual signs of pregnancy are,—suppression of the catamenia; the abdomen gradually enlarging and forming a hard tumour; the umbilicus prominent in the latter months; the breasts increasing in size; the areola round the nipple becoming darker and the follicles more developed; kyestein in the urine from an early period; a bluish tint of the vagina after the fourth week; about the fifth month, the evidence by *ballottement*, and the placental *souffle* and sound of the fœtal heart heard on auscultation; the motion of the fœtus perceptible, and the neck of the uterus diminishing in length at the advanced periods.

Pregnancy, Abdom'inal, *Eccye'sis abdomina'lis, Cœliocye'sis, Gravid'itas abdomina'lis*, (F.) *Grossesse abdominale*. That in which the ovum has escaped into the cavity of the abdomen.

Pregnancy, Afœ'tal, *Pregnancy without a fœtus*, (F.) *Grossesse afœtale, G. sans fœtus*. Pregnancy produced by a false or degenerate conception, or any other affection, which has given place to unusual development of the uterus. Madame Boivin includes in this class, *sarco-hysteric, hydro-hysteric, gazo-hysteric*, and *hemato-hysteric pregnancies*.

Pregnancy, Bigem'inal, (F.) *Grossesse bigéminale, Double pregnancy*. Pregnancy in which there are twins in utero.—Madame Boivin.

Pregnancy, Complex, (F.) *Grossesse complexe, G. inter-extra utérine*, is when the womb, besides a fœtus, contains much water, hydatids, a mole, &c.

Pregnancy, Compound, *Polybreph'ia, Polycye'sia. Polycye'sis*, (F.) *Grossesse composée*, is when there are two or three fœtuses in the cavity of the uterus.

Pregnancy, Double, Pregnancy, bigeminal—p. Duration of, see Pregnancy—p. Extra-uterine, see Pregnancy.

Preg'nancy, False, *Gravid'itas spuria*, (F.) *Grossesse fausse* ou *apparente, Pseudocye'sis*. Authors have called thus different affections of a more or less serious character, which resemble pregnancy; so as, at times, to impose upon the best-informed practitioners. These diseases may be seated in the uterus or its dependencies, in the intestines or some other part of the abdomen. They may be;—a mole, hydatids, water, blood, or polypus distending the parietes of the uterus; —chronic enlargement of the uterus; development of tumours, &c., in its substance;—scirrhus; dropsy of the ovaria; ascites; tympanites, &c.

Pregnancy, Fœtal, (F.) *Grossesse fœtale*. Pregnancy in which there is a fœtus, or more than one, in the uterus or out of it. Madame Boivin puts in this class—the *solitary, bigeminal, trigeminal*, and *sarco-fœtal* pregnancies, which form the first order; and the *tubal, ovarial*, and *abdominal*, which constitute the second.

Pregnancy, Gazo-hyster'ic, (F.) *Grossesse Gazo-hystérique*. Afœtal pregnancy, caused by development of air or gas in the cavity of the womb.—Madame Boivin.

Pregnancy, Hæmato-hysteric, (F.) *Grossesse hémato-hystérique*. Afœtal pregnancy, caused by accumulation of blood in the uterus.—Madame Boivin.

Pregnancy, Hydro-hysteric, (F.) *Grossesse hydro-hystérique*. Afœtal pregnancy, occasioned by the secretion and accumulation of serous fluid in the uterus.

Pregnancy, Interstit''ial, *Gravid'itas in uteri substan'tiâ, Gravid'itas interstitia'lis*. The development of the embryo in the proper substance of the uterus. The case generally terminates fatally at an early period of gestation; the thin external paries of the uterus being ruptured, and the ovum passing into the abdominal cavity.

Pregnancy, Morbid, *Paracye'sis, Dysto'cia, Dyscye'sis*. The progress of pregnancy disturbed or endangered by the supervention of general or local disorder.— Good.

Pregnancy, Ova'rian, (F.) *Grossesse ovarienne* ou *de l'ovaire, Eccye'sis ova'ria, Oüriocye'sis, Oöcye'sis, Gravid'itas extra-uteri'na in ova'rio*. Pregnancy in which the fœtus is developed in the interior of the ovary.

Pregnancy, Plea of. A plea, which a woman, capitally convicted, may set up in arrest of execution until she is delivered. See Jury of Matrons, and De ventre inspiciendo.

Pregnancy, Pretend'ed. The criminal act of a female, who, not having been delivered, presents an infant as having been born of her. (F.) *Supposition de part*. (This term, in French, likewise includes the case of a female, who, having been delivered of a dead child, substitutes for it a living child which is not hers.)

Pregnancy, Sarco-fœtal, (F.) *Grossesse sarco-fœtale*. Pregnancy in which there are one or more fœtuses, and one or more moles.—Madame Boivin.

Pregnancy, Sarco-Hysteric, (F.) *Grossesse sarco-hystérique*. Afœtal pregnancy formed by moles, hydatids, or a false conception.—Madame Boivin.

Pregnancy, Sol'itary, (F.) *Grossesse solitaire* ou *simple*. Pregnancy in which there is a single fœtus.—Madame Boivin.

Pregnancy, Trigem'inal, (F.) *Grossesse trigéminale* ou *triple*. Pregnancy in which there are three fœtuses in the cavity of the uterus.—Madame Boivin.

Pregnancy, Tubal, (F.) *Grossesse tubaire, Eccye'sis tuba'lis*. Pregnancy where the fœtus remains and is developed in the Fallopian tube.

Pregnancy, Uterine, see Pregnancy.

Pregnancy, Utero-abdom'inal, (F.) *Grossesse utéro-abdominale*. Pregnancy consisting of two fœtuses; one in the uterus—the other in the abdominal cavity.—Madame Boivin.

Pregnancy, Utero-ova'rial, (F.) *Grossesse utéro-ovarienne*. Pregnancy with two fœtuses, one in the womb, the other in the ovary.

Pregnancy, Utero-tubal, (F.) *Grossesse utéro-tubaire*. Pregnancy in which there is at the same time a fœtus in the womb and another in the Fallopian tube.

PREGNANT, *Prægnans, Prægnas, Prægnax, Encar'pos, Grav'ida, Plena mu'lier, Inciuc'ta, Gravid, Breeding*, (F.) *Enceinte*. One in a state of pregnancy;—one with child.

PREHENSIO, Catalepsy, Epilepsy.

PREHEN'SION, *Prehen'sio*, from *prehendere*, 'to lay hold of.'

Prehension of Food is the act of carrying it to the mouth, and introducing it into that cavity. It is, also, called *Assump'tio, Proslep'sis, Pros'phora*.

*PRÊLE*, Hippuris vulgaris.

*PRÉLOMBAIRE*, Prelumbar.

*PRÉLOMBO-PUBIEN*, Psoas parvus — *p. Trochantin*, Psoas magnus.

PRELUM, Press — p. Arteriale, Tourniquet.

PRELUM'BAR, *Prælumba'ris*, (F.) *Prélombaire*, from *præ*, 'before,' and *lumbi*, 'the loins.' That which is placed before the loins. The prelumbar surface of the spinal column is the anterior surface of the lumbar portion.

PREMONITORY, see Precursory.

PRENAN'THES, *Gall of the Earth, Dewin Snakeroot, Lion's Foot*. There are many species

of this indigenous plant, whose root and milky juice are very bitter. They are used in popular practice in dysentery; and in the form of cataplasm to bites of serpents.

PRENANTHES SERPENTARIA, Nabalus albus.

*PRENDRE INSCRIPTION*, see Matriculate.

PREPARA'TION, *Præpara'tio*, from *præ*, 'before,' and *parare*, *paratum*, 'to get ready.' The act of making ready any substance whatever that has to be employed for any purpose.

Also, the product of any pharmaceutical operation;—*Præpara'tum*.

Any part of the human body, preserved for the uses of the anatomist, is so called.

PREP'UCE, *Præpu'tium*, perhaps from προς, and ποσθη, 'the foreskin.' *Epago'gium*, *Posthē*, *Pella*, *Pos'thium*, *Pu'tium*, *Foreskin*. The prolongation of the integuments of the penis, which covers the glans. The prepuce is composed of two membranous layers: one external or cutaneous; the other internal or mucous, separated by areolar membrane. The mucous membrane lines the inner surface of the cutaneous layer till beyond the glans, when it is reflected over the latter; forming, behind the corona, a small *culde-sac* above the corpora cavernosa, which is interrupted by a triangular duplicature of the mucous membrane, called the *frænum*, fixed in the furrow at the inferior part of the glans, and terminating at a little distance from the orifice of the urethra. The clitoris is covered by a semilunar fold formed by a continuation of the skin of the labia. It is called *Præpu'tium clitor'idis*.

PREPU'TIAL, *Præputia'lis*; same etymon. Belonging or relating to the prepuce;—as the 'preputial secretion,'—or that which takes place from the lining of the prepuce covering the glans.

PRESBYODOCHIUM, Gerocomium.

PRESBYON'OSI; from πρεσβυς, 'old,' and νοσος, 'disease.' Diseases of old age.

PRESBYOPIA, Presbytia.

PRESBYSPHACELUS, Gangrene of old people.

PRESBYT'IA, *Presbyo'pia*, *Amblyo'pia proximo'rum*, *Visus seni'lis*, *Pres'byopy*, (F.) *Vue longue*; from πρεσβυς, 'an old person.' A very high degree is termed *Hyperpresbyt'ia*. A condition of vision, common in old persons, which consists in the circumstance of near objects being confusedly seen, whilst those at a greater distance are clearly distinguished. It is supposed to depend generally on diminution of the convexity of the cornea; whence results an alteration in the convergency of the rays, so that they form a focus behind the retina. This defect is remedied by the use of convex glasses, which augment the convergence of the luminous rays. It is, also, called *Long-sightedness*, *Parop'sis longin'qua*, *Dyso'pia proximo'rum*.

PRESCRIP'TION, *Præscrip'tio*, *Anag'raphē*, from *præ*, 'before,' and *scribere*, 'to write.' *For'mula med'ica*, *Præscrip'tio med'ica*, *Recep'tum*, (F.) *Formule*, *Ordonnance*. The formula which the physician writes for the composition of medicine adapted to any case of disease. A prescription should be as simple as possible, and should bear upon its face the evidence of the objects to be fulfilled by it. No article should form part of it, unless adapted for serving some useful purpose. A compound prescription has been divided into four parts:—the *basis* or principal ingredient of the prescription; the *ad'juvans*, or that which is designed to promote the action of the former; the *cor'rigens*, or that intended to correct its operation, or obviate any unpleasant symptom which it may be apt to produce; and the *constit'uens*, *excip'ient*, or substance which gives to the other ingredients consistence or form. All these are seen in the following formula for cathartic pills:

| | |
|---|---|
| Aloes.....3j | .....*Basis.* |
| Hyd. Chlorid. mit. gr. x | .....*Adjuvans.* |
| Olei Carui .....gtt. v | .....*Corrigens.* |
| Syrupi.....q. s. | .....*Constituens.* |

M. et fiant. Pilulæ xx. See Symbol.

It is obvious, however, that most prescriptions are more simple than this. The basis, for example, may require neither adjuvant, corrigent, nor constituent.

Dr. Paris has given the following synopsis of the principles of medicinal combination, *Iamatotaxiolog''ia*, *Iamatosyntaxiolog''ia*, which may serve as an instructive guide to the prescriber:—

### OBJECT I.

TO PROMOTE THE ACTION OF THE BASIS.

*A.* By combining the several different forms or preparations of the *same substance*. *B.* By combining the basis with substances which are of the same nature; i. e., which are individually capable of producing the same effects, with less energy than when in combination with each other. *C.* By combining the basis with substances of a *different nature*, and which do not exert any chemical influence upon it, but are found by experience, or inferred by analogy, to be capable of rendering the stomach or system more susceptible of its action.

### OBJECT II.

TO CORRECT THE OPERATION OF THE BASIS BY OBVIATING ANY UNPLEASANT EFFECTS IT MIGHT BE LIKELY TO OCCASION, AND WHICH WOULD PERVERT ITS INTENDED ACTION, AND DEFEAT THE OBJECT OF ITS EXHIBITION.

*A.* By *chymically* neutralizing or *mechanically* separating the offending ingredient. *B.* By adding some substance calculated to guard the stomach or system against its deleterious effects.

### OBJECT III.

TO OBTAIN THE JOINT OPERATION OF TWO OR MORE MEDICINES.

*A.* By uniting those medicines which are calculated to produce the *same ultimate* results, but by modes of operation totally different. *B.* By combining medicines which have entirely different powers; and which are required to obviate different symptoms, or to answer different indications.

### OBJECT IV.

TO OBTAIN A NEW AND ACTIVE REMEDY, NOT AFFORDED BY ANY SINGLE SUBSTANCE.

*A.* By combining medicines which excite different actions in the stomach and system, in consequence of which *new* or *modified results* are produced. *B.* By combining substances which have the property of acting *chymically* upon each other; the results of which are:—*a.* The formation of new compounds; *b.* The decomposition of the original ingredients, and the development of the more active elements. *C.* By combining substances, between which no other change is induced than a diminution or increase in the *solubility* of the principles in which their medicinal virtues reside. *a.* By the intervention of substances that act *chymically*. *b.* By the addition of ingredients whose operation is entirely *mechanical*.

### OBJECT V.

TO AFFORD AN ELIGIBLE FORM.

*a.* By which the *efficacy* of the remedy is enhanced. *b.* By which its *aspect* or *flavour* is

rendered more agreeable, or its mode of administration more convenient. c. By which it is *preserved* from the spontaneous decomposition to which it is liable.

[The vocabulary in the author's "Medical Student," Philad. 1844, will aid the student, not only in translating, but in writing his prescriptions *more solito*.]

PRESENTA'TION, from (Lat.) *præsens*, (*præ*, 'before,' and *ens*, 'being.') The part of a fœtus which is felt *presenting*, on examination *per vaginam*. When the head presents, and especially the vertex, or the feet, knees, or breech, the presentation is said to be *natural:* when any other part, *preternatural*, and the labour is styled *perverse* or *preternatural*, *Parodyn'ia perver'sa*, *Dysto'cia perver'sa*, *Cross-birth*, (F.) *Accouchement contre nature*. When any part besides the head, feet, knees, or breech presents, the operation of *turning* becomes necessary. See Parturition.

PRESIS, Swelling.

*PRÈSLE*, Hippuris vulgaris.

PRESMA, Swelling.

PRESPI'NAL, *Præspina'lis*, from *præ*, 'before,' and *spina*, 'the spine.' That which is situate before the spine. The prespinal surface of the vertebral column is the anterior surface.

PRESS, *Præ'lium*, *Præ'lium*, *Presso'rium*, *Pi-ëster*, *Pieste'rion*, (F.) *Pressoir*, *Pressc*. An instrument for subjecting matters to considerable pressure, for the purpose of separating the liquid from the solid portion.

Press of Herophilus, Torcular Herophili.

*PRESSE-ARTÈRE*. An instrument invented by Deschamps for the immediate compression of arteries. It is composed of a plate six or seven lines long, and three broad, and of a rod or stem two inches long, placed perpendicularly above the plate and riveted. At each extremity of the plate is a hole, through which each of the ends of the ligature, to be placed upon the artery, is passed. The ligature is then to be tightened by drawing the ends, and fixing them to the perpendicular rod. This *presse-artère* or *serre-artère*, surrounded with charpie, remains in the wound, until there is no longer danger of hemorrhage. The ligature is then cut, and the instrument withdrawn. It is an unnecessary instrument.

*PRESSE-URÈTHRE*, *Jugum Penis*. A kind of forceps of elastic iron, the branches of which, padded, may be approximated or separated by means of a screw. The penis is introduced between the branches, one of them being applied to the urethra, and the screw is tightened so as to exercise a degree of pressure sufficient to bring the parietes of the canal in contact. This instrument is sometimes used in incontinence of urine, to prevent the constant discharge of that fluid.

PRESSIO, Pressure.

*PRESSION ABDOMINALE*, Pressure, abdominal.

*PRESSOIR*, Press—*p. d'Hérophile*, Torcular Herophili.

PRESSORIUM, Press.

PRESSURE, *Pres'sio*, from *premo*, *pressum*, 'I press.' The action of pressing.

Pressure, Abdom'inal, (F.) *Pression abdominale*. A mode of examination by means of which the sensibility, size, suppleness, or hardness of any morbid abdominal viscus may be compared, in these respects, with its healthy condition. Bichat proposed, with the view of exploring the state of the thoracic organs, to exert a pressure from below upwards on the abdominal organs, so as to crowd them upon the diaphragm, and thus to diminish the dimensions of the cavity of the chest, noticing to what extent respiration was affected by this action. No great information can of course be derived from it.

PRETENDED DISEASES, Feigned diseases.

PRETIB'IAL, *Prætibia'lis*, from *præ*, 'before,' and *tibia*, 'the tibia.' That which is situate before the tibia; as the *ilio-pretibial* and *ischio-pretibial* muscles.

PREVEN'TIVE, ROYAL, from *prævenire*, (*præ*, and *venire*,) 'to come before.' An empirical preparation, used as a prophylactic against the venereal virus. It is a solution of *acetate of lead*,—the Liquor Plumbi Subacetatis dilutus.

PREVERTEBRAL APONEURO'SIS. The aponeurosis which covers the muscles of the prevertebral region.

Prevertebral Artery. A ramus of the meningeal branch, and sometimes even of the trunk, of the pharyngeal artery, which is distributed to the prevertebral region.

Prevertebral Muscles, see Cervical region, anterior — p. Region, Cervical region, anterior.

PRIAPEIA, Nicotiana rustica.

PRIAPIS'COS. Same etymon as the next. Name of a piece of wood which forms part of the *scamnum Hippocraticum*. Paulus of Ægina calls thus a tent of linen shaped like a penis.

PRIAPIS'MUS, *Tenti'go*, *T. Penis*, *Pri'apism*, *Horn-colic* (vulg.), *Enta'sia Priapis'mus*, *Rhopalis'mus*, *Satyri'asis*, *Styma*, *Stysis*, from Πριαπος, Priapus, 'the male organ.' Constant and distressing erection, without any voluptuous idea or desire for venery. It is often symptomatic; and sometimes the immediate result of morbific causes, —of the action of cantharides, for example. The application of cold liquids to the penis, and the internal use of opium and camphor, are the means usually had recourse to for its removal.

PRIAPITIS, Phallitis.

PRIA'PUS, *Mutun'nus*. In ancient mythology the deity who presided over gardens and the parts of generation, so called *propter deformitatem et membri virilis magnitudinem*.

Priapus, Penis—p. Cervi, see Cervus—p. Ceti, Leviathian penis.

PRICKING, Sax. ppiccian, (D.) pricken, (F.) *Picotement*. A variety of pain, compared to that which pointed bodies would occasion.

PRIDE OF CHINA, Melia azedarach — p. of India, Melia azedarach — p. Tree, Melia azedarach.

PRIEST-PHYSICIANS, see Asclepiadæ.

PRIEST'S PINTLE, Arum maculatum.

PRIMA CELLA COLI, Cæcum.

PRIMÆ VIÆ. The *first passages*. The stomach and intestinal canal: — the lacteals being the *secun'dæ vi'æ* or *second passages*. See Ways, digestive.

PRIMARY CELL, see Cell.

*PRIMEVÈRE*, Primula veris.

PRIMIP'ARA, *Primipartu'riens*, from *primus*, 'first,' and *parere*, 'to bring forth.' A name given to a female who brings forth for the first time.

PRIMIPARTURIENS, Primipara.

PRIMI-STERNAL, *Primi-sterna'lis*, from *primus*, 'the first,' and *sternum*, 'the sternum.' M. Béclard has called *os primi-sternal* or *clavi-sternal*, the bony portion of the sternum.

PRIMIT''IÆ. The *first waters*, or *the waters* discharged before the extrusion of the fœtus.

PRIMITIVE BAND, see Nerve fibres — p. Streak, Groove, primitive.

PRIMORDIAL CELL, see Cell.

PRIMORDIUM, Arche.

PRIMROSE, EVENING, Œnothera biennis — p. Tree, Œnothera biennis.

PRIMULA OFFICINALIS, P. veris—p. Variabilis, P. veris.

PRIM'ULA VERIS, *P. officina'lis* seu *variab'ilis*, from *prim'ulus*, 'the beginning.' So called, because it flowers in the beginning of the spring. *Verbas'culum, Paral'ysis, Herba paralys'eos* seu *paralyt'ica*, the *Cowslip, Paigil* or *Peagle*, (F.) *Primevère. Family*, Primulaceæ. *Sex. Syst.* Pentandria Monogynia. The flowers have been considered to be mildly tonic, antispasmodic, and anodyne.

PRIMULA VULGA'RIS. The leaves and roots of this plant have been used as sternutatories.

PRINCEPS, Rectum.

PRINCEPS CERVI'CIS (*Artery*), *Cervical Artery.* A branch of the occipital artery, which descends between the splenius and complexus muscles, and may be followed down to the lower part of the neck.

PRINCEPS POL'LICIS (*Arteria*), *Arte'ria magna pol'licis.* When the two collateral arteries of the thumb take origin from a common trunk — the trunk is the *Princeps pollicis.*

*PRINCIPE CRYSTALLIZABLE DE DÉROSNE*, Narcotine.

*PRINCIPES IMMEDIATS*, Principles, immediate.

PRINCIPIUM, Arche, Element — p. Acidificans, Oxygen — p. Adstringens, Tannin — p. Byrsodepsicum, Tannin — p. Coriaceum, Tannin — p. Hydrogeneticum, Hydrogen — p. Hydroticum, Hydrogen — p. Oxygenans, Oxygen — p. Salivale, see Saliva — p. Scytodepsicum, Tannin — p. Urinosum, Urea.

PRIN'CIPLE, COL'OURING, OF THE BLOOD. A name, given to the immediate principle in animals, to which the blood owes its red colour. It is solid, inodorous, and insipid. When recently separated from blood, it has a purple-red colour. When distilled, it furnishes, amongst other products, a purple oil. It is insoluble in water; but, if diluted with that liquid, acquires a vinous-red hue. It communicates a red colour to the albumen of the blood, and affords, on analysis, iron, to which the colour has been ascribed. See Hæmaphæin, and Hæmatin.

PRINCIPLE, DIGESTIVE, Pepsin — p. Vital, see Vital principle.

PRINCIPLES, IMME'DIATE, (F.) *Principes immédiats, Matériaux immédiats.* A name given to a considerable number of substances, composed of at least three elements, and which are obtained from animals and vegetables without alteration, by simple processes, and, in some measure, *immediately.*

PRINCIPLES, IMMEDIATE, OF ANIMALS, *Proximate principles, Organic Elements, Compounds of Organization.* These are divided into acid principles, fatty principles, and principles which are neither fat nor acid. The first include the *uric, rosacic, purpuric, allantoic, caseic, butyric,* &c. The fatty principles are: — *stearin, elain, cholesterin,* &c.; and the last division includes the most important compounds of organization: — *fibrin, gelatin, albumen, casein, osmazome,* &c.

PRINCIPLES, PROXIMATE, P. immediate.

PRINOS, *P. verticilla'tus, Alcan'na major latifo'lia denta'ta, Aquifo'lium fo'liis decid'uis, Prinos Grono'vii, Prinos padifolius, Black Alder, Virginia Winterberry, Whorled Winterberry, Fevcrbush*, (F.) *Apalachine à feuilles de Prunier. Ord.* Aquifoliaceæ. *Sex. Syst.* Hexandria Monogynia. The bark of this common shrub of the United States is astringent, bitter, and pungent. The berries are, likewise, bitter. The bark has been used as a substitute for the cinchona, in intermittents, and as a tonic.

PRINOS GRONOVII, Prinos.

PRINOS LÆVIGA'TUS, *Smooth Winte·berry.* Indigenous; has the same properties as

PRINOS PADIFOLIUS, Prinos.

PRION, Saw.

PRIONO'DES, from πριων, 'a saw,' and εἰδος, 'shape.' *Serra'ted.* Applied to the sutures of the head.

PRIOR ANNULA'RIS, *Interos'seus quartus* of Winslow. An internal interosseous muscle, which arises from the outside of the metacarpal bone of the ring-finger, and is inserted into the outside of the tendon on the back of the ring-finger. Its use is to draw the ring-finger outwards.

PRIOR IN'DICIS, *Exten'sor ter'tii interno'dii in'dicis*, (F.) *Sous-métacarpo-latéri-phalangien.* It arises from the outer or radial side of the metacarpal bone of the fore-finger, and is inserted into the outside of the tendon on the back of the fore-finger. *Action:* — to draw the finger outwards, towards the thumb.

PRIOR INDICIS PEDIS, *Adductor In'dicis pedis.* An external, interosseous muscle of the foot, which arises from the contiguous sides of the metatarsal bones of the great and fore toes, and is inserted into the inside of the root of the first bone of the fore-toe. *Action:* — to pull the fore-toe inwards.

PRIOR MEDII, Prior medii digiti.

PRIOR ME'DII DIG''ITI, *Prior Medii, Second interos'seus* of Douglas. An external, interosseous muscle of the hand, which arises from the corresponding sides of the metacarpal bones of the fore and middle fingers, and is inserted into the outside of the tendon on the back of the middle finger. *Action:* — to draw the middle finger outwards.

PRIOR MEDII DIGITI PEDIS, *Adductor medii digiti pedis.* An internal, interosseous muscle of the foot, which arises from the inside of the metatarsal bone of the middle toe, and is inserted into the inside of the root of the first bone of the middle toe. *Use:*—to pull the middle toe inwards, or towards the inner side of the foot.

PRIOR MIN'IMI DIGITI, *Adduc'tor min'imi dig''iti.* An internal, interosseous muscle of the foot, which originates from the inside of the metatarsal bone of the little toe, and is inserted into the inside of the root of the first bone of the little toe. *Action:* — to pull the little toe inwards.

PRIOR TERTII DIGITI PEDIS, *Adduc'tor tertii dig''iti pedis.* An internal, interosseous muscle of the foot, which arises from the inner and under part of the metatarsal bone of the third of the small toes, and is inserted into the inside of the root of the first bone of the third of the small toes. *Action:* — to pull the third of the small toes inwards.

PRISIS, Brygmus, Trepanning.

PRISMA, Scobs.

PRISMUS, Brygmus, Trepanning.

PRIVATE PARTS, Genital organs.

PRIVET, Ligustrum vulgare.

PRIVITIES, Genital organs.

PRIVY, Ligustrum vulgare — p. Members, Genital organs — p. Parts, Genital organs.

PRO, προ, 'before.' A common prefix to words, as in *Procatarctic, Prostate,* &c.

PROAGOREUSIS, Prognosis.

PROBANG, *Detruso'rium ex bale'na.* A long slender rod of whalebone, with a piece of sponge at its extremity, intended to push down extraneous bodies, arrested in the œsophagus, into the stomach. A similar instrument is called by J. L. Petit, *Repoussoir d'arêtes.*

PROBARBIUM, Genetas.

PROBASCANIUM, Amuletum.

PROBASCANTIUM, Amuletum.

PROBE, Catheterize, Specillum — p. Eyed, see Specillum.

PROBING, see Melosis.

PROBOLE, Processus.

PROCARDIUM, Scrobiculus cordis.

*PROCÉDÉ*, Process.

PROCEDURE, *Procédé*.

PROCEPHALI, Capitones.

PROCERUS NASI, Pyramidalis nasi.

*PROCÈS CILIAIRES*, Ciliary processes.

PROCESS, Apophysis, Processus.

Proc''ess, *Ratio*, (F.) *Procédé*, from *procedere*, to march forwards. Procedure,—method of performing any operation, chemical, pharmaceutical, or surgical.

Process, Cuneiform, Basilary process — p. Modelling, see Modelling Process — p. of Rau, see Malleus — p. Vertical superior longitudinal, Falx cerebri.

PROCES'SUS. *A process*; same etymon; *Projectu'ra*, *Prob'olē*. An apophysis or eminence of a bone; see Apophysis. Also, any part which seems prolonged beyond others with which it is in connexion; as the *Ciliary processes*.

Processus Anconeus, Olecranon — p. Annularis, Pons Varolii — p. Belenoides, see Belenoid —p. Caudatus, Lobulus caudatus—p. à Cerebello ad medullam oblongatam, Corpora restiformia — p. Cerebelli ad pontem, Peduncles of the cerebellum—p. Cerebelli ad testes, Peduncles of the cerebellum—p. Cerebri lateralis, Cornu ammonis — p. Ciliares, Ciliary processes — p. Clavatus, see Funiculi graciles — p. Cochleariformis, see Tympanum — p. Cuneiformis ossis occipitis, Basilary process — p. Enteroidei cerebri, Convolutions (cerebral) — p. Falciformis cerebelli, Falx cerebelli—p. Falciformis duræ matris, Falx cerebri—p. Gracilis of Rau, see Malleus — p. Laterales uteri, Tubæ Fallopianæ—p. Mamillares, Papillæ of the kidney, Olfactory nerves — p. Mamillares cerebri, Mamillary tubercles—p. Olivaris, Olivary Process—p. Orbicularis cerebri, Infundibulum of the brain — p. Papillares, Olfactory nerves — p. Papillarum, Olfactory nerves — p. Rachidianus, Medulla spinalis—p. Sterni xiphoideus, Xiphoid.

Proces'sus Ter'etes, *Eminen'tiæ* seu *Fascic'uli ter'etes*. Two slightly convex bodies forming the anterior wall or floor of the fourth ventricle of the brain. They are separated by a longitudinal groove, which is continuous, inferiorly, with the sulcus longitudinalis posterior of the spinal cord. They are crossed transversely by several white and gray fasciculi—*lineæ transver'sæ*, *striæ medulla'res*—the origin of the auditory nerves.

Processus ad Testes, see Valvula Vieussenii — p. Transversus duræ matris, Tentorium — p. Uvifer, Uvula — p. Ventriculi, Duodenum — p. Xiphoides, Xiphoid cartilage—p. Xipho-sternalis, Xiphoid cartilage — p. Zygomaticus, Zygomatic process.

PROCHEILA, Antelabia.

PROCHEILIDION, Procheilon.

PROCHEI'LON, *Procheilid'ion*, *Prola'bium*, *Antila'bium*. The extreme projecting part or margin of the lips.

PROCHEUMA, Parenchyma.

*PROCIDENCE DE L'ŒIL*, Exophthalmia.

PROCIDENTIA, Prolapsus — p. Ani, Proctocele—p. Intestini recti, Proctocele—p. Iridis, Staphyloma of the Iris — p. Oculi, Exophthalmia—p. Sedis, Proctocele — p. Uteri, Prolapsus uteri.

PROCNEME, Tibia.

PROCNEMIUM, Tibia.

PROCŒ'LIUS, *Procœ'lus*, from *προ*, 'before,' and *κοιλια*, 'belly.' One who has a large pendulous abdomen.

PROCŒLUS, Procœlius.

PROCON'DYLUS, *προκονδυλος*, from *προ*, 'before,' and *κονδυλος*, 'a knot.' The first joint of the fingers; the second being called *κονδυλος*; and the third *μετακονδυλος*.

PROCREATIO, Generation — p. Sanguinis, Hæmatosis.

PROCREATION, Fecundation, Generation.

PROC'TAGRA, from *πρωκτος*, 'anus,' and *αγρα*, 'seizure.' Gout in the rectum. Proctalgia.

PROCTAL'GIA, *Proc'tica simplex*, *Proc'tagra*, *Dolor ani*, *Proctodyn'ia*, from *πρωκτος*, 'the anus,' and *αλγος*, 'pain.' Pain in the anus: generally symptomatic of disease, as of hemorrhoids, scirrhus, &c.

Proctalgia, Clunesia — p. Hæmorrhoidalis, Hæmorrhois — p. Inflammatoria, Rectitis — p. Intertriginosa, Chafing — p. Rheumatica, Proctorrheuma.

PROCTATRE'SIA, *Imperfora'tio ani*, from *πρωκτος*, 'the anus,' and *ατρησια*, 'imperforation.' Imperforate state of the anus.

PROC'TICA. Pain or derangement about the anus, without primary inflammation. A genus in the class *Cœliaca*, order *Enterica*, of Good.

Proctica Exania, Proctocele — p. Marisca, Hæmorrhois—p. Simplex, Proctalgia—p. Tenesmus, Tenesmus.

PROCTISIS, Proctitis.

PROCTI'TIS, *Proc'tisis*, *Archi'tis*, *Clune'sia*, *Cysso'tis*, from *πρωκτος*, 'the anus.' Inflammation of the anus and rectum. Rectitis.

Proctitis Gangrænosa, Proctocace.

PROCTOC'ACĒ, *Procti'tis gangræno'sa*, from *πρωκτος*, 'the anus,' and *κακος*, 'evil.' A disease of the rectum, so called by Fuchs, which, according to him, is common in Peru, in the neighbourhood of Quito and Lima, on the Honduras and Mosquito coasts, in Brazil, and on the Gold coast, &c. It is called by the Portuguese, *Bicho*, and *Bicho di Culo*; by the people of Quito, *Mal del Valle*, from its prevalence in the valleys; and in Africa, *Bitios de Kis*. It is an adynamic, inflammatory condition, frequently ending in gangrene. It has been attributed to bad food, and the use of spices.

PROCTOCE'LĒ, from *πρωκτος*, 'the anus,' and *κηλη*, 'hernia.' *Prolap'sus Ani*, *Proctopto'ma*, *Proctopto'sis*, *Procto'sis*, *Hedroce'lē*, *Archecpto'ma*, *Archecpto'ma*, *Archopto'ma*, *Archecce'lē*, *Archopto'sis*, *Exa'nia*, *Hæmor'rhois proce'dens*, *Hæmor'rhois ab exa'niâ*, *Prociden'tia Ani*, *P. intesti'ni recti*, *P. sedis*, *Ecto'pia Ani*, *Sedes procid'ua*, *Falling down of the Fundament*, *Coming down of the Body*, (F.) *Chute du rectum*, *C. du Fondement*, *Renversement du rectum*. Inversion and prolapse of the mucous coat of the rectum, from relaxation of the sphincter with more or less swelling. In the treatment, the application of cold water and astringent lotions must be recommended: and if other means fail, one of the radii of skin, which converge at the anus, may be snipped off. On cicatrizing, the verge of the anus will be contracted, and the cure probably complete. In the way of palliation, the parts may be retained by an appropriate bandage.

PROCTOCYSTOTOMIA, see Lithotomy.

PROCTODYNIA, Proctalgia.

PROCTON'CUS, from *πρωκτος*, 'anus,' and *ογκος*, 'swelling.' Swelling of the anus.

PROCTOPARAL'YSIS, *Proctople'gia*, *Paral'ysis Intesti'ni Recti*. Paralysis of the muscles of the rectum.

PROCTOPLEGIA, Proctoparalysis.

PROCTOPTOMA, Proctocele.

PROCTOPTOSIS, Proctocele.

PROCTORRHAGIA, Hæmorrhoidal flux.

PROCTORRHEU'MA, from πρωκτος, 'anus,' and ρευμα, 'defluxion.' Rheumatism of the anus.

PROCTORRHŒ'A, from πρωκτος, 'the anus,' and ρεω, 'I flow.' A discharge of blood or slime from the anus. See Hæmorrhois.

PROCTOS, Anus.

PROCTOSIS, Proctocele.

PROCTOSPASMUS, Tenesmus.

PROCTOSTENOSIS ORGANICA, Stricture of the rectum.

PROCTOTOREU'SIS, from πρωκτος, 'anus,' and τορευειν, 'to perforate.' Perforation of a closed anus.

PROCTUS, Anus.

PROCURATIO ABORTÛS. The promotion of abortion.

PROD'ROMUS, from προ, 'before,' and δρομος, 'course.' *Sta'dium opportunita'tis* seu *prodromo'rum;* in contagious diseases, *Sta'dium laten'tis conta'gii.* The period immediately preceding an attack of disease; in which the *precursory signs* occur.

PROD'UCT, from *produco*, 'I produce.' (F.) *Produit.* The result sought to be attained by any pharmaceutical operation.

PRODUCTIO, Prolapsus—p. Uvulæ à pituitâ, Staphylœdema.

PRODUC'TION, *Produc'tio;* same etymon. This word is used, especially by the French, synonymously with *prolongation.* The mesentery is, in this sense, a production of the peritoneum.

*PRODUCTION ACCIDENTELLE.* An accidental or adventitious structure.

PRODUCTIVITAS, Fecundity.

*PRODUIT,* Product.

PROEGUMENÆ CAUSÆ, Causes, predisponent.

PRŒLIUM, Press, Tourniquet.

PROËM'INENT, *Proëm'inens,* from *pro,* 'forwards,' and *eminere,* 'to project.' Some anatomists call the 7th cervical vertebra the *proeminent vertebra,* on account of the length of its spinous process, which passes the level of that of the neighbouring vertebræ.

PRŒO'TIA, *Proï'otes,* πρωιοτης, or πρωιοτης, from πρωι, 'early.' 'Precocity.' *Præcox matu'ritas, Preco'cious matu'rity.* Premature development of sexual organization or power.—Good.

PROFLUVII CORTEX, Nerium antidysentericum.

PROFLU'VIUM, *Discharge, Fluxus, Polyrrhœ'a, Flux;* from *profluo,* 'I run down. A term under which some nosologists have comprised all morbid discharges or fluxes:—others, increased excretions attended by fever.

Profluvium Alvi, Diarrhœa—p. Genitale muliebre, Menses—p. Mucosum urethræ, Gonorrhœa—p. Muliebre, Leucorrhœa, Menses—p. Sanguinis, Hæmorrhagia—p. Sanguinis è Renibus, Nephrorrhagia—p. Sanguinis ex Ore, Stomatorrhagia—p. Sanguinis ex Utero, Metrorrhagia—p. Seminis, Pollution—p. Ventris, Diarrhœa.

PROFUN'DUS, (*pro,* and *fundus,* 'base.') *Altus,* 'having a deep base.' A name given to different parts, which are seated profoundly as regards others.

Profunda Arte'ria Fem'oris, *A. vasta poste'rior* seu *muscula'ris fem'oris, Artère-grande musculaire de la cuisse.* (Ch.) This large branch arises commonly from the posterior part of the crural, between the pubis and lesser trochanter. It descends deeply, situate before the adductors; passes through the third adductor above the opening in it for the trunk of the femoral: and terminates in the short portion of the biceps. The *muscularis profunda* gives off, 1. The *external circumflex:* 2. The *internal circumflex:* and, 3. The three *perforantes.*

Profunda Arte'ria Hu'meri, *P. supe'rior, Arte'ria spira'lis,* (F.) *Artère humérale profonde, A. collatérale externe, Grand musculaire du bras,* (Ch.) Its origin is variable. When it arises from the brachial artery, it is given off opposite the groove of the humerus destined for the radial nerve, and descends backwards between the three portions of the triceps, accompanied by the nerve; giving branches to that muscle and to the humerus. When it reaches the posterior part of the bone, it divides into two branches, which are distributed to the triceps, supinator longus, &c.

Profunda Arteria Inferior vel Minor is often a branch of the last; but, commonly, is given off from the brachial, near the middle of the arm. It gives off branches to the muscles, &c., about the inner side of the os humeri. It is, also, called *large communicating ulnar* or *profundo-ulnar.*

Profunda Arteria Penis. Chaussier has given this name to the *cav'ernous ar'tery,* which arises from the artery of the penis, furnished by the internal pudic.

Profunda Arteria Superior, Profunda humeri.

Certain muscles are distinguished by the names *profound* or *deep-seated,* and *superficial.* Thus, we speak of the *superficial* and *deep-seated* muscles of the neck, &c.; the *Flexor profundus perforans,* &c.

PROFUSIO, Hæmorrhagia.

Profusio Aquæ. The discharge or breaking of the waters at birth.

Profusio Sanguinis, Hæmorrhagia—p. Seminis, Ejaculation—p. Subcutanea, Purpura simplex.

PROGAS'TOR, from προ, 'before,' and γαστηρ, 'belly.' One who has a pendulous belly.

PROGENIES, Epigone.

PROGENY, Epigone.

PROGLOS'SIS, from προ, 'before,' and γλωσσα, 'the tongue;' *Apex linguæ.* The extremity or tip of the tongue.

PROG'NATHOUS, from προ, 'before,' and γναθος, 'the jaw.' Having a projecting jaw. A term applied to the form of the head in which there is a prolongation or forward extension of the jaws, as in the negro.

PROGNO'SIS, *Proügorew'sis, Prorrhe'sis, Præcognit''io, Prognos'ticē, Præno'tio, Prænuntia'tio, Præscien'tia, Præsci''io, Pronœ'a, Proph'asis, Prædic'tio,* (F.) *Prognostic, Pronostic.* from προ, 'before,' and γνωσις, 'knowledge.' A judgment formed by the physician regarding the future progress and termination of any disease.

Prognosis, General. The opinion formed of a disease in the abstract. Thus, we say, the *General prognosis* of *Cynanche tonsillaris* is favourable;—of *Phthisis pulmonalis,* unfavourable, &c.

Prognosis, Particular. The opinion formed of any particular case of disease. The *particular prognosis* of one case of typhus, for example, may be favourable, whilst that of another may be unfavourable.

Prognosis ex Linguâ, Glossomantia.

*PROGNOSTIC,* Prognosis.

PROGNOSTICE, Prognosis.

PROGRESSIO, Augmentation.

PROGRESSUS, Augmentation.

PROIOTES, Præotia.

PROJECTURA, Process.

PROLABIUM, Procheilon.

PROLAP'SUS, from *prolabor, prolapsus,* (*pro,* and *labor, lapsus,* 'to slide,') 'I slip down.' *Prociden'tia, Delap'sio, Delap'sus, Hypor'rhysis, Propto'ma, Propto'sis, Produc'tio, Propenden'tia,*

*Prominen'tia, Ptosis, Casus,* (F.) *Chute ; a protrusion ; a falling down.* A genus of diseases in the class *Locales* and order *Ectopiæ* of Cullen, distinguished by the falling down of a part through the orifice with which it is naturally connected.

Prolapsus Ani, Proctocele — p. Bulbi oculi, Exophthalmia — p. Corneæ, Staphyloma of the cornea—p. Iridis, Ptosis iridis—p. Linguæ, Glossocele, Paraglossa — p. Œsophagi, Pharyngocele — p. Palpebræ, Blepharoptosis — p. Pharyngis, Pharyngocele — p. Umbilici, Exomphalus.

Prolapsus U'teri, *Exome'tra, Metropto'sis, Metropropto'sis, Orthysteropto'sis, Orthysteropto'ma, Falling down of the womb, Ædopto'sis u'teri, Hysteropto'sis, Hysteroce'lē nuda, Procide'ntia u'teri,* (F.) *Abaissement de la matrice, Chute de la matrice, Descente de la matrice, Précipitation de la matrice.* Some use the term, 'Procidentia Uteri' for a minor degree of the affection than prolapsus;—*Relaxatio uteri* expressing the slightest state of all. A falling down of the uterus, owing to relaxation of the parts about the uterovaginal region. In the treatment, the horizontal posture must be insisted upon ; the injection of astringent substances *per vaginam* be advised; and if the affection be not remedied by these means, a pessary may be employed as a palliative, or the operation of *Episioraphy* be performed.

Prolapsus Uvulæ, Staphylœdema.

Prolapsus Vagi'næ, *Hysteropto'sis Vagi'næ, Prolapsus Ædoptosis Vaginæ, Coleopto'sis, Colpopto'sis, Elytropto'sis* — Protrusion of the upper part of the vagina into the lower. This, like the descent of the uterus, may be *relaxation, procidentia, prolapsus,* or complete *inversion.*

Prolapsus Vesicæ, Exocyste.

PROLECTA'TIO; from *pro,* and *legere, lectum,* 'to gather.' Action of separating the finer parts of a body from the grosser.

PROLEP'TICS, *Prolep'ticē,* from προ, 'before,' and λαμβανω, 'I seize hold of.' A term proposed by Dr. Laycock to signify the art and science of predicting in medicine.

PROLEPTICUS, Anticipating.

PROLES, Epigone.

PROLI'CIDE, *Prolicid'ium ;* from *proles,* 'offspring,' and *cædere,* 'to kill.' Destruction of offspring: a term, which includes fœticide as well as infanticide.

PROLIF'IC, *Prolif'icus ;* from *proles,* 'offspring,' and *facio,* 'I make.' That which has the faculty of engendering. Applied to man, and animals, and to their sperm or seed; as well as to remedies, which, by strengthening the genital organs, increase the secretion of sperm.

PROLIG''EROUS, *Pro'liger, Proliq''erus,* from *proles,* 'offspring,' and *gero,* 'I carry.' That which is connected with carrying the offspring.

Proligerous Disc or Layer, *Discus proliq''erus, Discus vitellinus, Stratum proliq''erum, Gonostro'ma,* (F.) *Disque proligère.* A granular layer, situate generally towards the most prominent part of the ovarian vesicle, in the centre of which the true ovum or ovule exists.—Von Baer.

*PROLONGEMENT RACHIDIEN,* Medulla spinalis — *p. Sous-occipital,* Basilary process.

PROMALACTE'RIUM, from προ, 'before,' and μαλασσω, 'I soften.' The room, in the ancient gymnasium, in which the body was softened and anointed. One of the operations in bathing.

PROMANUS, see Digitus, Pollex.

PROMETOPIDIA, Frontal bandages.

PROMETO'PIS, *Prometopid'ion,* from προ, 'before,' and μετωπον, 'the forehead.' The skin of the forehead.

PROMINENTIA, Prolapsus, Protuberance — p. Annularis Cerebri, Pons Varolii — p. Corneæ, Ceratocele — p. Ossis Continua, Apophysis.

PROMINENTIÆ ALBICANTES, Mammillary tubercles—p. Semiövales Medullæ Oblongatæ, Corpora olivaria.

PROMONTORIUM, Promontory — p. Facici, Nasus — p. Ossis Sacri, see Sacrum.

PROM'ONTORY, *Promonto'rium,* (from *pro* and *mons, montis,* 'a mountain,') seu *Tuber* seu *Tuberos'itas Tym'pani.* A small projection at the inner paries of the cavity of the tympanum, which corresponds to the external scala of the cochlea, and especially to the outer side of the vestibule.

Promontory of the Sacrum, see Sacrum.

*PRONATEUR CARRÉ,* Pronator radii quadratus—*p. Grand* ou *rond,* Pronator radii teres—*p. Petit,* Pronator radii quadratus.

PRONA'TION, *Prona'tio,* from *pronus,* 'inclined forwards.' Anatomists understand, by pronation, the motion by which the inferior extremity of the radius passes before the ulna, and thus causes the hand to execute a kind of rotation from without inwards.

PRONA'TOR. That which produces the motion of pronation. This name has been given to two of the muscles of the forearm.

Pronator Obliquus, P. radii teres — p. Quadratus, P. radii quadratus.

Pronator Ra'dii Quadra'tus, *P. quadratus, Quadratus ra'dii, P. quadratus* seu *transvers'us* (Winslow), *Pronator radii brevis* seu *quadratus* (Cowper,) (F.) *Cubito-radial* (Ch.), *Petit* ou *carré pronateur.* This muscle is situate at the anterior, inferior, and profound part of the forearm. It is flat and square, and is attached, within, to the inferior quarter of the anterior surface of the ulna; and, without, to the inferior quarter of the anterior surface of the radius. It produces the motion of pronation.

Pronator Radii Teres, *P. teres* sive *obli'quus* (Winslow), (F.) *Épitrochlo-radial* (Ch.), *Grand* ou *rond pronateur.* A muscle seated at the upper and anterior part of the forearm. It is long, flat, and larger above than below. It is attached, above, to the inner tuberosity of the humerus and to the coronoid process of the ulna. From thence it passes obliquely downwards and outwards, and terminates at the middle of the outer surface of the radius. It causes the radius to turn on the ulna, to produce the motion of pronation. It can, also, bend the forearm on the arm, and conversely.

Pronator Teres, P. radii teres.

PRONAUS, Vestibulum.

PRONERVATIO, Aponeurosis, Tendon.

PRONŒA, Prognosis.

*PRONOSTIC,* Prognosis.

PROPENDENTIA, Prolapsus.

PROP'ERTIES, PHYSICAL, OF THE TISSUES. These are *flexibility, extensibility* and *elasticity, racornissement* and *imbibition.*

Properties, Vital. Those which depend upon organization, as *contractil'ity.*

PROPHASIS, Prognosis.

PROPHYLAC'TIC, *Prophylac'ticus, Diaphylac'tic, Diasos'tic, Synteret'icus, Præservato'rius,* from προ, and φυλασσω, 'I defend.' A preservative.

PROPHYLAX'IS, *Prophylacē, Prophylac'ticē, Syntere'sis.* Same etymon. *Præserva'tio, Præcau'tio, Præcusto'dia.* Preservative or preventive treatment.

PROP'OLIS, from προ, 'before,' and πολις, 'city;' literally, 'that which is before the city.' *Ceranthe'mus, Commo'sis, Bee-bread.* A red, resinous matter, with which the bees cover the hol-

tom of the hive. Its fume has been esteemed antiasthmatic.

PROP'OMA, from *προ*, 'before,' and *πομα*, 'a drink.' Ancient name of a medicine, composed of seven parts of *honey* and four of *wine*. It was drunk before a meal.—Paulus of Ægina.

PROPORTIO, Symmetry.

PROPOSITUM, Intention.

PROPOTIS'MOS. Same etymon. *Præpo'tio*. An ancient name for medicines which were given to the patients before purging them, and, in some sort, to prepare them.

PROPRIUS AURIS EXTERNÆ, Retrahens auris.

PROPTOMA, Prolapsus.

PROPTO'MA AURICULA'RUM, *Parœsthe'sis audi'tûs flacca, Flap Ear*. Lobe of the ear broad, loose, and pendent from birth.—Good.

PROPTOMA SCROTI, Rachosis.

PROPTOSIS, Prolapsus—p. Palpebræ, Blepharoptosis—p. Uvulæ, Staphylœdema.

PROPTYSIS, Expectoration.

PRORA, Occiput.

PRORRHESIS, Prognosis.

PRORUPTIO SANGUINIS, Hæmorrhagia.

PROS, *προς*. In composition, this prefix generally signifies 'in addition to,' 'over and above,' 'besides.'

PROSARTHROSIS, Diarthrosis.

PROSBOLE, Impression.

PROSCHYSIS, Affusion.

PROSCOLLESIS, Adherence, Agglutination.

*PROSECTEUR*, Dissector.

PROSECTIO, Anatomy.

PROSECTOR, Dissector.

PROSLEPSIS, Prehension.

PROSODOS, Aditus.

PROSOPALGIA, Neuralgia, facial.

PROSOPANTRA, Frontal sinuses.

PROSOPANTRI'TIS, from *prosopantra*, the frontal sinuses, and *itis*, denoting inflammation. Inflammation of the frontal sinuses.

PROSOPARALYSIS, Palsy, Bell's.

PROSO'PIS DULCIS. A tree of rather large size, native of Peru. The fruit—*Pacay*—is a pod, from 20 to 24 inches long, containing black seeds imbedded in a white, soft, flaky substance; which last is eaten by the Limeños with pleasure.—Tschudi.

PROSOPODYNIA, Neuralgia, facial.

PROSOPODYSMOR'PHIA, from *προσωπον*, 'the face,' *δυς*, 'with difficulty,' and *μορφη*, 'shape.' Malformation or atrophy of the face,—as where the process of nutrition suffers from diminished nervous influence.

PROSOPOLOGIA, Physiognomy.

PROSOPOMANTIA, Physiognomy.

PROSOPON, Face.

PROSOPORRHEU'MA, *Rheumatis'mus faciei*, from *προσωπον*, 'face,' and *ρευμα*, 'defluxion,' 'rheumatism.' Rheumatism affecting the face.

PROSOPOSIS, Physiognomy.

PROSOPOSPASMUS, Canine Laugh.

PROSOPOSTERNODYMIA, see Cephalosomatodymia.

PROSPERITAS VALETUDINIS, Sanitas.

PROSPHORA, Prehension.

PROS'PHYSIS, *Adnascen'tia, Coalit'io*, 'adhesion, adherence, connexion,' from *προς*, and *φυω*, 'I grow.' In a more limited sense, this word means morbid adhesion of the cyclids, either between themselves, or with the globe of the eye; *Ankyloblepha'ron*.

PROS'TASIS, *προστασις*, (*προ*, and *στασις*, 'station,') 'superiority, preponderance;' same etymon as *Prostate*. A predominance or abundance of excrementitious humour.—Hippocr.

PROSTATA, Prostate—p. Bartholini, Cowper's glands in the female—p. Muliebris, Cowper's glands in the female.

PROSTATÆ, Prostate.

PROSTATAL, Prostatic.

PROSTATAL'GIA, from *προστατα*, 'the prostate,' and *αλγος*, 'pain.' Pain in the prostate.

PROSTATAUXĒ, Prostatoparectasis.

PROSTATE, *προστατα*, from *προ*, 'before,' and *ιστημι*, 'I stand.'—*Pros'tata, P. gland'ula, Pros'tatæ, P. glandulo'sæ, Paras'tata adenoïdes* seu *glandulo'sa, Adstans, Paras'tatæ, P. gland'ulæ, Pros'tatæ adenoï'des, Testis minor, Corpus glandulo'sum* seu *glando'sum, C. adeniformē, C. glandiformē, C. glandulo'sum, C. adenoï'des, Assisten'tes glandulæ, Ads'tites glandulosi*; the *Prostate gland*. A glandular, cordiform body, of the size of a chestnut, situate before the neck of the bladder, behind the symphysis pubis, and surrounding the first portion of the urethra. Its excretory outlets, to the number of 10 or 12, open into the part of the urethra that traverses it, and pour into it a whitish viscid humour, intended to lubricate the interior of the urethra, and to serve as a vehicle for the sperm in its ejaculation.

PROSTATELCO'SIS, from *προστατα*, 'prostate,' and *'ελκος*, 'an ulcer.' Ulceration of the prostate.

*PROSTATES INFÉRIEURES*, Cowper's glands—*p. Petites*, Cowper's glands.

PROSTAT'IC, *Prostat'icus, Pros'tatal*. That which relates to the prostate. Winslow has named—*Superior Prostatic Muscles*—ligaments which pass from the pubis to the lateral parts of the prostate. He, also, calls—*Inferior prostatic muscles*—the fleshy fibres, which, from the lateral parts of the urethra, near its membranous portion, pass to be inserted into the pubis.

PROSTATIC BISEC'TOR. An instrument employed by Dr. Stevens, of New York, in the bilateral operation of lithotomy. In form it resembles a large olive, with a beak at the extremity, with cutting edges at the sides parallel to its longest axis, and with a straight handle.

PROSTATIC LIQUOR, *Liquor prostat'icus*. The fluid secreted by the prostate, which mixes with sperm during emission.

PROSTATIC PORTION OF THE URETHRA. The part of the canal of the urethra included by the prostate: it is about 15 lines long.

PROSTATIC SINUS, see Sinus, prostatic.

PROSTATICUS SUPERIOR, Compressor prostatæ.

PROSTATI'TIS, *Inflamma'tio Pros'tatæ*, from *προστατα*, 'the prostate,' and *itis*, denoting inflammation. Inflammation of the prostate.

PROSTATOCELE, Prostatoncus.

PROSTATON'CUS, *Prostatoce'lē, Tumor pros'tatæ*, from *προστατα*, 'the prostate,' and *ογκος*, 'a tumour.' Swelling of the prostate.

PROSTATOPAREC'TASIS, from *προστατα*, 'prostate,' and *παρεκτεινειν*, 'to extend.' Enlargement of the prostate; also, induration of the same, *Prostatoscir'rhus, Prostataux'ē*.

PROSTATOSCIRRHUS, see Prostatoparectasis.

PROSTERNID'IUM, from *προ*, 'before,' and *στερνον*, 'the sternum.' Any agent applied to the anterior part of the chest; a plaster to the breast.

PROSTHESIS, Prothesis.

PROSTHETA, Subdita.

PROSTHIUM, Penis.

PROSTOM'IA, *Commissu'ra labio'rum*; (F.) *προ*, 'before,' and *στομα*, 'mouth.' The commissure of the lips.

PROSTRA'TION, *Prostra'tio vi'rium*, (F.) *Prostration des forces, Abattement*. Great de-

pression of strength. Almost total loss of power over the muscles of locomotion.

PRO'TEA MELIFE'RA. A South African plant, *Nat. Ord.* Proteaceæ, whose involucra and flowers, at the time of inflorescence, are filled with a sweet watery liquid, which contains a great deal of honey. By inspissation it forms a delicious syrup—*Syru'pus Pro'teæ*, which is much used in pulmonary affections.

PROTEA LEPIDOCARPON, and some other Proteæ, supply the same kind of juice.

PRO'TEAN, *Pro'teiform*, *Proteiform'is*, from *Proteus*, who could assume various shapes. Assuming different shapes.

PROTEIFORMIS, Protean.

PROTEIFORM'IS MORBUS. A disease which assumes various characters.

PRO'TEÏN, *Proteine*, *Protei'na*: from πρωτευω, 'I take first rank.' A product of the decomposition of albumen, &c., by potassa. When animal albumen, fibrin or casein is dissolved in a moderately strong solution of caustic potassa, and the solution is exposed for some time to a high temperature, these substances are decomposed. The addition of acetic acid causes, in all three, the separation of a gelatinous translucent precipitate which has exactly the same characters and composition. This is protein. — Mulder.

Protein is the basis of animal and vegetable fibrin, albumen, and casein, and of gluten, which have been, consequently, classed under the "proteinaceous alimentary principle," by Dr. Pereira.

PROTEINACEOUS, Proteinous.

PRO'TEINOUS, *Proteina'ceous*, *Proteino'sus*, (F.) *Protéique*. Of, or belonging to protein; — as "a proteinous alimentary principle."

*PROTÉIQUE*, Proteinous.

PROTENSIONES GLANDULARES, Mammillary eminences.

PRÒTH'ESIS, *Pros'thesis*, *Adjunc'tio*, *Adjec'tio*, *Apposi''tio*, 'addition, application;' from προς, 'in addition to,' and τιθημι, 'I put.' That part of surgery whose object is to add to the human body some artificial part, in place of one that may be wanting, as a wooden leg, an artificial eye, &c.

PROTMESIS, Umbilicus, Kidney.

PROTOGALA, Colostrum.

PROTOIATROS, Archiater.

PROTOMEDICUS, Archiater.

PROTOMUS, Dissector.

PROTOPATHIA, Idiopathia.

PRO'TOPHYTE, *Protoph'yton*, from πρωτος, 'first,' and φυτον, 'a plant.' A vegetable production at the foot of the scale; as a cryptogamous plant, — a fungus.

PROTOSPOROS, Os uteri.

PROTOZŎ'ON, from πρωτος, 'first,' and ξωον, 'an animal.' An animal low in the scale; — as a monad.

PROTRUSION, Prolapsus.

PROTU'BERANCE, *Protuberan'tia*, *Extubera'tio*, *Prominen'tia*, *Excrescen'tia*, *Extuberan'tia*, from *pro*, 'before,' and *tuber*, 'a projection.' (F.) *Bosse*. A name given to rough, unequal protuberances, seen at the surface of certain organs; the *parietal protuberances*, *occipital protuberances*, *annular protuberances*, &c.

PROTUBERANCE, ANNULAR, Pons Varolii — p. Cerebral, Medulla oblongata, Pons Varolii — *p. Cylindroïde*, Cornu ammonis.

PROTUBERANTIA, Eminence—p. Annularis Willisii, Pons Varolii — p. Cylindrica, Cornu ammonis.

PROTRUSOR, Detrusor urinæ.

PROULIMATE'SIS. A word employed by Forestus for hernia of the stomach.

PROUNE, Prunus domestica.

PROVENTRIC'ULUS, *Bulbus glandulo'sus*, *Infundibu'lum*, *Second stomach*; from προ, 'before,' and *ventriculus*, 'the stomach.' A bulbous expansion at the termination of the œsophagus, immediately above the gizzard of birds, the walls of which are thickly studded with a layer of glands or follicles which secrete a digestive fluid.

PROVERBS, MED'ICAL. A proverbial expression frequently contains sound sense in its directions. In medicine, the greatest collection is in the *Regimen of Health of the School of Salernum*, composed in the 11th century, by John of Milan. Yet, although good sense is often inculcated, we frequently meet with the reverse.

Most of the proverbs are hygienic. The following are a few.

1. *Qu' après la soupe on coupe d'excellent vin*
   *Tire un écu de la poche du médecin.*
2. *Surge quintâ, prandeas nonâ, cœna quintâ decimâ*
   *nonâ, nec est morti vita prona.*
3. *Nunquam rectè corpus exerceri vires nisi ubi*
   *neque animum sine corpore posse.*
4. *Viande bien machée est à demi digérée.*
5. *Optimum condimentum fames.*
   Appetite is the best sauce.
6. *Plures occidit gula quam gladius.*
7. Early to bed and early to rise,
   Makes a man healthy, wealthy, and wise.
8. One man's meat's another man's poison.
9. An ounce of prevention is better than a pound of cure.

PROVERSIO, Anteversion.

PROVINS, MINERAL WATERS OF. Chalybeate springs in the department of Seine et Marne, France, which contain carbonic acid and iron.

PROVOCATORIUS, Intercalary.

PROX'IMAD, see Proximal aspect.

PROX'IMAL, from *proximus*, 'next.' Proximate; nearest; next.

PROXIMAL ASPECT. An aspect towards the trunk, in the course of an extremity. — Barclay. *Proximad* is used by the same writer adverbially to signify 'towards the trunk.'

PRUNA, Anthrax.

PRUNE, Prunum.

PRUNE JUICE EXPECTORA'TION or SPUTA. The sputa resembling prune juice, which occur in the third or purulent stage of pneumonia.

PRUNELLA, Angina pectoris, Aphthæ, Cynanche, Pupil.

PRUNEL'LA, *P. vulga'ris* seu *officina'lis*, *Brunel'la*, *Consol'ida minor*, *Sym'phytum minus*, *Self-heal*, *Heal-all*, *Bugle*, (F.) *Prunelle*, *Brunelle*; *Family*, Labiatæ. *Sex. Syst.* Didynamia Gymnospermia. This plant has been recommended as an astringent, in hemorrhages and fluxes; and, also, in gargles against aphthæ, and in inflammation of the fauces.

PRUNELLÆ SAL, Potassæ nitras fusus sulphatis paucillo mixtus.

*PRUNELLE*, Prunella, Pupil.

*PRUNELLIER*, Prunus spinosa.

PRUNELLOE, Prunum Brignolense.

PRUNEOLA SYLVESTRIS, Prunus spinosa.

PRUNES, see Prunum — p. Pulp of, Pruni Pulpa.

PRUNI PULPA, *Pulp of prunes*. Take of *prunes* a sufficient quantity, soften them in the vapour of boiling water, and having separated the stones, beat the remainder in a marble mortar and press through a hair-sieve. — Ph. U. S.

*PRUNIER*, Prunus domestica — *p. Sauvage*, Prunus spinosa.

PRUNUM. A *Plum*, a *Prune*. Three sorts

of plums have been usually ranked amongst the articles of the materia medica. 1. The *Prunum Brignolen'sē;* the *Brignole plum* or *Prunel'loe;* from Brignole in Provence. It is of a reddish-yellow colour; and has a very grateful, sweet, subacid taste. 2. The *Prunum Gal'licum, Prunum* (Ph. U. S.), the *French Prune;* and 3. The *Prunum Damasce'num* or *Damson, Brab'ylon.* All these possess the same general qualities as the other summer fruits. They are emollient and laxative.

Prunum Stellatum, Averrhoa carambola.

PRUNUS ACACIA, Prunus padus.

Prunus Armeniaca, *Armeni'aca vulga'ris* seu *epiroti'ca.* The *A'pricot, Apricock, Bericoc'cē,* βερικοκκη, *Præcoc'ia,* (F.) *Abricot. Family,* Rosaceæ. *Sex. Syst.* Icosandria Monogynia. The apricot, *Melum Armeniacum,* when ripe, is easily digested, and considered as a great delicacy.

Prunus A'vium, *P. cer'asus* seu *sylvest'ris* seu *macrophyl'la, Black Cherry Tree, Cer'asus A'vium* seu *nigra* seu *dulcis,* (F.) *Mérisier.* The fruit is eaten; and a gum exudes from the tree, the properties of which are similar to those of gum Arabic.

Prunus Capulin, (S.) *Capulies,* grows in the open fields of Peru; and is cultivated in gardens in the towns. The fruit is acid, and not often eaten; but on account of its agreeable odour it is used in making *Pucheros de flores;* or with odoriferous flowers to perfume linen. — Tschudi.

Prunus Cer'asus, *Cer'asus ac''ida* seu *horten'sis* seu *vulga'ris* seu *rubra.* The *Red Cherry Tree;* (F.) *Cérisier.* The fruit *Cer'asum, Cera'sion,* has a pleasant, acidulous sweet flavour. It is wholesome. See Prunus avium.

Prunus Domes'tica. The *Plum* or *Damson tree, Coccyme'lea, Proune,* (F.) *Prunier ordinaire.* The damson, when perfectly ripe, affords a wholesome fruit for pies, tarts, &c. It is gently laxative. See Prunum.

Prunus Hortensis, P. cerasus.

Prunus Insi'tia. The *Bullace Plum Tree.* The fruit of this tree is used like the damson.

Prunus Lauro-Cer'asus, *Cer'asus lauro-cerasus, Padus lauro-cerasus, Poison Laurel, Cherry Laurel, Common Laurel, Lauro-cer'asus,* (F.) *Laurier-cérise, L. amandier.* The leaves have a bitter, styptic taste, with the flavour of bitter almonds. The flowers have a similar flavour. The powdered leaves, applied to the nostrils, excite sneezing. The flavour of the leaves has given occasion to their being employed in tarts, custards, &c.; but in large quantities they are poisonous. The poisonous principle is the prussic acid. The distilled water, called *Laurel-water,* is poisonous. (See Poisons, Table of.)

Prunus Macrophylla, P. avium.

Prunus Padus, *Padus, P. a'vium, Cer'asus Padus, Cer'asus racemo'sus sylves'tris, Wild cluster* or *Bird Cherry Tree,* (F.) *Cérisier à grappes, Bois puant.* The bark of the tree has a fragrant smell, and a bitter sub-astringent taste, somewhat similar to that of bitter almonds. It has been recommended in intermittents, &c. in the form of decoction. The berries have been used in dysentery.

Prunus Sebastina, Sebastina.

Prunus Spino'sa. The *Sloe Tree, P. sylves'tris* seu *Aca'cia, Agriococcime'lea, Agru'na, Agrue'la,* (F.) *Prunellier, Prunier sauvage.* The fruit—the *sloe*—is sometimes employed in gargles, and was formerly much used in hemorrhage, owing to its astringent properties. The *Aca'cia nostras* seu *German'ica* seu *vulga'ris, Prune'ola sylves'tris, Succus acaciæ nostra'tis, S. Acaciæ Germanicæ inspissa'tus* is obtained from this.

Prunus Sylvestris, P. Avium, P. Spinosa.

Prunus Virginia'na. *Cer'asus sero'tina, C. Virginia'na, Wild Cherry Tree,* (F.) *Cérisier de Virginie.* The bark of this tree has been found useful in intermittents. The leaves are poisonous to certain animals, and the berries intoxicate different kinds of birds. The Indians use the bark in the cure of syphilis. It is bitter and astringent, and possesses some aromatic warmth, and, likewise, a narcotic quality. It is stimulant and tonic. The leaves contain prussic acid. The distilled oil of the bark is very nearly identical with that of the bitter almond. A strong decoction of the bark is anthelmintic.

Prunus Vulgaris, P. Padus.

PRURIG''INOUS, *Prurigino'sus;* same etymon as the next. Relating, or belonging to, or resembling prurigo.

PRURI'GO, *Pruri'tus, Chris'ma;* from *prurio,* 'I itch.' The word is often used synonymously with *itching.* Willan and Bateman use the term for a genus of cutaneous diseases, the characteristic symptoms of which are a severe itching, accompanied by an eruption of papulæ of nearly the same colour as the adjoining cuticle; *Cnesmos, Scabies papuliform'is, Exor'mia pruri'go.* It affects the whole surface of the skin, under three varieties of form; — the *P. mitis, P. formi'cans, P. seni'lis,* &c. as well as some parts of the body, as the *P. pod'icis,* and *P. puden'di mulie'bris* seu *Puden'dagra pru'riens.*

Prurigo, Heat—p. Pedicularis, Phtheiriasis.

*PRURIT,* Itching.

PRURITUS, Gargle, Itching, Prurigo.

PRUSSIAN BLUE, *Ferrum Zoöt'icum, F. Borus'sicum, F. Cyanogena'tum, F. oxydula'tum hydrocyan'icum, Ferri Ferrocy'anas, F. Ferrocyanure'tum, Borus'sias Ferri, Cœru'leum Borus'sicum, C. Berolinen'sē, Prussias Ferri, Hydrocy'anas Ferri, Ferri Cyanure'tum, Ferri percyan'idum, Trito-hydro-ferrocy'anate of iron, Ferrocyanuret of iron, Ferro-prus'siate of iron,* (F.) *Bleu de Prusse.* In the Pharmacopœia of the United States, the pure salt—*Ferri ferrocyanuretum*—is directed to be made as follows: *Ferri Sulph.* ℥iv, *acid sulph.* f℥iiiss, *acid nitric.* f℥vj or q. s.. *potassii ferrocyanuret.* ℥ivss, *aquæ,* Oij. Dissolve the sulphate in a pint of water, and having added the sulphuric acid, boil the solution. Pour into it the nitric acid, in small portions, boiling the liquid for a minute or two after each addition, until it no longer produces a dark colour; then allow the liquid to cool. Dissolve the ferrocyanuret of potassium in the remainder of the water, and add this solution gradually to the first liquid, agitating the mixture after each addition: then pour it upon a filter. Wash the precipitate with boiling water until the washings pass tasteless. Lastly, dry and rub into powder. This salt is chiefly used in the preparation of the hydrocyanic acid and the cyanuret of mercury. It has been advised in the treatment of intermittents, and in epilepsy and scrophulosis. Externally, it has been applied to ill-conditioned ulcers. (℈j to ʒj, of cerate.) Dose, four to six grains.

PSALIDIUM, Fornix.

PSALIS, Fornix, Scissors.

PSALTERIUM, Lyra.

PSAMMA, see Gravel.

PSAMMIS'MUS, *Ammis'mus, Gammis'mus,* from ψαμμος, 'sand.' *Arena'tio.* The application of sand to any part of the body for the cure of disease. — Paulus.

PSAMMODES, Sabulous.

PSAMMUS, see Gravel.

PSELLIS'MUS, ψελλισμος, from ψελλιζω, 'I stutter.' Imperfect or depraved state of the articulation. A genus in the class *Pneumatica,* order *Phonica,* of Good.

Psellismus Nasitas, Rhinophonia — p. Rhotacismus, Rotacism.

PSELLOTES, Balbuties.

PSEUDACACIA ODORATA, Robinia pseudacacia.

PSEUDAC'OË, *Pseudacoï'a, Pseudecoï'a*, from *ψευδης*, 'false,' and *ακοη*, 'audition.' *Pseudacu'sis.* False hearing.

PSEUDACORUS, Iris pseudacorus.

PSEUDÆSTHE'SIA, *Sensus perver'sus*, from *ψευδης*, 'false,' and *αισθανομαι*, 'I feel.' *Parapsis illuso'ria, Pseudo'phē, Pseudaph'ia.* Depraved feeling. Imaginary sense of touch or general feeling in organs that have no existence. Common to those who have suffered amputation; and in hypochondriacs and the insane.

PSEUDALEI MORBI, Feigned diseases.

PSEUDANGUSTURINUM, Brucine.

PSEUDAPHE, Pseudæsthesia.

PSEUDARTHRO'SIS, *Pseudarticula'tio, Pseudartic'ulus, Articula'tio notha* seu *artificia'lis*, from *ψευδης*, 'false,' and *αρθρον*, 'a joint.' A false joint or articulation.

PSEUDARTICULATIO, Pseudarthrosis.

PSEUDECOIA, Pseudacoe.

PSEUDENCEPH'ALUS, *Paraceph'alus*, from *ψευδης*, 'false,' and *εγκεφαλον*, 'the encephalon.' A monster, whose cranium is open in its whole extent, from before to behind, its base supporting a vascular tumour. — G. St. Hilaire.

PSEUDO, False — p. Asthma, Dyspnœa.

PSEUDOBLEP'SIA, *Pseudoblepsis, Pseudora'sis, Suffu'sio oc'uli*, from *ψευδης*, 'false,' and *βλεψις*, 'sight.' *Pseudops'ia, Parop'sis illuso'ria, Suffu'sio, Phantas'ma, False sight.* A generic name, used by Cullen for perversion of vision. See Metamorphopsia.

PSEUDOBLEPSIS, Paropsis.

PSEUDOCARCINOMA LABII, Cancer aquaticus.

PSEUDOCROUP, Asthma thymicum.

PSEUDOCYESIS, Pregnancy, false — p. Cyesis molaris, Mole.

PSEUDOENCEPHALITIS, Hydrencephaloid disease.

PSEUDO-FEVER, Irritation, morbid.

PSEUDOGEU'SIA, *Pseudogeu'sis, Pseudogeus'tia*, from *ψευδης*, 'false,' and *γευσις*, 'taste.' *Hallucina'tio gustûs.* False taste.

PSEUDOGEUSTIA, Pseudogeusia.

PSEUDOHELMINTHES, Ectozoa.

PSEUDOLI'EN, *Pseudosplen.* Glands situate in the neighbourhood of the spleen; probably, lymphatic glands.

PSEUDOMECHOACANA. Convolvulus panduratus.

PSEUDOMEDICUS, Charlatan.

PSEUDOMELANOTIC FORMATIONS, see Anthracosis — *p. Membrane*, Membrane, false.

Pseudomelanotic Meninx, Membrane, false — p. Metamorphosis polyposa, Polypus.

PSEUDOMEMBRANA, Membrane, false.

PSEUDONARCISSUS, Narcissus pseudonarcissus.

PSEUDOPERIPNEUMONIA, Peripneumonia notha.

PSEUDOPHLOGOSIS VENTRICULI RESOLUTIVA ET COLLIQUATIVA, Gastromalacia.

PSEUDOPHTHI'SIS. False phthisis. Emaciation occasioned by other cause than organic lesion of the lungs.

PSEUDOPLAS'MATA, from *ψευδης*, 'false,' and *πλασσω*, 'I form.' A term applied to malignant heterologous tumours. — Vogel.

PSEUDOPLEURITIS, Pleurodynia — p. Polypi, see Polypi — p. Pyrethrum, Achillea ptarmica — p. Spleen, Pseudolien.

PSEUDOPNEUMONIA, Peripneumonia notha.

PSEUDOPNEUMONITIS, Peripneumonia notha.

PSEUDOPSIA, Pseudoblepsia.

PSEUDORASIS, Pseudoblepsia.

PSEUDOREX'IA, *Pseudorex'is*, from *ψευδης*, 'false,' and *ορεξις*, 'appetite.' False appetite.

PSEUDO-RHONCHUS, from *ψευδης*, 'false,' and *ρογχος*, 'rattle.' A sound heard during respiration, which appears to be produced, like the ordinary rhonchi, in the air-tubes, but is exterior to them—as in the case of *pleural pseudorhonchi.* See Rattle, and *Râle.*

PSEUDOS'MIA, *Pseudosphre'sia, Pseudosphre'sis*, from *ψευδης*, 'false,' and *οσμη*, 'smell.' False sense of smell.

PSEUDOPHRESIA, Pseudosmia.

PSEUDOSYPHILIS, Syphilis pseudosyphilis.

PSEUDOTHANATOS, Asphyxia.

PSEUDOVARIOLÆ, Varicella.

PSEUDYMEN, Membrane, false.

PSID'IUM POMIF'ERUM. The *Apple Guava, Guava, Guayava.* This plant and *P. Pyrif'erum* bear fruits; those of the former like apples, — of the latter like pears. The apple kind has an acid flavour, the other is sweet. Of the inner pulp of either, the natives of the Indies make jellies; and, of the outer rind, tarts, marmalades, &c. They are somewhat astringent; this quality, indeed, exists in every part of the tree, and abundantly in the leaf-buds, which are occasionally boiled with barley and liquorice as an excellent drink in diarrhœa. A simple decoction of the leaves is said to be useful in the itch, and most cutaneous eruptions.

PSILOSIS, Depilation.

PSILOTHRUM, Bryonia alba, Depilatory.

PSIMMYTHON, Plumbi subcarbonas.

PSOA, Dysodia.

PSOÆ, *Psoiæ, Psyæ, Lumbi*, 'the loins,' *Alop'eces, Nephrome'træ, Neurome'tres.* The psoæ muscles.

PSOAS MAGNUS, *Psoas* seu *lumba'ris inter'nus, Pré-lombo-trochantin, Pré-lombo-trochantinien* (Ch.), *Femur moven'tium sextus.* A muscle, seated on the lateral parts of the lumbar portion of the vertebral column; and passing down to the superior and anterior part of the thigh. It is long, fusiform, and attached, above, to the body and transverse processes of the first four lumbar vertebræ, and last dorsal. Below, it terminates, by a very thick tendon, common to it and the iliacus muscle, — which is inserted into the top of the lesser trochanter. This muscle bends the thigh upon the pelvis, and carries it in rotation outwards. It may, also, bend the pelvis on the thigh, and the loins on the pelvis. It acts considerably in station and progression.

Psoas Parvus, *Pré-lombo-pubien*, (Ch.) A muscle situate anteriorly to the last. It is long, thin, flat, and narrow; and is attached, above, to the body of the last dorsal vertebra, and below, to the linea ileo-pectinea, by means of a slender tendon, which furnishes two expansions — one to the *Iliac aponeurosis*, and the other to the *pelvis.* This muscle bends the vertebral column on the pelvis; and, reciprocally, the pelvis on the vertebral column.

PSODYMUS, Gastrodidymus.

PSOIÆ, Psoæ.

*PSOÎTE*, Psoitis.

PSOÏ'TIS, *Inflamma'tio mus'culi Psoas, Lumba'go inflammato'ria spasmod'ica.* (F.) *Psoïte, In-*

*flammation du muscle Psoas.* From ψοαι, 'the loins,' and *itis*, denoting inflammation. Inflammation of the psoas muscles and of the parts situate before the lumbar vertebræ: accompanied, from its commencement, by considerable fever, violent pains in the part affected and in the thigh of the same side, which remains commonly half bent. Psoitis may terminate by suppuration, and form lumbar abscess.

PSOLE, ψωλη, 'the male organ.' Also, the glans when uncovered.

PSOLON, Membrosus.

PSOLON'CUS, from ψωλη, and ογκος, 'a tumour.' Swelling of the glans, or of the penis generally.

PSOLUS, from ψωλη. One who has the glans uncovered. One who has been circumcised.

PSOPHOMETER, Stethoscope.

PSOPHOS, ψοφος, 'a noise.' A loud noise; a hollow sound.

PSORA, from ψαω, 'I touch, I feel.' *Sca'bies, Phlysis Scabies, Ecpye'sis Scabies, Scabiola, Itch, Scratch, Scotch fiddle,* (F.) *Gale, Mal Saint-Main, Rogne.* A contagious eruption of very minute pimples—pustular, vesicular, papular, intermixed, and alternating, itching intolerably and terminating in scabs. It seems to be connected with an insect of the genus *Acarus*;—the *Ac'arus* seu *Sarcop'tes* seu *Sarcop'tus* seu *Phthi'rium* seu *Cheyle'tus Scabiei, Ac'arus Ciro, Itch-insect,* (F.) *Ciron.* The itch occupies, particularly, the spaces between the fingers, the back of the hands, wrists, elbows, axillæ, groins, hams, &c., and rarely affects the face. The best applications, for its cure, are,—the *Unguentum Sulphuris* or *Ung. Sulph. comp.* night and morning; but the unpleasant smell of the sulphur has given occasion to the use of other means;—as the *White Hellebore, Potass in deliquescence, Muriate of Ammonia, Sulphuric Acid,* &c. The repugnance to the smell of sulphur ought not, however, to be regarded; especially as, in the course of four or five days, it will, in almost all cases, produce a perfect cure.

PSORA AGRIA, Psoriasis inveterata—p. Leprosa, Psoriasis—p. Squamosa, Psoriasis.

PSORA'LEA GLANDULO'SA, *Alvaquil'la. Family,* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. A shrub, used in Chili as a vulnerary.

PSORA'LEA PENTAPHYL'LA, *Psora'lia, Contrayer'va nova, Mex'ican Contrayer'va.* The root is little, if at all, inferior to the contrayerva in its medical properties; which, by the by, are unimportant.

PSORALIA, Psoralea pentaphylla.

PSORENTERIA, Cholera.

PSORI'ASIS, formerly, the state of being affected with ψωρα. *Lepido'sis psori'asis, Serpe'do, Serpi'go, Impeti'go* (of some), *Sca'bies sic'ca, S. feri'na, Psora lepro'sa, P. squamo'sa, Scaly Tetter, Dry Scale, Dry Scall,* (F.) *Dartre squameuse lichenoïde, D. écailleuse, Gratelle, Gale miliare, G. canine* ou *sèche.* A cutaneous affection, consisting of patches of rough, armorphous scales; continuous, or of indeterminate outline; skin often chappy. Psoriasis occurs under a considerable variety of forms. The surface, under the scales, is more tender and irritable than in lepra, which psoriasis, in some respects, resembles. Dr. Willan has given names to eleven varieties of psoriasis: the chief of which are the *Psoriasis gutta'ta, P. diffu'sa* (one form of which is the *Baker's Itch* and *Grocer's Itch,* and another, the *Washerwoman's Scall*), the *P. gyro'ta,* and *P. invetera'ta* seu *Psora a'gria.* The treatment of psoriasis must be antiphlogistic, with the internal use of the fixed alkalies, sulphur, &c. The irritable kinds do better without any local application. The more local and less inflammatory are ameliorated by emollient and soothing applications; or by slightly stimulating means, seabathing, the *Ung. hydrarg. nitrico-oxyd., Ung. oxidi zinci,* &c.

PSO'RICUS. That which has the nature of itch. A medicine for curing the itch.

PSOROPHTHALMIA, Ophthalmia tarsi—p. Neonatorum, see Ophthalmia (purulenta infantum).

PSYÆ, Psoæ.

PSYCHAGOGA, Psychagogica.

PSYCHAGO'GICA, *Psychago'ga,* from ψυχη, 'life,' 'soul,' and αγω, 'I lead.' Medicines which resuscitate, when life seems extinct; as in syncope and apoplexy.

PSYCHE, Anima.

PSYCHIATRI'A, from ψυχη, 'mind,' and ιατρεια, 'healing.' Treatment of diseases of the mind.

PSY'CHICAL, *Psy'chicus,* from ψυχη, 'mind.' That which relates to the mind or mental endowments. *Psychological* is not unfrequently used with the like signification.

PSYCHOLOGICAL, see Psychical.

PSYCHOL'OGY, *Psycholog''ia,* from ψυχη, 'mind,' and λογος, 'discourse.' A treatise on the intellectual and moral faculties. Also, the intellectual and moral faculties or sphere.

PSYCHONOSOL'OGY, *Psychonosolog''ia,* from ψυχη, 'mind,' νοσος, 'disease,' and λογος, 'a description.' The doctrine of, or a treatise on, diseases of the mind.

PSYCHOPATHIES, Psychoses.

PSYCHOR'AGES, *Agoni'zans, Moribun'dus, Mor'ibund,* from ψυχη, 'mind,' and ραγη, 'rupture.' Dying. *In Articulo Mortis. Moribund* means, also, one who is dying.

PSYCHORAGIA, Agony, Death.

PSYCHORRHAGIA, Agony, Death.

PSYCHOS, Cold.

PSYCHO'SES, from ψυχη, 'mind.' Neuroses of the intellect. Diseases of the mind. *Psychop'athies.*

PSYCHOTICA, Analeptica.

PSYCHOTRIA, Analeptica—p. Emetica, Ipecacuanha.

PSYCHOTROPHUM, Betonica officinalis.

PSYCHROLU'SIA, *Psycholu'tron,* from ψυχρος, 'cold,' and λουω, 'I wash.' A cold bath.

PSYCHROPHOB'IA, from ψυχρος, 'cold,' and φοβος, 'fear.' Dread of cold, especially of cold water. Impressibility to cold.

PSYCHTICA, Refrigerants.

PSYDRA'CIA, *quasi,* ψυκρα 'υδρακια, 'cold drops.' The ancients sometimes used this term for *pimples*; at others, for *vesicles.* Willan and Bateman define *Psydracium* to be, a small pustule, often irregularly circumscribed, producing but a slight elevation of the cuticle, and terminating in a laminated scab. Many of the psydracia usually appear together, and become confluent; and, after the discharge of pus, they pour out a thin, watery humour; which frequently forms an irregular incrustation. Frank limits the term to a psoriform eruption, which differs from itch in not originating from an insect, and is not contagious;—perhaps the lichen. Authors have differed regarding its acceptation.

PSYDRACIA ACNE, Acne.

PSYLLIUM, Plantago psyllium—p. Erectum, Plantago psyllium.

PTARMICA, Achillea ptarmica—p. Montana, Arnica montana.

PTARMICUM, Errhine, Sternutatory.

PTARMOS, Sneezing.

PTELEA, Ulmus.

PTERIS, Polypodium filix mas.

Pteris Aquili'na, *'Eagles' Wings,'* so called from its leaves. *Pter'ia, Thelyp'teris, Filix Nymphæ'a* seu *fe'mina, Asple'nium aquili'num, Common Brake* or *Female Fern; Eagle Fern, Bracken,* (F.) *Fougère femelle, La grande Fougère. Nat. Ord.* Filices. The root is considered to be anthelmintic; and as efficacious as that of the male fern in cases of tapeworm.

Pteris Palustris, Asplenium filix fœmina.

PTERNA, Calcaneum.

PTERNIUM, Calcaneum.

PTERNOBATES, Calcigradus.

PTEROCARPUS ERINACEA, see Kino—p. Marsupium, see Kino—p. Sandalinus, P. Santalinus.

Pterocar'pus Santali'nus, *P. Sandali'nus, San'talum* seu *San'dalum Rubrum, Red Sanders* or *Saunders Tree,* (F.) *Santal rouge. Family,* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. Red Saunders wood, *San'talum* (Ph. U. S.,) *Lignum sandali'num* is used only as a colouring matter: it gives to rectified spirit a fine deep red. The juice of this tree, like that of *P. Draco,* affords a species of *Dragon's Blood.*

PTEROS'PORA ANDROMEDEA, *Scaly Dragon claw, Dragon root, Fever root, Albany beechdrop.* An indigenous plant, *Nat. Ord.* Monotropeæ, *Sex. Syst.* Decandria Monogynia:—found in the state of New York, which blossoms in July. The root has been regarded as an anthelmintic, diuretic, emmenagogue, &c.: but it is not used.

PTERYG'ION, *Pterygʻium, Ala,* from πτερυξ, 'a wing.' A small wing. *Onyx, Pyo'sis, Unguis,* (F.) *Drapeau, Onglet.* A varicose excrescence of the conjunctiva, of a triangular shape, and commonly occurring at the inner angle of the eye; whence it extends over the cornea. Sometimes two or three pterygia occur on the same eye, and cover the whole cornea with a thick veil, which totally prevents vision. According to Scarpa, the ancients gave the name *Pannic'ulus* to this last complication. If the pterygion cannot be dispelled by means of discutient collyria, it must be removed by the scissors.

PTERYGIUM, Pterygion, Scapula—p. Digiti, Paronychia—p. Lardaceum, Pinguecula—p. Pingue, Pinguecula.

PTERYGO-ANGULI-MAXILLAIRE, Pterygoideus internus—*p. Colli-maxillaire,* Pterygoideus externus—*p. Maxillaire, grand,* Pterygoideus internus—*p. Maxillaire, petit,* Pterygoideus externus—p. Palatine canal, Pterygoid canal—p. Pharyngeus, Constrictor pharyngis—p. Staphylinus, Circumflexus.

PTER'YGO-PAL'ATINE, *Pterygo-Palati'nus.* That which belongs to the pterygoid process and palate.

Pterygo-Palatine Artery or *Superior pharyngeal* is a very small artery, and is given off by the internal maxillary at the bottom of the zygomatic fossa: after having passed through the pterygo-palatine canal, it is distributed to the superior part of the pharynx, the sphenoid bone, and the Eustachian tube.

Pterygo-Palatine Canal. A small canal, formed by the internal ala of the pterygoid process, and the palate bone. It gives passage to the vessels of the same name.

PTERYGO-STAPHYLINUS INTERNUS, Levator palati—*p. Syndesmo-staphyli-pharyngien,* Constrictor pharyngis.

PTERYGODES, Alatus.

PTER'YGOID, *Pterygoï'des, Pterygoïdeus, Alifor'mis;* from πτερυξ, 'a wing,' and ειδος, 'form.' A name given to two *processes* at the inferior surface of the sphenoid bone; the two laminæ which form them having been compared to wings. These *alæ* or *wings* or *processes,*—*Proces'sus aliform'es,*—have been distinguished, according to their position, into *internal* and *external.*

Pterygoid Artery, *Vid'ian Artery, Ram'ulus Ductûs Pterygoïdei, Arte'ria pharyngæ'a supre'ma,* arises from the internal maxillary artery, at the bottom of the zygomatic fossa, and enters the pterygoid canal with the nerve of the same name, to proceed to be distributed on the Eustachian tube and velum palati. The name, *pterygoid arteries,* is likewise given to the branches, which the internal maxillary and some of its divisions, as the meningea media, and posterior temporalis profunda, furnish to the pterygoid muscles, behind the neck of the lower jaw.

Pterygoid Bone, Sphenoid.

Pterygoid Canal, *Vid'ian canal, Ductus pterygoïdeus, Cana'lis Vidia'nus,* (F.) *Conduit ptérygoïdien* ou *Vidien, Pterygo-palatine canal,* is a narrow channel, which traverses, in a direction from before to behind, the base of the pterygoid process, and gives passage to the pterygoid nerve. The *foramina* of the sphenoid, which terminate the canals, have the same epithets applied to them.

Pterygoid Fossa, *Fossa Pterygoïdea,* (F.) *Fosse ptérygoïdienne* ou *ptérygoïde,* is the depression which separates the two laminæ or alæ of the pterygoid process.

Pterygoid Mus'cles, *Ala'res mus'culi, Aliform'es mus'culi,* are two in number. 1. The *Pterygoideus externus, P. minor,* (F.) *Ptérygocolli-maxillaire, Petit Ptérygo-maxillaire* (Ch.) *Petit ptérygoïdien, Ptérygoïdien externe,* is a thick, short muscle, which arises, by short aponeuroses, from the outer surface of the external ala of the pterygoid process, and from the outer surface of the great ala of the sphenoid bone; and is inserted at the anterior part of the neck of the lower jaw-bone, and the corresponding part of the inter-articular fibro-cartilage. This muscle draws the condyle of the lower jaw and the inter-articular ligament forwards. It carries the chin forwards, and to the opposite side. If the two external pterygoids act together, the jaw is carried directly forwards. 2. The *Pterygoïdeus internus, P. major, Masse'ter intern'us, Latens in Orē,* (F.) *Grand Ptérygo-maxillaire, Ptérygoangŭli-maxillaire, Grand Ptérygoïdien* ou *Ptérygoïdien interne.* A thick, quadrilateral muscle, which is attached by short and very strong aponeuroses; above, to the pterygoid fossa, whence it proceeds downwards, backwards, and outwards, to be inserted into the inner surface of the ramus of the lower jaw, near its angle. This muscle raises the lower jaw, and carries it a little forwards. It also performs the grinding motion.

Pterygoid Nerves. These are two in number. I. The *Pterygoid* or *Vid'ian Nerve.* It arises from the posterior part of the sphenopalatine ganglion; traverses the Vidian canal of the sphenoid; and, beyond, divides into two filaments. 1. A *superior* or *cranial, Nervus superficia'lis* sive *petro'sus,* which ascends into the cranium, and enters the hiatus of Fallopius to unite with the facial nerve. 2. An *inferior* or *carotid, Nervus profundus* sive *major,* which traverses the carotid canal, and unites with the ascending branches of the superior cervical ganglion of the trisplanchnic. II. The *Pterygoid Nerve,* properly so called, *Nervus musculi pterygoïdei,* is given off by the inferior maxillary branch of the 5th pair.

*PTERYGOÏDIEN GRAND* ou *INTERNE*, Pterygoideus internus—*p. Externe*, Pterygoideus externus—*p. Petit*, Pterygoideus externus.

PTERYGO'MA. Same etymon. A wing; a projecting or pendulous body. A swelling of the vulva, which prevents coition.—M. A. Severinus.

PTERYX, Ala.

PTILOSIS, Deplumatio, Madarosis.

PTISANA, Tisane—p. Communis, Decoctum hordei compositum—p. Hippocratica, Decoctum hordei.

PTISSANA, Tisane.

PTOCHIA'TER, *Ptochia'trus*, same etymon as the next. A physician to the poor, or to an establishment for the poor.

PTOCHIATRI'A, from πτωχος, 'poor,' and ιατρεια, 'healing.' Practice amongst the poor. Also, an institution for the treatment of the diseases of the poor.

PTOCHOCOMI'UM, from πτωχος, 'a poor person,' and κομεω, 'I take care of;' *Ptochodochi'um*, *Ptochotrophe'um*. An almshouse.

PTOCHODOCHIUM, Ptochocomium.

PTOCHOTROPHEUM, Ptochocominm.

PTOMA, Cadaver.

PTOSIS, Prolapsus—p. Bulbi oculi, Exophthalmia.

Ptosis Ir'idis, *Iridoce'lē*, *Her'nia Ir'idis*, *Iridopto'sis*, *Prolap'sus Iridis*, from πτωσις, 'a falling.' A prolapsus of the iris through a wound of the cornea. It is known by a blackish tubercle, which projects a little from the cornea in various forms.

Ptosis Palpebræ, Blepharoptosis.

PTYALAGOGUE, Sialogogue.

PTYALIN, see Saliva.

PTYALISM, Salivation.

*PTYALISME MERCURIEL*, Salivation, mercurial.

PTYALISMUS, Salivation—p. Acutus mellitus, see Salivation—p. Acutus sympatheticus, see Salivation—p. Hydrargyratus, Salivation, mercurial—p. Iners, Slavering—p. Mercurialis, Salivation, mercurial—p. Pyrosicus, Pyrosis.

PTYALOGOGUE, Sialogogue.

PTYALON, Saliva.

PTYASMAGOGUE, Expectorant, Sialogogue.

PTYELON, Saliva, Sputum.

PTYSIS, Exspuition.

PTYSMA, Saliva.

PTYSMAGOGUE, Sialogogue.

PTYSMATIS'CHESIS, *Ptysmatos'chesis*, from πτυσμα, 'sputum,' and ισχειν, 'to retain.' Suppression of pulmonary expectoration.

PTYSMATOSCHESIS, Ptysmatischesis.

*PUANTEUR*, Dysodia.

PUBENS, Ephebus.

PUBER, Ephebus.

PU'BERAL; same etymon as Puberty. Relating or appertaining to the age of puberty—as 'a *puberal* disease.'

*PUBÈRE*, Ephebus.

PUBERTAS, Ephebia.

PU'BERTY, *Pubertas*, *Hebē*, *Pubes*, *Aphrodis'ia*, *Ephebi'a*, *Ephe'bia*, *Ephe'botes*, *Ephebo'synē*, *Pubes'cence*, from *pubescere*, 'to begin to have hair on the chin and sexual organs.' The period of life at which young people of both sexes are *pubes'cent* or nubile. According to the civil law, puberty occurs at 12 years in females, and 14 in males. The period varies somewhat in different climates, and in different individuals of the same climate.

PUBES, *Epis'chion*, *Epicten'ion*, *Cteis*, *Pecten*; the *Pubic region*. Same etymon. The middle part of the hypogastric region; so called, because it is covered with hair, in both sexes, at the period of puberty. The hair is also called *Pubes*, *Lanu'go* seu *Pili*, *Pudendo'rum Planta'rium*; and, of old, *pubertas* signified the same.

Pubes, Puberty.

PUBESCENCE, Puberty.

PUBESCENT, see Puberty.

PUBIÆUS, Pubic.

PUBIC, *Pu'bian*, *Pu'bicus*, *Pubiæ'us*, (F.) *Pubien*. That which belongs to or concerns the pubis.

Pubic Arch or *Arch of the Pubis*, (F.) *Arcade pubienne*. The arch at the anterior part of the inferior circumference of the pelvis. It is more expanded in the female than in the male; to correspond with the additional functions which she has to execute.

Pubic Articula'tion, or *Sym'physis Pubis*, results from the junction of the ossa pubis. The medium of union is cartilage.

Pubic Lig'aments are two very solid, fibrous fasciæ, situate before and beneath the symphysis pubis, which they strengthen. The one is called the *anterior pubic ligament*; the other the *inferior* or *subpubic*.

Pubic Region, *Re'gio Pubis*. The region of the pubes.

*PUBIEN*, Pubic.

*PUBIO-COCCYGIEN-ANNULAIRE*, *Pubio-coccyge'us annula'ris*. Dumas gave this name to the levator ani and ischio-coccygeus, which he considers a single muscle.

*PUBIO-COCCYGIEN-ANNULAIRE*, Levator Ani—*p. Fémoral*, Pectinalis—p. Femoralis, Adductor longus femoris—*p. Ombilical*, Pyramidalis abdominis—p. Prostaticus, Compressor prostatæ—*p. Sous-ombilical*, Pyramidalis abdominis—*p. Sternal*, Rectus abdominis—p. Urethral, see Compressor Urethræ.

PUBIS, OS, *Episei'on*, *Episi'on*, *Epis'chion*, *Share Bone*, *Bar-bone*, *Os Pec'tinis*. The anterior part of the os innominatum; so called because it corresponds to the genital organs and pubic region. The *angle of the pubis* is formed by the union of the body and rami of each side.

PUB'LICÆ PARTES. Those organs are so called, the object of whose functions is the nutrition of all the others. Such are the digestive and respiratory organs.

PUCCOON, Sanguinaria Canadensis—p. Red, Sanguinaria Canadensis—p. Yellow, Hydrastis Canadensis.

*PUCE*, Pulex irritans—*p. Maligne*, see Anthrax—*p. Pénétrante*, *Chique*.

*PUCELAGE*, Virginity.

*PUCELLE*, Virgin.

PUDDING-GRASS, Mentha pulegium.

PUDENDA, Genital organs.

Pudenda Virorum, Pudibilia.

PUDEND'AGRA. A hybrid word; from *pudenda*, (*pudere*, 'to be ashamed,') 'the genital organs,' and the Greek αγρα, 'a seizure.' According to some, this term means pain in the genital parts: *Dolor pudendo'rum*, *Men'tulagra*, *Ædœodyn'ia*; according to others, it is synonymous with syphilis.

Pudendagra Pruriens, Prurigo pudendi muliebris.

PUDEN'DAL HER'NIA. Hernia, which descends between the vagina and ramus ischii, and forms an oblong tumour in the labium; traceable in the pelvis, as far as the os uteri.

PUDENDALIS LONGUS INFERIOR, see Sciatic nerve, lesser.

PUDENDUM, FEMALE, Vulva—p. Muliebre, Vulva.

PUDENDUS, Pudic.

PUDIBIL'IA; from *pudere*, 'to be ashamed.

The male genital organs; *Genita'lia Viri, Viril'ia, Pensil'ia, Instrumen'ta, Puden'da viro'rum, Pon'dus.*

PUDIC, *Pudi'cus, Puden'dus,* (F.) *Honteux.* Same etymon. That which causes shame. A name given to the genital organs as well as to different other parts.

PUDIC ARTERIES are distributed to the organs of generation. They are,—1. The *internal Pudic, Arteria Pudi'ca, A. puden'da commu'nis,* (F.) *Artère honteuse interne, A. Sous-pubienne* (Ch.), *Gen'ital Ar'tery.* It is furnished by the hypogastric, and divides into two branches; the one—the *inferior* or *perineal*—which gives off the inferior hemorrhoidal and the artery of the septum; and the other—the *superior,* (F.) *Ischiopénienne*—which furnishes the transverse perineal artery, and divides into two branches; the *artery of the corpus cavernosum,* and the *dorsalis penis,* This latter, in the female, has the name *Dorsa'lis Clitor'idis.* 2. The *external Pudic Arteries,* (F.) *Artères scrotales* ou *vulvaires* (Ch.), *A. honteuses externes,* which are two in number. The one is *superficial* or *subcutaneous,* and the other *deep-seated* or *subaponeurotic.* They are given off from the femoral artery, or some one of its branches; and are distributed to the external parts of generation.

PUDIC NERVE, (F.) *Nerf honteux, Nerf ischiopénien* ou *Ischio-clitorien* (Ch.), is a branch furnished by the sacral plexus, which is distributed to the genital organs; and especially, to the penis in man, and the clitoris in the female.

PU'ERILE, *Pueri'lis,* from *puer,* 'a child,' (F.) *Respiration puérile, R. exagérée, R. supplémentaire, R. hypervésiculaire.* A term applied to the respiration when it is heard loud through the stethoscope, as in healthy children.

PUERILITAS, Dementia of the aged.

PUERITIA, see Age.

PUER'PERA, from *puer,* 'a child,' and *parere,* 'to bring forth.' *Tokas, Lochos, Enix'a, Lecho,* a *lying-in woman,* (F.) *Femme en Couche, Accouchée.* A female in child-bed. One recently delivered.

PUER'PERAL, *Puerpera'lis;* from *puerpera.* Relating to parturition and its consequences.

PUERPERAL CONVULSIONS, Eclampsia gravidarum et parturientium.

PUER'PERAL FEVER. Any fever occurring during the puerperal state—*Febris puerpera'rum, Lechop'yra, Lochiocœlii'tis, Lochiop'yra, Childbed fever.* Most commonly restricted to a malignant variety of peritonitis.

PUERPERIUM, Child-bed state.

PUERPEROUS, Parturient.

PUFF, VEILED, see Cavernous respiration.

PUFF-BALL, Lycoperdon, Leontodon taraxacum.

PUF'FINESS, from (D.) poffen, 'to blow:' *Infla'tio, Suffla'tio; Tumefac'tio mollis,* (F.) *Bouffissure, Boursouflure.* A soft intumescence, without redness, which may be partial or general, and be produced by accumulation of serous fluid, extravasation of blood, effusion of air into the subcutaneous areolar tissue, &c. Puffiness is most frequently seen in the face and legs; and sometimes appears around a wound.

PUGIL'LUS, *Drax, Dra'chion,* from *pugnus,* 'the fist.' *Dragma, Dragmis,* (F.) *Pincée.* The quantity of any substance, which may be taken with the end of two or three fingers. The eighth part of a handful.

*PUISSANCE DU MOULE INTÉRIEUR,* Plastic force.

PUKE, Emetic.

PUKEWEED, Lobelia inflata.

PUKING, Vomiting, Regurgitation.

PULEGIUM, Mentha pulegium—p. Cervinum, Mentha cervina.

PULEX IRRI'TANS. The *common flea,* (F.) *Puce.* A parasitic insect found on the bodies of man and animals.

PULEX PENETRANS, *Chique.*

PULICARIA DYSENTERICA, Inula dysenterica.

PULICA'RIS, *Pulicula'ris,* from *pulex,* 'a gnat.' An epithet given to cutaneous eruptions resembling gnat-bites;—and, also, to diseases in which such eruptions occur.

PULICARIS HERBA, Plantago psyllium.

PÜLLNA, MINERAL WATERS OF. These Bohemian springs contain sulphates of soda and magnesia, and chloride of magnesium.

PULMO, *Pulmo'nes,* by transposition of the letter *l* from *pleumon, πλευμων; Pneumon, Pleumon, Spiramen'tum an'imæ, Ergaste'rion spir'itûs, Flabell'um et ventila'brum cordis,* the *Lung.* The essential organ of respiration, which is double, and occupies the two sides of the chest. The lungs, which are of a spongy, soft, flexible, compressible, and dilatable structure, fill exactly the two cavities of the thorax, and are separated from each other by the mediastinum and the heart. The right lung, which is shorter and broader than the left, is divided, by two oblique fissures, into three unequal lobes, *Lobi* seu *Alæ pulmo'num.* The left has only two lobes, and consequently only one fissure. At the internal surface of those organs, which is slightly concave, there is, about the middle, a pedicle, formed by the bronchia and pulmonary vessels, and called, by anatomists, the *root of the lungs,* (F.) *Racine des Poumons.* Essentially, the lungs are composed of prolongations and ramifications of the bronchia, and of the pulmonary arteries and veins,—the divisions of which are supported by a fine, areolar tissue.

When the surface of the lungs is examined in a clear light, we may see, even through the pleura, that their parenchyma is formed by the aggregation of a multitude of small vesicles, of an irregularly spheroid or ovoid shape, full of air, and separated by white and opake septa. These vesicles are called *Air-cells, Spiramen'ta* seu *Spiram'ina* seu *Cell'ulæ Pulmo'num.* Along the partitions or septa is deposited, in greater or less quantity, *black pulmonary matter,* (F.) *Matière pulmonaire noire,* as it has been called, which seems to be natural. Sometimes it is seen in points; at others, in spots. The colour of the lungs varies according to age and other circumstances. In youth, it is more red; and afterwards, grayish or bluish; often, as if marbled. The pleura pulmonalis is their investing membrane. The air is carried to the lungs by means of the trachea and bronchia. The black venous blood, which requires oxygenation, is conveyed to them from the heart, by the pulmonary artery; and when it has undergone this change, it is returned to the heart by the pulmonary veins. The blood-vessels inservient to the nutrition of the lungs are the *bronchial* arteries and veins. The pulmonary lymphatics are very numerous. Some are superficial; others, deep-seated. They pass, for the most part, into the *bronchial ganglions* or *glands.* The nerves are furnished by the pulmonary plexus.

*PULMONAIRE DES FRANÇAIS,* Hieracium murorum.

PULMONA'RIA, *P. officina'lis, P. Macu'lata, P. Maculo'sa, Lungwort, Spotted Lungwort, Jeru'salem Cowslip, Jerusalem Sage, Spotted Comfrey,* (F.) *Sauge de Jerusalem. Family,* Boragineæ. *Sex. Syst.* Pentandria Monogynia. The leaves of this plant have been used as demulcents and pectorals; partly from their resemblance to lungs,

and, partly, because they have a slightly mucilaginous taste. The plant is not worthy of notice.

Pulmonaria, Pneumonia—p. Arborea, Lichen pulmonarius—p. Gallica, Hieracium murorum—p. Officinalis, Pulmonaria.

PUL'MONARY, *Pulmona'rie, Pulmona'lis.* That which relates or belongs to the lungs. A name given to various parts.

Pulmonary Artery, *Arte'ria pulmona'ris, Vena arterio'sa,* arises from the upper and left part of the right ventricle of the heart; whence it passes obliquely upwards and to the left side; dividing into two trunks, opposite the second dorsal vertebra—one passing to each lung. At its origin, it is furnished with three sigmoid or semilunar valves. It carries the blood to the lungs for aeration.

Pulmonary Matter, Black, see Pulmo.

Pulmonary Plexus, *Plexus pulmona'ris.* A considerable nervous network, situate behind the bronchia, which is formed by the filaments of the pneumogastric nerve or par vagum, and by other filaments from the inferior cervical ganglion and the first thoracic ganglia. This plexus forms a kind of areolar web, with numerous meshes of different sizes, in which vessels are lodged, surrounded by much areolar tissue. This plexus sends filaments to the bronchia, which they accompany to their extremities.

Pulmonary Veins, *Venæ pulmona'res, Arteriæ veno'sæ.* These arise in the lungs from the final terminations of the arteries of the same name; collect in ramusculi and rami of greater and greater size, and ultimately unite in four trunks; two of which issue from each lung to open into the left auricle of the heart. The pulmonary veins have the same structure as the other veins of the body; from which they differ, in containing arterial blood, as the pulmonary artery differs from the others in conveying venous blood. They carry the blood back to the heart after aeration.

PULMONES TARTARIZATI, Lithiasis pulmonum.

PULMONIA, Phthisis pulmonalis, Pneumonia.

PULMON'IC, *Pulmon'icus, Pneumon'icus, Pulmona'rius, Pneumon'ic.* One affected with phthisis—one labouring under diseases of the lungs. Any thing relating or belonging to the lungs. A medicine for the lungs.

PULP, *Pulpa, Pulpa'men, Sarx.* The soft and parenchymatous parts of vegetables reduced to a paste by the operation of pulping.

Pulp of the Tooth, Dental pulp.

PULPA CASSIÆ, see Cassia fistula—p. Dentis, Dental pulp—p. Pruni, see Pruni pulpa—p. Prunorum sylvestrium condita, Conserva pruni sylvestris—p. Tamarindi, see Tamarindi pulpa.

Pulpa Testis, *Paren'chyma testis.* The parenchyma of the testis.

PULPAMEN, Pulp.

*PULPE DENTAIRE,* Dental pulp.

PULPEZIA, Apoplexy.

PULPING, *Pulpa'tion, Pulpa'tio.* An operation—the object of which is to reduce certain vegetable substances to a pulp. For this purpose, they are bruised in a mortar, and then passed through a hair sieve, by the aid of a wooden spatula, called a *Pulper,* (F.) *Pulpoire.*

*PULPOIRE,* see Pulping.

PULQUE, see Agave Americana.

PULS EX OVIS et LACTE, Oogala.

PULSATILLA NIGRICANS, Anemone pratensis—p. Pratensis, Anemone pratensis—p. Vulgaris, Anemone pulsatilla.

*PULSATILLE NOIRE,* Anemone pratensis—*p. des Prés,* Anemone pratensis.

PULSATIO, Pulsation—p. Cordis, Palpitation.

PULSA'TION, *Pulsa'tio, Sphygmos, Sphyxis, Pede'sis, Pedeth'mos,* (F.) *Battement.* The beating of the heart and arteries. Also, the beating felt in an inflamed part.

PULSATIVUS, Throbbing.

PULSATORY, Throbbing.

PULSE, from *pulso,* 'I beat;' *Pulsus, Pulsa'tio, Pulsus cordis et arteria'rum, Ictus cordis et arteria'rum, Incur'sus arteria'rum, Sphygmos, Sphygma, Diasphyx'is,* (F.) *Pouls.* Beating of the arteries, produced by the afflux of the blood propelled by the heart in its contractions. For the sake of convenience, we choose the radial artery at the wrist to detect the precise character of the pulse. These characters relate to the number of pulsations in a given time; to their degrees of quickness; hardness and strength; to the equality or inequality either of the pulsations themselves or of their intervals; to the development or fulness of the artery, and to the different impressions it may produce on the finger.

The following estimates have been made of the pulse at various ages:

| *Ages.* | *Number of Beats per minute, according to* | | |
|---|---|---|---|
| | Heberden. | Sömmering. | Müller. |
| In the embryo | ..... | ..... | 150 |
| At birth | 130 to 140 | ..... | Do. |
| One month | 120 | | |
| One year | 120 to 108 | 120 | 115 to 130 |
| Two years | 108 to 90 | 110 | 100 to 115 |
| Three years | 90 to 80 | 90 | 90 to 100 |
| Seven years | 72 | ..... | 85 to 90 |
| Twelve years | 70 | | |
| Puberty | ..... | 80 | 80 to 85 |
| Adult age | ..... | 70 | 70 to 75 |
| Old age | ..... | 60 | 50 to 65 |

It does not appear that the pulse of the aged is less frequent, but the contrary. In general it is more frequent in females and in irritable persons, than in males and those of an opposite temperament. In the healthy state, the pulse, besides having the proper number of pulsations, is neither hard nor unusually soft; it is moderately developed; of a medium strength; and perfectly equal, both as regards the pulsations and their intervals In diseases it wanders, more or less, from these physiological conditions. The different characters of the pulse that have been recorded, are remarkably numerous. In a dictionary, it is necessary to detail them, although many of them are not now regarded, and some are ridiculous.

Pulse, Ardent, *Pulsus ardens,* (F.) *Pouls ardent, Pouls élevé.* One which seems to raise itself to a point in order to strike the finger.

Pulse, Cap'rizant, *Pulsus Capri'zans, P. ter-*

*cadis'sans, P. gazell'ans, P. fusa'lis, Goatleap pulse,* (F.) *Pouls caprisant.* One which seems to leap, as it were; an imperfect dilatation of the artery being succeeded by a fuller and a stronger one.

Pulse, Complex, (F.) *Pouls combiné* ou *composé, P. compliqué.* A pulse which has the character of several critical pulses united.

Pulse, Contract'ed, (F.) *Pouls serré, P. concentré.* One whose pulsations are narrow, deep, and slightly hard.

Pulse, Convul'sive, *Pulsus convulsi'vus,* (F.) *Pouls convulsif.* That which is unequally frequent or unequally hard; in short, which resembles the irregular pulsations of a muscular fibre in a state of convulsion.

Pulse, Crit'ical, *Pulsus crit'icus.* A pulse which, after having possessed the characters of irritation, becomes free, open, soft, &c.

Pulse, Decurtate, Pulsus myurus: see, also, Myurus.

Pulse, Deep, *Pulsus profun'dus,* (F.) *Pouls profond.* One which cannot be felt without difficulty, and without strong pressure by the finger.

Pulse, Defic''ient, *Pulsus defic''iens, P. Flickering, Pulsus an'nuens et circum'nuens,* (F.) *Pouls défaillant, P. insensible.* One which seems, every instant, about to cease.

Pulse, Depressed, *Pulsus depressus,* (F.) *Pouls déprimé.* That which is deep and weak.

Pulse, Devel'oped, (F.) *Pouls développé.* That which is broad, full, strong, and frequent.

Pulse, Dicrot'ic, *Pulsus Di'crotus, P. bi'crotus, P. intestina'lis, P. bife'riens, P. mallea'ris, P. intervi'sus,* (F.) *P. dicrote, P. rebondissant, P. redoublé.* That in which the finger is struck twice at each pulsation; once lightly, the other time more strongly.

Pulse, Equal, *Pulsus æqua'lis.* That in which the pulsations resemble each other, and return at equal intervals.

Pulse, Febrile, *Pulsus febri'lis.* One very frequent.

Pulse, Feeble, Weak, *Pulsus deb'ilis,* (F.) *Pouls faible.* One which strikes the finger feebly.

Pulse, Fil'iform, *P. thready.* One which resembles a thread slightly vibrating.

Pulse, Flickering, Pulse, deficient.

Pulse, Form'icant, *Pulsus formi'cans,* (F.) *Pouls formicant.* One which resembles, by being small and scarcely perceptible, the motion of an ant.

Pulse, Frequent, (F.) *P. agité, P. précipité.* One which strikes more frequently than usual in a given time.

Pulse, Full, *Pulsus plenus,* (F.) *Pouls plein.* One which gives the notion of great repletion in the vessel.

Pulse, Goat-leap, P. Caprizant.

Pulse, Gut'tural, *Pulsus guttura'lis,* (F.) *Pouls guttural.* A pulse which has been supposed to indicate the termination of affections of the throat.

Pulse, Hard, *Pulsus durus,* (F.) *Pouls dur.* That in which the pulp of the finger seems to yield to the pulsation.

Pulse, Hectic, *Pulsus hec'ticus.* The weak, frequent pulse observed in hectic fever.

Pulse, Hemorrhoid'al, (F.) *Pouls des Hémorrhoïdes.* A critical pulse, announcing the appearance of the hemorrhoidal flux. It is described as unequal; — the pulsations not being alike in force, and still less the intervals.

Pulse, Hepat'ic, (F.) *Pouls du Foie.* A pulse imagined to indicate affections of the liver. It is not worthy of description.

Pulse, Inferior, (F.) *Pouls inférieur, P. abdominal, P. ventral.* One supposed to announce evacuations below the diaphragm.

Pulse, Intercur'rent, *Pulsus intercur'rens* seu *inter'cidens.* One in which a superfluous pulsation seems to occur from time to time.

Pulse, Intermittent, (F.) *Pouls intercadent.* One in which the pulsations fail from time to time.

Pulse, Intes'tinal, (F.) *Pouls des intestins, P. de la diarrhée.* A critical pulse, presumed to announce an evacuation by the intestines.

Pulse, In'tricate, *Pulsus intrica'tus,* (F.) *Pouls embarrassée.* That which is but little developed and unequally slow.

Pulse, Irreg'ular, *Pulsus anorma'lis.* One whose pulsations are unequal, and return at unequal intervals.

Pulse of Irrita'tion, *Pulsus ab irritatio'nē* seu *nervi'nus* seu *acrit'icus.* One which is frequent, hard, and contracted.

Pulse, Jarring, P. vibrating — p. Jerking, Pulse, sharp.

Pulse, Languid, (F.) *Pouls languissant.* A slow and feeble pulse.

Pulse, Large, *Pulsus crassus, P. magnus,* (F.) *Pouls grand, P. large.* That which is large and full.

Pulse, Long. One which strikes the finger to a great extent in length.

Pulse, Low, *Pulsus hu'milis,* (F.) *Pouls bas.* One in which the pulsations are scarcely perceptible.

Pulse, Nasal, (F.) *Pouls nasal, P. capital, P. du Nez.* One supposed to announce the end of an irritation in the nasal fossæ.

Pulse, Nat'ural, (F.) *Pouls naturel des adultes, P. parfait, P. des adultes, P. modéré.* One that is equal and regular in strength and frequency; compressible, and devoid of hardness.

Pulse, Organic, (F.) *Pouls organique.* One which indicates the affected organ, or the organ by which an evacuation will take place.

Pulse, Pec'toral, (F.) *Pouls de l'expectoration.* A critical pulse, announcing the termination of some pulmonary irritation.

Pulse, Quick. One which strikes sharply, but not forcibly, against the finger.

Pulse, Reg'ular, *Pulsus norma'lis* aut *regula'ris.* One whose pulsations are equal, and succeed each other at equal intervals.

Pulse, Resist'ing, (F.) *Pouls résistant.* One a little tense, a little hard.

Pulse, Sharp, (F.) *Pouls prompt, P. vite, P. vif.* One which strikes the finger sharply, rapidly. When to a greater extent, it is called a *jerking pulse.*

Pulse, Sharp-tailed, Pulsus myurus: see Myurus.

Pulse, Simple, *Pulsus simplex.* A critical pulse, indicating an evacuation by one organ only.

Pulse, Slow, *Pulsus tardus, P. rarus,* (F.) *Pouls lent, P. tardif, P. rare.* One which strikes the finger slowly.

Pulse, Small, *Pulsus parvus,* (F.) *Pouls petit.* One whose pulsations are slender and weak.

Pulse, Soft, *Pulsus mollis,* (F.) *Pouls mou.* One which yields under the finger.

Pulse, Stom'achal, (F.) *Pouls stomacal, P. de l'estomac.* One supposed to announce an evacuation by the stomach.

Pulse, Strong, *Pulsus fortis,* (F.) *Pouls fort, P. véhément.* One which strikes the finger strongly.

Pulse, Supe'rior, *Pulsus Superior,* (F.) *Pouls supérieur.* A critical pulse, supervening on irritation of organs situate above the diaphragm.

Pulse, Supple, *Pulsus elas'ticus,* (F.) *Pouls souple.* One in which the pulsations have strength without hardness.

Pulse of Sweat, *Pulsus Sudora'lis,* (F.) *Pouls*

*Sudoral, P. de la sueur.* A critical pulse, indicating an approaching perspiration.

Pulse, Tense, *P. Cordy, Pulsus tensus,* (F.) *Pouls tendu, P. roide.* One in which the artery resembles a cord fixed at its two extremities. When resembling a wire, it is called *wiry.*

Pulse, Thready, P. filiform.

Pulse, Trem'ulous, *Pulsus trem'ulus,* (F.) *Pouls tremblant, P. palpitant.* One in which each pulsation oscillates.

Pulse, Un'dulating, *Pulsus fluctuo'sus, P. fluens, P. in'cidens Sola'ni,* (F.) *Pouls ondulant, P. ondoyant.* One which resembles, in its movements, those of the waves.

Pulse, Une'qual, *Pulsus inæqua'lis,* (F.) *Pouls inégal.* One whose pulsations are not alike, or return at unequal intervals.

Pulse, U'rinal, *Pulsus urina'lis,* (F.) *Pouls de l'Urine.* A critical pulse, fancied to denote an approaching evacuation of urine.

Pulse, U'terine, *Pulsus uteri'nus,* (F.) *Pouls Utérine, P. de la Matrice, P. des Règles.* One which indicates the flow of the menses, or the occurrence of metrorrhagia.

Pulse, Venous, Pulsus venarum.

Pulse, Vermic'ular. That which imitates the movement of a worm.

Pulse, Vi'brating, *Jarring Pulse.* One in which the artery seems to vibrate like a musical string.

Pulse, Wiry, see Pulse, tense.

PULSELESS, *Asphyc'tos,* Devoid of pulsation.

PULSELESSNESS, Asphyxia.

PULSIF'IC, *Pulsif'icus;* from *pulsus,* 'pulse.' That which causes or excites pulsation.

PULSILE'GIUM, *Pulsilo'gium, Pulsim'eter,* from *pulsus,* 'the pulse,' and *lego,* 'I tell.' *Sphygmom'eter, Sphygmoscop'ium.* Any instrument for measuring the quickness or force of the pulse.

PULSIMANTI'A; from *pulsus* and μαντεια, 'divination.' The art of predicting or prognosticating by the pulse.

PULSIMETER, Pulsilegium.

PULSUS, Pulse—p. Acriticus, Pulse of irritation—p. Æqualis, Pulse, equal—p. Annuens et circumnuens, Pulse, deficient—p. Anormalis, Pulse, irregular—p. Bicrotus, Pulse, dicrotic—p. Biferiens, P. dicrotus—p. Caprizans, Pulse, caprizant—p. Crassus, Pulse, large—p. Debilis, Pulse, feeble—p. Deficiens, Pulse, deficient—p. Dicrotus, Pulse, dicrotic—p. Dorcadissans, Pulse, caprizant—p. Durus, Pulse, hard—p. Elasticus, Pulse, supple—p. Fluctuosus, Pulse, undulating—p. Fluens, Pulse, undulating—p. Formicans, Formicaut, and Pulse, formicant—p. Fortis, Pulse, strong—p. Fusalis, Pulse, caprizant—p. Gazellans, Pulse, caprizant—p. Heterochronicus, see Heterochronicus—p. Humilis, Pulse, Low—p. Incidens Solani, Pulse, undulating—p. Intercidens, Pulse, intercurrent—p. Mallearis, Pulse, dicrotic—p. Intercisus, Pulse, dicrotic—p. Intercurrens, Pulse, intercurrent—p. Intestinalis, Pulse, dicrotic—p. Intricatus, Pulse, intricate—p. Magnus, Pulse, large—p. Mollis, Pulse, soft.

Pulsus Myu'rus, *Pulse, decurtate; P. sharp-tailed,* (F.) *Pouls myure.* One which goes on diminishing. See Myurus.

Pulsus Nervinus, Pulse of irritation—p. Normalis, Pulse, regular—p. Parvus, Pulse, small—p. Plenus, Pulse, full—p. Rarus, Pulse, slow.

Pul'sus Serri'nus, (F.) *Pouls serrin, P. serratile.* One which strikes, sometimes strongly, at others feebly, and recalls the idea of a saw.

Pulsus Striatus, (F.) *Pouls étroit.* One that strikes the finger to a small extent in breadth.

Pulsus Sudoralis, Pulse of sweat—p. Tardus, Pulse, slow—p. Urinalis, Pulse, urinal—p. Uterinus, Pulse, uterine.

Pulsus Vac'uus, (F.) *Pouls vide.* One which gives the idea of emptiness of the artery.

Pulsus Vena'rum, *Venous Pulse, Phlebopa'lia.* A pulsation occasionally noticed in the jugular veins. It is owing to some of the blood of the right ventricle reflowing into the right auricle, and communicating an impulse to the venous blood arriving in the auricle through the descending cava. It is often a sign of impediment to the flow of blood along the pulmonary artery.

PULTATIO, Atheroma.

PULTICE, Cataplasm.

PULTICULA, *Bouillie.*

PULVERES EFFERVESCENTES, Powders, soda.

PULVERI'ZABLE, *Pul'verable.* Capable of being reduced to powder.

PULVERIZA'TION, *Pulverisa'tio, Pulvera'tio,* (F.) *Pulvérisation,* from *pulvis,* 'dust;' *Coniosto'sis.* The operation of dividing substances, so as to reduce them to powder.

Most drugs are reduced to powder by persons who make it a special business, and who are called *drug-grinders.* This is done on a large scale in *drug mills;* and the implements used are the *grinding mill* and the *stamping mill.* In the shop of the apothecary, pulverization is effected by the pestle and mortar, and the sieve.

Where substances require the addition of other bodies to facilitate their reduction to powder,—as where camphor needs a few drops of alcohol—the process is called *pulverization by mediation.*

PULVILLUS, Pad, *Bourdonnet*—p. e Linamentis confectus, *Bourdonnet*—p. Rotundus, *Bourdonnet.*

PULVI'NAR, *Pulvina'rium.* A pillow.

Pulvinar Humuli, see Humulus lupulus.

Pulvinar Medica'tum seu Medicina'lē, *Sac'culus medicina'lis.* A medicated pillow; as of hops.

Pulvinar Parvum, Pad—p. Ventriculi, Pancreas.

PULVINULUS, Pad.

PULVIS, *Conis,* (F.) *Poudre.* A substance, reduced into small particles by pulverization. *Simple powders* are those of a single substance; *compound,* those which result from a mixture of several different powders. An *impalpable powder* is one which is so fine that it can scarcely be felt under the finger. A compound powder was, formerly, called *Spe'cies,* (F.) *Espèce.*

Pulvis Absorbens, P. de magnesiâ compos.—p. Adspersorius, Catapasma—p. Alexiterius, P. contrayervæ comp.—p. Alexiterius, P. ipecacuanhæ compositus—p. Algarothi, Algaroth.

Pulvis Aloes Compos'itus, *Compound powder of Aloes, Pulvis Aloës cum Guai'aco, P. aloët'icus cum Guaiaco.* (*Aloës spicat. ext.* ℥iss, *guaiac. gum. res.* ℥j, *pulv. cinnam. comp.* ℥ss. Rub the aloes and guaiacum separately, then mix the whole. *Ph. L.*) Cathartic, stomachic, and sudorific. Dose, gr. x to ℈j.

Pulvis Aloes cum Canel'la, *Pulvis aloës et canellæ,* (Ph. U. S.,) *Powder of Aloes with Canella, Species Hi'eræ picræ, Hiera picra, Pulvis Aloët'icus.* (*Aloës* ℔j. *canell.* ℥iij. Rub separately into a powder, and mix. Ph. U. S.) A warm cathartic. Dose, gr. x. to ℈j.

Pulvis Aloes cum Guaiaco, P. A. compositus—p. Aloeticus, P. aloes cum canellâ—p. Aloeticus, Hiera picra—p. Aluminosus, P. sulphatis aluminæ compositus—p. Aluminis compositus, P. sulphatis aluminæ compositus—p. Aluminis kinosatus, see P. sulphatis aluminæ compositus.

Pulvis de Ama'ris Compos'itus, *Pulvis antiarthrit'icus ama'rus,* (F.) *Poudre antiarthritique*

*amère.* (*Rad. gentian., aristoloch. rotund.*, āā p. 3, *flor. centaur. min.* p. 4, *fol. chamædr., chamæpith.* manipul. — f. pulvis, *Ph. P.*) In gouty affections, dyspepsia, &c. Dose, gr. xx.

Pulvis Angelicus, Algaroth — p. Anodynus, P. ipecacuanhæ comp. — p. Antiacidus, P. cretæ compositus — p. Antiacidus, P. de magnesiâ compos. — p. Antiarthriticus amarus, P. de amaris compositus—p. Antiarthriticus purgans, P. de sennâ, scammoneâ et lignis—p. Antiasthmaticus, P. de sulphure et scillâ.

Pulvis Antilys'sus, *Mead's Powder against the bite of a mad dog.* It consisted of *ash-coloured liverwort* in powder, with an equal quantity of *black pepper;* a drachm and a half of the two forming a dose for an adult.

Pulvis Antimonialis, Antimonial powder.

Pulvis de Aro Compos'itus, *Compound Powder of Arum,* (F.) *Poudre de Birckmann,* (*Rad. ari, acori veri, pimpinell. saxifrag.* āā 40 p. *ocul. cancror. ppt.* 12 p., *cinnam.* 7 p., *potassæ sulph.* 6 p., *ammoniæ muriat.* 2 p. — f. pulv. *Ph. P.*) Sternutatory.

Pulvis Aromaticus, P. cinnamomi compositus.

Pulvis As'ari Compos'itus, *P. sternutato'rius, P. errhi'nus, P. capita'lis Sancti Au'geli, P. cephal'icus, Cephalic snuff; Compound powder of Asarabac'ca,* (F.) *Poudre d'asarum composée* dite *sternutatoire, P. de Saint-Ange.* (*Folior. asar. Europ.* p. tres., *fol. origan. majoranæ, flor. lavand. spic., sing.* p. 1. Rub into powder. *Ph. L.*) Sternutatory.

Pulvis Auri, see Gold—p. e. Bolo compositus cum opio, P. cretæ compositus cum opio — p. e. Bolo compositus sine opio, see P. cretæ compositus—p. Cambogiæ compositus, P. e. gummi guttâ —p. Capitalis Sancti Angeli, Pulvis asari compositus—p. Carbonatis calcis compositus, P. cretæ compositus—p. Cardiacus, P. contrayervæ comp. —p. Carthusianorum, Antimonii sulphuretum rubrum—p. Catharticus, P. scammoneæ comp.—p. Cephalicus, P. asari compositus.

Pulvis Cinnamo'mi Compos'itus, *Compound Powder of Cin'namon, Pulvis* seu *Spe'cies Imperato'ris, P. vitæ Imperato'ris, P. Diaro'maton, Species diacinnamo'mi, S. lætifican'tes Rhazis, Tra'gea aromat'ica, Species Diam'bræ sine odora'tis, Species aromat'icæ, Pulvis aromaticus* (Ph. U. S.), *Aromatic powder,* (F.) *Poudre de canelle composée* ou *aromatique.* (*Cinnam., zingib.* āā ℥ij, *cardam., myrist.* āā ℥j. Rub to a fine powder. Ph. U. S.) Stimulant and carminative. Dose, gr. x to ℈j.

Pulvis Cobbii seu Tunquinen'sis. The famous Tonquin powder, introduced into England by a Mr. Cobb. It was composed of 16 grains of *musk,* and 48 grains of *cinnabar;* and was mixed in a gill of *arrack.* It was formerly regarded as a specific in hydrophobia.

Pulvis Comitis Warwicensis, P. Cornachini — p. Comitissæ, Cinchona.

Pulvis Contrayer'væ Compos'itus, *Lapis contrayervæ, Contrayerva balls, Compound Powder of Contrayer'va, Pulvis cardi'acus, P. alexi'te'rius, P. Mantua'nus.* (*Contrayerv. rad.* contrit. ℥v, *test. præp.* ℔iss. Mix. *Ph. L.*) Stimulant and sudorific. Dose, gr. xv to ℥ss.

Pulvis Cornachi'ni, *Diaceltates'son Paracelsi, Earl of Warwick's Powder, Pulvis Ox'ydi Stib'ii compos'itus, Pulvis Com'itis Warwicen'sis, Pulvis de Tribus, Cer'berus Triceps, Pulvis Scammo'nii antimonia'lis,*(F.) *Poudre Cornachine.* (*Scammon. Alep., potass. supertart., antim. diaph.* āā p. æ. f. pulvis. *Ph. P.*) Cathartic. Used chiefly in cutaneous diseases. Dose, ℥ss to ℥j.

Pulvis Cornu Usti Cum O'pio, *Pulvis opia'tus, Powder of Burnt Hartshorn with opium,* (F.) *Poudre de corne brulée avec l'opium.* (*Opii duri* cont. ℥j, *corn. ust. præp.* ℥j, *coccot.* cont. ℥j. Mix. *Ph. L.*) Ten grains contain one of opium. Anodyne.

Pulvis Cretaceus, P. cretæ compositus.

Pulvis Cretæ Compos'itus, *P. Carbona'tis Calcis compositus, Compound Powder of chalk, P. creta'ceus, Spe'cies e Scordio sine opio, Diascor'dium, Pulvis antac''idus, P. terres'tris, Species Diacre'tæ,* (with Bole Armeniac in place of chalk — the *Pulvis e Bolo compositus sine opio,*) (F.) *Poudre de craie composée.* (*Cretæ ppt.* ℔ss, *cinnam. cort.* ℥iv, *tormentill. rad., acaciæ gum.,* sing ℥iij, *pip. long. fruct.* ℥iv. Reduce separately to a fine powder, and mix. *Ph. L.*) Antacid, stomachic, absorbent. Dose, gr. xx to ℈ij.

Pulvis Cretæ Compos'itus cum O'pio, *Compound Powder of Chalk with opium, Pulvis e Cretâ compositus cum opio* (with Bole Armeniac instead of chalk—*Pulvis e Bolo compositus cum opio,*) *Species e Scordio cum opio,* (F.) *Poudre de craie composée avec l'opium.* (*Pulv. cret. c.* ℥vjss, *opii duri* cont. ℈iv. Mix. *Ph. L.*) Contains one grain of opium in 40. Anodyne and absorbent. Dose, ℈j to ℈ij.

Pulvis Diaphoreticus, P. ipecacuanhæ comp. —p. Diapnoicus, P. ipecacuanhæ comp.—p. Diaromaton, P. cinnamomi compositus — p. Diasenæ P. sennæ compos.—p. Diaturpethi compositus, P. jalapæ compositus.

Pulvis Ducis Portlan'diæ, *Duke of Portland's Gout Powder.* (*Rad. aristoloch., gentianæ, summit. chamædr., centaur. min.* āā p. æ.) Dose, ℥ss to ℥j.

Pulvis Emmenagogus, P. myrrhæ compositus — p. Epilepticus Marchionum, P. de magnesiâ compositus — p. Errhinus, P. asari compositus — p. Galactopœus, P. de magnesiâ compos.

Pulvis e Gummi Guttâ, *P. Cambo'giæ compositus, P. hydrago'gus, Camboge Powder,* (F.) *Poudre hydragogue* ou *de gomme gutte, P. de Quercita'nus.* (*Rad. jalap.* 24 p., *rad. mechoacan.* 12 p., *cinnam., rhei.* āā 8 p., *gum. cambog.* 3. p., *fol. soldanellæ* sicc. 6 p., *semin. anisi* 12 p., fiat pulvis. *Ph. P.*) A drastic cathartic. In anasarca and in worms. Dose, gr. xv to xxx.

Pulvis Gummo'sus Alkali'nus, *Sapo vegeta'bilis,* (F.) *Poudre de savon végétal.* (*Guaiac. pulv.* 32. p., *potass. carb.* 4 p. Make into a powder. *Ph. P.*) Antacid.

Pulvis ex Helminthocort'o Compos'itus, *P. vermif'ugus absque mercu'rio,* (F.) *Poudre vermifuge sans mercure.* (*Fuc. helminthocort., sem. contra., summitat. absinth., tanaceti, fol. scordii, sennæ, rhei.* āā p. æ, fiat pulvis. *Ph. P.*) Dose, ℈j to ℥j.

Pulvis Hydragogus, P. e gummi guttâ—p. Hydrargyri cinereus, see Hydrargyri oxydum cinereum — p. Hypnoticus, Hydrargyri sulphuretum nigrum — p. Imperatoris, P. cinnamomi compositus—p. Incisivus, P. de sulphure et scillâ —p. Pro infantibus, P. de magnesiâ compos.—p. Infantum, P. de magnesiâ compos.—p. Infantum antacidus, P. de magnesiâ compositus.

Pulvis Ipecacuan'hæ Compos'itus, *P. alexite'rius, P. anod'ynus, P. diaphoret'icus, P. diapno'icus, P. sudorif'icus Dove'ri, Compound powder of Ipecacuanha, P. Ipecacuanhæ et Opii* (Ph. U. S.), *Dover's Powder,* (F.) *Poudre de Dover* ou *d'ipecacuanha et d'opium, P. de Dower.* (*Ipecacuanh. pulv., opii pulv.,* sing ℥j, *potassæ sulphat.* ℥j. Mix.) Diaphoretic. Dose, gr. v to gr. xij.

Pulvis Ipecacuanhæ et Opii, P. ipecacuanhæ compos.

Pulvis Jalap'æ Compos'itus, *P. Diaturpe'thi compositus, Compound powder of Jalap, Pulvis laxans, P. Purgans, P. laxati'vus vegetab'ilis, P. laxans cum salē, P. Jalap'æ sali'nus, P. j. tartar'icus, Spe'cies Diajalapæ,* (F.) *Poudre de jalap*

*composée.* (*Pulv. jalap.* ℥j, *potass. bitart.* ℥ij. Mix.) Cathartic. Dose, ℈j to ʒij.

Pulvis Jalapæ Salinus, P. jalapæ compositus—p. Jalapæ tartaricus, P. jalapæ compositus—p. de Jalapâ et scammonio compositus, P. scammoneæ comp.—p. Jamesii, Antimonial powder—p. Jesuiticus, Cinchona—p. Joannis de Vigo, Hydrargyri nitrico-oxydum.

Pulvis Kino Compos'itus, *Compound Powder of kino,* (F.) *Poudre de kino composée.* (*Kino* ʒxv, *cort. cinnam.* ʒiv, *opii duri* ʒj. Rub each to powder, and mix. *Ph. L.*) Astringent. Dose, gr. v to xx.

Pulvis Laxans, P. jalapæ compositus—p. Laxans cum sale, P. jalapæ compositus—p. Laxativus vegetabilis, P. jalapæ compositus.

Pulvis de Magne'siâ Compos'itus, *P. Galactopœ'us, P. Nutri'cum, P. Infan'tum, P. Infantum antae''idus, P. pro Infan'tibus, P. antiac''idus, P. absor'bens, P. epilep'ticus Marchio'num, Compound powder of Magne'sia,* (F.) *Poudre absorbante et anti-acide.* (*Magnesiæ, sacchar.* āā p. æ. Mix. *Ph. P.*)

Pulvis Mantuanus, P. contrayervæ comp.—p. Marchionis, Marchionis Pulvis—p. Mercurialis cinereus, Hydrargyri oxidum cinereum—p. ad Mucum pulmonalem liberius ciendum, P. de sulphure et scillâ.

Pulvis Myrrhæ Compos'itus, *P. e Myrrhâ compositus, Compound Myrrh Powder, Pulvis ad ul'cera tend'inum, P. Emmenago'gus,* (F.) *Poudre Balsamique.* (*Myrrhæ, sabinæ, rutæ, castor. Russ.* āā ʒj.) A stimulant, antispasmodic, and emmenagogue. Dose, gr. xv to xl.

Pulvis Nutricum, P. de magnesiâ compositus—p. Opiatus, P. cornu usti cum opio—p. Oxydi stibii compositus, P. cornachini—p. Parturiens, Ergot—p. de Phosphate calcis et stibii compositus, Antimonial powder—p. Principis, Hydrargyri nitrico-oxydum—p. Purgans, P. jalapæ compositus—p. Quercetanus, Hydrargyri submurias.

Pulvis Quercûs Mari'næ, *Powder of Yellow Bladder-Wrack.* (The wrack in fruit, dried, cleaned, exposed to a red heat in a crucible, with a perforated lid, and then reduced to powder. *Ph. D.*) Virtues dependent on iodine: used, consequently, in bronchocele, &c. Dose, gr. x to xl. See Fucus vesiculosus.

Pulvis Scammo'neæ Compos'itus, *Compound Powder of Scammony, Pulvis e Scammonio compositus, Pulvis Scammonii, Pulvis de Jalapâ et Scammo'nio compositus dictus Cathar'ticus,* (F.) *Poudre cathartique* ou *Poudre de Scammonée composée.* (*Scammon., ext. jalap. dur.,* sing., ʒij, *zingib. rad.* ℥ss. Rub separately to powder and mix. *Ph. L.*) Cathartic. Dose, gr. viij to gr. xv.

Pulvis Scammo'nii cum Aloë, *P. e Scammonio cum Aloë, Scammony and Aloes Powder.* (*Scammon.* ʒvj, *ext. jalap. dur., aloës Socotr.* āā ʒiss, *zing.* ʒss.) Cathartic. Dose, gr. x to xv.

Pulvis Scammonii Antimonialis, P. cornachini.

Pulvis Sennæ Compos'itus, *Compound powder of Senna, Pulvis e Sená compositus, P. e Sennâ compositus, Pulvis Diase'næ,* (F.) *Poudre de séné composée.* (*Sennæ folior., potass. supertart.* sing. ʒij, *scammon.* ʒss, *rad. zingib.* ʒij. *Ph. L.*) Cathartic, hydragogue. Dose, ℈j to ʒj.

Pulvis de Sennâ, Scammo'nio et Lignis Compos'itus *dictus* Antiarthrit'icus Purgans, (F.) *Poudre de Pérard.* (*Gum Arab., potass. supertart., fol. sennæ, chinæ,* āā 4 p., *scammon., rad. sarsopar., chinæ, guaiac. lign.* āā 2 p., fiat pulvis. *Ph. P.*) Purgative. Used to obviate gout. Dose, ʒj.

Pulvis Stanni, see Tin—p. Sternutatorius, P. usari compositus—p. Stibiatus, Antimonial powder—p. Stypticus, P. Sulphatis aluminæ compositus—p. Sudorificus, P. ipecacuanhæ comp.—p. Sudorificus Doveri, P. Ipecacuanhæ compositus.

Pulvis Sulpha'tis Alu'minæ Compos'itus, *P. alumino'sus, P. alu'minis kinosa'tus, Pulvis styp'ticus, Pulvis aluminis compositus, Alu'men kinosa'tum, Compound Alum Powder,* (F.) *Poudre styptique* ou *d'alun composée.* (*Sulphatis aluminæ,* p. iv, *kino,* p. i. *Ph. E.*) Astringent. In intestinal hemorrhage and diarrhœa. Dose, gr. x to xv.

Pulvis de Sul'phurĕ et Scillâ, *P. Antiasthmat'icus, P. Incisi'vus, P. ad mucum pulmona'lem libe'rius cien'dum,* (F.) *Poudre incisive* ou *anti-asthmatique.* (*Sacchar. alb.* p. 3, *sulphur. lot.* p. 2, *scillæ.* siccat. p. j. *Ph. P.*) Dose, gr. v to ℥ss.

Pulvis de Sulpha'tē Potas'sæ Compos'itus, *P. tem'perans Stahl'ii,* (F.) *Poudre tempérante de Stahl.* (*Potass. sulph., P. nitrat.* āā 9 p., *hydrarg. sulph. rubr.* 2 p. Mix. *Ph. P.*) As an antiphlogistic, and in acidity of the first passages. Dose, ℈j to ℈ij.

Pulvis e Sulphure'to Hydrar'gyri Nigro et Scammo'nio, *dictus* Vermif'ugus Mercuria'lis, (F.) *Poudre vermifuge mercurielle.* (*Pulv. cornachin., hydrarg. sulphuret. nigr.* recent. præp., āā p. æ. Mix. *Ph. P.*) Dose, ℈j to ℥ss.

Pulvis Sympatheticus, Sympathetic powder—p. Temperans Stahlii, P. de sulphate potassæ compositus—p. Terrestris, P. cretæ compositus.

Pulvis Tragacan'thæ Compos'itus, *Species Diatragacan'thæ frig''idæ, Pulvis e Tragacan'thâ compositus, Compound Powder of Tragacanth,* (F.) *Poudre de gomme adragant composée.* (*Tragacanth.* contus., *acaciæ gummi* cont., *amyli,* sing. ℥iss, *sacch. purif.* ʒiij. *Ph. L.*) Demulcent. In coughs, &c. Dose, ℥ss to ʒiij.

Pulvis de Tribus, P. cornachini—p. Tunquinensis, P. Cobbii—p. ad Ulcera tendinum, P. myrrhæ compositus—p. Vermifugus absque mercurio, Pulvis ex helminthocorto comp.—p. Vermifugus mercurialis, P. e sulphureto hydrargyri nigro et scammonio—p. Vitæ Imperatoris, P. cinnamomi compositus.

PUMEX, *Lapis pu'micis, Pumice,* (F.) *Pierre Ponce.* This was formerly employed as a desiccative and dentifrice.

PUMICE, Pumex.

PUMILIO, Nanus.

PUMILUS, see Nanus.

PUMP, BREAST, Antlia lactea—p. Stomach, Antlia gastrica.

*PUNA, Veta, Sorocco, Soroche, Marco,* (S.) A sickness common in the elevated districts of South America and elsewhere, which attacks those unaccustomed to breathe the rarefied atmosphere. It strongly resembles sea-sickness, with a most acute and depressing throbbing in the head. It does not often affect the respiration considerably.

*PUNAISE,* Cimex.

*PUNAISIE,* Ozæna.

PUNCH, *Rhi'zagra,* from *pungere,* 'to prick.' *Repulso'rium,* (F.) *Repoussoir.* A surgical instrument used for extracting the stumps of teeth. See Lever.

Also, an agreeable alcoholic drink, made of spirit, wine, sugar, lemon-juice, and water. Milk is sometimes substituted in part for the water: it then forms *Milk Punch.*

PUNCTA OSSIFICATIONIS, Ossification, points of.

PUNCTÆ MUCOSÆ, see Acne.

PUNCTICULA, Petechiæ.

PUNCTIO, Paracentesis, Puncture—p. Nervi, Neuronygme.

PUNCTUM, Stitch.

Punctum Au'reum, *Punc'tura aurea.* Formerly, when an intestinal hernia was reduced by an incision made through the integuments down to the upper part of the spermatic vessels, a golden wire was fixed and twisted, so as to prevent the descent of any thing down the tunica vaginalis. Hence the term.

Punctum Sa'liens, *P. sanguin'eum sa'liens, Glob'ulus sanguin'eus, Punctus ruber sa'liens.* The first moving *point* which makes its appearance after the fecundation of the germ. It has been generally, but erroneously, applied to the heart of the embryo.

PUNCTURA, Paracentesis — p. Aurea, Punctum aureum.

PUNCTURE, *Punctu'ra, Punc'tio, Cente'sis, Paracente'sis, Nyxis,* from *pungere,* 'to prick;' *Tresis Punctura,* (F.) *Piqure.* A wound made by a pointed instrument, as a sword, bayonet, needle, thorn, &c. A puncture is, generally, of trifling consequence; but, sometimes, it becomes important from the parts implicated, and the after consequences.

PUNCT'URING. Same etymon. *Compunc'tio, Paracente'sis,* (F.) *Ponction.* The operation of opening, by means of a trocar, lancet, &c., any natural or accidental cavity, with the view of evacuating any fluid, effused or accumulated therein. *Paracentesis* is a sort of puncturing.

PUNCTUS RUBER SALIENS, Punctum saliens.

PUNGENT, (F.) *Pongitif.* Pain is said to be pungent, when it seems as if a pointed instrument were forced into the suffering part.

PU'NICA GRANA'TUM. The *Pomegranate, Rhoa, Rhœa, Grana'tum, Malograna'tum,* (F.) *Grenadier: Family,* Myrtoideæ. *Sex. Syst.* Icosandria Monogynia. The rind of the fruit, called *Malicho'rium, Malacorium,* or *Malicorium;* and the flowers—called *Balaustine flowers*—are used in medicine. They have been employed both internally and externally as astringents. The seeds are called *Cocco'nes,* κοκκωνες. The portion, however, of the plant, that has attained most celebrity, is the bark of the root, *Grana'ti Radi'cis Cortex,* which appears to be very efficacious in tænia. It is given in decoction, (*Granat. rad. cort.* ℥ij; *Aquæ* Oij, boiled to Oiss.) Dose, f℥ij, every half hour. Three or four doses are usually sufficient to expel the worm.

The bark contains a peculiar matter called *Grenadin.*

PUNK, Boletus igniarius.

PUOGENIA, Pyogenia.

PUPIL, *Pupil'la, Pu'pula, Pupil'io, Vis'io, Opsis, Corē, Cora, Rhox, Fenes'tra* seu *Nigrum* seu *Fora'men Oc'uli, Prunel'la, Lumen; Glenē, Sight of the eye,* (F.) *Pupille, Prunelle.* The aperture of the iris, through which the rays of light pass that have to impress the image of an object on the retina. This aperture can be dilated or contracted so as to allow a greater or smaller quantity of luminous rays to penetrate. The pupil, in man, is round, and by it the anterior and posterior chambers of the eye communicate with each other. In the fœtus, during the first six months of gestation, it is closed by the pupillary membrane.

Pupil, Closure of the, Synezizis.

Pupil, Pinhole. A condition of the pupil in typhus, in which it is so contracted as to resemble a pinhole. It indicates a dangerous form of brain affection.

PUPILLÆ VELUM, Pupillary membrane.

PUPILLARIS HERBA, Lapsana.

PU'PILLARY, *Pupilla'ris.* That which belongs to the pupil.

Pupillary Membrane, *Membrana Pupilla'ris, Pupil'læ velum, Membra'na Wachendorfia'na.* The central aperture of the iris is closed, in the fœtus, during a certain period of gestation, by a very thin membrane. It disappears in the seventh month.

PUPPET ROOT, Veratrum viride.

PUPPIS OS, Frontal bone.

PUPULA, Pupil.

PU'PULÆ, *A'pices digito'rum.* The pulps or extremities of the fingers.

PURBLIND, Myopic.

PURBLINDNESS, Myopia.

PURGAMENT, Purgative.

PURGAMENTA, Excrement — p. Alba, Leucorrhœa—p. Infantis, Meconium — p. Puerperii, Lochia—p. Uteri, Lochia.

PURGANS MEDICAMENTUM, Cathartic.

PURGATIO, Catharsis — p. Alvi, Catharsis—p. Muliebris alba, Leucorrhœa — p. Puerperii, Lochia.

PURGATION, Catharsis.

PURGATIONES, Menses — p. Menstruæ, Menses.

*PURGATIONS,* Menses.

PUR'GATIVE, *Purgati'vus, Purgans, Mock'licus, Catoret'icus, Catoter'icus, Cathar'tic, Pur'gament, Purge,* (F.) *Purgatif,* from *purgare,* 'to cleanse. A medicine which operates more powerfully on the bowels than a laxative, stimulating the muscular coat, and exciting increased secretion from the mucous coat.

PURGE, Purgative—p. Root, Euphorbia corollata.

PURGING, Diarrhœa.

PURIF'ICANS, *Purif'icus,* from *purificare,* 'to make pure or clean.' Purifying: hence:—

Purificantia; Medicines that cleanse or purify the blood.

PURIFICUS, Purificans.

PU'RIFORM, *Puriform'is;* from *pus,* and *forma.* Having the appearance of pus.

PURL. A medicated malt liquor, in which wormwood and aromatics are infused.

PURO-HEPATITIS, see Hepatitis.

PURO-MUCOUS, *Puro-muco'sus,* from *pus, puris,* and *mucus.* Having the character or appearance of pus and mucus.

PURPLES, Purpura hæmorrhagica.

PUR'PURA, *Por'phyra,* 'a purple colour.' This word has been employed in many senses. It generally means, livid spots on the skin from extravasated blood, with languor and loss of muscular strength, pains in the limbs. — (*F.*) *Pourpre.*

In Purpura Simplex, *Porphyra simplex, Petechiæ sinē febrē, Pelio'sis, Phœnig'mus Petechia'lis, Profu'sio subcuta'nea, Pete'chial Scurvy,* the spots are numerous, but small and flea-bite-shaped; chiefly on the breast, arms, and legs; with paleness of countenance. At times, the affection is accompanied by severe pains in the extremities, constituting *Pelio'sis rheumat'ica.*

In Purpura Hæmorrhag''ica, *Porphyra hæmorrhagica, Stomac'ace universalis, Hæmorrhagia universa'lis, Petechiano'sis, Morbus maculo'sus hæmorrhag''icus Werlhof'ii, Pelio'sis hæmorrhag''ica, Scorbu'tus, Schorbu'tus, Hæmorrhœ'a petechia'lis, Hæmatospil'ia, Land Scurvy, Purples,* (F.) *Scorbut, S. de Terre, Maladie de Werlhof, Hémacelinose, Peliose hémorrhagique* — the spots are circular, and of different sizes; often in stripes or patches, irregularly scattered over the thighs, arms, and trunk; with occasional hæmorrhage from the mouth, nostrils, or viscera, and great debility and depression of spirits.

In Purpura Nau'tica, *Porphyra nautica, Scorbu'tus, Pechytyrbē, Gingibra'chium, Gingipe'-*

*dium, Scelotyr'bē, Stomac'acē, Scorbu'tus nau'ticus* or *Sea scurvy*, (F.) *Scorbut*, there are spots of different hues, intermixed with the livid, principally at the roots of the hair; the teeth are loose; the gums are spongy and bleeding; the breath is fetid, and the debility universal and extreme. This occurs chiefly at sea, after exposure to a moist, cold, foul atmosphere; with long use of one kind of food and of stagnant water.

All these varieties of purpura resemble each other considerably. In the first two, however, there seems, at times, to be some excitement, which has led to the employment of purgatives, and even of bleeding, with advantage. They are dependent upon a peculiar diathesis, which has been termed *Scorbu'tic Cachex'ia, Lues Scorbu'tica*, and *Cacochym'ia Scorbu'tica*. Generally speaking, the use of the mineral acids will be indicated; and, in sea scurvy, vegetable acids must be regarded as the best antiscorbutics. Nitre is, also, a good antiscorbutic, and in cases of great prostration it may be united with Peruvian bark or turpentine. Tamarinds and cream of tartar, made into drink, are also serviceable. But the great remedy is change from low to cheerful spirits; from filth to cleanliness; and from a cold and damp, to a temperate and dry climate, with change of food, and especially the use of green vegetables.

The general principles of management are the same in sea, as in land scurvy.

Purpura, Scarlatina—p. Alba benigna et maligna, Miliary fever—p. Maligna, Petechiæ — p. Miliaris, Miliary fever—p. Puerperarum, Miliary fever—p. Urticata, Urticaria.

PURPURIC URINE, see Porphyruria.

PURPURINE, see Porphyruria.

PURPURISSUM, Hydrargyri sulphuretum rubrum.

PURRING TREMOR, *Frémissement cataire.*

PURSE, Scrotum — p. Shepherd's, Thlaspi bursa.

PUR'SINESS, *Dyspnœ'a pinguedino'sa*, (F.) *Pousse.* Dyspnœa accompanied with oppressive fatness. The word is, also, applied to dyspnœa of every kind. One so affected is said to be *pursy* or *short-winded.*

PURSLAIN, Portulaca — p. Milk, Euphorbia corollata — p. Speedwell, Veronica peregrina — p. Water, Veronica beccabunga.

PURSY, see Pursiness.

PURULENCE, Pus, Suppuration.

PURULENCY, Pus, Suppuration.

PU'RULENT, *Purulen'tus, Em'pyos, Pyo'des, Py'icus.* That which has the character of pus or consists of pus; as *purulent matter, a purulent collection*, &c.

Purulent Deposit, Pus.

PURULENTIA, Suppuration.

PURVAIN, Verbena officinalis.

PUS, *Humor purulen'tus, Pyon, Pyono'ma, Matter, Pu'rulent depos'it, Pu'rulence, Pu'rulency.* A secretion from inflamed textures, and especially from the areolar membrane. It is, almost always, of the same nature, whatever may be the part it proceeds from. Pus of a good quality,—*laudable pus, Pus bonum* seu *laudab'ilē* seu *nutriti'vum* seu *verum.* (F.) *Pus louable,*—is of a yellowish-white colour, opake, inodorous, and of a creamy appearance. Heat, acids, and alcohol coagulate it. When analyzed by Schwilgué, it afforded albumen and water, a particular extractive substance, and a small quantity of soda, phosphate of lime, and other salts. Normal pus consists essentially of two distinct parts, *pus corpuscles* or *pus globules*, and a colourless, aqueous fluid, *liquor puris*, in which the corpuscles are suspended. A variety of the pus corpuscles is described by M. Lebert under the name *pyoid.*

Pus Bonum, see Pus — p. Corpuscles, see Pus — p. Corrosivum, Sanies — p. Globules, see Pus — p. Laudabile, see Pus — *p. Louable*, see Pus — p. Malignum, Ichor — p. Malignum, Sanies — p. Nutritivum, see Pus — p. Verum, see Pus.

PUSILLA'TUM, *Pusula'tum*, from *pusillus*, 'small.' A coarse powder.

PUSILLUS, Nanus.

PUSTULA, Pustule — p. Ardens, Eczema — p. Oris, Aphthæ—p. Gangrænosa, see Anthrax — p. Livida Esthoniæ, see Anthrax.

Pustulæ Siccæ, Lichen.

PUSTULAR, *Pustulous, Pustula'ris, Pustulo'sus.* Of or belonging to pustules. Affected with pustules.

PUSTULA'TION, *Pustula'tio*, from *pustula*, 'a pustule.' The formation of pustules.

PUSTULE, *Pus'tula*, from *pus. Ecpye'sis, Ecthy'ma, Benath, Bubē, Epanas'tasis.* An elevation of the cuticle, with an inflamed base, containing pus. Willan and Bateman reckon four varieties of pustules: *Phlyza'cium, Psydra'cium, Achor*, and *Favus.* The variolous pustule is often called, by the French, *Grain*; by us, *Pock.*

*PUSTULE MALIGNE*, see Anthrax.

PUSTULOUS, Pustular.

PUSULATUM, Pusillatum.

PUTIUM, Prepuce.

PUTREDO, Hospital Gangrene, Putrefaction.

PUTREFAC'TION, *Putrefac'tio, Putrescen'tia, Sepsis, Sap'rotes, Putrid fermenta'tion, Putrefact'ive fermentation*, from *putris, putre*, 'rotten,' and *facere*, 'to make.' A decomposition, experienced by animal substances, when deprived of life, and placed under particular circumstances. The presence of water is indispensable. The temperature most favourable to it, is from 60° to 90° of Fahrenheit. The most common products of putrefaction are, water, carbonic acid, acetic acid, ammonia, carburetted hydrogen, and a semi-putrid substance, which is volatilized, and has an infected odour. It has been supposed that something like putrefaction may occur in the living body, as in case of putrid fever. To this condition, Piorry has given the name *Typhohæ'mia*, conceiving it to be owing to alteration of the blood by putrid animal matters. *Putrefaction* signifies the state of becoming putrid: whilst *Putridity, Putre'do, Putrid'itas, Pu'tridness*, (F.) *Pourriture*, is the state of rottenness.

PUTRESCENT, Hyposaprus — p. Poison, see Poison.

PUTRESCENTIA, Putrefaction — p. Uteri gravidi, Hystero-malacia.

PUTRID, *Pu'tridus, Sapros*, (F.) *Putride*, from *putrere*, 'to rot.' An epithet for some affections, in which the matters excreted and the transpiration itself exhale a smell of putridity. It is particularly applied to typhus.

PUTRIDITAS, see Putrefaction.

PUTRIDITY, see Putrefaction.

PUTRILA'GO, *Putror*, (F.) *Putrilage.* Same etymon. The pultaceous matter or *slough*, which forms in certain gangrenous and other ulcers, and is thrown off.

PUTROR, Putrilage.

PUTZOCHILL, see Myroxylon Peruiferum.

PYÆ'MIA, Pyohæmia.

PYARTH'RUM, from πυον, 'pus,' and αρθρον, 'joint.' A suppurated joint.

PYCNAN'THEMUM INCA'NUM, *Common Mountain Mint, Wild Basil.* An indigenous plant of the mint *family* — Labiatæ — which flowers in August. It has the aromatic properties of the mints.

PYCNAN'THEMUM LINIFO'LIUM, *Virginia Thyme*, has like virtues.

PYCNICMASTICA, Incrassantia.

PYCNOSIS, Inspissatio.

PYCNOTICA, Incrassantia.

PYEC'CHYSIS, from πυον, 'pus,' and εκχυσις, 'effusion.' An effusion of pus.

PYELI'TIS, from πυελος, 'pelvis,' and *itis*, denoting inflammation. Inflammation of the pelvis and calices of the kidney.

PYELOMETER, Pelvimeter.

PYELONEPHRI'TIS, from πυελος, 'pelvis,' νεφρος, 'kidney,' and *itis*, denoting inflammation. Inflammation of the kidney, and of the pelvis and calices.

PYELOS, Pelvis.

PYEMESIS, Pyoemesis.

PYESIS, Suppuration.

PYETIA, Colostrum.

PYGE, Nates.

PYGMÆUS, Pygmy.

PYGME, Fist, Forearm.

*PYGMÉE*, Pygmy.

PYGMY, *Pigmy*, *Pygmæ'us*, (F.) *Pygmée*, from πυγμη, 'the fist; as big as the fist.' A dwarf. The Pygmæi were a fabulous nation of dwarfs in the extreme parts of India; or, according to others, in Ethiopia.

PYGODID'YMUS, *Did'ymus symphyoperinæ'us*, *Pygop'agus*, from πυγη, 'the nates,' and διδυμος, 'a twin.' A monstrosity, in which twins are united by the sacrum and coccyx.

PYGOPAGES, Pygodidymus.

PYICUS, Purulent.

PYLE, Porta.

PYLEMPHRAX'IS, from πυλη, '*porta*,' 'a gate,' and εμφραξις, 'obstruction.' Obstruction of the vena portæ.

PYLOR'IC, *Pylor'icus*. Same etymon as pylorus. That which relates to the pylorus. An epithet given to different parts.

PYLORIC ARTERY, *Arte'ria Corona'ria dextra*, (F.) *Petite artère gastrique droite*, arises from the hepatic, and is distributed to the pylorus and to the lesser curvature of the stomach, anastomosing, particularly, with the A. coronaria ventriculi and A. gastro-epiploïca dextra.

PYLORIC VEIN follows the same distribution as the artery.

PYLO'RUS, *Jan'itor*, *Portona'rium*, from πυλη, 'a gate,' and ουρος, 'a guardian.' *Os'tium ventric'uli duodena'le* seu *pylor'icum* seu *dextrum* seu *infe'rius*, *Orifi''ium dextrum* seu *inferius* seu *Egres'sus* seu *Os infe'rius* seu *An'nulus* seu *Sphincter ventri'culi*, *Ostia'rius*, *Hostia'rius*, (F.) *Pylore*. The lower or right orifice of the stomach—*Orifice intestinal* (Ch.)—is called *Pylorus*, because it closes the entrance into the intestinal canal, and is furnished with a circular, flattened, fibro-mucous ring, which occasions the total closure of the stomach during digestion in that organ. This ring has been called the *Valve of the Pylorus*, *Sphincter Pylo'ri*, *Pylo'rus propriè sic dictus*, (F.) *Valvule du pylore*. It is a fold of the mucous and muscular membranes of the stomach; and is the *Pyloric muscle* of some authors.

PYOBLENNICUS, Mucopurulent.

PYOBLENNORRHŒ'A, from πυον, 'pus,' βλεννα, 'mucus,' and ρεω, 'I flow.' A discharge of puriform mucus.

PYOCENO'SIS, from πυον, 'pus,' and κενωσις, 'evacuation.' Evacuation of pus.

PYOCHEZ'IA, *Diarrhœ'a purulen'ta*, from πυον, 'pus,' and χεζω, 'I go to stool.' Discharge of pus by stool. Purulent diarrhœa.

PYOCŒ'LIA, *Asci'tes purulen'tus*, from πυον, 'pus, and κοιλια, 'the belly.' Pus in the abdominal cavity.

PYOCYSTIS, Vomica.

PYODES, Purulent.

PYŒDE'MA, from πυον, 'pus,' and οιδημα, 'swelling.' Tumefaction of the surface owing to effusion of pus.

PYOËM'ESIS, *Pyem'esis*, *Vom'itus purulentus*, from πυον, 'pus,' and εμεσις, 'the act of vomiting.' Vomiting of pus.

PYOGENESIS, Pyogenia.

PYOGEN'IA, *Puogen'ia*, *Pyogen'esis*, *Pyopoë'sis*, from πυον, 'pus,' and γενεσις, 'generation.' Generation of pus. The theory or mechanism of the formation of pus. Some have believed that pus is formed by the arterial system, and is deposited, by way of excretion, in the inflamed parts; others, that it is formed by the destruction of solid parts. These opinions are, however, inadmissible; and pus is now regarded as mainly the product of a particular secretion in the diseased part.

PYOGENIA CORROSIVA, Ulceration—p. Simplex, Suppuration.

PYOGEN'IC, *Pyogen'icus*. Same etymon. Having relation to the formation of pus.

PYOHÆ'MIA, *Pyæ'mia*, from πυον, 'pus,' and 'αιμα, 'blood.' Alteration of the blood by pus.

PYOID CORPUSCLES or GLOBULES, see Pus.

PYOME'TRA, *P. purulen'ta*, from πυον, 'pus,' and μητρα, 'womb.' A collection of pus in the uterus.

PYOMETRA PURULENTA, Pyometra.

PYON, Pus.

*PYONÉPHRITE*, see Nephritis.

PYONOMA, Pus.

PYOÖTORRHŒA, Otirrhœa.

PYOPERICAR'DIA, *Pyopericar'dium*, from πυον, 'pus,' περι, 'about,' and καρδια, 'the heart.' A collection of pus in the pericardium.

PYOPHTHALMIA, Hypopyon—p. Neonatorum, see Ophthalmia (purulenta infantum).

*PYOPLEURITE*, Empyema.

PYOPOËSIS, Pyogenia.

PYOP'TYSIS, from πυον, 'pus,' and πτυω, 'I spit.' Spitting of pus.

PYORRHAG''IA, from πυον, 'pus,' and ραγη, 'violent rupture.' A sudden discharge of a large collection of matter.

PYORRHŒ'A, from πυον, 'pus,' and ρεω, 'I flow.' A discharge of pus.

PYORRHŒA ALVINA, Pyochezia—p. Aurium, Otirrhœa—p. Nasalis, Ozœna—p. Palpebræ, Blepharopyorrhœa—p. Urinalis, Pyuria—p. Viarum lacrymalium, Dacryopyorrhœa.

PYOSIS, Hypopyon, Pterygion, Suppuration—p. Pectoris, Empyema.

PYOTHORAX VERUS, Empyema.

*PYOTORRHÉE*, Otorrhœa.

PYOTURIA, Pyuria.

PYR, Fever.

PYRA, Anthrax—p. Crustumina, Crustuminatum—p. Crustumerina, Crustuminatum.

PYR'AMID, *Pyr'amis*, *Eminen'tia pyramidal'is tym'pani*, from πυρ, 'flame,' which has a conical appearance. (?) A small bony projection in the cavity of the tympanum, which is excavated, to lodge the muscle of the stapes. Also, the *Centre-pin* of the trephine. Also, a small, obtusely pointed eminence of the inferior vermiform process of the cerebellum.

PYRAMID, see Calumba—p. of Malacarne, Vermiform process, inferior.

*PYRAMIDAL DE L'ABDOMEN*, Pyramidalis abdominis—*p. de la Cuisse*, Pyramidalis—*p. du Nez*, Pyramidalis nasi—*p. Stapédien*, Stapedius.

PYRAMIDALE, (OS,) Cuneiform, (bone.)

PYRAMIDA'LIS ABDOM'INIS, *Mus'culus Fallo'pii* vel *succenturia'tus* vel *auxilia'rius*, (F.) *Pubio-ombilical*, *Pubio-sous-umbilical*, (Ch.,) *Pyramidal de l'abdomen*. A small, fleshy, pyramidal fasciculus, whose existence is not constant; and which is inserted, by its base, into the upper part of the pubis, and terminates, by its summit, at the inferior part of the linea alba. When it contracts, it stretches the linea alba.

PYRAMIDA'LIS, *P. Fem'oris*, *Ili'acus exter'nus*, *Pyriform'is*, *Piriformis*, *Primus et superior quadrigem'inus*, (F.) *Sacro-trochantérien* (Ch.), *Pyramidal de la cuisse*. A flat, triangular muscle, situate at the posterior part of the pelvis. By its base, it is attached to the anterior surface of the sacrum; to the corresponding surface of the great sacro-sciatic ligament and to the posterior part of the ilium. It terminates by a tendon, which is attached to the inner surface of the great trochanter. This muscle is a rotator of the thigh outwards, or of the pelvis in an opposite direction.

PYRAMIDALIS FEMORIS, Pyramidalis.

PYRAMIDA'LIS NASI, *Proc''erus nasi*, *Nasum dila'tans*, (F.) *Fronto-nasal* (Ch.), *Pyramidal du nez*. A thin, triangular muscle, which has its summit upwards. Above, it is continuous with the occipito-frontalis. It descends vertically before the root of the nose, on which it terminates; becoming confounded with the transversalis. This muscle wrinkles the skin of the root of the nose transversely, and stretches that which covers the tip.

PYRAMIDES, Corpora pyramidalia.

*PYRAMIDES ANTÉRIEURES*, Corpora pyramidalia—p. Ferreini, Ferrein, pyramids of—p. Malpighianæ, Papillæ of the kidney—*p. Postérieures du cervelet*, Corpora restiformia.

PYRAMIDS OF MALPIGHI, Papillæ of the kidney—p. Posterior, Corpora restiformia—p. of Wistar, Sphenoidal cornua.

PYRAMIS, Penis, Pyramid—p. Cochleæ, Modiolus—p. Trigona, see Temporal bone.

PYRCÆA, Incendium.

PYREC'TICA, 'febrile;' from πυρετος, 'fever.' Fevers: the first order in the class *Hæmatica* of Good.

PYRENOIDES, Odontoid.

*PYRÈTHRE*, Anthemis pyrethrum.

PYRETHRUM, Anthemis pyrethrum, Urtica—p. Parthenium, Matricaria parthenium—p. Sylvestre, Achillea ptarmica.

PYRETICO'SIS, from πυρ, 'fire,' πυρετος, 'fever;' *Morbus febri'lis*. A febrile affection.

PYRETICUS, Febrifuge.

PYRETOGRAPH'IA, from πυρετος, 'fever,' and γραφη, 'a description.' A description of fever.

PYRETOL'OGY, *Pyretolog''ia*, from πυρετος, 'fever,' and λογος, 'a discourse.' *Pyrol'ogy*. A treatise on fevers. A title sometimes given to a monograph on fever.

PYRETOS, Fever.

PYRETOTYPOSIS, Intermittent.

PYREX'IA, *Pyrex'is*. Same etymon as the next. Fever. The febrile condition. Also, a paroxysm of fever—*Paroxysmus febri'lis*.

PYREX'LÆ, from πυρ, 'fire.' *Febrile diseases*. The first class of Cullen's Nosology.

PYRI MARTIALES, Ferrum tartarizatum.

PYRIA, Fomentation, Vaporarium.

PYRIATERIUM, Vaporarium.

PYRICAUSTUM, Burn.

PYRIFORMIS, Pyramidalis.

PYRIPH'LEGES, πυριφλεγης, from πυρ, 'fire,' and φλεγω, 'I burn.' One who has a burning fever.

PYRITES, IRON, Ferri sulphuretum.

PYRMONT, MINERAL WATERS OF. A celebrated mineral spring, on the Weser, in Westphalia, four leagues from Hamelet. The waters are tonic, and contain chlorides of sodium and magnesium, sulphates of soda and magnesia, and carbonates of iron, lime, and magnesia dissolved in carbonic acid, with some resinous principles. It is a highly carbonated chalybeate.

ARTIFIC''IAL PYRMONT WATER may be formed of *Epsom salt*, gr. xv; *common salt*, gr. v; *magnesia*, gr. x; *iron-filings*, gr. v; *water*, Oiij. Impregnated with the gas from *marble-powder* and *sulphuric acid*, āā ʒvij.

PYRŒNUS, Spiritus rectificatus.

PYR'OLA, *P. rotundifo'lia*, *Round-leaved Wintergreen*. *Order*, Pyrolaceæ. This plant was once used as a gentle astringent and tonic.

PYR'OLA MACULA'TA, *Spotted Pipsis'sewa*, *Spotted Wintergreen*, *Whiteleaf*, *White Pipsissewa*, *King cure*, *Ground holly*, *Rheumatism weed*, &c., has similar properties.

PYROLA UMBELLA'TA, *Chimaph'ila* vel *Chimoph'ila umbella'ta*, *C. Corymbo'sa*, *Ground-holly*, *Pipsissewa*, *Wintergreen*, *Rheumatism weed*, *Herbe a pisser* (Canada). This common American plant is allied to the uva ursi, in botanical as well as medical qualities. It is tonic and diuretic. The bruised leaves irritate the skin. From the decoction or infusion an agreeable beverage may be formed by adding sugar, ginger to flavour it, and yeast to produce fermentation. Under the name *Pipsis'sewa Beer* it has been used in scrofulous affections.

PYROLEUM OSSIUM RECTIFICATUM, Oleum animale Dippelii.

PYROLIG'NEOUS ACID, *Ac''idum pyroace'ticum*, *A. pyroligno'sum* seu *pyroxyl'icum*, *A. ligni pyro-oleo'sum*, *A. ace'ticum empyreumat'icum*, *A. lig'neum*, *Pyrolig'nic acid*, (F.) *Acide pyroligneux*, *Vinaigre de bois*. An acid, obtained by distillation, from wood, coal, &c., which was once believed to be of a peculiar character. It is now known to be formed of acetic acid and an empyreumatic oil, from which it may be freed; and, in this state, is sold in commerce for *Acetum distillatum*. It is used for similar purposes as distilled vinegar, and for preserving animal substances. It has also been used as an antiseptic in gangrene and sphacelus, and to foul ulcers; wherever indeed creasote is indicated.—The dose of the impure pyroligneous acid internally is from five to thirty drops, three or four times a day.

PYROMA'NIA, *Incen'diary monoma'nia*, from πυρ, 'fire,' and *mania*. Insanity, with an irresistible desire to destroy by fire.

PYROPH'AGUS, *Igniv'orus*, from πυρ, 'fire,' and φαγω, 'I eat.' One who eats fire. A juggler, who eats bodies in a state of ignition.

PYROS, Triticum.

PYRO'SIS, from πυρ, 'fire,' 'the act of burning.' *Ptyalis'mus pyros'icus*, *Limo'sis cardial'gia sputato'ria*, *Ardor stom'achi*, *A. ventric'uli*, *Cardial'gia sputatoria*, *Pyrosis Succ''ica*, *Apocheo'sis vom'itus pyrosis*, *Dyspepsia pyrosis*, *Cnismoreg'mia*, *Ebullit''io stom'achi*, *Orex'is* (of some), *Waterbrash*, *Waterqualm*, *Black-water*, (F.) *Ardeur de l'estomac*, *Fer chaud*, *Cremason*, *Soda*, *Gorgosset*. This affection consists of a hot sensation in the stomach, with eructations of an acrid, burning liquid, that causes a distressing sensa-

tion in the parts over which it passes. Attention to diet, and the use of bitter absorbents, will usually relieve, when the disease is functional. Occasionally, it is symptomatic of organic disease of the stomach.

Pyrosis also signified, of old, inflammation, gangrene, and a burn.

Pyrosis Suecica, Pyrosis.

PYROSOPHIA, Chymistry.

PYROTECHNIA, Chymistry.

PYROTECHNY, *Pyrotech'nē*, from πυρ, 'fire,' and τεχνη, 'art.' Art of making fire-works, &c. Also, chymistry. M. Percy has used the term *Pyrotechnie Chirurgicale* for the art of applying fire or the actual cautery in surgery.

PYROTHONIDE, from πυρ, 'fire,' and οθονη, 'linen.' *Liquor pyro-oleo'sus e lin'teo para'tus.* A kind of pyrogenous or empyreumatic oil, produced by the combustion of textures of hemp, linen, or cotton in a copper vessel. The brown produet is acid. Its medieal properties probably resemble those of creasote. Diluted with three or four times its weight of water, it has been used as a gargle in cynanche tonsillaris, but is not now employed.

It is said, also, to be a popular remedy for toothach and skin diseases. When prepared from rags, it is called *Rag oil;* when from paper, *Paper oil.*

PYROTICUS, Caustie.

PYRUS CYDO'NIA, *Cydo'nia malifor'mis* seu *vulga'ris, Sorbus Cydo'nia, Cydo'nia, Coto'nia, Quince Tree,* (F.) *Coignassier. Family,* Rosaceæ. *Sex. Syst.* Icosandria Pentagynia. The fruit is termed *Cydo'nium malum, Malum canum, Malum coto'neum, Melum cydo'nium, Quince,* (F.) *Coign.* Quince-seeds — *Cydo'nium* (Ph. U. S. 1851) — are sometimes used in decoction as a demulcent. The fruit makes a pleasant preserve.

Pyrus Domestica, Sorbus domestiea.

Pyrus Malus, *Malus, M. dasyphyl'la* seu *commu'nis* seu *sylves'tris, Sorbus malus, Melea,* the *Apple Tree,* (F.) *Pommier.* The apple — (F.) *Pomme*—is an agreeable fruit when ripe. When unripe, it disagrees, especially with those of weak digestive powers. The same may be said of the *pear,* (F.) *Poire;* the fruit of the *Pyrus commu'nis, Apios, P. Sorbus, P. Sati'va,* (F.) *Poirier.*

*Apple Brandy* is a spirituous liquor obtained from the juiee of the apple, and mueh used in the United States.

PYTIA, Colostrum.

PYTISMA, Sputum, Sperm.

PYUL'CON, from πυον, 'pus,' and 'ελκω, 'I extract.' (F.) *Tire-pus.* A surgieal instrument for extraeting pus from any cavity. Many pyulca have been employed, all of whieh act as exhausting syringes.

PYU'RIA, *Pyotu'ria, Pyorrhœ'a urina'lis,* from πυον, 'pus,' and ουρον, 'urine.' Discharge of purulent urine: a symptom which oeeurs in many diseases; partieularly in cases of renal calculi, and in organic affeetions of the bladder. It receives various epithets, according to the part whence the pus proceeds: — as *Pyuria urethra'lis, P. rena'lis,* and *P. vesica'lis.*

Pyuria Chylosa, Chyluria — p. Laetea, Chyluria — p. Mucosa, Cystirrhœa — p. Serosa, Cystirrhœa — p. Viseida, Cystirrhœa.

PYXIS, πυξις. A box; a pill-box. Also, an emollient ointment. — Aëtius, and Paulus.

Pyxis, *Boîte,* see Cotyloid.

# Q.

Q., see Abbreviation.

QUABEBE, Piper cubeba.

QUACK, Charlatan.

QUACK-MEDICINE, Arcanum.

QUACKSALVER, Charlatan.

QUADRANS, *Quarta pars libræ.* A quarter of a pound. Three ounces (Troy).

QUADRANTAL, Amphora.

QUADRATUS, Depressor labii inferioris — q. Dorsi, Q. lumborum.

Quadra'tus Fem'oris, *Quadratus,* from *quadra,* 'a square.' *Quartus quadrigem'inus quadratus,* (F.) *Tuber-ischio-trochantérien* (Ch.), *Ischio-sous-trochantérien, Carré de la Cuisse.* A musele situate at the posterior and upper part of the thigh. It is thin, flat, and quadrilateral, and is attached to the outer part of the tuberosity of the ischium; whenee it proceeds transversely to the inferior part of the posterior margin of the great trochanter. It rotates the limb, turning the toe outwards.

Quadratus Genæ, Platysma myoides—q. Radii, Pronator radii quadratus.

Quadratus Lumbo'rum, *Quadratus* seu *Lumba'ris externus, Flectens par lumbo'rum, Quadra'tus dorsi,* (F.) *Ilio-costal,* (Ch.) *Ilio-lombi-costal, Carré des lombes.* A flat, somewhat thick, irregularly quadrilateral muscle, situate in the loins, at the sides of the vertebral column. It is attached, below, to the crista ilii and ilio-lumbar ligament; and above, to the inferior margin of the last rib; and besides, to the base of the transverse processes of the last four lumbar vertebræ. This musele inclines the loins to its side; depresses the last rib, and is thus a musele of respiration. It ean also raise the hip.

QUADRIGEM'INA TUBER'CULA, *Eminen'tiæ Quadrigem'inæ* seu *Bigem'inæ, Optic Lobes, Optic Ganglia, Pons Syl'vii, Cor'pora quadrigem'ina, Nates et Testes, Cor'pora bigem'ina,* (F.) *Tubercles quadrijumeaux, Éminences bigéminées.* Four medullary tubereles, situate at the posterior surface of the tuber annulare. They are white, externally; gray, internally; oblong; rounded; connected by pairs, and separated by two grooves, which divide them crueially. Of these tubercles — the superior, called *nates, Tuber'cula anterio'ra, Glu'tia,* are larger and more prominent than the lower, called *testes, Tuber'cula posterio'ra.* The pineal gland corresponds exactly to the point of intersection of the two furrows that separate them.

QUADRIGEMINUS PRIMUS ET SUPERIOR, Pyramidalis—q. Quadratus quartus, Quadratus femoris — q. Secundus et tertius, Ischiotrochanterianus.

QUADROON, see Mulatto—q. Black, see Mulatto.

QUAFADIL, Melanthium Virginieum.

QUAHOIL, Cacao.

QUAIL, Tetrao coturnix.

QUAMASH, EASTERN, Scilla esculenta.

QUANDROS. Ancient name for a precious stone, believed to exist in the brain of the vul

ture; and to which was attributed the property of augmenting the secretion of milk, and preserving from deadly accidents. No such stone exists.

QUAR'ANTINE, *Quar'entine, Quarĕntaine,* from (I.) *Quaranti'na,* itself from *quaranta,* 'forty.' (F.) *Quarantaine.* The time during which travellers, returning from a country where the plague or any other pestilential disease exists, are compelled to remain on board ship or in a lazaretto. They, as well as the ship, are said *'to perform quarantine.'* Quarantine is sometimes extended beyond forty days, whilst its duration is frequently much less. It is sometimes enforced by land; for example, when contagious diseases require the establishment of *cordons sanitaires,* and when persons are desirous of leaving infected districts. During quarantine, no communication is allowed between the travellers and the inhabitants of the country. Quarantine is a great impediment to commerce; and is, doubtless, very frequently enforced when there is but little danger of contagion. The evils, however, that might arise from the introduction of a widely-spreading contagious disease, are so disastrous, as to induce legislators to maintain these laws in perhaps an unnecessary degree of rigour.

QUARTAN, 'of or belonging to the fourth.' *Quarta'na Febris, An'etus Quarta'nus, Tetartæ'us, Quartan Ague,* (F.) *Quarte.* An intermittent, the paroxysms of which recur every fourth day, leaving between them two days' interval. We speak also of the *Quartan Type.* A *Double Quartan* is one in which one paroxysm occurs on the third and another on the second day, so that there is only one day of apyrexia and two of paroxysms in succession; — the paroxysms of every fourth day resembling each other. A *Triple Quartan* is one in which there is a paroxysm every day; and on every three days the paroxysms correspond. A *redoub'ling* or *repeating quartan,* (F.) *Fièvre quarte doublée,* is one in which there are two paroxysms every fourth day. See Intermittent.

QUARTANUS REMITTENS, Tetartophia.

QUARTA'RIUS. An ancient measure, equal to one-fourth of the sextarius. See Weights and Measures.

*QUARTE,* Quartan.

QUARTERON, see Mulatto — q. Black, see Mulatto.

QUARTIO, Astragalus.

QUARTI-STERNAL, *Quadristerna'lis.* The fourth osseous portion of the sternum, corresponding to the fourth intercostal space. — Béclard.

QUASSATIO, Conquassation.

QUASSATURA, Conquassation.

QUAS'SIA, *Quassia ama'ra, Quassy, Quassia excel'sa, Picræ'na excel'sa, Febrif'ugum lignum, Lofty Bitterwood Tree, Bitter-ash,* (F.) *Quassie.* A West India tree, from which is obtained the *Lignum Quassiæ, Quassia,* (Ph. U. S.) It is an intensely durable bitter, without astringency; and has been employed as a tonic and stomachic. It is generally given in the form of infusion. The bitter principle is called *Quassin.*

QUASSIA SIMAROU'BA, *Simarouba, Simaruba, S. officina'lis, Euon'ymus, Bitter Simaruba, Mountain Damson.* The bark of the Simarouba is bitter, and not unpleasant. Both water and alcohol extract its virtues. It is not astringent. It is exhibited wherever a simple tonic is required.

QUASSIN, see Quassia.

QUATERNIO, Astragalus.

*QUATRE ÉPICES,* see Myrtus pimenta.

QUATRIO, Astragalus.

QUEASINESS, Nausea.

QUEEN'S DELIGHT, Stillingia — q. of the Meadows, Spiræa ulmaria—q. Root, Stillingia.

QUERCINI HERBA, Lichen plicatus.

QUERCULA MINOR, Teucrium chamædrys.

QUERCUS ALBA, the *White Oak;* QUERCUS ROBUR, the *Common Oak;* Q. TINCTO'RIA, the *Black Oak;* Q. RUBRA MONTA'NA, the *Red Oak* or *Spanish Oak; Family,* Amentaceæ; *Sex. Syst.* Monœcia Polyandria; (F.) *Chêne.* The bark of all these varieties is, probably, alike in medicinal properties. It is powerfully astringent and tonic, and has been used internally in intermittents, and externally in decoction, as an astringent wash, where such is indicated.

*Acorns, Oeces, Nuces Quercûs,* (F.) *Glands,* were at one time much used as food; and a decoction of them was once recommended in dysentery and diarrhœa, in glandular obstructions, &c. A pessary made of them has been advised in immoderate flow of the menses. They are not now used.

QUERCUS INFECTO'RIA. A tree of Asia Minor, which affords *Turkey Galls, Nut Galls, Gallæ Tur'cicæ, G. Querci'næ, G. Tincto'riæ, Nux Gallæ, Galla max'ima orbicula'ta, Cicis, Cassenoles, Gallæ, Galls, Gall-nut,* (F.) *Noix de Galle.* The *nut-gall—Galla* (Ph. U. S.)—is a morbid protuberance or tubercle, produced by the puncture of the *Diplo'lepis Gallæ Tincto'riæ* or *Cynips Quercûs folii.* It is powerfully astringent and tonic, and has been employed in diarrhœa, intestinal hemorrhage, and intermittents: but is chiefly used, externally, in gargles and injections. The powder, made into an ointment with lard, is used in piles.

QUERCUS COCCIFERA, see Kermes—q. Marina, Fucus vesiculosus—q. Suber, see Suber.

*QUEUE DE CHEVAL,* Cauda equina, see Medulla spinalis—*q. de la Moëlle épinière,* Cauda equina—*q. de Pourceau,* Peucedanum.

QUICK-IN-THE-HAND, Impatiens.

QUICKEN TREE, Sorbus acuparia.

QUICK'ENING, from Sax. cpiccan, 'to make alive.' The period of gestation when the motion of the fœtus first becomes perceptible. This usually occurs about the eighteenth week, and was at one time erroneously believed to mark the time at which the fœtus becomes alive—*Anima'tio fœtûs.* It need scarcely be said, that it possesses the principle of life from the moment of the union of the materials furnished by the sexes at a fecundating copulation. When the motion is felt, the female is said to be 'quick with child.'

QUICKENS, Triticum repens.

QUICKLIME, Calx viva.

QUICKSILVER, Hydrargyrum.

QUIES, Acinesia.

QUINA, Quinine—q. Quina, Cinchona.

QUINÆ ACETAS, SULPHAS, &c., see Quiniæ Acetas, &c.

QUINCE, see Pyrus cydonia—q. Tree, Pyrus cydonia.

QUINIA, Quinine—q. Acetate of, Quiniæ acetas—q. Amorphous, see Quinia, extract of—q. Arseniate of, Quiniæ arsenias—q. and Cinchonia, tannate of, Quiniæ et Cinchoniæ tannas—q. Arsenite of, Quiniæ arsenis—q. Citrate of, Quiniæ citras.

QUINIA, EXTRACT OF, *Qui'niæ sulphas impu'rus.* A preparation which consists in evaporating the liquor poured off the crystals of sulphate of quinia, to the consistence of a pilular mass.

It has the properties of sulphate of quinia, and its active principle appears to be *amorphous quinia.* Twenty-four grains will generally arrest ague.

QUINIA, FERROCYANATE OF, Quiniæ ferrocyanas—q. Hydriodate of, Quiniæ hydriodas—q. Impure sulphate of, Quinia, extract of—q. Iodhy-

drate of, Quiniæ hydriodas—q. Iodide of, Quiniæ hydriodas—q. Iodide of, Iodhydrate of, see Quiniæ hydriodas—q. Ioduret of, Quiniæ hydriodas—q. and Iron, Hydriodate of, see Quinia, Iodide of Iodhydrate of—q. Lactate of, Quiniæ lactas—q. and Mercury, protochloride of, Hydrargyri et Quiniæ Protochloridum—q. Muriate of, Quiniæ murias—q. Nitrate of, Quiniæ nitras—q. Phosphate of, Quiniæ phosphas—q. Sulphate of, Quinine, sulphate of.

QUI'NIÆ ACE'TAS, *Chi'nium ace'ticum, Ace'tas Chi'nii* seu *Chini'ni* seu *chi'nicus* seu *Qui'niæ* seu *Quinæ* seu *Quini'ni* seu *Kini'ni, Quina ace'tica, Acetate of Qui'nia* or of *Quinine*. Prepared by saturating *Quinia* with diluted *acetic acid*. Has the properties of the other salts of Quinia.

QUINIÆ ARSEN'IAS, *Quini'næ* seu *Qui'niæ Arsen'ias, Chini'num Arsenico'sum* seu *Arsenic''icum, Arseniate of Quinia* or *of Quina* or *of Quinine*. Formed by the union of *arsenic acid* and *quinia*. Employed as an antiperiodic in the dose of from three quarters of a grain to a grain and a half in the twenty-four hours.

QUINIÆ AR'SENIS, *Q. Diar'senis, Ar'senite of Qui'nia*. A salt resulting from the double decomposition of *arsenite of potassa* and *sulphate of quinia*. It has been used in chronic cutaneous diseases; and as an antiperiodic in ague, neuralgia, &c. Dose, one-third of a grain, three times a day.

QUINIÆ CITRAS, *Quiniæ* seu *Chini'ni citras, Citras chi'nicus* seu *qui'nicus, Chi'nium* seu *Chini'num Ci'tricum, Citrate of Quinia*, of *Quina*, or of *Quinine*. Formed from the union of *citric acid* and *quinia*. It has the same properties as the sulphate.

QUINIÆ ET CINCHONIÆ TANNAS, *Chini'num* seu *Chi'nium tan'nicum, Tannate of Quinia* and *Cincho'nia*. This salt has the same properties as the salts of quinia in general.

QUINIÆ DIARSENIS, Quiniæ Arsenis.

QUINIÆ FERROCY'ANAS, *Chi'nium ferrocyanogena'tum* seu *ferrohydrocyan'icum, Ferrocy'anate* or *hydrocyanoferrate of Quinia* or of *Quinine*. This salt is obtained by the decomposition of *sulphate of quinia* by means of a solution of *ferrocyanuret of potassium*. It has all the properties of sulphate of quinia, and, according to some, in a superior degree.

QUINIÆ HYDRI'ODAS, *Chini'num hydriod'icum, Hydriodate* or *Iodhydrate of Quinia*; called, also, *Iodure'tum* seu *Iod'idum Qui'niæ, Iod'uret* or *Iodide of Qui'nia*, (F.) *Hydriodate* ou *Iodhydrate de Quinine, Iodure de Quinine*. This is formed by precipitating *sulphate of quinia* by means of *iodide of potassium*. Given in scrofulous affections; half a grain to a grain, three times a day, to a child.

An *iodide* and a *biniodide* have been formed; the latter made by mixing double the quantity of the iodide of potassium with the sulphate of quinia.

An IODIDE OF IODHY'DRATE OF QUI'NIA, (F.) *Iodure d'Iodhydrate de Quinine*, is prepared by pouring into an acid solution of *quinia* a solution of *iodide of iron*, containing a slight excess of iodine. The precipitate is treated with boiling alcohol: the liquor filtered, and crystals suffered to form. The salt possesses all the properties of the other salts of quinia. Under the name, *Hydriodate of Iron and Quinia*, a preparation has been introduced by Mr. Battley. It is possessed of tonic and antiperiodic virtues.

QUINIÆ IODIDUM, Quiniæ hydriodas—q. Ioduretum, Quiniæ hydriodas.

QUINIÆ LACTAS, *Quinæ lactas, Chini'num lac'ticum, Lactate of Qui'nia* or of *Quinine*. Made by the action of *lactic acid* on *quinia*. Used in the same cases as the other salts of quinia.

QUI'NIÆ MU'RIAS, *Chi'nium muriat'icum* seu *sali'tum* seu *hydrochlo'ricum, Mu'rias chi'nicus, Muriate of Quinia* or of *Quinine*. May be prepared by dissolving *quinia* in dilute *muriatic acid*. Given as an antiperiodic. Dose, half a grain to a grain.

QUINIÆ NITRAS, *Chi'nium* seu *Chini'num ni'tricum, Nitrate of Quinia* or of *Quinine*. May be formed by the addition of *nitric acid* to *quinia*. Its properties are those of the sulphate of quinia.

QUINIÆ PHOSPHAS, *Chi'nium* seu *Chini'num phosphor'icum, Phosphate of Quinia* or of *Quinine;* may be prepared by the addition of dilute *phosphoric acid* to *quinia*. It is thought by many to be next to the sulphate of quinia in its remedial powers.

QUINIÆ SULPHAS, Quinine, sulphate of.

QUINIÆ VALERIA'NAS, *Chini'num* seu *Chi'nium Valerian'icum, Valerianate of Quinia*, of *Quina*, or of *Quinine*; may be formed by the union of *valerianic acid* with *quinia*. It has the properties of the salts of quinia.

QUININE, *Qui'nia, Quina, Kini'num, Chini'num, Quinina*. An alkaline, uncrystallizable substance; under the form of a porous, whitish mass; almost insoluble in water, soluble in alcohol and ether. It forms, with acids, salts that are in general soluble. It is obtained from different cinchonas, but chiefly from the yellow, and is the active principle of those valuable drugs.

QUININE, ACETATE OF, Quiniæ acetas—q. Arseniate of, Quiniæ arsenias—q. Arsenite of, Quiniæ arsenis—q. Citrate of, Quiniæ citras—q. Ferrocyanate of, Quiniæ ferrocyanas—*q. Hydriodate de*, Quiniæ hydriodas—*q. Iodhydrate de*, Quiniæ hydriodas—q. Iodide of, Quiniæ hydriodas—*q. Iodure de*, Quiniæ hydriodas—*q. Iodure d'iodhydrate de*, Quinia, iodide of iodhydrate of—q. Lactate of, Quiniæ lactas—q. Muriate of, Quiniæ murias—q. Nitrate of, Quiniæ nitras—q. Phosphate of, Quiniæ phosphas.

QUININE, QUINA OR QUINIA, SULPHATE OF, QUINIÆ seu *Qui'næ* seu *Quini'næ Sulphas, Quinæ Disul'phas. Chi'nium* seu *Chini'num Sulphu'ricum*, (F.) *Sulfate de Quinine*—the salt usually employed in medicine—occurs in needles of a pearly and satiny appearance. It is employed with great success in the treatment of intermittents; and is available in many cases, where the bark in substance could not be retained, or would be injurious. Dose, as a tonic from 3 to 10 grains in the 24 hours. As an antiperiodic it may be carried much farther. Its action, in a large dose, is decidedly sedative. It is obtained, by treating the yellow bark with sulphuric acid. The following form is adopted in the Pharmacopœia of the United States.—*Cinchon. flav.* in pulv. crass. ℔iv: *Acid. muriat.* f℥iij; *Calcis*, in pulv. ℥v; *Aquæ*, cong. v; *Acid. Sulphur., Alcohol; Carbon. animal*, āā q. s. Boil the bark in one-third of the water mixed with the one-third of the muriatic acid, and strain through linen. Boil the residue twice successively with the same quantity of acid and water as before, and strain. Mix the decoctions, and, while the liquor is hot, gradually add the lime, previously mixed with two pints of water, stirring constantly, until the quinia is completely precipitated. Wash the precipitate with distilled water, and having pressed and dried it, digest it in boiling alcohol. Pour off the liquor and repeat the digestion several times, until the alcohol is no longer rendered bitter. Mix the liquors, and distil off the alcohol, until a brown viscid mass remains. Upon this substance, removed from the vessel, pour about half a gallon of distilled water, and having heated the mixture to the boiling point, add as much sulphuric acid as may be necessary to dissolve the impure alkali.

Then add an ounce and a half of animal charcoal; boil for two minutes; filter the liquor while hot, and set it aside to crystallize. Should the liquor, before filtration, be entirely neutral, acidulate it very slightly with sulphuric acid. Should it, on the contrary, change the colour of litmus paper to a bright red, add more animal charcoal. Separate the crystals from the liquor, dissolve them in boiling water slightly acidulated with sulphuric acid, add a little animal charcoal, filter and set aside to crystallize. Wrap the crystals in bibulous paper, and dry with a gentle heat. The mother-waters may be made to yield an additional quantity of sulphate of quinia by precipitating the quinia with solution of ammonia, and treating the precipitated alkali with water, sulphuric acid, and animal charcoal, as before.

QUININE, TANNATE OF, Quiniæ et cinchoniæ tannas—q. Valerianate of, Quiniæ valerianas.

QUINI'NISM, *Quininis'mus, Quinism, Cinchonism.* The aggregate of encephalic or neuropathic phenomena induced by over-doses of quinia.

QUINOIDINE. Chinioidine.

QUINQUEFOLIUM, Potentilla reptans—Quinquefolium majus, Potentilla reptans.

*QUINQUINA,* Cinchona—*q. Aromatique,* Croton cascarilla—q. Bicolor, Cinchonæ Caribææ cortex—*q. Faux de Virginie,* Cusparia febrifuga—*q. Gris de Loxa,* Cinchonæ lancifoliæ cortex—*q. Jaune,* Cinchonæ cordifoliæ cortex—*q. Orange,* Cinchonæ lancifoliæ cortex—*q. Piton,* Cinchonæ Caribææ cortex—*q. Rouge,* Cinchonæ oblongifoliæ cortex.

QUINSEY, Cynanche tonsillaris—q. Nervous, Angone—q. Wolf, Lycanche.

QUINTAN, *Febris quinta'na, F. pemptæ'a, F. quinta;* from *quintus,* 'a fifth.' A fever whose paroxysms return only every five days inclusively; and between which there are, consequently, three days of apyrexia.

*QUINTE,* (F.) This word is used synonymously with *paroxysm* or *fit,* when speaking of cough,—as *une Quinte de Toux*—'a fit of coughing.' Also, the influenza.

*QUINTEFEUILLE,* Potentilla reptans.

QUINTERON, see Mulatto—q. black, see Mulatto.

*QUINTES,* see Pertussis.

QUINTES'SENCE, *Quinta Essen'tia.* A name formerly given to alcohol, impregnated with the principles of some drug. It was, consequently, often synonymous with *Alcohol'ic tincture.* The most volatile principles of bodies were, also, called *Quintes'sences.*

QUINTI'STERNAL. The fifth osseous portion of the sternum. It corresponds to the 5th and 6th intercostal spaces.

QUINUA, Chenopodium quinoa.

QUOTID'IAN, *Quotidia'nus, Ephe'merus,*—itself from *quotidiè,* 'daily.' That which takes place every day.

QUOTID'IAN FEVER, *Febris quotidia'na* seu *hemere'sia* seu *hemer'ina, Q. ague, An'etus quotidia'nus, Cathe'merus, Cathemer'inus, Methemer'inos, Amphemer'inos, Amphimer'inus, Amphe'merus, Febris amphe'mera* seu *methemer'ina* seu *metheme'ria, Quotidia'nus,* (F.) *Fièvre quotidienne,* is an intermittent, the paroxysms of which recur every day.

A *simple, double,* or *triple quotidian,* is a quotidian, which has one, two, or three paroxysms in the 24 hours.

# R.

R is placed at the commencement of a prescription, as a contraction of *Rec''ipē.* (See Abbreviation.) Originally, it was the sign 4 of Jupiter, and was placed at the top of a formula, to propitiate the king of the gods, that the compound might act favourably.

RABDOIDES, (SUTURA,) Sagittal suture.

RABID, *Rab'idus,* (F.) *Rabique, Rabiéique,* from *rabies,* 'canine madness.' That which belongs to hydrophobia; as *rabid virus,* &c.

*RABIÉIQUE,* Rabid.

RABIES CANINA, Hydrophobia.

*RABIQUE,* Rabid.

*RACAHOUT, Amylum querneum.* A name given by the Arabs to the starch prepared from an edible acorn obtained from *Quercus Ilex,* but, according to Plagge, the so called *Racahout* of the Arabs, sold in Paris, is a compound of potatoe starch, chocolate, and aromatics,—as vanilla.

RACCOON BERRY, Podophyllum montanum.

RACE, from *radice,* abl. of *radix,* 'root,' breed. The union or aggregate of individuals whose conformation or particular condition differs perceptibly from those of neighbouring varieties. In the human species, several races are designated. See Homo.

*RACEMEUX,* Racemosus.

RACEMO'SUS, *Rac''emous, Rac''emose,* (F.) *Racemeux.* In clusters, like grapes.

RACE'MUS. A cluster—as of grapes.

RACHAMEL'CA, from Hebr. רחם (*rechem*) 'the womb,' and מלך (*molech,*) 'a king:' *Rechamal'ca.* A peculiar formative principle, supposed, by Dolæus, to exist in the uterus.

*RACHE,* Porrigo.

RACHIÆI, Rachiæi.

RACHIALGIA, Colic, metallic, Rhachiodynia, Vertebral disease—r. Mesenterica, Tabes mesenterica—r. Pictoniensium, Colic, metallic—r. Pictonum, Colic, metallic.

*RACHIALGIE MÉSENTÉRIQUE,* Tabes mesenterica.

RACHIALGITIS, Rhachialgitis.

RACHIDIAN ARTERIES, Spinal arteries—r. Bulb, see Medulla oblongata—r. Canal, Vertebral canal.

RACHIOPHYMA, Rachiphyma.

RACHIPHY'MA, *Rhachiphy'ma, Rachiophyma, Tumor Dorsi,* from 'ραχις, 'the spine,' and φυμα, 'a tumour.' A tumour on the spine or on the back.

RACHIS, Vertebral column.

RACHIS'AGRA, *Rhachis'agra, Rhach'iagra, Rhach'agra, Rhachid'agra, Rhachi'tis spina'lis,* from 'ραχις, 'the spine,' and αγρα, 'a seizure.' A gouty or rheumatic affection of the spine.

RACHITÆ, Rhachitæ.

RACHIT'IC, *Rachit'icus, Rhachit'icus,* (F.) *Rachitique.* Same etymon as the next. Relating or appertaining to, or affected with rickets. Weak, feeble in the joints; defective in development.

RACHI'TIS, *Rhachi'tis,* from 'ραχις, 'the spine,' and *itis,* a suffix denoting inflammation. Inflammation of the spine. Also, *Cyrto'sis Ra'-*

*chia, Cyrton'osus, Morbus Ang'licus, Osteomala'cia Infan'tum, Tabes pectorea; Innutritio ossium, Spina nodo'sa, Rachitis'mus, English disease, Rickets;* from 'ραχις, 'the spine.' (F.) *Rachitisme, Nouure.* A disease characterized by crookedness of the long bones; swelling of their extremities; crooked spine; prominent abdomen; large head; and often precocity of intellect. It is accompanied by leanness, general debility, indigestion; and frequently induces atrophy and hectic. Rickets occurs, particularly, during the first years of existence, in weakly children, born of rickety or scrofulous parents; brought up in damp or confined situations; who are badly nourished, and do not take sufficient exercise. The progress and termination of the disease are very variable. Some children gradually recover their health: others become more and more deformed, and ultimately die of consumption, dropsy, or other organic disease. The treatment is almost wholly *hygienic.* Pure air; a healthy situation; nourishing diet; exercise; sea or common cold bathing, and tonics, afford the best prospect of success.

Rachitis Adultorum, Mollities ossium.

*RACHITISME,* Rachitis.

RACHO'SIS, *Rhacho'sis, Rako'sis,* from 'ραχοω, or 'ρακοω, 'I wrinkle.' A relaxation of the scrotum. *Propto'ma* seu *lax'itas Scroti, Scrotum pen'dulum.* An excoriation of the relaxed scrotum. — Dictionaries.

*RACINE À BECQUET,* Geranium moschatum — *r. de Bengal,* Cassumuniar — *r. de Charcis,* Dorstenia contrayerva — *r. de Dracke,* Dorstenia contrayerva — *r. des Philippines,* Dorstenia contrayerva — *r. de Safran,* Curcuma longa — *r. de Saint Esprit,* Angelica — *r. Salivaire,* Anthemis pyrethrum — *r. de Turbeth,* Convolvulus turpethum.

*RACINES DU CERVELET,* Corpora restiformia.

*RACLURES DES BOYAUX,* Ramenta intestinorum.

*RACORNISSEMENT,* (F.) from *se racornir,* 'to shrivel in the fire as leather does.' *Cor'nification.* A physical property, possessed by animal substances, which consists in a kind of contractility, accompanied with sudden corrugation and curling. It is produced by heat, and by chemical agents, especially by the strong mineral acids.

RADCLIFFE'S ELIXIR, see Tinctura aloes composita.

RADESYGE, Radzyge.

RADEZYGE, Radzyge.

RADIAD, see Radial aspect.

RA'DIAL, *Radia'lis,* from *radius,* a bone of the forearm. That which relates to the radius.

*RADIAL ANTÉRIEUR,* Palmaris magnus.

Radial Artery, *A. extern'a Cu'biti.* It arises from the brachial, at the upper and anterior part of the forearm; descends on the outer side as far as the lower part of the radius, and proceeds downwards and backwards towards the superior extremity of the space which separates the first two metacarpal bones. It then buries itself in the palm of the hand, where it forms the *profound* or *radial* palmar arch. The radial artery gives off the *recurrent radial,* several *radio-muscular* branches, the *transverse palmar radio-carpal artery,* the *external superficial artery of the palm of the hand,* the *external dorsal of the thumb,* the *dorsalis carpi, dorsal interosseous artery of the index,* &c.

Radial Aspect. An aspect towards the side on which the radius is situated. — Barclay. *Radiad* is used by the same writer, adverbially, to signify 'towards the radial aspect.'

*RADIAL EXTERNE PREMIER,* see Radialis — *r. Externe second,* see Radialis — *r. Grand,* see Radialis.

Radial Nerve, *Radio-digital* (Ch.), *Spiral Nerve, Spiral muscular N., Musculo-spiral nerve,* arises from the four inferior branches of the brachial plexus. It is, at first, situate behind the other nerves of the plexus. It then becomes engaged between the three portions of the triceps brachialis, passes behind the humerus, and descends between the supinator longus and brachialus internus, as far as opposite the upper extremity of the radius. In its course it gives numerous filaments to the triceps, supinator longus, extensor carpi radialis longior, and to the integuments. Opposite the upper extremity of the radius it divides into two branches; — the one *posterior,* which turns backwards into the substance of the supinator brevis, and when it has reached the space between the two layers of muscles on the posterior surface of the forearm, divides into a great number of filaments, which are distributed to those muscles, and to the integuments of the hand. The other branch is *anterior:* it descends before the supinator brevis and the radius; until, near the inferior third of that bone, it engages itself between the tendons of the supinator longus and extensor carpi radialis longior; and, becoming afterwards subcutaneous, divides into two branches, whose filaments are distributed to the integuments of the thumb, index, middle finger, to the outside of the ring finger, and to the first interosseous muscle of the back of the hand.

*RADIAL PETIT,* see Radialis.

Radial Veins, Deep-Seated, follow the same course as the radial artery.

RADIA'LIS EXTER'NUS BRE'VIOR, *Exten'sor Carpi Radialis Bre'vior, Radialis secundus,* (F.) *Second radial externe, Petit radial, Épicondylo-sus-métacarpien,* (Ch.) An extensor muscle of the wrist, situate beneath the extensor carpi radialis longior. It is attached, above, to the external tuberosity of the humerus, and terminates below, by a long tendon, inserted into the posterior part of the upper extremity of the third bone of the metacarpus. It has the same uses as the next muscle.

Radia'lis Exter'nus Lon'gior, *Extensor Carpi Radia'lis Lon'gior, Radialis externus primus,* (F.) *Premier radial externe, Grand radial, Huméro sus-métacarpien,* (Ch.) It is seated at the outer part of the forearm; is thin, but thicker on the outside than on the inside. It is attached, above, to the inferior part of the outer edge, and to the corresponding tuberosity, of the humerus; and terminates, below, by a long tendon, which is attached to the superior extremity of the second bone of the metacarpus. It extends the hand on the forearm.

Radialis Externus Brévior, see Radialis — r. Externus primus, see Radialis — r. Extensor longior, see Radialis — r. Internus, Palmaris magnus — r. Secundus, see Radialis.

RAD'IATED, *Radia'tus,* from *radius,* 'a ray;' (F.) *Rayonné.* That which is arranged in rays: in lines, diverging from a common centre. An epithet given to several ligaments, &c., as to those which unite the ribs to the sternum; those which unite the tibia and fibula at their inferior extremity, &c.

Radiated Substance of the Kidney, see Kidney.

RAD'ICAL, *Radica'lis,* from *radix,* 'a root.' A *radical cure, cura radica'lis,* is one in which the disease is destroyed, as it were, from the root. It is used in opposition to *palliative cure.*

Radical Moisture, Humidum radicale

RADICAL VESSELS, *Vas'cular Rad'icles*, (F.) *Radicules vasculaires*, are the small vessels that take their origin in the tissues, and by their union form larger vessels.

RADICES OSSIS HYOIDEI, Cornua ossis hyoidei.

RADICIS'ECA, from *radix*, *radicis*, 'a root,' and *secare*, 'to cut.' One employed in collecting and preparing plants was formerly so called.

RADICULA, Raphanus hortensis.

*RADICULES VASCULAIRES*, Radical vessels.

RADII CILIARES, Ciliary processes.

RADII FRONTIS. The folds or wrinkles of the forehead.

RADIO-CARPAL, *Radio-carpia'nus*. That which relates to the radius and carpus.

RADIO-CARPAL ARTICULATION is the *wrist joint*, or articulation of the os scaphoides, os semilunare, and os cuneiforme of the carpus with the inferior surface of the radius, and the fibro-cartilage, situate below the ulna. It is strengthened by lateral, anterior, and posterior ligaments.

RADIO-CARPAL TRANSVERSE PALMAR ARTERY, (F.) *Artère Radio-carpienne-transversale-palmaire*. A transverse branch, given off by the radial artery, opposite the lower edge of the pronator quadratus, which sends several branches to the anterior or palmar surface of the carpus.

*RADIO-CUTANÉ* (*NERF*,) see Cutaneous—*r. Phalangettien du pouce*, Flexor longus pollicis manus.

RADIOLUS, Sound.

RADIO-MUS'CULAR, *Radio-muscula'ris*. A name given to the branches sent off from the radial artery to the muscles of the forearm in the first part of its course; as well as to the nervous filaments which the radial nerve sends to the same muscles.

*RADIS*, Raphanus hortensis.

RADISH, Raphanus hortensis—r. Water, Nasturtium amphibium.

RADIUS, 'a spoke:'—so called from its shape. *Cercis*, *Foc''ilē minus* seu *superius*, *Canna minor*, *Os adcubita'lē*, *Additamen'ium ulnæ*, *Manu'brium manûs*, *Parape'chyon*, *Arun'do bra'chii minor*, (F.) *Os du Rayon*. A long, prismatic bone, the upper and lesser extremity of which is called the *head*. This is supported by a *cervix* or *neck*. At the part where the neck is confounded with the *body* of the bone is the *tubercle* or *bicipital tuberosity* or eminence for the insertion of the biceps. The radius is articulated, above, with the os humeri and with the lesser sigmoid cavity of the ulna: below, with the scaphoides, semilunare, and the head of the ulna. Its inferior extremity, which is larger than the superior, is flattened before and behind: is irregularly quadrilateral; and has, below, a double facette to be articulated with the first two bones of the carpus. On the outer side is the styloid process; and, on the inner, a concave facette, which joins the ulna. Behind, are grooves for the passage of the extensor tendons. The radius is developed from three points of ossification; one for the body, and one for each extremity.

*RADIUS, COL DU*, Collum radii.

RA'DIX, *Rhiza*. A root: also, the male organ.

*Radix*, *Root* or *fang* of a tooth, is the part contained in the alveolus. The *radix* or *root* of the nail is the portion hidden under the skin, &c. Surgeons give the name to the prolongations, sent by scirrhous, cancerous, or other tumours into the neighbouring parts.

*Five Aperient Roots*, *Quinque radi'ces aperien'tes*, were, of old, asparagus, butchers' broom, fennel, parsley, and smallage.

*Five Lesser Aperient Roots*, *Quinque radi'ces aperien'tes mino'res*,—were caper, dandelion, eryngo, madder, and rest-harrow.

RADIX ASCLEPIADIS CRISPA, see Gomphocarpus crispus—r. Braziliensis, Ipecacuanha.

RADIX CORDIS, *Basis Cordis*. The base of the heart.

RADIX INDICA LOPEZIANA, Lopez radix—r. Linguæ, see Tongue—r. Lopeziana, Lopez radix—r. Ninsi, Sium ninsi—r. Rubra, Rubia—r. Serpentum, see Ophiorrhiza mungos—r. Unguis, Nail, root of—r. Ventris, Umbilicus.

RADULA, Raspatorium.

RADZYGE, *Radzygin*, *Radesyge*, *Radezyge*, *Thœ'ria*, properly *Theria*, from θηριον, (ἑλκος.) 'a malignant ulcer.' *Lepra boread'lis* seu *Norvegica*, *Norwe'gian Lep'rosy*. A name given, in Norway, to a disease, bearing considerable analogy to the yaws. Some have esteemed it a species of lepra or elephantiasis.

Another form—the *Spedalske*, or *Spedalskhed*—of Norway, appears to be a variety of elephantiasis Græcorum.

RAGE, *Ira*, *Furor brevis*, *Orgē*, *Thymos*, (F.) *Colère*. Violent passion, characterized by contraction of the muscles of the face, violence in every movement, extreme irritation of the nervous system, acceleration of the blood's motion, and redness and swelling of the face.

RAGE. Rhage.

*RAGE*, Hydrophobia.

RAGWEED, Ambrosia elatior—r. Great, Ambrosia trifida.

RAGWORT, Senecio Jacobæa.

*RAIDEUR CADAVÉRIQUE*, Rigor mortis.

*RAIFORT*, Raphanus hortensis—*r. Sauvage*, Cochlearia armoracia.

RAINBOW-WORM, Herpes iris.

*RAINURE*, Groove—*r. Digastrique*, Mastoid groove.

*RAISIN*, see Vitis vinifera—*r. d'Amérique*, Phytolacca decandra—*r. de Bois*, Vaccinium myrtillus—*r. d'Ours*, Arbutus uva ursi—*r. de Renard*, Paris.

*RAISINIÈRE* (F.) A name given to a small granular, brownish or blackish tumour, which forms occasionally at the surface of the cornea, in consequence of ulcers or accidental wounds of that membrane.—Nysten.

RAISINS, Uvæ passæ, see Vitis vinifera—*r. de Corinthe*, see Vitis Corinthiaca.

*RAISON*, Reason.

RAKASIRA. An American balsam; of a brownish or brownish-red colour; semi-transparent; brittle; softening and becoming tenacious by heat; inodorous when cold, but exhaling a very agreeable smell when heated; and possessing a balsamic and slightly bitter taste. The precise vegetable that furnishes it is not known. It has been used chiefly as a balsam in gonorrhœa and urinary affections.

RAKIA, see Spirit.

RAKOSIS, Rachosis.

*RÂLE*, *Rattle*, *Rhonchus*, *Rhenchus*, *Rhenxis*, from (D.) Ratel; *Rhoncus*, *Cerchnus*, *Rhogmus*, (F.) *Râle*. Noise produced by the air in passing through mucus, of which the lungs are unable to free themselves. This condition is chiefly observed at the approach of death, and is commonly called, "*the rattles*."

The term *Râle* has been given to different sounds during respiration, caused by the air passing through fluid contained in the bronchi, or areolæ of the pulmonary tissue; which are perceived by the stethoscope.

*RÂLE BRONCHIQUE SEC*, *Râle sonore*—*r. Bronchique humide*, *R. muqueux*—*r. Caverneux*, Gurgliug—*r. Caverneleux*, see Gurgling—*r. Cré-*

*pitant, Rhonchus crep'itans,* see Crepitant—*r. c. Redux,* see Crepitant.

*RÂLE MUQUEUX, Rhon'chus muco'sus, Mucous Rattle, R. bronchique humide.* The sound produced by the passage of air through mucus accumulated in the larger bronchi or trachea, or through softened tubercular matter. This *râle* occurs in catarrh, and in softened tubercle. When carried to a very high degree, it constitutes *gurgling,* (F.) *Gargouillement.* The *subcrep'itant rhonchus,* (F.) *Râle sous-crépitant,* is produced by the bubbling of air through liquid of variable consistence in the minute bronchial tubes. When heard at the base of both lungs, it is a sign of capillary bronchitis. When heard at one base only, it is generally connected with tuberculosis higher up.

*RÂLE SIBILANT, Rhon'chus sib'ilus* seu *sib'ilans, Sib'ilant Rattle.* A slight, though prolonged, whistling sound, occurring either at the commencement of inspiration, or of expiration, owing to the presence of mucus, thin and viscid, but not abundant, which obstructs, more or less completely, the smaller bronchial ramifications. It is seated in the small tubes, and occurs in the first stage of bronchitis. The *clicking* and *whistling* varieties differ, in the former being short, the latter prolonged. The former is a quick sharp sibilus or whistle, which ceases almost instantaneously; the latter a prolonged sibulus, of less sharpness, lasting almost the whole time of the movement which it accompanies. To these may be added the *hissing* variety, the name sufficiently indicating its character.

*RÂLE SONORE, Râle bronchique sec, R. ronflant, Rhonchus sono'rus, Sono'rous Rattle.* A sound resembling at times the snoring—(F.) *Ronflement*—of a person asleep; at others the sound of the bass string of an instrument when rubbed with the finger, and not unfrequently the cooing—(F.) *Roucoulement*—of a dove. It seems to be caused by a contraction of the bronchial tubes, and is characteristic of chronic catarrh.

*RÂLE SOUS-CRÉPITANT,* see *Râle muqueux.*

*RÂLE VÉSICULAIRE,* see Crepitation.

*RAMEAU,* Ramus.

RAMEN'TA INTESTINO'RUM, (F.) *Raclures des Boyaux.* The shreds or scrapings, as it were, of the mucous membrane of the bowels, often discharged in malignant dysentery. The evacuation in which these are contained has been termed *Diachore'ma xysmato'des.*

RAMENTUM, Fragment, Scobs.

RAMEX, Hernia—r. Varicosus, Varicocele.

RAMIFICA'TION, *Ramifica'tio,* from *ramus,* 'a branch,' and *fio,* 'to become.' A division of arteries, veins, or nerves into branches. Also, a branch itself.

*RAMILLE,* Ramusculus.

*RAMOLLISSEMENT,* Mollities—*r. du Cerveau,* Mollities cerebri—*r. du Cœur,* Cardiomalacia—*r. de l'Estomac,* Gastromalacia—*r. du Foie,* Hepatomalacia—*r. Gris,* see Hepatization—*r. de la Moelle épinière,* Mollities medullæ spinalis—*r. Rouge,* see Hepatization—*r. de l'Intestin,* Entero-malacia—*r. des Os,* Mollities ossium.

RAMPANT, (F.) *ramper,* 'to climb.' *Repens. Reptans.* That which creeps or drags on the earth. The French *Bandage rampant* has the folds arranged spirally around the part, leaving intervals between them. It is a retentive bandage, but is easily displaced, and, therefore, not employed.

*RAMPES DU LIMAÇON,* Scalæ of the cochlea.

RAMPHOS, Rostrum.

RAMULUS, Ramusculus.

RAMUNCULUS, Ramusculus.

RAMUS, *Clados,* a *branch,* (F.) *Rameau.* A division of an artery, vein, or nerve. Also, the male organ.

RAMUS DURIOR SEPTIMÆ CONJUGATIONIS, Facial nerve.

RAMUS'CULUS, *Ram'ulus, Ramun'culus, Sur'culus, Cladis'cos,* diminutive of *ramus.* A division of a ramus. (F.) *Ramuscule, Ramille.*

RANA ESCULEN'TA, (F.) *Grenouille.* This frog and the bull-frog, *Rana Tauri'na*—are eaten as a delicacy. They are nutritious, and easily digested.

RANA, Ranula.

*RANCE,* Rancid.

RANCID, *Ran'cidus, Sapros,* (F.) *Rance,* from *rancere,* 'to be stale.' An epithet given to fatty bodies, which have become acrid from age or the contact of air. Mild ointments may thus become very irritating, and unfit for the purposes for which they were originally intended.

RANINE, *Rani'na;* from *Rana,* 'a frog.' The termination of the lingual artery is so called; that is, the portion of the artery which advances horizontally between the genio-glossus and lingualis muscles as far as the point of the tongue. The ranine vein follows the same course as the artery, and opens into the internal jugular or into the superior thyroid.

RAN'ULA, from *Rana,* 'a frog,' so called from its resemblance; *Dyspha'gia Ranula, Emphrag'ma saliva'rē, Frog Tongue, Ba'trachos, Batra'chium, Hydroglos'sa, Hypoglossis, Hypoglossum, Hypoglot'tis, Hypoglos'sium, Rana,* (F.) *Grenouillette.* A small, soft, fluctuating, and semi-transparent tumour, which forms under the tongue, owing to the accumulation of saliva in Wharton's duct. In order to give exit to the accumulated fluid, and to establish a permanent opening for the discharge of the saliva, the cyst may be punctued, and the opening maintained by a minute cylinder, with a button at each extremity, as has been recommended by Dupuytren; or a portion of the cyst may be removed by the scissors, and the mouth be frequently washed by any astringent lotion. Sometimes, the salivary duct is found plugged by a small calculus.

RANULA LAPIDEA, see Calculi, salivary.

RANUN'CULUS, (F.) *Renoncule. Family* Ranunculaceæ. *Sex. Syst.* Polyandria Polygynia. A genus of plants, most of the species of which, when taken internally, act as acrid poisons. See Poison. They are, also, acrid and vesicant, when applied to the skin, and have accordingly been often used as counter-irritants. The following species answer to this description.

RANUNCULUS ABORTIVUS, *Small flowered Crowfoot, Chicken-pepper.*

RANUNCULUS ACRIS, *R. praten'sis* seu *Stevenii* seu *ru'fulus* seu *sylvat'icus* seu *Sic'ulus, Upright Meadow Crowfoot, Butter Cups, Yellow-weed, Blister-weed, Pilcwort, Burwort, Meadow-bloom, Yellows,* (F.) *Bouton d'or.*

RANUNCULUS ALBUS, Anemone nemorosa.

RANUNCULUS AQUATICUS, R. sceleratus.

RANUNCULUS BULBO'SUS, *R. lætus, Ranunculus* (Ph. U. S.), *Bulbous-rooted Crowfoot,* (F.) *Renoncule bulbeuse, Bassinet.*

RANUNCULUS DIGITATUS, R. sceleratus.

RANUNCULUS DECLINATUS, R. flammula.

RANUNCULUS FICA'RIA, *Chelido'nium minus, Scrophula'ria minor, Fica'ria ranunculoï'des,* seu *verna* seu *commu'nis, Chelido'nia rotundifo'lia minor, Cur'suma hæmorrhoida'lis herba, Ranun-*

*culus vernus* seu *præcox Ægole'thron, Lesser celandine, Pilewort,* (F.) *Petite Chélidaine, Petite Éclaire, Ficaire.* The leaves and root have been used medicinally;—the leaves as an antiscorbutic: the root as a cataplasm in piles.

RANUNCULUS FLAM'MULA, *R. declina'tus, Flam'mula, Surrec'ta alba, Smaller Water Crowfoot, Lesser Spearwort,* (F.) *Petite Douve.*

RANUNCULUS ILLYRICUS.

RANUNCULUS LINGUA.

RANUNCULUS LÆTUS, R. bulbosus — r. Nemorosus, Anemone nemorosa — r. Palustris, R. sceleratus — r. Pratensis, R. acris.

RANUNCULUS PENNSYLVANICUS, *Bristly Crowfoot.*

RANUNCULUS PRÆCOX, R. ficaria.

RANUNCULUS PUBES'CENS. Grows in ditches and marshes in South Africa. The expressed juice is used by the Cape Colonists in cancerous ulcers.

RANUNCULUS RUFULUS, R. acris.

RANUNCULUS SCELERA'TUS, *R. Palus'tris* seu *umbella'tus* seu *digita'tus* seu *aquat'icus, Risus A'pium, Hecato'nia palus'tris,* Marsh Crowfoot.

RANUNCULUS SICULUS, R. acris — r. Stevenii, R. acris — r. Vernus, R. ficaria — r. Virginianus, Lobelia syphilitica — r. Umbellatus, R. sceleratus.

RAPA NAPUS, Brassica rapa — r. Rotunda, Brassica rapa.

RAPE, Brassica napus, Stuprum.

RAPHANE'DON, from *ραφανις*, 'a radish, like a radish.' *Rhaphanedon.* A transverse fracture of a long bone, leaving no splinters;—what has been called, in France, *Fracture en ravc.*

RAPHA'NIA, *Convul'sio Raphania, Rhapha'nia, Morbus spasmod'icus malig'nus* seu *popula'ris, M. Silesiacus, Eclamp'sia typho'des, Sync'lonus Raphania.* Linnæus gives this name to a convulsive disease, not uncommon in Germany and Sweden, and which has been attributed to the seeds of the *Raph'anus Raphanis'trum* seu *sylves'tris, Raphanis'trum seg''etum* seu *arvensē, Rapistrum,* being mixed with the corn. The convulsions are seated in the limbs, and are attended with acute pain. See Convulsio cerealis.

RAPHANIA MAÏZTICA, Pellagra.

RAPHANIS, Raphanus hortensis — r. Magna, Cochlearia armoracia.

RHAPHANISTRUM ARVENSE, see Raphania.

RAPHANUS, R. hortensis.

RAPH'ANUS HORTEN'SIS, *Raphanus, R. sati'vus* seu *niger, Raph'anis, Rhaph'anus, Radic'ula, Rhaphys, Raphys, Rhaps, Rapys, Radish,* (F.) *Raifort, Radis. Family,* Cruciferæ, *Sex. Syst.* Tetradynamia Siliquosa. The root of this plant is a common esculent. It has, also, been given as a diuretic in calculous affections. The juice, made into a syrup, is exhibited to relieve hoarseness. Radishes have long been celebrated as anti-scorbutics.

RAPHANUS MARINUS, Cochlearia armoracia — r. Raphanistrum, see Raphania — r. Rusticanus, Cochlearia armoracia — r. Sylvestris, see Raphania.

RAPHÉ, *Rhaphē,* 'a suture.' A name given to prominent lines resembling a raised stitch. Such is the raphe or *tramis* which divides the scrotum into two parts, and which extends from the anterior part of the anus to the extremity of the penis. The name *Raphe* seu *Linea Media'na* seu *Sutu'ra cor'poris callo'si exter'na* seu *chorda longitudina'lis,* is, also, given to two prominent lines which are longitudinal and parallel, and are seen at the upper surface of the corpus callosum, extending from the anterior to the posterior extremity of that commissure.

RAPHEX, Chenopodium vulvaria.

RAPHIANKIS'TRON, from *ραφιον*, 'a needle,' and *αγκιστρον*, 'a hook.' An instrument employed in the formation of artificial pupil.

RAPHION, Needle.

RAPHIS, Needle.

RAPHYS, Raphanus hortensis.

RAPISTRUM, see Raphania.

*RAPPORT* (F.), *Rela'tio, Renuncia'tio.* A deposition made by a physician or surgeon to prove the condition of a person, the nature of a disease, the existence or non-existence of pregnancy, sudden or violent death, &c. Formerly, there were the *Rapports dénonciatifs,* made at the desire of the injured or their friends, and intended to point out to the judges the details of the crimo or misdemeanor, — the *Rapports provisoires,* tho object of which was to obtain *provisions* for the injured individual, both as regarded food and medicine, and to defray the expenses of prosecution;—and *Rapports mixtes,* or those which were both *dénonciatifs* and *provisoires.* At present, reports or depositions are generally divided into *judiciary,* or those which serve to throw light on the subject matter of any civil or criminal cause; and *administrative,* which afford information on subjects relating to any branch of the public administration, as on the nuisance, or otherwise, of certain establishments, the character of any epidemic, &c.

*RAPPORT,* Eructation.

RAPTUS POST-TERGANEUS, Opisthotonos.

RAPUM MAJUS, Brassica rapa.

RAPUNTIUM SYPHILITICUM, Lobelia syphilitica.

*RÂPURE,* Rasura.

RAPYS, Raphanus hortensis.

*RAQUETTE,* Cactus opuntia.

RAREFA'CIENS, *Rarifa'ciens, Arœot'icus,* (F.) *Raréfiant* from *rarus,* 'rare,' and *facere,* 'to make.' Medicines were so termed, which were supposed to be possessed of the power of giving more bulk or exteusion to the blood or other humours.

*RARÉFIANT,* Rarefaciens.

RARIFACIENS, Rarefaciens.

RA'RITAS, (F.) *Rareté.* Rarity; scantiness; fewness.

RARITAS DEN'TIUM. A large space between the teeth, which appear to be, and may be, too few.

RASCATIO, Excreation.

RASCETA, Carpus, Malleolus — r. Pedis, Tarsus.

RASCHA, Carpus, Malleolus.

RASETA, Carpus, Malleolus.

RASETTA, Carpus, Malleolus.

RASH, Exanthem — r. Fever, Scarlatina — r. Lichenous, Lichen — r. Mulberry, see Typhus — r. Nettle, Urticaria — r. Rose, Roseola — r. Summer, Lichen tropicus — r. Tooth, Strophulus.

*RASOIR,* Razor.

RASORISM. The Italian medical doctrine of contro-stimulus, of which Rasori was the founder.

RASORIUM, Raspatorium.

RASPATO'RIUM, *Raso'rium, Rat'ula, Scalprum raso'rium, Xyster, Xyste'rium, Xystrum, Rad'ula, Runci'na, Runcin'ula, Scalprum,* (F.) *Rugine, Grattoir.* An instrument used for rasping bones, to detach the periosteum, — either in certain surgical operations, or for anatomical purposes.

RASPBERRY, Rubus idæus — r. Ground, Hydrastis Canadensis — r. Wild, Rubus strigosus.

RASSETA PEDIS, Tarsus.

RASTETA, Carpus, Malleolus.

RASU'RA, *Xysma, Xysmos,* (F.) *Râpure,* from *radere, rasum,* 'to scrape.' A rasure, or scratch, or erosion. Also, the rasping or shaving of any substance; as *Rasu'ræ Cornu Cervi, Hartshorn shavings.*

RASURA, Scobs.

RATAFI'A. A liquor prepared by imparting to ardent spirits the flavour of various kinds of fruits, adding sugar.

RATANHY, Krameria ratanhia—r. of the Antilles, Krameria ixina.

*RATE,* Spleen.

*RATÉLEUX,* Spleneticus.

*RATÉLIER,* see *Dentier.*

RATIO, *Rationa'litas,* from *reor, ratus,* 'to think.' A reason, a cause, an explanation, a mode or manner; as *Ratio symptom'atum,* an explanation of the symptoms,—*Ratio meden'di, Genus curatio'nis, Via curandi;* the mode or manner of cure.

RATIO, Reason—r. Medendi, see Ratio—r. Symptomatum, see Ratio.

RAT"IONAL, *Rationa'lis.* That which is conformable to reason. This epithet is often opposed to *empirical;* as *rational treatment.* The French, also, say *Signes rationales,* in opposition to *Signes sensibles.* See Organic.

RATIONALITAS, Ratio.

RATSBANE, Arsenious acid.

RATTLE, *Râle.*

RATTLES, THE, see *Râle.*

RATTLEBUSH, Sophora tinctoria.

RATTLESNAKE, Crotalus horridus—r. Leaf, Goodyera pubescens—r. Plantain, Goodyera pubescens—r. Root, Nabalus albus, Polygala senega, Trillium latifolium—r. Weed, Hieracium venosum.

RATTLESNAKE'S MASTER, Agave Virginica, Liatris scariosa, Nabalus albus.

RATTLEWEED, Actæa racemosa.

RATULA, Raspatorium.

RAUCE'DO, *Rau'citas, Parapho'nia rauca, Asper'itas Arte'riæ as'peræ, Vox rauca, Branchus, Hoarseness,* (F.) *Enrouement, Raucité.* A change in the voice, which loses its smoothness and becomes low and obscure. It is a common symptom in diseases of the larynx and trachea.

RAUCEDO CATARRHA'LIS. Hoarseness from cold.

RAUCITAS, Raucedo.

*RAUCITÉ,* Raucedo.

RAUCOUS, *Raucus.* Hoarse; as a raucous voice—*Vox rauca* seu *raucis'ona.*

*RAVE,* Brassica rapa.

*RAYONNÉ,* Radiated.

*RAYONS SOUS-IRIENS,* Ciliary processes.

RAZOR, *Culter Tonsor'ius, Machæ'ris, Norac'ula, Xyrum, Xyrus,* (F.) *Rasoir,* from *radere, rasum,* 'to shave.' An instrument for shaving. Used in surgery to remove hairs, where they would interfere with any operation.

REACHING, Vomiturition.

REAC'TION, *Reac'tio,* from *re,* 'again,' and *agere, actum,* 'to act.' An action of resistance to a power applied. A species of vital movement or excitement, tending to prevent or destroy the effects of any noxious power applied to the animal economy, and which, by some, has been attributed to the *vis medicatrix naturæ.* It is certainly dependent on the organic instinctive actions of the frame. It is the state of activity which succeeds the action on the nervous system of certain morbific influences.

REAL'GAR, *Realgal, Arlada, Arladar, Auripigmen'tum rubrum, Arsen'icum rubrum facti"tium, Abessi, Sandara'cha Græco'rum, Red Sulphuret of Mercury.* A violent poison. See Poison.

REASON, *Ra'tio, Logos,* (F.) *Raison.* Same etymon as Ratio. The faculty or property of the mind by means of which man perceives the distinction between right and wrong, in physics as well as in morals. *Reason* is a just conclusion resulting from the comparison of two ideas, by virtue of which we form a judgment.

REBOLEA, Mummy.

REBONA, Mummy.

*REBOUTEUR, Renoueur.*

RECEIV'ER, *Ampulla,* (F.) *Ballon, Récipient.* In pharmacy, a wide-necked globular vessel, the neck of which widens gradually outwards, to receive the tapering beak of the retort in distillation. Like the retort, the receiver may be *plain* or *tubulated.*

A *quilled receiver* is one that has a tapering tube from its lower surface, which is inserted into a graduated bottle through a cork joint, when it is desirable to know accurately the amount of fluid that has passed over.

RECEPTACULA DURÆ MATRIS, Sinuses of the dura mater.

RECEPTAC'ULUM CHYLI, 'receptacle of the chyle;' *R. Pecquet'i* seu *Pecquetia'num, Diverso'rium Chyli, Stagnum chyli, Sac'culus chy'lifer* seu *ro'rifer, Saccus lac'teus, Al'veus ampullo'sus* seu *ampulles'cens, Utric'ulus lacteus, Vesic'ula chyli, Ampul'la chylif'era* seu *chyli, Cister'na lumba'ris, C. Chyli, Chylocys'tis, Chylodochi'um, Lat'ices lactei, Lumbar cistern, Reservoir of Pecquet,* (F.) *Réservoir du chyle, R. de Pecquet, Citerne lombaire.* A considerable dilatation of the thoracic duct, in front of the lumbar region of the vertebral column. It is the commencement of the duct.

RECEPTAC'ULUM COTUN'NII. A triangular space, formed by a separation of the two laminæ of the dura mater of the internal ear, near the middle of the posterior surface of the pars petrosa of the temporal bone, where the aquæductus vestibuli terminates. It is always filled with the *Fluid of Cotugno.*

RECEPTACULUM PECQUETI, R. Chyli—r. Sellæ equinæ lateribus appositum, Cavernous sinus.

RECEPTIV'ITY, *Receptiv'itas,* (F.) *Réceptivité,* from *recipere, receptum,* 'to receive.' A word used by Tissot to express the susceptibility of certain organs to receive morbific impressions.

RECEPTUM, Prescription.

RECESSIO, Paroxysm.

RECESSUS, Abscess, Sinus—r. Sulciformis, see Fovea vestibuli.

RECHAMALCA, Rachamelca.

*RECHUTE,* see Relapse.

RECIDIVA MORBI, Relapse.

*RÉCIDIVE,* see Relapse.

REC"IPĒ, (L.) (*re,* and *capere,* 'to take.') A Latin word which signifies 'take,' (F.) *Prenez,* and with which prescriptions are commenced. It is, often, represented by R, ℞, and was formerly by 4, the symbol of Jove. See Abbreviation.

*RÉCIPIENT,* Receiver.

RECIPROCATION, VIBRATIONS OF, see Sound.

RECLINATIO, Reclination—r. Palpebrarum, Ectropion.

RECLINA'TION, *Reclina'tio,* from *reclinare,* (*re,* and *clinare,* 'to bend,') 'to bend back.' A mode of operating for the cataract, which consists in applying the needle in a certain manner to the anterior surface of the cataract and depressing it into the vitreous humour, in such a way, that the front surface of the cataract is the upper one and its back surface the lower one.

RECLUSOR PALPEBRARUM, Levator palpebræ superioris.

RECOMPOSITION, Metasynchrisis.

RECONVALESCENTIA, Convalescence.

RECORDATIO, Memory.

RECORDATUS, Memory.

RECORPORATIVUS, Metasyncritic.

RECOVERY, Restauratio.

RECREATIO, Restauratio.

REC'REMENT, *Recremen'tum*, from *re*, and *cernere, cretum*, 'to sift.' A humour, which, after having been separated from the blood, is again returned to it; such as the saliva, the secretion of serous membranes, &c. Such fluid is said to be *recrementitial*, (F.) *Récrémenteux, Récrémentitiel.*

RECREMENTA VESICÆ, Urine.

RECREMEN'TO-EXCREMENTIT''IAL. Applied to secreted fluids, as the saliva, bile, &c., which are in part reabsorbed and in part excreted.

RECREMENTUM, Recrement.

RECRUDESCEN'TIA, *Palincote'sis, Recrudes'cence*, from *re*, 'again,' and *crudus*, 'raw.' An increase of a disease after a temporary remission.

RECTAL, *Recta'lis*. Appertaining, or relating to, the rectum, — as '*rectal* tube.' See Tube, rectal.

RECTIFICA'TION, *Rectifica'tio*, from *rectum facere*, 'to make right.' An operation by which certain liquids are purified by distilling them either singly or after admixture with other substances.

RECTI'TIS. A hybrid word, from *rectum*, and *itis*, denoting inflammation; properly *archi'tis*, or *proctitis*. Inflammation of the rectum. *Proctitis, Proctal'gia inflammato'ria.*

RECTOSTENOSIS, Stricture of the rectum.

RECTO-VAG''INAL, *Recto-vagina'lis*. That which relates or belongs to the rectum or vagina.

Recto-vaginal Fistula is owing to a preternatural communication between the rectum and vagina, through the above septum.

Recto-vaginal Septum, (F.) *Cloison recto-vaginale*, is formed by the junction — back to back — (or by what the French term *adossement*) of the rectum and vagina. It separates these two canals from each other.

RECTO-VES'ICAL, *Recto-vesica'lis*. Having relation to the rectum and bladder; as the "*recto-vesical fold* or *pouch*" of the peritoneum, between the rectum and bladder.

RECTUM; so called from a notion that it is straight. It is not so. *Intesti'num Rectum, Apeuthys'menos, Euthyen'teron, Longaon, Longas, Longanon, Archos, Cys'saros, Princeps, Monoco'lon* (?). The third and last portion of the great intestine. It forms the continuation of the sigmoid flexure of the colon, occupies the posterior part of the pelvis, and extends from the left side of the sacro-vertebral articulation to the coccyx, before which it opens outwards by the orifice called the *anus*. It is cylindrical, but *saccated*, as it were, at its inferior portion, where it is consequently larger, and is attached to the sacrum by the mesorectum. Like the other portions of the canal it is formed of three membranes. Towards the lower extremity, some parallel and longitudinal wrinkles are observable on its inner surface: these are the *Columns, Colum'næ car'neæ of the Rectum* or *of Morgagni*, (F.) *Colonnes du rectum* ou *de Morgagni*. They are merely folds of the mucous membrane, between which is a number of *Lacunæ*. The arteries of the rectum are numerous. They proceed from the inferior mesenteric, hypogastric, and internal pudic, and are called *hemorrhoidal*. The veins open, partly into the hypogastric vein, partly into the inferior mesenteric. The nerves proceed from the sciatic and hypogastric plexuses. The rectum receives the fæcal matters, as they pass from the colon, which serves as a reservoir.

RECTUS ABDOM'INIS, (F.) *Pubio-sternal, Sterno-pubien* (Ch.), *Droit de l'abdomen*. A long flat muscle, situate at the anterior part of the abdomen, and separated from that of the opposite side by the linea alba. It is attached, above, to the cartilages of the last three true ribs; and, below, to the pubis by a very strong tendon, the outer edge of which is continuous with the fascia transversalis. This muscle is enclosed in an aponeurotic sheath; and, in its course, has three or four transverse aponeurotic intersections. It bends the chest on the pelvis, and conversely.

Rectus Anterior Brevis, Rectus capitis internus minor — r. Anterior longus, R. capitis internus major — r. Capitis anticus longus, R. c. internus major.

Rectus Capitis Internus Major, *R. internus major, R. anterior longus, Rectus capitis anti'cus longus*, (F.) *Trachélo-basilaire, Grand droit antérieur de la tête*. This muscle is long in proportion to its breadth, flat, and broader above than below. It is situate at the anterior and lateral part of the neck, and arises from the transverse processes of the third, fourth, fifth, and sixth cervical vertebræ. It is inserted into the basilary process of the occipital bone.

Rectus Capitis Internus Minor, *R. internus minor, Rev'uens, An'nuens, R. anterior brevis*, (F.) *Petit trachélo-basilaire, Petit droit antérieur de la tête*. This is situate deeper than the last. It is thin, flattened, irregularly quadrilateral, and passes from the anterior surface of the body of the first vertebra, near the origin of the transverse process, to be inserted into the basilary process.

Rectus Capitis Latera'lis, *R. lateralis Fallo'pii, Transversa'lis anti'cus primus, Rectus lateralis*, (F.) *Trachélo-atloïdo-basilaire, Atloïdo-sous-occipital* (Ch.), *Droit latéral de la tête*. There is a muscle of this name on each side of the head. It is flat, quadrilateral, and passes from the transverse process of the atlas to the occiput, behind the jugular fossa. It inclines the head to one side.

Rectus Capitis Posti'cus Major, *R. Major, R. Capitis posti'cus minor* (Albinus), *Spini-axoïdo-occipita'lis*, (F.) *Axoïdo-occipitale* (Ch.), *Grand droit postérieur de la tête*. A flat, triangular muscle, situate at the posterior and superior part of the neck. It extends from the spinous process of the second cervical vertebra to the external surface of the lower semicircular ridge of the occipital bone. This muscle extends the head, inclines it to one side, and causes it to experience a rotary motion, which directs the face to its side.

Rectus Capitis Posti'cus Minor, *R. minor*, (F.) *Tuber-atloïdo-occipital, Atloïdo-occipital* (Ch.), *Petit droit postérieur de la tête*. A flat, triangular muscle, situate beneath the last, which passes from the posterior arch of the atlas to the occipital bone. It extends the head.

Rectus Capitis Posticus Minor, R. c. p. major — r. Cruris, R. femoris.

Rectus Externus Oculi, *Abductor oculi, Indignabun'dus, Indignato'rius, Iracun'dus, Oc'ulum movens secun'dus, Orbito-extus-sclératicien*. All the recti muscles of the eye, four in number, arise from the bottom of the orbit, and are inserted into the sclerotic coat of the eye. The *Rectus externus*, (F.) *Droit externe, Irascible* ou *Abducteur*, is divided, at its posterior extremity, into two portions, one of which is attached to the

outer part of the foramen opticum, and the other to the sphenoid bone.

Rectus Fem'oris, *Rectus* sive *Grac"ilis anterior, Rectus cruris*, (F.) *Ilio-rotulien, Droit antérieur de la cuisse.* A straight muscle, seated at the anterior part of the thigh. It extends from the anterior and inferior spine of the ilium and the cotyloid cavity of the patella. This muscle extends the leg upon the thigh, and conversely. It can, also, bend the thigh upon the pelvis or carry the pelvis forward.

Rectus Inferior Oculi, *Depres'sor oculi, Tim'idus, Dep'rimens, Hu'milis, Oc'ulum movens quartus*, (F.) *Sous-optico-sphéno-sclératicien, Droit inférieur* ou *abaisseur de l'œil, Muscle humble*, arises below the optic foramen, from the sphenoid bone. It depresses the eye.

Rectus Internus Oc'uli, *Addu'cens oculi, Bibito'rius, Oculi adductor, Oculum movens primus*, (F.) *Orbito-intus-sclératicien, Droit interne de l'œil* ou *adducteur* ou *buveur.* It arises from the sphenoid at the inferior part of the foramen opticum. It turns the eye towards the nose.

Rectus Superior Oculi, *Attol'lens oculi, Attol'lens oc'ulum, Leva'tor oculi, Superbus, Eleva'tor oculi, Oculum movens tertius*, (F.) *Sus-optico-sphéno-sclératicien, Droit supérieur* ou *élévateur de l'œil, Dédaigneur*, is attached to the circumference of the foramen opticum.

All the recti muscles are concerned in the voluntary motions of the eye. The oblique muscles have been supposed by Sir C. Bell to execute the involuntary.[?]

Rectus Inferior Femoris, Gracilis — r. Internus major, R. capitis internus major — r. Internus minor, R. capitis internus minor — r. Lateralis, R. capitis lateralis — r. Lateralis Fallopii, R. capitis lateralis — r. Major, R. capitis posticus major — r. Minor, R. capitis posticus minor.

RECUBITORIUM, Anaclinterium.

RECUPERATION, Restauratio.

RECU'PERATIVE, *Recu'peratory*, from *recuperatio*, 'recovery.' Restorative. Recovering. Belonging to recovery.

RECUR'RENT, *Recur'rens*, from *recurrere*, (*re*, and *currere*), 'to run back.' A name given to several arterial and nervous branches, which seem to re-ascend towards the origin of the trunk whence they emanate.

Recurrent Arteries. This name has been given to several arteries of the forearm, and to one of the leg. In the *forearm*, there are, 1. The *Radial recurrent, Artére récurrente de l'épicondyle* (Ch.), which arises from the superior part of the radial, and ascends between the supinator longus, s. brevis, and the brachialis internus. 2. The *anterior cubital recurrent, A. récurrente de l'épitrochlée* (Ch.), which arises from the upper and inner part of the cubital, and ascends between the pronator teres and brachialis internus. 3. The *posterior cubital recurrent*, which arises from the preceding artery, or from the cubital itself, and ascends between the olecranon and internal tuberosity of the humerus. 4. The *posterior radial recurrent, A. récurrente olécranienne* (Ch.). It arises from the posterior interosseous, and ascends between the posterior cubital and anconeus muscles. In *the leg*, — the *Arteria recurrens tibia'lis, A. récurrente du genou* (Ch.), is furnished by the anterior tibial, and ascends to the tibialis anticus muscle.

Recurrent Bandages are formed by convolutions of the bandages, which make a kind of cap for the part — as the head — to which they are applied.

RECURVATIO, see Hump.

RECUTITUS, Apella.

RED BEAN, Abrus precatorius.

REDBERRY, Arbutus uva ursi, Gaultheria, Panax quinquefolium — r. Bitter, Cornus Florida

RED HEAD, Asclepias Carassavica — r. Root, Celastrus, Sanguinaria Canadensis — r. Swamp, Vaccinum oxycoccos.

REDIMICULUM, Diadema.

*REDINGOTES ANGLAISES*, see Condom.

REDINTEGRATIO, Regeneration, Restauratio.

REDIVIA, Paronychia.

*RÉDONDANCE*, Plethora.

*REDOUBLEMENT*, Exacerbation, Paroxysm.

REDS, Menses.

REDUCTIO, Taxis — r. Præputii Impedita, Phimosis.

REDUC'TION, *Reduc'tio, Reposit"io, Restitu'tio, Diap'lasis, Diaplas'mus, Syntax'is*, from *re*, and *ducere, ductum*, 'to lead.' A surgical operation, the object of which is to restore displaced parts to their original situation. Thus, we say the reduction of a luxation, when the displaced parts are again brought to their proper relative situation. The reduction of a hernia is the restoration of the protruded parts to the cavity of the abdomen. This is, also, called *Taxis.*

In pharmacy, the process of restoring oxides, chlorides, sulphurets, &c., to the metallic state.

REDUNDANTIA, Plethora.

REDUVIA, Paronychia.

REED MACE, Typha latifolia.

REFECTIO, Restauratio.

REFECTIVA, Analeptica.

REFECTUS, Restauratio.

REFICIENTIA, Analeptica.

REFLECTION, Duplicature.

REFLEC'TOR EPIGLOT'TIDIS. A muscle, which arises from the arytenoid cartilage and inner part of the thyroid, and is inserted into the lateral edges of the epiglottis.

REFLEX SYSTEM OF NERVES, see Nerves.

REFLEXIO PALPEBRARUM, Ectropion.

REFRAC'TION, *Refrac'tio, Photocamp'sis, Dia'clasis*, from *re*, and *frango*, 'I break.' The change of direction which rays of light experience when they pass obliquely from one medium into another of different density. If the light passes from a rarer to a denser medium, it approaches the perpendicular raised at the point of immersion. The contrary occurs, when it goes from a denser to a rarer medium. The theory of lenses, telescopes, and of the eye, rests entirely on this property of light.

*RÉFRAICHISSANTS*, Refrigerants.

*RÉFRIGÉRANT*, see Alembic.

REFRIG"ERANTS, *Refrigeran'tia, Psych'tica, Antither'ma, Frigefacien'tia*, (F.) *Réfraichissans, Réfrigeratifs*, from *re*, and *frigere*, 'to cool.' Medicines which depress the morbid temperature of the body. The chief reputed refrigerants are the Potassæ Nitras(?), the Sodæ Boras(?), but chiefly the abstraction of caloric by ice and ice-drinks, cold water, cold lemonades, soda-water, and effervescing draughts internally; and externally, cool air, cold water, evaporating lotions, and frigorific mixtures.

*RÉFRIGERATIFS*, Refrigerants.

REFRIGERATOR, see Alembic.

REGENERATIO, Reproduction.

REGENERA'TION, *Regenera'tio, Palingen'esis. Redintegra'tio*, from *re*, and *generare*, 'to beget.' Reproduction of a part of the body, which has been destroyed.

REG"IMEN, from *regere*, 'to govern.' The rational and methodical use of food, and of every thing essential to life; both in a state of health and disease. It is often restricted, in its mean-

ing, to *Diet.* It is sometimes used synonymously with hygiene.

REGINA PRATI, Spiræa ulmaria.

REGIO, Region.

REGIO AURICULARIS. The region of the ear.

REGIO BUCCA'LIS. The region of the cheeks.

REGIO CARDIACA, Epigastric region.

REGIO CERVICA'LIS. The region of the neck. The cervical region.

REGIO EPIGASTRICA, Epigastrium.

REGIO FACIA'LIS. The facial region.

REGIO FRONTALIS. The frontal region.

REGIO GASTRICA, Umbilical region — r. Hypogastrica, see Hypogastrium—r. Hypochondriaca, Hypochondre — r. Iliaca, Iliac region — r. Inguinalis, Inguinal region — r. Ischiadica, Ischiadic region — r. Jugalis, Jugal region — r. Lumbalis, Lumbi—r. Mentalis, Mental region—r. Mesogastrica, Umbilical region—r. Nasalis, Nasal region —r. Nuchæ, Nuchal region—r. Nuchalis, Nuchal region—r. Occipitalis, Occiput—r. Occipitalis inferior, Nuchal region — r. Perinæi, Perinæum — r. Præcordiaca, Præcordial region — r. Pubis, Pubic region — r. Stomachalis, Epigastric region —r. Stomachica, Epigastric region—r. Temporalis, Temple — r. Umbilicalis, Umbilical region.

RE'GION, *Re'gio.* Same etymon. Anatomists have called *regions*, determinate spaces on the surface of the body or of different organs. Thus, the abdomen has been divided into several; to which different names have been given. See Abdomen, Epigastrium, Hypochondrium, Hypogastrium.

*RÉGION OMBILICALE*, Umbilical region.

REGIONAL ANATOMY, see Anatomy.

*REGLES*, Menses — *r. Déviés*, Menstruation, vicarious—*r. Difficiles*, Dysmenorrhœa.

*RÉGLISSE*, Glycyrrhiza.

REGLUTINATIO, *Décollement.*

*RÈGNE ANIMAL*, see Animal.

REG'ULAR, *Regula'ris*, from *regula*, 'a rule.' According to rule. Applied to the types of a disease, and to the pulse, when according to rule.

REGULAR PRACTIT''IONER. One who practises his profession according to the rules established by law or custom.

REGULUS ANTIMONII, Antimonium.

REGURGITA'TION, *Regurgita'tio.* The act by which a canal or reservoir frees itself, without effort, from substances accumulated in it. Usually, it is applied to the *puking* or *possetting* of infants; and to the *rising* of solids or fluids into the mouth in the adult,—from *re*, and *gorge*, 'the throat.' What is called "vomiting at pleasure" is regurgitation.

The substances brought into the mouth by regurgitation, the French call *Renvois.*

*REIN*, Kidney.

*REINE DES PRÈS*, Spiræa ulmaria.

REINERZ, MINERAL WATERS OF. Reinerz is a small town in Silesia, three German miles from Glatz. The waters are acidulous chalybeates. The principal springs are the tepid drinking spring, the cold spring, and three bathing springs.

REINFORCE'MENT, FASCIC'ULUS OF, *F. Cunea'tus.* A band of fibres from the *corpus innominatum*, or lateral part of the antero-lateral column of the medulla, which is continued up behind and around the corpus olivare, is lined on its inner or central surface with cinereitious substance, enlarges as it ascends, passes over the upper surface of the pons Varolii, and is expanded into the optic thalamus. It thus forms, in its course, the anterior paries of the fourth ventricle, and is brought into view by brushing away the *tuberculum cinereum* or gray matter of the ventricle. The band has received these names owing to its constantly increasing as it ascends, and being mixed up with gray matter on its inner face, from which it seems to derive new fibres.

REINS, Kidneys, Lumbi.

REJEC'TIO, *Anago'gē*, from *re*, and *jacere*, 'to cast.' Every excretion by the mouth; spitting, expectoration, regurgitation, or vomiting.

REJECTIO SANGUINIS E PULMONIBUS, Hæmoptysis.

REJUVENES'CENCE, *Rejuvenescen'tia*, from *re*, 'again, and *juvenescens*, 'growing young;' (*juvenis*, 'a youth'). A renewal of youth. The state of being young again. The assumption of the characteristics of youth by the aged.

*RELACHEMENT*, Relaxation.

RELAPSE, *Hypot'ropē*, *Epis'trophē*, *Hypos'trophē*, *Morbi recidi'va*, *Hypotropias'mus*, from *re*, 'again,' and *labor*, 'I fall down.' The return of a disease, during, or shortly after, convalescence. The French use *Rechute* in this sense; and *Récidive* (*Morbus recidi'vus*) for the return of a complaint, at a greater or less period after the complete restoration of health.

The terms *Relapsing fever*, *Short fever*, *Five-day fever*, *Seven-day fever*, *Bil'ious Remitt'ent fever*, *Remitting Icteric fever*, and *Mild Yellow fever*, have been given to a form of continued fever, which has occasionally appeared epidemically, as in Edinburgh, in 1843 and 1847, and was generally attended with icteric symptoms. The main phenomena disappeared at about the end of a week; but in many cases a relapse occurred about the end of a fortnight. Few died of the affection.

RELAPSING FEVER, see Relapse.

RELATIO, *Rapport.*

RELATION, FUNCTIONS OF, see Function.

RELAX'ANT, *Laxans*, *Malact'icum*, *Chalas'ticum*, *Paret'icum*, (F.) *Relachant*, from *re*, and *laxare*, 'to loose.' A medicine which diminishes the tension of organs. Mucilaginous and fatty substances are relaxants.

RELAXANTIA, Emollients.

RELAXATIO CORDIS ET ARTERIARUM, Diastole.

RELAXA'TION, *Relaxa'tio.* Same etymon. *Chala'sis*, *Chalas'mos*, (F.) *Relachement.* In *Physiology*, relaxation is opposed to contraction. In *Pathology*, it means great looseness of a part.

*RELEVEUR DE L'ANUS*, Levator ani — *r. de la Lèvre inférieure*, Levator labii inferioris — *r. du Menton*, Levator labii inferioris — *r. de l'Omoplate*, Levator scapulæ — *r. de la Prostate*, Levator prostatæ — *r. de l'Urèthre*, Levator urethræ.

*RELIQUAT*, (F.) The *remnant* or remains of a disease.

REMAK FIBRES, see Fibres, Remak.

REMANSIO MENSIUM, Amenorrhœa.

*REMÈDE*, Clyster, Medicament — *r. du Capuchin*, Liquor hydrargyri nitrici—*r. de Durand*, Liquor anodynus terebinthinatus — *r. du Duc d'Antin*, Liquor hydrargyri nitrici.

REMEDIAL, Medicinal.

REMEDIATE, Medicinal.

REMEDILESS, Incurable.

REMEDIUM, Juvans, Medicament — r. Dentifricium, Dentifrice.

REMEDY, Medicament—r. English, Cinchona.

REMISSIO, Decline, Remission — r. Cordis et Arteriarum, Diastole — r. Morbi, Remission — r. Virium, Atony.

REMIS'SION, *Remis'sio*, *Epan'esis*, *An'esis*, *Submis'sio*, *Aph'esis*, *En'dosis*, *Remis'sio*, *Meio'sis*, from *remittere*, (*re*, and *mittere*, 'to send'),

'to relax. In a more extensive signification, a temporary diminution of the symptoms of a disease, either acute or chronic, *Remis'sio morbi.* Diminution in the febrile symptoms, such as occurs in a remittent fever, between the exacerbations.

REMITTENS ICTERODES, Fever, yellow.

REMIT'TENT, *Remit'tens.* Same etymon. Any disease which presents *remissions.*

Remittent of Children, Fever, infantile remittent.

Remittent Fever, *Febris remit'tens, Epan'etus, Exac"erbating, paroxysmal, sub-continual, endem'ic, endem'ial* or *endem'ical fever,* (F.) *Fièvre rémittente,* is one which strikingly exacerbates and remits, but without intermission. The ordinary bilious fever of the United States is a simple remittent—*Epanetus mitis,* (F.) *Fièvre rémittente simple.*

Remittent Fever, Bilious, Remittent fever, see Relapse.

Remitting Icteric Fever, see Relapse.

REM'ORA, from *remorari,* (*re,* and *mora,* 'delay,) 'to arrest.' The name of two surgical instruments, intended to retain parts *in situ.* The one was used, formerly, in castration, to prevent the intestines from protruding at the inguinal ring; the other, called *Remora Hilda'ni,* (F.) *Arrêt d'Hildan, Echene'is,* was employed to maintain fractures and luxations reduced. It is not now used.

Remora Aratri, Ononis spinosa.

REN, Kidney.

RENAL, *Rena'lis,* from *Ren,* 'the kidney.' That which relates to the kidney.

Renal Arteries, *Emulg"ent Arteries,* are very large and short, and commonly two in number—one to each kidney. They arise from the sides of the abdominal aorta, forming with it a right angle. The left is commonly a little more anterior and elevated than the right. After a short course, they arrive at the fissure of the kidney, where they divide, before entering it, into three or four very considerable branches.

Renal Capsule, Capsule, renal—r. Nerve, see Splanchnic Nerves.

Renal Plex'uses, *Emulgent Plexuses.* These are two:—one on each side. They proceed from fasciculi of the solar and cœliac plexuses; from the outer side of the semilunar ganglion and the final expansion of the small splanchnic nerves. These plexuses begin by three or four ganglions, situate at the commencement of the renal artery; and they give off from their circumference many fine, straight filaments, which do not anastomose, and which enter the kidney with the divisions of the renal artery. These divisions they accompany.

Renal Veins, *Emulgent Veins.* These are very large. Their roots follow the same course as the arteries in the substance of the kidney. In the fissure or pelvic portion of the kidney, they unite into a single trunk, which passes transversely inwards, and opens at the side of the vena cava descendens.

RENCHUS, Snoring, Stertor.

REN'CULUS, *Renic'ulus, Ren'ulus,* diminutive of *Ren,* 'a kidney.' A small kidney. A lobe of the kidney.

RENES SUCCENTURIATI, Capsules, renal.

RENICULUS, Renculus.

RENIFORM, Nephroid.

RENNES, MINERAL WATERS OF. Thermal salines in the department of Aube, France, containing carbonic acid and chloride of magnesium. Temperature 103 to 121°, of Fahr.

RENNET, *Runnet,* from (G.) gerinnen, 'to coagulate.' (?) When the fourth stomach or *Abomasus* of the calf is salted and dried, it possesses the property of coagulating milk, when a portion of it is soaked in water, and the infusion—*Rennet*—is added to milk.

Rennet Whey, see Serum lactis.

RENNSELÆRIA, Leptandra Virginica.

*RENONCULE,* Ranunculus—*r. Bulbeuse,* Ranunculus bulbosus.

*RENOUÉE,* Polygonum aviculare.

*RENOUEUR,* (F.) *Rebouteur, Rhabilleur.* A *bone-doctor:*—a *bone-setter.* One who makes a *trade* of reducing fractures and dislocations.

RENOVATIO, Ananeosis.

RENUENS, Rectus capitis internus minor.

RENULUS, Renculus.

RENUM ATONIA, Nephratonia—r. Paralysis, Nephratonia.

RENUNCIATIO, *Rapport.*

*RENVERSEMENT DE LA LANGUE,* Paraglossa—*r. de la Matrice,* Uterus, inversion of the—*r. des Paupières,* Ectropion—*r. du Rectum,* Proctocele—*r. de la Vessie,* Exocyste, Exstrophia of the bladder.

*RENVOIS,* see Regurgitation.

REPANDATIO, Lordosis.

REPARATION, Restauratio.

REPAR'ATIVE, *Repar'atory.* Having the power of restoring or repairing.

REPELLENTIA, Repellents.

REPEL'LENTS, *Repellen'tia, Repercutien'tia, Apocrus'tica, Repercus'sives,* (F.) *Répercussifs,* from *re,* and *pellere,* 'to drive.' Medicines which, when applied to a tumefied part, cause the fluids, that render it tumid, to recede, as it were, from it. Astringents, cold water, ice, &c., are repellents.

*RÉPERCUSSIFS,* Repellents.

REPERCUSSIO, Contra-fissura, Repercussion.

REPERCUS'SION, *Repercus'sio, Anac'lasis,* from *re, per,* and *quatere,* 'to shake or batter.' Disappearance of a tumour or cutaneous eruption, in consequence of the application of a repellent. The action of a repellent remedy. The French writers use the term *Délitescence, Delitescen'tia,* for the sudden disappearance of a tumour, inflammation, eruptive disease, or purulent collection, without the disease occurring in any other part of the body: in this respect delitescence differs from metastasis: *Délitescence* of an inflammation or 'sudden disappearnce' is distinguished by certain French pathologists from *Resolution.* Repercussion also means *Ballottement.*

REPERCUSSIVES, Repellents.

REPERCUTIENTIA, Repellents.

REPLETION, Fulness, Plethora.

*REPLI LONGITUDINAL DE LA MENINGE,* Falx cerebri.

REPOSITIO, Anaplasis, Reduction, Taxis.

*REPOUSSOIR,* Punch—*r. d'Arêtes,* Probang.

REPRIMENS, Epischetieus.

REPRODUC'TION, *Reproduc'tio, Regenera'tio,* from *re,* and *producere,* (*pro,* and *ducere.*) The function by which living bodies produce bodies similar to themselves. See Generation. As a general remark, it will be found true, that the larger animals are uniparous; and the smaller, which are more exposed to destruction, multiparous. The mammalia being of the same natural class as man, it may be useful to compare them in this respect.

## COMPARATIVE TABLE OF REPRODUCTION IN THE CLASS MAMMALIA.

| *Species.* | Age capable of engendering. | Duration of gestation. | Number of young at each birth. | Period of cessation of the function. |
|---|---|---|---|---|
| *Primates.* | | | | |
| Man | 14 years | 9 months | 1 to 3 | At a somewhat advanced age. |
| Monkeys (large) | 3 years | 7 months | Do. | |
| Do. (long tailed) | 2 years | 6 months | Do. | |
| *Carnivora.* | | | | |
| Bear | 2 years | 112 days | 1 to 4 | 25 to 30 years. |
| Badger | ..... | ..... | 3 to 4 | 20 to 25 years. |
| Hedgehog | 1 year | 1 mo. and 10 days | 3 to 5 | |
| Ferret | 11 months | Do. | 5 to 9 twice a year | Produces during life. |
| Otter | ..... | 3 months | 3 to 4 | |
| Pole-cat, Marten, Weasel, and Ermine | before 1 year | 56 days | 3 to 6 | 8 to 10 years. |
| Didelphus, Opossum, and Philander | ..... | ..... | 4 to 6 | 10 years. (?) |
| Lion | 2 years | 3 to 4 months | 3 to 4 | 20 to 25 years. |
| Tiger, Leopard | Do. | 3 months | 4 to 5 | Do. |
| Lynx | ..... | 9 weeks | 3 to 4 | |
| Wild Cat | before 1 year | 56 days | 4 to 6 | 9 years. |
| Wolf | 2 years | 73 days | 5 to 9 | 15 to 20 years. |
| Dog, in the most natural state, | 10 months | 63 days | 3 to 6 | 15 years. |
| Fox | 1 year | 2 months | Do. | 10 or 12 years. |
| Jackall | ..... | Do. | 5 to 8 | |
| Isatis | ..... | 63 days | 6 to 7 | |
| Phoca | ..... | 3 months (?) | 2 to 3 | |
| *Rodentia.* | | | | |
| Squirrel | 1 year | 45 days | 3 to 4 twice a year | Produces during life. |
| Flying Squirrel | ..... | ..... | 3 to 4 | Do. |
| Ondatra | ..... | ..... | 3 to 5 | Lives 6 years. |
| Beaver | ..... | 4 months | 2 to 3 | |
| Hare | 1 year | 30 days | 2 to 4 several times a year | Lives 8 years. |
| Rabbit | 6 months | Do. | 4 to 8 do. | Lives 8 or 9 years. |
| Rat | Do. | 5 or 6 weeks | 5 to 6 do. | Produces during life. |
| Mouse | Do. | 1 month | Do. | Do. |
| Marmot | ..... | 6 weeks | 2 to 4 | Do. |
| Guinea Pig | 5 to 6 weeks | 3 weeks | 5 to 8 times a year | Do. |
| Dormouse | 1 year | ..... | 3 to 5 | |
| *Edentata.* | | | | |
| Armadilla | ..... | ..... | 4 times a year | 7 to 8 years. (?) |
| *Ruminantia.* | | | | |
| Camel | 4 years | 11 months or 1 y'r | 1 | 40 to 50 years. |
| Dromedary | Do. | Do. | 1 | Do. |
| Buffalo | 3 years | 9 months | 1 | 15 to 18 years. |
| Beef | 2 years | Do. | 1 to 2 | 9 years. |
| Lama | 3 years | ..... | Do. | 12 years. |
| Reindeer | 2 years | 8 months | 1 | Lives 16 years. |
| Buck and Doe | 1½ year | Do. | 1 to 2 | Lives 25 or 30 years. |
| Roebuck | Do. | 5 months | Do. | Lives 12 or 15 years. |
| Saiga (Antelope) | 1 year | Do. | Do. | Lives 15 or 20 years. |
| Chamois and Wild Goat | Do. | Do. | 1, 2, and 3 | Lives 18 or 20 years. |
| Goat | Do. | Do. | Do. | 7 years. |
| Musimon | 1½ year | Do. | 1 to 2 | 8 or 10 years. |
| Sheep | 1 year | Do. | Do. | 8 years. |
| *Solipedes.* | | | | |
| Horse | 2½ years | 290 days | 1 to 2 | 25 or 30 years. |
| Ass | Do. | Do. | Do. | Do. |
| Zebra | Do. | Do. | Do. | Do. |
| *Pachydermata.* | | | | |
| Hog | 9 months or 1 year | 4 months | 10 to 20 | 15 years. |
| Elephant | 16 years (?) | 9 to 11 months | 1 or 2 | Lives 70 years. (?) |
| Rhinoceros | 5 years (?) | ..... | 1 or 2 (?) | Lives 60 years. (?) |
| Hippopotamus | ..... | ..... | 1 | |
| Morse | ..... | 9 months | 1 | |

REPULSORIUM, Punch.

REPURGA'TIO, *Anacathar'sis*, from *re*, and *purgare*, 'to cleanse.' According to Castelli — purgation by transpiration or by expectoration. Medicines producing this effect are called *Repurgan'tia.*

REQUIES, Acinesia.

REQUIETIO, Acinesia.

RES CONTRA-NATU'RAM. 'Things against nature,' (F.) *Choses contre-nature*, are those things which tend to destroy man; — as disease, and every thing connected with it.

RES CULINARIA, Culinary art—r. Medica, Medicina.

RES NATURA'LES, (F.) *Choses naturelles.* Those things, which, by their union, were conceived to constitute the nature of man; such as the elements, temperaments, humours, spirits, &c.

RES NON NATURA'LES, (F.) *Choses non-naturelles.* Those things which, anciently, formed the matter of hygiene. See Non-naturals.

RES VENEREA, Coition — r. Vestiaria, Vestitus.

*RÉSEAU,* Rete — *r. Admirable,* Rete mirabile — *r. Merveilleux,* Rete mirabile.

RESECTIO, Resection — r. Articulorum, see Resection.

RESEC'TION, *Resec'tio,* from *resccare,* (*re,* and *secare,*) 'to cut off.' A name, given, especially by the French surgeons, to operations in which the carious extremities of long bones, or the unconsolidated extremities of fractured bones forming irregular joints, are removed with the saw — *Resectio articulo'rum, Decapita'tio articulo'rum.*

*RESECTION,* see Amputation.

RESEDA CRISPATA—r. luteola—r. Lanceolata—r. luteola.

RESE'DA LUTE'OLA, *R. lanceola'ta* seu *crispa'ta, Lute'ola, Weld, Dyer's Weed.* A European plant naturalized in the United States, which was at one time used as a diaphoretic and diuretic.

RESERANS, Aperient.

RESERVE AIR, see Respiration.

*RESERVOIR DE LA BILE,* Gall-bladder — *r. du Chyle,* Receptaculum chyli — *r. des Larmes,* Lachrymal sac—r. of Pecquet, Receptaculum chyli — *r. de Pecquet,* Receptaculum chyli—r. of the Thymus, see Thymus.

RESIDENTIA, Sediment.

RESIDUAL AIR, see Respiration.

RESIMUS, Camus.

RESIN, *Resi'na, Rheti'nē.* A vegetable product, commonly dry and concrete, more or less brittle, inodorous or slightly odorous, insipid, or of an acrid warm taste; of a smooth, glassy fracture, heavier than water, inflammable, insoluble in water, soluble in alcohol, ether, and yolk of an egg, and negatively electrifiable by friction. Many resins are used in medicine; the greater part are purgative and irritating. Some act like acrid poisons.

RESIN, CAYENNE, Caoutchouc—r. of the Spruce fir, see Pinus abies.

RESINA, Resin — r. Abietis, Pinus Abies, Pinus picea — r. Abietis humida, Pinus abies — r. Abietis sicca, see Pinus abies — r. Alba, see Pinus sylvestris — r. Alba humida, see Pinus Abies—r. Cayennensis, Caoutchouc—r. Copal, Copal—r. Elastica, Caoutchouc—r. Flava, see Pinus sylvestris — r. Fluida Canadensis, see Pinus balsamea—r. Juniperi, Sandarac—r. Laricis, see Pinus larix — r. Lentiscina, see Pistachia lentiscus — r. Liquida pini balsameæ, see Pinus balsamea — r. Liquidi pini laricis, see Pinus larix — r. Nigra, Colophonia—r. Pini, see Pinus sylvestris—r. Pini empyreumatica liquida, see Pinus sylvestris — r. Pini abietis sponte concreta, see Pinus abies — r. Strobilina, see Pinus balsamea, and Pinus mughos—r. Terebinthi, see Pistachia terebinthus.

RESINA'TUM, *Rhetino'ton.* An epithet for wine impregnated with resin, and used by the ancients as a stomachic.

*RESINE DE GAÏAC,* see Guaiacum—*r. Gomart,* see Bursera gummifera — *r. de Lierre,* see Hedera helix.

RESINOCE'RUM, *Rhetinoce'ron,* from ῥητινη, 'resin,' and κηρος, 'wax.' A mixture of resin and wax.—Galen.

RESOLUTIO, Resolution—r. Membrorum, Paralysis.

RESOLUTIO MORBI. The resolution or disappearance of a disease; especially when without any critical evacuation.

RESOLUTIO ET DIABRŌSIS VENTRICULI, Gastromalacia—r. Nervorum, Paralysis — r. Ventriculi entopeptica, Gastromalacia—r. Virium, Dialysis.

RESOLU'TION, *Resolu'tio, Discus'sio,* from *resolvere,* (*re* and *solvere,* 'to loosen.') Removal or disappearance, as of a disease. Resolution is one of the terminations of inflammation, in which the inflamed part returns gradually, and without suppuration, to the healthy condition.

*RÉSOLUTION DES MEMBRES,* Paralysis.

RESOLVENTIA, Discutients.

RES'ONANCE, (F.) *Retentissement, Résonnance, Résonnement,* from *re,* 'again,' and *sono,* 'I sound.' 'A return of sound.' A resounding; a reverberation of sounds. A thrilling of the voice more loud than natural; or its existence in a part where it is not heard in health,—as detected by auscultation. A thickened and hardened state of the lungs, caused either by a mass of crude tubercles, or by inflammation, is generally considered to produce this phenomenon, by rendering the lung a better conductor of the murmur of the voice in the bronchi. Hence the origin of the term *Bronchoph'ony,* from βρονχος, 'bronchus,' and φωνη, 'the voice;' (F.) *Voix bronchique, Voix tubaire, V. bourdonnante.*

RESONANCE, VIBRATIONS OF, see Sound.

RESONITUS, Contra-fissura.

RES'ONANT, *Res'onans, Res'onus,* (F.) *Retentissant, Resonnant,* Resounding, see Resonance.

*RÉSONNANCE,* Resonance.

*RÉSONNEMENT,* Resonance.

RESORBENS, Absorbent.

RESORPTIO, Absorption, Resorption — r. Cutanea, see Absorption — r. Cutis, see Absorption.

RESORP'TION, *Resorp'tio,* from *resorbere,* (*re,* 'again,' and *sorbere,*) 'to absorb again.' Absorption of a fluid which has been previously deposited in a part by the exhalants,—as of pus, blood, serum, &c.

RES'PIRABLE, *Respirab'ilis.* Same etymon as Respiration. Capable of being breathed. Adapted for respiration.

RESPIRAMEN, Respiration.

RESPIRAMENTUM, Respiration.

RESPIRATIO, Respiration — r. Abolita, Apnœa—r. Brevis, Dyspnœa—r. Difficilis, Dyspnœa —r. Stertens, Stertor—r. Stertuosa, Stertor.

RESPIRA'TION, *Respira'tio, Anap'noē,* from *respiro,* (*re,* and *spiro,*) 'I take breath.' *Anapneu'sis, Pneu'sis spira'tio, Respira'men, Respiramentum, Respira'tus, Respir'itus, Spir'itus.* A function proper to animals, the object of which is, to place the materials of the blood—the mixture of the venous blood with lymph and chyle—in contact with atmospheric air, in order that it may acquire the vivifying qualities that belong to arterial blood. The organs for executing this function are, in the mammalia, birds, and reptiles, the *lungs.* In man, the respiration consists of mechanical and chymical phenomena. The mechanical are *Inspiration* and *Expiration.* The evident chymical phenomena consist in the formation of a certain quantity of carbonic acid, the absorption of a part of the oxygen of the air, and the disengagement of a quantity of water in the state of vapour. In the healthy condition the respiration is easy, gentle, regular, and without noise. In man, the respirations are generally about 35 per minute in the first year of life; 25 during the second; 20 at puberty; and 18 in the adult age.

The air of respiration has been divided into, *first,* the *residual air* or that which cannot be expelled from the lungs but remains after a full and forcible expiration, estimated at 120 cubic inches: *secondly,* the *supplemcntary* or *reserve* air or that which can be expelled by a forcible expiration, after an ordinary outbreathing, valued at 130 cubic inches: *thirdly,* the *breath, tidal* or *breathing* air, valued at 26 cubic inches: and *fourthly,* the *complementary* or *complemental* air, or that which

can be inhaled after an ordinary inspiration, which amounts to 100 cubic inches. This estimate gives 250 cubic inches as the average volume of air which the chest contains after an ordinary expiration.

*RESPIRATION BRONCHIQUE*, see Murmur, respiratory — *r. Exagérée*, see Puerile — *r. Hypervésiculaire*, see Puerile.

RESPIRATION, JERKING, (F.) *R. saccadée*. When the murmur of inspiration, in place of being continuous, is interrupted as by starts, it is called 'jerking.' It is a concomitant of incipient pleurisy, pleurodynia, spasmodic asthma, and tuberculosis of the lung with corresponding pleuritic adhesion.—Walshe.

RESPIRATION OF THE CELLS, Murmur, respiratory—r. Metallic, *Tintement métallique—r. Nulle*, see Murmur, respiratory — r. Proof, Docimasia pulmonum—*r. Puérile*, see Puerile—*r. Râpeuse*, see Murmur, respiratory — *r. Rude*, see Murmur, respiratory—*r. Silencieuse*, see Murmur, respiratory—*r. Saccadée*, R. jerking—*r. Soufflante*, Murmur, respiratory—*r. Supplémentaire*, see Puerile —r. Tubal, see Murmur, respiratory.

RESPIRA'TOR, same etymon. Various instruments, under this name, have been devised for the purpose of tempering the air before it reaches the lungs in winter. One of the best is that of Jeffrey, which is made of several layers of fine wire tissue.

RESPIRATORIUM VENTRIS, Diaphragm.

RESPIRATORIUS, Respiratory.

RES'PIRATORY, *Respirato'rius*, same etymon. Appertaining to respiration. An epithet applied to the *murmur* heard by auscultation in a healthy adult, during inspiration and expiration. It marks the entrance of the air into the cells, and its passage out of them. See Murmur.

RESPIRATORY, EXTERNAL, NERVE, see Thoracic nerves — r. Internal, nerves, Diaphragmatic Nerves — r. Nerve of the face, Facial Nerve — r. Superior, nerve, Spinal Nerve.

RESPIRATORY TRACT, *Tractus respirato'rius*. The middle column of the spinal marrow, described by Sir Charles Bell as that whence the respiratory nerves originate. See Nerves.

RESPIRATUS, Respiration.

RESPIRITUS, Respiration.

*RESSERRÉ. (VENTRE.)* Constipation.

RESTA BOVIS, Ononis spinosa.

RESTAGNATIO, Eructation.

RESTAURANS. Corroborant.

RESTAURA'TIO, *Refec'tio, Refec'tus, Analep'sis, Anatrep'sis, Anacom'idē, Analte'sis, Anacte'sis, Apocatas'tasis*. Restoration of strength, after disease or great fatigue; *Epanortho'sis, Recrea'tio, Redintegra'tio, Restaura'tio virium*. Return of the organs to their normal condition. *Recov'ery, Recupera'tion, Repara'tion*.

RESTAURATIO VIRIUM, see Restauratio.

REST HARROW, Ononis spinosa.

RESTIFORM'IS, from *restis*, 'a rope,' and *forma*, 'shape.' Shaped like a rope, as the 'Corpora *restiformia*.'

RESTIFORMIS PROCESSUS, Coracoïd.

RESTITUTIO, Reduction—r. Organica, Morioplastice—r. Partium deperditarum, Morioplastice.

RESTLESSNESS, Agitation.

RESTORATION, Restauratio.

RESTORATIVE. Corroborative.

RESTRICTIO INTESTINI RECTI vel ANI, Stricture of the rectum.

RESUMPTI'VUS, *Resumpto'rius*; from *re*, 'again,' and *sumere*, 'to take.' Causing to resume. *Resumpti'vum*. Any agent calculated to restore flesh and strength to one who has been reduced.

RESUMPTORIUS, Resumptivus.

RESURRECTION-MAN, Resurrectionist.

RESURREC'TIONIST, *Resurrection-man, Body snatcher:* from *re*, and *surgere*, 'to arise.' An individual who violates the sanctuary of the grave to obtain subjects for dissection.

RESUSCITA'TION, *Resuscita'tio*, from *resuscita're*, (*re*, and *suscitare, sursum citare* seu *ciere*,) 'to move up,' 'to stir up anew.' *Revivifica'tion*. The restoration of persons, apparently dead, to life. See Asphyxia and Suffocation.

RETCHING, Vomiturition.

RETE, Plexus — r. Malpighii, Corpus mucosum.

RETĒ, *Rctic'ulum*; 'a net;' *Dict'yon*, (F.) *Réseau*. A name given to the interlacing and decussation of blood-vessels, lymphatics, fibres, and nerves when they form a kind of network.

RETĒ has also been applied to the *epiploon*.—Castelli.

RETĒ MAJUS, Epiploon, gastro-colic.

RETĒ MIRAB'ILE, (F.) *Réseau admirable, R. merveilleux*. A name given to the ramifications and anastomoses of the internal carotid and vertebral arteries at the base of the brain.

RETĒ MIRABILE vel RETĒ VASCULO'SUM MALPIG'HII is the plexus formed on the cells of the lungs by the minute ramifications of the pulmonary artery.

RETĒ MUCOSUM, Corpus mucosum.

RETĒ seu RETĒ VASCULO'SUM TESTIS. An irregular plexus or network, formed by the communication of the *Vasa recta* at the upper and back part of the testicle. These Vasa recta are sent out at the back part of the testicle, from the convoluted seminal tubes. The Rete Vasculosum testis sends out from twelve to eighteen straight tubes, called *Vasa efferentia*, which convey the semen from the testes to the epididymis.

RETENTIO, Retention — r. Aerea, Dyspnœa — r. Alvina, Constipation — r. Bilis, Ischocholia.

RETENTIO FLUXUS HÆMORRHOÏDALIS. Suppression of the hæmorrhoidal flux.

RETENTIO FŒTŪS, Dystocia—r. Lactis, Ischogalactia—r. Lochiorum, Ischiolochia—r. Mensium, see Amenorrhœa—r. Spermatis, Ischospermia — r. Sudoris, Hydroschesis.

RETEN'TION, *Reten'tio, Apolep'sia, Apolep'sis*, from *retinere*, (*re*, and *tenere*,) 'to hold back.' Accumulation of a solid or liquid substance, in canals intended for its excretion, or in a reservoir, intended to contain it for a short period.

RETENTION OF URINE; *Paru'ria Retentio'nis vesica'lis, Ischu'ria vesica'lis, Retentio Uri'næ*, (F.) *Rétention d'urine*. A disease in which the urine accumulated in the bladder cannot be evacuated; or, at least, cannot be passed without extreme difficulty. In the former case, the retention is said to be *complete*; in the latter, *incomplete*. Many writers have distinguished three degrees of this affection, to which they have given the names *Dysury, Strangury*, and *Ischury*. Retention of urine may depend upon loss of contractility, paralysis of the bladder, &c., or on some obstacle to the passing of the urine, as in cases of pressure of the womb on the bladder, of tumours in its vicinity, foreign bodies in its cavity, inflammation of the urethra, swelling of the prostate, stricture, &c. The pain is extremely violent, and the bladder may be found distended above the pubis. The treatment consists in introducing the catheter, or puncturing the bladder, and in combating the cause, which has produced the retention, by particular means adapted to each case.

*RETENTISSANT*, Resonant.

*RETENTISSEMENT*, Resonance—*r. Autophonique*, see Autophonia.

RETIA UTERI, see Uterus.

RETIC'ULAR, *Re'tiform, Reticula'ris, Ret'inus, Amphiblestroï'des, Dyctoï'des, Retifor'mis,* from *rete,* 'a net.' That which resembles a net. An epithet applied to many structures in the body.

Reticular Body, Corpus mucosum — r. Substance, Cellular tissue.

RETICULARIA OFFICINALIS, Lichen pulmonarius.

RETIC'ULUM: diminutive of *retc,* 'a net.' The *Bonnet* or *Honeycomb bag* — the second stomach of the ruminant animal. See also, Epiploon, and Rete.

Reticulum Cutaneum, Rete mucosum — r. Mucosum, Rete mucosum.

RETIFORM, Reticular.

RET'INA, from *rete,* 'a net:' *Tu'nica ret'ina* seu *reticula'ris* seu *retifor'mis* seu *in'tima oc'uli, Involu'crum reti compara'tum, Verricula'ris membra'na, Amphiblestroi'des membrana.* A soft, pulpy, grayish, semi-transparent, very thin membrane; extending from the optic nerve to the crystalline, embracing the vitreous humour, and lining the choroïd; without, however, adhering to either of those parts. It terminates by a defined edge — *margo denta'tus* — at the posterior extremities of the ciliary processes. It is constituted, according to most anatomists, by the expansion of the optic nerve. The retina appears to be formed of two laminæ; so joined together, that it is almost impossible to separate them. The one — the innermost — is medullary, and pulpy; the other—the outer—is stronger, and fibro-vascular. The retina is the essential organ of vision; on it the images of objects are impressed. Both it and the optic nerve are devoid of general sensibility. They may be punctured or lacerated without pain being experienced. The nerve of general sensibility distributed to the eye is the fifth pair.

RETINACULA, see Retinaculum — r. Morgagnii, see Frœna of the valve of Bauhin.

RETINAC'ULUM, from *retinere,* (*re,* and *tenere,*) 'to hold back.' A surgical instrument, formerly used in the operation of castration; and in that of hernia, to prevent the intestines from falling into the scrotum. — Scultet. *Retinacula* are also band-like extensions of a cellulo-membranous structure, which seem to suspend the ovum in the Follicle of De Graaf. They appear to correspond to the chalazæ of the egg of the bird.

Retinaculum, *Bride.*

Retinac'ulum Ten'dinum Peroneo'rum, *Vagi'na malleola'ris extern'a.* The ligamentous sheaths that retain in situ at the outer ankle the tendons of the peroneal muscles.

RETINI'TIS, *Inflamma'tio Ret'inæ, Amphiblestroidi'tis, Dictyi'tis,* from *retina* and *itis,* a suffix denoting inflammation, — a term of hybrid formation. Inflammation of the retina; an uncommon affection, except as an accompaniment of other forms of ophthalmia.

RETINOS'COPY, *Retinoscop'ia,* from *retina,* and σκοπεω, 'I view.' Examination of the retina.

RETINUS, Reticular.

RETORT', *Retor'ta, Batia, Cornu, Cornu'ta, Cornes'ta, Cornumusa,* (F.) *Cornue,* from *retorqueo,* (*re,* and *torqueo, tortum,*) 'I bend back.' A vessel, commonly of glass or earthenware, employed in distillation. It may be *plain,* or have a *tubulure* for admitting substances whilst the distillation is going on. In the latter case, it is said to be *tu'bulated,* (F.) *Cornue tubulée.*

RETRAC'TION, *Retrac'tio,* from *retrahere,* (*re* and *trahere,*) 'to draw back.' State of a part, when drawn towards the centre of the body or backwards; — as retraction of the testicles. Sometimes it is used synonymously with *shortening* or *drawing up;* as in *retraction* of the thigh.

*RÉTRACTION DE LA MATRICE,* Retroversio uteri.

RETRACTOR ANGULI ORIS, Buccinator.

RET'RAHENS AURIS, *Poste'rior Auris, Tricauda'lis, Triceps Auris, Retrahens Auric'ulæ, R. Auriculam, Secun'dus proprio'rum Auric'ulæ, Bicauda'lis, Dep'rimens Auric'ulæ, Proprius Auris externæ,* (F.) *Mastoïdo-conchinien, Mastoïdo-auriculaire* (Ch.), *Auriculaire postérieur.* It consists of one or more small fasciculi or fleshy, thin, somewhat irregular fibres, situated behind the ear. These are attached to the mastoid process, and pass horizontally forwards, to terminate at the convexity formed by the concha of the ear. If this muscle had any use, it would carry the ear backwards.

*RÉTRÉCISSEMENT,* Arctatio, Stricture.

RETRIMENTA VESICÆ, Urine.

RETRIMENTUM, Excrement.

RETROCES'SION, *Retroces'sio, Retroces'sus, Retrogres'sus,* from *retrocedere,* (*retro,* 'backwards,' and *cedere,* 'to give place.') The act of going back. A disappearance or metastasis of a tumour, eruption, &c., from the outer part of the body to the inner.

RETROCESSUS, Retrocession.

RETROFLEXIO UTERI, Retroversio uteri.

RETROGRESSUS, Retrocession.

RETROPHARYNGE'AL, *Retropharynge'us,* from *retro,* 'backwards,' and *pharynx,* 'the pharynx. Relating to parts behind the pharynx,— as '*retropharyngeal* abscess,'—an abscess behind the pharynx.

*RÉTROPULSION DE LA MATRICE,* Retroversio uteri.

RETROVACCINA'TION; from *retro,* 'backwards,' and *vaccination.* Vaccination with matter obtained from the cow, after inoculating the animal with vaccine matter from the human subject.

RETROVER'SIO U'TERI, *Retroversion of the Uterus, Ædopto'sis Uteri retrover'sa, Retroflex'io Uteri, Anopod'isis* seu *Anapodis'mus Uteri,* (F.) *Rétroversion, Rétraction, Obliquité* ou *Rétropulsion de la Matrice.* A change in the position of the uterus, so that the fundus of the organ is turned towards the concavity of the sacrum, whilst the neck is directed towards the symphysis pubis. This displacement is commonly attended with constipation, tenesmus, and retention of urine. Its usual period of occurrence is between the third and fourth months of pregnancy; before the uterus has escaped above the superior aperture of the pelvis. In the treatment, the catheter must be regularly used twice a day, until the uterus, by its growth, rises above the pelvis. The catheter should be small, flat, and curved considerably more than common, in consequence of the distorted course of the urethra. The bowels must be kept open; and absolute rest, in a recumbent posture, be enjoined. Should it be impracticable to draw off the urine, attempts must be made to replace the uterus. The woman being on her hands and knees, the fore and middle fingers of the accoucheur's left hand are to be passed up the rectum to the fundus uteri; which they must elevate, whilst the cervix uteri is carefully depressed by two fingers of the right hand in the vagina. Should the fingers employed to elevate the fundus not be long enough to effect this object, a piece of whalebone may be substituted, having a small piece of sponge attached to one extremity as a pad.

*RÉTROVERSION DE LA MATRICE,* Retroversio uteri.

REUNIO, Synthesis—r. Partium separatarum, see Synthesis—r. per Primam intentionem, see Intention—r. per Secundam intentionem, see Intention—r. Vasorum, Anastomosis.

*RÉUNION PRIMITIVE*, see Intention—*r. Secondaire*, see Intention.

*RÉVASSERIE*, Incoherence; see Somnium.

*RÈVE*, Somnium.

*REVEIL*, see Sleep—*r. en Sursaut*, see Sleep.

REVELLENT, Derivative.

REVERY, Aphelxia.

REVIVIFICATION, Resuscitation.

*RÉVULSIF*, Derivative.

REVUL'SION, *Revul'sio*, from *re*, and *vellere*, 'to pluck;' *Antis'pasis*. The act of turning the principle of a disease from the organ in which it seems to have taken its seat. Rubefacients, vesicatories, bleeding in the foot, &c., are often used for this purpose. See Derivation.

REVULSIVE, Derivative—r. Bleeding, see Bloodletting.

REVULSORIUS, Derivative.

REX METALLORUM, Aurum.

REYNOLDS'S SPECIFIC, see Vinum colchici.

RHA, Rheum.

RHABARBARUM, Rheum—r. Album, Convolvulus mechoachan—r. Antiquorum, Rheum Rhaponticum—r. Dioscoridis, Rheum Rhaponticum—r. Monachorum, Rumex patientia—r. Nigrum, Convolvulus jalapa—r. Pauperum, Thalictron—r. Sibericum, Rheum—r. Tartaricum Rheum—r. Turcicum, Rheum.

*RHABARBE*, Rheum—*r. Blanche*, Convolvulus mechoacan—*r. des Moines*, Rumex Alpinus.

RHABDOIDES (SUTURA), Sagittal suture.

*RHABILLEUR*, *Renoueur*.

RHACHETÆ, Rhachitæ.

RHACHETRUM, Medulla spinalis.

RHACHIÆI, Rhachitæ.

RHACHIAGRA, Rachisagra.

RHACHIALGIA, Rachialgia, Rhachiodynia, Spinal irritation.

RHACHIALGITIS, Spinal irritation, Myelitis.

RHACHIDAGRA, Rachisagra, Rachialgia, Rhachiodynia.

RHACHIOCYPHOSIS, Gibbositas.

RHACHIODYN'IA; from ραχις, 'the vertebral column,' and οδυνη, 'pain;' *Rhachial'gia*. Pain in the vertebral column.

RHACHIOMYELITIS, Myelitis.

RHACHIOPLEGIA, Paraplegia.

RHACHIOSCOLIOMA, Scoliosis.

RHACHIOSCOLIOSIS, Scoliosis.

RHACHIOSTROPHO'SIS; from ραχις, 'the vertebral column,' and στρεφω, 'I turn;' *Contor'sio colum'næ vertebra'lis*. Deviation of the vertebral column.

RHACHIOT'OMUS, *Rhachiot'omum*; from ραχις, 'the vertebral column,' and τομη, 'incision.' An instrument for opening the vertebral column.

RHACHIPARALYSIS, Paraplegia.

RHACHIPHYMA, Rachiphyma.

RHACHIRRHEUMA, Lumbago.

RHACHIS, Vertebral column—r. Nasi, see Nasus.

RHACHISAGRA, Rachisagra.

RHACHI'TÆ, from ραχις, 'the vertebral column;' *Rhachiæ'i*, *Rachi'tæ*, *Rhache'tæ*, or *Rachiæ'i*. The muscles of the spine.

RHACHITES, Medulla spinalis.

RHACHITICUS, Rachiticus.

RHACHITIS, Rachitis—r. Adultorum, Mollities ossium—r. Spinalis, Rachisagra.

RHACHITISMUS, Rachitis.

RHACHOSIS, Rachosis.

RHACHUS, *Rhacus*, *Rhagus*; from ρησσειν, 'to tear.' A wrinkle. A laceration of the skin. A lacerated ulcer—*ulcus lac'erum*.

RHACUS, Rhachus, Wrinkle.

RHÆBOCRANIA, Torticollis.

RHAG'ADES, ραγαδες, *Rhaga'dia*; from ρηγνυμι, 'to break or rend;' *Scissu'ræ*, *Fissu'ræ*, *Fimæ*. Ruptures, chaps, or narrow and long ulcers, which form near the origin of mucous membranes, especially around the anus, and which are generally owing to the syphilitic virus.

RHAGADES, see Fissure.

RHAGĒ, *Ragē*; ραγη. Same etymon. A suffix denoting violent rupture or discharge, as in Hemorr*hage*, Menorr*hagia*, &c.

RHAGĒ, Fissure.

RHAGES, Uvæ passæ.

RHAGODEITIS, Uveitis.

RHAGOÏ'DES, *Rhago'des*, *Rhagoïdeus*, *Rhagicus*, from ραξ, 'a grape.' Grape-like; as *Tunica Rhagoides*: the uvea. Also, the choroid coat of the eye.

RHAGUS, Rhachus, Wrinkle.

RHAMNUS, *Rhamnus cathar'ticus*, *Spina cervi'na* seu *domes'tica*, *Rhamnus solutivus*, *Spina infecto'ria*, *Cervispi'na*, *Buckthorn*, *Purging buckthorn*, (F.) *Nerprun purgatif*. *Family*, Rhamnoideæ. *Sex. Syst.* Pentandria Monogynia. The berries—*Rhamni Baccæ*—have a faint and disagreeable odour; and bitterish, nauseous taste. They are cathartic, and are apt to excite griping, which must be obviated by the use of diluents.

RHAMNUS ALATER'NUS, *R. Hispan'icus*, *Alater'nus latifo'lius*, *Common alaternus*, (F.) *Alaterne*. The leaves have been used as detergents and astringents, in the form of gargle especially.

RHAMNUS FRAN'GULA. The *Black Alder*, *Frangula Alnus*, *Alnus Nigra*, (F.) *Aune noir*, *Bourdane*, *Bourgène*. All the parts of this tree, as well as of the common alder, are astringent and bitter. The bark is most so. The inner, yellow bark of the trunk or root acts as a cathartic. It has also been employed as an anthelmintic.

RHAMNUS HISPANICUS, R. alaternus—r. Jujuba, see Jujube—r. Lotus, see Jujube—r. Ziziphus, see Jujube.

RHANTER, Canthus, (greater.)

RHAPHANEDON, Raphanedon.

RHAPHANIA, Raphania.

RHAPHANIS, Raphanus hortensis.

RHAPHANUS, Raphanus hortensis.

RHAPHE, Raphe, Suture.

RHAPHOSYMPH'YSIS; from ραφη, 'suture,' and συμφυσις, 'union.' Union by suture,—as of the bones of the cranium.

RHAPHYS, Raphanus hortensis.

RHAPONTICUM, Rheum Rhaponticum—r. Vulgare, Centaurea centaurium.

*RHAPONTIQUE*, Rheum rhaponticum.

RHAPS, Raphanus hortensis.

RHAPYS, Raphanus hortensis.

RHATANIA, Krameria ratanhia.

RHAX, see Vitis vinifera.

RHEGE, Cramp, Contusion, Laceration.

RHEGMA, Cramp, Contusion, Laceration, Rhexis—r. Ligamentare, Apospasma.

RHEGMUS, Cramp, Contusion, Laceration.

RHEMBASMUS, Somnambulism.

RHEMBĒ, *Rhembus*; from ρεμβειν, 'to wander about.' Irregularity in the return of febrile paroxysms.

RHEMBUS, Rhembe.

RHENCHUS, Rattle, Snoring.

RHENXIS, Rattle, Snoring.

RHEON, Rheum.

RHETINE, Resin.

RHETINOCERON, Resinatum.

RHETINOTON, Resinatum.

RHEUM, (pronounced *room,*) *Rheu'ma,* (F.) *Rhume;* from ῥεω, 'to flow.' Any thin watery discharge from the mucous membranes or skin; as the thin discharge from the air passages arising from cold.

Rheum, Salt. A popular name in the United States, like 'tetter,' for various cutaneous affections of the eczematous and herpetic forms more especially. It is at times applied to a kind of chronic psoriasis; and likewise to cutaneous affections in those who immerse the hands in metallic or acid solutions. Webster defines it "a vague and indefinite popular name, applied to almost all the non-febrile cutaneous eruptions which are common among adults, except ringworm and itch."

Rhe'um, *Rhabar'barum, Rheon, Rha, Rhœum, Lap'athum orienta'lē, L. Chinen'sē, Rhabar'barum ve'rum, R. Tartar'icum, R. Siber'icum, R. Tur'cicum, Rhubarb,* (F.) *Rhabarbe. Family,* Polygoneæ. *Sex. Syst.* Enneandria Trigynia. The root—*Rheïm*—is the part used in medicine. Its odour is aromatic, peculiar, and rather nauseous; taste, somewhat aromatic, subacrid, bitterish, and astringent. It colours the saliva and the urine yellow. It is easily pulverized, and forms a powder of a bright buff-yellow colour. Both water and spirit extract its virtues. Rhubarb root is purgative, stomachic and astringent. (?) It is chiefly used for the properties first mentioned. Externally, the powder is sometimes sprinkled over ulcers, to assist their granulation. Dose, ℈j to ʒss of the powder. In a smaller dose, it is stomachic.

Numerous species of Rheum, *Rh. palmatum, Rh. undulatum,* and *Rh. compactum,* have purgative roots.

The rhubarbs most used in the United States are the *Chinese* or *India Rhubarb*—*Rheum Sinen'sē* vel *In'dicum;* the *Russian, Turkey,* or *Bucharian Rhubarb—Rheum Rus'sicum* vel *Tur'icum;* and *European Rhubarb.*

Rheum Compactum, Rheum—r. Indicum, see Rheum—r. Palmatum, Rheum.

Rheum Rhapon'ticum, *Rhapon'tic Rhubarb; Rhapon'ticum, Rhabar'barum Dioscor'idis, R. Antiquo'rum,* (F.) *Rhapontique, Rhapontic.* The root of this seems to have been the rhubarb of the ancients. It is more astringent than that of the Rheum palmatum, and less purgative; for the latter purpose, two or three drachms being required for a dose. *French, Rhapontic,* or *Krimea Rhubarb,* is obtained from this species, as well as from *Rh. undulatum,* and *Rh. compactum.*

Rheum Russicum, see Rheum—r. Sinense, see Rheum—r. Turcicum, see Rheum—r. Undulatum, see Rheum.

RHEUMA, Catarrh, Diarrhœa, Rheum, Rheumatism. Also, inflammation of a fibrous tissue, as in rheumatism and gout.—Fuchs.

Rheuma Catarrhale, Bronchitis, (chronic)—r. Epidemicum, Bronchitis, chronic, Catarrh, epidemic—r. Pectoris, Catarrh—r. Uteri, Leucorrhœa.

RHEUMAPYRA, Rheumatism, acute.

RHEUMARTHRITIS, see Rheumatism, acute.

RHEUMARTHROSIS, see Rheumatism, acute.

RHEUMATALGIA, Rheumatism, chronic—r. Arthritica, see Rheumatism, acute.

RHEUMAT'IC, *Rheumat'icus, Rheumatis'mal,* (F.) *Rhumatismale, Rhumatique.* Belonging to rheumatism; as rheumatic fever. Also, applied to one affected with rheumatism; (F.) *Rhumatisant.*

Rheumat'ic Diath'esis, *Diath'esis rheumat'ica.* The special condition of the body that gives occasion to rheumatism. It may exist without presenting the usual phenomena in the joints; whilst the heart may be seriously affected.

RHEU'MATISM, *Catarrhœ'a;* from ῥευμα, 'a defluxion, catarrh.' *Dolor Rheumat'icus et arthrit'icus,* (Hoffman,) *Rheumato'sis, Myoso'tis, Rheuma, Myodyn'ia,* (F.) *Rhumatisme.* A kind of shifting phlegmasia, sometimes seated in the muscles, sometimes in the parts surrounding the joints; and at others, within them. Hence the names *Muscular, Articular,* and *Synovial,* which have been applied to it. The disease may be *acute,* or *chronic.*

Rheumatism of the Abdomen, Cœliorrheuma.

Rheumatism, Acute, *Rheumatis'mus acu'tus, Rh. articulo'rum acu'tus, Rh. universa'lis febri'lis, Arthro'sia acuta, Rheumatismus, Rh. inflammato'rius* seu *hypersthen'icus, Rheumat'ic Fever, Rheumatop'yra, Rheumap'yra, Febris rheumat'ica inflammato'ria, Syn'ocha rheumat'ica, Myoso'tis, Myi'tis, Cauma rheumatis'mus, Arthri'tis rheumatismus, Arthro-rheumatis'mus, Synovi'tis rheumatisma'lis, Hæmo-arthri'tis,* (F.) *Rhumatisme aiguë, Fièvre rhumatismale,* usually comes on with the ordinary symptoms of fever; soon after which, or simultaneously, or even before the appearance of febrile signs, excruciating pains are felt in different parts of the body, particularly in the larger joints, which are more or less red and swollen; the pain shifting from one to the other, at times with great rapidity. The disease rarely terminates in less than six weeks, during the greater part of which period the febrile symptoms remain severe; and what is peculiar to the disease, the skin may be covered daily with a profuse perspiration, although it feels extremely hot, and the pulse appears in no way modified by it. It is one of the essential symptoms of the affection, and consequently affords no relief. The only danger to be apprehended from acute rheumatism, notwithstanding the apparent severity of the symptoms, is the translation or extension of the disease (*metastat'ic rheu'matism*) to some internal part, especially to the heart. This tendency must always be borne in mind. *Acute* rheumatism seldom terminates in *chronic;* they who are liable to the former are rarely so to the latter, and conversely. The disease will generally run its course in spite of treatment. The usual antiphlogistic plan had better be pursued during the first days of the disease. Blood-letting may be employed, if the vigour of the patient and of the disease seem to require it; but, although the blood is generally buffy, bleeding does not usually seem to afford much relief. The bowels must be kept open; effervescent draughts be administered, and opium be given in full doses to allay pain. This is, generally, all that is necessary during the first week; after which, advantage will usually be obtained from the exhibition of the sulphate of quinia with sulphuric acid. It does not augment the excitement, and will be found proper in almost all cases. Rheumatic inflammation is very different from other varieties, and this may account for the anomaly. After a few weeks, the disease usually goes off, but leaves the patient very liable to a recurrence on slight exposures or errors of diet: at times, acute rheumatism of the joints puts on the appearance of gout, and seems to be a complication of the two affections. It is then called *Gouty* or *Arthrit'ic rheumatism* or *Rheumatic gout, Rheumatal'gia arthrit'ica, Rheumarthro'sis, Rheumarthri'tis, Arthri'tis rheumat'ica* seu *juveni'lis.*

Rheumatism of the Arm, Brachiorrheum—r. Arthritic, see Rheumatism, acute—r. of the

Bladder, Cystorrheuma—r. of the Bowels, Enterorrheuma.

Rheumatism, Cap'sular, *Rheumatis'mus capsula'ris.* Rheumatism seated in the lining membrane of the joints and bursæ of the tendons. The parts most liable to its attacks are the feet and hands, where it is generally easily recognised by the enlargement of the joints; but the peculiar characters of the disease are, perhaps, most strikingly seen when it attacks the knee.

Rheumatism of the Chest, Pleurodynia.

Rheumatism, Chronic, *Arthro'sia chron'ica, Rheumatismus chronicus* seu *nonfebri'lis, R. vulga'ris* seu *invetera'tus* seu *habitua'lis* seu *frig''idus, Rheumatal'gia, Rheumatodyn'ia, Arthrodyn'ia, Arthritis arthrodynia,* (F.) *Rhumatisme chronique, Rhumatalgie,* is attended with pains in the hips, shoulders, knees, and other large joints. These are, sometimes, confined to one joint; at others, shift from one to another, without occasioning inflammation, or fever. In this manner, the complaint often continues for a great length of time, and then goes off. There is no danger attendant upon it; but the patient may become lame, and is always liable to paiuful recurrenees. Neither variety generally terminates in suppuration; but effusion of coagulable lymph is apt to oecur, so as to occasion permanent thickening of the parts. The great preventive of chronic rheumatism, and one of the most valuable curative agents, is flannel, worn next the skin. The whole class of rubefacients may, also, be used with advantage. The warm bath, especially the natural warm bath, the temperature of which does not vary, is perhaps the most suecessful remedy of all.

Rheumatism of the Extremities, Acrorrheuma—r. of the Faee, Prosoporrheuma—r. Gouty, see Rheumatism, acute—r. of the Heart, Cardiorrheuma—r. Lead, see Lead rheumatism—r. of the Leg, Seelorrheuma—r. of a Limb, Merorrheuma—r. Loeal, Merorrheuma—r. of the Loins, Lumbago—r. Metastatie, see Rh. acute—r. of the Neck, Torticollis—r. Partial, Merorrheuma.

Rheumatism, PreÄbdom'inal, (F.) *Rhumatisme pré-abdominal.* Rheumatism of the museles of the anterior and lateral portions of the abdomen; supposed by MM. Génest and Requin to be the same as the *nervous affection of the peritoneum* of Gooeh.

Rheumatism of the Skin, see Dermalgia—r. Topieal, Merorrheuma—r. of the Uterus, Metrorrheuma.

Rheumatism, Visceral. Rheumatism affeeting the muscular or fibrous tissues of the viseera.

Rheumatism Weed, Pyrola maculata, P. umbellata.

RHEUMATISMAL, Rheumatic.

RHEUMATISMUS, Abdominis, Coeliorrheuma—r. Acutus, Rheumatism, acute—r. Articulorum acutus, Rheumatism, aeute—r. Brachii, Brachiorrheuma—r. Canerosus, Neuralgia faeiei—r. Cervieis, Tortieollis—r. Colli, Torticollis—r. Cordis, Cardiorrheuma—r. Cruris, Seelorrheuma—r. Dorsalis, Lumbago—r. Extremitatum, Acrorrheuma—r. Faciei, Prosoporrheuma—r. Febrilis, Dengue—r. Inflammatorius seu hypersthenicus, Rheumatismus acutus—r. Intestinorum, Enterorrheuma—r. Intestinorum cum ulcere, Dysentery—r. Larvatus, Neuralgia faeiei—r. Localis, Merorrheuma—r. Membrorum singulorum, Merorrheuma—r. Non febrilis, Rheumatism, acute—r. Partialis, Merorrheuma—r. Pectoris, Pleurodynia—r. Phlegmonodes, Myositis—r. Spurius nervosus, Neuralgia—r. Universalis febrilis. Rheumatism, aeute—r. Uteri, Metrorrheuma—r. Vesicæ urinariæ, Cystorrheuma—r. Vulgaris seu inveteratus seu habitualis seu frigidus, Rheumatism, chronic.

RHEUMATODYNIA, Rheumatism, chronic.

RHEUMATOPHTHAL'MIA, *Rheumophthal'mia;* from *ρευμα,* 'rheumatism,' and *οφθαλμια,* 'inflammation of the eyes.' Rheumatic ophthalmia.

RHEUMATOPYRA, Rheumatism, acute.

RHEUMATOSIS, Rheumatism.

RHEUMOPHTHALMIA, Rheumatophthalmia, Sclerotitis.

RHEXIS, *Rhegma, Dirup'tio, Rup'tio, Ruptu'ra, Rupture.* Rupture of a vessel or organ. Spontaneous opening of an abscess.

Rhexis Oc'uli. Bursting of the eye from any cause; spontaneous or exeited.

RHICNO'SIS, from *ρικνοομαι,* 'to beeome wrinkled;' *Cutis corruga'tio.* Wrinkling of the skin from extenuation of the body; opposed to *εκτασις,* or distension from repletion.

RHIGOS, Rigor.

RHIN, Nasus.

RHINAL'GIA, *Rhinodyn'ia,* from *ριν,* 'the nose,' and *αγλος,* 'pain.' Pain in the nose.

Rhinal'gia ab Intru'sis. Pain in the nose from foreign bodies.

Rhinal'gia Vermino'sa. Pain in the nose from worms.

RHINAN'CHONĒ, *Rhinan'gia, Rhinostegno'sis;* from *ριν,* 'the nose,' and *αγχονη,* 'narrowness.' Contraction of the nose. Snuffles.

RHINANGIA, Rhinanchone, Snuffles

RHINCHOS, Rostrum.

RHINENCEPHALIA, Cyelopia.

RHINEN'CHYSIS, *Rhinenchys'ia,* from *ριν,* 'the nose,' *εν,* 'in,' and *χνω,* 'I pour.' An infusion or injeetion, made into the nostril, with a syringe called *Rhinen'chites.*

RHINES, Nares.

RHINI'TIS, *Nasi'tis,* from *ριν, ρινος,* 'the nose,' and *itis,* denoting inflammation. Inflammation of the nose. Coryza.

Rhinitis Ulcerosa, Ozæna.

RHINOBLENNORRHŒA, Rhinorrhœa.

RHINOC'ACĒ, *Cory'za scarlatino'sa;* from *ριν,* 'the nose,' and *κακος,* 'evil.' The offensive discharge from the nose, and other symptoms indicating a morbid condition of the Schneiderian membrane that aecompany the worst forms of searlatina.

RHINOCATARRHUS, Coryza.

RHINOCNES'MUS, from *ριν,* 'the nose,' and *κνησμος,* 'itehing.' Itching of the nose.

RHINODYNIA, Rhinalgia.

RHINOPHO'NIA, from *ριν,* 'the nose,' and *φωνη,* 'the voice.' A nasal voice, called, also, *Dyspho'nia immodula'ta nasa'lis, Parapho'nia nasalis, Paraphonia res'onans, Psellis'mus na'sitas, Mycteropho'nia, Na'sitas, Vox nasa'lis, Parala'lia nasa'lis.* Speaking through the nose.

RHINOPLAS'TIC, *Rhinoplas'tica* (ars), from *ριν,* 'the nose,' and *πλασσω,* 'I form.' An epithet applied to the operation for forming a new nose. The *Taliacotian operation,* so called because described by Tagliacozzi. It consists in bringing down a portion of flesh from the forehead, and causing it to adhere to the anterior part of the remains of the nose.

RHINOP'TIA, from *ριν,* 'the nose,' and *οπτομαι,* 'I see.' The aet of seeing over the nose. Squiuting over the nose.

RHINORRHAGIA, Epistaxis.

RHINOR'RHAPHY, *Rhinorrhaph'ia,* from *ριν,* 'nose,' and *ραφη,* 'a suture.' An operation for the removal of epicanthis, which consists in pinching up a longitudinal fold of the skin, including this fold in two elliptical incisions, remo-

ving it, and bringing together the edges of the wound by harelip suture.

RHINORRHŒ'A, *Rhinoblennorrhœ'a*, from ῥιν, ῥινος, 'the nose,' and ῥεω, 'I flow.' A discharge of limpid mucus from the nose without any inflammatory symptom. A gleet from the nose.

RHINO'SIS, from ῥινος, 'a skin, leather,' or from ῥικνος, 'rugous.' The state of looseness and excess of skin observed in phthisis. — Vogel.

RHINOSTEGNOSIS, Rhinanchone.

RHIPTASMOS, Jactation.

RHIPTOLUSIA, Affusion.

*RHIS*, Nasus.

RHIZA, Radix.

RHIZAGRA, Punch.

RHIZO'MA, *Rhizome*, from ῥιζα, 'a root.' The part of the root of a plant, which consists of wood or flesh, as in the carrot.

RHIZOPH'AGUS, from ῥιζα, 'a root,' and φαγω, 'I eat.' One who lives on roots.

RHIZOTOMIST, see Simples.

RHIZOTOMUS, Apothecary.

RHOA, Punica granatum.

RHODELÆ'ON, *Oleum rosa'rum*. Oil of roses, or oil impregnated with roses.

RHO'DIA, *Rhodi'ola ro'sea*, *Rosea*, *Rosewort*, (F.) *Rhodiole*. *Sex. Syst.* Dicœcia Octandria. The root, *Roseroot*, when dry, has a very pleasant smell, and is slightly astringent. It is not used.

RHO'DINUS, *Rho'dius*, *Rosa'ceus*, *Ro'seus*, *Rosa'tus*. Rosy. Formed of, or containing, roses.

RHODIOLA ROSEA, Rhodia.

*RHODIOLE*, Rhodia.

RHODITES VINUM. Wine in which roses have been macerated.

RHO'DIUM LIGNUM, *Rhodium* or *Rosewood*. The wood or root of a tree supposed to be *Genis'ta Canarien'sis* of Linnæus. (F.) *Bois de rose*, *Bois de Chypre*. *Family*, Leguminosæ. *Sex. Syst.* Diadelphia Decandria. The essential oil is a perfume, and possesses cordial and tonic virtues. Its smell is attractive to fish, rats, &c.

RHODIUS, Rhodinus.

RHODODAPHNIS, Nerium oleander.

RHODODEN'DRON CHRYSAN'THEMUM, *R. chrysan'thum* seu *au'reum* seu *officina'lē*, the *Olean'der*, *Rose-bay*, *Yellow rhododendrum*, *Mountain Laurel*, (F.) *Rosage*, *R. chrysanthe*. *Nat. Ord.* Ericaceæ. *Sex. Syst.* Decandria Monogynia. This plant has been recommended in rheumatism, gout, and syphilis. In an overdose, it produces acro-narcotic symptoms.

RHODODEN'DRON MAX'IMUM, *Great Laurel*, *American Rose-bay*. An indigenous shrub, *Order*, Ericaceæ, which flowers in July. It is stimulant and astringent, and has been used by the Indians in gout and rheumatism.

RHODOME'LA PALMA'TA, *Dulse*, *Sac'charine Fucus*. One of the Algæ, eaten in large quantities throughout the maritime countries of the north of Europe, and in the Grecian Archipelago.

RHODOMELI, Mel rosæ.

RHODON, Rosa centifolia.

RHODOSACCHARUM, Confectio rosæ gallicæ.

RHODOSTACTON, Mel rosæ.

RHODOSTAGMA, Aqua rosæ.

RHŒA, Punica granatum.

RHŒAS, Papaver rhœas.

RHOEBDESIS, Absorption.

RHŒUM, Rheum.

RHOGMOS, Rattle.

RHOI'TES, ροιτης, a wine impregnated with the pomegranate; from ροες, *Pomegranates*, — Dioscorides. A confection, made by boiling the juice of the pomegranate in honey. — Paulus of Ægina.

RHOMBOÏDEUS, from ῥομβος, 'a rhombus,' whose sides are equal, with two obtuse and two acute angles. *Rhomboïdeus major* and *minor*, *Rhomboï'des*, *Cervici-dorso-scapulaire*. A muscle situate at the posterior inferior part of the neck, and at the posterior part of the back. It has a rhomboidal shape, and is attached, by its inner edge, to the posterior cervical ligament, and to the spinous processes of the last cervical vertebra, and of the first four or five dorsal. By its outer edge, it is attached to the spinal or posterior edge of the scapula. It is divided into two fasciculi, constituting the *Rhomboideus major* and *minor*, the latter being situate higher than the other. This muscle draws the scapula backwards and upwards, and impresses upon it a rotatory motion, which brings its inferior angle nearer to the spine; and, consequently, depresses the anterior angle and the shoulder.

RHOMBOS, ῥομβος. A bandage mentioned by Galen, so called on account of its rhomboidal shape.

RHONCHAL, *Roncha'lis*, from *ronchus*, 'rattle.' Relating or appertaining to rhonchus; — as '*rhonchal* fluctuation,' the fremitus that occurs through the influence of respiration as an attendant on cavernous rhonchi. — Walshe.

RHONCHUS, Rattle, Snoring, Stertor — r. Cavernous, see Gurgling — r. Cavernulous, see Gurgling — r. Crepitans, *Râle crépitant* — r. Crepitans Redux, see Crepitant — r. Mucous, see *Râle muqueux* — r. Sibilans, see *Râle crépitant* — r. Sibilus, *Râle sibilant* — r. Sonorus, *Râle sonore* — r. Subcrepitant, see *Râle muqueux*.

RHOPALISMUS, Priapismus.

RHOPALOSIS, Plica, Pupil, Uvea.

RHOPE, Congestion.

RHOTACISMUS, Rotacism.

RHUBARB, Rheum — r. Chinese, see Rheum — r. French, Rheum Rhaponticum — r. India, see Rheum — r. Krimea, Rheum Rhaponticum — r. Monk's, Rumex Alpinus, Rumex patientia — r. Poor man's, Thalictron — r. Rhapontic, Rheum Rhaponticum — r. Russia, see Rheum — r. Turkey, see Rheum — r. Wild, Convolvulus panduratus.

*RHUBARBE FAUSSE*, Thalictron — *r. des Pauvres*, Thalictron.

*RHUE*, Ruta.

*RHUMATALGIE*, Rheumatism, chronic.

*RHUMATIQUE*, Rheumatic.

*RHUMATISANT*, Rheumatic.

*RHUMATISMALE*, Rheumatic.

*RHUMATISME*, Rheumatism — *r. Aigu*, Rheumatism, acute — *r. Chronique*, Rheumatism, chronic — *r. Préabdominale*, Rheumatism, præabdominal — *r. de l'Utérus*, Metrorrheuma.

*RHUME*, Rheum — *r. de Cerveau*, Coryza — *r. de Poitrine*, Catarrh.

RHUS CORIA'RIA, *Sumach*, *Shumach*, *Rhus Glabrum*, *Adu'rion*, *Elm-leaved Sumach*, (F.) *Sumac des Corroyeurs*. *Family*, Terebinthaceæ. *Sex. Syst.* Pentandria Monogynia. This is the only species of the genus rhus that is innocent. Both the leaves and berries have been used as astringents and tonics.

RHUS GLABRUM, Rh. coriaria.

RHUS RADI'CANS, *Rhus vernix*, *Poison vine* (*America*). This plant is poisonous (see Poisons, Table of), and is extremely acrid, when applied to the skin, producing erysipelas and vesications, and has been used, like the next variety, in paralysis and other nervous affections.

RHUS SYLVESTRIS, Myrica gale.

RHUS TOXICODEN'DRON, *Toxicoden'dron*, *Poison Oak* (*America*), (F.) *Sumac vénéneux*. This plant has been used in paralytic affections and cutane-

ous eruptions. It is poisonous, like the last. Dose, gr. ss to gr. iv.

Rhus Vernix, Rh. radicans.

RHYPARIA, Rupia, Sordes primarum viarum.

RHYPOS, Sordes.

RHYPTICA, Detergents.

RHYPTICUS, Abstergent.

RHYSIS, Flux.

RHYSMUS, Rhythm.

RHYSSEMA, Wrinkle.

RHYTHM, *Rhythmus, Rhysmus,* 'measured movement.' The order or proportion, as regards time, which reigns between the different movements of an organ — as of the heart; — or of the organism in health and disease. Thus, rhythm is applied to the diurnal variations of the pulse; and to the paroxysmal movements of an intermittent.

RHYTHMICAL, Periodical.

Rhythmical Contractions of Muscles, are those that succeed one another after regular intervals.

RHYTHMUS, Rhythm.

RHYTIDOSIS, Rutidosis.

RIB, Costa — r. False, see Costa — r. Floating, see Costa — r. Sternal, see Costa — r. True, see Costa.

RIBES NIGRUM, *R. ol'idum, Grossula'ria nigra, Cassis.* The *Black currant,* (F.) *Groseillier noir. Sex. Syst.* Pentandria Monogynia. The berries have been recommended in sore-throat, as diuretics. The leaves have been advised for the same purpose. They are chiefly used as preserves.

Ribes Olidum, R. nigrum — r. Officinale, R. rubrum.

Ribes Rubrum, *R. officina'lē* seu *vulga'rē, Grossula'ria non spino'sa* seu *rubra,* the *Red currant,* (F.) *Groseillier rouge;* of which the *White* is only a variety. It is cultivated, and affords an agreeable fruit. It possesses the qualities of the subacid fruits in general, and makes an excellent preserve.

Ribes Vulgare, R. rubrum.

RIBS, NECK OF THE, Collum costarum — r. Short, see Costa.

RICE, Oryza — r. Disease, Cholera — r. Ground, see Oryza — r. Jelly, see Oryza.

Rice Water, see Oryza. The evacuations of cholera have been termed — from their resemblance to rice-water — '*rice-water* discharges;' and in India, '*congee* discharges;' — *congee* in Hindoostanee meaning 'rice-water.'

Rice, Wild, Zizania aquatica.

RICHARDSONIA, see Ipecacuanha.

RICHLEAF, Collinsonia Canadensis.

RICHWEED, Actæa racemosa, Ambrosia trifida, Collinsonia Canadensis, Pilea pumila.

*RICIN,* Ricinus communis.

RICINOIDES, Jatropha curcas.

RIC''INUS COMMU'NIS. The *Castor oil plant, Catapu'tia major, Ricinus vulga'ris* seu *vir'idis, Palma Christi, Faba purga'trix, Cerua, Kerua, Cici,* (F.) *Ricin, Fève purgatif. Family,* Euphorbiaceæ. *Sex. Syst.* Monœcia Monadelphia. Castor-oil seeds, whence the oil is obtained, are inodorous; taste acrid and slightly sweetish. One or two seeds—*Sem'ina Catapu'tiæ majoris* seu *Ric''ini vulga'ris* — will act as a cathartic; but the oil is alone used. It is obtained by bruising the castor-seeds, previously decorticated, and then expressing the oil without the application of heat. Recently-drawn castor oil, *Oleum de kerva, O. kervi'num, Alker'va, Oleum Ric''ini, O. Cic''inum, O. Palmæ liq'uidum, O. de Palmâ Christi,* (F.) *Huile de Ricin,* is inodorous and nearly insipid. It is cathartic, operating speedily, and may be used in all cases where powerfully stimulating purgatives would be injurious. Dose, f℥j to f℥iss. Hufeland recommends that a drop of croton oil shall be added to an ounce of the oil of poppy, and that the mixture shall be called *O'leum Ric''ini Officina'lē.*

At the Cape of Good Hope the oil is obtained from *Ricinus liv'idus.*

A variety of Ricinus at Cape Verd is employed by the inhabitants to increase the secretion of milk. It is applied in the form of poultice, made with the green leaves, to the mammæ, or of a strong decoction, with which the mammæ and the external parts of generation are washed.

Ricinus Lividus, see Ricinus communis — r. Major, Jatropha curcas — r. Minor, Jatropha manihot — r. Viride, R. communis — r. Vulgaris, R. communis.

RICKETS, Rachitis.

RICKETY, Rachiticus.

RICTUS LUPINUS, see Harelip.

*RIDE,* Wrinkle.

*RIDÉ,* Wrinkled.

RIDING (of Bones). *Ossium superposit''io,* (F.) *Chevauchement.* Displacement of the fragments of a bone, chiefly produced by the contraction of muscles, which occasions shortening of the limb; the fractured extremities *riding* over each other, instead of being end to end.

RIGIDITAS, Rigidity.

Rigiditas Articulo'rum, *Ancylo'sis spu'ria.* Stiffness of the joints. False ancylosis.

RIGIDITY, *Rigid'itas,* from *rigere,* 'to stiffen.' Great stiffness of fibre, or want of suppleness. The stiffness of the dead body, (*F.*) *Roideur cadavérique,* is one of the most certain signs of the cessation of life.

RI'GOR, *Rhigos, Algor, Coldness, Cheim'ia,* (F.) *Frisson.* Same etymon. Sensation of cold, with involuntary shivering of the whole body: — a symptom of fever. A slighter degree, and at times full rigor, is occasionally termed a *chill, frigus ten'uē, perfrigera'tio.*

Rigor Artuum, Contractura — r. Cadaverosus, Rigor mortis — r. Corporis mortui, Rigor mortis — r. Emortualis, Rigor mortis — r. Maxillæ inferioris, Trismus.

Rigor Mortis, *R. cor'poris mor'tui, R. cadavero'sus, R. emortua'lis, Necronarce'ma,* (F.) *Roideur* ou *Raideur cadavérique.* 'Stiffness of death.' Death stiffening. The rigidity of limbs that occurs on dissolution.

Rigor Nervorum, Tetanus — r. Nervosus, Tetanus.

RIMA, *Schisma, Schiza.* A fissure, a cleft; as *Rima,* or *Ri'mula Glot'tidis* seu *Laryn'gis,* 'the opening of the glottis.' *Rima vulvæ, R. magna, Intro'itus, Sinus vulvæ, Scapha, Scaphus* seu *Fissu'ra magna* seu *Scissu'ra vulvæ, Schiza,* 'the opening of the vulva.' See Vulva.

Rima Canalis Orbitarii, Suborbitar fissure — r. ad Infundibulum, Vulva cerebri — r. Laryngis, Rima glottidis — r. Magna, Vulva, see Rima — r. Transversa Magna Cerebri, Fissure, transverse, of the brain.

RIMÆ, Rhagades.

RIMULA GLOTTIDIS, Rima glottidis — r. Laryngis, Rima glottidis.

RINÆUS, Compressor naris.

RINCHOS, Rostrum.

RING, Sax. hpinʒ, pinʒ, Germ. Ring, *Cricos,* (F.) *Anneau.* A name given to natural, circular, or roundish apertures, with muscular or aponeurotic parietes, which serve for the passage of some vessel or canal: — as the *umbilical ring, inguinal ring,* &c.

RINGWORM, Herpes circinatus — r. of the

Scalp, Porrigo scutulata — r. Ulcerative, Herpes exedens — r. Vesicular, Herpes præputii.

*RIRE* ou *RIS*, Risus—*r. Canin*, Canine laugh — *r. Moqueur*, Canine laugh — *r. Sardonien*, Canine laugh, Risus sardonicus — *r. Sardonique*, Canine laugh.

RISAGON, Cassumuniar.

RISIGALLUM, Orpiment.

RISING, see Regurgitation — r. of the Lights, Cynanche trachealis.

RISING or ELEVA'TION OF THE PULSE, *Pulsûs eleva'tio*. The pulse is said to rise, when it becomes more full and frequent, as occurs in the exacerbation of acute diseases.

RISO'RIUS NOVUS. Santorini gives this name to a portion of the platysma myoides, which passes from the cheek towards the commissure of the lips.

RISSIGALLUM, Orpiment.

RISUS, from *ridere*, *risum*, 'to laugh.' *Gelus*, *Laughing*, *Laughter*, *Laugh*, (F.) *Rire* ou *Ris*. An involuntary movement of the muscles of the face, and of the lips in particular, accompanied with a sonorous and interrupted respiration, commonly indicating mirth and satisfaction.

RISUS APIUM, Ranunculus sceleratus — r. Caninus, Canine laugh — r. Involuntarius, Canine laugh — r. Sardonicus, Canine laugh — r. Spasticus, Canine laugh.

RITA-CRISTINA. A celebrated double monster, born in Sardinia, in 1829. It lived to be nearly nine months old. Two distinct bodies were united at the pelvis. Below, the monster was single.

RIVER WEED, Conferva rivalis.

*RIZ*, Oryza.

ROAN TREE, Sorbus acuparia.

ROB, *Roob*, *Robub*, *Rohob*, *Rohab*, (F.) *Extrait des fruits*. This word, of Arabic extraction, means the juice of any fruit thickened to the consistence of honey by evaporation, before it has fermented. The juice of the grape, boiled to this consistence, was called *Sapa*, and, when not quite so thick, *Defru'tum*.

ROB CYNOSBATOS, Confectio rosæ caninæ — r. ex Moris, Diamorion — r. Nucum, Diacaryon.

ROBIN RUN-AWAY, Glechoma hederacea.

ROBIN'IA AMA'RA, *Family*, Leguminosæ. *Sex. Syst.* Diadelphia Decandria. The roots of the *Robinia amara* of Cochin China are bitter, and have been recommended, especially in that country, in diarrhœa and dyspepsia.

ROBINIA PSEUDO-ACA'CIA, *Pseudaca'cia odora'ta*, *False Aca'cia*, *Black Locust*, *Locust-tree*; native of America. The flowers are said to possess antispasmodic properties.

ROBORANS, Corroborant.

ROBORANTIA, Tonics.

ROBUB, Rob.

ROCCELLA, Lichen roccella — r. Tinctoria, Lichen roccella.

ROCHE'S EMBROCATION FOR HOOPING-COUGH. An empirical preparation, composed of *ol. oliv.* ℥xvj, *ol. succin.* ℥viij, *ol. caryoph.*, q. s. to scent it strongly.

*ROCHER*, see Temporal bone.

ROCHETTA ALEXANDRINA, Soda.

ROCKET, GARDEN, Brassica eruca — r. Roman, Brassica eruca.

ROCK ROSE, Helianthemum Canadense, H. Corymbosum.

*ROCOU*, Terra Orleana.

RODSCHIEDIA BURSA PASTORIS, Thlaspi bursa.

*ROGNE*, Psora.

ROHAB, Rob.

ROHENA BARK, Swietenia.

ROHOB, Rob.

ROHUN, see Strychnos nux vomica.

*ROIDEUR CADAVÉRIQUE*, Rigor mortis.

ROISDORFF, MINERAL WATERS OF. Alkaline waters in Germany, which contain carbonic acid and carbonate of soda.

ROLLER, Bandage, Fascia.

*ROMARIN*, Rosmarinus—*r. Sauvage*, Ledum sylvestre.

ROME, (CLIMATE OF.) The climate of Rome, as regards its physical qualities, is considered to be one of the best in Italy. It is peculiarly still; and, hence, has been esteemed favorable as a winter climate in pulmonary diseases, and for invalids generally, as it admits of their taking exercise in the open air at a lower temperature than they otherwise could do. In the early stages of consumption, Sir James Clark generally found the climate favourable.

*ROMPEURE*, Hernia.

*RONCE*, Rubus idæus — *r. Bleue*, Rubus cæsius — *r. de Montagne*, Rubus chamæmorus — *r. Noire*, Rubus fruticosus.

RONCHUS, Snoring, Stertor.

*ROND*, Round — *r. Grand*, Teres major — *r. Petit*, Teres minor.

*RONFLEMENT*, Snoring, Stertor, see Rattle — *r. de Diable*, *Bruit de Diable*.

ROOB, Rob.

ROOF OF THE MOUTH, Palate.

ROOT, Radix — r. Ague, Aletris farinosa — r. Bitter, Apocynum androsæmifolium — r. Canada, Asclepias tuberosa—r. Red, Celastrus—r. Rough, Liatris — r. of Scarcity, Beta hybrida—r. Squaw, Actæa racemosa — r. Sweet, Acorus calamus — r. Unicorn, Aletris farinosa—r. Yellow, Xanthoriza apiifolia — r. Yellow, Jeffersonia Bartoni.

ROPE BARK, Dirca palustris.

*ROQUETTE*, Brassica eruca, Soda.

RORELLA, Drosera rotundifolia.

RORIF'EROUS, *Ror'ifer*, (F.) *Rorifère*, from *ros*, 'dew,' and *ferro*, 'to carry.' An epithet given to vessels which pour exhaled fluids on the surface of organs.

RORIFEROUS DUCT, Thoracic duct.

ROS, Sperm—r. Calabrinus, Fraxinus ornus—r. Solis, Drosera rotundifolia.

ROSA, R. centifolia — r. Afzeliana, R. canina.

ROSA ALBA, *R. usitatis'sima*, *R. leucan'tha*. The *White Rose*, (F.) *Rosier blanc*. *Family*, Rosaceæ. *Sex. Syst.* Icosandria Polygynia. The flowers of this species possess similar but inferior qualities to the damask.

ROSA ARMATA, R. canina — r. Austriaca, R. Gallica — r. Calycina, R. canina.

ROSA CANI'NA, *R. sylves'tris* seu *sentico'sa* seu *Swartzia'na* seu *Afzelia'na* seu *arma'ta* seu *calyci'na* seu *rubra vulga'ris*, *Cynor'rhodon*, *Caniru'bus*, *Cani'nus Sentis*, *Cynocyt'isus*, *Cynospas'tum*, *Cynos'batos*, *Dog Rose*, *Wild Briar*, *Hip Tree*, (F.) *Rose du chien*, *Eglantier de chien*, *E. sauvage*. The fruit of this variety, called *Heps* or *Hips*, has a sourish taste, and is formed into a conserve. See Confectio cynosbati. It is seldom employed, except to give form to more active remedies; as to pills, boluses, linctuses, &c.

ROSA CENTIFO'LIA; *Hecatomphyl'la*, *Damask Rose*, *Rosa Damasce'na*, *R. Pal'lida*, (F.) *Rosier à cent feuilles*, *Rhodon*, *Rosa*. The petals of this rose have an extremely fragrant odour, and subacidulous taste. They are laxative; but are scarcely used for any purposes except for the distillation of rose water, *Oil of Roses*, *Oleum Rosæ*, and the formation of a syrup.

ROSA DAMASCENA, R. centifolia.

ROSA GAL'LICA, *R. Austriaca*, *Rosa rubra*, *Red Rose*, (F.) *Rosier de Provins*. The petals of this variety are astringent; and are used in infusion, conserve, &c.

Rosa Leucantha, R. alba—r. Pallida, R. centifolia—r. Rubra, R. Gallica—r. Rubra vulgaris, R. canina—r. Saltans, Essera—r. Senticosa, R. canina—r. Swartziana, R. canina—r. Sylvestris, R. canina—r. Usatitissima, R. alba.

*ROSACE*, Roseola.

ROSACEUS, Rhodinus.

*ROSAGE*, Rhododendron chrysanthemum.

ROSAGO, Nerium oleander.

ROSALIA, Scarlatina.

ROSALIÆ, Scarlatina.

ROSATUS, Rhodinus.

ROSE, Erysipelas—r. Christmas, Helleborus niger—r. Corn, Papaver rhœas—r. Damask, Rosa centifolia—r. Dog, Rosa canina—r. Dog, conserve or confection of, Confectio rosæ caninæ—r. *du chien*, Rosa canina—r. Rash, Roseola—r. Red, Rosa Gallica—r. Rock, Helianthemum Corymbosum—r. Spots, Spots, red—r. White, Rosa alba.

ROSEA, Rhodia.

ROSEBALM, SCARLET, Monarda coccinea.

ROSEBAY, AMERICAN, Rhododendron maximum.

ROSE DROP, Gutta rosea.

ROSELLINA, Roseolæ.

ROSEMARY, Rosmarinus—r. Marsh, Statice limonium, and S. Caroliniana—r. Wild, Eriocephalus umbellulatus.

ROSENHEIM, MINERAL WATERS OF. Rosenheim is 34 miles S. E. from Münich, in Bavaria. The waters contain sulphuretted hydrogen, carbonic acid, carbonate of lime, chlorides of calcium and magnesium, carbonate of soda, and oxide of iron. They are used as tonics.

ROSE'OLA, *Exanthe'sis Roseola, Rose Rash*, (F.) *Roséole, Éruption anomale, Rosace, Fièvre rouge, Efflorescence érysipélateuse*. An efflorescence in blushing patches, gradually deepening to a rose-colour, mostly circular or oval; often alternately fading and reviving; sometimes, with a colourless nucleus; and chiefly on the cheeks, neck, or arms. It is frequently found, as a symptom, in dentition, dyspepsia, rheumatism, &c., and is of no consequence. See Roseola, Rubeola, and Scarlatina.

Roseola Acnosa, Gutta rosea.

Roseola Æsti'va. The affection which prevails in summer. The eruption is of a darker colour, and is attended with more itching.

Roseola Annula'ta. Characterized by patches in the form of rose-coloured rays, with central areas of the colour of the skin.

Roseola Ficosa, Sycosis—r. Variolosa, Roseolæ.

ROSE'OLÆ, *Roseola, Roselli'na, False measles, French measles*, (F.) *Roséole, Fausse rougéole*. This name is also given by some to an acute exanthem, midway between measles and scarlatina, and which belongs to neither one nor the other, as it affords no protection against either. It is, also, termed *Rubeolæ* by some. An eruption which often precedes that of small-pox is termed *Roseola Variolo'sa*.

*ROSÉOLE*, Roseola, Roseolæ.

ROSE PINK, Chironia angularis.

ROSES, MILK OF. A cosmetic wash, formed, according to one method, of *subcarbonate of potass*, gr. vj; *oil of almonds*, ℥j; *essence of bergamot*, ℥ij; *aquæ rosæ*, ℥iij; *orange flower water*, ℥ij. Mix.

ROSEUS, Rhodinus.

ROSEWOOD, Rhodium lignum.

ROSEWORT, Rhodia.

*ROSIER BLANC*, Rosa alba—r. *à Cent feuilles*, R. centifolia—r. *de Provins*, Rosa Gallica.

ROSIN, BLACK, Colophonia—r. Brown, Colophonia—r. Weed, Silphium terebinthaceum—r. White, see Pinus sylvestris—r. Yellow, see Pinus sylvestris.

ROSIO STOMACHI, Cardialgia—r. Ventriculi, Cardialgia.

ROSMARINUM, Rosmarinus.

ROSMARI'NUS, *R. officina'lis* seu *latifo'lius* seu *horten'sis, Alchachil, Libano'tis corona'ria, Dendrolib'anus, Rosemary*, (F.) *Romarin. Family*, Labiatæ. *Sex. Syst.* Diandria Monogynia. The tops of this plant, *Rosmarinus*, (Ph. U. S.) *Herba Anthos*, have a fragrant, grateful smell; and an aromatic, warm, bitterish taste, which is dependent upon an essential oil, combined with camphor. Rosemary has been recommended in nervous headachs, in the form of infusion. It is now rarely used, except for its odour. The flower is called *Anthos*, ἄνθος. Its oil—*Oleum Rosmarini*—is officinal. From two to six or ten drops are given in nervous complaints, rubbed up with sugar.

Rosmarinus Hortensis, Rosmarinus—r. Latifolius, Rosmarinus—r. Officinalis, Rosmarinus—r. Stæchadis facie, Teucrium creticum—r. Sylvestris, Ledum sylvestre.

ROSSALIA, Scarlatina—r. Squamosa, Scarlatina.

*ROSSIG'NOL*. A name given, in France, to an affection to which pressmen are subject. It is a sprain, followed by tumefaction of the radiocarpal joint.

ROSSOLIO, see Spirit.

ROSTRUM, *Rhinchos, Rinchos, Ramphos*, 'a beak.' (F.) *Bec*. A name given to several old forceps, on account of their resemblance to the beaks of different birds. The principal were the *Rostrum corvi'num, anati'num, psittaci'num, vulturi'num, cyg'neum* vel *olori'num, grui'num, lacerti'num*, &c.

Rostrum Externum, Olecranon—r. Porcinum, Acromion—r. Posterius, Olecranon—r. Sphenoidale, Azyges processus.

ROSY BUSH, Spiræa tomentosa—r. Drop, Gutta rosea—r. Whelk, Gutta rosea.

*ROT*, Eructation.

ROT, Grinders', Asthma, grinders'.

ROT'ACISM, *Rotacism'us, Rhotacis'mus, Psellis'mus rhotacis'mus*, (F.) *Grasseyement*. A vicious pronunciation of the Greek, ρ, *Rau*, common in the northern parts of England; especially near Newcastle.

ROTACISMUS, *Grasseyement*.

ROTA'TOR, from *rota*, 'a wheel.' A name given to several muscles that turn the parts to which they are attached upon their axes;—such as, the oblique muscles of the eye, the pronators, supinators, &c.

Rotator, Trochanter.

ROTATO'RES DORSI. Eleven small muscles on each side of the dorsal vertebræ, which arise from the point or upper edge of each transverse process, and pass to the lower edge of the arch of the vertebra above, as far as the base of the transverse process. Their action is to rotate the individual vertebræ on each other.

Rotatores Femoris, Obturatores—r. Oculi, Oblique muscles of the eye.

ROTULA, Patella, Trochiscos—r. Genu, Patella.

ROTULAD, see Rotular aspect.

ROT'ULAR; from *rotula*, 'the patella.' Relating or appertaining to the patella.

Rot'ular Aspect. An aspect towards the side on which the rotula is situated.—Barclay. *Rot'ulad* is used by the same writer, adverbially, to signify 'towards the rotular aspect.'

*ROTULE*, Patella.

ROTUNDUS, Round.

*ROUCOU*, Terra Orleana.

ROUEN, MINERAL WATERS OF. This water, known under the name, *Eau des fontaines de la Marégueríe*, is cold, and contains carbonate of iron, carbonic acid, carbonate of lime, chloride of calcium, &c. It is tonic.

*ROUGE*, Colcothar — *r. d'Angleterre*, Colcothar.

*ROUGÉOLE*, Rubeola — *r. Fausse*, Roseolæ.

*ROUGEURS*, Flush.

ROUGH ROOT, Liatris.

*ROUILLÉ*, Rubiginous.

ROUND, *Teres*, *Rotun'dus*, (F.) *Rond*. Anatomists have given this name to many organs whose fibres are collected in round fasciculi. See Teres.

ROUND FORAMEN, *Fora'men rotund'um*. A foramen of the sphenoid bone, a little behind the *foramen lacerum superius*, which gives passage to the second branch of the fifth pair of nerves, called *superior maxillary*.

ROUND HEART, Thaspium atropurpureum.

ROUND LIGAMENTS OF THE UTERUS, *Ligamen'ta rotund'a U'teri*, (F.) *Cordons sus-pubiens* (Ch.), *Cordons vasculaires*, *Ligaments ronds de l'utérus*. Two cords, which arise from the lateral and superior parts of the uterus, whence they proceed towards the abdominal rings, which they pass through, and terminate by vanishing in the areolar tissue of the groins, mons veneris, and labia majora. These cords are whitish, flattened, and narrower in the middle than at the extremities. According to Mr. Rainey, they are composed chiefly of the striped muscular fibre.

ROUTINE PRACTITIONER, Routinist.

ROUTINIST, pronounced *routeen'ist*; (F.) *Routinier*; from (F.) *routine*; 'a regular habit or practice, unvaried by circumstances.' One who practises in such an unvaried manner: — a *routine practitioner*.

RUBBER, INDIAN, Caoutchouc.

RUBBING SOUNDS, *Bruit de Frottement*.

RUBE'DO, *Rubor*, Redness; from *rubere*, 'to be red.' A diffused, but not spotted, redness on any part of the skin; like that which arises from blushing. Blushing.

RUBEFA'CIENT, *Erethis'ma*, *Erethis'ticum*, *Rubefa'ciens*, from *ruber*, 'red,' and *fa'cio*, 'I make.' (F.) *Rubéfiant*. That which produces redness. A medicine which causes redness of the skin. The action is called *Rubefaction*.

*RUBÉFIANT*, Rubefacient.

RUBE'OLA, *Rubeola vulga'ris*, from *rubere*, 'to be red.' *Rose'olæ*, *Exanthe'sis Rubeola*, *Vetera'na*, *Blac'ciæ*, *Bovil'læ*, *Morbil'li*, *Scarlati'na pustulo'sa*, *S. Milia'ris*, *Febris morbillo'sa*, *Typhus morbillosus*, *Phœnicis'mus*, *Ecphy'mata*, *Measles*; (F.) *Rougéole*, *Fièvre morbilleuse*. One of the major exanthemata; generally affecting individuals but once, and produced by specific contagion. The rash usually appears on the fourth, but sometimes on the third, fifth, or sixth day of a febrile disorder; and, after a continuance of four days, gradually declines with the fever. The disease generally commences from ten to fourteen days after the contagion has been received. The eruption first shows itself in distinct, red, and nearly circular spots, somewhat less than the ordinary arcolæ of flea-bites. As these increase in number, they coalesce; forming small patches of an irregular figure, but approaching nearest to that of semicircles or crescents. These patches are intermixed with single, circular dots and with interstices of the natural colour of the skin. On the face they are slightly raised, so as to give the sensation of inequality of surface to the finger passed over the cuticle. The disappearance of the eruption is followed by desquamation of the cuticle. Measles is not dangerous of itself; but it is liable to induce pneumonia in winter, and dysentery in summer, which are, at times, very fatal. These are apt to come on at the time of, or soon after, the disappearance of the eruption. When they supervene, they must be treated as idiopathic affections. It demands a general antiphlogistic treatment. Willan has pointed out a kind of RUBEOLA SPU'RIA, which he calls RUBEOLA *sine* CATAR'RHO. In this the rash runs its regular course, with little fever or catarrhal affection; affording no certain security against the common or regular disease. He also gives the name, RUBEOLA NIGRA or BLACK MEASLES, to an unusual appearance of the measles about the seventh or eighth day, when the rash becomes suddenly livid, with a mixture of yellow. It is devoid of inconvenience or danger; and is removed in a week or ten days by the mineral acids and tonics.

RUBEOLÆ, Roseolæ.

RU'BIA, *R. Tinctо'rum* seu *peregri'na* seu *sylves'tris*, *Erythrod'anum*, *Rubia major*, *Radix rubra*, *Dyer's Madder*, *Madder*, (F.) *Garance*. *Family*, Rubiaceæ. *Sex. Syst.* Tetrandria Monogynia. The roots of this plant have a bitterish, somewhat austere, taste, and a slight, not agreeable, smell. They were formerly considered deobstruent, detergent, and diuretic.

RUBIG"INOUS, *Rubigino'sus*, from *rubigo*, 'rust.' (F.) *Rouillé*. Rusty. Having the colour of rust. An epithet given to the sputa in certain cases of pneumonia.

RUBINUS VERUS, Anthrax.

RUBOR, Rubedo.

RUBRI'CA FABRI'LIS. A red, heavy, earthy matter, formerly employed for making drying plasters; *Hard Ruddle*, *Red Chalk*.

RUBRICA SINOP'ICA. A heavy, compact, reddish earth: formerly used in diarrhœa.

RUBRIN, Hæmatin.

RUBUS AFFINIS, R. fruticosus.

RUBUS ARC'TICUS. The *Shrubby Strawberry*, *Baccæ Norland'icæ*. *Family*, Rosaceæ. *Sex. Syst.* Icosandria Polygynia. The fruit is recommended by Linnæus as possessing antiseptic, refrigerant, and antiscorbutic qualities.

RUBUS BATUS, R. Cæsius.

RUBUS CÆ'SIUS, *R. batus*; the *Dewberry plant*, (F.) *Ronce bleue*. The fruit resembles the blackberry in appearance and properties. The bark of the root of *R. Trivia'lis*, *American Dewberry*, is astringent.

RUBUS CHAMÆMO'RUS; the *Cloudberry Tree*, *Chamæmo'rus*, *C. Norwegica*, *Chamædrys*, *Cloudberries*, *Knot-berries*, (F.) *Ronce de Montagne*. The ripe fruit is sometimes prepared like a jam, and used in fevers, &c., to allay thirst. It has been much extolled as an antiscorbutic.

RUBUS FRAMBŒSIANUS, R. Idæus.

RUBUS FRUTICO'SUS, *R. affi'nis* seu *panicula'tus* seu *niger* seu *vulga'ris*; the *Common Bramble*, which affords *Blackberries*, (F.) *Ronce noire*. The berries are eaten as a summer fruit, of which they form a poor variety. The bark of the root of the *Rubus villo'sus*, *American Blackberry*, *High* or *standing blackberry*, *Hairy American Bramble*, is astringent, and has been used in the last stages of dysentery, and in cholera infantum

RUBUS IDÆ'US, *R. frambœsia'nus*, *Batos*; the *Raspberry*, (F.) *Framboise*, *Ronce*. The fruit of the best varieties is extremely agreeable; and is much used. It was, formerly, called *Batinon moron*.

RUBUS NIGER, R. fruticosus — r. Paniculatus, R. fruticosus.

RUBUS STRIGO'SUS, *Wild red raspberry*, of the United States. The leaves are often used as a mild astringent.

Rubus Trivialis, see Rubus cæsius — r. Villosus, see Rubus fruticosus — r. Vulgaris, R. fruticosus.

RUCTAMEN, Eructation.

RUCTATIO, Eructation.

RUCTUATIO, Eructation.

RUCTUOSITAS, see Eructation.

RUCTUS, Eructation — r. Acidus, Oxyregmia — r. Nidorosus, Cnissoregmia.

RUDDLE, HARD, Rubrica fabrilis.

RUDOLPHIA FRONDOSA, Butea frondosa.

*RUE*, Ruta — r. Common, Ruta — *r. de Chèvre*, Galega officinalis — r. Goat's, Galega officinalis — r. Goat's, Virginia, Galega Virginiana — r. Meadow, Thalictron — *r. des Murailles*, Asplenium ruta muraria — *r. des Près*, Thalictron — *r. Sauvage*, Ruta.

RUFT, Eructation.

RUGA, Wrinkle.

*RUGINE*, Raspatorium.

*RUGISSEMENT*, Rugitus.

RUGI'TUS, *Brycheth'mos*, from *rugire*, *rugitum*, 'to roar.' (F.) *Rugissement*. A Latin word, which ordinarily expresses the roaring of the lion: and which is used, by some medical writers, to designate a particular species of borborygmus compared to it.

RUGOSE, Wrinkled.

RUGOUS, Wrinkled.

RUM, *Tafia*, *Molas'ses Spirit*. A spirit distilled from sugar, or molasses. See Spirit.

RUMA, Mamma.

RUMEN, Hypogastrium.

RUMEX ACETO'SA, *R. tubero'sus* seu *interme'dius*, *Lap'athum pratensē*, *Common Sorrel*, *Ox'alis Aceto'sa*, *Acetosa vulga'ris* seu *praten'sis*, *Anax'yris*, *A. arven'sis*, *Sorrel*, *Sour dock*, *Acetosa nostras*, (F.) *Oseille*. *Family*, Polygoneæ. *Sex. Syst.* Hexandria Trigynia. The leaves are sour, and are used in cookery, and also as a refrigerant.

Rumex Acu'tus; *Sharp-pointed Wild dock*, *Oxylap'athum*, *Lap'athum*, *L. sylves'trē* seu *acu'tum*, *Rumex*, *R. paludo'sus* seu *pusil'lus*, *Lap'athos*, (F.) *Patience sauvage*. The decoction of the root has long been used in cutaneous affections. It is, sometimes, employed for the cure of the itch.

Rumex Ætnensis, R. scutatus.

Rumex Alpi'nus, *Aceto'sa Alpi'na*. The systematic name of the plant that affords the *Monk's Rhubarb*, (F.) *Rhabarbe des Moines*. See Rumex patientia.

Rumex Aquaticus, Rumex hydrolapathum — r. Britannica, Rumex hydrolapathum — r. Confertus, R. patientia — r. Digynus, Oxyria reniformis — r. Glaucus, R. scutatus — r. Hastatus, R. scutatus — r. Hastifolius, R. scutatus.

Rumex Hydrolap'athum, *Water-Dock*, *Hydrolapathum*, *Rumex aquat'icus*, *Herba Britan'nica*, *Rumex Britan'nica*, *Lap'athum aquat'icum*, (F.) *Parelle*, *Patience d'eau*. The leaves of this plant are subacid, and said to be laxative. The root has been used as a tonic, astringent, and antiscorbutic. It has also been employed externally in some cutaneous affections.

Rumex Intermedius, R. acetosa.

Rumex Obtusifo'lius, *Lap'athum sylvestrē*, *Blunt-leaved Dock*. The root of this, as well as of *R. crispus*, has similar virtues to that of the other species.

Rumex Oxyotus, R. scutatus — r. Paludosus, R. acutus.

Rumex Patien'tia, *R. confer'tus*, *Lap'athum hortien'sē*, *Rhabar'barum monacho'rum*, *Hippolap'athum*, *Patien'tia*, *Garden Patience*, *Monk's Rhubarb*, (F.) *Patience*. This root, which is supposed to possess the virtues of rhubarb, but in an inferior degree, is, according to Linnæus, obtained from the *Rumex patientia*; according to Murray, from the *Rumex alpi'nus*.

Rumex Pusillus, R. acutus.

Rumex Sanguin'eus. The root of the *bloody dock* has an austere and astringent taste; and has been employed in dysentery. It is called, also, *Lap'athum sanguin'eum*, (F.) *Oseille* ou *Patience Rouge*, *Sangdragon*.

Rumex Scuta'tus, *R. glaucus* seu *hastifo'lius* seu *Ætnen'sis* seu *oxyotus* seu *hasta'tus*, *French Sorrel*, *Aceto'sa rotundifo'lia* seu *Roma'na* seu *Rotundifolia horten'sis* seu *scuta'ta*, *Lap'athum scuta'tum* seu *rotundifo'lia*, *Roman* or *Garden Sorrel*, *Green Sauce*, (F.) *Oseille boucher*, *Oseille ronde*, *Petite O.* Virtues the same as those of the common sorrel.

Rumex Tuberosus, R. acetosa.

RUMINA'TION, *Rumina'tio*, from *ruma* or *rumen*, 'the gullet.' *Merycis'mus*. A function peculiar to ruminating animals, by which they chew a second time the food they have swallowed. An analogous phenomenon is sometimes seen in man.

RUMP, *Croupion* — r. Bone, Coccyx.

RUNCINA, Raspatorium.

RUNCINULA, Raspatorium.

RUNNET, Rennet.

RUNNING, *Cursus*, (F.) *Course*. A succession of leaps, executed with rapidity, to transport the body quickly from one place to another.

RUNUNCULA, Raspatorium.

RUPES, Lips of the Vulva.

RU'PIA, *Ulcus aton'icum*, *Ecphly'sis Rhy'pia*, *Rhypa'ria*, from ῥυπος, 'filth.' An eruption of large flattish blebs, which contain a fluid—at first serous, afterwards puriform, and often bloody, which rapidly concretes into crusts, at the base of which are ulcers of variable depths.

It requires the use of tonics internally, and of stimulating ointments externally.

RUPTIBILITAS, Fragilitas.

RUPTIO, Rhexis.

RUPTORIUM, Cauterium — r. Commune, Potassa fusa.

RUPTURA, Ecrexis, Hernia, Laceration, Rhexis — r. Corneæ, Ceratorrhexis — r. Herniosa, Hernia — r. Ovarii, Oariorrhexis — r. Uteri, Uterus, rupture of the — r. Vaginæ, Colporrhexis.

RUPTURE, Hernia, Rhexis — *r. du Cœur*, Cardiorrhexis — r. of the Groin, Bubonocele — *r. de la Matrice*, Uterus, rupture of the — r. Wort, Herniaria glabra.

RUPTURED, see Hernial.

RUSCUS, *R. aculea'tus*, *Bruscus*, *Oxymyr'rhinē*, *Oxymyr'sinē*, *Myrtacan'tha*, *Catan'gelos*, *Myacan'tha*, *Sco'pia re'gia*, *Wild Myrtle*, *Centromyrinē*, *Butcher's Broom*, (F.) *Petit houx*, *Fragon*. *Family*, Smilaceæ. *Sex. Syst.* Diœcia Monadelphia. The root has been recommended as an aperient and diuretic.

Ruscus Aculeatus, Ruscus.

Ruscus Hypoglos'sum; *Uvula'ria*, *Hypoglossum*, *Bislin'gua*, *Bonifa'cia*, *Laurus Alexandri'na angustifo'lia*, (F.) *Laurier Alexandrin*. Formerly used against relaxed uvula.

RUSH, SWEET, Acorus calamus, Juncus odoratus.

RUSMA, see Orpiment.

RUSPINI'S STYPTIC, see Styptic, Ruspini's.

Ruspini's Tincture for the Teeth. An empirical preparation, composed of *Florentine orris* ℥viij, *cloves* ℥j, *rectified spirit* Oij, *ambergris* ℈j.

RUT, Heat.

RUTA, *Ruta graveolens* seu *horten'sis* seu *al'tera*, *Common Rue*, *Peg'anum*, *Besa'sa*, (F.) *Rue*, *Rhue*, *Rue sauvage*. *Family*, Rutaceæ. *Sex. Syst.* Decandria Monogynia. The plant has a

strong, ungrateful odour, and bitter pungent taste. It is acrid, so as to blister the skin. Its properties are reputed to be tonic, stimulant, antispasmodic, and emmenagogue. Dose, gr. xv to ℈ij.

*Oleum Rutæ, distilled Oil of Rue*, is antispasmodic; and, externally, rubefacient. Dose, gtt. ij to vj.

RUTA ALTERA, Ruta—r. Capraria, Galega officinalis—r. Graveolens, Ruta—r. Hortensis, Ruta—r. Muraria, Asplenium ruta muraria.

RUTABULUM, Penis.

RUTA'CEUM, from *Ruta*, 'rue.' Vinegar of rue.

RUTIDOMA, see Rutidosis.

RUTIDO'SIS, *Rytido'sis*, *Rhytido'sis*, from *ῥυτιδοω*, 'I wrinkle.' The act of wrinkling; as *Rutido'ma* means a shrivelled or wrinkled body. A destruction or atrophy of the eye. Corrugation and subsidence of the cornea.

RUYSCHIA'NA TU'NICA, (F.) *Lame ou Membrane Ruyschienne*. According to Ruysch, and the greater part of his disciples, the choroid coat of the eye is formed of two laminæ. His son gave to the inner the name *Tunica Ruyschia'na* or *Membra'na Ruyschia'na* seu *Ruysch'ii*.

*Tu'nica Cellulo'sa Ruyschia'na* is the areolar substance under the peritoneal covering of the stomach. It is not numbered among the coats of that organ.

RYE, Secale—r. Horned, Ergot—r. Spurred, Ergot.

RYTIDOSIS, Rutidosis.

RYTIS, Wrinkle.

# S.

S. A. &c., see Abbreviation.

SABADILLA, Veratrum sabadilla, see Veratrina.

SABADILLIN, see Veratrina.

SABATILLA, Veratrum sabadilla.

SABBATIA, Chironia angularis—s. Angularis, Chironia angularis.

SABINA, Juniperus sabina.

*SABINE*, Juniperus sabina.

*SABLÉ*, *Maculo'sus*, 'sanded.' Having the appearance as if strewed with sand. The terms *sablé* and *piqueté* are sometimes applied to the brain, when a slice of it exhibits red points as if it had been strewed with red sand. Such is the case in cerebral hyperæmia.

*SABOT DE VÉNUS JAUNE*, Cypripedium luteum.

SABUCUS, Sambucus.

SAB'ULOUS, *Sabulo'sus*, *Areno'sus*, *Psammo'des*. The sandy deposit often seen in the urine.

SABULUM CONARII, see Pineal gland.

SABURA, Saburra.

SABUR'RA, *Sabu'ra*, *Sordes*. This word signifies, by derivation, coarse sand, or ballast. In its common acceptation, it means *foulness of the stomach*, as it is sometimes called;—vitiated matters supposed to be retained and accumulated in the stomach—the result of imperfect digestion—and which have been sometimes considered as a morbid product of the mucous secretion of that organ, or of the biliary secretion; at others, as a residuum from alimentary substances badly digested. The *Saburral state*, *Collu'vies gas'trica*, *Crudita'tes ventric'uli*, *Gastris'mus*, (F.) *Embarras gastrique*, *État saburral*, is an accumulation of saburræ, (F.) *Saburres gastriques*, in the stomach, which the Humourists considered to be the cause of a number of diseases.

SABURRA VERMINOSA, Helminthiasis.

SABURRATIO, Arenatio.

*SABURRES GASTRIQUES*, see Saburra.

*SAC HERNIAIRE*, Hernial sac.

SACCATUS, Encysted.

SACCHAR, Saccharum.

SACCHARINA, *Saccharolés*.

*SACCHAROLÉS* (F.), *Sacchari'na*, from *saccharum*, 'sugar.' A name given by MM. Henry and Guibourt to medicines which have sugar or honey for excipient, or for predominant principle. M. Béral so calls an exact mixture of pulverized sugar with other substances also in powder, but in less quantity.

SACCHAROM'ETER, (F.) *Saccharomètre*, *Pèse-sirop*, from *saccharum*, 'sugar,' and *μετρον*, 'measure.' A hydrometer adapted for determining the density of syrups.

SACCHAROMYCES, Torula cerevisiæ.

SACCHARORRHŒA, Glycyrrhœa—s. Cutanea, Sudor dulcis.

SACCHARORRHŒ'A LAC'TEA, *Galactorrhœ'a saccharo'ta*. A secretion of unusually sweet milk.

SACCHARORRHŒA PULMONA'LIS, *Sputum dulcē* seu *saccharo'tum*. The copious expectoration of unusually sweet matter from the lungs.

SACCHARORRHŒA URINOSA, Diabetes mellitus.

SAC'CHARUM, *Sacchar*. From Arabic, or rather Sanscrit, *Sa-kar*, 'white earth;' *Suchar*, *Succhar*, *Sutter*, *Zuchar*, *Zu'caro*, *As'sakur*, *Tigala*, *Zac'charum*, *Zozar*, *Zu'charum*, *Zuc'carum*, *Zuchra*, *Mel arundina'ceum*, *Sugar*, (F.) *Sucre*. The produce of the juice of the *Sac'charum officina'rum* vel *officinalē* of Linnæus, *Cal'amus In'dicus*, *Cal'amus Sacchari'nus*, *Sugar Cane*, (F.) *Canne à Sucre*, *Cannamelle*; *Arun'do saccharif'era* of Sloane. *Family*, Gramineæ. *Sex. Syst.* Triandria Digynia) and also of the beet, maple, &c.

*True Sugars* are those with which alcoholic fermentation *may be* effected, by the addition of yeast and water. They are:—

| *Species.* | *Varieties.* |
|---|---|
| 1. | Hard sugar of the cane, maple, beet, chestnut, &c. |
| 2. | Liquid sugar, sugar of malt, of the sweet potato, molasses, honey, &c. |
| 3. | Hard sugar of the grape, ripe fruits, starch, diabetes, &c. |
| 4. | Hard sugar of the mushroom. |

*Imperfect sugars* are those in which alcoholic fermentation *cannot be* effected by means of yeast and water.

| *Species.* | *Varieties.* |
|---|---|
| 1. | Manna. |
| 2. | Sugar of Milk. |
| 3. | Sugar of jelly or glue. |
| 4. | Liquorice. |
| 5. | Picromel. |

Sugar is prepared from the expressed juice of the sugar-cane, boiled with the addition of quicklime or common vegetable alkali. It is used, in pharmacy, for the preparation of syrups, conserves, lozenges, &c. It is very nutritious, and is employed as an aliment, and as a demulcent

and antiseptic. Dissolved in small quantities in water, as in tea, it is apt to disagree with dyspeptics; an evil which does not always occur when the same substance is taken more largely.

Saccharum Acer'num, *S. Canaden'sē, Maple Sugar,* is often used as a demulcent.

Sac'charum Album, *S. purifica'tum, Saccharum* (Ph. U. S.), *White Sugar, Refi'ned Sugar, Sal Indus,* is the *Loaf Sugar. Double-refined Sugar* has been called *Tabarzet.*

Saccharum Can'didum, *S. candum* seu *cantum* seu *canthum, Al'phenic, Nabot, Sugar candy,* (F.) *Sucre Candi,* is the crystallized juice of the cane.

Saccharum Candum, S. Candidum—s. Cantum, S. Candidum — s. Canthum, S. Candidum — s. Commune, Saccharum non-purificatum.

Saccharum Hordea'tum, *Barley Sugar, Penides, Penid'ium, Sac'charum penid'ium,* is a variety of sugar candy.

Saccharum Lactis, Sugar of milk.

Saccharum Non-Purifica'tum, *Muscova'do, raw* or *brown* or *moist sugar,* is the *S. commu'nē, S. rubrum, Mel cannæ,* or *coarse sugar.*

Saccharum Officinarum, see Saccharum — s. Penidium, Hordeatum — s. Rosaceum, Confectio rosæ gallicæ—s. Saturni, Plumbi superacetas.

*SACCHARURE,* from *saccharum,* 'sugar.' A medicine resulting from the intimate union of sugar with the medicinal principles of alcohol or ethereal tinctures.—Béral.

SACCULATED, Encysted.

SACCULATUS, Encysted.

SACCULI ADIPOSI, Fatty vesicles—s. Chalicophori, see Lacunæ of Bone—s. Laryngei, Ventricles of the larynx.

Sac'culi Medicina'les. Bags containing medicinal substances.

Sacculi Medullares, see Medullary membrane.

SAC'CULUS, diminutive of *saccus,* 'a little sac.' This name has been given to two sacs formed by the membranous vestibule, which open into each other, and contain the *otolithes* and *otoconies:* one of these is termed the *sacculus vestib'uli,* the other *sacculus.* See Semicircular canals.

Sacculus, Marsupion — s. Cephalicus, Cucupha—s. Chylifer seu rorifer, Receptaculum chyli —s. Cordis, Pericardium—s. Ellipticus, see Semicircular canals.

Sac'culus Laryn'gis. A cæcal pouch, of variable size, formed by the mucous membrane in the ventricles of the larynx.—Hilton.

Sacculus Medicinalis, Pulvinar medicatum — s. Sphericus, see Semicircular canals — s. Vestibuli, Semicircular canals.

SACCUS, Sac — s. Coli, Cæcum — s. Cordis, Pericardium—s. Herniosus, Hernial sac—s. Epiploicus, Epiploon — s. Intestini crassi, Cæcum — s. Lacrymalis, Lachrymal sac — s. Lacrumalis, Lachrymal sac — s. Lacteus, Receptaculum chyli — s. Mucosus, see Bursæ mucosæ — s. Pleuræ, Pleura—s. Venarum cavarum, Sinus dexter cordis —s. Venarum pulmonalium, Sinus pulmonalis.

SACER, Sacral — s. Ignis, Herpes zoster — s. Morbus, Epilepsy — s. Musculus, Transversalis dorsi.

SACERDOTIS PENIS, Arum maculatum.

*SACHET* (F.), *Sac'culus,* 'a bag.' A small bag containing perfumes to be placed among clothes to communicate to them an agreeable odour. The following is a formula for the powder they contain. *Powdered cloves* and *powdered cassia,* each one ounce, *powdered orris root,* an ounce and a half; *powdered yellow sandal wood,* one drachm; *otto of roses,* twenty-four drops; *oil of lavender, oil of bergamot,* each one drachm; *musk,* six grains. A scent-bag.

SACK. A wine used by our ancestors; *Vin sec.* Probably *Sherry.*

Sack, *Saccus, Secluso'rium;* Sax. ſac. A bag or pouch.

Sack, Her'nial, *Saccus hernio'sus,* (F.) *Sac herniaire.* An envelope or pouch, formed by the serous membrane of the cavity, whence a viscus has escaped. We distinguish, in a hernial sac, its *orifice* or the opening by which it communicates with the great cavity lined by the serous membrane: its *cervix* or *neck,* (F.) *Collet,* the narrow portion on the outside of the orifice, where strangulation sometimes occurs: the *body,* (F.) *Corps,* which is the round prominent part; and the *fundus* or *bottom,* — the part opposite to the orifice.

Sack Posset; from *sack,* 'the wing,' and *posset.* A posset made of sack, milk and other ingredients.

Sack, Serous. The shut cavity formed by any serous membrane, as by the pleura or peritoneum.

SACRAD, see Sacral.

SACRA FISTULA, Vertebral column.

SACRAL, *Sacer,* (F.) *Sacré.* That which belongs or relates to the sacrum. A name given to several parts.

Sacral Arteries are distinguished into 1. The *anterior* or *middle sacral. Median Artery of the Sacrum* of Chaussier, which arises from the posterior part of the abdominal aorta, in front of the 4th lumbar vertebra. It descends, in a serpentine manner, upon the sacro-vertebral articulation, and on the anterior surface of the sacrum. It furnishes many lateral branches, which unite with the lateral sacral arteries, and enter the anterior sacral foramina, to be distributed to the membranes of the marrow, &c. 2. The *lateral sacral arteries,* which are two in number; one on each side. They arise from the hypogastric, from the ilio-lumbar, or from the gluteal; and descend before the anterior sacral foramina, anastomosing in an arched manner, towards the coccyx, with the middle sacral. They give off *external* and *posterior branches,* which enter the sacral foramina; and *internal branches,* which are distributed to the pyramidalis, sacrum, &c.

Sacral Aspect. An aspect towards the region where the sacrum is situated.—Barclay. *Sacrad* is used by the same writer adverbially to signify 'towards the sacral aspect.'

Sacral Extremities. The lower limbs.

Sacral Grooves, (F.) *Gouttières sacrées.* Two longitudinal excavations, slightly marked, at the posterior surface of the sacrum; which appear to terminate the vertebral grooves or gutters.

Sacral Nerves, (F.) *Nerfs sacrés,* are generally six in number. They arise from the termination of the spinal marrow. The first, united with the great cord which descends from the lumbar plexus, concurs with the three others in the formation of the sacral or sciatic plexus. The third and fourth, with branches of the great sympathetic, form the hypogastric plexus. The fifth and sixth (*coccyge'al nerve*) are distributed to the ischio-coccygeus muscle, and to the sphincter and levator ani.

Sacral Plexus, *Sciat'ic plexus,* — the *sacral portion of the crural plexus* of Chaussier, constituted as just mentioned, is situate in front of the pyramidalis. It gives off, backwards, two branches, called the *pudic,* (F.) *honteux,* and the *lesser sciatic.* It terminates in the great sciatic nerve.

*SACRÉ.* Sacral.

SACROCOCCYGE'AL, *Sacro-coccygeus.* Relating to the sacrum and coccyx.

Sacrococcyge'al Articula'tion is that of

the lower extremity of the sacrum with the superior *facette* of the coccyx. It is closed by two ligaments; — an *anterior* and a *posterior sacro-coccygeal.*

SACROCOSTALIS, Sacro-lumbalis — *s. Fémoral,* Glutæus major.

SACROCOXAL'GIA, from *sacrum,* 'the os sacrum,' *coxa,* 'the hip,' and *αλγος,* 'pain;' a hybrid term. Some authors have called thus a rheumatic affection of the sacro-iliac symphysis.

SACROÏL'IAC, *Sacro-ili'acus.* That which relates to the sacrum and ilium.

Sacroïliac Articula'tion, Sym'physis, or Synchondro'sis, *Ilio-sacral articula'tion, symphysis* or *synchondrosis,* is the union of two surfaces; — two inclined planes, broader above than below; one formed by the sacrum, the other by the ilium. Both surfaces are incrusted by an articular cartilage. The bands which strengthen them are the two *sacro-sciatic ligaments,* the *sacro-spinal,* a *sacro-iliac* ligament, and some irregular fibres. The *sacro-iliac* ligament is a very thick assemblage of short, dense, irregular fibres, occupying the space which the sacrum and ilium leave between them, behind their articular surface. Some authors have termed some irregular fibres, situate in front of the sacro-iliac articulation, *anterior sacro-iliac ligaments,* in opposition to the preceding fasciæ, which they call *posterior sacro-iliac.*

SACROISCHIATICUS, Sacro-sciatic.

*SACROLOMBAIRE,* Sacro-lumbalis.

SACROLUMBAR, *Sacro-lumba'lis, Sacro-lombaire.* That which belongs to the sacrum and loins.

Sacrolumbar, *Sacro-lumba'lis, Sacro-lumba'ris Muscle, Sacro-costa'lis, Dorso-trache'lian portion of the Sacro-spinal* of Chaussier, (F.) *Lombo-costo-trachélien, Sacro-lombaire,* is seated at the posterior part of the trunk; is thick and triangular below; flat and thin in the remainder, and terminates in a point at its upper extremity. It is attached to the posterior surface of the sacrum; to the corresponding portion of the crista ilii; to the extremities of the transverse processes of the lumbar vertebræ; to the angles of the eleven inferior ribs; to the tuberosity of the first, and the posterior tubercle of the transverse processes of the last five cervical vertebræ. The sacro-lumbalis straightens the vertebral column when bent forwards, and maintains it straight. By means of its insertion into the ribs, it can elevate or depress these bones, according as it contracts from above to below, or from below to above. It acts, consequently, sometimes as an inspiratory, at others as an expiratory muscle.

From six or eight of the lower ribs arises an equal number of fleshy portions, which terminate at the inner side of this muscle, and are called *Mus'culi Accessor'ii* vel *Additamen'tum ad Sacro-lumba'lem,* (F.) *Accessoires du Sacro-lombaire.*

From the upper part of the sacro-lumbalis, a fleshy slip, called *Cervica'lis descen'dens, Cervicalis descendens Diemerbroeck'ii, Transversa'lis collatera'lis colli, Accesso'rius ad Sacro-lumba'lem,* (F.) *Transversaire grêle,* runs up, to be fixed to the transverse processes of the fourth, fifth, and sixth cervical vertebræ, by three distinct tendons. These last parts, though separated by some anatomists, belong to the sacro-lumbalis.

SACROSCIAT'IC, *Sacro-ischiat'icus.* That which belongs to the sacrum and ischium.

Sacrosciatic Ligaments are two ligaments, which assist in securing the sacro-iliac articulation. The *great* or *posterior sacro-sciatic ligament* extends from the crista ilii and the sides of the sacrum and coccyx to the tuberosity of the ischium. The *less* or *anterior sacro-sciatic ligament* arises from the same point, and terminates in the spine of the ischium.

SACROSPINAL, Dorso-trachelian portion of the sacro-lumbalis.

SACROSPINA'LIS. That which relates to the sacrum and spine. Under this name, Chaussier describes the sacro-lumbalis, longissimus dorsi, transversalis, transverso-spinalis, and intertransversalis. He divides it into three portions.

*SACROTROCHANTÉRIEN,* Pyramidalis.

SACROVERT'EBRAL, *Sacro-vertebra'lis.* That which relates to the sacrum and the vertebræ.

Sacrovertebral Articulation is the junction of the last vertebræ of the loins with the sacrum. The angle which these two bones form at the anterior part has been called the *Prom'ontory of the Sacrum,* or the *Sacro-vertebral Angle.*

Sacrovertebral Ligament is a strong ligament, which passes from the anterior part of each of the transverse processes of the last lumbar vertebra to be attached to the base of the sacrum. Its *use* is to maintain the articulation of those two bones *in situ.*

SACRUM, *Os sacrum, Os basila'rē, Os Alagas, Os latum, Os clun'ium, Ver'tebra magna, Albagiazi, Hi'eron ost'eon, Clunis, Subver'tebra, Subver'tebrum, Vet'ula;* from *sacer,* 'sacred;' because it contributes to protect the genital organs, which were considered sacred, or because it was offered in sacrifice. The bone, which forms the posterior part of the pelvis, and is a continuation of the vertebral column. The sacrum is symmetrical and triangular, situate at the posterior part of the pelvis, and concave anteriorly. It has, — 1. A *pelvic* or *anterior surface,* which corresponds to the pelvic cavity, and has four transverse furrows, that point out the parts where the primitive portions of the bone were separated from each other. On each side there are four foramina, called *anterior sacral;* these are oblique, and decrease in size, from above downwards. Through these pass the anterior branches of the sacral nerves. 2. A *spinal* or *posterior surface,* which is convex, rough, and covered by muscles. Upon the median line are four horizontal, tubercular eminences, forming a continuation of the spinous processes of the vertebræ; and below, a triangular notch, where the *sacral canal* terminates. On each side of the surface are four foramina, called *posterior sacral,* which are smaller than the anterior, and give passage to the posterior branches of the sacral nerves. 3. The *vertebral surface* or *base.* Its greatest extent is transversely. It is articulated with the last lumbar vertebra. On it is seen the orifice of the *sacral canal,* of a triangular shape, which decreases in width from above downward; terminates the vertebral canal; is lined by a prolongation of the cerebral membranes; contains the fasciculi of the sacral nerves; communicates, externally, by the sacral foramina; and terminates at the triangular notch on the posterior surface of the bone. At the sides of the upper orifice of the sacral canal are two articular processes, which receive the articular processes of the last lumbar vertebra. The projection formed by the union of the base of the sacrum with the last lumbar vertebra, is called the *Prom'ontory, Promonto'rium Ossis Sacri, Great Angle of the Sacrum* or *Sacro-vertebral Angle.* 4. A *coccygeal face* or *apex,* (F.) *Face coccygienne* ou *Sommet,* which is very narrow, and is articulated with the coccyx. 5. *Two lateral margins,* which have, above, a broad, oblique surface, articulated with the ilium.

The sacrum is developed by 30 to 36 points of ossification.

SADDLE, TURKISH, Sella Turcica.

SÆPES, Sepes.

SAFFLOW, Carthamus tinctorius.

SAFFLOWER, Carthamus tinctorius.

SAFFRON, Crocus — s. Bastard, Carthamus tinctorius — s. Dyers', Carthamus tinctorius — s. Flower, Carthamus tinctorius — s. Meadow, Colchicum autumnale.

*SAFRAN BÂTARD*, Carthamus tinctorius, Colchicum autumnale — *s. des Indes*, Curcuma longa — *s. de Mars apéritif*, Ferri subcarbonas — *s. de Mars astringent*, Colcothar — *s. des Près*, Colchicum autumnale — *s. Racine de*, Curcuma longa.

SAFRANUM, Carthamus tinctorius.

SAFRE, Smalt.

SAGA, Sago.

SAGAPE'NUM, *Sag'apin*, *Serapi'non*, (F.) *Gomme séraphique*. A gum-resin, supposed to be obtained from the *Fer'ula Per'sica*. *Family*, Umbelliferæ. *Sex. Syst.* Pentandria Digynia. Its odour is fetid and alliaceous; taste pungent, bitterish, nauseous. It is in small, agglutinated masses of a yellow colour; tenacious; breaking with a horny fracture. It is a reputed antispasmodic and emmenagogue. Dose, gr. x to ʒss.

SAGAPIN, Sagapenum.

SAGE, Salvia — s. Indian, Eupatorium perfoliatum — s. Jerusalem, Pulmonaria — s. Tree, Lantana — s. Wild, Salvia Africana.

*SAGE-FEMME*, Midwife.

SAGENA, Epiploon.

*SAGESSE DES CHIRURGIENS*, Sisymbrium Sophia.

SAGIMEN VITRI, Soda, subcarbonate of.

SAGIT'TAL, *Sagitta'lis*, *Sagitta'tus*, from *sagitta*, 'an arrow.'

SAGITTAL FURROW, *Sagittal Groove*, (F.) *Gouttière sagittale*, is a channel on the median line of the inner surface of the skull-cap. It is excavated in the os frontis, in the two parietal and occipital bones, and extends from the crista galli to the internal occipital protuberance. It lodges the longitudinal sinus, which has been called the *sagittal sinus*.

SAGITTAL SUTURE, *Obelæ'a sutu'ra*, *O. Raphē*, *Sutura Virga'ta*, *S. juga'lis*, *S. Rabdoï'des*, *Rhabdoï'des*, *Rhabdo'des*, *Rhabdoïdeus* seu *Biparieta'lis*. The suture which unites the two parietal bones, and which extends, from before to behind, on the median line, from the coronal suture to the lambdoidal. It is so called, from *sagitta*, 'an arrow,' because it seems to meet the coronal suture as an arrow meets the string of a bow.

SAGITTA'RIA VARIAB'ILIS, *Arrowhead*, *Arrowleaf*, *Wapata* of Oregon; *Nat. Ord.* Alismaceæ; esculent, yielding fecula like arrow-root. The roots are cooling and sub-astringent, and are at times applied to the feet in cases of yaws and dropsical swellings of the legs. The leaves are applied to the breasts to dispel milk.

SAGITTA'RIUM ALEXIPHAR'MACUM, *Malac'cæ radix*, *Canna In'dica*, *Arun'do Indica*. A root cultivated in the West Indies, and supposed to be a remedy for wounds by poisoned arrows.

SAGITTATUS, Sagittal.

SAGO, *Sagus*, *Saga*, *Sagu*, *Segu*, *Am'ylum palma'ceum*, (F.) *Sagou*, *Sague*. A fecula, obtained from the pith of the *Sagus rumph'ii*, *Cycas circina'lis*, *C. revolu'ta*, &c., growing in the Moluccas, Philippine Isles, &c., and which is brought to us in small grains. The same substance is, also, obtained from the West Indies, but it is inferior to that from the East. By boiling in water or milk, sago becomes soft and transparent, and forms an agreeable and nutritious food in febrile, calculous, and other disorders. It is made palatable by sugar, lemon-juice, or wine, where the last is not contra-indicated.

To make sago into a proper mucilage for the sick, a tablespoonful of it should be macerated in a pint of water for two hours, and then boiled for fifteen minutes, stirring assiduously. Care must be taken, that the grains are perfectly dissolved by long boiling and constant stirring.

*Sago posset* is made by putting *sago*, ʒij, into *water*, Oij; boiling until the mucilage is formed: then rubbing *sugar*, ʒss, on the rind of a lemon, and putting it with *tincture of ginger*, fʒj, into *sherry*, Oss; adding this mixture to the mucilage, and boiling for five minutes.—It is a good restorative.

SAGO, FRENCH, see Solanum tuberosum, and Arrow-root, common — s. Portland Island, see Arum maculatum.

*SAGOU*, Sago.

SAGU, Sago.

*SAGUE*, Sago — *s. Petit*, see Solanum tuberosum.

SAGUS, Sago — s. Rumphii, see Sago.

SAHARA, Insomnia.

*SAIGNÉE*, Blood-letting — *s. Spoliative*, Spoliativa phlebotomia.

*SAIGNEMENT DU NEZ*, Epistaxis.

SAILORS, DISEASES, &c., OF. Sailors, by nature of their occupation, are liable to many diseases. Several of these may, however, be warded off by proper attention to cleanliness and ventilation.

*SAIN BOIS*, Daphne gnidium — *s. Doux*, Adeps præparatus.

SAINT AMAND, MINERAL WATERS OF. Sulphuretted waters, in the department of Du Nord, France. They contain carbonic and sulphohydric acids. The *Boue* or deposit contains sulphohydric acid, and salts of iron and magnesia. Temperature, 64° to 82° Fahr.

SAINT AUGUSTINE, CLIMATE OF. This sea-port of Florida is a frequent retreat during the winter season for the valetudinarian from the more northern parts of the United States. The climate is certainly comparatively mild and equable; but it is liable to frequent north-east storms. There are only a few days, however, in winter, in which the invalid cannot take exercise in the open air. Tampa Bay, and Pensacola, in Florida, and Mobile, in Alabama, which are sometimes visited by the consumptive, are less liable to the storms in question.

SAINT CHARLES'S ROOT, Carlo Sancto (Radix).

SAINT CROIX, Santa Cruz.

SAINT JAMES'S WORT, Senecio Jacobæa.

SAINT JOHN'S DANCE, see Mania, dancing — St. John's Wort, Hypericum perforatum.

SAINT KITTS, see West Indies.

SAINT LEONARD'S, CLIMATE OF. This place, which is situate about a mile to the westward of Hastings, in Sussex, England, is less sheltered than it, and is therefore a less favourable retreat, during the winter months, for the phthisical valetudinarian.

SAINT MYON, MINERAL WATERS OF. Some cold, acidulous waters at Saint Myon, near Riom, in the department of Puy-de-Dôme. They contain free carbonic acid, subcarbonate of soda, chloride of sodium, and carbonate and sulphate of lime.

SAINT NECTAIRE, MINERAL WATERS OF. Springs in the department of Puy-de-Dôme, France. They contain carbonic acid, bicarbonate of soda, and chloride of sodium. Temperature, 75° to 103° Fahr.

SAINT PARDAUX, MINERAL WATERS

OF. Chalybeate springs in the department of Allier, France. They contain carbonic acid and iron.

SAINT SAUVEUR, MINERAL WATERS OF. Sulphurous waters in the department of Hautes-Pyrénécs, France. Temperature, 76° to 93° Fahr.

SAINT VINCENT'S, see West Indies.

SAINT VITUS'S DANCE, Chorea, see Mania, dancing — s. Vitus's Dance of the Voice, Balbuties.

SAIRE, Essera.

SALAAM CONVULSION, see Convulsion, Salaam.

SALAB, Salep.

SALACITAS, Satyriasis — s. Vulvæ, Nymphomania.

SALAD, CORN, Valeriana dentata.

SALAP, Salep.

SALCOMBE, (CLIMATE OF.) A small place — the Montpelier of Huxham — which is one of the warmest spots on the S. W. coast of England, and, therefore, in this respect adapted for the phthisical invalid as a winter retreat.

SALEP, *Saloop'* (so pronounced.) *Salab, Salap.* The prepared bulb of the *Orchis mas'cula* and other species of Orchis. The salep of Cachmere is from a species of *Euloph'ia.* Salep is in small, irregular, hard masses. In its composition in relation to water, it is closely analogous to tragacanth. It is possessed of similar virtues with sago, tapioca, &c. The mucilage is prepared by dissolving the powdered salep in hot water, with assiduous stirring, and adding to the solution sugar and milk.

SALER'NUM, (SCHOOL OF.) An ancient school of medicine at Salerno in Italy. It was established by Charlemagne, in 802; and was the first Christian university at which medicine was taught. It was much celebrated, especially in the 12th century. The work on hygiene, "*De Conservandâ Valetudine,*" which bears its name, has passed through several editions in various languages. It is supposed to have been written by John of Milan, in 1100, and is in Leonine verses.

SALICARIA, Lythrum salicaria.

SALICINE, see Salix.

SALICORNIA ARABICA, &c., see Soda.

SALINE', *Sali'nus, Salina'cius, Sulinac''idus, Sali'tus, Salsus, Hali'nus, Halmy'rus, Halico'des, Sali'nous,* from *sal.* That which contains a salt, or has the properties of a salt.

SALINE DRAUGHT or MIXTURE. This may be made as follows:—*Potass. carbon.* ℈j, *acid. citric.* vel *tartar.* gr. xv, vel *succ. limon. recent.* ℥ss, *aquæ* f℥viij, *syrup. cujusvis* ℥j. M. Given in divided doses as a febrifuge.

SALINE EFFERVESCING DRAUGHT or MIXTURE is made by adding a due proportion of either of the acids above mentioned, or of lemon-juice, to the proper proportion of the carbonate of soda or potassa. About 25 grains of the acid saturate 30 grains of the carbonate. See Powders, soda.

SALINOUS, Saline.

SALIS AMMONIACI FLORES, Ammoniæ carbonas.

SALITIO, Leap.

SALITUS, Saline.

SALIUM, Saliva.

SALIUNCA, Valeriana Celtica.

SALI'VA, *Si'alon, Si'elon, Sialo'ma, Ptysma, Pty'alon, Pty'elon, Sa'lium, Sputa'men, Sputamen'tum, Sputum, Spittle.* An inodorous, insipid, transparent, slightly viscid fluid; secreted by the parotid, submaxillary and sublingual glands, and poured into the mouth by the ducts of Steno, Wharton and Rivinus; the use of which is to mix with the alimentary bolus, and to serve in the process of digestion. It is composed, according to Berzelius, of 992.2 parts of water, 2.9 of a particular animal matter, soluble in water, and insoluble in alcohol, *pty'alin, princip'ium saliva'le,*

*mate'ria sialí'na*, of 1.4 of mucus, 1.7 of chlorides of potassium and sodium, 0.9 of lactate of soda and animal matter, and 0.2 of soda.

SALIVÆ FLUXUS CIBO VISO, see Salivation.

*SALIVAIRE*, Salivary.

SALIVAL, Salivary.

SALIVANS, Sialagogue.

*SALIVANT*, Sialagogue.

SALIVARIS, Salivary — s. Herba, Anthemis pyrethrum.

SAL'IVARY, *Saliva'rius, Saliva'ris, Salivo'sus, Sali'val, Sali'vous*, from *saliva*, (F.) *Salivaire*. That which belongs to the saliva.

Salivary Calculi, see Calculi, salivary.

Salivary Fis'tulæ, *Sialosyrin'ges*, are such as depend upon an accidental opening into the excretory ducts of the salivary glands. Fistulæ are most commonly met with in the duct of Steno.

Salivary Glands, *Secreting organs of the saliva, Salival glands*, are situate symmetrically, to the number of four, on each side of the face. Their form is very irregular, and their extent varies according to individuals. Their excretory ducts — *Ductus Saliva'rii*, (F.) *Canaux* ou *Conduits salivaires*, carry the saliva directly into the mouth, without pouring it into any intermediate reservoir, as happens in the case of some of the other glands. The salivary glands have been distinguished into,—1. The *parotid*; 2. The *submaxillary*; 3. The *sublingual*; and 4. The *intralingual* or *lingual*, seated at the inferior surface of the tongue, where the mucous membrane forms a fringed fold.

SALIVATIO, Salivation—s. Mercurialis, Salivation, mercurial.

SALIVA'TION, *Saliva'tio, Saliva'tio cal'ida, Epiph'ora ptyalis'mus, Sialis'mus, Sputum Oris, Sial'achus, Sielismos, Sialorrhœ'a, Sialoze'mia, Ptyalis'mus, Pty'alism, Fluxus sali'væ*, (F.) *Flux de Bouche, Flux salivaire*. A superabundant secretion of saliva; occasioned either locally, by the use of irritating masticatories, or under the influence of some cause which acts on the whole economy, and especially of mercurial preparations. In this last case it is accompanied by a coppery taste in the mouth, by swelling of the gums, and sometimes by looseness of the teeth. Salivation may usually be diminished by the use of astringents, laxatives, &c.

*Ptyalismus acu'tus sympathet'icus, Salivæ fluxus cibo viso, Mouth watering*, the increased flow of saliva produced by the sight, smell, or thought of agreeable food, is a species of ptyalism, as well as the *Ptyalismus acutus melli'tus, Apoceno'sis ptyalis'mus mellitus*, or *Sweet spittle*. In this the saliva has a sweet or mucilaginous taste.

Salivation, Mercu'rial, *Saliva'tio mercuria'lis, Sialoze'mia mercurialis, Ptyalis'mus mercuria'lis, P. hydrargyra'tus*, (F.) *Ptyalisme mercuriel, Salivation mercurielle*. Salivation produced by mercury. The stomatitis that accompanies it is termed *mercurial, Hydrar'gyro-stomati'tis*, (F.) *Stomatite mercurielle*.

*SALIVATION MERCURIELLE*, Salivation, mercurial.

SALIVATUM, Sialagogue.

SALIVOSUS, Salivary.

SALIVOUS, Salivary.

SALIX. The *Willow*, *Ptea*, (F.) *Saule*. A genus of plants in the Linnæan system.

Salix Frag''ilis, *S. pen'dula* seu *decip'iens* seu *amygdali'na* seu *persicifo'lia* seu *Russelia'na* seu *pippoph'aëfolia* seu *Trevira'nii*, or Crack willow (Ph. D.) Salix Alba, *S. cær'ulea* seu *virtelli'na*, or White willow (Ph. D. and Ph. U. S.) Salix Latifo'lia, or broad-leaved willow. Salix Ca'prea, *S. sphacela'ta* seu *tomento'sa*, or Great round-leaved willow (Ph. L.) Salix Pentan'dria seu Hermaphroditi'ca. Salix Hu'milis, Low bush willow, Speckled willow. Salix Viteli'na, Salix Erioceph'ala. The bark of each of these has a slightly aromatic odour, and a bitter astringent taste, which is nearly the same in all the species. It is tonic and astringent, and has been used in intermittents, and in cases of dyspepsia, worms, &c. The active principle has been separated, and called *Sal'icine*. It is like the quinia in medicinal efficacy. Dose, ℈j to ʒj of the powder. Dose of *Salicine* from 4 to 6 grains.

Salix Ægyptiaca, Calaf.

SALLOW, Lurid.

SALMIAC, Ammoniæ murias.

SALOOP, Salep.

SALPETRA, Soda, nitrate of.

SALPINGEMPHRAX'IS, from σαλπιγξ, 'the Eustachian tube,' and εμφραξις, 'obstruction. Obstruction of the Eustachian tube; — a cause of deafness.

SALPINGI'TIS, from σαλπιγξ, 'a tube,' and *itis*, 'denoting inflammation.' Inflammation of the Eustachian tube.

SALPINGOCYE'SIS, *Paracye'sis tuba'ria, Gravid'itas tuba'ria*, from σαλπιγξ, 'a tube or trumpet,' and κυησις, 'pregnancy.' Tubal pregnancy. — See Pregnancy.

*SALPINGOMALLÉEN*, Tensor tympani — s. Staphylinus internus, Levator palati.

SALPINGOPHARYNGÆ'US, from σαλπιγξ, 'a trumpet,' and φαρυγξ, 'the pharynx.' Valsalva and Douglas have given this name to a bundle of fibres, which passes from the Eustachian tube to the pharynx.

SALPINGOSTAPHYLINUS, Circumflex muscle.

SALPINGOSTENOCHO'RIA, from σαλπιγξ, 'a tube,' στενος, 'narrow,' and χωρα, 'space.' Narrowness or stricture of the Eustachian tube.

SALPINX, Tuba.

SALSAFI, Tragopogon.

SALSAMENTUM CRUDUM, Omotarichos.

SALSAPARILLA GERMANICA, Sarsaparilla Germanica.

SALSEDO MUCRUM, Potassæ nitras.

*SALSEPAREILLE*, Smilax sarsaparilla — s. *d'Allemagne*, Sarsaparilla Germanica.

SALSILAGO, Muria.

SALSOLA DECUMBENS, S. Kali.

Salso'la Kali, *S. Decum'bens, Kali soda, Prickly Saltwort, Kali spino'sum cochlea'tum, Tragus* sive *Tragum Matthi'oli*. This plant, as well as the *Salsola sati'va* and the *Salsola soda* seu *longifo'lia, Kali iner'mis* seu *soda, Herba vitri*, produces the alkaline salt, commonly called *Barilla, Soda*, or *Kelp*.

Salsola Longifolia, S. Kali — s. Sativa, &c., see S. Kali, and Soda — s. Soda, see S. Kali.

SALSUGINOSUS, Halmyrodes.

SALSUS, Saline.

SALT, *Sal, Hal, Hals*, 'αλς, (F.) *Sel*. A name formerly given to a considerable number of substances of very different nature. At present, chymists apply the term *Salts* exclusively to the combination of an acid with one or more bases. *Neutral salts* are those in which the acid and base reciprocally saturate each other. *Acid salts* or *supersalts*, (F.) *Sur-sels*, are those in which the acid predominates over the base. *Alkaline salts* or *subsalts*, (F.) *Sous-sels*, those in which the base is, on the contrary, predominant. The different denominations of the salts are compounded, 1. Of the name of the acid; the termination of which is changed into *ite*, when the name of the acid is

in *ous*; — *ate*, when it is in *ic*. Thus the salts formed by the *sulphurous* acid are *sulphites*; those by the *sulphuric*, *sulphates*. 2. This name is followed up by that of the oxyd, that enters into the composition of the salt. Thus, the *sulphate of protoxyd of iron* is a combination of sulphuric acid with the protoxyd of that metal. Frequently, to shorten the name, the word *oxyd* is suppressed; and *proto, deuto, trito*, &c., put before the acid:—as *protosulphate of iron*. *Simple salts* are those resulting from the combination of an acid with a single base: *double salts* with two different bases: *triple* with three, &c. A *haloid salt* is one constituted after the type of common salt, or which contains a metal and a *salt-radical*, as chlorine, iodine, &c. An *oxysalt* is formed from the combination of an acid with an oxide.

When *salt* is used in an abstract sense, it means the chloride of sodium.

Salt Aperient, of Frederick, Soda, sulphate of—s. Baker's, Ammoniæ carbonas—s. of Barilla, Soda, subcarbonate of—s. Bay, Soda, muriate of—s. Bitter purging, Magnesiæ sulphas—s. Common, Soda, muriate of—s. Epsom, Magnesiæ sulphas—s. Glauber's, Soda, sulphate of—s. Glauber's, Lymington, see Soda, sulphate of—s. Rochelle, Soda, tartrate of—s. Rock, Soda, muriate of—s. Sea, Soda, muriate of—s. Secondary, Neutral salt—s. Seignette's, Soda, tartrate of—s. Smelling, Ammoniæ carbonas—s. of Soda, Soda, subcarbonate of—s. Sore-throat, Potassæ nitras fusus sulphatis paucillo mixtus—s. of Tartar, see Potassæ subcarbonas, and Potash—s. Tasteless purging, Soda, phosphate of—s. of Uriue, Ammoniæ carbonas—s. White, Soda, muriate of—s. of Woodsoot, Ammoniæ carbonas—s. of Wormwood, see Potash.

SALTANS ROSA, Urticaria.

SALTATIO, Dancing—s. Sancti Viti, Chorea.

SALTERTON. A village about four miles to the eastward of Exmouth, England, frequented as a winter abode by invalids. It is in a small, open valley on the seashore, and is well protected from winds, particularly the northerly.

SALTISH, Halmyrodes.

SALTPETRE, Potassæ nitras.

SALTUS, Leap, Vulva—s. Tendinum, Subsultus tendinum.

SALTWORT, PRICKLY, Salsola kali.

SALUBRIOUS, Salutary.

SALUBRIOUSNESS, Salubrity.

SALUBRIS, Salutary.

SALU'BRITY, *Salu'britas, Salu'briousness*, (F.) *Salubrité*, from *salus*, 'health.' Any thing which contributes to the health of individuals or of communities. Situations differ materially from each other in this respect; and the cause of the difference is often an interesting topic of inquiry.

SALUS, Sanitas.

*SALUTAIRE*, Salutary.

SAL'UTARY, *Peries'ticos, Saluta'ris, Salu'ber, Salu'bris, Hygiei'nus, Hygiasticus, Hygie'rus, Salu'brins*, (F.) *Salutaire*. Same etymon. Healthy. That which is favourable to health. Some diseases have been considered salutary; but this is doubtful.

SALUTIF'EROUS, *Salu'tifer*; from *salus*, 'health,' and *fero*, 'I bear.' Bringing health; health bearing.

SALVATEL'LA; same etymon, (?) *Vena salvatel'la*, is situate on the back of the hand, near its inner margin. It begins on the posterior surface of the fingers and dorsal surface of the hand, by a plexus, formed of a number of radicles, frequently anastomosing with each other; it then ascends to the inner part of the forearm, where it takes the name—*posterior cubital*. The ancients recommended this vein to be opened in certain diseases, as in melancholic and hypochondriacal affections; and they attributed to such abstraction of blood considerable efficacy in the cure of disease: hence its name.

SALVE, BLISTERING, Unguentum lyttæ—s. Eye, Unguentum oxidi zinci impuri—s. Eye, Singleton's, Unguentum hydrargyri nitrico-oxydi—s. Healing, Cerate of calamine.

SAL'VIA, *S. officina'lis* seu *horten'sis* seu *vulga'ris* seu *minor, Elelis'phacos*, (F.) *Sauge, Petite Sauge, Thé d'Europe, Thé de France*. *Family*, Labiatæ. *Sex. Syst.* Diandria Monogynia. Sage has a peculiar, aromatic odour, and a warm, aromatic, bitterish taste. Its virtues depend upon an essential oil. It is tonic, stimulant, and carminative. In the form of a weak infusion, it is occasionally used as a diluent, and as a wash for sore mouth. Dose, gr. xv to xxx or more.

Salvia Africa'na, *Wild Sage*, a South African species, has the same medical properties as Salvia.

Salvia Colorata, Salvia.

Salvia Hormi'num, *Hormi'num, S. colora'ta, Hormi'num colora'tum* seu *sativum*, (F.) *Sauge-hormin*, of the Pharmacopœias, is used in similar cases.

Salvia Hortensis, Salvia—s. Minor, Salvia—s. Officinalis, Salvia.

Salvia Scla'rea, *Sclarea, Gallii'richum, Æthio'pis, Biser'mas, Colus Jovis, Common Clary*, (F.) *Sauge sclarée, Grande sauge, Orvale* ou *Toutebonne*. The leaves have been recommended as corroborants and anti-spasmodics.

Salvia Vitæ, Asplenium ruta muraria—s. Vulgaris, Salvia.

SAMBU'CUS, *Sabu'cus, Sambucus nigra, S. vulga'ris, S. Arbo'rea, Actē, Infe'lix lignum; the Elder*, (F.) *Sureau commun*. *Family*, Capparifoliaceæ. *Sex. Syst.* Pentandria Digynia—(The flower and bark were formerly called *Cano'pum.*) The flowers, berries, and bark of the elder have been used in medicine. The *flowers* have been reputed diaphoretic and discutient: the *berries*, aperient and sudorific: the *bark*, purgative, and, in small doses, deobstruent. The flowers are sometimes used in fomentations, and to form a cooling ointment.

Sambucus Arborea, Sambucus—s. Chamæacte, S. ebulus.

Sambucus Eb'ulus, *Ebulus, Chamæac'tē, Od'ocos, Sambucus Chamæac'tē* seu *He'lion, Sambucus hu'milis* seu *Herba'cea, Dwarf-elder, Danewort*, (F.) *Hièble*. The root, interior bark, leaves, flowers, berries, (*Baccæ* seu *Grana Actes*,) and seeds have all been given in moderate doses as resolvents and deobstruents; and in large doses as hydragogues. The berries of *Sambucus Canaden'sis*, the *Common Elder* of America, are made officinal in the American Pharmacopœia.

Sambucus Helion, Sambucus ebulus—s. Herbacea, S. ebulus—s. Humilis, S. ebulus—s. Nigra, Sambucus—s. Vulgaris, Sambucus.

SAMI TERRA, *Sa'mian Earth*. An argillaceous earth, found in the island of Samos, to which were ascribed virtues similar to those of the Terra Lemnii.—Galen, Dioscorides.

SAMIUS LAPIS. A stone found in the Isle of Samos, which the ancients believed to be astringent and refrigerant.

SAMPHIRE, Crithmum maritimum.

SAMPSON, BLACK, Echinacea purpurea.

SAMPSUCHUS, Thymus mastichina.

SAMPSUCUS, Origanum majorana.

SAMPSYCH'INON, *Sampsu'chinum*. An ointment composed of *σαμψυχον*; which was perhaps marjoram.—Dioscorides.

SANABILIS, Curable.

SANABLE, Curable.

SANAMUNDA, Geum urbanum.

SANATIO, Curation, Cure.

SANATIVE, Curative.

SAN GIULIANO, MINERAL WATERS OF. At the foot of the mountain San Giuliano, a league and a half from Pisa, are several mineral springs; temperature from 84° to 107° Fahr.

The spring, *Pozzetto*, contains carbonic acid, sulphates of soda, lime, and magnesia; chlorides of sodium and magnesium; carbonates of lime and magnesia; argil and silica.—Santi.

SAND, see Gravel.

SANDALUM CÆRULEUM, Guilandina moringa—s. Rubrum, Pterocarpus santalinus.

SAN'DARAC, *Sandara'cha, Gum Ju'niper, Gum Sandarach, Pounce, Gummi Junip'eri, Sandara'ca, Vernix sicca, Resina Junip'eri.* A name given, by the Arabs, to an odorous resin, that flows from the *Thuya aphyl'la. Family*, Coniferæ. *Sex. Syst.* Monœcia Monadelphia. It is stimulant, like all the resins; but is very little used.

SANDARACHA GRÆCORUM, Realgar.

SAND-BLIND. A defect of vision, in which small particles seem to fly before the eyes. See Metamorphopsia.

SANDERS, see Saunders.

SANDIVER, see Vitrum.

SANDIX, Plumbi oxydum rubrum.

SANDYX, Plumbi oxydum rubrum.

*SANG*, Blood—*s. Artériel*, Arterial blood—*s. Dragon*, Rumex sanguineus—*s. Dragon*, see Calamus rotang—*s. Globules du*, Globules of the blood—*s. Perte de*, Hæmorrhagia.

SANGAREE'. Wine and water, sweetened and spiced.

*SANGLOT*, Sob.

*SANGSUE*, Hirudo.

SANGUIDUCTUS DURÆ MATRIS, Sinuses of the dura mater.

SANGUIFICATIO, Hæmatosis—s. Debilior, Hyphæmatosis.

SANGUIFLUXUS, Hæmorrhagia—s. Uterinus, Metrorrhagia.

SANGUIMOTION, Circulation.

SANGUIMOTORY, Circulatory.

*SANGUIN*, (*Vaisseau*,) Blood-vessel.

SANGUINALIS CORRIGIOLA, Polygonum aviculare.

SANGUINA'RIA, *S. Canaden'sis* seu *acau'lis, Bloodroot, Bloodwort, Puccoon, Red Puccoon, Red Root, Indian Paint, Tur'meric. Nat. Ord.* Papaveraceæ. *Sex. Syst.* Polyandria Monogynia. A North American plant, the rhizoma and seeds of which are used in medicine. They are emetic. Dose of the powder, 8 to 20 grains. They are said to reduce the velocity of the pulse, like digitalis.

SANGUINARIA, Polygonum aviculare.

SANGUINE, *Sanguin'eus, Sanguino'sus, Hæmat'icus, Hæmato'des, Hæmate'rus, Hæmati'nus, Hæmo'des, Hæmoï'des, Sanguineous;* (F.) *Sanguin.* Bloody, blood-like; having the colour of blood, as 'a *sanguine* countenance.' Relating to, or containing blood—as 'sanguine temperament.' Plethoric.

SANGUINEA, Potassæ nitras.

SANGUINENESS, Plethora.

SANGUINEOUS, Plethoric, Sanguine.

SANGUINEUS, Sanguine.

SANGUINIS ABSORPTIO, Hæmorrhophesis—s. Congestio, Congestion—s. Dissolutio, Hæmateclysis—s. Fluor, Hæmoptysis—s. Fluor Vesicæ, Cystorrhagia—s. Ictus, Apoplexy—s. Missio, Blood-letting—s. Profluvium copiosum, Hæmorrhagia—s. Profluvium ex Ore, Stomatorrhagia—s. Stagnatio, Hæmostasis.

SANGUIN'OLENT, *Sanguinolen'tus*, from *sanguis*, 'blood.' Tinged with blood. An epithet applied, particularly, to the sputa when so tinged. Bloody.

SANGUINOSUS, Sanguine.

SANGUIPUR'GIUM, from *sanguis*, 'blood,' and *purgare*, 'to cleanse.' Purgation of the blood. A name given by some authors to mild fevers, from an idea that they purged the blood of noxious matters.

SANGUIS, Blood, Sperm—s. Concretus, Coagulum—s. Draconis, see Calamus rotang—s. Hirci siccatus, see Blood—s. Menstruus, see Menses—s. in Urinâ, Hæmaturia.

SANGUISOR'BA CANADEN'SIS, *Canada Burnett.* A tall indigenous plant—*family*, Rosaceæ—with white, sometimes purple, flowers, which appear from August to October. It has the same virtues as

SANGUISOR'BA OFFICINA'LIS, *S. car'nea* seu *rubra, Ital'ian Pim'pinel, Pimpinel'la Ital'ica* seu *officina'lis*, (F.) *Pimprenelle noire.* It was formerly used as an astringent and tonic, in hemorrhages, dysentery, &c.

SANGUISUGA, Hirudo.

SANGUISU'GUM. A barbarous term, to denote too great an accumulation of blood in the heart.—Bonetus.

SANICLE, Sanicula, S. Marilandica—s. American, Heuchera cortusa—*s. de Mariland*, Sanicula Marilandica—s. Yorkshire, Pinguicola vulgaris.

SANIC'ULA, *S. Europæ'a* seu *officina'rum, Astran'tia diapensia, Cauca'lis Sanic'ula, Cucul'la'ta, Dodeca'theon, Sym'phytum petræ'um, Sanic'ula mas, Diapen'sia, D. cortu'sa, San'icle,* (F.) *Toute-saine. Family*, Umbelliferæ. *Sex. Syst.* Pentandria Digynia. This herb was formerly used as a mild astringent. It is bitterish, and somewhat austere.

SANICULA, Saxifraga granula—s. Eboracensis, Pinguicola vulgaris—s. Europæa, Sanicula.

SANIC'ULA MARILAN'DICA, *San'icle, Ma'ryland Sanicle, Black Snakeroot*, (F.) *Sanicle de Mariland.* This indigenous plant grows in marshes, or low and shaded ground. It is possessed of tonic virtues; and the powdered root is employed in popular practice as a favourite remedy in intermittent fever. It has been recommended, also, in chorea.

SANICULA MONTANA, Pinguicola vulgaris—s. Officinarum, Sanicula.

SANIDO'DES, *Sanio'des*, 'resembling a board,' from σανις, gen. σανιδος, 'a board,' and ειδος, 'resemblance.' One whose thorax is narrow, and, as it were, contracted.

*SANIE*, Sanies.

SA'NIES, *Ichor, Tabum, Virus, Pus malig'num, P. corrosi'vum*, (F.) *Sanie.* A thin, serous fluid, presenting some of the qualities of pus and blood, and commonly exhaled at the surface of ulcers.

SANIODES, Sanidodes.

SANIOSUS, Ichorous.

SANIOUS, Ichorous.

SAN'ITARY, *San'atory*, Healing. (F.) *Sanitaire.* That which relates to health, and especially to public health; as *établissement sanitaire; police sanitaire.*

SANITA'RIUM, *Sanato'rium;* from *sanitas*, 'health.' A retreat selected for valetudinarians, in consequence of its salubrity. Also, an establishment for the treatment of the sick.

SAN'ITAS, *Hygië'a, Hyge'a, Hygian'sis, Hygi'asis, Integ'ritas, Prosper'itas Valetu'dinis, Salus, Hygiei'a, Valetu'do, Valitu'do, Valetu'do bona* seu *secun'da* seu *com'moda, Hygeï'a, Euzoödyna'mia, Health*, (F.) *Santé*, from *sanus*,

'sound.' Health has been defined,—a state, in which all the functions are exerted with regularity and harmony. A person may, however, be in health, although certain functions are not performed. A blind man, for example, has health when all his functions, except sight, proceed with regularity. *Sanity* is often used for soundness of mind.

SANITAS, Cure.

SANITY, Sanitas.

SANKIRA, Smilax China.

*SANS PAIRE,* (*Veine,*) Azygos vein.

SANTA CRUZ, (CLIMATE OF.) This West India island is frequently selected as a winter retreat for the phthisical valetudinarian from the United States; but it does not seem entitled to any preference, in such cases, over the other islands of the West Indies, whilst its general salubrity is said to be less than that of many.

*SANTAL BLANC,* Santalum album — *s. Rouge,* Pterocarpus santalinus.

SANTALUM, see Pterocarpus santalinus.

SAN'TALUM ALBUM, *S. cit'rinum* seu *pal'lidum* seu *myrtifo'lium, Sir'ium myrtifo'lium, Yellow Saunders,* (F.) *Santal blanc. Sex. Syst.* Tetrandria Monogynia. The virtues of the wood of the white saunders reside in a volatile oil and resinous principle. The odour is fragrant, and resembles a mixture of ambergris and roses. It has been used as a stimulant and sudorific, but it is not now employed. The saunders woods are called, collectively, in French, *Santaux.*

SANTALUM MYRTIFOLIUM, S. album — s. Rubrum, Pterocarpus santalinus.

*SANTÉ,* Sanitas.

SANTONICUM, Artemisia santonicum.

SAN'TONINE, *San'tonin, Cinin.* A peculiar crystalline substance obtained from Artemisia Santonica. It possesses the anthelmintic properties of the plant. Dose, five or six grains.

SANTORI'NI, FISSURES OF, (F.) *Incisures* ou *Scissures de Santorini.* Clefts at the upper and back part of the fibro-cartilaginous portion of the external ear.

SANTORINI, TU'BERCLES OF. Small cartilaginous projections at the top of the arytenoid cartilages, which support the ligaments of the glottis. See Corniculum Laryngis.

*SANVE,* Sinapis.

SAP, Sax. ȝæpe, (G.) Saft, *Arborum Succus* seu *Lympha,* (F.) *Sève.* The circulating fluid of the vegetable, which corresponds to the blood of the animal.

SAPA, see Rob.

SAPHA'DA. Paracelsus has given this name to reddish scales adherent to the hair in some eruptions of the hairy scalp.

SAPHÆNA, Saphena.

SAPHE'NA, *Saphæ'na,* from σαφης, 'manifest,' 'evident.' (F.) *Saphène.* A name given to two subcutaneous veins of the lower limb. These are: 1. The GREAT SAPHENA VEIN, *Saphena interna, Tibio-malleolar,* (Ch.,) (F.) *Grande Veine Saphène* ou *Saphène interne.* Its radicles occupy the inner part of the great toe, and form a transverse arch on the back of the foot, which unites with the saphena externa, and receives at its convex part, which is turned forwards, a number of branches coming from the toes. These radicles, when united, ascend before the inner ankle, and form a trunk, the size of which is farther increased by several branches that proceed from the region of the tarsus, and that of the metatarsus. This trunk ascends vertically at the inner part of the leg; passes behind the inner condyle of the femur; proceeds along the inner part of the thigh; receives other subcutaneous veins, such as the abdominal subcutaneous, the external pudic, &c., and passes through the inferior opening of the crural canal to empty itself into the femoral vein. 2. The LESSER VENA SAPHENA or *Saphena externa;* the *Peroneo-malleolar Vein* of Chaussier, (F.) *Petite Veine Saphène* ou *Saphène externe,* commences by several roots, which are spread over the dorsum and outer side of the foot, and embrace the outer ankle. Behind this, they unite into a single trunk, which ascends obliquely, approaching the tendo Achillis, and proceeds vertically towards the ham to open into the popliteal vein.

*SAPHÈNE,* Saphena.

SAPHE'NOUS, *Sapheno'sus;* from *Saphène.* Of or belonging to the saphena.

SAPHENOUS NERVES are two in number, and are branches of the crural or femoral nerve. They are the *short saphenous — nervus cutaneous internus;* and the *long saphenous, — nervus cutaneous internus longus.*

The *external saphenous,* formed by the union of the communicans poplitei and communicans peronei, passes down the leg by the side of the external saphenous vein of the foot.

SAPID, *Sa'porous, Sap'idus,* (F.) *Savoureux.* Possessed of sapidity. Having the power of affecting the organs of taste.

SAPID'ITY, *Sap'idness, Saporos'ity, Sapor,* (F.) *Sapidité,* from *sapere,* 'to taste.' The quality of bodies that gives them taste.

*SAPIN COMMUN,* Pinus picea.

SAPIN'DUS, *S. Sapona'ria, Sapona'ria, Soap Tree,* (F.) *Savonnier commun.* The name of the plant that affords the *Soap Nuts, Sapona'riæ Nu'culæ, Bac'cæ Bermuden'ses, Soap-berries.* A spherical fruit about the size of a cherry, the cortical part of which is yellow, glossy, and so transparent as to show the spherical black nut that rattles within, and includes a white kernel. The cortical part of this fruit, which has similar effects with soap in washing, has been recommended in chlorosis, and as a stomachic and deobstruent.

SAPO, *Soap,* Sax. ȝape, *Smegma,* (F.) *Savon.* A product obtained by treating fatty bodies with caustic alkalies dissolved in water. In the Pharmacopœia of the United States, it means Soap made with soda and olive oil.

YELLOW SOAP is formed of turpentine, oil, and alkali.

Castile Soap, being made of fine olive oil, is generally used internally. The yellow and soft soaps are the most stimulating; and are, consequently, best adapted for particular cutaneous eruptions.

Internally, soap is purgative and diuretic; externally, it is detergent and stimulant. Soapy water is used with the greatest success, in cases of poisoning by acids. It is mostly applied externally to bruises and sprains. In *Pharmacy,* it is used to favour the solution of resins.

SAPO AC''IDUS, *Acid Soap,* is a combination of a fixed oil with an acid.

SAPO AMMONIACALIS, Linimentum ammoniæ fortius—s. Ammoniæ oleaceus, Linimentum ammoniæ fortius — s. Amygdalinus, Sapo medicinalis — s. Cacaotinus, Sapo coconeus — s. Calcarius, Linimentum aquæ calcis — s. Castiliensis, see Sap Medicinalis.

SAPO COCO'NEUS, *Soap of Cocoa-Nut Oil, S. cacaoti'nus,* (F.) *Savon de cacoa,* has been much used in Germany in herpetic affections.

SAPO DURUS, S. Hispanicus — s. Hispanicus, see S. medicinalis.

SAPO KALICUS, S. Mollis.

SAPO LIQ'UIDUS, *Liquid Soap, Lotio sapona'cea,* is a cosmetic which is composed of *olive oil*

℥iv, *ol. tartari per deliquium* ℥ss. Rub together, and add *aquæ rosarum* ℥xij.

Sapo Medicina'lis, *Medic''inal Soap, Sapo amygdali'nus*, (F.) *Savon médicinal*, is made with oil of sweet almonds and half its weight of caustic alkali, or, like the *Sapo Hispani'cus* seu *Castilien'sis, Spanish* or *Castile soap, Sapo durus*, (F.) *Savon dur*, of olive oil and soda.

Sapo Mollis, *Common* or *Soft Soap, S. vir'idis, S. ni'ger, S. ka'licus*, (F.) *Savon mou, Savon noir*, is made of potass and oil or tallow. The *Sapo vulgaris*, or 'common soap' of the Pharm. U. S. is made with soda and animal oil.

Sapo Niger, *Black Soap, Melanosmeg'ma*, is a composition of train oil and an alkali: and Green Soap, *Sapo vir'idis*, of hempseed, linseed, or rape oil, with an alkali. See Sapo mollis.

Sapo Vegetabilis, Pulvis gummosus alkalinus — s. Viridis, Sapo mollis — s. Vulgaris, see Sapo mollis.

SAPONA'CEOUS; *Sapona'ceus;* from *Sapo*, 'soap.' Soapy. Containing soap, as *Linimentum saponaceum*, Soap liniment.

*SAPONAIRE*, Saponaria.

SAPONA'RIA, from *Sapo*, 'soap.' *Soap-wort, Bruise-wort, Stru'thium, Lana'ria, Lychnis sylves'tris, Ibix'uma, Bootia vulga'ris Lychnis officina'lis*, (F.) *Saponaire. Family*, Caryophylleæ. *Sex. Syst.* Decandria Digynia. A decoction of the leaves of this plant has been recommended in scrofula, cancer, old syphilis, cutaneous eruptions, jaundice, visceral obstructions, &c. It is hardly ever used.

Saponaria, Sapindus saponaria.

SAPONARIÆ NUCULÆ, see Sapindus saponaria.

SAPO'NEA, from *Sapo*, 'soap.' A pectoral medicine, prepared with sweetened syrup of violets, and oil of sweet almonds.

SAPON'ULES, *Sapon'uli*, (F.) *Savonules.* Same etymon. Combinations of volatile or essential oils with different bases.

Acid Saponules are combinations of such oils with different acids.

SAPOR, Sapidity, Savour.

SAPOROSITY, Sapidity.

SAPOROUS, Sapid.

SAPO'TA, *Achras Sapota* seu *austra'lis* seu *Zapota, Sapota alchras, El nispero, Oval-fruited Sapota*, (F.) *Sapotier, Sapotillier, Sapotilla. Fam.* Sapoteæ. *Sex. Syst.* Hexandria Digynia. A tree which grows in the Antilles, and particularly at St. Domingo. Its fruit is much esteemed. It resembles the marmalade of quinces; and hence has been called *natural marmalade.* The seeds make an emulsion, which has been given in nephritic affections. The bark has been recommended as a febrifuge.

Sapota alchras, Sapota.

*SAPOTIER*, Sapota.

SAPOTILLA, Sapota.

*SAPOTILLIER*, Sapota.

SAPROPYRA, Typhus gravior.

SAPROS, Putrid, Rancid.

SAPROS'TOMUS, from *σαπρος*, 'foul, of a bad odour,' and *στομα*, 'mouth' One who has an offensive breath.

SAPROTES, Putrefaction.

SAR'APUS, *Sarapous.* One who has a large foot; whose toes are largely separated, or whose feet are much asunder in walking; from *σαιρω*, 'I grin,' and *πους*, 'the foot.' See Kyllosis.

SARATO'GA, MINERAL WATERS OF. The Saratoga springs in New York are ten miles north-east from Ballston. They contain the same ingredients as those of the latter place; and are much frequented by visiters from every part of the United States. The following analysis has been given of the *Congress spring.* In a wine gallon — *gaseous contents:* carbonic acid, 311 cubic inches; atmospheric air, 7. *Solid contents.* Chloride of sodium, gr. 385; iodide of sodium, gr. 3.5; bicarbonate of soda, gr. 8.982; bicarbonate of magnesia, 95.788; carbonate of lime, 98.098; carbonate of iron, 5.075; silica, 1.5; bromide of potassium, a trace. Total gr. 597.943. — Steel.

The *Walton* or *Iodine spring* contains chloride of sodium, carbonate of magnesia, and iodide of sodium.

SARCEPIPLOCELE, Sarcoëpiplocele.

SARCEPIPLOMPHALOCELE, Sarcoëpiplomphacele.

SARCEPIPLOMPHALUS, Sarcoëpiplomphalus.

SARCIDIUM, Caruncle.

SARCINA, Fœtus.

Sar'cina Ventric'uli, *Sarcina*, 'a pack, a woolpack.' A microscopic cryptogamous plant found in the fluid of waterbrash.

SARCION, Caruncle.

SARCITES, Anasarca — s. Flatuosus, Emphysema.

SARCITIS, Myositis.

SARCOCE'LE, *Hernia carno'sa, Scirrhus Testic'uli*, from *σαρξ*, 'flesh,' and *κηλη*, 'a tumour;' *Sarco'ma scroti*, (F.) *Hernie charnue.* Scirrhus or cancer of the testicle. This disease affects adults particularly; and appears most commonly after an inflammatory swelling of the testicle. Sometimes it is dependent upon a blow; at others, it makes its appearance without any appreciable cause. It is well known by a hard, heavy, ovoid or spherical swelling of the testicle, which is, at first, slightly, or not at all painful, and merely causes an unpleasant traction on the spermatic cord. There is no heat or change of colour of the skin; the spermatic cord is swollen, and participates in the affection; very painful shootings occur; the lymphatic glands of the abdomen become swollen, and form a tumour, which may, at times, be felt through the abdomen; and the patient, at length, dies with every sign of the cancerous diathesis. The prognosis is very unfavourable. The only means, indeed, that can save life is the extirpation of the testicle.

SARCOCOL'LA, (F.) *Colle-chair*, from *σαρξ*, 'flesh,' and *κολλα*, 'glue.' A resinous matter, obtained from *Pena'a Sarcocol'la, P. mucrona'ta*, and other species of Penæa. An African shrub, which has been so called from a belief that it facilitates the consolidation of flesh. It is in the form of small, oblong, semitransparent globules, of a yellowish or reddish blue, and smells like aniseed. It was once employed as an astringent and detergent.

SARCODES, Carneous.

SARCOËPIPLOCE'LE, *Sarcepiplocc'lē*, from *σαρξ*, 'flesh,' *επιπλοον*, 'the epiploon,' and *κηλη*, 'a tumour.' Epiplocele, complicated with sarcoma or sarcocele.

SARCOËPIPLOM'PHALUS, *Sarcepiplom'phalus, Sarcepiplomphalocel'lē*, from *σαρξ*, 'flesh,' *επιπλοον*, 'the epiploon,' and *ομφαλος*, 'the navel.' Umbilical hernia, formed by scirrhous epiploon or complicated with sarcoma.

SARCOHYDROCELE, Hydro-sarcocele.

SARCOLEM'MA, *Sarcolc'ma*, from *σαρξ*, 'flesh,' and *λεμμα*, 'a coat.' The sheath which surrounds the fibrils of muscle that form a fibre. It is quite distinct from the areolar membrane that binds the fibres into fasciculi. — Bowman. See Perymisium.

SARCOLOGIA, Myology.

SARCOL'OGY, *Sarcolog''ia*, from σαρξ, 'flesh,' and λογος, 'a discourse.' The part of anatomy which treats of the soft parts. It comprises myology, angiology, neurology, and splanchnology.

SARCO'MA, *Emphy'ma Sarcoma, Sarcom'atous tumour, Sarco'sis, Porrus, Sarcophy'ia, Ecsarco'ma, Ecsarco'ma, Tumor car'neus, Excrescen'tia carno'sa, Pol'ypus carno'sus*, from σαρξ, 'flesh.' Any species of excrescence having a fleshy consistence.

SARCOMA, CARCINOMATOUS, Scirrhus — s. Cercosis, see Cercosis — s. Epulis, Epulis — s. Mastoid, Mammary sarcoma — s. Medullare, see Encephaloid — s. Medullary Encephaloid, Hæmatodes fungus — s. Pulpy, Hæmatodes fungus — s. Scroti, Sarcocele.

SARCOMA, COMMON VASCULAR or ORGANIZED of Abernethy, *Emphy'ma Sarcoma Vasculo'sum*, is vascular throughout: texture simple: when bulky, napped on the surface with arborescent veins. Found over the body and limbs generally.

*SARCOMATEUX*, Sarcomatous.

SARCOMATODES, Sarcomatous.

SARCOMATOSUS, Sarcomatous.

SARCOM'ATOUS, *Sarcomato'sus, Sarcomato'des*, (F.) *Sarcomateux*. Belonging to, or having the characters of sarcoma.

SARCOMPHALUM, Sarcomphalus.

SARCOM'PHALUS, *Sarcom'phalum*, from σαρξ, 'flesh,' and ομφαλος, 'the navel.' A scirrhous or *fleshy* tumour, developed at the navel.

SARCOMYCES, Sarcospongus.

SARCOPHAGUS, Carnivorous, Catheretic.

SARCOPHYIA, Excrescence, Sarcoma.

*SARCOPTE*, Acarus.

SARCOPTES SCABIEI, see Psora.

SARCOPYO'DES, from σαρξ, 'flesh,' πυον, 'pus,' and ειδος, 'resemblance.' Having the appearance of pus mixed with flesh. An epithet given to certain excreted matters, and particularly to the sputa of those labouring under consumption.

SARCO'SIS, from σαρξ, 'flesh.' The formation of flesh. Also, sarcoma.

SARCO'SIS BULBI, *Exophthal'mia fungo'sa* seu *sarcomat'ica*. A fleshy growth from the lobe of the eye.

SARCOSIS UTERI, Metrauxe.

SARCOSPONG'US, *Sarcomy'ces*, from σαρξ, 'flesh,' and σπογγος, 'fungus.' A fleshy fungus.

SARCOSTOSIS, Osteo-sarcoma.

SARCOTIC, Incarnans.

SARCOUS, from σαρξ, 'flesh.' Of, or belonging to, flesh or muscle — as '*sarcous tissue*.'

SARCOUS ELEMENTS, *Prim'itive par'ticles*. The elementary particles, which, by their union, form the mass of muscular fibre. — Bowman.

SARDIASIS, Canine laugh, Risus sardonicus.

SARDONIASIS, Canine laugh, Risus sardonicus.

SARE, Essera.

*SARRASIN*, Polygonum fagopyrum.

*SARRÈTE*, Trismus infantum.

*SARRIETTE*, Satureia hortensis—*s. de Crète*, Satureia capitata.

SARSA, Smilax sarsaparilla.

SARSAPARILLA, Smilax S. — s. False, Aralia nudicanlis.

SARSAPARIL'LA GERMAN'ICA, *Gramen major, G. rubrum, Salsaparil'la Germanica, Carex Arena'ria*, (F.) *Laiche, L. des Sables, Salsepareille d'Allemagne*. *Family*, Cyperoideæ. *Sex. Syst.* Monœcia Triandria. A plant, which grows plentifully on the sea-coasts of Europe. It has been recommended in some mucous affections of the trachea, in rheumatism, gout, &c.

SARSAPARILLA, INDIAN, Hemidesmus Indicus.

SARTAPARILLA, Smilax sarsaparilla.

SARTO'RIUS, from *sartor*, 'a tailor,' because used in crossing the legs. *Suto'rius, Longis'simus Fem'oris, Fascia'lis, F. Longus* seu *suto'rius*, (F.) *Il'io-cresti-tibial, Ilio-prétibial* (Ch.), *Couturier*. A muscle, situate at the anterior part of the thigh. It is long, small, and flattened, and extends, obliquely, from the anterior and superior spine of the ilium to the superior and inner part of the tibia. This muscle can, also, bend the pelvis on the thigh, and conversely.

SARX, Flesh, Pulp.

SARZA, Smilax sarsaparilla.

SASSAFRAS, Laurus sassafras — s. Medulla, see Laurus sassafras—s. Radicis cortex, see Laurus sassafras — s. Swamp, Magnolia glauca.

SAT'ELLITE, *Satelles*. That which guards. That which is placed near.

SATELLITE VEINS are those that accompany arteries.

SATHE, Penis.

SATIES, Satiety.

SATIETAS, Plesmone.

SATI'ETY, *Sati'etas, Satu'ritas, Sa'ties, Satura'tio, Plethos, Plesmonē*, from *satiare* (itself from *satis*, 'enough'), 'to give enough.' Disgust for food; commonly produced by repletion.

SATIN, Lunaria rediviva.

SATURANS, Absorbent (medicine).

SATURATIO, Satiety, Saturation.

SATURA'TION, *Satura'tio*, from *satis*, 'enough.' The state of a compound in which its elements are combined in such proportions that a fresh quantity of either cannot be added without producing excess.

SATUREI'A CAPITA'TA, *Cil'iated Sa'vory, Thymus, Thymus sylves'tris* seu *capita'tus, Thymus Creti'cus, Cuni'la*, (F.) *Sarriette de Crète*. Possesses similar properties to thyme.

SATUREI'A HORTEN'SIS, *Satureia, S. sati'va, Cuni'la sativa Plin'ii, Thymbra, Summer Sa'vory*, (F.) *Sarriette*. *Family*, Labiatæ. *Sex. Syst.* Didynamia Gymnospermia. An aromatic plant, cultivated for culinary purposes. It has been used, as an excitant, in anorexia, anaphrodisia, &c.

SATUREIA ORIGANOIDES, Cunila mariana — s. Sativa, S. hortensis.

SATURITAS, Satiety.

SATURNI DULCEDO, Plumbi superacetas.

SAT'URNINE, *Saturni'nus*, from *saturnus*, 'lead.' Containing or caused by lead.

SAT'URNINE BREATH. The peculiar odour of the breath in one labouring under Saturnismus.

SATURNISM'US, *Intoxica'tio* seu *Cachex'ia saturni'na*, from *saturnus*, 'lead.' Poisoning by lead; lead-poisoning; saturnine cachexy.

SATURNUS, Plumbum.

SATYRI'ASIS, from Σατυρος, 'a Satyr;' because the Satyrs are said to have been greatly addicted to venery. *Satyrias'mus, Satyris'mus, Priapis'mus, Salac''itas, Brachu'na, Aras'con, Satyri'asis furens, Lagne'sis Salac''itas, Lagnesis furor masculi'nus, Lagne'a, Lagni'a, Lagno'sis, Lasciv'ia, Lasciv'itas, Tenti'go vere'tri*. An irresistible desire, in man, to have frequent connexion with females, accompanied by the power of doing so without exhaustion. The causes are commonly obscure. Sometimes, the abuse of aphrodisiacs has occasioned it. The principal symptoms are: — almost constant erection; irresistible and almost insatiable desire for venery; frequent nocturnal pollutions. Cold lotions; the cold bath; a mild diet; active exercise, &c., are the only means that can be adopted for its removal.

SATYRIASIS FURENS, Satyriasis.

SATYRIASMUS, Satyriasis.
SATYRION, Orchis mascula.
SATYRISMUS, Satyriasis.
SATYRIUM, Goodyera pubescens.
SAUCE-ALONE, Alliaria.
SAUCE, GREEN, Rumex scutatus.
SAUER KRAUT (G.), 'sour cabbage,' (F.) *Chou-croûte*. A culinary preparation, made with chopped cabbage, left to attain an incipient state of acetous fermentation. It is reputed by the Germans to be salubrious, easy of digestion, and eminently antiscorbutic.
*SAUGE*, Salvia — *s. des Bois*, Teucrium scordium — *s. Grande*, Salvia sclarea — *s. Hormin*, Salvia horminum — *s. de Jérusalem*, Pulmonaria — *s. Petite*, Salvia — *s. Sclarée*, Salvia sclarea.
*SAULE*, Salix.
*SAUMURE*, Muria.
SAUNDERS, RED, Pterocarpus santalinus — s. Tree, Pterocarpus santalinus — s. Yellow, Santalum album.
SAURA, Lizard.
SAURU'RUS CER'NUUS, *Lizard's Tail*. Indigenous; *Order*, Saurauraceæ; flowering in June. It has been used in lumbago.
SAUSAGE POISON, Allantotoxicum.
*SAUT*, Leap.
*SAUVE-VIE*, Asplenium ruta muraria.
*SAVEUR*, Savour.
SAVINE, Juniperus sabina.
*SAVINIER*, Juniperus sabina.
*SAVON*, Sapo — *s. Ammoniacal*, Linimentum ammoniæ fortius — *s. Cacao*, Sapo coconeus — *s. Calcaire*, Linimentum aquæ calcis — *s. Dur*, Sapo durus — *s. Médicinal*, Sapo medicinalis — *s. Mou*, Sapo mollis — *s. Noir*, Sapo mollis.
*SAVONNIER COMMUN*, Sapindus saponaria.
*SAVONULE*, Saponulus.
*SAVONULUS*, Saponulus.
SAVORY, CILIATED, Satureia capitata — s. Summer, Satureia hortensis.
SA'VOUR, *Sapor*, *Taste*, (F.) *Saveur*. Quality of bodies, by which they act upon the sense of taste. Chymists, at times, avail themselves of this quality to analyze an unknown substance.
*SAVOUREUX*, Savoury.
SA'VOURY, *Sap'idus*, (F.) *Savoureux*. An epithet given to bodies that have taste; and particularly to those that excite a very agreeable impression on the organ of taste.
SAVOYAN, Galium verum.
SAW, *Prion*, *Serra*, (Da.) Sawe, (Sax.) ȝaga, (F.) *Scie*. A surgical instrument, made like a common saw; and used for sawing the bones in amputations, or for removing exostoses, &c. Saws of different sizes and shapes are used in surgery. The crown of the trepan is nothing more than a species of circular saw.
SAW, AMPUTA'TION, *Serra amputato'ria*. The saw used in amputation.
SAW, HEY'S. An instrument used by Mr. Hey, of Leeds, in fractures of the cranium. It consists of a long handle, to which a small saw with a convex or straight edge is attached, and by which a piece of bone of any shape may be removed. With the trephine, the saw must always be circular.
SAW PALMETTO, Chamærops serratula — s. Wort, Liatris.
SAXIFRAGA, Pimpinella saxifraga — s. Anglica, Peucedanum silaus.
SAXIF'RAGA CRASSIFO'LIA. *Family*, Saxifrageæ. *Sex. Syst.* Decandria Digynia. The root of this species of saxifrage has been extolled by Pallas, as pre-eminently antiseptic.
SAXIFRAGA GRANULA'TA, *S. alba*, *Sanic'ula*, *Sedum*, *White sax'ifrage*, (F.) *Saxifrage granulée*. Recommended as diuretic and lithontriptic; but not used.
SAXIFRAGA RUBRA, Spiræa filipendula — s. Vulgaris, Peucedanum silaus.
SAXIFRAGE, BURNET, Pimpinella saxifraga — *s. Granulée*, Saxifraga granulata — s. Meadow, Peucedanum silaus — s. White, Saxifraga granulata.
SAXIFRAGUS, Lithontriptic.
SAXON'ICUS PULVIS. A powder, prepared with the roots of the wild and cultivated angelica; the asclepias vincetoxicum, &c. It was considered formerly as an antidote.
SCAB, from *Sca'bies*, and *scabere*, 'to dig.' An incrustation, which forms upon a sore, owing to the concretion of the fluid discharged from it. An eschar.
SCABBY or SCABBED. Covered or diseased with scabs.
SCABIES, Psora — s. Agria, Lichen — s. Capitis, Porrigo lupinosa, Porrigo scutulata — s. Capitis favosa, Porrigo favosa — s. Fera, Ecthyma.
SCA'BIES FERI'NA, *Itch of animals*, *Mange*. A cutaneous disease, which affects almost all domestic animals, but especially the horse, sheep, dog, and cow. It is said to have been transmitted to man; but this is questionable.
SCABIES FERINA, Psoriasis — s. Papuliformis, Prurigo — s. Sicca, Lichen, Psoriasis — s. Venerea contagiosa, Scherlievo.
*SCABIEUSE ORDINAIRE*, Scabiosa.
SCABIOLA, Scabies.
SCABIO'SA, *S. arven'sis*, *Tri'chera arven'sis*, *Field Sca'bious*, (F.) *Scabieuse ordinaire*. *Family*, Dipsaceæ. *Sex. Syst.* Tetrandria Monogynia. The plant is bitter and sub-astringent, and was formerly used in the cure of leprous affections and diseased lungs.
SCABIOSA ARVENSIS, Scabiosa — s. Carduifolia, Echinops.
SCABIOSA SUCCI'SA, *Succisa*, *S. praten'sis*, *Asteroceph'alus succisa*, *Morsus Diab'oli*, *Devil's bit*, (F.) *Mors du Diable*, has similar properties.
SCABIOUS, Erigeron Philadelphicum — s. Field, Scabiosa — s. Sweet, Erigeron heterophyllum.
SCABISH, Œnothera biennis.
SCABRITIES, Lichen.
SCALA, 'a ladder.' A machine formerly used for reducing dislocations of the humerus.
SCALÆ OF THE COCH'LEA, *Gyri* seu *Ductus spira'les* seu *Cana'les cochleæ*, (F.) *Rampes* ou *Échelles du Limaçon* — are the cavities in the cochlea, separated from each other by the spiral septum. The one — *Scala inter'na* seu *poste'rior* seu *inferior coch'leæ*, *S. tym'pani* — would communicate with the cavitas tympani by the fenestra rotunda, were it not for the membrane that closes it. The other — *Scala exter'na* seu *ante'rior* seu *superior coch'leæ*, *S. vestib'uli* — opens into the cavity of the vestibule. The scalæ communicate with each other by an opening at the top of the partition.
SCALA ANTERIOR COCHLEÆ, see Scala — s. Clausa, see Scala — s. Externa cochleæ, see Scala — s. Inferior cochleæ, see Scala — s. Interior cochleæ, see Scala — s. Posterior cochleæ, see Scala — s. Superior cochleæ, see Scala — s. Tympani, see Cochlea, and Scala — s. Vestibuli, see Cochlea, and Scala.
SCALE, Sax. ȝcale, from ȝcýlan, 'to divide, separate;' (G.) Schale, 'shell, peel;' schälen, 'to shell, to peel.' *Squama*, *Lepis*, (F.) *Escaille*, *Écaille*. An opake and thickened lamina of cuticle; commonly produced by some degree of

inflammation of the true skin, over which it is formed.

Scale, Dry, Psoriasis.

*SCALÈNE ANTÉRIEUR*, Scalenus anticus —*s. Postérieur*, Scalenus posticus.

SCALE'NUS, 'irregular or unequal.' Geometers employ this word to designate a triangle whose three sides are unequal. Anatomists have given the name to two muscles. 1. Scalenus Anti'cus, *Portion of the Costo-trachelian* (Ch.), (F.) *Scalène antérieur*, is situate at the internal and inferior parts of the neck. It is long and triangular; and is inserted, below, at the upper surface of the first rib; and, above, at the anterior tubercle of the transverse processes of the 3d, 4th, 5th, and 6th cervical vertebræ. This muscle bends the neck, and draws it to its side. It can also raise the first rib. 2. Scalenus Posti'cus, (F.) *Scalène postérieur, Portion of the Costo-trachelian* (Ch.), is situate behind the last. It is, also, long and triangular; but more bulky than the *S. anticus*. It is attached, below, to the outer surface of the first two ribs; and terminates, above, at the summit of the transverse processes of the last six vertebræ of the neck. This muscle bends the neck laterally, and can elevate the first two ribs. Some anatomists, as Albinus and Sömmering, have described five scaleni muscles on each side, and have called them *Scalenus prior, S. min'imus, S. latera'lis, S. me'dius, S. posti'cus*. Riolan and Chaussier only describe one scalenus muscle on each side. Cowper and Douglas, and the generality of the English anatomists, admit three, *S. anti'cus, me'dius*, and *posti'cus;* or, *primus, seeun'dus*, and *ter'tius;* Winslow, Boyer, and many of the French anatomists, — two, as above described.

SCALING—same etymon as Scale—in dentistry, is an operation, which consists in removing the tartar from the teeth.

SCALL, Impetigo—s. Asbestos, see Eczema of the hairy scalp — s. Dry, Psoriasis—s. Honeycomb, Porrigo favosa—s. Milky, Porrigo larvalis —s. Running, Impetigo—s. Running, Eczema—s. Washerwoman's, Psoriasis diffusa.

SCALLED HEAD, Porrigo scutulata.

SCALP, Teut. Schelpe, 'a shell.' The integuments covering the head. The *hairy scalp* is called, also, *Capillit''ium, Tricho'ton*, (F.) *Chevelure*.

SCALPEL, *Scalpel'lum, Scalpel'lus, Culter, Inciso'rium, Smi'leon;* from *scalpo*, 'I rasp, I cut.' A cutting instrument, formed of a blade of well-tempered steel, very sharp, of variable shape and size, and fixed solidly in a handle. Its *use* is to divide the soft parts in operations, dissection, &c.

SCALPELLUM, Scalpel—s. Lenticulare, Phacopis.

SCALPELLUS, *Bistouri*, Scalpel.

SCALPEUM, *Bistouri*.

SCALPRUM, Raspatorium — s. Chirurgicum, Lancet.

Scalprum Denta'rium, *Lima denta'ria*. A tooth-file. A file used by the dentist.

Scalprum Rasorium, Raspatorium.

SCALY, Squamous.

Scaly Diseases or Squamæ, *Lepido'ses*, form the second order in Willan and Bateman's system of cutaneous diseases.

SCAMMA, Fossa.

*SCAMMONÉE D'ALEP*, Convolvulus scammonia.

SCAMMONIUM, see Convolvulus scammonia —s. Syriacum, Convolvulus scammonia.

SCAMMONY, Convolvulus scammonia—s. of Montpellier, Cynanchum Monspeliacum.

SCAMNON HIPPOC'RATIS, *Bathron Hippocrati'on* of Galen, (F.) *Banc d'Hippocrate*. A machine invented by Hippocrates for reducing fractures. It was a sort of bed, six feet long, on which the patient was fixed. Straps were attached above and below the fracture or luxation, and extension and counter-extension were effected by a winch. It is described in Galen, Oribasius, Scultetus, &c. See Bathron.

SCANDIX, S. cerefolium.

Scandix Bulbocastanum, Bunium bulbocastanum.

Scandix Cerefo'lium, *Scandix, Scandyx, Pecten Ven'eris, Cerefolium, Daucus Seprin'ius, Chærophyl'lum, Ch. Sati'vum* seu *Cerefo'lium, Anthris'cus cerefolium, Chærefo'lium, Chervil*, (F.) *Cerfeuil. Family*, Umbelliferæ. *Sex. Syst.* Pentandria Digynia. A culinary herb, which is slightly aromatic and grateful. It is said to be gently aperient and diuretic.

Scandix Odora'ta, *Sweet Cic''ely*. Properties the same as the other. Also, Chærophyllum odoratum.

SCANDULARIUS MUSCULUS, Parathenar, Transversus pedis.

SCANDYX, Scandix cerefolium.

SCAPHA, *Scaphus*, 'a skiff or cock-boat,' from *σκαπτω*, 'I make hollow.' The excavation or cavity of the external ear, between the helix and anthelix. The meatus auditorius externus. The rima vulvæ. Also the name of a bandage for the head, mentioned by Galen, and called, likewise, *Tholus Diocle'us*.

SCAPHIA, Nates.

SCAPHION, Cranium, Papaver (Capsule).

SCA'PHIUM OCULA'RE, *Pelvis Ocula'ris, Eye-glass*, (F.) *Bassin oculaire, Gondole oculaire, Œillière*. A small porcelain, glass or metallic vessel, used for applying lotions to the eye.

SCAPHO-CARPO-SUPER-PHALANGEUS POLLICIS, Abductor pollicis brevis.

SCAPHOID, *Scaphoï'des*, from *σκαφη*, 'a skiff,' and *ειδος*, 'form.' A name given to several parts.

Scaphoid Fossa, *Fossa Scaphoï'des*, (F.) *Enfoncement Scaphoïde*. A small cavity at the upper part of the internal ala of the pterygoid process, in which the peristaphylinus internus is attached.

Scaphoid Bone of the Hand, *Os Scaphoïdes Manûs, Os navicula'rē, Os cymbifor'mē, Boat-like bone*, (F.) *Scaphoïde de la main*. The first bone of the first row of the carpus. The upper surface is convex, and articulated with the radius. The under and outer surfaces are also convex,—to be articulated with the trapezium and trapezoides. Between the upper and under cartilaginous surfaces there is a *rough fossa* for the insertion of the capsular ligament. The anterior and inner surface has an *oval cavity*, where it is articulated with the os magnum, which gives name to the bone. There is a *process* on the outer end of the bone, for the attachment of part of the anterior transverse ligament of the wrist.

Scaphoid Bone of the Foot, *Os Scaphoïdes Pedis, Os navicula'rē, Os cymbifor'mē, Boat-like bone*, (F.) *Scaphoïde du Pied*. This bone is situate at the forepart of the astragalus and inner part of the foot. The *posterior surface* forms a cavity, somewhat like that of a boat, for receiving the head of the astragalus. There is a prominence at the inner side of the bone, for the insertion of tendons, muscles, and strong ligaments. The forepart of the bone is convex, and divided into three articular surfaces for articulation with the ossa cuneiformia. Between the os naviculare and astragalus, the foot has its principal lateral and rotary motions; although each of the other

joints of the tarsus contributes a little. Part of the tibialis posticus is inserted into it.

*SCAPHOÏDE DE LA MAIN*, Os scaphoides manûs—*s. du Pied.* Os scaphoides pedis.

SCAPHOÏDO-ASTRAG'ALAN, *Scaphoïdo-astragala'nus.* That which relates to the scaphoid bone and astragalus. The articulation of these bones is so called; and the ligament which strengthens it is termed the *Scaphoïdo-astragalan ligament.*

SCAPHOÏDO-CUBOID, *Scaphoïdo-cuboïdæ'-us.* That which relates to the scaphoid and cuboid bones. The articulation of those bones is so called.

SCAPHULA, Navicularis fossa.

SCAPHUS, Auditory canal, external, Rima vulvæ, Scapha.

SCAP'ULA, *Scap'ulum, Plata, Omopla'ta, Homoplata, Scop'tula, Epino'tion, Latitu'do hu'meri, Omop'latē, Os latum hu'meri, Scutum thora'cis* seu *cordis, Spath'ula, Pteryg'ium, Chelo'nium, Spat'ula;* the *Blade-bone,* the *Shoulder-blade,* (F.) *Omoplate.* An irregular, broad, flat bone, of a triangular shape, situate at the posterior part of the shoulder. It has, 1. A *posterior* or *dorsal surface* or *Dorsum, Testu'do scap'ulæ,* divided transversely into two parts, by a triangular process, called *Spine of the Scapula;* which terminates by a considerable eminence, called *Acromion.* Above the spine, is the *Fossa supra-spinata;* below it, the *F. infra-spinata.* 2. An *anterior* or *costal surface,* or *venter,* forming the *Fossa subscapularis.* 3. A *superior* or *cervical edge,* which is thin, and terminates, anteriorly, by a strong, curved apophysis, called the *coracoïd process.* 4. A *posterior* or *vertebral edge,* called, also, the *base.* 5. An *outer* or *axillary* or *inferior edge,* having a thick, truncated angle, in which is the *glenoid cavity.* With this is articulated the head of the humerus. The glenoid cavity is separated from the body of the bone by a narrower part, called the *cerrix* or *neck.* The edges or margins are, also, called *costæ.* The scapula has three angles—an *inferior, superior,* and *anterior.*

SCAPULA, Humerus.

SCAPULÆ NASI, *Partes latera'les nasi.* The lateral parts of the nose.

SCAPULAL'GIA; from *scapula,* 'the shoulder-blade,' and *αλγος,* 'pain.' Arthralgia of the shoulder-joint.

SCAP'ULAR, *Scap'ulary, Scapula'ris,* from *scapula,* 'the shoulder-blade.' That which relates or belongs to the scapula.

SCAPULAR APONEURO'SIS. A broad, thin aponeurosis, with decussating fibres; which is attached, *above,* to the spine of the scapula; *below,* to a crest between the teres major and infra-spinatus; *within,* to the spinal edge of the scapula; and which, at its middle, unites with the thin aponeurosis that covers a part of the external surface of the deltoid.

SCAPULAR ARTERIES. These are several. *a.* The *Superior scapular, Superficial scapular* of Sömmering, *Dorsa'lis scapulæ superior, Transversa'lis scapulæ, T. Hu'meri.* This arises from the subclavian; and often from the inferior thyroid, or from a trunk common to it and the *posterior scapular* or *transverse scapular* or *cervical.* It passes behind the clavicle, above the superior edge of the scapula, and buries itself between the dorsal surface of that bone and the muscles inserted into it. *b.* The *inferior scapular* or *common scapular* or *internal scapular* or *subscapular artery, A. Thorac''ica axilla'ris* vel *ala'ris,* is of considerable size. It arises from the inferior part of the axillary artery, behind the brachial plexus - -gives off several branches to the armpit, and divides into two branches:—the one, *Scapula'ris interna,* and the smaller of the two, is distributed, almost entirely, to the serratus major anticus, and latissimus dorsi; the other, the larger of the two, the *Dorsa'lis Scap'ulæ inferior* vel *Circumflex'a Scapula'ris,* which distributes its branches to the subscapular and supra-spinal, and infra-spinal regions.

SCAPULAR NOTCH, see Notch, scapular.

SCAPULAR VEINS follow the same course as the arteries, which they accompany.

SCAPULARE, Scapulary.

SCAP'ULARY, *Scapula'rē, Fascia Scapula'ris,* from *scapula.* A broad, linen bandage, divided into two tails for three quarters of its length, the undivided extremity of which is attached to the posterior and middle part of a bandage carried round the body; the tails passing over the shoulders; and being attached to the anterior part of the body bandage, to prevent it from slipping down.

SCAP'ULO-HU'MERAL. An epithet given to the *shoulder-joint.* It is an orbicular articulation, resulting from the reception of the head of the humerus into the glenoid cavity of the scapula. To keep the bones in connexion, there are: 1. A very strong, conoidal capsular ligament; passing from the circumference of the glenoid cavity around the neck of the humerus. 2. A *fibro-cartilaginous ring,* called the glenoid ligament, and a synovial capsule.

*SCAPULO-HUMÉRAL,* Teres major—*s. Huméro-olécranien,* Triceps extensor cubiti—*s. Hyoïdien,* Omohyoideus—*s. Radial,* Biceps flexor cubiti—*s. Trochitérien, grand,* Infra-spinatus.

SCAPUS, Penis, see Hair.

SCAR, Cicatrix.

SCAR, *Seam.* To mark with a cicatrix or seam.

SCARABÆO'LUS HEMISPHÆRICUS, Coccus cacti.

SCAR'BOROUGH, MINERAL WATERS OF. *Scarborough Spa.* A celebrated English chalybeate, at Scarborough, in Yorkshire. One of the springs is a simple, carbonated chalybeate, like that of Tunbridge: the other has an admixture of purging salt. Scarborough, having the additional advantage of sea-bathing, is much frequented by invalids.

SCARDAMYG'MUS, *Scardamyx'is,* (F.) *Clignement,* from *σκαρδαμυσσειν,* 'to wink.' Winking, nictation.

SCARIFICA'TION, *Scarifica'tio* (Galen,) *Amyx'is, Schasis, Catacas'mus, Catachas'mus, Amyg'mus, Schasmus, Encharax'is,* from *σκαριφαομαι,* 'to make a slight scratch.' The act of scarifying. Also, a small incision, *Am'ychē,* made into the skin with a lancet, bistoury, or scarificator, for different therapeutical purposes,—as to draw blood, or to discharge some effused fluid. When the scarifications are very superficial, and do not go farther than the skin, they are termed by the French, *Mouchetures.*

SCARIFICA'TOR, *Scarificato'rium, Schaste'rium.* An instrument for making scarifications. It consists of a small brass box, of a cubical shape, in which 10 or 12 lancet points turn upon a common pivot. By means of a spring, all these blades can be made to issue at once, and make as many scarifications.

SCARIFICATORIUM, Scarificator.

SCARIOLA, Cichorium endivia, Lactuca scariola.

*SCARIOLE,* Cichorium endivia.

SCARLATA, Scarlatina.

SCARLATI'NA, from *scarlatto* (I.), 'a deep red.' *Scarlata, Enanthe'sis Rosa'lia, Rosa'lia, Rossa'lia, R. squamo'sa, Rosa'liæ, Rube'olæ,* of

some, *Morbil'li ig'nei, M. confluen'tes, Morbus scarlatino'sus, Febris scarlatino'sa, Gut'turis morbus epidem'icus Forest'i, Pur'pura, Typhus scarlati'nus, Febris rubra, Scarlet Fever, Rash-fever, Porphyris'mus, Porphyris'ma,* (F.) *Fièvre rouge, F. pourprée.* The characteristic symptoms of scarlatina are:—a scarlet flush, appearing about the second day of fever on the face, neek, and fauces; and progressively spreading over the body; terminating about the 7th day. Two great varieties may be reckoned;—the *S. simplex, S. febris, S. benig'na, S. sine angi'nâ,* in which the fever is moderate and terminates with the efflorescence; prostration of strength being trifiing, and the contagious property slight;—and the *S. Angino'sa, S. Paristhmit'ica, S. Cynanch'ica, S. mit''ior,* in which the fever is severe; the throat ulcerated; the eruption later in its appearance, and less extensive; often changing to a livid hue; the fever being highly contagious. *Scarlati'na malig'na, S. gra'vior,* has been reckoned a variety of this, in its worst degree. It agrees with the Cynanche maligna of Cullen.

Scarlatina belongs to the *Major exanthemata,* and is a disease, chiefly, of children. The eruption differs from that of measles, in being an efflorescence not raised above the cuticle. Measles, too, is attended with catarrhal symptoms, whilst the complication, in scarlatina, is cynanche. The treatment of simple scarlatina need not be much. It must be antiphlogistic. If the throat be very much ulcerated, acid gargles and counter-irritants must be employed; and if the affection become manifestly typhoid, and the sore throat of a malignant character, the case must be treated like typhus gravior; with antiseptic gargles of bark, acid, &c. Anasarca sometimes supervenes on scarlatina, and requires attention Purgatives are here demanded as well as the use of sorbefacients, such as mercury and squill, &c.

Scarlatina Anginosa, see Scarlatina—s. Benigna, see Scarlatina—s. Cynanchica, see Scarlatina—s. Febris, see Scarlatina—s. Gravior, see Scarlatina—s. Miliaris, Rubeola—s. Mitior, see Scarlatina—s. Paristhmitica, see Scarlatina—s. Pustulosa, Rubeola—s. Rheumatica, Dengue—s. sine Anginâ, see Scarlatina—s. Urticata, Urticaria.

SCARLATI'NOUS, *Scarlati'nal, Scarlatino'sus.* Relating or appertaining to scarlatina.

SCARLET BERRY, Solanum dulcamara.

SCARLET FEVER, Scarlatina.

SCATACRASIA, Scoracrasia.

SCATACRATIA, Scoracrasia.

SCELAL'GIA, from *σκελος,* 'the leg,' and *αλγος,* 'pain.' Pain of the leg.

Scelalgia Antica, Neuralgia femoro-pretibialis—s. Postica, Neuralgia femoro-poplitea—s. Puerperarum, Phlegmatia dolens.

SCELETEU'SIS. Mummification. Also, the mode of making a skeleton, *Skeletopœ'a, Syntax'is.*

SCELETOLOGIA, Skeletology.

SCELETON, Skeleton.

SCELETOPŒA, Scelcteusis.

SCELETUM, Skeleton—s. Artificiale, see Skeleton—s. Naturale, see Skeleton.

SCELONCUS, Phlegmatia dolens.

SCELORRHEU'MA, *Rheumatis'mus cruris,* from *σκελος,* 'the leg,' and *ρευμα,* 'defluxion, rheumatism.' Rheumatism of the leg.

SCELOS, Leg.

SCELOTYRBE, Chorea, Porphyra nautica—s. Febrilis, see Subsultus tendinum—s. Festinans, Paralysis agitans—s. Tarantismus, Chorea.

SCEPARNON, Amnios, Ascia.

SCEPASTERIUM, *Couvrechef.*

SCEPASTRUM, *Couvrechef.*

SCEPTRUM, Penis.

SCHASIS, Scarification.

SCHASMUS, Scarification.

SCHASTERION, Fleam, Lancet, Scarificator.

SCHEBA ARABUM, Artemisia santonica.

SCHERBET', *Sherbet', Serbet', Tscherbet', Sorbe'thum, Sorbet'tum, Sorbe'tum.* A drink prepared by the Turks, Persians, &c., with sugar and the juice of acid fruits.

SCHERLIEVO, *Mal di Scherlievo, Mal di Breno, Mal di Fiume, Margaretizza, Morbus Croatus, Frambœ'sia Illyr'ica, M. fluminien'sis, Falcadina, Malo di Scarlievo, Scabies venerea contagio'sa.* A name given to a particular form of syphilis, observed in Illyria. It is said to be capable of being communicated without immediate contact; and, that its principal symptoms are:—pains in the bones, ulceration of the fauces, pustules, and fungous growths in different parts of the body.

SCHERO'MA. A dryness of the eye from the want of lachrymal secretion.—Dictionaries.

SCHIAS, Neuralgia femoro-poplitæa.

SCHIDAKE'DON, *Schidace'dum, Schindace'dum, Schindal'amus, Schindal'mus,* from *σκιζω,* 'I cleave.' A longitudinal fracture of a bone.—Galen.

SCHINDACEDUM, Schidakedon.

SCHINDALAMUS, Schidakedon, Schindylesis.

SCHINDALESIS, Schindylesis.

SCHINDALMUS, Schidakedon, Schindylesis.

SCHINDYLE'SIS, *Schindale'sis, Schindal'amus, Schindal'mus.* An articulation of bones—by furrowing, as it were; as in that of the vomer, which constitutes, in part, the septum narium. Also, the act of splitting into small pieces; from *σχινδυλεω,* 'I split into small pieces.—Hippocrates.

SCHINELÆ'ON, from *σχινος,* 'the mastic tree,' and *ελαιον,* 'oil;' *Oleum lentis'cinum.* Oil of mastic.—Dioscorides.

SCHINOCEPHALUS, Scillocephalus.

SCHINOS, Scilla.

SCHINZNACH or HAPSBURG, MINERAL WATERS OF. These springs are situate three leagues from Baden, and are amongst the most celebrated bathing-places in Switzerland. The waters are of the saline sulphurous kind; and have a high reputation in cutaneous and rheumatic affections, visceral obstructions, and glandular enlargements. They contain sulphate of lime, sulphate of soda, chloride of sodium, chloride of magnesium, sulphate of magnesia, sulphate of lime, carbonate of magnesia, and oxide of iron; sulphohydric acid, and carbonic acid gases.

SCHISMA, Fissure, Rima.

SCHISTOCEPH'ALUS, from *σχιστος,* 'cleft, separated,' and *κεφαλη,* 'head.' A monster having some part of the head cleft or fissured.—Gurlt.

SCHISTOCOR'MUS, from *σχιστος,* 'cleft, separated,' and *κορμος,* 'trunk.' A monster having some part of the trunk cleft or fissured.—Gurlt.

SCHISTOM'ELUS, from *σχιστος,* 'cleft, separated, and *μελος,* 'a limb.' A monster whose limbs are fissured.

SCHISTORRHACHIS, Hydrorachis.

SCHISTOSO'MUS, from *σχιστος,* 'cleft,' and *σωμα,* 'body.' A malformation of the abdomen, in which the fissure and eventration extend over the entire length of the abdomen; the lower extremities being absent, or very little developed, so that the body appears as if truncated inferiorly.—Vogel.

SCHIZA, Rima, Rima vulvæ.

SCHIZATRICH'IA. *Trichos'chisis, Schizo-*

*trich'ia*, from σχιζα, 'a cleft,' 'a split,' and θριξ, 'a hair.' The splitting of the hairs at their extremities. — J. P. Frank.

SCHLANGENBAD, MINERAL WATERS OF. Schlangenbad is a much-frequented watering-place in Germany. The waters contain a little carbonic acid, and carbonate of soda. Temperature 86° Fahrenheit.

SCHNEIDERIAN MEMBRANE, Pituitary membrane.

SCHŒNANTHUS, Juncus odoratus.

SCHOLA, School.

SCHOLLERA OXYCOCCOS, Vaccinium oxycoccos.

SCHOOL, *Schola*. A place of education. (F.) *École*. In Europe the large Medical Schools are usually attached to the universities. In England, however, there has been no medical school of celebrity at either of the universities of Oxford or Cambridge; owing greatly to their provincial situation. Of late, two schools have existed in London, attached to the London University — University College and King's College. Excellent private schools have, however, long existed in that metropolis. The medical schools of Europe which have been most celebrated, are those of Edinburgh, Leyden, Berlin, Halle, Tubingen, Paris, Montpellier, Bologna, Padua, Pavia, and Pisa. In the United States, the medical schools are numerous; at this time not fewer than 30 or 40. Those most numerously attended, are the medical department of the University of Pennsylvania, Jefferson Medical College of Philadelphia, the University of the City of New York, and the Louisville Medical Institute.

SCHOOLEY'S MOUNTAIN, MINERAL WATERS OF. The waters of this New Jersey Spring are chalybeate. According to Dr. McNevin, they contain extractive, chloride of sodium, chloride of calcium, chloride of magnesium, carbonate of lime, sulphate of lime, carbonate of magnesia, silex, and carbonate, and oxide of iron.

SCHORBUTUS, Purpura.

SCHOUSBÆA COCCINEA, Cacoucia coccinea.

SCHWALBACH, MINERAL WATERS OF. Schwalbach is a town of Germany, seated on the Aa, 32 miles west of Frankfort. The waters contain chloride of sodium, carbonates of lime and magnesia, iron, sulphate of lime, carbonic acid, oxygen, &c. Employed as a tonic.

SCHWANN, WHITE SUBSTANCE OF, see Substance, white, of Schwann.

SCHWENDECK, MINERAL WATERS OF. These waters are about 5 leagues from Münich, in Bavaria. They contain carbonic acid; carbonate and sulphate of lime, chloride of calcium; chloride of magnesium; carbonate of soda, and oxide of iron, and are much used for cutaneous affections.

SCIAT'IC, *Ischiat'ic, Ischiat'icus, Sciat'icus*, from ισχιον, 'the haunch.' A word formed by contraction from *ischiatic*, which latter is still used. See Ischiatic.

SCIATIC NERVE, GREAT, *Nervus ischiad'icus, Great fem'oro-poplite'al*, (Ch.) (F.) *Grand nerf sciatique*, ought to be esteemed a continuation of the sacral plexus. It issues from the pelvis between the pyramidalis and superior gemellus; descends along the posterior part of the thigh; and after having given branches to the gemini, quadratus, obturator externus, glutæus maximus, semi-membranosus, semi-tendinosus, biceps and third abductor muscles, it divides, about the inferior third of the thigh, into two branches; the one, named the *external popliteal*; the other, the *internal*.

SCIATIC NERVE, LESSER, *Inferior glu'teal branch of the sacral plexus, Lesser fem'oro-poplite'al nerve*, (Ch.) (F.) *Nerf petit sciatique*, which seems especially formed by the 2d and 3d sacral, is given off from the lower part of the plexus, and escapes from the pelvis beneath the pyramidalis muscle. It gives branches — *nervi cuta'nei clu'nium inferio'res* — to the glutæus maximus; a *sciatic branch* or *infra-pelvic cutaneous* or *perineal cutaneous, Pudenda'lis longus infe'rior*, which passes under the tuberosity of the ischium, and furnishes filaments to the glutæus maximus, and to the muscles of the perinæum, urethra, penis, scrotum, &c.; and *a posterior femoral cutaneous branch* — *middle posterior cutaneous nerve* — the filaments of which traverse the femoral aponeurosis, to be distributed on the skin of the posterior part of the thigh. The principal branch of the lesser sciatic nerve divides, near the ham, into two or three filaments, which descend under the integuments almost as far as the inferior part of the leg.

SCIATIC NOTCH, GREAT, *Sciatic Fora'men, Incisu'ra ischiad'ica major*, (F.) *Grande échancrure sciatique* ou *grand trou sciatique*, is a large notch at the posterior edge of each os innominatum, below the posterior and inferior iliac spine, which is converted into a foramen by the sacrum and sacro-sciatic ligaments. The *lesser sciatic notch, Incisu'ra ischiad'ica minor, Luna Albi'ni*, (F.) *Petite échancrure ischiatique*, is much smaller than the last, from which it is separated by the sciatic spine. It gives passage to the tendon of the obturator internus, and to the internal pudic vessels and nerves.

SCIATIC REGION, Ischiadic region.

SCIATIC SPINE, *Spine of the Ischium, Spinous Proc''ess of the Ischium*, is a short, flat, pyramidal eminence on the os innominatum, above the preceding foramen; which gives insertion to the lesser sacro-sciatic ligament.

SCIATICA, Neuralgia femoro-poplitæa.

*SCIATIQUE*, Neuralgia femoro-poplitæa.

*SCIE*, Saw.

SCIENTIA HERMETICA, Alchymy — s. Medendi, Medicina — s. Medica, Medicina.

SCIERO'PIA, from σκιερος, 'shady,' and ωψ, 'the eye.' A defect of vision, in which all objects have a darker hue than natural.

SCILLA, *Scilla marit'ima, Scylla, Aschil, Schinos, Oc'ulus Typho'nis, Ornithog'alum marit'imum* seu *squil'la, Stella'ris scilla, Squilla, Squill* or *sea onion, Eye of Typhon*, (F.) *Ognon marin. Family*, Liliaceæ. *Sex. Syst.* Hexandria Monogynia. Native of Spain, Austria, &c. The bulb or root of the squill has a bitter, nauseous taste, and is extremely acrid; inflaming the skin when rubbed on it. Its acrimony, on which its virtues depend, is destroyed by heat, drying, and keeping. It is extracted by vinegar, spirit, and water. In large doses, squill is emetic and purgative; in small doses, diuretic and expectorant. Its active principle has been called *scillitine*. Dose, gr. j to v of the dried root, united or not with mercury.

SCILLA ESCULEN'TA, *Phalan'gium esculen'tum, Eastern Quamash, Wild Hy'acinth*; indigenous; flowering in May. An article of diet amongst the Western Indians. It is made into bread and poultices for inflamed breasts.

SCILLOCEPH'ALUS, *Schinoceph'alus*, from σκιλλα, 'a bulbous-rooted plant, the squill,' and κεφαλη, 'head.' One who has a large bulbiform head.

SCINCUS, σκιγκος or σκιγγος. A species of *Saurus* or *Lacer'ta*, common in Egypt, and much extolled by the ancients, as alexipharmic and aphrodisiac.

SCINTIL'LA VEN'ERIS, 'a relic of Venus.' A name given, by Paracelsus, to the impotence and loss of power in the limbs, produced by syphilis.

SCIOM'ACHY, *Skioma'chia, Skiamachia;* from σκια, 'a shade,' and μαχη, 'a fight.' An exercise with the ancients, which consisted in a mock encounter at boxing and jumping with one's own shadow.

*SCIRRHE,* Scirrhus.

SCIRRHOBLEPHARONCUS, see Scleriasis.

SCIRRHOCELE, Orcheocele scirrhosa.

SCIRRHOGAS'TRIA, (F.) *Squirrogastrie; Scirrhus ventric'uli;* from σκιρρος, 'hard,' and γαστηρ, 'stomach.' Scirrhus of the stomach.

SCIR'RHOID, *Scirrhoï'des, Scirrho'des,* from σκιρρος, 'scirrhus,' and ειδος, 'resemblance. Resembling scirrhus.

SCIRRHOMA, Scirrhus.

SCIRRHOPHTHAL'MIA, *Scirrhophthal'mus,* from σκιρρος, 'scirrhus,' and οφθαλμος, 'the eye,' *Cancer oc'uli.* Cancer of the eye.

SCIRRHOPHTHALMIA PALPEBRARUM, see Scleriasis.

SCIRRHOSARCA NEONATORUM, Induration of the cellular tissue.

SCIRRHOSIS, Scirrhus.

SCIRRHOUS, *Scirrho'sus;* same etymon as scirrhus. Of or belonging to scirrhus.

SCIRRHOUS SARCO'MA OF AB'ERNETHY, *Emphy'ma sarco'ma scirrho'sum.* Hard, rigid, vascular infarction of glandular follicles; indolent, insentient, glabrous; sometimes shrinking and becoming more indurated. Found in glandulous structures.

SCIRRHUS, *Squirrhus, Scirrho'ma, Scirrho'sis, Cancer scirrho'sus, Carcino'ma simplex, C. fibro'sum, Indura'tio malig'na, Schirrus, Sclerus, Carcinom'atous sarco'ma, Hard cancer, Fibrous cancer;* from σκιρρος, 'hard,' 'indurated;' (F.) *Squirre, Schirre, Skirre.* A disease, so called from the hardness that characterizes it. It is a state of induration, of a peculiar kind, affecting glandular structures generally, but capable of occurring in other textures. It usually precedes carcinoma, of which it may, indeed, be considered as the first stage. Scirrhus must not be confounded with the induration which succeeds inflammation, although the two states are often complicated, and may stand, occasionally, in the relation of cause and effect to each other. Scirrhus is ordinarily accompanied by violent shooting pains. It is also irregular on its surface; and when cut into has a bluish or grayish white colour. When the surgeon is satisfied of the existence of scirrhus, he had better remove it at once. No other treatment seems to possess much advantage.

Galen uses the term *Scirrho'sis* for a livid excrescence caused by inflammation.

SCIRRHUS ET CARCINOMA VENTRICULI, see Gastrostenosis cardiaea et pylorica—s. Hepatis, Hepatoscirrhus—s. Intestinorum, Enteropathia cancerosa—s. Palpebrarum, see Scleriasis—s. Testiculi, Sarcocele—s. Uteri, Metroscirrhus—s. Ventriculi, Gastroscirrhus.

*SCISSIPARITÉ,* see Generation.

SCISSORS, *Forfex, Forpex, Psalis, Tomis,* (F.) *Ciseaux.* A well-known instrument in common use, and often employed in surgery. Scissors are composed of two cutting blades, crossing each other and moving upon an axis. They are *straight* or *curved.* Sometimes the curve is on the flat side, when they are called, in France, *Ciseaux à cuiller;* at others, on their edges. The scissors, bent so that the blades make an obtuse angle with the handles, are also much used. They are called in France *Ciseaux coudés.* Scissors are used for dividing soft, loose, isolated parts, which it would be difficult to reach and to cut with the bistoury. They are employed, likewise, in the operation for harelip, and for removing warts, fungous excrescences, &c.

SCISSURA, Fissure—s. Vulvæ, see Rima.

SCISSURÆ, Rhagades.

*SCISSURE DE GLASER,* Fissure, glenoid—*s. Grand médiane du Cervelet,* Valley—*s. de Santorini,* Santorini, fissure of.

SCLAREA, Salvia sclarea.

SCLEREMA, Induration of the cellular tissue.

*SCLÉREME,* Induration of the cellular tissue.

SCLEREMIA, Induration of the cellular tissue.

SCLEREMUS, Induration of the cellular tissue.

SCLERENCEPHA'LIA, *Indura'tio cer'ebri,* from σκληρος, 'hard,' and εγκεφαλον, 'the brain.' (F.) *Endurcissement du cerveau.* Induration of the brain.

SCLERIA, Scleriasis.

SCLERI'ASIS, *Sclero'ma, Sclero'sis, Scle'ria, Sclerys'mus, Sceph'irus,* from σκληρος, 'hard.' Any kind of hardness or induration. Sometimes hardness of the eyelids, *Callo'sitas palpebra'rum, Scirrhoblepharon'cus, Scirrhophthal'mia palpebra'rum, Scirrhus palpebra'rum;* at others, hardness of the genital organs of the female; probably synonymous with scirrhus.—Galen. Paulus. Hardness of bones, *Fragil'itas Os'sium.*

SCLERITIS, Sclerotitis.

SCLERODERMA, Induration of the cellular tissue.

SCLERODES, Sclerotic.

SCLEROMA, Induration of the cellular tissue, Scleriasis.

SCLEROMENINX, Dura mater.

SCLERONYXIS, Scleroticonyxis.

SCLEROPHTHALMIA, Hordeolum.

SCLEROS, Hard.

SCLEROSARCO'MA, from σκληρος, 'hard,' and σαρκωμα, 'a fleshy tumour.' A hard, fleshy tumour, seated on the gums, and resembling a cock's comb.

SCLEROSIS, Induration of the cellular tissue, Scleriasis.

SCLEROSTENOSIS CUTANEA, Induration of the cellular tissue.

SCLEROTIC, *Sclerot'ica,* from σκληροω, 'I harden.' *Cornea opa'ca, Sclero'des, Tunica dura* seu *albugin'ea* seu *du'rior et crass'ior* seu *ex'tima* seu *alba* seu *can'dida* seu *innomina'ta oc'uli, Sclero'tis,* (F.) *Sclérotique.* A hard, resisting, opake membrane, of a pearly white colour and fibrous nature, which covers nearly the posterior four-fifths of the globe of the eye, and has the form of a sphere truncated before. It is strengthened by the expansion of the muscles of the eye, to which expansion many anatomists have given the name *Tu'nica albugin'ea.* It forms the *white of the eye, Albu'men, Album oc'uli, Lon'chades, Log'ades, Loch'ades, Leu'cades.* The sclerotic is penetrated posteriorly by a round opening, for the passage of the optic nerve; and, anteriorly, it has a much larger opening, into which the transparent cornea is received. There are, besides, many small oblong apertures in it for the passage of nerves and vessels, proceeding to the interior of the eye. In the fœtus, the sclerotic may be separated into two very distinct laminæ.

SCLEROTICA CERATOIDES, Cornea.

SCLEROTICITIS, Sclerotitis.

SCLEROTICONYX'IS, *Scleronyx'is, Sclerotonyx'is,* from σκληρος, 'hard,' and νυξις, 'puncture

ing.' Perforation of the sclerotica in the operation for cataract by depression.

SCLEROTICUS, Indurans.

*SCLÉROTIQUE*, Sclerotic.

SCLEROTIS, Sclerotic.

SCLEROTI'TIS, *Inflamma'tio Sclerot'icæ, Leuci'tis, Lonchadi'tis, Logadi'tis, Scleri'tis, Scleroci'tis, Rheumat'ic ophthal'mia, Ophthal'mia arthrit'ica*, from sclerotica, and *itis*, denoting inflammation. Inflammation of the sclerotic coat of the eye.

SCLEROTIUM CLAVUS, see Ergot.

SCLERUNTICUS, Indurans.

SCLERUS, Induration, Scirrhus.

SCLERYNTICUS, Indurans.

SCLERYS'MA, from σκληρος, 'hard.' Induration; also, induration of the liver.

SCLERYSMUS, Scleriasis.

SCLIRUS, Scirrhus.

SCLOPETA'RIUS, from *sclopetum*, 'a gun.' Relating to a gun. Hence, *Aqua sclopeta'ria*, a water for gunshot wounds. *Vul'nera sclopeta'ria*, gunshot wounds, &c.

SCLOPETOPLAGÆ, Wounds, gunshot.

SCOBS, *Prisma, Xysma, Ramen'tum, Rasu'ra*. A shaving, also, an alkali; and the scoria of any metal.

SCŒNANTHUM, Juncus odoratus.

SCOLECESIS, Helminthiasis.

SCOLECIASIS, Helminthiasis.

SCOLEX, Ascaris lumbricoides.

SCOLIOMA, Scoliosis.

SCOLIO'SIS, *Scolio'ma, Rhachio-scolio'ma*, from σκολιος, 'crooked.' A distortion of the spine to one side. See Hump.

SCOLOPENDRA, Asplenium scolopendrium.

SCOLOPENDRIA, Asplenium ceterach, and A. scolopendrium.

SCOLOPENDRIUM LINGUA, Asplenium scolopendrium — s. Officinarum, Asplenium scolopendrium — s. Phyllitis, Asplenium scolopendrium—s. Ruta muraria, Asplenium ruta muraria —s. Vulgare, Asplenium scolopendrium.

SCOLOPOMACHÆ'RION, from σκολοπαξ, 'the woodcock,' and μαχαιρα, 'a knife;' so called because it is bent a little at the extremity like a woodcock's bill. A sort of blunt-pointed bistoury. —Scultetus.

SCOLYMUS SATIVUS, Cynara scolymus.

SCOOP, Teut. Schoepe, *Cochlea're*, (F.) *Curette*. A surgical instrument of the shape of a spoon, which is used for the extraction of certain foreign bodies. The scoop is often employed to extract balls impacted in the soft parts; to remove calculi from the urinary bladder in lithotomy, &c. A small scoop is sometimes used to extract foreign bodies from the meatus auditorius externus, nasal fossæ, &c.

SCOPA REGIA, Ruscus.

SCOPARIUS, see Spartium scoparium.

SCOPE, σκοπη, *Scop'ia, Scopos*, from σκοπιω, 'I look around.' A common suffix to words meaning 'view, inspection,' as cranio*scopy*, stetho*scopy*, &c.

SCOPOLINA ATROPOIDES, Hyoscyamus scopolia.

SCOPTULA, Scopula.

SCOPULA, Brush.

SCOR, Excrement.

SCORACRATI'A, *Scoracra'sia, Scataera'sia, Scataerati'a, Copracrati'a, Copracra'sia, Incontinen'tia Alvi*, from σκωρ, 'excrement,' and ακρασια, 'want of control.' Want of power to retain the fæces. Involuntary evacuation of the fæces.

*SCORBUT*, Porphyra nautica, Purpura hæmorrhagica—*s. des Alpes*, Pellagra—*s. de Terre*, Purpura hæmorrhagica.

SCORBU'TIC, *Scorbu'ticus*. That which belongs to scurvy. One affected with scurvy.

SCORBUTUS, Purpura—s. Alpinus, Pellagra —s. Nauticus, Porphyra nautica—s. Oris, Cancer aquaticus.

SCORDINEMA, Carebaria, Pandiculation.

SCORDINISMUS, Carebaria, Pandiculation.

SCORDIUM, Teucrium scordium.

SCORDON, Allium.

SCORITH, Sulphur.

SCORODON, Allium.

SCORPIODEX'IS, from σκορπιος, 'the scorpion,' and δηξις, 'bite:'—more properly, SCORPIOSTIG'MA; from σκορπιων, and στιγμα, 'puncture.' The sting of the scorpion.

SCOR'PION, *Scor'pio, Scorpius*, from σκορπιοω, 'I puncture.' A genus of insects having a sting at the extremity of their tail, with which they make dangerous wounds. An *Oil of Scorpion* was once made from them, which is not now used.

SCORPIOSTIGMA, Scorpiodexis.

SCORPIUS, Scorpion.

SCORTUM, Scrotum.

SCORZONE'RA, *S. hu'milis* seu *lana'ta* seu *nervo'sa, Escorzone'ra, Vipera'ria, Serpenta'ria Hispan'ica, Offic''inal viper's grass, Viper's grass, Goat's grass. Family*, Cichoraceæ. *Sex. Syst.* Syngenesia Polygamia. The roots have been used as alexipharmics, and in hypochondriacal disorders and obstructions of the viscera. The root of the *Scorzonera Hispan'ica* is esculent, but inefficacious as a drug.

SCOTAS'MA, *Scoto'ma, Scoto'dia, Scoto'sis, Scotos;* from σκοτος, 'darkness.' Obscurity of vision, darkness, *Suffu'sio ra'dians*. Also Scotodinia.

SCOTCH FIDDLE, Psora.

SCOTODIA, Scotasma, Scotodinia.

SCOTODIN'IA, *Scoto'ma, Dinus Scoto'ma, Scotodi'nē, Tenebrico'sa verti'go, Scotos, Scotas'ma, Scoto'sis, Scot'omy*, from σκοτος, 'darkness,' and δινεω, 'I turn round.' Giddiness, with impaired sight, often succeeded by headach. See Vertigo.

SCOTOMA, Scotasma, Scotodinia.

SCOTOMY, Scotodinia.

SCOTOS, Scotasma, Scotodinia.

SCOTOSIS, Scotodinia.

SCOTT'S ACID BATH, *Nitro-muriatic acid bath*. A bath of dilute aqua regia, employed by Dr. Scott, of India, as a remedy in hepatic diseases. Three pints by measure of muriatic acid, and two of nitric acid, are mixed to form the aqua regia. In preparing this for use, a pint of it is mixed with an equal quantity of water. The acid bath consists of three ounces of this dilute acid to every gallon of water.

SCRATCH, Psora.

SCREATUS, Excreation.

SCRIPTULUM, Scruple.

SCRIPULUM, Scruple.

SCRIPULUS, Scruple.

SCRIVENER'S CRAMP, Cramp, writers'.

SCROBIC'ULUS, *Scrobic'ulum*, (F.) *Fossette*. A little ditch or furrow; diminutive of *scrobs*, 'a ditch.'

SCROBIC'ULUS CORDIS, *Anticar'dium, Procar'dium*, (F.) *Fossette du cœur, Avant-cœur, Anticœur*. The pit of the stomach. The depression at the anterior part of the abdomen, below the xiphoid cartilage.

SCROBICULUS VARIOLÆ, Pockmark.

SCROFFÆ, Scrofula.

SCROF'ULA, *Scroph'ula, Scroph'ulæ;* from *scrofa*, 'a sow;' because swine were presumed to be subject to a similar complaint. *Scrophulo'sis, Morbus scrophulo'sus, Vit''ium scrophulo'sum, Cacochym'ia* seu *Cachex'ia* seu *Dyscra'sia scrophulo'sa, Pædatroph'ia glandulo'sa, Struma,*

*Chœrus, Coiras, Tabes Glandula'ris, Adeno'sis scrofulo'sa, Scroffæ, Chrœas, King's evil, The Evil, Cruels* (*Scottice*), (F.) *Scrophules, Scrofules, Strumes, Écrouelles, Humeurs froides, Tubercules des glandes lymphatiques, Mal du Roi.* A state of the system characterized by indolent, glandular tumours, chiefly in the neck; suppurating slowly and imperfectly, and healing with difficulty; the disease ordinarily occurring in those of a sanguine temperament, with thick upper lip, &c. The tumours, after suppuration, degenerate into ulcers; which, in process of time, cicatrize, leaving scars. The internal organs are apt to be attacked in those disposed to scrofula; hence they are often the subjects of phthisis and mesenteric affections. Scrofula is hereditary; and is frequently excited by insufficient or improper regimen, and by a close, confined air during the first years of existence. The best treatment is:—to strengthen the system by animal diet; pure air, and exercise, cold bathing, or sea-water bathing, &c.

Scrofula Abdominalis Interna, Physconia strumosa.

*SCROFULAIRE,* Scrophularia nodosa — *s. Aquatique,* Scrophularia aquatica.

SCROFULARIA, Scrophularia.

*SCROFULEUX,* Scrofulous.

SCROF'ULOUS, *Scrophulo'sus, Scrophula'rius, Strumous, Strumo'sus,* (F.) *Scrofuleux, Strumeux.* Suffering from, or relating to, scrofula.

SCROPHULA, Scrofula—s. Mesenterica, Tabes mesenterica—s. Moluccana, Framboesia.

SCROPHULÆ, Scrofula—s. Gonorrhoicæ, Gonorrhœa impura.

SCROPHULARIA, S. Nodosa.

Scrophula'ria Aquat'ica, *Beton'ica aquat'ica, Fica'ria, Ferra'ria, Castran'gula, Greater Water Figwort, Water Bet'ony,* (F.) *Scrofulaire aquatique.* The leaves are celebrated as correctors of the bad flavour of senna. They were at one time regarded as eminently antiscrofulous, stomachic, and carminative.

Scrophularia Fœtida, Scrophularia nodosa — s. Lanceolata, S. Nodosa — s. Marilandica, S. Nodosa — s. Minor, Ranunculus ficaria.

Scrophula'ria Nodosa, *Figwort, Kennelwort, Holmesweed, Heal-all, Scrophula'ria fœ'tida* seu *vulga'ris* seu *lanceola'ta,* seu *Marilan'dica, Millemor'bia, Scrophula'ria,* (F.) *Scrofulaire, Herbe aux écrouelles.* The root and leaves of this plant have been celebrated, both as an internal and external remedy, against inflammations, piles, scrofulous tumours, ulcers, &c.

Scrophularia Vulgaris, Scrophularia nodosa.

SCROPHULARIUS, Scrofulous.

*SCROPHULES,* Scrofula — *s. Mésentériques,* Tabes mesenterica.

SCROPHULOSIS, Scrofula.

SCROPHULOSUS, Scrofulous.

SCROTAL, *Scrota'lis;* from *scrotum.* Relating to the scrotum, — as *Hernia scrota'lis,* scrotal hernia.

Scrotal Nerve, see Genito-crural Nerve.

SCROTOCE'LĒ. A hybrid term; from (L.) *scrotum,* and κηλη, 'a tumour.' *Hernia Scrota'lis, Scrotal her'nia.* Inguinal hernia, descending into the scrotum; Oscheocele.

SCROTUM, from *scorteus, scorteum,* 'made of leather.' (?) *Oschē, Os'cheus, Os'chus, Os'cheon, Och'eus, Perin, Scortum, Marsu'pium, Bur'sula, Bursa tes'tium* seu *viri'lis, Cap'ulus,* (?) *Orchas, Os'cus, Follic'ulus genita'lis, Her'nia, the Purse, the Cod,* (F.) *Les bourses.* The integuments which cover the testes. These are nothing more than a prolongation of the skin of the inner part of the thighs, perinæum, and penis. The skin is remarkable for its brown colour, for the numerous rugæ, especially when the scrotum is contracted; for the great number of sebaceous follicles it contains; and for the long and few hairs which issue from it in the adult. The scrotum is divided into two equal parts by a raphe, which extends from the anus to the root of the penis. Its organization is similar to that of the skin of other parts of the body, except that the chorion is thinner.

Scrotum Cordis, Pericardium — s. Pendulum, Rhachosis.

SCRUPLE, *Diob'olon, Gramma'rium, Scru'pulus, Scru'pulum, Scrip'tulus, Scrip'ulum, Scrip'ulus.* A weight of twenty grains, Troy; twenty-four grains, Poids de marc.

SCUDAMORE'S MIXTURE, see Mixture Scudamore's.

SCULL, Cranium — s. Cap, Calvaria.

SCURF, Sax. ꝑcurꝼ, Teut. Schorft; *Fur'fura.* Small exfoliations of the cuticle are so called.

SCURFY, Furfuraceous.

SCURVY OF THE ALPS, Pellagra—s. Grass, Sisyrinchium Bermudianum — s. Land, Purpura hæmorrhagica — s. Petechial, Purpura simplex—s. Sea, Porphyra nautica — s. Grass, common, Cochlearia officinalis — s. Grass, lemon, Cochlearia officinalis — s. Grass, wild, Cochlearia coronopus.

SCUTELLA, Cup.

SCUTELLA'RIA GALERICULA'TA, *Cassida galaricula'ta, Tertiana'ria, Skull-cap,* (F.) *Casside bleue. Family,* Personeæ. *Sex. Syst.* Didynamia Angiospermia. This plant has a bitter taste and a garlic smell. It has been esteemed especially serviceable in tertian ague.

Scutella'ria Lateriflo'ra, *Skull-cap, Madweed, Hoodwort, Blue Pimp'ernel.* An indigenous plant, which grows in all parts of the United States in moist places. It was at one time esteemed a preventive of hydrophobia, but is probably possessed of little virtue of any kind.

Scutellaria Integrifo'lia, — another indigenous variety, — is an intense bitter.

SCUTICULA DIGITORUM MANÛS, Phalanges of the fingers.

SCUTULÆ DIGITORUM MANÛS, Phalanges of the fingers.

SCUTUM, Thyroid cartilage — s. Cordis, Scapula, Sternum — s. Genu, Patella — s. Pectoris, Thorax.

Scutum Stomach'icum. A large plaster, applied to the breast or stomach.

Scutum Thoracis, Scapula.

SCYB'ALA, plural of σκυβαλον, 'dung.' *Enterol'ithus Scyb'alum, Excrementa Alvi siccio'ra, Fæces indura'tæ.* Hard fecal matters discharged in round lumps.

SCYLLA, Scilla.

SCYPHOPHORUS PYXIDATUS, Lichen pyxidatus.

SCYPHUS AUDITORIUS, Infundibulum of the cochlea — s. Cerebri, Infundibulum of the brain—s. Vieussenii, Infundibulum of the cochlea.

SCYROS, Callosity.

SCYTALIDES DIGITORUM MANÛS, Phalanges of the fingers.

SCYTHICA, (RADIX,) Glycyrrhiza.

SCYTHROPASMUS, from σκυθρος, 'gloomy;' σκυθρωπαζειν, 'to look gloomy;' *Vultus tet'ricus et mœstus.* A gloomy, depressed countenance, of bad augury in serious diseases.

SCYTITIS, Cytitis.

SCYTODEPSIUM, Tannin.

SEA AIR. The air in the neighbourhood of the sea contains saline particles commingled with it, which render it a valuable change for scrofulous and debilitated individuals. The sea and

sea-coast are usually, also, more equable in their temperature than places inland.

SEA SICKNESS, Nausea marina — s. Water, see Water, Sea.

SEAL, GOLDEN, Hydrastis Canadensis — s. Solomon's, Convallaria polygonatum.

SEAM, Cicatrix.

SEARCHING, *Sounding;* from (F.) *chercher,* 'to seek.' The operation of ascertaining, by the introduction of a metallic instrument, whether a patient has a stone in the bladder.

SEASONING, Acclimation — s. Fever, Fever, stranger's.

SEAT, Anus — s. Bone, Ischion.

*SÉBACÉ,* Sebaceous.

SEBA'CEOUS, *Seba'ceus,* (F.) *Sébacé;* from *sebum,* 'suet.' That which has the nature of suet.

SEBACEOUS FLUX, Stearrhœa.

SEBACEOUS or SEBIP'AROUS GLANDS, *Sebaceous Fol'licles, Sebaceous Crypts, Follic'uli seba'cei, Cryptæ seba'ceæ, Oil Glands, Mil'iary glands,* are small hollow organs, of a rounded or pyriform shape, seated in the substance of the skin, and opening on its surface by a small, excretory duct; furnishing a yellow, unctuous humour, *Smegma cuta'neum, Sebum cuta'neum,* having some analogy with suet, which is destined to lubricate the surface of the body. Follicles of a similar nature exist around the corona glandis of the male, and under the skin of the labia majora and nymphæ of females. They secrete a sebaceous matter, which emits a peculiar odour; and hence, after the name of one who described them, have been called *Gland'ulæ odorif'eræ Tyso'ni, G. Tyso'ni, Tyson's glands.*

SEBESTE'NA, *Cordia myxa* seu *sebeste'na* seu *Africa'na* seu *domes'tica* seu *obli'qua, Sebeste'na officina'lis, Sebes'ten, Sebsten, Myxa, Cornus sanguin'ea, Prunus sebesti'na, Smooth-leaved Cor'dia, Assyr'ian plum,* (F.) *Sebestier myxa.* The dark, black fruit of the *Sebestina* possesses glutinous and aperient qualities, and is exhibited, in decoction, in various diseases of the chest.

*SEBESTIER MYXA,* Sebestena.

SEBIPAROUS, see Sebaceous.

SEBORRHAGIA, Stearrhœa.

SEBORRHŒA, Stearrhœa.

SEBSTEN, Sebestina.

SEBUM, Pinguedo, Sevum — s. Cutaneum, see Sebaceous glands.

SECA'LE, *S. cerea'le* seu *barba'tum.* The *Rye plant.* (F.) *Seigle.* Rye is chiefly used as an article of diet, particularly in the northern parts of Europe, where a spirit is also extracted from it. The grain is disposed to acescency: and hence its internal use at first generally produces a laxative effect.

SECALE BARBATUM, Secale — s. Cornutum, Ergot — s. Luxurians, Ergot.

SECALIS MATER, Ergot.

SECERNENT, Secreting.

SECERNING, Secreting — s. Substance, of the kidney, see Kidney.

SECESSIO FÆCUM, Defecation.

SECESSUS NIGER, Melæna.

*SÈCHE,* Sepia.

SECLUSORIUM, Sac.

SEC'ONDARY, from *secundus,* 'the second.' Something that acts subordinately to another; as the *secondary symptoms* of a disease; that is, those which supervene on the *primary.*

*SECONDINES,* Secundines.

SECRETA. Same etymon as Secretion. Things or matters secreted or separated from the blood.

SECRE'TING, *Secreto'rius, Secer'ning, Se'cerni'ent. Excer'nent.* Same etymon as Secretion. That which secretes,—as a secreting organ.

SECRETIO, Secretion — s. Lactis, Galactosis — s. Lotii, Uropoesis — s. Urinæ, Uropoesis — s. Vicaria, see Vicarious.

SECRE'TION, *Secre'tio, Apoc'risis;* from *secernere,* 'to separate.' An organic function, which is chiefly executed in the glands, and consists in an elaboration or separation of the materials of the blood, at the very extremities of the arterial system, or rather of the vascular secretory system; and which differs in each organ according to its particular structure; hence the formation of different fluids;—bile, saliva, urine, milk, &c. The secretions are of three kinds:—*exhalant, follicular,* and *glandular.*

SECRETORIUS, Secreting.

SECT, METHODICAL, Methodists.

SEC'TIO, *Section.* The act of cutting. A division.

SECTIO ALTA, see Lithotomy — s. Anatomica, Dissection — s. Cadaveris, Autopsia cadaverica — s. Cadaveris legalis, Autopsia cadaverica — s. Cæsarea, Cæsarean section — s. Franconiana, see Lithotomy — s. Hypogastrica, see Lithotomy — s. Lateralis, see Lithotomy — s. Legalis, Obductio — s. Mariana, see Lithotomy — s. Nympharum, Nymphotomy — s. Rectovesicalis, see Lithotomy — s. Renalis, Nephrotomy — s. Tendinum, Tenotomy — s. Vagino-vesicalis, Colpocystotomia — s. Vesicalis, Lithotomy.

SECTION, Sectio — s. Sigaultian, Symphyseotomy.

SECUNDÆ, Secundines.

SECUNDINÆ, Secundines.

SEC'UNDINES, *Hys'tera, Deuter'ion, Afterbirth, Secun'dæ, Secundi'næ,* (F.) *Arrière-faix, Secondines, Délivre.* All that remains in the uterus after the birth of the child,—viz., the placenta, a portion of the umbilical cord, and the membranes of the ovum. These are commonly not expelled till some time after the birth of the fœtus; hence their name. See *Délivrance.*

SECUNDUS PROPRIORUM AURICULÆ, Retrahens auris.

SEDANTIA, Sedatives.

SED'ATIVES, *Sedati'va, Pavon'ta, Sedan'tia, Adec'ta, Catastal'tica, Deprimen'tia,* (F.) *Calmants, Tempérants,* from *sedo,* 'I settle or assuage.' Medicines which directly depress the vital forces, and which are consequently employed whenever it is necessary to diminish preternaturally increased action. The chief reputed sedatives are: Acidum Hydrocyanicum, Acidum Hydro-sulphuricum, Tabacum, Missio Sanguinis, and certain gases by inhalation, as azote, carbonic acid, (?) carburetted and sulphuretted hydrogen.

SEDEM ATTOLLENS, Levator ani.

SEDES, Anus, Excrement — s. Cruentæ, Dysentery, Hæmatochezia — s. Lactescentes, Cœliac flux — s. Procidua, Proctocele.

SEDHEE, Bangue.

SED'IMENT, *Sédimen'tum, Lemma, Residen'tia.* Same etymon. (F.) *Dépôt.* A deposit formed by the precipitation of some one or more of the substances held in solution or suspension by a liquid. That which is formed in urine, at the time of cooling, has been called *Hypos'tasis, Hyposte'ma, Residen'tia, Subsiden'tia,* (F.) *Dépôt de l'urine.* This sediment or deposit varies in different states of the system. In calculous affections, it is one of the most important objects of attention.

SEDIMENTUM, Sediment — s. Urinæ lateritium, see Lateritious — s. Urinæ pityroïdes, see Furfuraceous.

SEDITIA, Nates.

SEDLITZ, MINERAL WATERS OF, *Seidlitz, Seidschütz* or *Seydschütz water.* Springs in Bohemia, near Prague, which are simple salines.

They contain a large quantity of sulphate of magnesia, a little sulphate of soda and sulphate of lime, carbonic acid, carbonates of lime and magnesia, and a resinous matter.(?) They are employed as purgatives in a multitude of diseases.

SEDLITZ POWDERS may be formed of *Soda tartarizata* ʒij, *Sodæ carbon.* ʒij, in one paper; *Acid tartaric.* gr. xxxv, in another. For half a pint of water.

*SEDON BRÛLANT,* Sedum — *s. Reprise,* Sedum telephium.

SEDUM, *Sedum acrē* seu *glaeia'lē* seu *minus* seu *vermicula're, Illec''ebra, Hellec''ebra, Illec''ebrum Vermicula're, Vermicula'ris, Piper mura'lē, Sempervi'vum acrē, Wall pepper, Stone crop, Biting Stone crop, Small Houseleek, Aei'chryson, Æo'nion,* (F.) *Joubarbe âcre, Orpin brûlant, Vermiculaire brûlante, Sédon brûlant. Family,* Crassulaceæ. *Sex. Syst.* Decandria Pentagynia. In its recent state it is very acrid, and proves both emetic and cathartic. Externally, in the form of cataplasm, it produces vesications and erosions. It has been recommended in cancerous and malignant ulcers.

SEDUM, Saxifraga granulata — s. Glaciale, Sedum—s. Minus, Sedum—s. Majus, Sempervivum tectorum—s. Minus, Sedum.

SEDUM TELE'PHIUM, *S. telephoïdes, Faba crassa, Cras'sula, C. Major, Illec''ebra major, Tele'phium, Faba'ria cras'sula, Faba crassa, Anacamp'seros, A. al'bicans* seu *triphyll'a* seu *vulga'ris, Orpine,* (F.) *Sédon reprise, Grand orpin, Fève épaisse, Joubarbe des vignes,* &c. Formerly used as a cataplasm in cuts, hemorrhoids, corns, whitlows, &c.

SEDUM TELEPHOÏDES, S. Telephium—s. Vermiculare, Sedum.

SEED, Sperm.

SEGMENTA CARTILAGINEA, see Trachea.

SEGNIT''IA, *Segnit''ies,* from *segnis,* 'sluggish.' Sluggishness or torpor in the exercise of a function: — as SEGNITIES ALVI, Torpor of the bowels: SEGNITIES VIRIUM, Languor.

SEGNITIES, Segnitia.

SEGRAY, MINERAL WATERS OF. Near Pithiviers, in Gâtinais, in the French department of Loiret, there is a chalybeate spring, which has some reputation.

SEGU, Sago.

SEIDLITZ, Sedlitz.

SEIDSCHUTZ, Sedlitz.

*SEIGLE,* Secale—*s. Ergotée,* Ergot.

*SEIN,* Uterus, see Mamma.

SEIRIASIS, *Coup de Soleil.*

SEIZURES, HIDDEN, see Seizures.

SEKISKAYAVODKA, see Spirit.

*SEL,* Salt—*s. Admirable de Lémery,* Magnesiæ sulphas—*s. Admirable perlé,* Soda, phosphate of —*s. de Cuisine,* Soda, muriate of—*s. de Dérosne,* Narcotine—*s. d'Égra,* Magnesiæ sulphas—*s. Marin,* Soda, muriate of—*s. d'Opium,* Narcotine—*s. de Saturne,* Plumbi superacetas — *s. de Verre,* see Vitrum — *s. Volatil d'Angleterre,* Ammoniæ carbonas.

SELAGO, Camphorosma Monspeliaca, Lycopodium selago.

SELENE, Moon, see Nail.

SELENIASIS, Somnambulism.

SELENIASMUS, Somnambulism.

SELENOBLETUS, Lunatic.

SELENOGAMIA, Somnambulism.

SELERY, Apium graveolens.

SELFABUSE, Masturbation.

SELF-HEAL, Prunella.

SELF-LIM'ITED. An epithet applied to diseases which appear to run a definite course, but little modified by treatment, — small-pox, for example-

SELF-POLLUTION, Masturbation.

SELI'BRA, *Semili'bra, Sembella,* half a pound. Six ounces, Troy; eight, Avoirdupois.

SELINI'TES, *σελινιτης.* Wine impregnated with the seeds of the *σελινον* or *smallage.* — Dioscorides.

SELINUM ANGELICA, Angelica Sylvestris — s. Galbanum, Bubon galbanum — s. Imperatoria, Imperatoria — s. Opoponax, Pastinaca opoponax — s. Oreoselinum, Athamanta aureoselinum — s. Ostruthium, Imperatoria — s. Pastinaca, Pastinaca sativa — s. Peucedanum, Peucedanum — s. Pubescens, Angelica sylvestris — s. Sylvestre, Angelica sylvestris.

SELLA, S, Turcica — s. Equina, S. Turcica — s. Familiarica, Lasanum—s. Obstetricia, Diphrus —s. Sphenoidalis, S. Turcica.

SELLA TUR'CICA, *Ephip'pium, Fossa Pituita'ria, Sella, S. equi'na* seu *sphenoida'lis, Turkish Saddle,* (F.) *Selle Turcique* ou *du Ture.* A depression at the upper surface of the sphenoid bone, which is bounded, anteriorly and posteriorly, by the clinoid processes; and lodges the pituitary gland. It is so called from its resemblance to a *Turkish saddle.*

SELLA TURCICA, Pituitaria fossa.

*SELLE TURCIQUE,* Sella Turcica — *s. du Ture,* Sella Turcica.

*SELS NEUTRES,* Neutral salts.

SELTZ or SELTZER, MINERAL WATERS OF. Cold, acidulous springs, the source of which is at Seltz, nine leagues from Strasburg, and in the Department of the Bas-Rhin. They contain carbonates of lime, magnesia, and soda, chloride of sodium, and much carbonic acid. They are refrigerant, tonic, diuretic, and aperient.

ARTIFICIAL SELTZER WATER may be made from *muriat. acid.* gr. xxxv, *water* Oj, *white marble* gr. iij. Stop up till dissolved. Add *carbonate of Magnesia,* gr. v, and, after some time, *subcarbonate of soda,* gr. xxxij. Close it till used.

SEMBELLA, Selibra.

SEMECARPUS ANACARDIUM, Avicennia tomentosa.

SEMEIOG'RAPHY, *Semeiograph'ia, Semiography, Semiogra'phia,* from *σημειον,* 'a symptom,' and *γραφη,* 'a description.' A description of symptoms or signs of disease.

SEMEIOL'OGY, *Semeiot'icē, Semiology, Semioticē, Phænomenolog''ia,* from *σημειον,* 'a symptom,' and *λογος,* 'a discourse.' (F.) *Séméiotique.* The branch of pathology whose object is the doctrine of the symptoms or signs of disease.

SEMEION BOETHEMATICUM, Indication.

SEMEIOSIS, Semeiology.

*SÉMÉIOTIQUE,* Semeiology.

SEMEN, Sperm — s. Badian, Illicium anisatum — s. Cinæ, Artemisia santonica — s. Contra, Artemisia santonica — s. Contra vermes, Artemisia santonica—s. Masculinum seu virile seu genitale, Sperm — s. Muliebre, Sperm (of the female) —s. Sanctum, Artemisia santonica—s. Zedoariæ, Artemisia santonica.

*SEMENCE,* Sperm.

SEMENTINA, Artemisia santonica.

SEMI, from *'ημισυ,* 'half.' *Semi* or *demi,* in composition, universally signifies 'half;' both in French and English.

SEMIAN'IMIS, *Semimor'tuus, Sem'inex, Semivi'vus;* from *semi,* 'half,' and *animus,* 'soul.' Half-living. Half-dead.

SEMI-BULB OF THE FEMALE, Bulbus vestibuli.

SEMICANALICULUS, Sulcus.

SEMICANALIS, Sulcus.

SEMICEPHALUS, Hemicephalus.

*SEMICIRCULI OSSEI*, Semicircular canals.

SEMICIR'CULAR, *Semicircula'ris*. That which represents the half of a circle.

SEMICIRCULAR CANALS, *Cana'les* seu *Ductus semicircula'res* seu *tubæform'es* seu *circula'res*, *Semicir'culi os'sei*, *Funes* seu *Canalic'uli semiannula'res labyrin'thi*, (F.) *Canaux demicirculaires*, are seated in the pars petrosa of the temporal bone, and open into the vestibule, behind which they are situate. They are three in number, of which one is *superior* or *vertical*, *cana'lis semicircula'ris vertica'lis supe'rior*; another *posterior* or *oblique*, *cana'lis semicircula'ris vertica'lis poste'rior*, and the third *exterior* or *horizontal*, *canalis semicircula'ris horizonta'lis*. Their parietes are formed of a bony, compact, hard plate. Their uses in audition are not known: at their termination they have the elliptical arrangements called *ampul'læ*; and by both extremities they open into the vestibule, in the sac at its superior part—the *Sac'culus Ellip'ticus*, *Al'veus* seu *Utric'ulus commu'nis*, *Utricle*, *Sinus* or *Alveus utriculo'sus*, *Sacculus vestibuli* or *Median sinus*. In front of the S. ellipticus, nearer the cochlea, and opposite the foramen ovale, is the *Sac'culus spher'icus* or *sacculus*.

SEMICIRCULUS EXSCULPTUS, Hiatus diaphragmatis aorticus.

SEMICON'GIUS. Half a gallon, or four pints.

SEMICU'BIUM, *Semicupium*, *Inses'sio*, *Inces'sio*, *Encathis'ma*, *Excathis'ma*, (F.) *Demibain*, from *semi*, 'half,' and *cubare*, 'to lie down.' A half-bath, or such as receives only the hips or extremities.

SEMICUPIUM, Bath, half, Semi-cubium—Semi-fibulæus, Peronæus brevis—Semi-interosseus indicis, Abductor indicis—Semi-interosseus pollicis, Opponens pollicis.

SEMILIBRA, Selibra.

SEMILLA DEL GUACHARO. Various kinds of hard and dry fruits, found in the stomachs of the young Guacharoes, a sort of nocturnal bird. The fruits are a celebrated South American remedy in ague.

SEMILU'NAR, *Semiluna'ris*, (F.) *Demi-lunaire* ou *Semi-lunaire*, from *semi*, 'half,' and *luna*, 'the moon.' Having the shape of a half-moon.

SEMILUNAR CART'ILAGES, *Semilunar fibro-cartilages*, *Sigmoid car'tilages*, *Cartilag''ines sigmoïdeæ* seu *semiluna'res*, are two fibro-cartilages, which exist between the condyles of the os femoris and the articular surfaces of the tibia. The innermost, which is longer from before to behind than transversely, is nearly semicircular. The outermost forms almost an entire circle; an arrangement, in both cases, corresponding to the different surfaces of the tibia. They are thicker at their outer circumference, which is convex, than at the inner, which is concave and very thin. Both are inserted, before and behind, into the spine of the tibia, by means of fibrous fasciæ.

SEMILUNAR GANGLION,—*Ganglion abdomina'lē* seu *splanch'nicum* seu *transver'sum* seu *sola'rē*, *G. surrénal*, (Ch.), belongs to the great sympathetic. These ganglia present considerable variety, and are deeply situate in the abdomen, above and behind the supra-renal capsules. They correspond, posteriorly, to the pillars of the diaphragm and the aorta. They have the shape of a crescent reversed, often surrounded by other ganglia of a smaller size. From their periphery the numerous filaments proceed, which go to the formation of the solar plexus.

SEMILUNAR NOTCH OF THE STERNUM, *Fourchette* — s. Valves, Sigmoid valves — s. Masculatus, Eunuch.

SEMILUNULA UNGUIUM, see Nail.

SEMI-MAS, Eunuch.

SEMIMASCULUS, Eunuch.

SEMIMEMBRANEUS, Semimembranosus.

SEMIMEMBRANO'SUS, *Semimembra'neus*, (F.) *Ischio-popliti-fémoral*, *Ischio-popliti-tibial*, (Ch.) *Demimembraneux*. A muscle situate at the posterior part of the thigh. It is flat, thin, narrow, and aponeurotic in its upper third; broader and fleshy in the middle, and tendinous below. It is attached above to the tuberosity of the ischium; and below—by a tendon, which has three divisions—to the outer condyle of the femur, and to the posterior and inner part of the internal tuberosity of the tibia. This muscle is a rotator inwards, and a flexor of the leg. It can also bend the thigh upon the leg. In standing it maintains the pelvis in position, and can even draw it downwards.

SEMIMORTUUS, Semianimis.

SEMINA CATAPUTIÆ MAJORIS, see Ricinus communis.

SE'MINA FRIG'IDA MAJO'RA. The *greater cold seeds*. The ancients gave this name to the emulsive seeds of the cucumber, melon, gourd, and water-melon.

SEMINA FRIGIDA MINORA. The *lesser cold seeds*. The ancients gave this name to the seeds of the lettuce, purslane, endive, and cichory.

SEMINA RICINI VULGARIS, see Ricinus communis.

SEMINAL, Spermatic—s. Filaments, Spermatozoa—s. Fluid, Sperm—s. Granules, see Granule.

SEMINALE MEMBRUM, Penis.

SEMINALIS, Spermatic.

SEMINERVOSUS, Semi-tendinosus.

SEMIORBICULARIS, Orbicularis oris.

SEMIPESTIS, Typhus.

SEMINEX, Semianimis.

SEMINIA MORBORUM, Predisposition.

SEMINIF'EROUS, from *semen*, 'sperm,' and *fero*, 'I carry.' *Spermatoph'orous*. An epithet given to the vessels which secrete and convey the seminal fluid.

SEMINIUM, Sperm.

SEMIOGRAPHY, Semeiography.

SEMIOLOGY, Semeiology.

SEMIOTICE, Semeiotice—s. Faciei, Physiognomy.

SEMIPLEGIA, Hemiplegia.

SEMISEXTUM, Hemiecton.

SEMISICIL'ICUS. A weight of one drachm or three scruples. — Rhodius.

SEMISIDERATIO, Hemiplegia.

SEMISIDERATUS, see Hemiplegia.

SEMISOMNIS, Coma.

SEMISOPITUS, Coma.

SEMISOPORUS, Coma.

SEMISPEC'ULUM. An instrument used for dilating the incision made into the neck of the bladder in the operation of lithotomy.—Fabricius Hildanus.

SEMISPINA'LIS COLLI, *Semispina'tus colli*, *Artic'ulo-spina'lis*, *Transver'so-spinalis Colli*, *Spinalis cervi'cis*, *Spinalis Colli*, *Transversa'lis Colli*, *Transverso-spinal*, (F.) *Demi-épineux* ou *transversaire-épineux du cou*. This muscle arises from the transverse processes of the six uppermost dorsal vertebræ, by an equal number of distinct tendons, which run obliquely under the complexus, and is inserted in the spinous processes of all the cervical vertebræ, except the first and last. Its *action* is, to extend the neck obliquely backwards and to one side.

SEMISPINALIS DORSI, *Semi-spinalis externus*, *Transver'so-spinalis dorsi*, *Semi-spina'tus*, (Riolan), *Transverso-spinal*, (F.) *Demi-épineux du dos*, *Transversaire-épineux du dos*. This muscle arises from the transverse processes of the seventh, eighth, ninth, and tenth dorsal vertebræ,

by as many distinct tendons, which soon grow fleshy; and then again become tendinous, and are inserted into the spinous processes of the sixth or seventh uppermost dorsal, and two lowest cervical vertebræ, by as many tendons. Its *action* is, to extend the spine obliquely backwards.

SEMISPINALIS EXTERNUS, Semi-spinalis dorsi—s. Internus, Transversalis dorsi — s. Spinatus, Longissimus dorsi, Semi-spinalis dorsi.

SEMISPINATUS COLLI, Semispinalis colli.

SEMIS'SIS, *Semis.* The half of a pound, ounce, drachm, &c.

SEMITENDINO'SUS, *Semi-nervo'sus*, (F.) *Ischio-créti-tibial, Ischio-prétibial*, (Ch.) *Demitendineux.* This muscle is situate at the posterior part of the thigh. It extends obliquely, downwards and inwards, from the tuberosity of the ischium—to which it is attached by a flat tendon, common to it and the biceps—as far as the posterior and inner part of the tibia, to which it is attached by means of another round tendon. Its fibres are commonly interrupted by an aponeurosis. Its *uses* are the same as those of the semimembranosus.

SEMITERTIANA, Hemitritæa — *s. Tierce*, Hemitritæa.

SEMIUNCIA, Hemiuncion.

SEMIVIR, Eunuch.

SEMIVIVUS, Semianimis.

SEM'OLA, BULLOCK'S, a farinaceous article of diet, which is recommended as highly nutritious and easily digestible, consequently well adapted for infants and invalids, is said to consist of the gluten of wheat, with a small proportion of starch. Semola and Semolina resemble each other greatly. They appear, indeed, to be identical.

SEMOLI'NA, *Manna croup.* This may be made by grinding wheat in an apparatus, separating the flour from the middlings, dressing the latter four different times in a bolting mill, and sifting through parchment sieves, until the product is perfectly freed from bran. In Poland it is called *Cracow groats.*

Semolina is generally imported into England from the Baltic, and in Russia is said to be manufactured from buckwheat. It has a granular form like some kinds of oatmeal, a dingy white colour, a farinaceous, somewhat insipid, taste, and is well adapted for the diet of children affected with derangement of the bowels. A recent analysis makes it consist of the gluten of wheat with a certain proportion of the starch, part of the latter having been removed.

SEMPERVIVUM ACRE, Sedum.

SEMPERVIVUM TECTO'RUM, *S. majus, House-Leek, Sedum Majus* seu *Tecto'rum, Aïzoön, Beiakalalen, Buphthalmus, Barba Jovis, Sengreen, Agriosin'ara, Andrachahara, Chrysosper'mum*, (F.) *Joubarbe des toits.* The leaves have a mild, subacid austerity, and are often applied to bruises and old ulcers.

SEMUNCIA, Hemiuncion.

SENA, Cassia senna.

*SÉNÉ*, Cassia senna — *s. d'Amérique*, Cassia Marilandica—*s. Faux*, Colutea arborescens.

SENEBIERA CORONOPUS, Cochlearia coronopus.

SENE'CIO, *S. vulga'ris, Erig''erum, Cortalon, Erigeron, Groundsel, Fireweed*, (F.) *Seneçon commun. Family*, Corymbiferæ. *Sex. Syst.* Syngenesia Polygamia Superflua. A common plant in Europe; frequently applied, bruised, to inflammations and ulcers, as refrigerant and anti-scorbutic.

SENECIO HIERACIFOLIUS, Erechthites hieracifolius.

SENECIO JACOBÆ'A, *Jacobæ'a, St. James' Wort, Ragwort*, (F.) *Jacobée.* The leaves have a roughish, bitter, subacid, and extremely nauseous taste. A decoction has been used in dysentery. A poultice of the leaves has been recommended in rheumatic affections; und a decoction of the root has often been employed in cases of wounds and bruises.

*SENEÇON COMMUN*, Senecio.

SENECTA, Senectus.

SENEC'TA AN'GUIUM. The cast skin of a serpent. A decoction of it is said to cure deafness!

SENECTA DECREPITA, Decrepitude — s. Extrema, Decrepitude — s. Summa, Decrepitude — s. Ultima, Decrepitude.

SENEC'TUS, *Senec'ta*, from *senere*, 'to be old.' *Geras, Se'nium, Ætas seni'lis* seu *provec'ta* seu *mala, Old age, Senil'ity*, (F.) *Vieillesse.* The last period of life, commencing, according to some, at 60 years of age, but varying according to numerous circumstances. It is characterized by progressive diminution of the physical and moral faculties.

SENECTUS ULTIMA, Decrepitude.

SENEGA, Polygala senega.

SEN'EGAL, GUM, *Gummi Senegalen'sē* seu *Sen'eca* seu *Sen'ega* seu *Sen'ica.* The exudation from the *Aca'cia* seu *Mimo'sa Senegal—Family*, Leguminosæ, *Sex. Syst.* Polygamia Monœcia—which grows in the country of Africa through which the river Senegal runs. It is in loose or single drops, much larger than gum Arabic, or the gum which exudes from the cherry tree; and is much more difficult of solution than the former.

SENEGINE, see Polygala senega.

SENEKA, Polygala senega.

*SÉNEVÉ*, Sinapis.

SENGREEN, Sempervivum tectorum.

SENILE, *Seni'lis*, from *senere*, 'to be old.' Relating or belonging to old age:—as '*senile* delirium;' dotage.

SENILITY, Senectus.

SENNA, Cassia senna—s. Alexandrina, Cassia senna—s. American, Cassia Marilandica—s. Bladder, Colutea arborescens—s. Essence of, prepared, Selway's, see Infusum sennæ compositum — s. Germanica, Colutea—s. Italica, Cassia senna—s. Prairie, Cassia chamæcrista—s. Wild, Cassia chamæcrista, Cassia Marilandica.

*SENS*, Sense.

SENSA'TION, *Sensa'tio*, from *sentire, sensum*, 'to feel;' *Æsthe'ma.* The consciousness or cognizance by the brain of an impression caused by an external body on the organs of the senses. (F.) *Sentiment.* It is not necessarily, however, confined to bodies external to us; for we can receive an impression by touching any part of our own body. The body which communicates the impressions needs but to be external to the part impressed. Sensations are divided into *external, internal* and *morbid.* The *external* are communicated by the five organs of the senses. The *internal* are such as occur within the body, and arise from some alteration in the function of the part, for the time being. Hunger and thirst are internal sensations, as well as all the natural wants. *Morbid* sensations may be either internal or external. *Objective sensations* are produced by impressions on the peripheral nerves; as in vision, audition, &c. *Subjective sensations*, such as originate centrically, or in the encephalon, — as tinnitus aurium.

SENSATIONAL, Sentient.

SENSE, *Sensus, Sen'sio, Æsthe'sis*, (F.) *Sens.* Same etymon as Sensation. A faculty, possessed by animals, of appreciating impressions from external objects. The senses are five in number: sight, hearing, smell, taste, and touch. Of these,

the first two and the last administer more to the intellect; and, hence, have been called by some, the *intellectual senses:* the other two seem more destined for the nutrition of the body: and, hence, have been termed *corporeal* or *nutritive senses.* Other senses have been suggested — as the intense sensation experienced during the venereal act; a sense of heat and cold; a muscular sense, a common sense or cœnæsthesis, &c.

SENSES, NERVOUS SYSTEM OF THE, Medulla oblongata.

SENSIBILITAS, Sensibility—s. Anomala, see Irritable — s. Aucta, see Irritable — s. Morbosa, see Irritable.

SENSIBIL'ITY, *Sensibil'itas.* Same etymon as Sensation; *Æsthe'ma.* The faculty of receiving impressions, and having the consciousness of them. Bichat defines it as the property possessed by living bodies, of receiving impressions, whether the individual be conscious of them or not. In the former case, where conscious, he calls the sensibility *animal:* in the latter, where not, he terms it *organic.* This last is common to vegetables and animals, and presides over nutrition, absorption, exhalation, secretion, &c. The other does not exist in vegetables: it is the origin of the sensations—olfaction, vision, gustation, audition, thirst, hunger, pain, &c. There are few parts of the animal body, but what are sensible — if not in health — in disease. The free extremities of the hair and nails, and the epidermis, are not so. See Insensibility.

SENSIFEROUS, Sentient.

SENSIO, Sense.

SENSITORIUM, Sensorium.

SENSORI-VOLIT''IONAL. A term applied to nervous fibres which pass to and from the cerebro-spinal axis, and are respectively concerned in sensation and volition.

SENSO'RIAL, Sentient.

SENSORIAL POWER, according to Dr. Wilson Philip, is composed of the two functions of sensation and volition. Dr. Darwin included in it the power of muscular contraction; but it ought not to be extended to acts in which there is not consciousness.

SENSO'RIUM, *Senso'rium commu'nē, Or'ganon senso'rium internum, Sensito'rium, Empo'rium spirituum, Æsthete'rion, Sen'sory.* The common centre of sensations.

SENSORY, Sensorium, Sentient.

SENSORY GANG'LIA. A name given by Dr. Carpenter to a series of ganglionic masses at the base of the brain, which are in direct communication with the nerves of sensation—as the *olfactory, optic, auditory* and *gustatory.*

SENSORY NERVES, *Nerves of sensation,* are so called in contradistinction to *Motor* nerves. There are *general sensory nerves* — as those connected with the posterior part of the spinal marrow, and the fifth pair; and *special sensory,* as those of the senses.

SENSUS ÆGRITUDINIS, Indisposition—s. Osmometricus, Olfaction—s. Perversus, Pseudæsthesia.

SEN'TIENT, *Sen'tiens, Sen'sory, Ideüg''enous, Senso'rial, Sensa'tional, Sensif''erous.* Feeling, causing feeling.

SENTIENT EXTREMITIES OF NERVES are their minute terminations in the organs.

*SENTIMENT,* see Sensation.

SEPARATO'RIUM, from *separo,* 'I separate.' A surgical instrument, for separating the pericranium from the skull.

A *Sep'aratory, Vitrum Hypoclep'tieum,* is a pharmaceutical vessel for separating fluids of different densities from each other.

SEPEDOGENESIS, Sepedonogenesis.

SEPEDONOGEN'ESIS, *Sepedogen'esis,* from σηπεδων, 'putrescency,' and γενεσις, 'generation.' A septic disposition or tendency; such as is met with in typhus gravior.

SEPES, *Sæ'pes,* 'A hedge,' 'a row:' as *Sepes* seu *Se'ries* seu *Pecten den'tium:*—a row of teeth.

SEPES DENTIUM, See Sepes.

SEPHIRUS, Scleriasis.

SE'PIA, *S. officina'lis, Se'pium, Cuttle-Fish,* (F.) *Sèche.* The osseous part of the cuttle-fish—*Præcip'itans mag'num*—has been used as an absorbent, and is often added to tooth-powders.

SEPLASIA'RIUS. A name formerly given to one who sold perfumes, ointments, &c. It is derived from *Seplasia,* the name of a public place at Capua, where such preparations were frequently sold. A druggist.

SEPSICHYMIA, Septochymia.

SEPSIS, Putrefaction.

SEPTÆ'MIA; from σηπτος, 'rotten,' and 'αιμα, 'blood.' A morbid condition of the blood produced by septic or putrid matters.

SEPTANA FEBRIS, Fever septan.

SEP'TENARY, *Septena'rius,* (F.) *Septénaire,* from *septem,* 'seven.' 'Consisting of seven.' The septenary years of the old believers in critical periods were times at which, it was supposed, important changes might be expected to take place. The grand climacteric was fixed at 63, and it was considered that if a person passed that age, he had well-founded expectations that his life might be protracted to 90.

SEPTENNIAD, Climacteric, (years.)

SEPTFOIL, UPRIGHT, Tormentilla.

SEPTIC, *Sep'tieus, Septus,* from σηπειν, 'to rot,' σηπτος, 'rotten.' That which produces putrefaction. A substance which corrodes and disorganizes the soft parts without causing much pain.

SEPTIC POISON, see Poison.

SEPTICÆMIA, Septæmia.

SEPTIMESTRIS FŒTUS, see Fœtus septimestris.

SEPTINERVIA, Plantago.

SEPTOCHYM'IA, *Sepsichym'ia;* from σηψις, 'putrefaction,' and χυμος, 'juice.' Putrefaction or putrescency of the humours.

SEPTOPYRA, Typhus gravior.

SEPT'ULUM; diminutive of *septum,* 'a partition.' A division between small spaces or cavities—as the *septula* or fibrous cords given off by the mediastinum testis to be inserted into the inner surface of the tunica albuginea.

SEPTUM, (F.) *Cloison.* A part intended to separate two cavities from each other, or to divide a principal cavity into several secondary cavities.

These septa are numerous in the human body. The chief are the following:—

SEPTUM CEREBELLI, Falx cerebelli—s. Cerebri, Falx cerebri—s. Cochleæ auditoriæ, Lamina spiralis.

SEPTUM CORDIS, *Septum me'dium cordis.* The partition which separates the two ventricles of the heart.

SEPTUM ENCEPHALI, Tentorium.

SEPTUM LU'CIDUM seu *pellucid'um* seu *ten'uē et pellucidum* seu *medium* seu *Spec'ulum lucidum* seu *Lapis specula'ris* seu *Mediasti'num* seu *Diaphragma ventriculo'rum latera'lium cer'ebri, Speculum,* (F.) *Septum médian,* (Ch.) *Cloison transparente.* The soft portion or medullary substance, which separates the two lateral ventricles of the brain from each other. This septum is composed of two laminæ; between which a small cavity exists, filled by a serous fluid, and called the *Fossa of Syl'vius, 5th ventricle of Cuvier, Sinus of the median septum,* (Ch.) The brothers Wen-

zel are of opinion that this cavity is lined by a peculiar membrane.

*SEPTUM MÉDIAN*, S. lucidum—*s. Médian du cervelet*, Falx cerebelli—s. Medium cerebri, S. lucidum.

Septum Na'rium, *Interseptum* seu *Dissepimen'tum* seu *Interfi'nium* seu *Discri'men* seu *Imbrex* seu *Diaphrag'ma na'rium*, (F.) *Cloison des Fosses nasales*. The partition between the nares. It is formed by the vomer, the perpendicular plate of the ethmoid bone, and a cartilage of a triangular shape. These parts are lined by the pituitary membrane, which receives a considerable number of nerves and vessels.

Septum Nasi, see Nares.

Septum Parvum Occipitale, Falx cerebelli—s. Pectiniforme, see Cavernous bodies—s. Pellucidum, S. Lucidum—s. Scalæ, Lamina spiralis—s. *Staphylin*, Velum pendulum palati—s. Tenue et pellucidum, S. lucidum—s. Thoracis, Mediastinum—s. *Transverse*, Tentorium—s. Transversum, Diaphragm—s. Vestibuli nervoso-membranaceum, see Labyrinth.

SEPTUS, Septicus.

SEPUM, Sevum.

SEQUES'TRUM, from *sequestro*, 'I separate.' The portion of bone, in necrosis, which is dead, and separated from the living bone; acting, whilst retained, as an extraneous body. When the sequestrum is superficial and small, it is called *Exfolia'tion*.

SERAPEUM, Syrup.

SERAPINON, Sagapenum.

SERAPIUM, Syrup.

SERBET, Scherbet.

SER'ICUM, *Silk;* from *Seres*—the Thibetans probably—from whom it was first obtained. (F.) *Soie*. The thread spun by the *Bombyx Mori* or *Silkworm*. Silk is used by surgeons for ligatures, &c.

Sericum Anglicum, see Sparadrapum adhæsivum.

SERIES DENTIUM, see Sepes.

*SÉRIEUX*, Serious.

*SERINGUE*, Syringe.

SERIOLA, Cichorium intybus.

SE'RIOUS, (F.) *Sérieux, Grave*. A term applied to a disease, *Dyspathi'a, Morbus gravis*, and to a symptom that is attended with danger.

SERIS, Cichorium intybus.

SERMOUNTAIN, Laserpitium album.

SERO-COLITIS, see Colitis.

SERO-CYSTIC, *Sero-cyst'icus*. An epithet to tumours of the female breast, which consist, in the first stage, of one or more membranous cysts, produced perhaps by dilatation of portions of the lactiferous tubes.

SERO-HEPATITIS, see Hepatitis.

SER'OLIN, from *serum*, 'whey.' A fatty matter detected in the blood by Boudet, Lecanu, Sanson, and others.

*SÉROSITÉ*, Serum.

SEROSITY, Serum.

SEROUS, *Sero'sus*, (F.) *Séreux*. Thin; watery. Relating to the most watery portion of animal fluids, or to membranes that secrete them. See Serum.

Serous Layer, see *Tache embryonnaire*.

Serous Membranes, Membranes, serous.

SERPEDO, Psoriasis.

SERPENT, *Serpens, Anguis, Ophis;* from *serpo*, 'I creep.' A snake.

Snake Broth was, at one time, recommended as a restorative.

Many serpents are venomous: and the bites of some fatal. See Poisons, Table of.

*SERPENTAIRE NOIRE*, Actæa racemosa.

SERPENTARIA, Aristolochia serpentaria—s. Gallorum, Arum dracunculus—s. Hispanica, Scorzonera—s. Minor, Arum maculatum—s. Nigra, Actæa racemosa.

SERPENTARIÆ BRAZILIENSIS RADIX, Caincæ radix.

SERPENTIN, see Alembic.

SERPENTINE, Ophites.

SERPENTINUS, Ophites.

SERPES, Herpes.

SERPIG"INOUS, from *serpere*, 'to creep.' An epithet given to certain affections, which creep, as it were, from one part to another,—'*Serpiginous* erysipelas,' (F.) *Érysipèle serpigineux*.

SERPIGO, Herpes circinatus, Lichen psoriasis.

SERPILLUM, Thymus serpyllum.

*SERPOLET*, Thymus serpyllum.

SERPULLUM, Thymus serpyllum.

SERPYLLUM, Thymus serpyllum—s. Citratum, see Thymus serpyllum.

SERRA, Saw—s. Amputatoria, Saw, amputation—s. Versatilis, Trepan.

SERRAT'ULA AMA'RA, *Family*, Cynarocephaleæ. *Sex. Syst.* Syngenesia Polygamia æqualis. A species of *Sawwort*, recommended in ague.

Serratula Behen, Centaurea behen.

SERRATUS ANTICUS MINOR, Pectoralis minor—s. Major, Serratus magnus.

Serra'tus Magnus. So called from its serrated appearance; from *serra*, 'a saw.' *Serratus major anti'cus, Serratus major*, (F.) *Costobasi-scapulaire, Costo-scapulaire*, (Ch.,) *Grand dentelé*. A very broad (especially anteriorly,) thin, flat, irregularly quadrilateral muscle, situate at the sides of the thorax. It is attached, before, to the external surface of the first 8 or 9 ribs, by as many distinct digitations; and, behind, to the spinal edge of the scapula. The superior fibres are almost horizontal; the lower become gradually more and more oblique upwards and backwards. This muscle carries the scapula forwards, and causes it to execute a movement of rotation, which directs its inferior angle forwards, and the anterior upwards. When the shoulder is fixed, it raises the ribs.

Serratus Posti'cus Inferior, (F.) *Dorso-lombo-costal, Lombo-costal*, (Ch.,) *Petit dentelé postérieur et inférieur*. A broader and thinner muscle than the following, but nearly of the same shape. It is situate obliquely at the lower part of the back; and extends from the spinous processes of the last two or three dorsal vertebræ, and the first two or three lumbar, to the inferior margin of the last four false ribs. This muscle depresses the ribs, and thus concurs in expiration. It is an antagonist to the next.

Serratus Posti'cus Supe'rior, (F.) *Cervicidorso-costal, Dorso-costal*, (Ch.) *Petit dentelé supérieur*. A flat, thin, quadrilateral muscle: situate obliquely at the posterior inferior part of the neck, and the superior part of the back. It passes from the posterior cervical ligament, the spinous process of the last cervical vertebra; from the spinous processes of the first two or three dorsal, to the second, third, fourth, and fifth ribs; into which it is inserted by as many digitations. It raises the ribs, and is, consequently, an inspiratory muscle.

SERTULA CAMPANA, Trifolium melilotus.

SERUM, Sperm.

Serum, 'whey.' *Orrhos, Oros, Seros'ity*, (F.) *Sérosité*. The most watery portion of animal fluids, exhaled by serous membranes. It is a constituent part of blood, milk, &c.

Serum of the Blood, *Hæ'mydor, Orrhos, Ichor san'guinis*, (F.) *Sérum du Sang*, is the

liquid which separates from the blood, when coagulated at rest. It is of a greenish-yellow colour; viscid, slightly coagulable by heat, acids, and alcohol. It is composed of water; chloride of sodium; certain phosphates; and albumen, constantly united to soda, almost in a saponaceous combination.

The fluid which exudes from the albumen of the serum of the blood, when coagulated by heat, is by some called *serosity*.

*SÉRUM DU SANG*, S. of the blood.

SERUM LACTIS, *Aqua lactis; Serum of Milk, Whey*, (F.) *Sérum du lait, Petit lait.* That part of milk, from which the butter and caseous matter have been separated. It is a transparent, citrine-coloured liquid, containing sugar of milk, mucilage, acetic acid, phosphate of lime, and some other saline substances. It is used as a slightly nutritious dilnent and refrigerant.

SERUM LACTIS HOFFMAN'NI, (F.) *Petit-lait d'Hoffmann*, is a name given to the liquid resalting from treating with boiling water milk which has been evaporated to an almost solid consistence. It is not much used.

RENNET WHEY is made thus: *milk* 2 pints: *rennet* ℥ss, infused in a little hot water; mix and keep in a gentle heat for some hours, then strain. —Gray.

SERUM OF SEROUS MEMBRANES, *Serum membranarum serosa'rum, Water of Dropsy*, (F.) *Sérum des membranes séreuses, Eau des hydropiques.* It resembles the serum of the blood,—especially in cases of hydrocele. The water of hydrothorax and ascites contains much less albumen:—sometimes enough to coagulate on the application of heat: at others, not.

SERVICE, MOUNTAIN, Sorbus acuparia—s Tree, Sorbus domestica.

*SERVIETTE EN CARRÉ, Couvrechef.*

SES'AMOID, *Sesamoï'des, Sesamo'des, Sesamoïdeus*, from σησαμη, 'a grain of sesamum,' and εἰδος, 'resemblance.'

SESAMOID BONES, *Ossa* seu *Ossic'ula sesamoïdea*, are small bones, situate in the substance of tendons, near certain joints. Their number is various. They are commonly more in the male than female. Two are constantly met with beneath the metatarso-phalangal articulations of the great toe. Sometimes, the articulations of other bones of the metartarsus with the phalanges of the toes have them likewise. In the hand there are two before the metacarpo-phalangal joint of the thumb. At times, they are met with in the other metacarpo-phalangal articulations. Occasionally, two exist behind the condyles of the femur, in the tendons of the gastrocnemii muscles. A considerable os sesamoideum is also met with in the tendon of the peronæus longus. These bones are commonly round, and flattened only on one surface, which is incrusted with cartilage. Their size is very variable, according to the joints in which they exist. Traces of sesamoid bones are not observed in infants: in them, they are replaced by small, cartilaginous concretions. They are developed by a single point of ossification: and are, like the patella (which is a true sesamoid bone,) composed of much cellular substance, covered by a thin layer of compact tissue. The use of these bones is,—to allow the tendon to be inserted into the lever at a greater angle; and thus enable the power to act more advantageously.

Riolan has given the name *Ossa sesamoïdea* to two bony points sometimes met with;—the one at the outer side of the carotid canal of the temporal bone; and the other at the edge of the cavernous sinus, at the side of the internal carotid artery.

SESAMUM, see Sesamum orientale.

SES'AMUM ORIENTA'LE, *S. edu'le* seu *oleif'erum, Bennē, Oily Grain.* The seeds of this African plant are cultivated in Georgia and South Carolina, where the negroes use them with Indian corn as an article of food. They yield a larger proportion of oil than any other vegetable; one hundred weight producing ninety pounds of oil, which is, at least, equal to Florence oil.

*Benne oil, Oleum Ses'ami*, is used in the Southern States as a laxative. The leaves—*Sesamum* (Ph. U. S.)—afford, by infusion, an excellent mucilage.

SESCUN'CIA, *Sesquiun'cia, Hemiol'ion.* An ounce and a half. See Sesqui.

SESELI, Laserpitium siler—s. Ægopodium, Ligusticum podagraria—s. Annuum, S. tortuosum—s. Carum, Carum—s. Carvi, Carum—s. Creticum, Tordylum officinale—s. Fœniculifolium, Sison ammi—s. Graveolens, Apium graveolens—s. Meum, Æthusa meum—s. Patens, S. tortuosum—s. Pratense, Peucedanum silaus—*s. des Prés*, Peucedanum silaus.

SES'ELI TORTUO'SUM, *Seseli Massilien'sē* seu *an'nuum* seu *patens, Œnan'thē stria'ta rig''ida, Hartwort of Marseilles.* The seeds have a warm taste; and a greater degree of pungency than those of Laserpitium siler, which is the *Seseli* of the Pharmacopœias.

SESQUI. This word, joined with any number, weight, measure, &c., signifies one and a half; as *sesquigranum*, 'a grain and half.'

SESQUIUNCIA, Sescuncia.

SETA EQUI'NA, 'a horse's hair.' *Hairworm, Helmin'thus Gor'dii.* A kind of worm, found in stagnant water, from 4 to 6 inches long, and twisted into various knots and contortions; colour pale-brown, with dark extremities. It is common in the intestines of the Laplanders; causing the *Col'ica Lappon'ica*, in which the gripings are, at times, exceedingly severe.

SETA'CEUM, *Seto, Seton*, from *seta*, 'a bristle.' A long strip of fine linen or cotton twist, passed through the skin and areolar membrane, to keep up an issue; or through suppurating cavities, between the fragments of fractured bones, &c., to fulfil certain indications. The term is, also, applied to the issue so established. The operation is simple. It consists in laying hold of a fold of skin, and passing a seton-needle through it, with the thread attached. Every day a fresh portion of the thread is drawn through the sore. Setons are established in many diseases;—in obstinate ophthalmiæ, cephalalgiæ; epilepsy, thoracic and abdominal affections, &c.; but they are not as much used as formerly.

SETARIA ROCCELLA, Lichen roccella.

SETFAST, see Furunculus.

SETO, Setaceum.

SETON, Setaceum.

SETTERWORT, Helleborus fœtidus.

SEVADILLA, Veratrum sabadilla.

SEVATIO, Steatoma.

*SÈVE*, Sap.

*SÉVRAGE*, Weaning.

SEVUM, Pinguedo.

SEVUM, *Sebum, Sepum, Stear, Adeps ovil'li, Sevum verveci'num.* Suet, mutton suet; Pinguedo.

SEVUM PRÆPARA'TUM, *Sevum* (Ph. U. S.),—*Ovil'li Sevum Præpara'tum, Prepared Suet*, (F.) *Graisse de Mouton, Suif*, is formed by cutting suet in pieces; melting over a slow fire, and straining through linen. It is emollient,

and is sometimes boiled in milk (℥ij to Oj), and is used in diarrhœa and dysentery. Its principal employment is in the formation of plasters.

SEVUM VERVECINUM, Sevum.

SEX, *Sexus, Genos, Physis.* The physical difference between male and female in animals and vegetables; — as the *Male sex, Sexus po'tior* seu *for'tior* seu *viri'lis;* and the *Female sex, Sexus seq'uior, S. mulie'bris, Alter Sexus,* '*The Sex.*'

SEXTANS, *Sexta pars libræ.* The sixth part of a pound. — Galen.

SEXTA'RIUS. An ancient measure for liquid and solid substances. See Weights and Measures.

SEX'TULA, *Hexagium,* '*ἑξαγιον.* The sixth part of an ounce.

SEX'UAL, *Sexua'lis,* from *sexus,* '*sex.*' That which relates to the sex; which characterizes the sex.

SEXUAL DISEASES, *Morbi sexua'les,* are the diseases of the genital organs; as SEXUAL FUNCTIONS are the genital functions.

SEXUAL INTERCOURSE, Coition — s. Organs, Genital organs.

SEXUS, Sex — s. Alter, see Sex — s. Fortior, see Sex — s. Muliebris, see Sex — s. Potior, see Sex — s. Sequior, see Sex — s. Virilis, see Sex.

SEYDSCHÜTZ WATER, Sedlitz water.

SHALLOT, Echalotte.

SHAMPOO'ING, *Massing,* (F.) *Massage, Massement.* A Hindoo process, which consists in pressing the body of the bather in a peculiar manner; cracking the various joints, and employing blows and friction.

'Kneading' consists in pressing alternately upon a part of the body to arouse the muscles to more energetic action. It is employed at times in dyspepsia.

SHAMROCK, INDIAN, Trillium latifolium — s. Water, Menyanthes verna.

SHANKER, *Chancre.*

SHARON SPRINGS, NEW YORK. These springs, which are situate about 10 or 12 miles south of Canajoharie, N. Y., and 45 miles west of Albany, are much frequented. They contain, according to the analysis of Dr. Chilton, sulphate of magnesia, sulphate of lime, chloride of sodium, chloride of magnesium, sulphohydrate of sodium, sulphohydrate of calcium, vegetable extractive matter, and free sulphohydric acid gas. Their temperature is 48° Fahr.

SHEATH, Vagina.

SHEEP POISON, Kalmia latifolia.

SHELLBARK, see Hickory.

SHELL FLOWER, Trillium latifolium — s. Liquid, see Calcis murias — s. Membrane, Membrana testæ.

SHEPHERD'S PURSE, Thlaspi bursa.

SHERBET, Scherbet — s. Orange, see Syrupus aurantii.

SHERMAN'S WORM LOZENGES, see Worm lozenges, Sherman's.

SHERRY, Sack, see Wine.

SHIELD, WATER, Nelumbium luteum.

SHIN, *O'crea, Crista tib'iæ.* The *spine* or anterior part of the tibia or leg. It is, also, called *Anticne'mion,* and *Crea.*

SHINGLES, Herpes zoster.

SHIP FEVER, see Typhus.

SHOCK, see Concussion.

SHORT, Sax. ɣceopt, from ɣcipan, '*to cut, to shear,*' *shored, shor'd, short,* (F.) *Court.* A word used, by anatomists, in opposition to *long;* and to distinguish parts from each other that have otherwise the same name.

SHORT BONES, for example, are those in which the three dimensions — length, breadth, and thickness — are nearly alike; such are the vertebræ, bones of the carpus, tarsus, &c.

SHORT RIBS, see Costa.

SHORTSIGHTED, Myopic.

SHORTSIGHTEDNESS, Myopia.

SHORTWINDED, Pursy.

SHOTBUSH, Aralia spinosa.

SHOULDER-BLADE, Scapula.

SHOVEL PICKEREL WEED, Unisema deltifolia — s. Pond, Unisema deltifolia.

SHOW, see Parturition.

SHOW-CHOO, see Spirit.

SHOWER-BATH, see Bath.

SHRUB, perhaps, from Arabic, *sharab,* '*syrup.*' A compound of spirits, lemon-juice, and sugar.

SHRUB, SWEET, Calycanthus — s. Sweet-scented, Calycanthus.

SHUD'DERING, *Frem'itus, Phryag'ma,* from (G.) Schauder, Schauer, (F.) *Frémissement, Tressaillement.* A peculiar sensation, felt either externally or internally; and which seems to be the result of a spasmodic movement of the parts in which it occurs. A slight feeling of cold sometimes accompanies it. It is, at times, the result of a moral cause, and is often the precursor of shivering.

SHUMAC, Rhus coriaria.

SIAGANTRI'TIS, from *σιαγων,* '*the jaw,*' *αντρον,* '*a cavity,*' and *itis,* denoting inflammation. Inflammation of the lining membrane of the antrum of Highmore.

SIAGON, Maxillary bone.

SIAGO'NAGRA, from *σιαγων,* '*the jaw,*' and *αγρα,* '*a seizure.*' *Arthri'tis maxilla'ris.* A gouty or rheumatic affection of the joint of the lower jaw.

SIALACHUS, Salivation.

SIAL'AGOGUE, *Sialago'gus, Sial'ogogue, Ptyal'agogue, Ptyas'magogue, Sali'vans, Saliva'tum, Sialocinet'icus, Apophlegmat'isans per os,* (F.) *Salivant;* from *σιαλον,* '*saliva,*' and *αγω,* '*I expel.*' That which provokes the secretion of saliva. Pyrethrum and mercury are sialogogues. Sialagogues may be of two kinds, — those which act through the circulation, and those which act immediately on the salivary organs. Mercury belongs to the former, — pyrethrum to the latter class. The chief sialagogues are armoraci, calamus, mezereum, pyrethrum, tabacum, and zingiber.

SIAL'ICA, from *σιαλον,* '*saliva.*' Medicines, which affect the salivary glands. — Pereira.

SIALISMUS, Salivation.

SIALOCINETICUS, Sialagogue.

SIALOLITHI, Calculi, salivary.

SIALOLOG''IA, from *σιαλον,* '*saliva,*' and *λογος,* '*a discourse.*' A treatise on saliva.

SIALOMA, Saliva.

SIALON, Saliva.

SIALORRHŒA, Salivation.

SIALOS'CHESIS, from *σιαλον,* '*saliva,*' and *σχεσις,* '*retention.*' Retention or suppression of the saliva.

SIALOSYRINGES, Salivary fistulæ.

SIALOZEMIA, Salivation — s. Mercurialis, Salivation, mercurial.

SIAMESE TWINS, see Twins, Siamese.

SIBARE, Phrenitis.

SIBBENS, *Sivvens, Frambœ'sia Sco'tica.* An infectious disease in the mountainous parts of Scotland, viewed to be of the venereal kind. *Sivin,* in the Keltic, means raspberry; and it is said that, in this affection, fungi appear like raspberries. From *sivin,* the inhabitants have made *sievin, sibben, sibbens,* and *sivvens.* By some, this affection is regarded as a complication of the

venereal and itch. In the Orkneys, *sibbens* means itch. — Jamieson.

SIBILANT, *Sib'ilus, Sib'ilans*, from *sibilo*, 'I hiss or whistle.' Making a hissing or whistling sound. See *Râle sibilant.*

SIBILISMUS AURIUM, Tinnitus aurium.

SIBILUS AURIUM, Tinnitus aurium.

SICCAN'TIA, from *siccare*, 'to dry.' *Xeran'tica*, (F.) *Siccatifs.* Drying medicines. — Galen.

Siccantia, Desiccativa.

*SICCATIFS*, Siccantia.

SICCATIO, Drying.

SICCHA'SIA, *σικχασια*, 'disgust.' A distressing disgust for food; such as is experienced by women with child.

SICIL'ICUM. A Roman weight of about two drachms.

SICK, Sax. ꝑeoc, *Æger, Ægro'tus, Nos'cros, Noso'des, Jacens, Laborio'sus, Laborans*, (F.) *Malade.* Labouring under disease. Such is its acceptation in old English, and generally in the United States. In England, it most commonly means,—affected with disorder of the stomach or nausea.

A sick person, *Æger, Ægro'tus*, (F.) *Malade*, who is under the charge of a physician is said to be a *patient*, or the patient of the physician. At times, but rarely, patient is used for a sick person in the abstract.

Sick Stomach, Milk sickness.

SICKLY, *Morbo'sus, Valetudina'rius, Adyn'atos, Nosac'eros, Noso'des, Morbose*, (F.) *Maladif.* One who is subject to be sick, or is in feeble health.

SICKNESS, Disease — s. Falling, Epilepsy — s. River, Milk sickness — s. of the Stomach, Vomiting — s. Swamp, Milk sickness.

SICLIUM, Sicilicum.

SICUA, Cupping-glass.

SICULA, Beta, Penis.

SICYEDON, Cauledon.

SIDA ABUTILON, Abutilon cordatum.

SIDE, PAIN IN THE, Pleurodynia.

SIDERA'TIO, *Sydera'tio, Sidera'tion*, from *sidus*, 'a star;' because the condition was thought to be produced by the influence of the stars. The state of one struck suddenly, without apparent cause, and as if by the influence of the stars or planets—*Planet-struck.* The ancients comprised, under this name, different morbid conditions, such as paralysis, apoplexy, and gangrene.

Sideratio, Apoplexy, Asphyxia, Phrenitis — s. Ossis, Spina ventosa.

SIDERATION, Astrobolismos, Sideratio.

SIDERION, Ferramentum.

SIDERITES, Magnet.

SIDERITIS, Magnet, Teucrium chamæpitys.

SIDEROS, Ferrum.

SIDEROXYLON, Chrysophyllum cainito.

SIDHEE, see Gunjah.

SIDMOUTH (CLIMATE OF). Sidmouth is in Devonshire, England, on the sea-beach, at the mouth of the Sid. It is much frequented by invalids, both during the summer and winter. The climate is, however, damp, and subject to sea-fogs.

*SIÈGE*, Anus.

SIELISMOS, Salivation.

SIELON, Saliva.

SIEVE, see Cribration — s. Drum, see Cribration.

*SIFFLEMENT* (F.), from *siffler*, 'to whistle.' Whistling.

*SIFFLEMENT MODULÉ, Chant des artères, Bruit musical*, 'modulated whistling, or music of the arteries.' A kind of sound heard on auscultation, resembling, at times, the humming of certain insects.

The sound is chiefly met with in those labouring under chlorosis.

SIGAULTIAN SECTION, Symphyseotomy.

SIGE, Taciturnity.

SIGH, Suspirium.

SIGHT, Vision — s. Askew, Dysopia lateralis — s. False, Metamorphopsia, Pseudoblepsia — s. Feebleness of, Amblyopia.

SIGILLUM SALAMONIS, Convallaria polygonatum — s. Virginitatis, Hymen.

SIGMATOID, Sigmoid.

SIGMOID, *Sigmoid'al, Sig'matoid, Sigmoï'des, Sigmo'des, Sigmoï'deus.* That which has the form of the Greek S or C; from sigma, and *εἰδος*, 'resemblance.'

Sigmoid Cartilages, Semilunar cartilages.

Sigmoid Cavities or Fossæ of the Ulna, (F.) *Cavités ou Fosses sigmoïdes*, are two notches at the upper part of that bone,—one for the reception of the humerus; the other for that of the radius.

Sigmoid Flexure of the Colon, *Flexu'ra sigmoï'dea*, is a turn the colon takes immediately before its termination in the rectum.

Sigmoid or Semilunar Valves, *Valvulæ Sigmoï'dea, Proces'sus Sigmoï'des*, (F.) *Valvules sigmoïdes* ou *semilunaires*, are three valvular folds, at the commencement of the pulmonary artery and aorta. These valves have the form of a crescent, when applied against the parietes of the vessel. When the blood is sent from the ventricles by their contraction, the valves are applied against the sides of the vessel; but, during the diastole of the ventricle, they are depressed, and prevent the blood from returning to the heart. At the middle of the convexity of each valve is a small, hard, triangular granulum, called *Corpus'culum* seu *Glob'ulus Aran'tii*, which completely closes up the passage. It is, also, called *Corpusculum Morgagn'ii*, and *C. Sesamoï'deum*, (F.) *Globule d'Arantius.*

SIGN, *Signum, Semi'on*, (F.) *Signe.* Any present or past circumstance, afforded by the examination of a patient, or of matters concerning him, whence a conclusion may be drawn regarding the nature and seat of his disease. The phenomena which precede the disease are called *anamnes'tic* or *commem'orative signs*;—those which accompany it are termed *diagnos'tic*, if they reveal the nature or seat of the disease, —*prognos'tic*, when they indicate its probable duration and termination.

SIGNA ASSIDENTIA, see Assidens.

SIG'NATURE, *Signatu'ra, Signa'tio*, from *signum*, 'a sign;' *Episphagism'os.* This term was applied in the Eastern countries, in the middle ages, to mystic characters of good or bad augury, with which it was pretended that every one was marked by the star under which he was born.

Signatures of Plants meant certain peculiarities in their external formation or colour, which indicated that they were adapted for particular diseases:—as in the case of the *Lungwort, Liverwort*, &c.

*SIGNES AVANT-COUREURS*, Precursory signs—*s. Précurseurs*, Precursory signs.

SIGNUM, see Parturition — s. Characteristicum, see Pathognomonic — s. Conjunctum, see Pathognomonic — s. Diacriticum, see Diacritica sigma—s. Morbi essentiale, see Pathognomonic.

SILACH, *Silac.* An Arabic word, used to designate thickening of the eyelids, *Crassit'ies Palpebra'rum*; and, also, *Alopecia.*—Forestus, Stephanus.

*SILENCE*, see Murmur, respiratory.

SILENE CRASSIFOLIA, Cucubalus behen—

s. Inflata, Cucubalus behen — s. Thorei, Cucubalus behen.

Sile'nē Virgin'ica, *Ground Pink, Wild Pink, Catch Fly.* The root has been employed, in decoction, as an efficacious anthelmintic.

SILER LANCIFOLIUM, Laserpitium siler — s. Montanum, Laserpitium siler.

SIL'IQUA, *Cera'tion;* the carat. A weight of about four grains. A pod.

Siliqua Arabica, Tamarindus—s. Araci aromatici, see Vanilla — s. Banillæ, see Vanilla — s. Dulcis, Ceratonium siliqua—s. Vanigliæ, see Vanilla—s. Vanilliæ, see Vanilla.

SILIQUASTRUM PLINII, Capsicum annuum.

SILK, Sericum — s. Weed, Asclepias Sullivantii, Asclepias tuberosa—s. Weed, common, Asclepias Syriaca — s. Worm, see Sēricum.

*SILLON,* Sulcus — *s. Horizontal de la veine ombilicale,* see Liver — *s. Transversale,* see Liver — *s. de la Veine cave inférieur,* see Liver — *s. de la Veine porte,* see Liver.

SILO, Camus.

SILPHIUM, Laserpitium.

Sil'phium Perfolia'tum, *Cup Plant, Turpentine Sun Flower,* and

Silph'ium Terebinthina'ceum, *Pra'irie Burdock, Rosin Weed; Nat. Order,* Compositæ; indigenous in Ohio and Michigan, and flowering from July to September; yield a fragrant gum, which is esteemed stimulant and antispasmodic.

SILUS, Camus.

SILVER, Argentum—s. Ammonio-chloride of, see Argentum — s. Chloride of, see Argentum — s. Chloruret of, see Argentum—s. Cyanide of, see Argentum — s. Cyanuret of, see Argentum — s. Iodide of, see Argentum — s. Ioduret of, see Argentum—s. Leaf, Magnolia macrophylla—s. Muriate of, see Argentum — s. Nitrate of, Argenti nitras — s. Oxide of, see Argentum — s. and Ammonia, Chloride of, see Argentum — s. and Ammonia, Chloruret of, see Argentum.

SILYBUM, Carduus marianus—s. Maculatum, Carduus marianus — s. Marianum, Carduus marianus.

SIMAROUBA, Quassia simarouba — s. Bitter, Quassia simarouba—*s. Faux,* Malpighia mourella.

SIMARUBA, Quassia simarouba.

Simaruba Cedron. A South American tree, the seeds of which — *cedron seeds* — have been used as an antidote for snake-bites. They have, also, been proposed in mental diseases and in epilepsy. The scrapings of the wood have been used as a substitute for sulphate of quinia.

Simaruba Officinalis, Quassia simarouba.

SIMILATIO, Assimilation.

SIMITIUM, Plumbi subcarbonas.

SIMO, Camus.

SIMONEA FOLLICULORUM, Acarus folliculorum.

SIMOTRACHELUS, Bysauchen.

SIMPLES. Medicinal herbs. One skilled in simples is called a *Simplist,* a *Rhizot'omist.*

SIMPLIST, see Simples.

SIMULATED DISEASES, Feigned diseases.

SIMULATI MORBI, Feigned diseases.

SIMUS, Camus.

SINA LEVANTICA, Artemisia santonica.

SINAPELÆ'ON, from σιναπι, 'mustard,' and ελαιον, 'oil.' Oil impregnated with mustard.

SINAPI, Sinapis.

SINA'PIS, *Sinapis nigra* seu *cer'nua* seu *Oliveria'na, Brassica nigra, Napus, Eru'ca, Sina'pē, Sina'pi, Na'pium, Napy, Common Black Mustard,* (F.) *Moûtarde noire, Sénevé, Sanve. Family,* Cruciferæ. *Sex. Syst.* Tetradynamia Siliquosa. The seeds are inodorous, when entire; but, when bruised, the odour is very pungent; taste bitterish and acrid. They yield their virtues to water, and afford a bland oil by expression. The seeds are stimulant, diuretic, emetic, and rubefacient. They are sometimes recommended to be swallowed whole, in dyspepsia, torpor of the bowels, &c. Externally, they are applied in the form of cataplasm. See Sinapism.

Sinapis Alba, *S. folio'sa, Bonannia officina'lis, White Mustard, Napus Leucosina'pis,* is also used medicinally. It is somewhat less pungent than the black. The distilled oil—*Oleum Sinapis*—is a powerful stimulant and rubefacient.

*Whitehead's Essence of Mustard* consists of *oil of turpentine, camphor,* and a portion of *spirit of Rosemary:* to which is added a small quantity of *flour of mustard.* It is a celebrated embrocation for rheumatism, &c.

*Whitehead's Essence of Mustard Pills* consist of *yellow resin* and *balsam of tolu* enough to make into pills.

*Mustard Whey* is made by taking bruised *mustard seeds* ℥ss, and *milk* Oj. Boil together until the milk is curdled, and strain.

This whey is used in dropsy.

Sinapis Arven'sis, *S. Timoria'na, Charlock, Wild Mustard,* has the seeds sometimes substituted for black mustard.

Sinapis Cer'nua, Sinapis — s. Eruca, Brassica eruca—s. Foliosa, S. alba—s. Oliveriana, Sinapis —s. Tamoriana, S. arvensis — s. Tuberosa, Brassica rapa.

SINAPISIS, Bole Armenian.

SIN'APISM, *Sinapis'mus,* from σιναπι, 'mustard.' A cataplasm, of which mustard forms the basis, which is used for exciting redness, and acting as a counter-irritant. It is prepared by mixing flour of mustard and vinegar together to the due consistence. See Cataplasma sinapis.

SIN'CIPUT, *Sincip'ital Region, Bregma, Synciput, Mesocra'nium, Mesoc'ranum, Hemicephalæ'um, Hemicephal'ium, Hemiceph'alum;* the top of the head. The French use it synonymously with *vertex.* By some it is applied to the frontal region or fore-part of the cranium. The parietal bones have been called *sincipital bones, Ossa sincip'itis,* (F.) *Os du sinciput.*

*SINDON,* σινδων, very fine linen. A small piece of rag, or a round pledget, supported by a thread at its middle, and introduced into the opening in the cranium made by the trephine.

SINEW, Tendon.

SINGLETON'S GOLDEN OINTMENT is formed of *sulphuret of arsenic* (realgar,) and *lard* or *spermaceti ointment.*

SINGULT'OUS, *Lygmo'des, Lygo'des, Lyngo'des, Lynggo'des;* from *Singultus,* 'hiccough.' Relating to or affected with hiccough.

SINGULT'US, *Lynx, Lygmus, Spasmolyg'mus, Clonus singul'tus, Pneusis singul'tus, Hiccough, Hiccup,* (F.) *Hoquet.* A noise made by the sudden and involuntary contraction of the diaphragm, and the simultaneous contraction of the glottis, which arrests the air in the trachea. It is a symptom of many morbid conditions, and especially of gangrene, but occurs, frequently, in persons otherwise in good health.

SIN'ISTRAD, from *sinister,* 'to the left hand.' A term used by Dr. Barclay, adverbially, to signify 'towards the sinistral aspect.' See Mesial.

SINISTRAL ASPECT, see Mesial.

*SINUEUX,* Sinuous.

SINUOSITAS, Sinus.

SIN'UOUS, *Sinuo'sus,* (F.) *Sinueux,* from *sinus,* 'a bay or curve.' An epithet given to certain ulcers, and especially to certain fistulæ, which are tortuous.

SINUS, *Sinuo'sitas, Colpos, Abscon'sio, Eurycho'ria, Reces'sus,* (F.) *Golfe.* Any cavity, the interior of which is more expanded than the en-

trance. In this sense, anatomists have applied the term to cavities in certain bones of the head and face. It has been, also, applied to certain venous canals, into which a number of vessels empty themselves; such as the sinuses of the dura mater and of the spine; the sinus of the vena porta; uterine sinuses, &c.;—and to the bosom.

In *surgery*, it means a long, narrow, hollow track, leading from some abscess, diseased bone, &c., (F.) *Clapier*.

Sinuses of bones form part of the nasal cavities. They are the frontal, sphenoidal, maxillary, &c. The name has also been given, occasionally, to the ethmoid and mastoid cells.

Sinus Acusticus, Auditory canal, internal — s. Ampullaceus, Cavitas elliptica — s. Aortici, Sinuses of Valsalva—s. Arteriosus, S. pulmonalis—s. Basilar, Sinus transversus—*s. Caverneux*, Cavernous sinus — s. Cavernosi uteri, Sinus uterini—s. Cavernosus, Cavernous sinus — s. Cerebri, Ventricles of the brain — *s. Choroïdien*, S. quartus—s. Circular, of Ridley, Sinus coronarius — s. Circularis, S. coronarius — *s. Coronaire du cœur*, see Cardiac veins.

Sinus Corona'rius, *Sinus circula'ris, S. circula'ris Ridleyi, Circular sinus of Ridley, Cor'onary sinus*. A venous canal, which surrounds, in a more or less regular manner, the pituitary fossa and gland, emptying itself into the corresponding cavernous sinus by each of its extremities.

Sinus, Coronary, Sinus coronarius — s. Coronary of the heart, Sinus coronary, venous.

Sinus Coronary, Venous, *Coronary sinus of the heart*. A name given, on account of its great size, to that portion of the great coronary vein which embraces the left auriculo-ventricular furrow.

Sinus Coxæ, see Cotyloid—*s. Droit*, S. quartus.

Sinus Dexter Cordis, *Sinus vena'rum cava'rum, S. veno'sus, Saccus vena'rum cava'rum*. The right auricle of the heart: — *A'trium cordis dextrum*. See Auricula.

Sinuses of the Dura Mater, *Sinus* seu *Fis'tulæ* seu *Cavita'tes* seu *Ventric'uli* seu *Tu'buli* seu *Sanguidue'tus* seu *Receptac'ula Duræ matris*, are formed by a separation of the layers of the dura mater, which acts as a substitute for the outer membrane of veins. Bichat admits only four great sinuses, of which all the others seem to be dependencies;—the *two lateral sinuses*, the *straight sinus*, and the *longitudinal sinus*. To the lateral sinuses belong, — the *petrous sinuses*, superior and inferior; the *transverse sinus*; the *cavernous sinuses*; the *coronary sinus*, and the *occipital sinuses*. To the straight sinus belongs the *inferior longitudinal*. The longitudinal sinus, properly so called, has no sinus under its dependence.

Sinus Falciformis Inferior, S. longitudinal, inferior—s. Falciformis superior, S. longitudinal, superior—s. Fourth, Torcular Herophili—s. Genæ pituitarius, Antrum of Highmore—s. of the Jugular vein, see Jugular veins — s. Lacrymalis, Lachrymal sac.

Sinuses of the Larynx, Ventricles of the larynx.

Sinuses, Lat'eral, *Sinus transver'si, S. magni, S. latera'les*, (F.) *Sinus latéraux*. Each of these sinuses, distinguished into right and left, begins at the torcular Herophili, or confluence of the sinuses, and terminates at the sinus of the jugular vein.

*SINUS LATÉRAUX*, Sinuses, lateral.

Sinuses, Longitu'dinal, *S. Longitudina'les*. These are two in number. 1. Superior Longitudinal Sinus, *S. falcifor'mis superior, S. triangula'ris, Sinus médian*, (Ch.) A long, triangular canal; convex above, concave below; which occupies the whole of the upper edge of the falx cerebri. It is broad behind, and much narrower before, where it commences by a *cul-de-sac*, at the cristi galli of the ethmoid bone. It passes along the frontal or coronal crest, sagittal suture, and the vertical groove of the occipital bone. It receives several veins from the dura mater; and all those that are spread over the convex and plain surfaces of the two hemispheres of the brain. It discharges itself into the upper part of the torcular Herophili. 2. Inferior Longitudinal Sinus, *Sinus falcifor'mis inferior, Vena falcis cer'ebri*. This is much narrower than the last, and occupies the inferior edge of the falx cerebri, from its anterior third to the tentorium cerebelli, where it terminates, commonly by two branches, in the straight sinus.

Sinus Magni, Sinuses, lateral — s. Maxillary, Antrum of Highmore — *s. Médian*, Sinus longitudinal superior — s. Median, see Semicircular canals — s. Muliebris, Vagina.

Sinus, Occip'ital, *Sinus occipita'lis*. These sinuses commence at the sides of the foramen magnum ossis occipitis, and ascend — becoming broader and nearer each other — into the substance of the falx cerebelli, where they frequently unite. Each opens into the inferior part of the torcular Herophili. They receive the veins of the falx cerebelli, of the dura mater which lines the fossæ cerebelli, and of the posterior part of the cerebellum. Haller and Sömmering have given them the name of *posterior occipital sinuses*, to distinguish them from the transverse sinus, which they have called *anterior occipital sinus*.

Sinus Occipitalis Anterior, Sinus transversus—s. Ophthalmic, see Cavernous sinus—s. Perpendicularis, S. quartus — s. Pituitarii frontis, Frontal sinuses — s. Pocularis, see Ejaculatory ducts—s. Polymorphus, Cavernous sinus—s. Portarum, see Liver.

Sinus, Prostat'ic, *Sinus prostat'icus*. A fossa on each side of the verumontanum, in which are seen the numerous openings of the ducts of the prostate.

Sinus Pudendi, Vagina — s. Pudoris, Vagina, Vulva.

Sinus Pulmonales, Sinuses of Valsalva.

Sinus Pulmona'lis, *S. sinis'ter cordis, A'trium cordis sinis'trum, S. vena'rum pulmona'lium, S. arterio'sus, Saccus vena'rum pulmona'lium*. The left auricle of the heart. See Auricula.

Sinus of the Pulmonary Veins, Auricle, left.

Sinus Quartus, *S. perpendicula'ris*, (F.) *Sinus choroïdien* (Ch.), *Sinus droit, Straight sinus*. This sinus—triangular throughout; wide posteriorly; narrower anteriorly; slightly oblique downwards and backwards—passes along the base of the falx cerebri, from the termination of the inferior longitudinal sinus to the torcular Herophili. It receives the inferior longitudinal sinus, the veins of the lateral ventricles or *venæ Galeni*, the superior cerebellous veins, &c.

Sinus Renum, Pelvis of the kidney—s. Rhomboideus, see Ventricles of the brain — s. of the Septum lucidum, Ventricle, fifth—s. Sinister cordis, S. pulmonalis — s. Sphenoidalis, Cavernous sinus — s. Straight, S. quartus — s. Superciliares, Frontal sinuses—s. Terminalis, Circulus venosus —s. Transversi, Sinuses, lateral.

Sinus Transver'sus, *S. occipita'lis antc'rior, Bas'ilar sinus*. This sinus lies transversely at the anterior part of the basilary process of the occipital bone. It forms a communication between the two petrous sinuses, and the cavernous sinus of one side, and those of the other. Its breadth is commonly very great. It is situate between two layers of the dura mater, and presents, internally, a kind of cavernous tissue.

Sinus Triangularis, S. longitudinal, superior —s. Urogenitalis, Urogenital sinus.

Sinus Uteri'ni, *Sinus caverno'si U'teri, U'terine sinuses.* A name given to cavities, formed by the uterine veins in the substance of the uterine parietes. They are very large during pregnancy.

Sinus Utriculosus, see Semicircular canals—*s. des Vaisseaux séminifères,* Corpus Highmori.

Sinuses of Valsal'va are three depressions in the aorta—*Sinus aor'tici*—and pulmonary artery—*Sinus pulmona'les*—immediately opposite the semilunar valves. Their use is to leave the edges of the valves free, so that they can be caught by the refluent blood. Where the aorta is about to send off the first of its large branches, at the top of the thorax, it is of great size, and has been called the *Large sinus of Valsalva.*

Sinus of the Vena Cava, Auricle, right—s. Venarum cavarum, S. dexter cordis—s. Venarum pulmonalium, S. pulmonalis—s. Venosus, S. dexter cordis.

Si'nuses, Ver'tebral, (F.) *Sinus vertébraux.* Two great venous sinuses, different from those of the dura mater, which extend the whole length of the vertebral canal, from the occipital foramen to the end of the sacrum, behind the bodies of the vertebræ, before the dura mater, and at the sides of the posterior vertebral ligament. At their inner side they communicate with each other by means of branches, which form true *transverse sinuses.* They are situate at the middle of the body of each vertebra, passing under the posterior vertebral ligament. They receive, at their middle part, the veins that arise in the spongy tissue of the vertebræ. By their external side, the vertebral sinuses communicate with the posterior branches of the vertebral, intercostal, and lumbar veins. At their posterior side they receive the veins, which creep on the prolongation of the dura mater that envelops the marrow.

Sinus Vulvæ, Rima vulvæ.

SIPEERI, Bebeeru.

SIPEERINE, see Bebeeru.

SIPHAR, Peritoneum.

SIPHILIS, Syphilis.

SIPHITA, Somnambulism—s. Parva, Chorea.

SIPHO, Siphon—s. Urinæ, Diabetes.

SIPHON, *Sipho,* σιφων, 'a tube.' A bent tube, whose limbs are of unequal length, employed in pharmacy for transferring liquids from one vessel to another. With this view, the shorter limb is plunged into the fluid; and air is sucked from the extremity of the lower limb. The pressure of the atmosphere forces the fluid through the tube; and the flow will continue as long as the extremity of the longer limb is below the level of the fluid in which the shorter limb is immersed.

An exhausting syringe is, at times, attached to the longer extremity of the siphon by means of which the air can be drawn from it.

Siphon, Plunging. An instrument, used in pharmacy for obtaining a specimen,—at times, a measured specimen,—of any liquid. With this view, the instrument is immersed into liquid, and allowed to remain there until full. The opening at the top is then closed with the thumb; and the contents, thus removed, are allowed to flow out by removing the thumb and permitting the entrance of air. It is a form of the *pipette.*

SIPHONIA CAHUCHU, see Caoutchouc—s. Elastica, see Caoutchouc.

SIPHUNCULUS, Syringe.

SIRA, Orpiment.

SIRENS, Symmeles.

SIRIASIS, *Coup de Soleil,* Insolation, Phrenitis—s. Ægyptiaca, *Coup de Soleil.*

SIRIUM MYRTIFOLIUM, Santalum album.

SIRIUS, Canicula.

*SIROP DE CAPILLAIRE,* see Adiantum capillus veneris—*s. de Coralline,* see Corallina Corsicana.

SIRUP, Syrup.

SISON AMMI, *Æthu'sa ammi, Cnid'ium tenuifolium, Pimpinella laterifo'lia, Scs'eli fœniculifo'lium. Family,* Umbelliferæ. *Sex. Syst.* Pentandria Digynia. The plant that affords the *Ammi verum* of the shops; (F.) *Ammi des Boutiques.* The seeds—*Semen Am'mios cretici* seu *veri*—were once used as a carminative.

Sison Amo'mum, (F.) *Amome faux,* is considered to be excitant and diuretic. It is the *field honewort.*

Sison Anisum, Pimpinella anisum—s. Podagraria, Ligusticum podagraria.

SISTENS, Epischeticus.

SISYMBRIUM ALLIARIA, Alliaria—s. Barbarea, Erysimum barbarea—s. Erucastrum, Brassica eruca—s. Menthastrum, Mentha aquatica.

Sisym'brium Nastur'tium, *Nasturtium aquat'icum* seu *officina'lē, Laver odora'tum, Crateva'sium, Cressi, Cardami'nē fonta'na* seu *nastur'tium, Water Cress,* (F.) *Cresson de fontaine. Family,* Cruciferæ. *Sex. Syst.* Tetradynamia Siliquosa. Water-cresses are commonly used in salad. They have obtained a place in the materia medica for their antiscorbutic qualities.

Sisymbrium Officinale, Erysimum—s. Parviflorum, S. sophia.

Sisymbrium So'phia, *S. parvifio'rum, Herb Sophia, Sophia Chirurgo'rum, Flix* or *Flux-weed,* (F.) *Sagesse des Chirurgiens.* It was once reputed to be anthelmintic, and valuable in hysterical affections. It is not used.

Other species of *Nasturtium,* as N. Palus'trē. *Marsh water-cress;* and *N. amphib'ium, Water-radish,* possess similar virtues with Nasturtium officinale.

SISYRIN'CHIUM BERMUDIA'NUM, *Blue-eyed grass, Lily grass, Physic grass, Scurvy grass;* indigenous; *Order,* Iridaceæ; flowering from June to August. Used as a cathartic by the Thompsonians. A decoction of the root is acrid and cathartic.

SITICULOSUS, Dipsodes, see Alterative.

SITIENS, Dipsodes.

SITIS, Thirst—s. Intensa, Polydipsia—s. Morbosa, Polydipsia.

SITKA, MINERAL WATERS OF. See Archangel, New, mineral waters of.

SITOS, Aliment.

SITUS ANOMALUS seu PERVERSUS INTESTINORUM, Splanchnectopia—s. Mutatus, see Monster.

SITZBATH, see Bath, half.

SIUM, *Sium nodiflo'rum* seu *angustifo'lium* seu *Ber'ula* seu *erec'tum* seu *inci'sum, A'pium sium, Ber'ula angustifo'lia, Ber'ula, Creeping Water-parsnep,* (F.) *Berle nodiflore. Family,* Umbelliferæ. *Sex. Syst.* Pentandria Digynia. It is stimulant, and supposed to be diuretic and lithontriptic. It is, sometimes, employed in cutaneous eruptions.

Sium Angustifolium, S. nodiflorum—s. Apium, Apium graveolens—s. Berula, S. nodiflorum—s. Bulbocastanum, Bunium bulbocastanum—s. Carvi, Carum—s. Erectum, S. nodiflorum—s. Graveolens, Apium graveolens—s. Incisum, S. nodiflorum.

Sium Latifo'lium is the common *Water-parsnep* of the United States. It is said to be poisonous.

Sium Ninsi. The plant whose root is called *Radix Ninsi, Ninzin, Nindsin.* This root was long supposed to be the same as ginseng, and it possesses similar, though weaker properties.

Sium Silaus, Peucedanum silaus.

Sium Sis'arum, *Skirret*, is used as a salad in Europe; and has been supposed a useful diet in chest affections.

Sium Vulgare, Ligusticum podagraria.

SIVVENS, Sibbens.

SKELETIA, Emaciation.

SKELETOL'OGY, *Sceletolog''ia*, (F.) *Squelettologie*, from σκελετος, 'a skeleton,' and λογος, 'a discourse.' A treatise on the solid parts of the body. This part of anatomy comprehends *Osteology* and *Syndesmology*.

SKEL'ETON, *Scel'etum*, from σκελετος, *Cadav'er exsicca'tum*; (F.) *Squelette*, *Sceleton*, a dried body; from σκελλω, 'I dry.' The aggregate of the hard parts of the body, or the bones. A skeleton is found in almost all animals, although it may not always be formed in the same manner. In some, as in the crustacea and testacea, it is wholly or partly *external*, *Exo-skeleton*, *Dermo-skeleton*. In others, as in birds, the mammalia, &c., it is *internal*, *Endo-skeleton*, *Neuro-skeleton*. It serves as a support for other organs. On it the general shape of the body and of its various parts is greatly dependent. When the bones are united by their natural ligaments, the skeleton is said to be *natural*, *Scel'etum natura'lē*; when articulated by means of wires, *artificial*, *Scel'etum artificia'lē*.

SKELETOPŒ'IA, *Sceletopœ'a*, *Sceletew'sis*, from σκελετος, 'a skeleton,' and ποιεω, 'I make.' The part of practical anatomy which treats of the preparation of bones, and the construction of skeletons. Bones are prepared to exhibit their conformation, structure, chymical composition, mode of development, and changes; the different cavities formed by the union; and to demonstrate their connexions, relations, modes of union, &c.

SKEVISCH, Erigeron Philadelphicum.

SKEVISH, FLEABANE, Erigeron Philadelphicum.

SKIN, Cutis.

SKIN-BOUND DISEASE, Induration of the cellular tissue.

SKIOMACHIA, Sciomachy.

SKIRRET, Sium sisarum.

*SKIRSE*, Scirrhus.

SKOKE, Phytolacca decandra.

SKOLEMORA FERNAMBUCENSIS, Geoffræa vermifuga.

SKUE-SIGHT, Dysopia lateralis.

SKULL, Cranium.

SKULL-CAP, Calvaria, Scutellaria galericulata.

SKUNK-CABBAGE, Dracontium fœtidum.

SKUNK-WEED, Dracontium fœtidum.

SLATE, IRISH, Hibernicus lapis.

SLATERS, Onisci aselli.

SLATKAIA TRAVA, see Spirit.

SLAV'ERING, from *saliva*. *Ptyalis'mus iners*, *Driv'elling*, (F.) *Bave*. Involuntary flow of saliva, from sluggishness of deglutition, without increased secretion. It is seen in the infant, the aged, and the idiot.

SLEEP, Sax. slep; *Somnus*, *Sompnus*, *Sopor*, *Dormit''io*, *Hypnos*, (F.) *Sommeil*. Temporary interruption of our relations with external objects. A repose of the organs of sense, intellectual faculties, and voluntary motion.

The act of quitting this condition is called *awaking*. (F.) *Évigilation*, *Reveil*. Sometimes this is progressive and natural; at others, sudden and starting; (F.) *Reveil en sursaut*,—as in nightmare, affections of the heart, hypochondriasis, &c.

Sleep, Magnet'ic, *Hypno'sis biomagnet'ica*, is the sleep induced by the so called animal magnetism. See Magnetism, animal.

Sleep, Nervous, see Magnetism, animal.

SLEEPLESSNESS, Insomnia.

SLEEP-WALKING, Somnambulism.

SLIACS, MINERAL WATERS OF. Sliacs is a favourite bathing-place in Hungary, a few miles from Neusohl. Some of the waters are cold; others, thermal: the former are carbonated chalybeates; the latter are much used in the same cases as thermal springs in general.

SLING, (G.) Schlinge, *Mitel'la*, *Mit'rium*. A bandage employed to keep the forearm bent on the arm, in cases of injury done to those parts, in fracture of the clavicle, injury of the hands, &c. A handkerchief is often sufficient for this purpose. It must be folded diagonally, and be tied, by the extremities, round the neck. The French surgeons have used many varieties of *Écharpes* or *slings*; as the *Grande écharpe*, *Écharpe moyenne*, *Petite écharpe*, *Écharpe de* J. L. Petit, &c.

SLIPPERS, Impatiens.

SLIT AND TAIL BANDAGE, Invaginated bandage.

SLOE-TREE, Prunus spinosa.

SLOUGH, Eschar.

SLOWS, Milk-sickness.

SLUG, Limax — s. Sea, *Biche de Mer*.

SLUMBER, Somnolency.

SMALLAGE, Apium graveolens.

SMALL-POX, Variola—s. Modified, Varioloid.

SMALT, *Protox'ide of Cobalt*, *Smaltum*, *Safre*, *Azur*, *Blue Starch*. This oxyd has been given in rheumatism, in the dose of ten to twenty grains. A larger quantity excites vomiting.

SMARAG'DUS, (F.) *Émeraude*. The emerald. It was formerly regarded as a tonic.

SMARTWEED, Polygonum punctatum.

SMECTICA, Detergents.

SMECTIS, Cimolia terra.

SMECTRIS, Cimolia terra.

SMEGMA, σμηγμα, from σμηχειν, 'to wipe, to rub off.' Soap, grease, a salve, a liniment. Also, the secretion from the sebaceous follicles of the skin.

Smegma Articulare, Synovia—s. Cutaneum, see Sebaceous glands.

Smegma Præpu'tii. The fatty secretion from the sebaceous follicles of the glans penis.

SMEGMATORRHŒA, Stearrhœa.

SMEGMORRHŒA, Stearrhœa.

SMELL, SENSE OF, Olfaction.

SMELLING, Olfaction.

SMELLOME'S OINTMENT FOR THE EYES, Ceratum resinæ.

SMILAX, Taxus baccata — s. Aspera Chinensis, Smilax China — s. Aspera Peruviana, Smilax sarsaparilla—s. Canellæfolia, S. pseudo-China.

Smilax China, *Smilax as'pera Chinen'sis*. *Family*, Smilaceæ. *Sex. Syst.* Dœcia Hexandria. The root — *China*, *Ch. orienta'lis* seu *pondero'sa* seu *vera*, *Sankira*, *Gauquara*, *China root*, (F.) *Squine*, *Esquine*. Formerly much used in cutaneous and venereal affections.

Smilax Glauca, S. sarsaparilla—s. Hederæfolia, S. pseudo-China — s. Indica Spinosa, Smilax pseudo-China—s. Officinalis, Smilax sarsaparilla.

Smilax Pseudo-China, *Smilax In'dica spino'sa* seu *cancellæfo'lia* seu *hederæfo'lia*, *China occidenta'lis*, *China spu'ria nodo'sa*, *American* or *West India China*. In scrofulous disorders, the root has been often preferred to the oriental kind. In other cases, it possesses similar virtues.

Smilax Sarsaparil'la, *S. officina'lis* seu *glauca*, *Sarsaparil'la*, *Sartaparil'la*, *Smilax as'pera Peruvia'na*, *Sarza*, *Sarsa*, *Carivillan'di*, *Ira Pecan'ga*, *Macapatli*, *Zarza*, *Zarzaparil'la*, (F.) *Salsepareille*. The root of the Sarsaparilla is inodorous; taste bitterish, feculaceous, and fibrous; of a dark colour externally; white within. It is

possessed of diuretic and demulcent properties, and has been often employed in the sequelæ of syphilis; when, after a mercurial course, nocturnal pains, ulceration, &c., continue. It has, also, been advised in scrofula, chronic rheumatism, &c.; but its efficacy is, to say the least of it, a matter of doubt. Dose, ℈j to ʒj of the powder.

SMILE, *σμιλη*. A curved, two-edged bistoury. A knife.

SMILEON, Scalpel.

SMYRNA, Myrrha.

SMYRNISMOS, Embalming.

SMYR'NIUM OLUSA'TRUM, *Hipposeli'num, Smyr'nium, Macero'na, Maccdonis'ium, Herba Alexandri'na, Gri'elum, Agrioseli'num, Alexan'ders, Alsanders.* A plant formerly cultivated for culinary purposes. The seeds are bitter and aromatic, and the roots more powerfully bitter. They have been recommended as resolvents, diuretics, emmenagogues, &c.

SNAGREL, Aristolochia serpentaria.

SNAIL, Limax — s. Shell, Cochlea.

SNAKEHEAD, Chelone glabra.

SNAKEROOT, Garuleum bipinnatum — s. Birthwort, Aristolochia serpentaria — s. Black, Actæa racemosa, Sanicula Marilandica — s. Button, Eryngium aquaticum, Liatris spicata — s. Canada, Asarum Canadense — s. Dewitt, Prenanthes — s. Evergreen, Polygala paucifolia — s. Heart, Asarum Canadense — s. Virginiana, Aristolochia serpentaria — s. White, Eupatorium ageratoides.

SNAKEWEED, Aristolochia serpentaria, Helenium autumnale, Polygonum bistorta—s. American, Cicuta masculata.

SNEEZING, from Sax. nieꝑan, (G.) Niesen, *Clonus Sternuta'tio, Sternuta'tio, Sternutamen'tum, Sternumen'tum, Ptarmos,* (F.) *Éternuement.* A convulsive motion of the expiratory muscles, by which the air is driven rapidly, and rushes sonorously, through the nasal fossæ, carrying with it the mucus and foreign bodies, which adhere to the pituitary membrane, and have occasioned the movement.

SNEEZEWORT, Achillea ptarmica, Helenium autumnale.

SNORING, *Rhenchus, Rhenxis, Ronchus, Rhonchus, Stertor, Renchus,* (F.) *Ronflement,* from (G.) Scharnen. Noise made in the posterior part of the mouth and nasal fossæ during the movements of inspiration, particularly in sleep, both when the person is in health, and in disease, as in apoplexy. In certain affections of the chest—in some cases of pulmonary catarrh — a kind of snoring may be distinctly heard by applying the ear or the stethoscope to the chest.

SNOT, Nasal mucus.

SNOUT, Nasus.

SNOW, Sax. ꝑnaꝑ, *Nix, Chion,* (F.) *Neige.* Water in a solid state, which falls from the atmosphere in white flakes. It is used externally as a tonic and discutient.

SNOWBALL, Cephalanthus occidentalis.

SNOWBERRY, Symphoricarpus racemosus.

SNUFF, CEPHALIC, Pulvis asari compositus.

SNUFFLES, Teut. Snuffeln, *Grave'do neonato'rum, Rhinan'gia, Rhinanch'onē.* Breathing hard through the nose, often owing to accumulation of the mucous secretions,—an affection to which infants are liable, and which is relieved by oiling the interior of the nostrils.

SOAP, Sapo — s. Acid, see Sapo — s. Berries, Sapindus saponaria—s. Black, see Sapo—s. Castile, Sapo durus — s. of the Cocoa-nut oil, see Sapo — s. Common or soft, see Sapo — s. Liquid, see Sapo — s. Medicinal, see Sapo — s. Spanish, Sapo durus — s. Yellow, see Sapo.

SOAPWORT, Saponaria.

SOB, from Sax. ꝑeoꝑian, 'to grieve;' (F.) *Sanglot.* A spasmodic, sudden, and momentary contraction of the diaphragm, immediately followed by relaxation, by which the little air, that the contraction has caused to enter the chest, is driven out with noise. It is an evidence of corporeal or mental suffering.

SOBOLES, Epigone.

SOBRIETAS, Temperance.

SOCIA PAROTIDIS, see Parotid.

SOCI'ETY, *Soci'etas,* (F.) *Société,* from *sociare,* 'to associate.' An association for the promotion of some common object.

Societies, Medical. Associations of medical gentlemen for the promotion of science have been numerous, and productive of valuable results. In the United States, societies exist in many of the states, possessing the power of examining into the qualifications of every one who may be desirous of practising within their particular jurisdiction. In some of the states, however, the qualified and unqualified are permitted to exercise their profession with equal privileges and immunities.

Amongst the medical associations that have issued from time to time useful transactions or publications, are the following: In America, — The *Massachusetts Medical Society; the Physico-medical,* and *Medical Societies of the State of New York;* the *College of Physicians of Philadelphia,* and the *American Medical Association.* In Europe, — The *Association of Fellows and Licentiates of the King's and Queen's College of Physicians of Ireland;* the *Medico-Chirurgical* and *Phrenological Societies of Edinburgh;* the *College of Physicians,* the *Medico-Chirurgical,* the *Medical* and the *Sydenham Societies of London;* the *Associated Apothecaries and Surgeon Apothecaries of England and Wales,* and the *Provincial Medical and Surgical Association;* the *Royal Academy of Surgery,* the *Royal Society of Medicine,* the *Société Médicale d'Émulation,* the *Société de Médecine,* the *Royal Academy of Medicine,* and the *Société Médicale d'Observation, of Paris;* the *Médico-Chirurgical Academy of Vienna;* the *Medical Societies of Berlin and Copenhagen,* &c., &c. In Asia. — The *Medical and Physical Society of Calcutta.*

Valuable medical essays are likewise contained in the published *Transactions of the American Philosophical Society;* of the *Royal Societies of London, Edinburgh, Göttingen,* &c.; of the *Royal Academy of Sciences of Paris;* the *Imperial Society of Sciences of St. Petersburg; the Royal Academy of Sciences of Turin;* the *Academia Imperialis Leopoldina Naturæ Curiosorum,* &c.

SOCORDIA, Hallucination.

SODA. An Arabic word. *Protox'ide of sodium,* (F.) *Soude,* is obtained by adding *caustic lime* to a solution of *carbonate of soda.* The soda in solution may be obtained by evaporation as hydrate of soda. Its action is like that of potassa; but it is not officinal.

*Soda impu'ra, Baril'la, Barig'lia, Baril'lor, Soda Hispan'ica, Ana'tron, Natron, Ana'ton, Nitrum Antiquo'rum, Kelp, Aphroni'trum, Sal alkali'nus fixus fos'silis, Car'bonas Sodæ im'purus, Subcar'bonas Sodæ impu'ra, Anachron.* The *mineral alkali* is obtained from several sources; — naturally, in Egypt: artificially, from the incineration of marine plants; and from the decomposition of sulphate of soda, &c. It is principally, however, derived from plants growing on the sea-coast; — as the *Salso'la sati'va, S. soda, S. tragus, Salicor'nia herba'cea, Salicornia Arab'ica,* &c. The *Barille ashes* are from the ashes

of the *Salicor'nia Europæ'a:* the *Kelp, Soude de Varecq,* from the *Fucus vesiculo'sus* and other varieties;—the *Turkey Barilla, Roquette, Cendre du Levant, Rochet'ta Alexandri'na,* from the *Mesembryan'themum Cop'ticum;*—the *Al'icant Barilla, Soda Alicanti'na, S. Alonen'sis,* from the *Mesembryan'themum nodiflo'rum;*—and the *Carthage'na Barilla,* from the *Salicor'nia and Salso'la.*

Impure subcarbonate of soda, (F.) *Soude du commerce,* consists of subcarbonate of soda, potash, chloride of sodium, clay and other earthy substances. It is chiefly used for preparing the pure subcarbonate.

Soda, Cardialgia, Cephalalgia, Pyrosis.

Soda Aceta'ta, *Sodæ Ace'tas, Ac"etate of Soda, Terra folia'ta minera'lis,* (F.) *Acétate de soude.* This salt is used in similar cases with the acetate of potass.

Soda Aërata, Sodæ carbonas — s. Alonensis, Soda — s. Biborate of, Borax—s. Bicarbonate of, Sodæ carbonas — s. Borate of, Borax — s. Boraxata, Borax.

Soda, Car'bonate of, *Sodæ Car'bonas, Carbonas Na'tricum, Soda Aëra'ta, Sodæ Bicar'bonas, Bicar'bonate of Soda, Carbonate of protox'ide of So'dium,* (F.) *Carbonate de Soude, S. effervescente, S. aérée, S. Crayeuse.* (*Sodæ subcarb,* ℔j, *aquæ destill.* Oiij. Dissolve the subcarbonate of soda, and pass carbonic acid through the solution; set it aside to crystallize.) Its use is the same as the subcarbonate, than which it is less caustic, and better adapted for effervescing draughts.

Soda Cau'stica, *Protox'ide of So'dium, Caustic Soda,* (F.) *Soude caustique, S. à la Chaux, Soude pure.* The impure subcarbonate, treated by quicklime, and consequently deprived of its carbonic acid. It may be used as a caustic, like the *Potassa fusa,* and is even preferable to it, as it does not deliquesce and run.

Soda, Chloride of, *S. Chlorina'ta, Sodæ Chlo'ridum, Chlo'rinated Soda, Natrum Oxymuriat'icum, Sodæ Chlorure'tum, Oxymu'riate of Soda,* (F.) *Chlorure de Soude, Chlorure d'oxide de Sodium.* This salt is used as a disinfecting agent; both to remove offensive smells in chambers, and to alter the condition of fetid ulcers. See Liquor Sodæ Chlorinatæ.

Soda, Chlorinated, Soda, chloride of — s. Hispanica, Soda — s. Hydrochlorate of, Soda, muriate of.

Soda, Hyposulph'ite of, *Sodæ hyposulph'is,* (F.) *Hyposulfite de Soude.* This salt has been lately extolled in chronic cutaneous, and scrofulous affections. It is given in syrup.

Soda, Lithate of, Urate of soda — s. Mephite of, Soda, subcarbonate of.

Soda, Mu'riate of, *Sodæ murias, Soda muria'ta, S. muriat'ica, Al'kali minera'lē sali'num, Sal commu'nis, Sal culina'ris, Sal fos'sium, Sal gemmæ, Sal mari'nus, Natron muria'tum, Sal albus, Natrum muriat'icum, Common salt, Sea salt, Hydrochlo'rinas Na'tricus, Sal fos'silis, Sal lu'cidum, Muria, Rock salt, Bay salt, White salt, Quadrichlo'ruret of Sodium, Hydrochlo'rate of protox'ide of Sodium, Hydrochlo'rate of Soda, Chlorure'tum So'dii, So'dii Chlo'ridum, Chloride of Sodium,* (F.) *Chlorure de Sodium, Sel marin, Sel de Cuisine.* In an impure state, this salt is one of the most abundant of natural productions. It is soluble in 3 parts of water, and is tonic, purgative, and anthelmintic. Externally, stimulant. It is a well-known and useful culinary substance.

Soda, Nitrate of, *Sodæ Nitras, Natron ni'tricum, Al'kali minera'lē nitra'tum, Nitrum Cu'bicum, Nitrate of protox'ide of Sodium, Protoni'trate of Sodium, Nitrum Rhomboida'lē, Nitrat Natricum, Salpe'tra, Cubic Nitre.* Its virtues are similar to those of the nitrate of potass, for which it has been substituted.

Soda, Oxymuriate of, Soda, chloride of.

Soda, Phosphate of, *S. Phosphora'ta, Sodæ phos'phas, Subphosphate of protox'ide of Sodium, Phosphas Na'tricum, Natrum Oxyphosphoro'des, Subprotophosphate of Sodium, Subphos'phate of Soda, Sal mirab'ilē perla'tum, Triba'sic phosphate of Soda, Alkali minera'lē phosphora'tum, Tasteless purging salt,* (F.) *Phosphate de Soude, Sel admirable perlé.* (*Bone* burnt to whiteness and powdered, ℔x; *Sulphuric acid,* ℔vj; *Carbonate of soda,* q. s. Mix the bone with the acid in a covered vessel, add a gallon of water, and stir. Digest for three days, occasionally adding a little water to that lost by evaporation, and frequently stirring the mixture. Pour in now a gallon of boiling water, and strain through linen, gradually adding more boiling water, until the liquor passes nearly tasteless. Set the strained liquor by, that the dregs may subside; from which pour off the clear solution, and boil down to a gallon. To this solution, poured off from the dregs and heated in an iron vessel, add by degrees the carbonate of soda previously dissolved in hot water, until effervescence ceases, and the phosphoric acid is completely neutralized; then filter the liquor, and set it aside to crystallize. Having removed the crystals, add, if necessary, a small quantity of carbonate of soda to the liquor, so as to render it slightly alkaline; then alternately evaporate and crystallize so long as crystals are produced. Lastly, preserve the crystals in a well stopped bottle.—Ph. U. S.) Cathartic, in the dose of from ℥ss to ℥j.

Soda, Phosphate of, tribasic, S. Phosphate of.

Soda, Subcarb'onate of, *Sodæ Subcarbonas, Sodæ Carbonas* (Ph. U. S.), *Subcarbonate of protox'ide of Sodium, Memphite of Soda, Natron præpara'tum, Sal Sodæ, Salt of Soda, Flos Salis, Sagi'men Vitri, Salt of Baril'la, Sel al'kali, Carbonas Sodæ* of some, (F.) *Sous-carbonate de Soude.* The impure subcarbonate, dissolved in water; the solution filtered and crystallized. Soluble in two parts of water at 60°. It is much used as an antacid; and also as a deobstruent in scrofulous and other affections. Dose, gr. x to ℥ss.

The *dried Subcar'bonate of Soda, Sodæ Subcar'bonas exsiccata, Sodæ carbonas exsicca'tus,* (Ph. U. S.) *Carbonas Sodæ sicca'tum,* (F.) *Sous-carbonate de Soude desséché,* is employed as an antacid and lithontriptic. Dose, gr. x to xv.

Soda, Subphosphate of, S. phosphate of.

Soda, Sulphate of, *Sodæ Sulphas, Natron vitriola'tum, Sal cathar'ticus Glaube'ri, Al'cali minera'lē sulphu'ricum, Natrum sulphu'ricum, Soda vitriola'ta, Sulphas na'tricus, Sal mirab'ilis Glaube'ri, Ape'rient Salt of Frederick, Glauber's Salts,* (F.) *Sulfate de Soude.* Obtained from the salt that remains after the distillation of muriatic acid; the superabundant acid being saturated with subcarbonate of soda. It is soluble in three parts of water at 60°; is purgative, and, in small doses, diuretic. Dose, ℥vj to ℥x.

The *Lymington Glauber's Salts* is a *Sulphate of Magnesia and Soda,* and is obtained from the mother liquor of sea-water, or by dissolving Epsom salt in a solution of Glauber's salt.

Soda, Tartrate of, *Tartrate of potass and Soda, Soda Tartariza'ta, Tar'tarized Soda, Sal Rupellen'sis, Rochelle Salt, Sal Polychres'tum Seignet'ti, S. Seignetti, Seignette's Salt, Natron tartariza'tum, Tartris potas'sæ et Sodæ, Sodæ et Potas'sæ Tartras* (Ph. U. S.), *Sodæ potassio-tartras, Tartras Potas'sæ et Sodæ, Tartrate de po-*

*taese et de Soude.* (*Sodæ carb.* ℔i; *potass. bitart.* in pulv. ℥xvj, *Aq. bullient.* Ov. Dissolve the carbonate in water; and add, gradually, the bitartrate. Filter the solution and crystallize, Ph. U. S.) It is a gentle cathartic. Dose, ℥ss to ℥j.

Soda, Urate of, Urate of Soda — s. Vitriolata, S. sulphate of — s. Water, Acidulous water, simple.

Sodæ Acetas, Soda, acetate of — s. Biboras, Borax — s. Bicarbonas, Soda, carbonate of — s. Boras, Borax — s. Boras alcalescens, Borax — s. Boras supersaturus, Borax — s. Carbonas, Soda — s. Carbonas, Soda, subcarbonate of — s. Carbonas exsiccatus, see Soda, subcarbonate of — s. Carbonas impurus, Soda — s. Chloras, Soda, chlorate of — s. Hyposulphis, Hyposulphite of soda — s. Murias, Soda, muriate of — s. Nitras, Soda, nitrate of — s. Phosphas, Soda, phosphate of — s. et Potassæ tartras, Soda, tartrate of — s. Potassio-tartras Soda, tartrate of — s. Subboras, Borax — s. Subcarbonas impura, Soda.

SODII AURO-TERCHLORIDUM, see Gold — s. Chloridum, Soda, muriate of — s. Chloruretum, Soda, muriate of.

SO'DIUM, *Na'trium, Natro'nium.* The metallic basis of soda.

Sodium, Carbonate of Protoxide of, Sodæ carbonas — s. Chloride of, Soda, muriate of — *s. Chlorure de*, Soda, muriate of — *s. Chlorure d'Oxide de*, Soda. chloride of — s. Protonitrate of, Soda, nitrate of — s. Protoxide of, Soda — s. Protoxide of, hydrochlorate of, Soda, muriate of — s. Protoxide of, nitrate of, Soda, nitrate of — s. Protoxide of, phosphate of, Soda, phosphate of — s. Protoxide of, subcarbonate of, Soda, subcarbonate of — s. Quadri-chloruret of, Soda, muriate of — s. Subborate of protoxide of, Borax — s. Subprotoborate of, Borax — s. Subprotophosphate of, Soda, phosphate of.

SODOMA GALLORUM, Syphilis.

SODOMIA, Buggery.

SODOMY, Buggery.

SOFTENING, Mollities.

*SOI-POUR-SOI*, Homœozygy.

*SOIE*, Sericum.

*SOIF*, Thirst — *s. Excessive*, Polydipsia.

SOL, Gold.

SOL-LUNAR, *Sol-luna'ris;* from *sol*, 'the sun,' and *luna*, 'the moon.' An epithet applied to a fancied influence exerted by the sun and moon on man in a state of health and disease.

SOLAMEN INTESTINORUM, Pimpinella anisum — s. Scabiosorum, Fumaria.

SOL'ANOID, *Solanoï'des;* from *solanum*, 'the potato,' and *εἶδος*, 'resemblance.' Resembling a potato; potato-like. An epithet applied to a form of cancer, which appears to be intermediate between scirrhus and encephaloid, increasing more rapidly than the former, yet approaching it in firmness.

SOLA'NUM, *S. nigrum* seu *vulga'rē* seu *vulga'tum, Common Nightshade, Garden Nightshade*, (F.) *Morelle à fruit noir. Family*, Solaneæ. *Sex. Syst.* Pentandria Monogynia. A narcotic poison. The *Huile de Morelle* is made, by macerating in oil, for several days, the leaves and fruit of this plant. The oil is anodyne and discutient.

Solanum Dulcama'ra, *Dulcamara, D. flexuo'sa, Solanum Scandens, Glycipi'cros, Ama'ra dulcis, Solanum ligno'sum*, Στρυχνος of Theophrastus, *Bittersweet, Woody Nightshade, Bittersweet Nightshade, Bittersweet Vine, Nightshade Vine, Violet bloom*, (F.) *Douce-amère, Morelle grimpante.* The taste of the stalks is bitter, followed by sweetness; hence its name. It has been used in many diseases, as a diuretic and sudorific, especially in chronic rheumatism, humoral asthma, dropsy, various skin diseases, scrofula, and jaundice. Dose, in powder, ℈j to ʒj.

Solanum Esculentum, S. tuberosum — s. Fœtidum, Datura stramonium — s. Furiosum, Atropa belladonna — s. Humboldtii, S. Lycopersicum — s. Lethale, Atropa belladonna — s. Lignosum, S. dulcamara.

Solanum Lycoper'sicum; *Lycoper'sicon esculent'um, Lycoper'sicum pomum amo'ris, S. Humbold'tii* seu *pseudolycoper'sicum, Malum lycoper'sicum, Love-apple plant.* The fruit of this, called *Toma'ta* or *Love-apple*, (F.) *Pomme d'Amour*, is much eaten in the United States; and, with the French, Spaniards, Portuguese, &c., forms an esteemed sauce.

Solanum Magnum Virginianum-Rubrum, Phytolacca decandra — s. Maniacum, Atropa belladonna, Datura stramonium — s. Melanocerasus, Atropa belladonna.

Solanum Melon'gena, *Melongena, Egg-plant, Mad Apple plant;* (F.) *Aubergine.* A native of Asia, Africa, and America. Its oblong, egg-shaped fruit, *Ponum Melon'genæ, Malum insa'num*, is prepared in soups and sauces in those countries, like the tomata.

Solanum Nigrum, Solanum.

Solanum Niv'eum. A South African plant, the leaves of which, applied to foul ulcers, cleanse them. The fresh juice of the berries and leaves, made into an ointment with lard or fat, is used by the farmers for the same purpose.

Solanum Parmenterii, S. tuberosum — s. Pseudolycopersicum, S. Lycopersicum — s. Quadrifolium, Paris — s. Racemosum Americanum, Phytolacca decandra.

Solanum Sanctum; *Palestine Nightshade.* The fruit of this is globular, and is much eaten in the countries where it is a native.

Solanum Scandens, S. Dulcamara.

Solanum Tuberos'um, *Bata'bas, Solanum esculen'tum* seu *Parmente'rii, Lycoper'sicum tubero'sum, Papas America'nus, Pappus America'nus, America'num Tubero'sum, Batta'ta Virginia'na;* the *Pota'to*, (F.) *Pomme de Terre.* A native of Peru. A nutritious and wholesome vegetable; one of the most useful, indeed, that exists. One hundred pounds of potatoes afford ten pounds of starch, which is equal to arrow-root, as a nutrient and demulcent. It is called *Potato Flour, P. Starch, French Sago, Petit Sague, Common Arrow-root*, &c.

Solanum Urens, Capsicum annuum — s. Vesicarium, Physalis — s. Vulgare, Solanum.

SOLAR, *Sola'ris*, from *sol*, 'the sun.' Relating to the sun; having rays like the sun.

Solar Plexus, *Plexus sola'ris, Centrum commu'nē, Cer'ebrum abdomina'lē.* A collection of ganglions and filaments, interweaving and anastomosing with each other repeatedly, and belonging to the system of the great sympathetic. This vast plexus, lying on the vertebral column, the aorta, and the pillars of the diaphragm, has a very irregular shape. The ganglions and filaments composing it are soft, reddish, and almost all issue from the semilunar ganglions. It receives, also, branches from the pneumogastric. It seems to be chiefly intended for the aorta, and accompanies all its branches; furnishing many secondary plexuses, which are called the *infradiaphragmatic, cœliac, superior mesenteric, inferior mesenteric, renal* or *emulgent, spermatic*, &c.

SOLDANELLA, Convolvulus soldanella.

SOLDIER'S WEED, Matico.

SOLE, *Solum, Solea, Basis cor'poris, Ichnus, Superfic''ies planta'ris pedis, Peti'na, Vestig''ium, Pe'dion, Peza, Pelma, Planta'ris superficies pedis, Fa'cies conca'va* seu *infe'rior* seu *Planum* seu *Concavum* seu *Pars inferior* seu *Planit''ies* seu *Planta* seu *Vola pedis*, (F.) *Plante du Pied.* The sole of the foot; the under surface of the foot.

SOLEA, Sole — s. Ipecacuanha, see Ipecacuanha.

*SOLÉAIRE*, Soleus.

SOLEN, Cradle, see Vertebral column.

SOLENA'RIUM, from σωλην, 'a canal.' An instrument of surgery, representing a kind of gutter, in the cavity of which the penis was placed, like a limb in a *cradle.* — Galen. The word *Solen* itself—σωλην, *Cana'lis*—was used, in antiquity, for a grooved channel, in which a fractured limb was placed.

SOLENOSTEMMA ARGEL, Cynanchum oleæfolium.

SOLE'US, *Gastrocne'mius inter'nus, Tibiocalcanien*, (Ch.;) (F.) *Soléaire*, from *solea*, 'a sole of a shoe.' A muscle situate at the posterior part of the leg. It is broad, flat, and almost oval; and is attached, above, to the posterior edge of the fibula, to the oblique line on the posterior surface, and to the inner edge of the tibia. It terminates, below, by a large tendon, which unites to that of the gastrocnemius externus, to form the tendo Achillis. This muscle extends the foot on the leg, and conversely.

SOLID, *Sol'idus, Ste'reos.* A body whose integrant molecules are so united by the force of cohesion, that they will not separate by their own weight. The solids, in the human body, are the bones, cartilages, tendons, muscles, ligaments, arteries, veins, nerves, membranes, skin, &c. The anatomy, or rather study of the solids, is called *Stereol'ogy*, from στερεος, 'solid,' and λογος, 'a discourse.'

SOLIDAGO, see Solidago virgaurea — s. Saracenica, S. virgaurea.

SOLIDA'GO RIG''IDA, *Rigid Goldenrod, Bones' styptic;* indigenous; of the Composite *family*, flowering in August and September; is astringent and tonic.

SOLIDA'GO VIRGAU'REA, *S. vulga'ris* seu *Saracen'ica, Virga aurea, Herba do'rea, Cony'za coma aurea, Sym'phytum Petræ'um, Elichry'sum, Consol'ida* seu *Saracen'ica, Golden rod. Nat. Ord.* Compositæ Corymbiferæ. *Sex. Syst.* Syngenesia superflua. (F.) *Verge d'or.* The leaves of *Solida'go odo'ra* — *Solida'go* (Ph. U. S.) — and the flowers have been recommended as aperients and tonics, in urinary diseases, and in internal hemorrhage.

SOLIDAGO VULGARIS, S. virgaurea.

SOL'IDISM, *Patholog''ia solida'ris.* The doctrine of those physicians who refer all diseases to alterations of the solid parts of the body. To the believers in this doctrine, the appellation *Sol'idists* has been given. The solidists think that the solids alone are endowed with vital properties; that they alone can receive the impression of morbific agents, and be the seat of pathological phenomena. Solidism has been the prevalent doctrine. It is scarcely necessary to say, that in all our investigations, the condition of both solids and fluids must be regarded.

SOLIUM, *Baignoire*, Tænia solium—s. Pedis, Metatarsus.

SOLUBIL'ITY, *Solubil'itas*, from *solvere, solutum*, 'to dissolve.' That property of a body by virtue of which it can be dissolved in a menstruum.

TABLE OF THE SOLUBILITY OF SOME SUBSTANCES IN WATER.

| NAMES OF SALTS. | *Solubility in* 100 *parts water.* | |
|---|---|---|
| | at 60° | at 212° |
| *Acids.* | | |
| Benzoic | 0.208 | 4.17 |
| Citric | 133 | 200 |
| Oxalic | 50 | 100 |
| Tartaric | very soluble | |
| *Salts.* | | |
| Acetate of Potassa | 100 | |
| ——— Soda | 35 | |
| Bitartrate of Potassa | 1.5 | 3 3 |
| Borate of Soda | 8.4 | 16.8 |
| Carbonate of Ammonia | 50 | |
| ——— Magnesia | 2 | |
| ——— Potassa | 25 | |
| ——— Soda | 50 | |
| Chlorate of Potassa | 6 | 40 |
| ——— Soda | 35 | 35 |
| Chloride of Lime | 200 | |
| ——— Magnesium | 100 | |
| ——— Potassium | 33 | |
| ——— Sodium | 35.42 | 36.16 |
| Muriate of Ammonia | 33 | 100 |
| Nitrate of Potassa | 14.25 | 100 |
| ——— Soda | 33 | 100 |
| Phosphate of Soda | 25 | 50 |
| Sulphate of Ammonia | 50 | 100 |
| ——— Copper | 25 | 50 |
| ——— Iron | 50 | 100 |
| ——— Magnesia | 100 | 133 |
| ——— Potassa | 6.25 | 20 |
| ——— Soda | 37 | 125 |
| Supersulphate of Potassa | 5.0 | 100 |
| Tartrate of Potassa | 25 | |
| ——— Potassa and Soda | 20 | |
| ——— Antimony & Potassa. | 6.6 | 33 |

SOLUM, Sole.

*SOLUTÉ*, Solution.

SOLUTIO, Solution — s. Alexiteria Gaubiana, see Disinfection — s. Ammoniæ subcarbonatis, Liquor ammoniæ subcarbonatis — s. Arsenicalis, Liquor arsenicalis—s. Arsenicata, Liquor arsenicalis—s. Arsenitis kalicæ, Liquor arsenicalis — s. Calcis, Liquor calcis — s. Camphoræ ætherea, Tinctura ætherea camphorata — s. Camphoræ oleosa, Linimentum camphoræ — s. Continui, Solution of continuity — s. Ferri nitratis, Liquor Ferri nitratis — s. Guaiaci gummosa, Mistura guaiaci — s. Muriatis barytæ, Baryta, muriate of — s. Muriatis calcis, sec Calcis murias — s. Muriatis ferrici ætherea, Tinctura seu alcohol sulfurico-æthereus ferri — s. Muriatis hydrargyri oxygenati, Liquor hydrargyri oxymuriatis—s. Potassii iodidi iodureta, Liquor iodini compositus — s. Resinæ guaiaci aquosa, Mistura guaiaci—s. Subcarbonatis ammoniaci spirituosa, Spiritus ammoniæ.

SOLUTIO SULPHA'TIS CUPRI COMPOS'ITA, *Aqua vitriol'ica cæru'lea, Sydenham's Styptic Water.* (*Sulph. cupri*, ℥iij, *alum., acid. sulph.*, āā ℥ij, *aquæ*, ℥viij: dissolve, and filter.) A styptic, and, largely diluted, an astringent collyrium.

SOLU'TION, *Solu'tio, Lysis*, (F.) *Dissolution.* An operation which consists in dissolving a solid body in a menstruum. Likewise, the product of such operation—*Solu'tum*, (F.) *Soluté.* It means, also, with many, the termination of a disease: — with others, a termination accompanied by critical signs;—and, with others, again, it is synonymous with crisis.

SOLUTION OF ACETATE OF AMMONIA, Liquor ammoniæ acetatis — s. of Acetate of morphia, Liquor morphiæ acetatis — s. Alkaline, see Fuligokali — s. of Alkaline iron, Liquor ferri alkalini — s. of Alum, compound, Liquor aluminis compositus — s. of Ammoniated copper, Liquor cupri ammoniati — s. Arsenical, Liquor arsenicalis — s. of Charcoal, concentrated, see Tinctura catechu

—s. of Chlorinated soda, Liquor sodæ chlorinatæ —s. of Citrate of magnesia, see Magnesiæ citras —s. of Citrate of potassa, Liquor potassæ citratis —s. of Continuity, see Continuity—s. of Corrosive sublimate, Liquor hydrargyri oxymuriatis — s. Donovan's, see Arsenic and Mercury, Iodide of — s. Fowler's, Liquor arsenicalis — s. of Hydriodate of potass, Liquor potassæ hydriodatis — s. of Iodide of iron, Liquor ferri iodidi—s. of Iodine, compound, Liquor iodini compositus—s. of Iron, nitrated, see Tinctura ferri muriatis — s. Labarraque's *Eau de Javelle*—s. of Lime, Liquor calcis — s. Lugol's, Liquor iodini compositus — s. of Magnesia, condensed, Magnesia, fluid — s. of Mouro, Liquor of Monro — s. of Nitrate of iron, Liquor ferri nitratis — s. of Oxymuriate of mercury, Liquor hydrargyri oxymuriatis—s. Plenck's, see Hydrargyri oxydum cinereum—*s. de Potasse*, Liquor potassæ—s. of Potassa, Liquor potassæ—s. of Sesquinitrate of iron, Liquor ferri nitratis—s. of Subacetate of Lead, Liquor plumbi subacetatis —s. of Subacetate of lead, diluted, Liquor plumbi subacetatis dilutus—s. of Subcarbonate of potass, Liquor potassæ subcarbonatis—s. of Sulphate of morphia, Liquor morphiæ sulphatis—s. of Tartarized antimony, Vinum antimonii tartarizati—s. of Ternitrate of sesquioxide of iron, Liquor ferri nitris — s. of Van Swieten, Liquor hydrargyri oxymuriatis.

SOLUTIVUS, Laxative.

SOLUTUM, Solution.

SOLVENS, Solvent — s. Minerale, Liquor arsenicalis.

SOLVENT, *Solvens*, (F.) *Fondant*, from *solvere*, 'to dissolve.' A medicine supposed to possess the property of dissolving or removing obstructions and extraneous substances. Thus we have *solvents* of the stone in the bladder, &c. See Dissolventia.

SOLVENT, MINERAL, Liquor arsenicalis.

SOMA, Body, Corpus.

SOMACETICS, Gymnastics.

SOMAT'IC, *Somat'icus*; from σωμα, 'the body.' That which concerns the body;—as *somatic* death, or death of the body, in contradistinction to *molecular* death or the death of a part.

SOMATODYM'IA, from σωμα, σωματος, 'the body,' and δνω, 'I enter into.' A double monstrosity in which the trunks are united. Of this, there are several varieties; — *Vertebrodym'ia*, where the union is by the vertebræ; *Ischiodym'ia*, by the ossa ischii; *Sternodym'ia*, by the sternum; *Supraomphalodym'ia*, (F.) *Sus-omphalodymie*, by the super-umbilical regions; *Supra et infra-omphalodymia*, by the superior and inferior umbilical regions; and *Sterno-omphalodym'ia*, where the union is by both the sternal and the umbilical regions. — Cruveilhier.

SOMATOL'OGY, *Somatolog''ia*, from σωμα, 'the body,' and λογος, 'a discourse.' A treatise on the human body. Anatomy.

SOMATOTOMY, Anatomy.

*SOMMEIL*, Sleep.

SOMNAMBULATION, Somnambulism.

SOMNAM'BULISM, *Somnambula'tio, Hypnobate'sis, Hypnobata'sis, Hypnobati'a, Rhembas'mus, Lunatis'mus, Hypnoner'gia, Selenoga'mia, Nyctobate'sis, Autonyctobati'a, Seleni'asis, Selenias'mus, Somnambulis'mus, Nyctob'asis, Noctambula'tio, Noctambulis'mus, Nyctoba'dia, Nyctoba'tia, Siph'ita, Syph'ita, Paroni'ria am'bulans, Noctisur'gium, Oneirodyn'ia acti'va, Somno-vigil, Somnambula'tion, Sleep-walking*, from *somnus*, 'sleep,' and *ambulare*, 'to walk.' A condition of the brain which occasions the individual to execute, during sleep, some of those actions that commonly take place when awake. It has been imagined that the somnambulist is guided solely by his internal senses; but there are many facts which induce the belief that the external senses are not always entirely suspended. The causes of somnambulism are very obscure; and the principal indication of treatment is, — so to arrange the bed-chamber of the somnambulist, that he cannot get out of it during sleep; and to avoid suppers, as well as all bodily and mental excitement.

SOMNAMBULISM, MAGNET'IC MESMERIC, or ARTIFIC''IAL, *Somnambulis'mus artificia'lis, Cataph'ora magnet'ica, Hyp'notism, Somnip'athy*, is that peculiar condition, into which individuals have been thrown by the *Animal Magnetizer*. It has occurred only in those of weak nervous temperament; in hysterical females, &c.

SOMNAMBULISMUS, Somnambulism—s. Artificialis, Somnambulism, magnetic.

SOMNAM'BULIST, *Somnam'bulus, Hypnob'ates, Noctam'bulus, Lunat'icus, Noctam'bulo, Somnam'bulo*. A sleep-walker.

SOMNAMBULIS'TIC. Relating or appertaining to somnambulism, — as the '*somnambulis'tic state*.'

SOMNAMBULO, Somnambulist.

SOMNIA'TIO, from *somnium*, 'a dream.' The act of dreaming.

SOMNIATIO MORBOSA, Oneironosus—s. in Statu Vigili, Hallucination.

SOMNIF'EROUS, *Som'nifer, Sopor'ifer, Hypnot'icus, Hypnopœ'us, Soporati'vus, Soporif'ic, Soporif'erous*. A medicine which causes sleep.

SOMNIL'OQUIST; same etymon as the next. One who talks in his sleep.

SOMNILO'QUIUM, *Somniloquis'mus, Somnil'oquism*, from *somnus*, 'sleep,' and *loquor*, 'I speak.' Talking in the sleep.

SOMNOPATHY, Somnambulism, magnetic.

SOM'NIUM, *Enyp'nion, Insom'nium, a Dream*, (F.) *Rêve, Songe*. A confused assemblage, or accidental and involuntary combination of ideas and images, which present themselves to the mind during sleep. Dr. S. Mitchell, of New York, used the word *Somnium* to signify the state between sleeping and waking, in which persons perform acts of which they are unconscious.

For 'waking dreams,' see Hallucination.

Those distressing dreams which occur during a state of half sleep, are called, by the French, *Révasseries*.

SOMNO-VIGIL, Somnambulism.

SOM'NOLENCY, *Somnolen'tia, Hypnæsthe'sis, Hypno'dia, Dormita'tio, Heav'iness, Carus Lethar'gus Cataph'ora, Cataphora, Coma Somnolen'tum, Caro'sis, Slumber*, (F.) *Assoupissement*. Sleepiness. Also a state intermediate between sleeping and waking. It is often a symptom of disease.

SOMNUS, Sleep.

SOMPNUS, Sleep.

*SON*, Furfur, Sound.

SONCHUS, *S. Olera'ceus, Hiera'cium olera'ceum, Cicer'bita, Sow Thistle*, (F.) *Laiteron doux. Family*, Cichoraceæ. Most of the species of Sonchus abound with a milky juice, which is very bitter, and said to possess diuretic virtues.

SONCHUS FLORIDANUS, Mulgedium Floridanum.

*SONDE*, Sound, Specillum — *s. Cannlée*, Director.

*SONDE D'ANEL*. A very fine stylet of silver, awl-shaped at one end. It is used for probing the lachrymal passages through the punctum lacrymale.

*SONDE DE BELLOC*. An instrument invented by Belloc for plugging the nasal fossæ, in cases of hemorrhage. It consists of a curved silver canula, open at both ends, and furnished with a button. The instrument is passed through the nares to the throat; and a plug is atta

to the button, so that, when the instrument is drawn forwards through the nose, the posterior nostril is stopped.

*SONDE BRISÉE*, (F.), *Eyed probe*. A long, straight stylet, composed of two parts, which may be screwed to each other; blunt at one end, and furnished at the other with an eye, so that it may be used either as a probe for punctured wounds, or for a seton needle.

*SONDE À CONDUCTEUR*, (F.) A modification of the ordinary catheter;—to facilitate the changing of catheters, without the fear of making false passages. It is a common catheter, open at its beak. The *Stylet* or *Mandrin* is one half longer than that of the ordinary catheter. To use the instrument, the stylet is pushed into the cavity of the bladder through the catheter. The latter is then withdrawn by slipping it over the stylet, which is kept in its place, and serves as a guide to a fresh catheter.

*SONDE À DARD*, see Lithotomy (high operation.)

*SONDE DE LAFOREST*. A small, crooked canula, used for probing the nasal duct from below upwards, and for throwing injections into it.

*SONDE ou PINCE DE HUNTER*. A cylindrical silver canula; of the size of a common catheter; open at both extremities, and containing a wire of iron, one of the ends of which is split into two parts; each being terminated by a small silver scoop, and separating from each other by virtue of their elasticity, when pushed out of the canula, and again approximating when drawn in. It has been used for laying hold of small calculi in the urethra.

*SONDE DE VARECQ*, Soda.

*SONGE*, Somnium.

SONITUS AURIUM, Tinnitus aurium — s. Fluidi, Hygrechema — s. Hepaticus, Hepatechema — s. Intestinalis, Enterechema — s. Stomachicus, Gasterechema.

SONOROUS RHONCHUS, *Râle sonore*.

SONUS, Sound—s. Vocis, Accent.

SOOJA, see Dolichos.

SOOJIE, BASTER'S, a farinaceous article of diet, is said to consist of wheat flour sweetened with sugar.

SOOL, Gastroperiodynia.

SOOT, Fuligo — s. Tea, see Fuligokali — s. Wart, Cancer, chimney-sweeper's.

SOPHIA, Sisymbrium sophia — s. Chirurgorum, Sisymbrium sophia.

SOPHISTICATION, Falsification.

SOPHO'RA HEPTAPHYL'LA, *Anticholer'ica*. *Family*, Leguminosæ. *Sex. Syst.* Decandria Monogynia. The root and seeds of this shrub are intensely bitter, and are said to have been found useful in cholera, colic, dysentery, &c.

Sophora Tincto'ria, *Baptis'ia tincto'ria*, *Podalyr'ia Tincto'ria*, *Indigofe'ra*, *Wild Indigo*, *Indigo Weed*, *Broom*, *Indigo Broom*, *Horse-fly Weed*, *Yellow Broom*, *Clover Broom*, *Rattle Bush*, *Yellow Indigo*. An American plant, the taste of whose root is unpleasant, sub-acrid, and nauseous — very similar to ipecacuanha. In a large dose, the bark of the root acts both as an emetic and cathartic. It has been considered antiseptic and febrifuge, and has been used, in the form of fomentation or cataplasm, in phagedenic and gangrenous ulcers. A liniment, prepared by simmering the *cortical part* of the root in cream, has been found an efficacious application to sore nipples and to ulcerated breasts.

*Baptis'ia Leucan'tha*, *Tall white false Indigo*, an indigenous plant, has the same properties.

SOPHRONISTÆ DENTES, see Dentition.

SOPHRONISTERES DENTES, see Dentition.

SOPHROSYNE, Temperance.

SOPIENS, Paregoric.

SOPIO, Opium.

SOPOR. A profound sleep, from which the person can be roused with difficulty. It is a symptom in many of the neuroses.

Sopor Caroticus, Carus.

SOPORARIÆ ARTERIÆ, Carotids.

SOPORATIVUS, Somniferous.

SOPORIFEROUS, Somniferous.

SOPORIFIC, Somniferous.

SO'POROUS, *So'porus*, from *sopor*, 'sleep.' Sleepy: causing sleep.

SORA, Essera.

SORB TREE, Sorbus domestica.

SORBASTRELLA, Pimpinella saxifraga.

SORBEFA'CIENT, *Sorbefa'ciens*, from *sorbere*, 'to suck in,' and *facere*, 'to make.' A remedy that promotes absorption.

The following are the chief sorbefacients: — Acida Vegetabilia; Alkalia; Ammoniacum; Brominum; Galbanum; Hydrargyri Præparata; Iodinum; Liquor Calcii chloridi; Spongia usta; Compression, (methodical;) Friction; Mental Sorbefacients, (Imagination, Emotions.)

SORBETHUM, Sherbet.

SORBETTUM, Sherbet.

SORBETUM, Sherbet.

*SORBIER DES OISELEURS*, Sorbus aucuparia.

SORBITIO, Jus.

Sorbitio Carnis seu Ex Carne. Broth or soup made of meat.

SORBITUM, Jus.

SORBUM, see Sorbus domestica.

SORBUS, Cratægus aria, S. domestica.

Sorbus Acupa'ria, seu *Aucupa'ria*, *Mes'pilus*, *M. acupa'ria*, *Mountain Service*, *Mountain Ash*, *Quicken tree*, *Roan tree*, (F.) *Sorbier des Oiseleurs*. The berries of this tree are employed for similar purposes as the last.

Sorbus Alpina, Cratægus aria—s. Aria, Cratægus aria—s. Aucuparia, S. acuparia—s. Cydonia, Pyrus cydonia.

Sorbus Domest'ica, *Sorbus*, *Pyrus domes'tica*, *Mes'pilus domes'tica*, *Oie*, *Service* or *Sorb Tree*, (F.) *Cormier*. *Family*, Rosaceæ. *Sex. Syst.* Icosandria Trigynia. The fruit of this tree, *Sorbum*, is astringent, and has been recommended in diarrhœa and dysentery. It is given in the form of rob. A kind of cider is made from it, and also brandy.

Sorbus Malus, Pyrus malus.

SORDES, *Rhypos*. A dirty-looking sanies, discharged from ulcers. Also, accumulations of the secretions of the mouth, on the teeth in adynamic fevers more especially, and of foul matters in the stomach—*Sordes prim'arum via'rum*, *Rhypa'ria*. The French call an ulcer, exhibiting such an appearance, *sordid*. Also dirt of any kind.

Sordes, Ichor, Saburra — s. Acidæ, Acidities — s. Aurium, Cerumen — s. Primarum viarum, *Embarras gastrique*, see Sordes — s. Ventris, Excrement.

SORDICULÆ AURIUM, Cerumen.

SORE, Ulcer.

Sore, Bay. A disease which Mosely considers to be a true cancer. It is endemic in the Bay of Honduras.

Sore-Mouth, Stomatitis — s. Clergyman's, Pharyngitis, follicular — s. Gangrenous, Cancer aquaticus — s. Inflammatory, Cynanche tonsillaris — s. Putrid, Cynanche maligna — s. Throat, Cynanche — s. Throat, tubercular, Pharyngitis, follicular — s. Throat, ulcerous, Cynanche maligna.

SORENESS, from Teut. seer, (G.) Sehr, 'very,' Sax. ϸar, *Parap'sis acris teneritu'do.* Painful uneasiness or tenderness, local or general, on being touched with a pressure that does not usually excite distressing feeling. Often, a febrile symptom. Also, the tenderness of a wound, ulcer, &c.

SORGHUM, Panicum Italicum.

SOROCCO, Puna.

*SOROCHE*, Puna.

SORORIA'TIO. The period at which the breasts of the female become developed. The act of becoming thus developed. A young maiden, whose mammæ begin to show, was formerly called *sororians virgo.* — Plautus.

SORREL, COMMON, Rumex acetosa — s. French, Rumex scutatus — s. Garden, Rumex scutatus — s. Mountain, Oxalis acetosella, Oxyria reniformis — s. Salt of, Potass, oxalate of — s. Roman, Rumex scutatus — s. Tree, Andromeda arborea — s. White, Oxalis acetosella — s. Welsh, Oxyria reniformis.

SOSTRUM, improperly *Sotrum;* from σωζειν, 'to save.' A reward given to one who saves the life of another. A physician's fee or *honorarium.*

SOTERIA DOCTRINA, Medicina.

SOTERIÆ AQUÆ, Waters, mineral.

SOTIREL'LA. Ancient name of a medicine composed of *opium*, several *narcotics*, *nutmeg*, *saffron*, *camphor* and *soot.* It was used in certain diseases of the teeth.

SOTRUM, Sostrum.

*SOUBRESAUT*, Subsultus tendinum.

SOUCHERLOON, Bit noben.

*SOUCHET DES INDES*, Curcuma longa — s. *Odorant*, Cyperus longus — s. *Rond*, Cyperus rotundus.

*SOUCI*, Calendula officinalis, Panophobia — s. *des Champs*, Calendula arvensis — s. *Ordinaire*, Calendula officinalis.

*SOUDE*, Soda — s. *Acétate de*, Soda, acetate of — s. *Aéré*, Sodæ carbonas — s. *Borate de*, Borax — s. *Borate sursaturé de*, Borax — s. *Carbonate de*, Sodæ carbonas — s. *Caustique*, Soda caustica — s. *à la Chaux*, Soda Caustica — s. *Chlorure de*, Soda, chloride of — s. *du Commerce*, Soda — s. *Crayeuse*, Sodæ carbonas — s. *Efflorescente*, Sodæ carbonas — s. *Hyposulfite de*, Soda, hyposulphite of — s. *Phosphate de*, Soda, phosphate of — s. *et de Potasse, Tartrate de*, Soda, tartrate of — s. *Pure*, Soda caustica — s. *Sousborate de*, Borax — s. *Sous-carbonate de*, Soda, subcarbonate of — s. *Sulfate de*, Soda, sulphate of.

*SOUFFLE*, see Murmur, respiratory — s. *Amphorique*, see Cavernous respiration — s. *Métallique*, see Cavernous respiration — s. *Placentaire, Bruit placentaire* — s. *Tubaire*, see Murmur, respiratory — s. *Utérin, Bruit placentaire* — s. *Voilé*, see Cavernous respiration.

*SOUFRE*, Sulphur — s. *Iodure de*, Sulphuris iodidum — s. *Sublimé*, Sulphur sublimatum.

SOUND, *Specill'um, Stylus, Explorato'rium, Radi'olus*, (F.) *Sonde.* An instrument used by surgeons to discover whether there be a stone in the bladder. It is usually made of highly polished steel, and is shaped like the catheter. The operation is termed sounding.

The French *Sonde* has, however, a more extensive signification. It means different instruments introduced into cavities of certain organs, or into wounds, fistulas, &c., to investigate their condition, or to fulfil some therapeutical indication. See *Sonde.*

SOUND, *Sonus, Echos, Noise*, (F.) *Son, Bruit.* The sensation produced on the auditory nerve by the vibrations of a sonorous body. Sounds may be propagated in three modes. 1. By *reciproca'tion* or *con'sonance*, as when a sounding body, of a definite pitch, produces a musical tone when another body of the same pitch is sounded near it. 2. By *res'onance*, as when a sounding body is placed in connection with another, one or more of whose parts may be thrown into reciprocal vibration; and 3. By *conduc'tion*, as where the vibrations are transmitted through fluid, liquid, or solid media.

SOUND, Catheterize, S. Auricular, Apyromele — s. Bellows, friction, rasp, saw, lancet, &c., see *Bruit* — s. Crumpling, pulmonary, *Froissement pulmonaire* — s. Laryngeal, Laryngeche.

SOUNDING, Searching, see Sound.

SOUNDNESS OF MIND, Sanity.

*SOUPIR*, Sigh.

SOUR BERRY, see Oxycantha Galeni, Vaccinium oxycoccos — s. Dock, boreal, Oxyria reniformis — s. Leaf, Andromeda arborea — s. Tree Andromeda arborea — s. Wood, Andromeda arborea.

*SOURCIL*, Supercilium.

*SOURCILIER*, Corrugator supercilii, Superciliary.

*SOURDS MUETS*, see Mutitas surdorum.

*SOURIS*, Nictation.

*SOUS-ACROMIO-CLAVI-HUMÉRAL*, Deltoid — s. *Atloïdien*, Subatloidæus — s. *Axoïdien*, Subaxoidæus — s. *Clavier*, Subclavius — s. *Costaux*, Intercostal — s. *Cutané*, Subcutaneous — s. *Épineux*, Infra-spinatus — s. *Lingual*, Sub-lingual — s. *Maxillaire*, Submaxillary — s. *Maxillo-Labial*, Depressor anguli oris — s. *Mental*, Submental — s. *Métacarpo-latéri-phalangien*, Prior annularis — s. *Optico-sphéno-sclératicien*, Rectus inferior oculi — s. *Orbitaire*, Suborbitar — s. *Pubio-coccygien*, Levator ani — s. *Pubio-créti-tibial*, Gracilis — s. *Pubio-prétibial*, Gracilis — s. *Pubio-trochantérien-externe*, Obturator externus — s. *Pubio-trochantérien-interne*, Obturator internus — s. *Scapulaire*, Subscapularis — s. *Scapulo-trochinien*, Subscapularis — s. *Sels*, see Salt.

SOUTHERNWOOD, Artemisia abrotanum — s. Field, Artemisia campestris — s. Maritime, Artemisia maritima — s. Tartarian, Artemisia santonica.

SOWBREAD, Arthanita, Cyclamen.

SOWENS, Flummery.

SOY, see Dolichos soja.

SOYMIDA, Swietenia febrifuga.

SPA, MINERAL WATERS OF. A town seven leagues southeast of Liége, where there are several springs, possessing a sharp acidulous taste; containing much carbonic acid, carbonates of iron, lime, and magnesia; carbonate of soda, and chloride of sodium. The water is much used as a tonic.

SPA WATER, ARTIFICIAL. *Sodæ subcarb.*, gr. vij; *magnesiæ carbon.*, ℈j; *limat. ferri.*, gr. iij; *sodii chlorid.*, gr. j; *aquæ*, Oiij. Impregnate with gas from *marble powder* and *sulph. acid.*, āā ℈x.

SPACE, INTERPEDUNCULAR, Tarini pons — s. Perforated, anterior, Locus perforatus anticus — s. Perforated, posterior, Tarini pons.

SPADO, Castratus, Eunuch, Spasm.

SPAGYRIA, Chymistry.

SPAG"YRISTS, from σπαω, 'I separate,' and αγειρω, 'I assemble;' because they reduced compounds into elements, and formed the latter into compounds (?). A sect of physicians, who pretended to account for the changes that occur in the human body in health and disease, in the same manner as the chymists of their day explained those of the inorganic kingdom. — *Medici'na Paracelcis'tica* seu *Spagyr'ica*, was likewise called *Hermet'ica*, because it was believed that the

means of cure adopted in it had been found in the books of Hermes.

SPANÆ'MIA, from σπανος, 'poor,' and 'αιμα, 'blood.' Poverty of the blood. Diminution in the quantity of fibrin and red corpuscles of the blood, — as where bleeding has been carried beyond certain limits.—Simon.

SPANÆ'MIC, *Spanæ'micum* (remedium), *Dysplas'ticum, Plastilyt'icum et erethilyt'icum, Hæmatolyt'icum, Dyscrasiacum.* Same etymon as the last. Relating to spanæmia.

A medicine whose protracted use is said to impoverish the blood, — as iodine, bromine, &c.

SPANDARAPUM, Sparadrapum.

SPANISH FLY, Cantharis.

SPANOPO'GON, from σπανος, 'rare,' and πωγων, 'beard.' One who has lost his beard, or has a thin beard.

The Greeks called those who had little beard, or who had lost it, *Spanopogo'nes.*

SPARADRAPA, Sparadrapum.

*SPARADRAPIER.* The name of a machine for spreading sparadraps. A *Plaster machine.* It consists of a table, with two raised pieces, movable, and furnished with points, by which the cloth can be stretched, and of a lamina or blade of metal to extend the plaster over it.

SPARADRA'PUM, *Sparadra'pa, Sparadrapus, Tela emplas'tica, Spandara'pum,* (F.) *Sparadrap.* Any adhesive plaster spread upon linen or paper. The chief sparadraps are the following:—

SPARADRAPUM ADHÆSI'VUM, *Adhe'sive Plaster.* A spread plaster of the *Emplastrum adhæsivum.* It is also called *Strapping.*

*English Court Plaster* is a Sparadrap, (F.) *Taffetas agglutinatif, T. gommé, Tuffetas d'Angleterre; Ser'icum An'glicum, Emplas'trum Anglicum, E. Anglica'num, E. Adhæsi'vum Woodstock'ii, E. Ichthyocol'læ tclæ induc'tum, E. Glutino'sum, Tela Ichthyocol'læ glu'tinans, Isinglass Plaster.* It is made by stretching black silk, and brushing it over with a solution of *isinglass* ℥j, in *proof spirit* ℥xij, to which *tinct. benzoin* ℥ij, are added. When dry, this is repeated five times; after this, two coats are given it of a solution of *tereb. Chiæ* ℥iv, in *tinct. benz.* ℥vj, which render it less liable to crack.

*Liston's Isinglass Plaster* is made by spreading several coats of strong solution of isinglass in weak spirit over oiled silk, or, still better, over animal membrane previously prepared for the purpose from the peritoneal coat of the cæcum of the ox.

SPARADRAPUM PRO FONTIC'ULIS, *Issue Plaster,* is sometimes made of *simple diachylon,* ℔ij; *Burgundy pitch* and *sarcocolla,* each ℥iv; *common turpentine,* ℥j. Spread upon linen and polished with a moistened calendering glass rubber.

SPARADRAPUM seu TELA GALTERI, *Defensive Plaster,* (F.) *Toile de Gautier.* This is made of *olive oil,* ℔ss; *suet,* ℥iv; *wax,* ℥x; *litharge, common turpentine, thus,* and *mastich,* āā ℥ij; *bole armeniac, flour,* āā ℥j. Pour it, while liquid, upon cloth, and spread. Used for issues and to keep on dressings.

SPARADRA'PUM VESICATO'RIUM. Several substances have been introduced as substitutes for blistering plaster, (see Emplastrum Lyttæ,) under the names, *Tela vesicato'ria, Blistering Tissue,* &c., and other forms of which are the *Taffetas révicant, Papier épispastique, Charta vesicato'ria, Taffetas épispastique.* They are made of an ethereal or alcoholic extract of cantharides, or of cantharidin, mixed with wax and spread, in a very fine layer, on silk or paper previously oiled or waxed They are efficient agents.

SPARADRAPUM VIR'IDE, *Corn Plaster.* This may be made of *yellow wax,* ℔ij; *Burgundy pitch,* ℥xij; *common turpentine,* ℥vj; *verdigris,* ℥iij; spread on cloth and polished.

*Kennedy's Corn Plaster* is made of *yellow wax,* ℔j; *Venice turpentine,* ℥ij; *verdigris,* ℥j.

SPARADRAPUS, Sparadrapum.

SPARAGMA, Laceration.

SPARAGMOS, Spasm.

SPARAGUS, Asparagus.

SPARAL'LIUM, *Clyster uteri'nus.* An injection into the vagina.—Ruland and Johnson.

SPAREDIA. A ligature covered with the white of egg.—Paracelsus.

SPARGA'NIUM RAMO'SUM, *Great Burreed.* Indigenous; *Order,* Typhaceæ; flowering in July and August. The roots are subastringent, but esculent; yielding a fine fecula, similar to salep. They are sometimes made into a poultice for inflamed mammæ.

SPAR'GANON, *Spar'ganum,* from σπαργω, 'I swathe,' 'I wrap.' 'Swathing clothes;' a kind of bandage, with which children were formerly surrounded.—Foësius. Also, a fascia.

SPARGANO'SIS, *Spargo'sis, Intumescen'tia lac'tea mamma'rum, Mastodyn'ia polyg'ala,* from σπαργαω, 'I am ready to burst.' Extreme distention of the breasts by milk. Sparganosis also means the wrapping of a child in swathing clothes.

SPARGANOSIS PUERPERARUM, Phlegmatia dolens.

SPARGANUM, Sparganon.

SPARROWGRASS, Asparagus.

SPARSUS, Sporadic.

SPAR'TIUM JUN'CEUM, *Spanish broom.* A small European shrub, cultivated in the gardens of the United States, on account of its yellow flowers. The seeds are diuretic and tonic, in small doses; emetic and cathartic in large. They have been used in dropsy — 10 or 15 grains three times a day.

SPARTIUM SCOPA'RIUM, *Cyt'isus scopa'rius, Genis'ta, G. scopa'ria, Genis'ta hirsu'ta, Broom, Cytiso-genista,* (F.) *Génêt à balai. Family,* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. *Broom Tops, Spartii Cacumina, Scopa'rius,* Ph. U. S.,) have a bitter taste, and are possessed of diuretic properties. They have been used in dropsies. Dose, of the powder, ℈j to ʒj. All the genistæ have similar virtues. A decoction of genista, along with the cauterization of the pustules under the tongue, has been recommended in hydrophobia.

SPARTIUM TINCTORIUM, Genista tinctoria.

SPASM, *Spasmus, Sparag'mos, Synol'cē, Spado,* from σπαω, 'I draw.' The Greeks gave this name to all kinds of convulsions. It is now usually applied to involuntary muscular contractions: and these, again, have been divided into *tonic* spasm, *Paraton'ia,* which consists in permanent rigidity and immobility of the muscles that are the seat of it (see Tetanus); and *clonic* spasm, which consists in alternate contractions and relaxations (see Convulsion).

Cullen has a class, *Spasmi* — the *neurospasmi* of Fuchs.

SPASM, CLONIC, Convulsion — s. Cynic, see Canine laugh — s. of the Glottis, Asthma thymicum — s. of the Larynx, Asthma thymicum — s. with Rigidity, Tetanus.

SPASM, WRITERS'. Involuntary spasms of the muscles of the thumb and index finger, observed, at times, in those who are much accustomed to writing. See Cramp, writers'.

SPASMATICUS, Spasmoticus.

SPASMATODES, Spasmoticus.

*SPASME, DE LA GLOTTE ET DU THO-*

*RAX*, Asthma thymicum — *s. de la Vessie*, Cystospasmus.

SPASMI, see Spasm.

SPASMODES, Convulsive.

SPASMODIC, Spasmoticus.

SPASMOL'OGY, *Spasmolog''ia*, from σπασμος, 'spasm, and λογος, 'a treatise.' A treatise on spasms.

SPASMOLYGMUS, Singultus.

SPASMOT'ICUS, *Spasmat'icus*, *Spasmato'des*, *Spas'ticus*, *Spastic*, *Spasmod'ic*. Any thing relating to spasm. Also, an antispasmodic.

*Morbi constricto'rii*, *M. spasmot'ici*, &c., are diseases accompanied with spasm.

SPASMUS, Convulsion, Spasm — s. Aurium, Otalgia—s. Caninus, see Canine laugh—s. Clonicus, Convulsion—s. Cynicus, see Canine laugh—s. Facialis, Tic — s. Glottidis, Asthma thymicum —s. Linguæ, Glossospasmus—s. Maxillæ inferioris, Trismus—s. Muscularis, Cramp—s. Musculorum Facici, Canine laugh — s. Universalis, Synclonus—s. Ventriculi, see Cardialgia—s. Vesicæ, Cystospasmus.

SPAS'NIA, same etymon as Spasm. A term, used by Mercurialis, to designate the lancinating pain produced, at times, in the chest by violent fits of coughing.

SPASTIC, Spasmoticus, Tonic spasm.

SPASTICUM, Tetanic.

SPATHA, Hypaleiptron.

SPATHES'TER, from σπαω, 'I draw.' (?) A surgical instrument, used for drawing the prepuce over the glans, when too short.—P. Amman.

SPATHOMELE, Spatula.

SPATHULA, Scapula, Spatula — s. Fœtida, Iris fœtidissima.

SPATHYEMA FŒTIDA, Dracontium fœtidum.

SPAT'ILĒ, σπατιλη, 'human excrement.' A liquid fecal evacuation. Excrement. — Hippocrates.

SPATIUM ORIS, Mouth—s. Trigonum, Lyra.

SPAT'ULA, *Spath'ula*, diminutive of *Spatha*, σπαθη, 'a broad-sword.' *Spathome'lē*, *Specill'um latum*. An instrument used for spreading plasters, stirring ointments, holding down the tongue, &c. Also, the scapula.

Spatula pro Ore, Glossospatha.

SPEARWORT. Ranunculus flammula.

SPEAUTER, Zinc.

SPECIES, Powders, compound—s. Aromaticæ, Pulvis cinnamomi compositus — s. Diacinnamomi, Pulvis cinnamomi compositus — s. Diacretæ, Pulvis cretæ compos. — s. Diajalapæ, Pulvis jalapæ compositus—s. Diambræ sine odoratis, Pulvis cinnamomi compositus — s. Diatragacanthæ frigidæ, Pulvis tragacanthæ compositus—s. Hieræ picræ, Pulvis aloes cum canellâ—s. Lætificantes Rhazis, Pulvis ciunamomi compositus—s. e Scordio cum opio, Pulvis cretæ compositus cum opio —s. e Scordio sine opio, Pulvis cretæ compositus.

SPECIF'IC, *Specif'icus*, from *species*, 'a form or fashion,' and *facere*, 'to make.' A substance to which is attributed the property of removing, directly, one disease rather than any other. Probably no such remedy exists. *Mercury* in syphilis, and *sulphur* in the itch, have been regarded as the strongest examples.

Specific of Herrenschwand. A once celebrated German vermifuge. It is said to have consisted of 10 grains of *Gamboge*, with 20 of *Carbonate of Potassa*. It is affirmed, that mercury and arsenic have also been found in it. — Paris.

SPECIFICUM PARACELSI, Potassæ sulphas.

SPECIL'UM, *Melē*, *Stylus*, *Explorato'rium*, from *specio*, 'I examine,' *Specla'rion*, a probe, (F.) *Stylet*, *Sonde*. A surgical instrument, employed for examining wounds, fistulas, and for passing setons, &c. It is usually formed of silver; and is terminated, at one end, by an olive-shaped button. The *eyed probe* has an aperture at the other extremity.

Specillum, Everriculum, Hypaleiptron, Sound —s. Auricularium, Apyromele—s. Cereum, *Bougie*—s. Excavatum, Stylus excavatus—s. Latum, Spatula—s. Minus, Melotis.

SPECLARION, Specillum.

SPEC'TACLES, from *spectare*, 'to behold;' *Conspicil'la*, (F.) *Besicles*, *Lunettes ordinaires*, *Conserves*. Glasses to assist the sight; arranged so as to be adapted to both eyes. These glasses are more or less *concave* or *convex*, according as the sight is more or less short, (*myopic*,) or long, (*presbyopic*.) When the glass is adapted to one eye, it is called an *Eyeglass*, *Conspicil'lum*, *Perspicil'lum*, *Vitrum ocula're*.

SPECULA'RIS LAPIS. A transparent mineral, but of what nature is not clear, which was formerly employed in epilepsy. In old times it was used for glass.— Pliny.

SPEC'ULUM, *Catop'ter*, *Catop'tron*, *Diop'tron*. In Latin, 'a mirror;' from *specio*, 'I see.' In *surgery*, it means different instruments for dilating cavities, and facilitating their examination. See Dilator. There are various instruments of this kind, — the *S. Ani*, *S. Auris*, *S. Vaginæ*, (*Colpeuryn'ter*, *Elytreurynter*,) *S. Matri'cis*, *S. Oculi*, *S. Oris* ((F.) *Baillon*,) *S. Gutturis*, *S. Vesicæ*.

Speculum Citrinum, Orpiment — s. Indicum, Ferri limatura—s. Lucidum, Septum lucidum—s. Oris, Glossocatochus—s. Veneris, Achillea millefolium.

SPECUS, Vulva — s. Cordis, Ventricle of the Heart—s. Pro medullâ spinali, see Vertebral column—s. Vertebralis, see Vertebral column.

SPEDALSKE, see Radzyge.

SPEDALSKHED, see Radzyge.

SPEECH, Voice, articulated.

SPEECHLESSNESS, Mutitas.

SPEEDIMAN'S PILLS, see Pilulæ aloes et myrrhæ.

SPEEDWELL, BROOKLIME, Veronica beccabunga—s. Female, Antirhinum elatine—s. Officinal, Veronica—s. Purslain, Veronica peregrina —s. Water, Veronica beccabunga.

SPELTRUM, Zincum.

SPERAGUS, Asparagus.

SPERM, from σπειρω, 'I sow.' *Spermat'ie fluid* or *liquor*, *Sem'inal fluid*, *Seed*, *Semen*, *S. viri'lē* seu *masculi'num* seu *genita'lē*, *Semin'ium*, *Genita'lē*, *Medul'læ*, *Rytis'ma*, *Ros*, *Sanguis*, *Serum*, *Humor genita'lis* seu *semina'lis* seu *venereus*, *Uri'na genita'lis*, *Genitu'ra*, *Sperma*, *S. viri'lē*, *Spermi'um*, *Tho'rē*, *Tho'rus*, *Lac maris*, *Lagne'a*, *Lagni'a*, *Lagneu'ma*, *Germen*, *Male's milk*, *Prop'agatory* or *genital liquor*, *Vita'lē virus*, *Vital* or *quickening venom*, (F.) *Semence*, *Fluide seminal*. A whitish, viscid fluid, of a peculiar smell, secreted by the testicles, whence it is carried by the vasa deferentia to the vesiculæ seminales, to be thrown into the vagina, during coition, through the ejaculatory ducts and the urethra. It is the fecundating fluid, and must come into actual contact with the germ of the female. The *Aura sem'inis*, *Gonau'ra*, is incapable of effecting fecundation. The semen, at the time of emission, is composed of two different fluids; the one liquid and transparent, which is considered to be the secretion of the prostate,— the other, white, and as thick as mucilage; the product of the testicular secretion. The sperm contains, according to Vauquelin, 900 parts of water, 50 of animal mucilage, 10 of soda, and 30 of calcareous

phosphate. The animal matter is peculiar, and by some termed *spermatin*.

Microscopic observations show that it contains *spermatozo'a*, or more properly *spermatozo'ids*; for their animalcular nature is not demonstrated. They are produced in cells — *sperm-cells* — and have probably no more title to be considered animalcular, than the cilia of the ciliated epithelium. By careful examination, other minute, round, granulated bodies may almost always be detected, which are in all cases much less numerous than the spermatozoa. These bodies are the *seminal granules, gran'ula sem'inis*. Pure sperm, in its most perfect state, consists principally of spermatozoids and seminal granules; both of which are enveloped in a small quantity of fluid, *liquor sem'inis*.

It has been imagined, but erroneously, that during coition there is a secretion of female sperm —*Semen mulie'brē, Thelyg'onum*. The increased secretion that takes place is chiefly from the glands of Duverney.

Sperm also means spermaceti.

Sperm Cell, see Sperm.

SPERMA, Sperm — s. Mercurii, Hydrargyrus acetatus.

Sperma Rana'rum, *Spermī'ola* seu *Sperni'olum* seu *Spermi'ola* seu *Spermi'olum rana'rum*. Frog's spawn. Once used in medicine.

SPERMACETI, Cetaceum—s. Whale, see Cetaceum.

SPERMACRASIA, Spermatorrhœa.

SPERMATACRASIA, Spermatorrhœa.

SPERMATACRATIA, Spermatorrhœa.

SPERMAT'IC, *Spermat'icus, Semina'lis, Sem'inal*. That which relates to the sperm. A name given to different parts connected with the organs of generation.

Spermatic Arteries, *A. Spermat'icæ, A. præparan'tes*, (F.) *Artères testiculaires, A. de l'ovaire* (Ch.), are two in number—one on each side—and arise from the sides of the aorta, sometimes from the renal arteries. They descend, almost vertically, at the sides of the vertebral column, and are distributed differently in the two sexes. In man, the spermatic artery, situate at the side of the vas deferens, issues by the abdominal ring; gives numerous ramifications to the spermatic chord, and divides into two fasciculi of branches, one of which goes to the testicle,—the other to the epididymis. In the female, the spermatic artery, *ova'rian artery*, dips into the pelvis, and passes to the ovarium, Fallopian tube, and round ligament.

Spermatic Chord, *Testic'ular Chord, Funic'ulus Spermaticus, Corpus varico'sum*, (F.) *Cordon spermatique* ou *testiculaire*. The vascular and nervous chord, by which the testicle is suspended. It is composed of the spermatic artery and veins; of other small vessels; of lymphatics; of nervous filaments from the spermatic plexus, and from the genito-crural branch of the lumbo-abdominal plexus; of the vas deferens, and, very often, of a fibro-cellular chord, which unites the peritoneum to the upper part of the tunica vaginalis, and in which encysted hydrocele of the spermatic chord occurs. All these parts are united together by a very lax, areolar tissue, and surrounded by coats, which, reckoning from without, are: — 1. The skin and areolar membrane. 2. A fibro-cellular membrane, formed by the fascia superficialis. 3. A very thin layer, formed by fibres of the cremaster muscle, united archwise before, and often also behind, the chord. 4. The proper sheath of the spermatic vessels, or the tubular prolongation furnished by the fascia transversalis to the chord, on a level with the superior orifice of the inguinal canal. The spermatic chord is commonly shorter on the right side than on the left; and of a different size in different individuals. It ascends, almost vertically, from the superior margin of the testicle as far as the lower orifice of the inguinal canal; passes through this canal and enters the abdomen, crossing the epigastric artery. Here it forms an evident elbow, directing its course backward. At this part, also, the organs composing it separate from each other: — the vas deferens descending into the pelvis to pass behind the bladder;—the blood-vessels and lymphatics ascending towards the lumbar region, &c.

Spermatic Fluid, Sperm.

Spermatic Ganglion. A large ganglion, formed by branches from the hypogastric ganglion, and from the spermatic plexus. It supplies the fundus uteri. Besides these ganglia, Dr. Robt. Lee describes *ves'ical* and *vag''inal ganglia*, and anterior and posterior *subperitone'al ganglia* and *plexuses*, which communicate with the preceding, and constitute an extensive nervous rete over the entire uterus.

Spermatic Liquor, Liquor, Sperm.

Spermatic Passages or Ways, *Viæ Spermaticæ*, are the canals concerned in the excretion of semen.

Spermatic Plexuses of nerves, *Plexus testiculares*, are two in number, and are furnished by the renal plexuses. Their filaments, called *Spermatic nerves*, follow the arteries of the same name to the testicle in man; and to the ovary and Fallopian tube in the female,—*ova'rian nerves*. They cannot be traced into the substance of these organs.

Spermatic Veins are two or three in number, on each side. They accompany the spermatic artery, and open — those of the right, into the vena cava inferior; those of the left, into the corresponding renal vein. These veins form, above the testicle, a kind of venous network, called, by some, the *Spermatic Plexus*; and another plexus before the psoas muscle, called the *Corpus pampiniforme*.

SPERMATIN, see Sperm.

SPERMATIS'MUS, *Emis'sio sem'inis*, from σπερμα, 'sperm.' The emission of sperm.

SPERMATOCE'LĒ, *Hernia semina'lis scroti, Oscheoce'lē semina'lis, Gonoce'lē*, from σπερμα, 'sperm,' and κηλη, 'a tumour.' The ancients gave this name to certain swellings of the testicle which were regarded as produced by an accumulation of sperm in the organ. Also, varicocele.

SPERMATOCLEMMA, see Pollution.

SPERMATOCLEPSIS, see Pollution.

SPERMATOCYSTIDORRHAG''IA, *Caulorrhag''ia ejaculato'ria, Hæmatu'ria ejaculato'ria, H. semina'lis*, from σπερμα, σπερματος, 'sperm,' κυστις, 'bladder,' and ραγη, 'a breaking forth.' A discharge of blood from the urethra, or the act of ejaculation of sperm.

SPERMATODES, Gonoides.

SPERMATOGON'IA, *Spermogon'ia, Spermatopœ'ia, Spermatopoë'sis, Spermi'um*, from σπερμα, 'sperm,' and γενναω, 'to beget.' The preparation or secretion of sperm.

SPERMATOID, Gonoides.

SPERMATOLEPSIS, see Pollution.

SPERMATOLIPSIS, see Pollution.

SPERMATOL'OGY, *Spermatolog''ia*, from σπερμα, 'sperm,' and λογος, 'a discourse.' A treatise on sperm.

SPERMATOPHI'OROUS, *Seminif'erous*, from σπερμα, 'sperm,' and φερω, 'I carry.' Sperm-bearing. The cells or granules in the sperm have been so called.

SPERMATOPŒIA, Spermatogonia.

SPERMATOPOESIS, Spermatogonia.

SPERMATOPOETIC, Spermatopœus.

SPERMATOPŒ'US, *Spermatopoët'icus, Spermatopoiet'icus, Spermatopoët'ic, Gonepœ'us, Gonepoiet'icus, Gonopoiet'icus,* from σπερμα, 'sperm,' and ποιειν, 'to make.' Food, to which has been attributed the property of augmenting the secretion of semen; and, consequently, of exciting the venereal act. Very succulent and very nutritious substances have been so considered.

SPERMATORRHŒ'A, *Spermorrhœ'a, Spermacra'sia, Spermatoze'mia, Spermatacra'sia, Gonacra'sia, Gonacrati'a, Spermatacrati'a, Gonorrhœ'a vera,* (F.) *Flux de Sperme, Pollutions, Pertes séminales;* from σπερμα, 'sperm,' and ρεω, 'I flow.' An emission of sperm, without copulation. See Gonorrhœa, and Pollution.

SPERMATORRHŒA ATONICA, Gonorrhœa laxorum.

SPERMATOS'CHESIS, from σπερμα, 'sperm,' and σχεσις, 'retention.' Retention or suppression of the spermatic secretion.

SPERMATOZEMIA, Spermatorrhœa.

SPERMATOZO'A, *Zoosper'mata,* from σπερμα, 'sperm,' and ζωον, 'animal.' *Zoöspermes, Spermatozoäires, Spermatozo'ids, Animal'cula semina'lia* seu *spermat'ica, Vermic'uli spermat'ici, Seminal filaments, Spermatic* or *seminal animalcules* (?). Reputed animalcules seen in the sperm; by most physiologists supposed to be the formative agents in generation. See Sperm.

*SPERMATOZOAIRES,* Spermatozoa.

SPERMATOZOIDS, Spermatozoa.

SPERMIOLUM RANARUM, Sperma ranarum.

SPERMIUM, Sperm, Spermatogonia.

SPERMOBOLE, see Ejaculation, Spermatismus.

SPERMOEDIA CLAVUS, Ergot.

SPERMOGONIA, Spermatogonia.

SPERMORRHŒA, Spermatorrhœa.

SPERNIOLUM RANARUM, Sperma ranarum.

SPEWING, Vomiting.

SPHACELATION, Mortification.

*SPHACÈLE,* Sphacelus — *s. de la Bouche,* Cancer aquaticus.

SPHACELIA SEGETUM, see Ergot.

SPHACELISMUS, Sphacelus — s. Cerebri, Phrenitis.

SPHAC''ELUS, *Gangræ'na Sphacelus, Sphacelis'mus, Cold mortification,* (F.) *Sphacèle, Gangrène froide,* from σφαζω, 'I slay.' This word is used, by some, synonymously with gangrene; by others, with gangrene when it occupies the whole substance of a limb. Commonly, it means the disorganized portion, in cases of mortification, *anthraconecro'sis,* which must be thrown off—or is, in other words, totally dead. The foul disorganized portion of an ulcer—called the *slough*—must be considered a kind of sphacelus.

Sphacelus was formerly used to denote excessive pain; and for agitation from excessive pain, or violent emotion.

SPHACELUS CEREALIS, Ergotism — s. Nosocomialis, Hospital gangrene.

SPHÆRA, Pila — s. Marina, Pila marina — s. Thalassia, Pila marina.

SPHÆRANTHUS INDICUS, Adaca.

SPHÆRIDION, Pilula.

SPHÆRION, Globule, Pilula.

SPHÆROCEPHALA ELATIOR, Echinops.

SPHÆROCOCCUS CRISPUS, Fucus crispus — s. Helminthochortus, Corallina Corsicana — s. Lichenoides, Fucus amylaceus.

SPHÆRULÆ SANGUINIS, Globules of the blood.

SPHAGE, Throat.

SPHENDONE, Funda.

SPHENOID, *Sphenoï'des, Spheno'des, Sphenoideus, Sphenoïda'lis,* from σφην, 'a wedge,' and ειδος, 'resemblance.' Wedge-shaped. Hence,

SPHENOID BONE, *Sphenoïdes os, Os basila'rē* seu *cuneifor'mē* seu *cu'neo compara'tum* seu *sphenoïda'lē* seu *multifor'mē* seu *az'ygos* seu *papilla'rē* seu *polymor'phon* seu *paxilla'rē* seu *baxilla'rē* seu *alæfor'mē* seu *sphecoï'des* seu *vespifor'mē* seu *inconjuga'tum, Pter'ygoid bone.* An azygous bone, situate on the median line, and at the base of the cranium. It articulates with all the other bones of that cavity; supports them, and strengthens their union. Its form is singular, and resembles a bat with its wings extended. It has, 1. An *inferior* or *guttural surface,* on which is situate the crista, that joins the vomer; a channel, which concurs in forming the pterygo-palatine foramen; the pterygoid process; the pterygoid fossa; the scaphoid depression; the Vidian or pterygoid canal; the foramina — ovale, spinale, &c. 2. A *superior* or *cerebral surface,* on which are: — the clinoid processes; the pituitary fossa; the foramina (ovale, rotundum, and spinale); the *Apophysis of Ingrassias* or lesser wing; the foramen opticum, &c. 3. An *occipital* or *posterior surface,* which is articulated with the basilary process of the occipital bone. 4. An *anterior* or *orbitarnasal surface;* having, anteriorly, a crista to unite with the ethmoid bone; and, on each side, a round aperture, which leads into two cavities in the substance of the bone, separated by a middle septum, and called the *sphenoidal sinuses.* 5. Two *zygomato-temporal* or *external surfaces,* which correspond to the temporal and zygomatic fossæ.

Some divide the sphenoid into *body* or *middle portion;* and *alæ,* which are four in number, and are subdivided into *great* (*Temporal Plates* or *Wings*) and *little* (*Apophyses of Ingrassias*). The *Sphenoid suture* surrounds the bone.

SPHENOID, SPINOUS PROCESS OF THE, Sphenoid spine.

SPHENOID'AL, *Sphenoïda'lis.* That which belongs or relates to the sphenoid bone.

SPHENOIDA'LIA COR'NUA, (F.) *Cornets sphénoïdaux, Cornets de Bertin; Ossic'ula Berti'ni, Ossa triangula'ria, Pyr'amids of Wistar.* Two small, thin, and curved bones, situate between the sphenoid and ethmoid, with which they are confounded in the adult. They have the shape of a hollow pyramid, with the base turned backwards; and are developed by a single point of ossification. They are articulated with the sphenoid, ethmoid, palate bone, and vomer.

SPHENOIDAL OR SUPE'RIOR OR'BITARY FISSURE, *Fora'men lac''erum supe'rius,* (F.) *Fente sphénoïdale,* is a large fissure, situate between the great and little ala of the sphenoid. It is seen at the upper and back part of the orbit between which and the cranium it is a means of communication.

SPHENOIDAL SPINE, (F.) *Épine sphénoïdale, Spinous Process of the Sphenoid;* — 1. A projecting crista at the inferior surface of the sphenoid-bone, for articulation with the vomer. 2. A triangular process, *Apophyse sous-temporale* (Ch.), met with near the posterior margin of the same bone, behind the foramen spinale. At the point of the spinous process, a *styloid process* is frequently met with.

SPHENOIDES, Cuneiform, Sphenoid — s. Os Sphenoid bone.

SPHENOMAX'ILLARY, *Spheno-maxilla'ris* That which relates to the sphenoid and maxillary bones.

SPHENOMAXILLARY FISSURE, *Inferior or'bitar*

*Fissure*, (F.) *Fente sphéno-maxillaire* ou *orbitaire inférieure*; called, also, *Fora'men lac''erum infe'rius*, *F. spheno-maxilla're*, is situate at the posterior part of the angle formed by the union of the internal and inferior parietes of the orbit. It is constituted, above, by the sphenoid bone; below, by the superior maxillary and palate bones; and, before, by the malar bone. It is narrower at the middle than at the extremities, and forms a communication between the orbitar cavity and the zygomatic fossa.

Sphenomaxillary Fossa is a name given by some anatomists, to a depression at the union of the sphenomaxillary and pterygomaxillary fissures.

SPHENO-ÖR'BITAR. A name given, by Béclard to the anterior part of the body of the sphenoid bone, which is developed by a variable number of points of ossification.

SPHENOPAL'ATINE, *Sphenopalati'nus*. That which relates to the sphenoid and palate bones.

Sphenopalatine Artery, *Large lateral nasal A.*, is the termination of the internal maxillary. It enters at the posterior part of the superior meatus of the nose, through the spheno-palatine foramen, and spreads its numerous branches on the pituitary membrane covering the septum, the cornua, and the meatus.

Sphenopalatine Fora'men is a round aperture, formed by the vertical portion of the os palati and the sphenoid. It establishes a communication between the nasal fossæ and the zygomatic fossa.

Sphenopalatine Ganglion, *Ganglion of Meckel*, *Sphenoïd'al G.* (Ch.) A small, nervous, cordiform, or triangular ganglion, of variable size, situate without the foramen sphæno-palatinum, in the pterygomaxillary fissure. It seems suspended by several nervous filaments to the trunk of the superior maxillary nerve, and gives off *internal* or *sphenopalatine filaments*, *inferior* or *palatine filaments*, and a *posterior filament*, which is the *Vidian* or *pterygoid nerve*.

Sphenopalatine Nerves, *Lat'eral nasal nerves*, arise from the ganglion — just described — at its inner part, and enter the nasal fossæ by the sphenopalatine foramen. They are five or six in number, and distribute their filaments to the outer and inner parietes of the nasal fossæ. One of the most remarkable branches is the *Naso-palatine*.

SPHENOPALATINUS, Levator palati.

SPHENOPARI'ETAL, *Spheno-parieta'lis*. That which belongs or relates to the sphenoid and parietal bones.

Sphenoparietal Suture is formed by the articulation of the extremity of the greater ala of the sphenoid with the anterior and inferior angle of the parietal bone.

SPHENO-PTERYGO-PALATINUS, Circumflexus — s. Salpingostaphylinus, Circumflex — *s. Salpingo-mallien*, Laxator tympani.

SPHENOSIS, see Wedged.

SPHENOSTAPHYLINUS, Levator palati.

SPHENOTEMP'ORAL, *Spheno-tempora'lis*. That which belongs to the sphenoid and temporal bones.

Sphenotemporal Suture is the suture at the articulation of the great alæ of the sphenoid bone with the squamous portion of the temporal. Béclard gives the name *sphenotemporal* to the posterior part of the body of the sphenoid, which is developed by distinct points of ossification.

SPHEX, Wasp.

SPHINCTER, *Constric'tor*, *Musc'ulus constricto'rius*, from σφιγγω, 'I constrict.' A name given to several annular muscles, which constrict or close certain natural openings.

Sphincter Ani, *Annula'ris Ani*. Many anatomists have described two sphincter muscles of the anus: — 1. The *S. exter'nus*, *Aspidis'cos*, *S. cuta'neus*, *Coccygio-cutané-sphincter*, *Orbicula'ris Recti*, *Constric'tor Ani*, *Coccygio-anal*, (Ch.) It is situate around the anus; is elliptical from before to behind; flattened, and pierced at its middle. Its fibres describe concentric arcs, which are attached, behind, to the extremity of the coccyx, by a dense, areolar substance; and are confounded, anteriorly, with the bulbo-cavernosi and transversi perinæi muscles. This muscle contracts and closes the anus. 2. The *inner* or *internal Sphincter Ani*, *Sphincter intestina'lis* of Winslow, is by many anatomists considered as the termination of the circular fibres of the rectum. It is annular, and situate around the inferior extremity of the rectum, to the extent of about a finger's breadth. It has the same uses as the other.

Sphincter Gulæ, Constrictores pharyngis — s. Ilei, Bauhin, valve of — s. Intestinalis, Sphincter ani internus — s. Labiorum, Orbicularis oris — s. Oculi, Orbicularis palpebrarum — s. Palpebrarum, Orbicularis palpebrarum — s. Pylori, see Pylorus — s. Vaginæ, Constrictores cunni — s. Ventriculi, Pylorus.

Sphincter Vesi'cæ, *Sphincter of the bladder*. Some anatomists have given this name to whitish, elastic, and circular fibres, which surround the neck of the bladder, but do not constitute a particular muscle. Morgagni has given the name Pseudo-Sphincter to the anterior fibres of the levator ani, which pass beneath the neck of the bladder, and, by their contraction, close that opening. See Compressor urethræ.

SPHONDYLIUM, Heracleum spondylium.

SPHONGUS, Spongia.

SPHRAGIDONYCHARGOCOME'TA, from σφραγις, 'a seal,' ονυξ, 'the nail,' αργος, 'white,' or perhaps αργυρος, 'silver,' and κομεω, 'I adorn.' A charlatan who adorned his fingers to the very nails with rings. — Aristophanes, Hippocrates.

SPHYGMA, Pulse.

SPHYG'MICA ARS, *Sphygmic art*, from σφυγμος, 'the pulse.' The art of judging by the pulse, in health or disease.

Sphygmica Doctrina, Sphygmologia.

SPHYGMICUS, Throbbing.

SPHYGMOCEPHALUS, Crotaphe.

SPHYGMODES, Throbbing.

SPHYGMOLOG''IA, *Sphyg'mica Doctri'na*, from σφυγμος, 'the pulse,' and λογος, 'a description.' The doctrine of the pulse.

SPHYGMOMETER, Pulsilegium.

SPHYGMOS, Pulsation, Pulse.

SPHYGMOSCOPIUM, Pulsilegium.

SPHYRA, Malleolus.

SPHYXIS, Pulsation.

*SPIC*, Lavendula.

SPICA, *Fas'cia repens*, the *Spica bandage*, (F.) *Épi*. A bandage so called in consequence of its somewhat resembling a *spike* of barley. The turns of the bandage cross like the letter V; — each leaving a third of the roller uncovered. It is distinguished into *ascending* and *descending*. It may be applied over various parts of the body, and in a different manner in each case; thus, there is the *Spica* seu *Fascia inguina'lis*, *Spica inguina'lis duplex*, the spica for the shoulder, and another for the thumb.

Spica, Lavendula.

Spica Alpina, Valeriana Celtica — s. Celtica, Valeriana Celtica — s. Indica, Nardus Indica — s. Nardi, Nardus Indica.

SPICEBERRY, Gaultheria, Laurus Benzoin.

SPICEBUSH, Laurus Benzoin.

SPICES, FOUR, see Myrtus pimenta.

SPICEWOOD, Laurus Benzoin.

SPICILLUM, Specillum.

SPIDER, see Araneæ tela.

SPIDERWORT, Liliago, Tradescantia Virginica.

SPIGELIA, S. Marilandica.

Spige'lia Marilan'dica, *Anthel'mia, Spige'lia Lonic''era, Lonic''era Marilan'dica, Peren'nial Wormgrass* or *Indian Pink, Caroli'na Pink, Starbloom, Wormroot. Nat. Ord.* Gentianeæ. *Class,* Pentandria. *Order,* Monogynia. Indigenous. The root—*Spigelia* (Ph. U. S.)—is celebrated as an anthelmintic, particularly in cases of lumbrici.

It is, also, asserted to have been found serviceable in remittent fever. It is a narcotico-acrid. Dose, gr. x to ʒss.

SPIGNEL, Æthusa meum.

SPIKENARD, Conyza squarrosa, Nardus Indica — s. American, Aralia racemosa — s. Small, Aralia nudicaulis—s. Tree, Aralia spinosa.

SPILANTHES ACMELLA, Spilanthus acmella.

SPILAN'THUS ACMEL'LA, *S, cilia'ta* seu *fimbria'ta, Spilan'thes acmel'la, Bidens acmella, Achmella, Acmella, A. Mauritiana, Verbesi'na acmella, Balm-leaved Spilanthus. Family,* Corymbiferæ. *Sex. Syst.* Syngenesia Polygamia æqualis. This plant possesses a glutinous, bitter taste, and fragrant smell. The herb and seed are said to be diuretic and emmenagogue. They have been used in dropsies, jaundice, fluor albus, and calculous complaints; given in infusion.

Spilanthus, Balm-leaved, Spilanthus acmella — s. Ciliata, S. acmella — s. Fimbriata, S. acmella.

Spilanth'us Olera'ceus, *Spear-leaved Spilanthus,* (F.) *Cresson de Para.* A tincture of the plant has been recommended in toothach.

SPILI, see Nævus.

SPILOMA, see Nævus.

SPILOSIS, Epichrosis — s. Ephelis, Ephelides s. Poliosis, Poliosis.

SPILSBURY'S ANTISCORBUTIC DROPS. An empirical preparation, formed of *hydrarg. oxymur., rad. gentian., cort. aurant. sicc.* āā ʒij; *antimon. crud., santal. rubr.* āā ʒj; *spiritus vini rectif., aquæ,* āā ʒviij.

SPINA, 'a thorn;' *Spine,* (F.) *Épine.* A process on the surface of a bone, which has been compared to the spines or thorns on certain vegetables. The chief processes of this name are:—the *nasal spine,* the *spine of the scapula,* the *spine of the ischium,* the *four iliac spines,* the *palatine spine,* the *maxillary,* the *sphenoid,* &c. The *spine of the back* is the collection of vertebræ constituting the *vertebral column.*

Spina, Penis — s. Acida, Oxycantha Galeni — s. Ægyptiaca, see Acaciæ gummi — s. Alba, Carduus marianus, Mespilus oxycantha, Onopordum acanthium — s. Bifida, Hydrorachis — s. Cervina, Rhamnus — s. Domestica, Rhamnus —s. Dorsi, Vertebral column, see Nasus—s. Dorsi introrsum Flexa, Lordosis — s. Ferrea, Pin — s. Helmontii, *Aiguillon* — s. Hirci, Astragalus verus — s. Infectoria, Rhamnus — s. Nodosa, Rachitis.

Spina Vento'sa, *Spinæ ventos'itas, Tere'do, Fungus Artic'uli, Ostarthroc'acē, Tumor fungo'sus artic'uli, Lu'pia junctu'ræ, Hyperspon'gia, Flatus spinæ, Arthroc'acē, Pædarthroc'acē, White Swelling* (of some,) *Sidera'tio Ossis, Cancer Ossis, Gangræ'na Ossis, Exosto'sis.* A term of no definite meaning, as is obvious from these various words having been considered its synonymes. By some, it is defined to be — a disease of the osseous system, in which the texture of the bone dilates, seeming to be distended with air, and constituting a variety of osteo-sarcoma. By others, it is considered to be a tumour arising from an internal caries of a bone; occurring most frequently in the carpus or tarsus. The term itself is a translation from the Arabic of Rhazes. See, also, Hydrarthrus, and Mollities Ossium.

Spina Vertebralis, Vertebral column.

SPINACH, Spinacia.

SPINACHIA, Spinacia.

SPINA'CIA, *Spina'chia, Spina'cia olera'cea, Spin'age, Spinach,* (F.) *Épinard. Family,* Atriplicеæ. *Sex. Syst.* Dicœcia Pentandria. A plant which resembles the cabbage in its dietetic powers. The leaves boiled, with the addition of oil, form a good emollient cataplasm. It has been used in phthisical complaints; but its medicinal properties, if it have any, are not now regarded.

Spinacia Oleracea, Spinacia.

SPINÆ, Spinous processes — s. Ventositas Spina ventosa.

SPINAGE, Spinacia.

SPINAL, *Spina'lis, Spino'sus, Spina'tus,* (F.) *Épinière,* from *spina,* 'the spine.' That which relates to the vertebral column.

Spinal Arteries are two in number, viz: 1. The *posterior spinal, Artère médiane postérieure du Rachis,* (Ch.) It arises from the vertebral, near the corpora pyramidalia, and descends on the posterior surface of the spinal marrow, distributing its ramifications to it. 2. The *anterior spinal artery, A. médiane antérieure,* (Ch.,) is larger than the last, and arises, also, from the vertebral. It descends, in a serpentine manner, upon the anterior surface of the marrow; furnishes ramusculi to it, and unites with that of the opposite side, opposite the foramen magnum occipitis. A very tortuous branch arises from this union, which descends as far as the inferior extremity of the marrow, to which it sends numerous divisions.

The term *Spinal Arteries* or *Rachinian Arteries* is also given, in the abstract, to all the arteries of the spinal marrow and vertebral canal. The same may be said of the veins and nerves.

Spinal Cord, Medulla spinalis.

Spinal Foram'ina, (F.) *Trous rachidiens,* in the abstract, are the foramina formed by every two contiguous vertebræ, through which the spinal nerves issue. See Vertebral. The term *Fora'men Spina'lē* is especially applied, however, to a small foramen, in front of the spinous process of the sphenoid bone, through which the middle artery of the dura mater enters the cranium. It is, likewise, called *Foramen spheno-spino'sum,* (F.) *Trou Sphéno-épineux* ou *petit rond, Trou épineux.*

Spinal Irrita'tion, *Rhachialgi'tis, Rhachial'gia, Neural'gia spina'lis, Notal'gia.* A modern pathological view, which refers most nervous diseases to irritation of the spinal cord. This irritation is presumed to be indicated by tenderness on pressure over the spinous process of one or more vertebræ, or over the nerves proceeding from the cord and distributed to the parts at the sides of the spine. Such tenderness, however, by no means indicates the pathological condition in question, as it is often met with in those enjoying perfect health. The treatment advised is cupping and counter-irritation on each side of the spine, which may be beneficial in such diseases, no matter what part of the frame may be in a morbid state, by exciting a new and revelent impression on a very sensible portion of the cutaneous surface.

Spinal Nerve, *Ac'cessory of the Par vagum* or *8th pair, Accessory nerve of Willis, Spinal Accessory, Spino-cranio-trapézien, Superior respiratory N., Eleventh pair of encephalic nerves, Trachélo-dorsal* (Ch.), arises from the medulla spi-

nalis, within the vertebral canal, between the anterior and posterior roots of the cervical nerves at a greater or less distance from the cranium. The roots unite to form the nerve, which ascends into the cranium through the foramen magnum of the occipital bone, and issues by the foramen lacerum posterius, crossing the sterno-cleido-mastoideus, to which it gives filaments, and losing itself entirely on the trapezius muscle. The pneumogastric and spinal accessory nerves together—*nervus vagus cum accesso'rio*—resemble the spinal nerves; the former, with its ganglion, being the posterior root; the latter, the anterior.

Spinal Nerves, Vertebral nerves—s. Prolongation, Medulla spinalis.

Spinal System of Nerves, see Nerves.

SPINALES COLLI MINORES, Interspinales colli—s. et Transversales lumborum, Transversalis dorsi.

SPINALIS CERVICIS, Semi-spinalis colli—s. Colli, Semi-spinalis colli.

Spinalis Dorsi, *Grand épineux du dos, Spinalis Dorsi major.* Winslow calls thus some fleshy fasciculi, which are situate on the lateral surfaces of the spinous processes; from the third dorsal vertebra to the first or second lumbar; and which form part of the transverso-spinalis of most authors. The same anatomist calls—*Spina'lis Dorsi minor, Petit épineux du dos*—some small, fleshy fibres, situate on each side of the interspinal ligament. They are short, flat, and pass from one spinous process to the other. Like the preceding, they form part of the transverso-spinalis. All these fleshy fasciculi strengthen the vertebral column.

SPINATI, Interspinales colli.

SPINATUS, Spinal.

SPINDLE TREE, Euonymus Americanus.

SPINE, Vertebral column—s. Curvature of the, Gibbositas—s. Hæmal, Sternum—s. Neural, Spinous process.

SPINI-AXOIDO-OCCIPITALIS, Rectus capitis posticus major—*s. Axoïdo-trachéli-atloïdien,* Obliquus inferior capitis.

SPINITIS, Myelitis.

SPINO-DORSITIS, Myelitis.

SPINOLA, see Hydrorachis.

SPINOSUS, Spinal.

SPINOUS, *Spino'sus,* (F.) *Épineux.* Having the shape of a spine or thorn.

Spinous Proc''esses or Apoph'yses *of the Ver'tebræ, Acan'thæ, Spinæ, Cynol'ophoi, Neural Spines* of Mr. Owen, (F.) *Apophyses épineuses,* are situate at the posterior part of each vertebra, and afford attachment to the muscles, whose office it is to extend the spine. See Vertebra.

SPIRAC'ULA, (F.) *Spiracules,* from *spiro,* 'I breathe.' Respiratory pores of the skin.

SPIRÆ CEREBRI, Convolutions, cerebral.

SPIRÆA DENUDATA, S. ulmaria.

Spiræ'a Filipen'dula, *Filipendula, Saxif'raga rubra, Dropwort,* (F.) *Filipendule. Family,* Rosaceæ. *Sex. Syst.* Icosandria Pentagynia. The root of this plant is said to possess astringent and lithontriptic virtues.

Spiræa Tomentosa, *Hardhack, Red meadow-sweet, Steeple bush, Rosy bush, White leaf.* This indigenous species, which is abundant in the northern States of the Union, is tonic and astringent; and is usually administered either in the form of extract or decoction, (*Spirææ* ℥ss; *aquæ* Oj.)

Spiræa Trifoliata, Gillenia trifoliata.

Spiræa Ulma'ria, *S. denuda'ta, Ulmaria, U. palus'tris, Regi'na Prati, Barba capræ, Meadow Sweet, Queen of the Meadows, Bar'bula capri'na,* (F.) *Ulmaire, Reine des Près.* The leaves have been recommended as mild astringents:—the flowers as antispasmodics and diaphoretics.

SPIRAMENTA PULMONUM, see Pulmo.

SPIRAMENTUM ANIMÆ, Pulmo.

SPIRAMINA PALPEBRARUM, Lachrymal puncta—s. Pulmonum, see Pulmo.

SPIRATIO, Respiration.

SPIRIT, *Spir'itus;* from *spirare,* 'to exhale;' (F.) *Esprit.* A name given to every liquid product of distillation. Spirits were formerly distinguished into—*inflammable, acid,* and *alkaline;* and consequently a number of substances were crowded together, which often resembled each other in no other property than in being volatile. The term is now confined to alcoholic liquors, of which the following are the chief:

*Arrack.* Distilled from coarse palm sugar, named jaggery, fermented with the bark of the Mimosa *leucophlea;* also from rice and the fermented juice of the Palm; made in India. Its varieties are:—

1. *Mahwah Arrack.* Made in India from the flowers of the Madhuca tree, Bassia *butyracea.*

2. *Tuba.* Made from palm wine, in the Philippine Islands.

*Araka.* Distilled, by the Tartars, from koumis, fermented mares' milk.

*Aroki.* Distilled from dates, by the Egyptians.

*Arika.* A variety of koumis, distilled from fermented mares' milk, in Tartary and Iceland.

*Brandy.* Distilled from wine, figs, peaches, persimmon, apple, mulberries, and sometimes other fruits, in Europe, Asia, North and South America, wherever wine is made. The best brandy is that of Cognac; the next, that of Bordeaux and Rochelle. The varieties are—

1. *Aguardiente,* (S.) In Peru, the common brandy obtained from grapes is the *Aguardiente de Pisco,* so called, because shipped at the port of Pisco. Another kind, much dearer, and of excellent flavour, is made from Muscatel grapes, and is called *Aguardiente de Italia.* It is sometimes seen in the United States.

2. *Lau.* Made from rice, in Siam.

3. *Rakia.* Made in Dalmatia from the husks of grapes mixed with aromatics.

4. *Rossolio.* Made at Dantzic, from a compound of brandy, rossolis, and other plants.

5. *Troster.* Made on the Rhine, from the husks of grapes, fermented with barley and rye.

6. *Sekis-kayavodka.* Made from the lees of wine and fruit at Scio.

*Geneva Hollands,* (*genièvre,* French for juniper.) Distilled from malted barley and rye, rectified on juniper berries, in Holland. Its variety is—

*Gin.* Made in England, from malted barley, rye, potatoes; rectified with turpentine.

*Goldwasser.* Distilled at Dantzic, from wheat, barley, and rye, rectified with aniseed, cinnamon, and other spices.

*Kirschwasser.* Distilled from the Malacheb cherry, in Switzerland.

*Maraschino.* Distilled from the Macarska cherry, at Zara, the capital of Dalmatia.

*Rum,* (supposed to be derived from the terminal syllable of the word *saccharum*: but the aboriginal Americans call this liquor Rum.) Distilled, in the West Indies and South America, from cane-sugar and molasses, and in North America from maple-sugar. Its variety is—

*Slatkaia trava.* Made in Kamtschatka, from a sweet grass.

*Show-choo.* Distilled, in China, from the lees of mandarin, a wine made from boiled rice.

*Whisky,* (supposed to be derived from *usque,* the first two syllables of *usquebagh,* the original name in Ireland.) Distilled, in Scotland and Ire-

land, from malted and raw barley, rye, oats, and potatoes; and in the south of France, from sloes. In Ireland it was called *buil-ceann*, or madness of the head. The best Scotch whisky is *Glenlivet*, the best Irish, *Ennishowen*.

*Y-wer-a.* Distilled, in the Sandwich Islands, from the root of the Tee-root, baked, pounded, and fermented.

To these may be added an intoxicating liquor made by the Affghanistans, from ewes' milk; and that made in Kamtschatka, from a species of mushroom, named muchumer.

Spirit of Aniseed, Spiritus anisi—s. Bathing, Freeman's, see Linimentum saponis compos.—s. Bathing, Jackson's, see Linimentum saponis compos.—s. Bezoardic of Bussius, see Bussii spiritus Bezoarticus—s. Bone, Liquor volatilis cornu cervi—s. of Burrhus, Burrhi spiritus matricalis—s. of Carraway, Spiritus carui—s. of Ether, aromatic, Spiritus ætheris aromaticus—s. Fuming, of Beguin, Ammoniæ sulphuretum—s. Fuming, of Boyle, Ammoniæ sulphuretum—s. of Hartshorn, Liquor cornu cervi—s. of Horseradish, compound, Spiritus armoraciæ compositus—s. of Lavender, Spiritus lavandulæ—s. of Lavender, compound, Spiritus lavandulæ compositus—s. of Mindererus, Liquor ammoniæ acetatis—s. of Nitre, sweet, Spiritus ætheris nitrici—s. of Nitric ether, Spiritus ætheris nitrici—s. of Pennyroyal, Spiritus pulegii—s. of Peppermint, Spiritus menthæ piperitæ—s. Proof, Spiritus tenuior—s. of Salt, Muriaticum acidum—s. of Scurvygrass, golden, see Spiritus armoraciæ compositus—s. of Spearmint, Spiritus menthæ viridis—s. of Sulphuric ether, Spiritus ætheris sulphurici—s. of Sulphuric ether, compound, Spiritus ætheris sulphurici compositus—s. of Turpentine, Oleum terebinthinæ rectificatum—s. Verdigris, Aceticum acidum—s. of Vitriol, Sulphuric acid—s. of Wine and camphor, Spiritus camphoræ.

SPIRITS, ANIMAL, Nervous fluid.

SPIRITUOUS, Alcoholic.

SPIRITUS, Breath, Life, Respiration, Spirit—s. Ætherеus nitrosus, Spiritus ætheris nitrici—s. Ætherеus vitriolicus, Spiritus ætheris sulphurici.

Spir'itus Ætheris Aromat'icus, *Æther Sulphu'ricus cum alcoho'lē aromat'icus, Elix'ir vitrio'li dulcē, Sweet Elix'ir of Vit'riol, Viga'ni's Elixir of Vitriol, Aromat'ic Spirit of Ether.* (*Cinnam. cort.* contus. ℥iij. *cardam. sem.* contus. ℥iss. *piperis longi fruct.* cont., *zingib. rad.* concis., sing. ℥j. *spiritûs ætheris sulphuric.* Oj. Macerate, for 14 days, in a stopped glass vessel and strain. *Ph. L.*) It is used as a stimulant in nervous affections. Dose, f℥ss to f℥j.

Spiritus Ætheris Nit'rici, *Sp. Ætheris nitro'si, Sp. nitri dulcis, Sp. Æthe'reus nitro'sus, Sweet Spirit of Nitre, Nitre drops, Æther nitricus alcoolisa'tus, Spirit of Nitric Ether.* (*Nitrate of Potassa*, in coarse powder, ℔ij, *Sulphuric acid*, ℔iss; *Alcohol*, Oixss; *Diluted Alcohol*, Oj; *Carbonate of Potassa*, ℥j. Mix the nitrate of potassa and the alcohol in a large glass retort, and having gradually poured in the acid, digest with a gentle heat for two hours; then raise the heat, and distil a gallon. To the distilled liquor add the diluted alcohol and carbonate of potassa, and again distil a gallon.—Ph. U. S.) It is refrigerant, diuretic, antispasmodic, and diaphoretic. Dose, gtt. xxv to f℥j. Specific gravity, 0.834.

Spiritus Ætheris Sulphu'rici, *Æther Sulphuricus cum Alcoho'lē, Liquor Æthe'reus Sulphuricus, Spiritus Vitrioli dulcis, Spiritus Ætheris vitriol'ici, Liquor Sulphuricus alcoolisa'tus, Spirit of Sulphuric Ether.* (*Æther. sulphuric.* Oss; *sp. rec.* Oj. Mix. *Ph. L.*) Stimulant, diaphoretic, diuretic, and antispasmodic. Dose, f℥ss to f℥iij.

Spiritus Ætheris Sulphurici Compos'itus, (Ph. U. S. 1842). *Sp. ætheris vitriol'ici compositus, Spiritus Æ'theris compositus* (Ph. U. S. 1851), *Liquor anod'ynus Hoffmanni, Compound Spirit of Sulphuric Ether, Hoffmann's Anodyne Liquor.* (*Æther Sulphuric.* Oss; *Alcohol*, Oj; *Ol. Æther.* f℥iij. Ph. U. S. Ph. L.) Mix. A stimulant and antispasmodic. Specific gravity, 0.816.

Spiritus Ætheris Vitriolici Compositus, Spiritus ætheris sulphuric. comp.

Spiritus Ammo'niæ, *Al'kali ammoni'acum spirituo'sum, Al'cohol ammonia'tum, Sp. salis ammoni'aci, Ammoni'aca alcoholisa'ta, Liquor ammo'nii vino'sus, L. ammoniæ spirituo'sus, Lixiv'ium ammoniaca'lē vino'sum, Spiritus salis ammoni'aci vino'sus* seu *dulcis* seu *dulcifica'tus, Solu'tio subcarbona'tis ammoni'aci spirituo'sa.* (F.) *Esprit d'ammoniaque.* (*Ammon. muriat.* in pulv. subtilissim., *calcis*, āā ℔j; *alcohol.* f℥xx: *aquæ*, f℥ix. The water is employed to slake the lime; the muriate of ammonia is then well mixed with it, and by means of heat, the ammonia is made to pass into the distilled water contained in a quart bottle. Ph. U. S.) Stimulant and antispasmodic. Dose, f℥ss to f℥j.

Spiritus Ammoniæ Aromat'icus, *Alcohol ammonia'tum aromaticum, Aromatic ammonia'ted Alcohol, Sal volat'ilē Drops, Spiritus salis volat'ilis oleo'sus, Sp. volatilis aromaticus, Sal volatile oleosum Sylvii, Sp. ammoniæ compos'itus, Tinctu'ra aromatica ammoniata, Liquor oleo'sus Sylvii, Lixiv'ium ammoniaca'lē aromaticum.* (*Ammon. muriat.* ℥v; *Potass. carb.* ℥viij, *cinnam.* cont., *caryophyll.* cont.āā ℥ij; *Limon. cort.* ℥iv; *alcohol., aquæ* āā, Ov. M. Distil Ovijss. Stimulant. Dose, f℥ss to f℥j.

Spiritus Ammoniæ Compositus, Spiritus aromaticus.

Spiritus Ammoniæ Fœ'tidus, *Sp. volat'ilis fœtidus, Fit Drops, Al'cohol ammonia'tum fœtidum, Tinctu'ra asafœtidæ ammoniata, Fetid Spirit of Ammonia.* (*Sp. ammoniæ* Oij, *asafœtidæ* ℥ij. Macerate for 12 hours, and distil Oiss. *Ph. L.*) Stimulant and antispasmodic. Dose, f℥ss to f℥j.

Spiritus Ammoniæ Succina'tus, *Succinated Spirit of Ammonia, Common Eau de Luce, Ammoni'acum succina'tum, Aqua Lu'ciæ, Liquor ex Ammoniâ et Oleo Suc'cini, Liquor ex'citans, Spiritus Ammoniæ cum Suc'cino, Sp. Salis Ammoni'aci lactes'cens* seu *lacteus.* (*Mastich.* ℥iij, *sp. rect.* f℥ix, *ol. lavand*, gtt. xiv, *ol. succin.* gtt. iv *liq. ammon.* f℥x. Macerate the mastich in the alcohol, and pour off the clear tincture: add the rest and shake. *Ph. L.*) Stimulant and antispasmodic. Dose, gtt. x to f℥ss, or f℥j.

Spiritus Animales, see Nervous fluid.

Spiritus Ani'si, *Spiritus Anisi compos'itus, Aqua anisi for'tis, Aqua Sem'inum Anisi composita, Spirit of An'iseed*, (F.) *Esprit d'anis.* (*Anisi sem.* cont. ℔ss, *spirit tenuior.* cong., *aquæ* quod satis sit ad prohibendum empyreuma. *Ph. L.*) Carminative. Dose, f℥ss to f℥ss. In the compound spirit, angelica is usually an ingredient.

Spiritus Anthos, Spiritus rosmarini.

Spiritus Armora'ciæ Compos'itus, *Sp. Raph'ani compositus, Aqua Raphani composita, Compound Spirit of Horseradish*, (F.) *Esprit de raifort composé.* (*Armorac. rad.* recent. concis., *aurant. cort.* exsicc., sing. ℔j, *myrist. nuc.* contus. ℥ss, *spirit. ten.* cong. *aquæ* q. s. ad prohibendum empyreuma. *Ph. L.*) Stimulant and antiscorbutic. (?) Dose, f℥j, to f℥iv.

The *Golden Spirit of Scurvy grass*—an empirical preparation—is formed by adding *gamboge* ℥viij, to one gallon of the *sp. armoraciæ compositus.*

*Greenough's Tincture for the teeth*, is formed of *amygd. amar.* ʒij, *lig. Bresil., cassiæ bacc.*, āā ʒiv, *irid. Florent.* ʒij, *coccinell., sal. acetosellæ, alum.* āā ʒj, *sp. vin. rect.* Oij, *sp. armoraciæ comp.* fʒss.

Spiritus Beguinis, Ammoniæ sulphuretum — s. Bellidis, see Osmitopsis asteriscoides.

Spiritus Camph'oræ, *Sp. camphora'tus, Sp. vino'sus camphoratus, Tinctu'ra Camphoræ*, (Ph. U. S.) *Spirit of Wine and Camphor, Spirit of Camphor*, (F.) *Esprit de Camphre, Alcool camphré, Eau de Vie camphrée.* (*Camphor.* ʒiv, *alcohol.* Oij. Dissolve.) Stimulant, anodyne and discutient. Used only externally.

Spiritus Car'ui, *Sp. Cari Carui, Spirit of Car'raway, Aqua Sem'inum Carui fortis, A. Sem'inum Carui, Strong Carui Waters*, (F.) *Esprit de Carvi.* (*Carui sem. cont.* lbiss, *sp. tenuior.* cong., *aquæ* q. s. Distil a gallon. *Ph. L.*) Carminative. Dose, fʒj to fʒss.

Spiritus Cinnamo'mi, *Sp. Lauri Cinnamomi, Spirit of Cin'namon, Aqua Cinnamomi fortis, Aqua Cinnam. spirituo'sa, Strong Cinnamon Water*, (F.) *Esprit de Cannelle.* (*Cort. cinnam.* ℈v, *sp. rect.* Oivss.) Stimulant and carminative. Dose, fʒj to fʒss.

Spiritus Col'chici Ammonia'tus, *Ammoniated Spirit of Colchicum.* (*Sem. colchic. cont.* ʒij, *sp. ammon. aromat.* Oj. *Ph. L.*) Narcotic, cathartic, and diuretic. Used in gout, rheumatism, and dropsy. Dose, from gtt. xxx to fʒj.

Spiritus Cornu Cervi, Liquor C. C. — s. Fumans Beguini, Ammoniæ sulphuretum—s. Genitalis, Aura seminis.

Spiritus Junip'eri Compos'itus, *Compound Spirit of Juniper, Aqua Junip'eri composita*, (F.) *Esprit de genièvre composé.* (*Ol. junip.* ʒiss, *Ol. carui, Ol. fœnicul.*, āā ʒx; *Alcohol dilut.* cong. Solve. Ph. U. S.) Stimulant and diuretic. Dose, fʒj to fʒss.

Spiritus Lauri Cinnamomi, Spiritus cinnamomi.

Spiritus Lavan'dulæ, *Sp. Lavandulæ spicæ, Spirit of Lav'ender, Sp. Lavond. simpl., Lavender Water*, (F.) *Esprit de Lavande.* (*Lavand.* recent. lbij, *Alcohol.* cong., *aquæ* Oij. Distil a gallon.) Usually made by adding the oil to rectified spirit. Used as a perfume chiefly.

Spiritus Lavandulæ Compos'itus, *Tinctu'ra Lavandulæ composita, Red Hartshorn, Lavender drops, Compound Spirit of Lavender*, (F.) *Esprit de Lavande composé.* (*Sp. Lavand.* Oiij, *sp. rosmarin.* Oj, *cinnam.* contus. ʒj, *myristic.* cont. ʒss. *caryophyll.* cont. ʒij, *santali* conc. ʒiij. Macerate for 14 days, and filter through paper. Stimulant. Dose, gtt. xl to fʒij.

Spiritus Lethalis, Carbonic acid — s. Lumbricorum, Liquor volatilis cornu cervi.

Spiritus Menthæ Piperi'tæ, *Spirit of Peppermint, Aqua Menthæ piperit'idis spirituo'sa, Sp. Menthæ piperit'idis* (F.) *Esprit de Menthe poivrée.* (*Olei menth. pip.* ℈vjss, *sp. rectif.* Oivss, *aquæ*, q. s. distil a gallon. *Ph. L.*) Carminative and stimulant. Dose, fʒss to fʒiij.

Spiritus Menthæ Sativæ, Spiritus menthæ viridis.

Spiritus Menthæ Vir'idis, *Spearmint, Spiritus menthæ sati'væ, Aqua Menthæ vulga'ris spirituo'sa*, (F.) *Esprit de Menthe verte.* (*Olei Menth. virid.* ℈viss, *sp. rectif.* Oivss, *aq.* q. s. Distil a gallon. *Ph. L.*) Like the last in properties and dose.

Spiritus Millepedarum, Liquor cornu cervi.

Spiritus Myris'ticæ, *Spiritus Myristicæ Moscha'tæ, Sp. Nucis Moschatæ, Aqua Nucis Moschatæ, Nutmeg Water, Aqua Nephrit'ica*, (F.) *Esprit de Muscade.* (*Myrist.* cont. ʒij, *Alcohol. dil.* cong., *aquæ* Oj. Distil a gallon.) Cordial and carminative. Dose, fʒj to fʒiv.

Spiritus Myrti Pimentæ, Spiritus pimentæ — s. Nitri acidus, Nitric acid — s. Nitri dulcis, Spiritus ætheris nitrici — s. Nitri duplex, Nitric acid — s. Nitri fumans, Nitric acid — s. Nitri Glauberi, Nitric acid — s. Nitri simplex, see Nitric acid — s. Nitri vulgaris, see Nitric acid — s. Nucis moschatæ, Spiritus myristicæ — s. Ophthalmicus Mindereri, Liquor ammoniæ acetatis.

Spiritus Pimen'tæ, *Sp. Myrti Pimentæ, Spiritus Pimento, Spirit of Pimento, Aqua Mirab'ilis.* (*Ol. Piment.* f. ʒij, *Alcohol. dilut.* cong. Solve. Ph. U. S.) Cordial and carminative. Dose, fʒj to fʒiv.

Spiritus Pule'gii, *Spirit of Pennyroyal, Aqua Pulegii spirituo'sa, Spirituous Pennyroyal Water*, (F.) *Esprit de Pouliot.* (*Olei pulegii* ℈vij, *sp. rect.* Oivss, *aquæ*, q. s. Distil a gallon. *Ph. L.*) Same as spirit of spearmint in properties and dose.

Spiritus Pyro-aceticus, Acetone.

Spiritus Rectifica'tus, *Sp. Vini rectificatus, Œnostag'ma, Œnelæ'um, Pyræ'nus, Sp. Vino'sus rectificatus, Al'cohol, A. Vini, Spirit of Wine*, (F.) *Esprit de Vin rectifié.* Rectified spirit is much used in Pharmacy to dissolve resinous and other substances. It is seldom exhibited internally; although it exists in the diluted state in all vinous and spirituous liquors. Externally, it is employed as a discutient. — S. g., according to the London Pharmacopœia, 0.838; according to that of Dublin, 0.840; of Edinburgh and United States, 0.835, (see Alcohol,) and of Paris, 0.819 to 0.827.

Spiritus Rector, Aroma — s. Raphani compositus, Spiritus armoraciæ compositus.

Spiritus Rosmari'ni, *Sp. Rosmarini officina'lis, Spirit of Rosemary, Spiritus Anthos, Hungary Water*, (F.) *Esprit de Romarin.* (*Ol. rosmarini* ʒiv, *Alcohol.* cong. Solve. Ph. U. S.) Stimulant. Dose, fʒj to fʒiv.

Spiritus Salis Acidus seu Fumans, Muriaticum acidum — s. Salis ammoniaci, Spiritus ammoniæ — s. Salis ammoniaci aquosus, Liquor ammoniæ — s. Salis ammoniaci lactescens seu lacteus, Spiritus ammoniæ succinatus — s. Salis ammoniaci sulphuratus, Ammoniæ sulphuretum —s. Salis Glauberi, Muriaticum acidum—s. Salis marini, Muriaticum acidum — s. Salis marini coagulatus, Potassæ murias — s. Salis volatilis oleosus, Spiritus ammoniæ aromaticus — s. Sulphurico-ætherus camphoratus, Tinctura ætherea composita — s. Sulphurico-ætherus martialis, Tinctura seu Alcohol sulphurico-ætherus ferri — s. Sulphuris, Sulphurous acid — s. Sulphuris per campanam, Sulphurous acid — s. Sulphuris volatilis, Ammoniæ sulphuretum — s. Sulphurosus volatilis, Sulphurous acid.

Spiritus Tenu'ior, *Alcohol dilu'tum, Spiritus vino'sus tenu'ior, Proof Spirit* (F.) *Esprit de vin délayé.* Generally made for pharmaceutical purposes, by mixing equal parts of rectified spirit and water. S. g. Lond. 0.920; Edinb. and United States, 0.935. It is employed in the same cases as those in which the alcohol is used: — chiefly, as a solvent of vegetable matters, in the form of tinctures.

Spiritus Veneris, Aceticum acidum — s. Vini rectificatus, Spiritus rectificatus—s. Vinosus camphoratus, Spiritus camphoræ—s. Vinosus tenuior, Spiritus tenuior — s. Vitalis, Nervous fluid — s. Vitrioli, Sulphuric acid — s. Vitrioli acidus Vogleri, Sulphuricum acidum dilutum — s. Vitrioli coagulatus Mynsichti, Potassæ sulphas—s. Vitrioli dulcis, Spiritus ætheris sulphurici — s. Vitrioli phlogisticatus, Sulphurous acid — s. Volatilis

aromaticus, Spiritus ammoniæ aromaticus — s. Volatilis fœtidus, Spiritus ammoniæ fœtidus.

SPIROID CANAL, Aquæductus Fallopii.

SPIROM'ETER; badly compounded from *spiro*, 'I breathe,' and *μετρον*, 'a measure:'—properly *Anapnom'eter*, *Pneusom'eter*, *Pneumom'eter*, *Pneumatom'eter*. Any instrument for measuring the quantity of air concerned in respiration, and, consequently, the capacity of the lungs.

SPIROPTERA HOMINIS, see Worms.

SPISSANTIA, Incrassantia.

SPIT, Sputum.

SPIT'AL, MINERAL WATERS OF. The village of Spital is situate on the south side of the Tweed, near Tweedmouth. The springs there contain chloride of calcium, sulphate of soda, sulphate and carbonate of lime. They act as saline cathartics.

SPITH'AMA, *Dorahs*. A measure of twelve fingers' breadth.

SPITTING, Exspuition.

SPITTLE, Saliva—s. Sweet, see Salivation.

SPLANCHNA, Entrails.

SPLANCHNECTOP'IA, *Splanchnodias'tasis*, *Situs perver'sus* seu *anom'alus intestino'rum*; from *σπλαγχνον*, 'an intestine,' *εκ*, 'out of,' and *τοπος*, 'place.' Misplacement or ectopia of the intestines.

SPLANCHNELMINTHA, Worms.

SPLANCHNEURYS'MA, from *σπλαγχνον*, 'an intestine,' and *ευρυνω*, 'I dilate.' Morbid dilatation of the intestines.

SPLANCHNIC, *Splanch'nicus*, *Vis'ceral*, from *σπλαγχνον*, 'viscus.' Relating or belonging to the viscera.

Splanchnic Cav'ities are the three great cavities of the body;—those of the cranium, chest, and abdomen.

Splanchnic Nerves belong to the great sympathetic, and are two in number on each side. They are distinguished into:—1. The *great splanchnic nerve*, (F.) *Grand surrénal* (Ch.), Its roots—four or five in number, come from the 6th, 7th, 8th, 9th, and sometimes the 10th, thoracic ganglia. They descend inwards, on the sides of the vertebral column, beneath the pleura, and unite into a single trunk, which enters the abdomen through a separation of the fleshy fibres of the pillars of the diaphragm; passes behind the stomach, and divides into several branches, which pass into the semilunar ganglion. 2. The *lesser splanchnic nerve*, *Renal nerve*, (F.) *Splanchnique accessoire* of Walther, *Petit surrénal*, (Ch.,) is composed of two distiuct branches, proceeding from the 10th and 11th thoracic ganglion, which unite on the 12th dorsal vertebra into a cord, that pierces the diaphragm singly; enters the abdomen, and divides into two branches, one of which anastomoses with the greater splanchnic nerve, whilst the other sends its filaments to the renal and solar plexuses.

SPLANCH'NICA. Medicines adapted to diseases of the bowels. Also, the 2d order of the class *Caliaca* of Good; defined,—diseases affecting the collatitious viscera, and characterized by disquiet or diseased action in the organs auxiliary to the digestive process, without primary inflammation.

SPLANCHNODIASTASIS, Splanchnectopia.

SPLANCHNOD'YNĒ, from *σπλαγχνον*, 'a viscus,' and *οδυνη*, 'pain.' Pain in the bowels.

SPLANCHNOGRAPHIA, Splanchnography.

SPLANCHNOG'RAPHY, *Splanchnogra'phia*, from *σπλαγχνον*, 'a viscus,' and *λογος*, 'a description.' The part of anatomy which treats of the viscera.

SPLANCHNOLITHI'ASIS; from *σπλαγχνον*, 'a viscus,' and *λιθος*, 'a stone.' The formation of a calculous concretion in any viscus.

SPLANCHNOL'OGY, *Splanchnolog''ia*, from *σπλαγχνον*, 'a viscus,' and *λογος*, 'a discourse.' A treatise on the viscera:—also, Splanchnography.

SPLANCHNOPATHI'A, from *σπλαγχνον*, 'a viscus,' and *παθος*, 'suffering.' A disease of the intestines.

SPLANCHNOSCLERO'SIS, from *σπλαγχνον*, 'a viscus,' and *σκληρος*, 'hard.' Induration of a viscus.

SPLANCHNOT'OMY, *Splanchnotom'ia*, *Splanchnot'omē*, from *σπλαγχνον*, 'a viscus,' and *τεμνω*, 'I cut.' Dissection or anatomy of the viscera.

SPLAYFOOT, see Kyllosis.

SPLEEN, *Lien*, *Hepar sinis'trum* seu *adulteri'num*, (F.) *Rate*. A soft, spongy, parenchymatous organ; of a more or less deep violet red, situate deeply in the left hypochondrium, below the diaphragm, above the colon, between the great tuberosity of the stomach and the cartilages of the false ribs, and above and anterior to the kidney. Its ordinary length is 4½ inches; its thickness 2½; and its weight 8 ounces. Its parenchyma, which is bathed in blood, contains a multitude of grayish, soft, and semi-transparent granulations — *splenic corpuscles* or *Malpighian bodies of the spleen*. It is covered by a serous membrane, furnished by the peritoneum; and by a proper coat, of a fibrous nature, which is intimately united with it, and transmits into its interior delicate, solid, and very elastic prolongations — *trabeculæ*. At its inner edge is a fissure, by which the vessels and nerves enter the organ. The functions of the spleen are unknown. One of the latest opinions is, that it belongs to the lymphatic system; and acts as a diverticulum to the vascular system.

Spleen, Hypochondriasis — s. Malpighian bodies of the, see Spleen—s. Supernumerary, Lienculus.

SPLEENWORT, Asplenium, A. filix fœmina, Asplenium scolopendrium — s. Bush, Comptonia asplenifolia.

SPLENAL'GIA, *Neural'gia lie'nis*, *Sple'nica*, *Splenodyn'ia*, from *σπλην*, 'the spleen,' and *αλγος*, 'pain.' Pain in the spleen.

Splenalgia Bengalensis, see Cachexia, splenic — s. Phlegmonodea, Splenitis — s. Subinflammatoria chronica, Splenoncus.

SPLENATROPH'IA, *Atroph'ia Lie'nis*, from *σπλην*, 'spleen,' and *atrophia*, 'atrophy.' Wasting or atrophy of the spleen.

SPLENAUXE, Splenoncus.

SPLENECTAMA, Splenoparectama.

SPLENECTASIS, Splenoparectama.

SPLENECTOM'IA, *Splenec'tomē*, from *σπλην*, 'the spleen,' *εκ*, 'out of,' and *τεμνω*, 'I cut.' Extirpation of the spleen.

SPLENECTOP'IA, *Disloca'tio lie'nis* seu *splenis*; from *σπλην*, 'the spleen,' and *εκτοπος*, 'out of place.' Dislocation of the spleen. Not a common occurrence.

SPLENEMPHRAX'IS, *Splenophrax'ia*, from *σπλην*, 'the spleen,' and *εμφρασσω*, 'I obstruct.' Obstruction of the spleen.—Vogel. See Splenoncus.

SPLENES, Hypochondriasis.

SPLENET'ICUS, *Sple'nicus*, *Splenit'icus*, *Lieno'sus*, (F.) *Ratéleux*. That which relates to the spleen: one labouring under diseased spleen. A medicine adapted for diseases of the spleen.

SPLENIC, *Sple'nicus*, *Sple'nius*, from *σπλην*, 'the spleen.' That which relates to the spleen.

Splenic Artery. It arises from the cœliac; and passes from right to left, forming many windings along the upper edge of the pancreas, which lodges it in a special groove. It reaches the fissure of the spleen, and divides into several branches that enter the organ. In its course it furnishes the pancreatic, left gastro-epiploic, and the *vasa brevia*.

Splenic Cachexia, see Cachexia splenica — s. Corpuscles, see Spleen.

Splenic Plexus is a nervous network, which proceeds from the cœliac plexus, and accompanies the splenic artery, sending secondary plexuses to each division.

Splenic Vein arises from the spleen, and accompanies the splenic artery; proceeding from left to right, to unite with the superior mesenteric vein, and to form, with it, the abdominal vena porta. In its course, it receives veins corresponding to the vasa brevia, the right and left gastro-epiploic, the duodenal, pancreatic, coronaria ventriculi, and inferior mesenteric veins.

SPLENICA, Splenalgia. Also, medicines which affect the spleen. — Pereira.

SPLENICUS, Spleneticus, Splenic.

SPLENIOLA, Compress.

SPLENIS TUMOR, Ague cake.

*SPLÉNISATION*, Splenization.

SPLENISCUS, Compress.

SPLENITICUS, Splenic.

SPLENI'TIS, from σπλην, 'the spleen,' and *itis*, denoting inflammation. Inflammation of the spleen. *Empres'ma splenitis, Inflamma'tio lie'nis, I. splenis, Splenal'gia phlegmono'dea*, (F.) *Inflammation de la Rate*. A rare disease, characterized by local pain, swelling, and heat, which sometimes terminates by suppuration. It must be treated like other inflammations.

SPLENIUM, Compress — s. Corporis Callosi, see Corpus callosum — s. Cruciatum, *Croix de Malte*.

SPLE'NIUS, *S. Cap'itis, S. Colli*, (F.) *Cervico-dorso-mastoïdien et dorso-trachélien, Cervico-mastoïdien* (Ch.), *Posterior mastoid muscle*. So called from its resemblance to the *spleen* of certain animals. A muscle situate at the posterior part of the neck, and upper part of the back. It is much broader above than below, where it terminates in a point. It is attached, by its inner edge, to the spinous processes of the first five dorsal vertebræ; to that of the 7th cervical, and to the inferior part of the posterior cervical ligament. By its upper extremity, it is attached to the transverse processes of the first two cervical vertebræ, to the mastoid process, and to the posterior surface of the occipital bone. Some have considered this muscle to be formed of two portions, which they have called *Splenius colli*, and *Splenius cap'itis*. The splenius extends the head, inclines it, and rotates it. If the splenii of each side act together, they extend the head.

SPLENIZA'TION, *Splenizatio*, (F.) *Splénisation*, from σπλην, 'the spleen.' A term applied to the state of the lung in the first or second stage of pneumonia in which its tissue resembles that of the spleen.

SPLENOCE'LE, *Her'nia liena'lis*, from σπλην, 'the spleen,' and κηλη, 'a tumour.' Hernia formed by the spleen.

SPLENODYNIA, Splenalgia.

SPLENOG'RAPHY, *Splenograph'ia*, from σπλην, 'the spleen,' and γραφη, 'a description.' A description of the spleen.

SPLENOHÆ'MIA, (F.) *Splénohémie*, from σπλην, 'the spleen,' and 'αιμα, 'blood.' Congestion or hyperæmia of the spleen, a common phenomenon in many diseases, especially in typhoid and intermittent fevers.

SPLENOID, *Splenoï'des, Spleno'des*, from σπλην, 'spleen,' and ειδος, 'resemblance.' Spleen-like. Having the appearance of the spleen.

SPLENOL'OGY, *Splenolog''ia*, from σπλην, 'the spleen,' and λογος, 'a discourse.' A treatise on the spleen.

*SPLÉNONCIE*, Splenoncus.

SPLENON'CUS, *Megalosple'nia, Hypertroph'ia* seu *Supernutrit''io splenis* seu *lie'nis, Intumescen'tia* seu *Infarc'tus* seu *Physco'nia lienis, Splenal'gia subinflammato'ria chron'ica, Splenemphrax'is, Splenauxe'ē, Hypersplenotroph'ia, Lien ingens*, (F.) *Splénoncie, Hypertrophie de la Rate*; from σπλην, 'the spleen,' and ογκος, 'a tumour.' Tumefaction of the spleen. See Ague cake.

SPLENOPAREC'TAMA, *Splenec'tama, Splenoparec'tasis, Splenec'tasis*, from σπλην, 'the spleen,' and παρεκταμα, 'excessive volume.' Excessive enlargement of the spleen.—Ploucquet.

SPLENOPARECTASIS, Splenoparectama.

SPLENOPHRAXIA, Splenemphraxis.

SPLENORRHAG''IA, from σπλην, 'the spleen,' and ραγη, 'rupture.' Hemorrhage from the spleen.

SPLENOSCIR'RHUS, from σπλην, 'the spleen,' and σκιρρος, 'hardness.' Scirrhus or cancer of the spleen.

SPLENOT'OMY, *Splenotom'ia, Splenot'omē*, from σπλην, 'the spleen,' and τεμνω, 'I cut.' Dissection of the spleen.

SPLINT, Teut. Splinter, from splijten, 'to split;' *Hastel'la, Ass'ula, Asser'culum, Plag'ula, Narthex, Fer'ula*, (F.) *Attelle, Éclisse*. A flexible and resisting lamina of wood, used in the treatment of fractures, to keep the fragments in apposition, and prevent their displacement. Splints are made of iron, wood, bark of trees, leather, gutta percha, pasteboard, &c. They are generally padded, and are fixed by a roller or by tapes, according to circumstances.

SPLINTER, (F.) *Esquille*. Same etymon. This term is sometimes applied to a small portion of wood, which occasionally enters the skin, and gives occasion to much irritation until it is removed,—*Acu'leus lig'neus*, (F.) *Écharde*.

It is also applied to fragments that separate from a fractured or diseased bone.

SPLITROCK, Heuchera cortusa.

SPODIUM GRÆCORUM, Album græcum.

SPOLIARIUM, Apodyterium.

SPO'LIATIVE, *Spoliati'va*, from *spolio*, 'I take away.' *Phlebotom'ia spoliati'va*, (F.) *Saignée spoliative*. Blood-letting, used for the purpose of diminishing the mass of blood.

SPOLIATORIUM, Apodyterium.

SPONDYLAL'GIA, *Spondylodyn'ia*, from σπονδυλος, 'a vertebra,' and αλγος, 'pain.' Pain in the vertebræ. Cacorrhachitis. See Vertebral Disease.

SPONDYLARTHRI'TIS, from σπονδυλος, 'a vertebra,' αρθρον, 'a joint,' and *itis*, denoting inflammation. Gouty or rheumatic inflammation of the spinal column.

SPONDYLARTHROCACE, Vertebral disease.

SPONDYLI, Vertebræ.

SPONDYLIS, Coccyx.

SPONDYLI'TIS, *Inflamma'tio ver'tebræ*, from σπονδυλος, and *itis*, denoting inflammation. Inflammation of the vertebræ.

SPONDYLIUM, Coccyx, Heracleum spondylium.

SPONDYLOCACE, Vertebral disease.

SPONDYLODYNIA, Spondylalgia.

SPONDYLOPATHI'A, from σπονδυλος, 'a vertebra,' and παθος, 'a disease.' A disease of the vertebral column.

SPONDYLOPYOSIS, Vertebral disease.

SPOND'YLUS, *σπονδύλος*. A *vertebra;* and, especially, the two large cervical vertebræ. Also, the vertex.

SPONGE, BASTARD, Alcyonium.

SPONGI. The tumefied glands of the neck.

SPON'GIA, *Spongos, Sphongus, Spongia officina'lis, Spon'gia Mari'na, Sponge,* (F.) *Éponge.* An organized marine substance, of the great class of Zoophytes, met with in many seas, but especially in the Mediterranean and Arabian. It is supple, elastic, porous, and capable of absorbing fluids in which it may be placed, and of thus increasing in size. It is employed in *surgery,* for cleansing or washing; for absorbing acrid discharges from ulcers; suppressing hemorrhage when the mouth of the vessel can be compressed by it, and for forming tents for dilating wounds; in which case, the sponge is immersed in melting wax, and cooled before being used. It is then called *Prepared Sponge* or *Sponge Tent.*

SPONGIA ASSA, S. Usta—s. Cynosbati, Bedegar.

SPONGIA USTA, *S. Assa, Carbo spon'giæ, Burnt Sponge,* contains carbonate and phosphate of lime, carbonate of soda, charcoal, and iodine. It is used in bronchocele, scrofulous affections, and herpetic eruptions; and its good effects seem to be dependent upon iodine. It is made by cutting sponge into pieces, and heating it, that any extraneous matter may be separated; burning it in a close iron vessel until it becomes black and friable, and, lastly, rubbing it into very fine powder. — Ph. U. S.

SPON'GIÆ LAPIS. A name given to small friable stones found in sponge. They were formerly esteemed lithontriptic.

SPONGIODES, Spongoid.

*SPONGIOLE, Spongiolum:* from *σπογγιον,* 'a small sponge.' The soft succulent extremity of the fibrils or true roots of a plant, by which it absorbs or sucks up fluid. Similar spongioles have been supposed to exist at the terminations of the absorbents in animals.

SPON'GION. Ancient name of an epithem made of goats' dung: and also of a malagma, which was considered capable of absorbing the serum in dropsies, like a sponge. — Paulus, Gorræus.

SPONGIOSUM (OS), Ethmoid bone.

SPONGIOSUS, Spongoid.

SPONGOID, *Spongoïdes, Spongio'des, Spongio'sus,* from *σπογγια,* 'sponge,' and *εἰδος,* 'resemblance.' Resembling sponge. Of the nature of sponge.

SPONGOID INFLAMMATION, Hæmatodes fungus.

SPONGOID TISSUE, (F.) *Tissu spongoïde.* An adventitious spongy tissue, found in cases of rickets. — Guérin.

SPONGOS, Tonsil.

SPONSA SOLIS, Calendula officinalis.

SPONTA'NEOUS, *Sponta'neus,* from *sponte,* 'voluntarily.' That which occurs of itself, or without any manifest external cause. Evacuations are termed *spontaneous,* which are not produced by medicine. *Sponta'neous las'situde* is that which is not the result of fatigue. Diseases are also *spontaneous* which supervene without apparent cause. *Sponta'neous Amputa'tion* is the separation of a limb from the fœtus in utero.

SPONTANEOUS EVOLUTION, see Evolution — s. Version, Evolution, spontaneous.

*SPONTÉPARITÉ,* Generation, spontaneous.

SPOONWOOD, Kalmia latifolia, Tilia.

SPORAD'IC, *Spor'ades, Sporad'ici, Morbi disper'si, Morbi sparsi,* from *σπειρειν,* 'to spread.' Diseases are so called which supervene indifferently in every season and situation, from accidental causes, and independently of any epidemic or contagious influence.

SPORE, *Spor'ule, Sporum, Spor'ulum,* from *σπειρω,* 'I sow.' The reproductive body in cryptogamous plants, which is analogous to the seed of phanerogamous plants.

SPORID'IUM; same etymon. The reproductive body in algaceous plants, which resembles the spore of other plants.

SPORULE, Spore.

SPORUM, Spore.

SPOTS, GERMINAL, see Molecule.

SPOTS, RED, (F.) *Taches rouges, Rose spots.* Small red spots which appear in typhoid fever, from the 8th to the 15th day of the disease. They are most frequently seen on the lower and middle portions of the chest, and upper part of the abdomen.

SPOTS, ROSE, Spots, red.

SPRAIN, corrupted from *strain:* — *Subluxa'tio, Distor'tio, Dias'trophē, Diastrem'ma, Luxa'tio imperfec'ta, Exarthre'ma, Exarthro'sis, Stremma, Thlasma Stremma;* a *wrench,* (F.) *Détorse, Entorse, Foulure.* A violent straining or twisting of the soft parts surrounding the joints. According to the degree of the sprain, the fibrous parts of the joint may be simply stretched, or they may be ruptured. This affection, which has been regarded as incomplete luxation, occurs, particularly, in the ginglymoid joints; — as in the foot, wrist, knee, &c. The violence causes an afflux of blood; the serum of the blood is poured out, and often the blood itself, owing to the rupture of vessels; and inflammation arises, which ends in resolution or induration. Local, antiphlogistic applications are required, with perfect rest; and, when the inflammatory action has subsided, cold pumping and friction, with the application of a plaster and bandage, will afford support till the parts affected recover their due tone.

SPRAT, YELLOW-BILLED, Clupea thryssa.

SPRUCE BEER, *White Spruce Beer.* A beer made as follows: To 10 gallons of *water,* add 6 pounds of *sugar,* and 4 oz. of *essence of spruce.* Add yeast, and bottle, when ready. It is grateful and antiscorbutic.

SPRUCE BEER POWDERS may be formed of *white sugar,* ℥j, and ℈ij; *sodæ subcarb.,* gr. xxvj; *essence of spruce,* gr. x, in each blue paper; and *acid of tartar,* ℥ss in each white paper. For half a pint of water.

SPUITIO, Exspuition.

SPUMA ARGENTI, Plumbi oxydum semivitreum—s. Cerevisiæ, Yest—s. Trium draconum, Antimonium muriatum.

*SPUMEUX,* Frothy.

SPUMOSUS, Frothy.

SPUNK, Boletus igniarius.

SPUR, Sax. ῥpur, (F.) *Éperon des Artères.* The angle at which the arteries leave a cavity or trunk.

SPUR, Ergot.

SPURGE, CAPER, Euphorbia lathyris — s. Cypress, Euphorbia Cyparissias—s. Flax, Daphne gnidium — s. Flowering, large, Euphorbia corollata—s. Garden, Euphorbia lathyris—s. Greater, Euphorbia palustris—s. Ipecacuanha, Euphorbia ipecacuanha — s. Laurel, Daphne laureola — s. Marsh, Euphorbia palustris — s. Olive, Cneorum tricoccum — s. Olive, Daphne mezereum — s. Sea, Euphorbia paralias.

SPUTA, PRUNE JUICE, see Prune Juice.

SPUTAMEN, Saliva, Sputum.

SPUTAMENTUM, Saliva, Sputum.

SPUTATIO, Exspuition.

SPUTATION, Exspuition.

SPUTUM, Plural, *Sputa, Apochrem'ma, Chrem'ma, Emptys'ma, Sputa'men, Pty'elon, Pytis'ma,*

*Spit*, from *spuere*, *sputum*, 'to spit.' (F.) *Crachat*. The secretions ejected from the mouth in the act of spitting. It is composed of saliva, and of the mucus secreted by the mucous membrane of the nasal fossæ and fauces, and often by the membrane of the larynx and bronchia. The sputa are, sometimes, called *eruginous*, when of a greenish-yellow colour; *gummy*, when they resemble a thick solution of gum; *frothy*, (F.) *mousseux*, when covered with froth; *rubiginous*, (F.) *rubigineux* ou *rouillés*, when of a reddish-yellow; and *streaked*, (F.) *striés*, when mixed with lines of blood. Also, saliva.

SPUTUM CRUENTUM, Hæmoptysis — s. Dulce, Saccharorrhœa pulmonalis—s. Oris, Salivation—s. Saccharatum, Saccharorrhœa pulmonalis — s. Sanguinis, Hæmoptysis.

SQUALLING, Vagitus.

SQUAMA, Scale, Table.

SQUAMÆ, Scaly diseases.

SQUAMARIA, Plumbago Europæa.

*SQUAMEUX*, Squamous.

SQUAMIFORMIS, Squamous.

SQUAMOUS, *Squamo'sus*, *Lepidoï'des*, *Lepido'des*, *Squamifor'mis*, *Scaly*; from *squama*, 'a scale.' That which relates to or resembles a scale.

SQUAMOUS PORTION of the temporal bone, (F.) *Portion squameuse* ou *écailleuse du Temporal*, is the upper part of the temporal, so called from a fancied resemblance to a scale.

SQUAMOUS SUTURE, *Sutu'ra squamo'sa*, *S. mendo'sa* seu *lepidoei'des* seu *lepido'des*, *Sutu'ra era'nii squamo'sa*, (F.) *Suture squameuse* ou *écailleuse*. The suture which unites the squamous portion of the temporal bone to the parietal.

Certain *scaly* cutaneous affections are also called *squamous*, (F.) *squameux*. See Scale.

SQUARE STALK, Monarda coccinea.

SQUAW-MINT, Hedeoma.

SQUAW-ROOT, Actæa racemosa, Caulophyllum thalictroïdes.

SQUAW-WEED, Erigeron Philadelphicum.

SQUEAMISHNESS, Fastidium cibi.

SQUEAZINESS, Nausea.

*SQUELETTE*, Skeleton.

*SQUELETTOLOGIE*, Skeletology.

SQUILL, Scilla—s. Vinegar of, Acetum scillæ.

SQUILLA, Scilla.

*SQUINANCIE*, Cynanche, Cynanche tonsillaris.

SQUINANCY, COMMON, Cynanche tonsillaris.

SQUINANTHIA, Cynanche.

SQUINANTHUS, Juncus odoratus.

*SQUINE*, Smilax China.

SQUINSY, Cynanche tonsillaris.

SQUINT-EYED, see Strabismus.

SQUINTER, see Strabismus.

SQUINTING, Strabismus.

*SQUIRRE*, Scirrhus.

SQUIRREL CORN, Dicentra Canadensis.

*SQUIRROGASTRIE*, Scirrhogastria.

SQUIRRUS, Scirrhus.

SQUIRT, Syringe.

STACHELBERG, MINERAL WATERS OF. Stachelberg Springs are far down in the valley of the Linth, in Switzerland. The waters are sulphureous, and are much visited by gouty and rheumatic invalids.

STACHYS FŒTIDA, Galeopsis.

STACTE, Myrrha.

*STADE*, Stage.

STADIUM, Period, Stage.

STA'DIUM ACMES seu STA'SEOS. The period of the height of a disease.

STA'DIUM ANNIHILATIO'NIS seu CONVALESCENTIÆ seu RECONVALESCENTIÆ. The period of recovery from disease.

STADIUM AUGMEN'TI seu INCREMEN'TI MORBI. The period or stage of increase of a disease.

STADIUM CALORIS, Stage, (hot) — s. Convalescentiæ, S. annihilationis.

STADIUM DECREMEN'TI. The period or stage of decrease of a disease.

STADIUM FRIGORIS, Stage, (cold) — s. Incrementi Morbi, S. Augmenti morbi—s. Latentis Contagii, Prodromus — s. Opportunitatis, Prodromus — s. Prodromorum, Prodromus — s. Reconvalescentiæ, S. Annihilationis.

STAFF, (D.) Staf. An instrument of great importance in lithotomy,—being the director for the gorget or knife. It is made of steel; and the handle is flat and rough, in order that it may be more securely held. The groove is on its convex surface.

STAFF TREE, CLIMBING, Celastrus scandens.

STAFFA, Stapes.

STAG'S PIZZLE, see Cervus.

STAGE, *Sta'dium*, (F.) *Estage*, *Étage*, *Stade*. The period or degree of a disease; especially the period of an intermittent: — as the *cold stage*, — *sta'dium fri'goris—hot stage*, &c.

STAGGERWEED, Delphinium.

STA'GIUM. The sixth part of an ounce.

STAGMA, from στάζω, 'I distil;' *Stalag'ma*. Any distilled liquid or liquor.

STAGMA, Gutta.

STAGNA'TION, *Stagna'tio*, from *stagnare*, 'to form a pond.' Accumulation and retardation of fluids in any part of the body.

STAGNUM CHYLI, Receptaculum chyli.

STAHLIAN. One who follows the doctrine of Stahl.

STAHL'IANISM. The doctrine of Stahl, which considered every vital action under the direction and presidency of the soul. See Animist.

STALAGMA, Stagma.

STALAGMI'TIS CAMBOGIOÏ'DES, *S. Cambo'gia*. Gamboge was long ascribed to this fancied Ceylonese plant. It is now known, that the name was given by Murray to specimens of two distinct trees of different genera. See Cambogia.

STALAGMOS, Distillation.

STALTICUS, Incarnans.

STAMMERING, Balbuties—s. of the Fingers, Cramp, writers'.

STAMPING MILL, see Pulverization.

STANGOS, Tin.

STANNI MURIAS, Tin, muriate of—s. Oxyduli murias, Tin, muriate of—s. Pulvis, see Tin

STANNIOLUM, Tinfoil.

STANNUM, Tin — s. Cinereum, Bismuth — s. Foliatum, Tinfoil—s. Glaciale, Bismuth—s. Granulatum, see Tin — s. Indicum, Zincum.

*STAPÉDIEN*, Stapedius.

STAPE'DIUS, *Stapes*, (F.) *Stapédien*, *Pyramidal-stapédien*. A muscle of the middle ear, which draws the stapes obliquely upwards.

STAPES, *Stapha*, *Staffa*, 'a stirrup.' (F.) *Étrier*. The innermost of the small bones of the ear, so called because it resembles a *stirrup*. It is situate horizontally in the cavity of the tympanum. Its head, which is directed outwards, is articulated with the os orbiculare. Its base faces inwards, and is applied to the fenestra ovalis, which it closes imperfectly, and to the membrano of which it is united. Its *branches* are one *anterior*, and the other *posterior*. They are curved; and the space between them is parabolic. Surgeons have given the name *Stapes* to a bandage used in bleeding from the foot; which forms a figure of 8 around the ankles.

STAPHA, Stapes.

STAPHIS, Delphinium staphisagria.

STAPHISAGRIA, Delphinium staphisagria.

*STAPHISAIGRE*, Delphinium staphisagria.

STAPHYLÆMATO'MA, from σταφυλη, 'the uvula,' and *hæmatoma*. A tumour formed by effusion of blood beneath the mucous membrane of the uvula.

STAPHYLAGRA, Staphylepartes.

STAPHYLE, Uvula, see Vitis vinifera.

STAPHYLEPAR'TES, from σταφυλη, 'the uvula,' and επαιρω, 'I lift up.' *Staph'ylagra*. An instrument for laying hold of, and removing the uvula.—Paulus.

STAPHYLINI, see Azygos muscle—s. Medii, see Azygos muscle.

STAPHYLINO-PHARYNGEUS, Palato-pharyngeus.

STAPHYLINUS EXTERNUS, Circumflexus.

STAPHYLIS, Nipple.

STAPHYLITIS, Uvulitis.

STAPHYLIUM, Nipple.

STAPHYLODIALYSIS, Cionis, Staphylœdema.

STAPHYLŒDE'MA, *Angi'na uvula'ris, Dysphag'ia uvulo'sa, Hypostaph'ylē, Hypostaphyli'tis, Staphylodial'ysis, Prolapsus* seu *Propto'sis u'vulæ, Casus u'vulæ, Himas, Himanto'ma, Himanto'sis, Staphylon'cus, Staphylon'cia, Œde'ma u'vulæ, Produc'tio uvulæ ἀ pitui'tâ, U'vula decid'ua* seu *relaxa'ta, Oras'pedon*. Relaxation and tumefaction of the uvula, which, either from inflammation or infiltration, hangs down so as to occasion difficult deglutition, cough, &c. Scarification, astringent gargles, and, if necessary, excision, constitute the treatment.

STAPHYLO'MA, from σταφυλη, 'a grape.' *Uva'tio, Myoceph'alon, Myïoceph'alum, Parop'sis Staphylo'ma, Staphylo'sis, Polygro'ma*. A name given to different tumours of the anterior surface of the globe of the eye.

Staphyloma Conicum, Staphyloma of the cornea—s. Pellucidum conicum, Staphyloma of the cornea.

Staphyloma of the Cornea, *Sugar-loaf Cornea, Con'ical Cornea, Con'ical hydrophthal'mia, Staphylo'ma con'icum, S. pellu'cidum con'icum, Conophthal'mia, Prolap'sus cor'neæ, Ceraton'cus, Hypercerato'sis, Hypercer'asis*, is an unequal, embossed, bluish or whitish, round or conical tumour; of variable size; formed by the projection of the transparent cornea, which is sometimes extenuated and distended, at others thickened.

Staphyloma of the Iris is the disease described by Scarpa under the name *Procidentia Iridis*. It is hernia of the iris, through an accidental opening of the cornea. Also, iridauxesis.

Staphyloma of the Sclerot'ic differs from the last, in the prominenee existing on a part of the eye covered by the sclerotie, which is much thinner.

Staphyloma Uveæ, Iridauxesis.

STAPHYLONCIA, Staphylœdema.

STAPHYLONCUS, Staphylœdema.

STAPHYLOPLAS'TIC, *Staphyloplas'ticus*, from σταφυλη, 'the uvula,' and πλασσω, 'I form.' An epithet applied to the operation for replacing the soft palate, when it has been lost.

STAPHYLOR'RAPHY, *Velosynth'esis, Staphylorrha'phia, Kionorrha'phia, Cionorrhaph'ia, Uranor'rhaphē, Uranorrha'phia, Uraniscorrha'phia, Uraniscor'rhaphē*, from σταφυλη, 'the uvula,' and ραφη, 'a suture.' The operation for uniting a cleft palate. It consists in paring the edges of the cleft; passing ligatures through them, and bringing them together.

STAPHYLOSIS, Staphyloma.

STAPHYLOT'OMY, *Staphylotom'ia*, from σταφυλη, 'the uvula,' and τομη, 'incision.' Amputation of the uvula.

STAR-APPLE, BROAD-LEAVED, Chrysophyllum cainito—s. Blazing, Aletris farinosa—s. Bloom, Spigelia Marilandica—s. Grass, Aletris farinosa, Hypoxys erecta—s. Knap-weed, Centaurea calcitrappa—s. Stroke, *Coup-de-soleil*—s. Wort, Aletris farinosa—s. Wort, golden, Bubonium.

STARBECK SPA. A chalybeate spring at Harrogate.

STARCH, Amylum—s. Blue, Smalt.

Starch, Iodide of, *Iod'idum* seu *Iodure'tum Am'yli, Am'ylum ioda'tum*, (F.) *Iodure d'Amidon*; prepared by triturating iodine and starch, is said to have the eutrophic effeets of iodine; but, by some, is esteemed inert. Dose, four to six grains.

Starch, Potato, see Solanum tuberosum—s. Sugar, Glueose.

STARKEY'S PILLS, see Pilulæ ex helleboro et myrrhâ.

*STASE*, Stasis.

STASIS, στασις, from σταω, 'I stop,' (F.) *Stase*. This word has nearly the same signification as stagnation. Stagnation, however, sometimes includes a morbid condition of the fluids,—Stasis never.

Stasis, Station.

STATIC. An epithet applied to the physical phenomena presented by organized bodies in contradistinetion to the organie or vital.

STAT'ICA SEPTI NA'RIUM, *Appen'dix cuta'nea septi na'rium*. The cutaneous appendage to the septum narium.

STAT'ICĒ CAROLINIA'NA of the United States, *Amer'ican Thrift, Marsh Rose'mary, Marsh Root, Seaside Thrift, Inkroot, Sea Lavender*, is considered to be a mere variety of the statice limonium.

Stat'icē Limo'nium, *S. Marit'imum, Behen rubrum, Limo'nium, L. majus* seu *vulga'rē, Behen, Sea Lav'ender, Red Behen, Behmen Ackmar, Marsh Rosemary, Lavender Thrift*, (F.) *Behen rouge. Family*, Plumbagineæ. *Sex. Syst.* Pentandria Pentagynia. The roots have been esteemed astringent, tonie, and eminently antiseptic.

Statice Maritimum, S. limonium—s. Vulgare, S. limonium.

STA'TION. *Sta'tio, Stasis, Status*, from *stare*, 'to stand.' The act of standing.

STA'TIONARY, *Stationa'rius*, from *stare*, 'to stand.' A name given by Sydenham and Stoll to certain diseases, which depend upon a particular state of the atmosphere; and which prevail in a district for a certain number of years, and then give way to others.

STATIS'TICS, MEDICAL, *Vital Statistics, Biostat'ics*, (F.) *Statistique médicale*. That part of medieine which relates to details—*medico-statistical*—conneeted with the mortality, salubrity, &c., of different countries and situations.

It has, also, been used in a wider sense to signify the same as *Numerical method*, (F.) *Méthode numérique*; which is applied to the systemization of medical facts, or to the use of numbers in the investigation of disease.

Statistics, Vital, Statistics, medical.

STATURE, *Statu'ra, Meg'ethos, Magnitu'do cor'poris*, from *sto, statum*, 'I stand.' The height of the human figure. The following table exhibits the results of several admeasurements, with the heights of some of the monkey species, on the authority of Mr. Lawrence.

| | STATURE. Feet. | In. |
|---|---|---|
| An Englishman, | 6 to 5 | 4½ 00 |
| An Englishwoman, | 5 to 5 | 4 00 |
| European male skeleton, | 5 | 8 |
| Do. | 5 | 5 |
| A Negro at the Lunatic Hospital, Liverpool, | 5 | 10½ |
| Another from Virginia, | 5 | 5½ |
| Another from the Gold Coast, | 5 | 8 |
| Another, | 5 | 00 |
| Negro skeleton, | 4 | 11 |
| Another, | 5 | 7½ |
| A Lascar, | 5 | 4 |
| Venus de Medici, | 5 | 00 |
| Tyson's Chimpansé (*Simia Troglodytes*) | 2 | 2 |
| Mr. Abel's Orang Otang, | 2 | 7 |
| Camper's Do. | less than | 30 |
| Mr. White's Monkey, | 2 | 2 |

STATUS. Acme — s. Cruditatis, Crudity — s. Erethiticus, Nervous diathesis—s. Gastricus, *Embarras gastriques*—s. Nervosus, Nervous diathesis — s. Sthenicus, Sthenia — s. Verminosus, Helminthiasis.

STAVESACRE, Delphinium staphisagria.

STAXIS, *Apostax'is.* A slight epistaxis or nasal hemorrhage. — Hippocrates.

STEAM-DOCTOR. A term applied to one who treats all or most diseases by steam.

STEAR. Pinguedo, Sevum.

STEARIN, see Pinguedo.

STEARINUM CETACEUM, Cetaceum.

STEARRHŒ'A, *Steatorrhœ'a, Seborrhœ'a, Seborrhag''ia, Smegmatorrhœ'a, Smegmorrhœ'a, Seba'ceous Flux*, from στεαρ, 'suet,' and ρεω, 'I flow.' Augmentation of secretion from the sebaceous follicles of the skin.

STEATITES, Polysarcia.

STEATOCE'LĒ, from στεαρ, 'suet,' and κηλη, 'a tumour.' A tumour formed by a collection of steatomatous matter in the scrotum.

STEATO'MA, *Tumor lar'deus*, from στεαρ, 'suet.' *Seva'tio, Steato'sis, Emphy'ma encys'tis steatoma.* An encysted tumour, whose contents are similar to fat.

STEATOPY'GA, from στεαρ, 'fat,' and πυγη, 'buttocks.' *Buttock-hump.* Fat buttocks; such as exist in the Hottentot females.

STEATORRHŒA, Stearrhœa.

STEATO'SIS, Steatoma.

STEATO'SIS CORDIS, *Degenera'tio adipo'sa cordis, Cardiethmolipo'sis* and *Cardiomyolipo'sis* (Piorry), *Fatty heart.* Unusual deposition of fat on the heart:—by some presumed to be occasionally a true adipous degeneration of the substance of the heart, which is probably incorrect.

STEATOZOON FOLLICULORUM, Acarus Folliculorum.

STEEL, Chalybs.

STEEPLE-BUSH. Spiræa tomentosa.

STEER'S OPODELDOCH, see Opodeldoch, Steer's.

STEGANOP'ODES, στεγανοποδες. *Planip'edes.* They who have flat feet, or are web-footed, from στεγανος, 'covered,' and πους, 'foot.'

STEGNO'SIS, *Steno'sis, Constipa'tio, Stipa'tio, Condensa'tio, Obstruc'tio*, from στεγνοω, 'I constrict.' Constriction or narrowness of the pores and vessels. Stricture. Constipation. Suppression of the evacuations. See Arctatio.

STEGNOTICA, Astringents.

STEIROSIS, Sterilitas.

STELENGIS, Stridor dentium.

STELLA, *Fas'cia stella'ta*, (F.) *Étoile.* A bandage, improperly compared to a star, because it is crossed like the letter X. This bandage is applied upon one or both shoulders. In the first case, it is called *simple;* in the second, *double.* It was employed in cases of fractures of the sternum, clavicle, and scapula; in luxations of the humerus, &c.

STELLA TERRÆ, Plantago coronopus.

STELLARIA MEDIA, Alsine media—s. Scilla, Scilla.

STELLATA RUPINA, Centaurea calcitrapa.

STELOCHITIS, Osteocolla.

STENAGMUS, Suspirium.

STENAXIS, Suspirium.

STENIA, Sthenia.

STENICUS, Active.

STENOBREGMATE, see Cranium.

STENOCARDIA, Angina pectoris, Cardiostenosis.

STENOCHO'RIA, *Stenochori'asis.* Angustia. Employed by some for contraction of the vagina.

STENOCHORIA INTESTINI RECTI, Stricture of the rectum — s. Œsophagi, Dysphagia constricta.

STENOMYCTE'RIA, from στενος, 'narrow,' and μυκτηρ, 'nose.' Contraction of the nasal passages.

STENOSIS, Stegnosis.

STENOSTEGNOSIS, Stenostenosis.

STENOSTENO'SIS, *Stenostegno'sis*, from Steno, and στενωσις, 'contraction.' *Obstruc'tio ductûs Stenonia'na.* Narrowness or contraction of the duct of Steno.

STENOSTOMI'A, from στενος, 'narrow,' and στομα, 'mouth.' Contraction of the mouth.

STENOTHORA'CES, from στενος, 'narrow,' and θωραξ, 'the chest.' They who have narrow chests.

STENTOROPHO'NUS, from Στεντωρ, *Stentor*, a Greek in the army before Troy; and φωνη, 'voice.' One who has a strong voice.

STEPHANE, Crown.

STEPHENS, MRS., REMEDY FOR THE STONE. This consisted of lime, prepared by calcining the shells of eggs and snails, made into pills with soap. A decoction was, also, administered, consisting of chamomile, fennel, parsley, and burdock, with a portion of Alicant soap. Its virtues were dependent upon the lime and the tonic properties of the decoction. Hales, Hartley, Kirkpatrick, Lobb, and others, wrote in favour of this nostrum; and it was ultimately bought by the British parliament for £5000.

STERA, Uterus.

STERCORA'CEOUS, *Stercora'rius, Diachoret'icus, Ster'coral*, from *stercus*, 'dung.' *Fecal, Fæcal*, (F.) *Stercoraire, Stercoral.*

The French use the term *Fistules stercoraires* for those which are kept up by the constant passage of fecal or *stercora'ceous matter.* The name *Stercoraires* is sometimes given, in derision, to those physicians who are fond of purging their patients: *à posteriori* has been similarly used.

*STERCORAIRE*, Stercoraceous.

STERCUS, Excrement, Fimus — s. Anseris, Fimus anseris—s. Caninum album, Album Græcum—s. Diaboli, Asafœtida—s. Equi non castrati, Fimus.

STERCUS HUMA'NUM, Homerda. Human excrement.

STERCUS LACERTÆ, Crocodilia.

STEREOCYST'IS, from στερεος, 'hard,' and κυστις, 'cyst.' A hard steatoma.

STEREOS, Solid.

STEREOT'ICA, from στερεος, 'hard.' Fortui-

tous lesions or deformities affecting the hard parts. The 2d order, class *Tychica* of Good.

STER'ILE, *Ster'ilis, A'gonos, Aph'orus, Aphor'icus, Ablast'es, Infecun'dus,* (F.) *Stérile.* Same etymon as Sterilitas. Not producing fruit: infecund.

STERILIS, Sterile.

STERIL'ITAS, *Agon'ia, Steiro'sis, Stiro'sis, Agenne'sia, Agenne'sis, Infecun'ditas, Steril'ity, Acye'sis, Bar'renness, Infecun'dity, Apho'ria, Atec'nia, Atoc'ia,* from στερρος, or στειρος, 'hard, barren.' Quality of that which is barren. Sterility may be *absolute* or *relative.* The former depends upon some vicious conformation of the genital organs, apparent or concealed, and occasionally admits of cure. Sterility is *relative* when a female does not conceive with one individual, but does with another. Sterility in females is often dependent upon a condition of the uterus characterized by membranous menstruation.

STERNAD, see Sternal.

STERNAL, *Sterna'lis,* from *sternum,* 'the breast bone.' Relating or appertaining to the sternum or breast bone.

STERNAL ASPECT. The aspect of the body where the sternum is situate.—Barclay. *Sternad* is used by the same writer adverbially to signify towards the sternal aspect.

STERNALGIA, Angina pectoris.

STERNO-CLAVIC'ULAR, *Sterno-clavicula'ris.* That which relates to the sternum and clavicle.

STERNO-CLAVIC'ULAR ARTICULA'TION is the union of the inner extremity of the clavicle with a round facette at each side of the superior extremity of the sternum. In this articulation there are, besides the incrusting cartilages, two *radiated sterno-clavicular,* (F.) *Sterno-claviculaires rayonnées; one* anterior, and *one* posterior —an *inter-clavicular ligament,* extending between the two clavicles, and two synovial capsules, separated by an *inter-articular fibro-cartilage.* The costo-clavicular ligament may also be considered to belong to this articulation.

*STERNO-CLAVIO-MASTOÏDIEN,* Sterno-cleido-mastoideus — s. Cleido-hyoideus, Sterno-hyoideus.

STERNO-CLEIDO BRACHIALIS, Pectoralis major.

STERNO-CLEIDO-MASTOIDEUS, *Sterno-mastoïdeus, Cleido-mastoïdeus, Mastoïdeus anterior, Nuta'tor cop'itis;* (F.) *Sterno-clavio-mastoïdien, Sterno-mastoïdien;* from στερνον, 'the sternum,' κλεις, 'the clavicle,' and μαστος, 'the mastoid process.' A muscle situate at the anterior and lateral part of the neck. It is long and flattened: simple, above: and divided into two portions below; where it is inserted into the anterior and superior part of the sternum, and the inner quarter of the clavicle. Above, it terminates at the mastoid process, which it embraces, at the neighbouring part of the temporal bone, and at the outer third of the upper curved line of the occipital bone. It carries the head forward; inclines, and rotates it to one side. When both contract, they bend the head directly forwards.

*STERNO-COSTAL,* Triangularis sterni — s. *Costo-clavio-huméral,* Pectoralis major—s. *Dynia,* see Somatodynia—s. *Huméral,* Pectoralis major.

STERNO-HYOÏDEUS, *Sterno-cleido-hyoïdeus, Sterno-hyoïdes, Hyoides primus;* from στερνον, 'the sternum,' and ὑοειδης, 'the os hyoides.' A muscle situate at the anterior part of the neck; inserted, above, at the inferior edge of the body of the hyoid bone; below, into the upper part of the posterior surface of the sternum;—at the posterior part of the sterno-clavicular articulation, and sometimes into the cartilage of the first rib. It depresses the os hyoides.

*STERNO-MASTOÏDIEN,* Sterno-cleido-mastoideus—s. *Pubien,* Rectus abdominis.

STERNO-THYROÏDEUS, *Sterno-thyroïdeus, Bron'chius.* A muscle, situate at the anterior part of the neck. It is attached, above, to the oblique line seen on the outer surface of the thyroid cartilage; and terminates, below, at the upper part of the posterior surface of the sternum, and the cartilage of the second rib. When it contracts, it depresses the thyroid cartilage and os hyoides, by the medium of the thyro-hyoid membrane.

STERNODYNIA SYNCOPALIS, Angina pectoris—s. Syncoptica et Palpitans, Angina pectoris.

STERNO-OMPHALODYMIA, see Somatodymia.

STERNUM, *Sternon,* from στερρος, 'solid;' *Pectus, Os asser* seu *pec'toris* seu *xiphoïdes* seu *gladi'oli* seu *ensifor'mē, Scutum cordis, Breast Bone, Hæmal Spine* of Owen. An azygous symmetrical bone, situate at the fore-part of the chest. It is flat; broad above; narrower in the middle; and terminates, below, by a pointed cartilage—the xiphoid. It has an *anterior* or *cutaneous surface,* a *posterior* or *mediastinal* — a *superior* or *clavicular extremity,* and an *inferior* or *abdominal.* It is articulated with the clavicles and the seven upper ribs on each side, by means of their cartilages. According to Béclard, it is formed of six principal bones, which he names, from their position, 1. *Primi-sternal* or *clavi-sternal:* 2. *Duo-sternal:* 3. *Tri-sternal:* 4. *Quarti-sternal:* 5. *Quinti-sternal:* 6. *Ultimi-sternal* or *ensisternal.*

STERNUMENTUM, Sneezing.

STERNUTAMENTORIA, Achillea ptarmica.

STERNUTAMENTUM, Sneezing.

STERNUTATIO, Sneezing.

*STERNUTATOIRE,* Sternutatory.

STER'NUTATORY, *Sternutato'rius,* from *sternutare,* 'to sneeze.' *Sternutamen'tum, Errhi'num, Ptar'micum, Anarrhi'num,* (F.) *Sternutatoire.* A substance which provokes sneezing; as tobacco, &c.—See Errhine.

*STERTEUR,* Stertor.

STERTOR, *Ronchus* or *Rhonchus, Renchus, Rhencus,* (F.) *Sterteur, Ronflement,* from *stertere,* 'to snore.' The deep snoring which accompanies inspiration in some diseases, particularly in apoplexy. Such respiration is said to be *ster'torous: Respira'tio stertuo'sa* seu *stertens* seu *stertoro'sa.*

STERTOROUS, see Stertor.

STETHÆ'MIA, *Hyperæ'mia Pulmo'num* seu *Pec'toris, Conges'tio Pulmonum* seu *Pectoris,* (F.) *Hyperémie des Poumons, Congestion des Poumons.* Hyperæmia of the lungs. Congestion or accumulation of blood in the pulmonary vessels.

STETHOCATHARSIS, Expectoration.

STETHOCHYSIS, Hydrothorax.

STETHODESMIS, Corset.

STETHODESMIUM, Corset

STETHODESMUS, Corset.

STETHOM'ETER, from στηθος, 'the chest,' and μετρον, 'measure.' An instrument, proposed by Dr. Richard Quain, for measuring the extent of movement of the walls of the chest, as a means of diagnosis in thoracic diseases. It consists of a flat case, not unlike a watch-case, having on its upper surface a graduated dial and index, which is acted on by a simple mechanism. A silk cord, long enough to surround one-half the chest, passes through an aperture in the case. The dial is graduated into fifty equal parts, each of which represents the 1-200th of an inch. In using the instrument, the dial is placed firmly against the spine, and the point of the tape over the sternum, or at any other spot according to the part to be

examined. The extension of the string, as indicated by the dial, shows the amount of elasticity of the parietes of the thorax.

STETHOPARAL'YSIS, *Paral'ysis nervo'rum thora'cis, phrenicorum*, &c.; from στηθος, 'the chest,' and παραλυσις, 'paralysis.' Palsy of the muscles of the chest.

STETHORRHEUMA, Pleurodynia.

STETH'OSCOPE, *Stethoscop'ium, Stethos'copum, Echoscop'ium, Psophom'eter, Thoracoscop'ium*, from στηθος, 'the chest,' and σκοπεω, 'I examine.' An instrument invented by Laënnec, of Paris, for exploring the chest. The stethoscope, sometimes called *Pectoriloque*, is a cylinder of wood, from four inches to a foot long; pierced through and through by a longitudinal canal about a quarter of an inch in diameter. The longer are generally composed of two portions, that fit together by means of a screw, one of which is hollowed at the extremity, in the shape of a funnel. These two portions being screwed to each other, the physician lays hold of the instrument, as he would of a pen, puts the funnel-shaped extremity on the chest of the patient, and applies his ear to the other. To explore the pulsations of the heart, the funnel is plugged up by a piece of the same kind of wood accurately adapted to it, and pierced by a canal of the same width as that in the body of the instrument. Stethoscopes are sometimes flexible, like the flexible ear-trumpet.

This mode of examining affections of the chest, *Steth'oscopy, Stethoscop'ia*, &c., is what Laënnec terms *Auscultation médiate, Mediate Auscultation*.

STETHOSCOPIA, see Auscultation, and Stethoscope.

STETHUS, Thorax.

STEW, Stove.

STHENI'A, *Steni'a, Diath'esis sthen'ica, Status sthen'icus, Vis aucta*, from σθενος, 'strength,' 'power.' Excess of strength; excitement of the organic actions. A word used, especially by the Brunonians, as well as *Asthenia*,—its antitheton. *Sthenic* or *dynamic diseases* are such as depend upon excessive excitement.

STHENICUS, Active.

STHENOPYRA, Synocha.

STIBI, Antimonium.

STIBIALIS, Antimonial.

STIBIATUS TARTRIS LIXIVIÆ, Antimonium tartarizatum.

STIBII BUTYRUM, Antimonium muriatum — s. Deuto-murias sublimatus, Antimonium muriatum—s. et Potassæ deuto-tartras, Antimonium tartarizatum—s. Hydrosulphuretum rubrum, Antimonii sulphuretum rubrum — s. Oxidum acido muriatico oxygenato paratum, Algaroth—s. Oxidum album mediante nitro confectum, Antimonium diaphoreticum — s. Oxidum præcipitando paratum, Algaroth — s. Oxodes album, Antimonium diaphoreticum — s. Oxodes sulphuretum, Antimonii sulphuretum præcipitatum — s. Oxydi sulphurati hydro-sulphuretum lutcum, Antimonii sulphuretum præcipitatum—s. Oxydulati sulphuretum, Antimonii sulphuretum præcipitatum — s. Oxydulum vitreatum, Antimonii vitrum—s. Oxydum semivitreum, Antimonii vitrum—s. Oxydum sulphuratum, Oxydum stibii sulphuratum — s. Subhydrosulphas, Antimonii sulphuretum rubrum — s. Submurias præcipitando paratum, Algaroth — s. Sulphurati hydrosulphuretum rubrum, Antimonii sulphuretum rubrum — s. Sulphuretum nigrum, Antimonium — s. Vitrum, Antimonii vitrum.

STIBIOSUM HYDROSULPHURETUM CUM SULPHURE, Antimonii sulphuretum præcipitatum — s. Oxidum. Antimonium diaphoreticum.

STIBIUM, Antimonium.

STICHAS ARABICA, Lavendula stœchas.

STICKWORT, Agrimony.

STICTA PULMONACEA, Lichen pulmonarius.

STIFF JOINT, MUSCULAR, Contractura.

STIFF JOINTS, Milk sickness.

STIFFNECK, Torticollis.

STIGMA, Cicatricula.

STIGMATA, see Nævus. The breathing pores of insects are so called.

STIG'MATA OVARIO'RUM, *Cicatri'ces Ovario'rum*. The cicatrices left in the ovary after the escape of ova.

STILBOMA, Cosmetic.

STILL, Alembic.

STILLA, Gutta.

STILLATIO SANGUINIS E NARIBUS, Epistaxis.

STILLICID'IUM, *Substil'lum*, from *stillare*, 'to drop.' This term is often used synonymously with *Strangury*. It means the flow of any fluid —particularly the urine—drop by drop. Also a kind of embrocation, *Stillicid'ium supra partem*, effected by dropping a liquid upon a part.

STILLICIDIUM LACRYMARUM, Epiphora — s. Narium, Coryza — s. Sanguinis e naribus, Epistaxis — s. Supra partem, see Stillicidium.

STILLIN'GIA, *S. sylvat'ica, Queen's Root, Queen's delight, Yaw root, Mar'cory, Cockup hat*. An indigenous plant, which grows in pine barrens, from Virginia to Florida. *Sex. Syst.* Monœcia Monadelphia. *Nat. Ord.* Euphorbiaceæ. The root is said to be used in syphilis, obstinate cutaneous affections, &c., like sarsaparilla.

STIMATO'SIS, *Stymatosis, Hæmorrhag''ia Penis, Stymatorrhag''ia, Phallorrhag''ia, Caulorrhag''ia*, from στυμα, 'priapism,' itself from στυειν, 'to erect.' Hemorrhage from the male organ, accompanied or not with priapism.

STIMMI, Antimonium.

STIM'ULANT, *Stim'ulans, Excita'ns, Excit'tant, Incita'ns, Incenti'vum, Irri'tans, Incit'tant, Hypersthen'ic*, from *stimulare*, 'to goad.' A medicine which has the power of exciting the organic action of the different systems of the economy. Some stimulants are *diffusible*,—that is, have a prompt but temporary action; others are *permanent* or *persistent*. The action of stimulants is called *Stimula'tion, Stimula'tio, Incita'tio*.

The chief stimulants are the following: Æther Sulphuricus, Ammonia, Asafœtida, Brucia, Camphora, Capsicum, Castoreum, Cinnamomum, Copaiba, Cubeba, Guaiacum, Hydrargyri Præparata, Iodinum, Nux Vomica, Olea Essentialia, Opium (in small dose), Piper, Sinapis, Strychnia, Zingiber, — Alcohol, Caloric, Electricity, Mental Emotions, (the Impetuous.)

STIM'ULUS, 'a goad.' *Incitamen'tum, Irrita'men, Irritamen'tum, Poten'tia Irri'tans*. Any thing which excites the animal economy.

STINK POKE, Dracontium fœtidum—s. Weed, Chenopodium anthelminticum, Datura stramonium, Polanisia graveolens.

STIPATIO, Stegnosis.

STIPATIO TELÆ CELLULO'SÆ INFANT'UM. Induration of the cellular tissue of children.

STIROSIS, Sterilitas.

STITCH, same root as *stick*, *Sax.* ꝥician, (G.) stecken, (F.) Point, (L.) *Punctum;* (from *pungere, punctum*, 'to prick or sting.') An acute lancinating pain, like that produced by the puncture of a sharp needle.

STITCH, COMMON, Suture, common — s. Royal, Suture, common — s. in the Side, Pleurodynia.

STIZOLOBIUM, Dolichos pruriens.

STLENGIS, Stridor dentium.

STOBÆ'A RUBRICAU'LIS. A South African plant, *Nat. Ord.* compositæ. A tincture of the bruised roots is diuretic, and of great service in gravel.

STOCHEION, Element.

STOCKING, LACED, (F.) *Bas lassé.* A bandage used by surgeons, which consists of a stocking made of firm cloth or dog-skin, admitting of being tightly laced anteriorly. It is employed in varices and ulcers of the legs.

STŒCHAS ARABICA, Lavendula stœchas.

STOMA, Mouth.

STOMAC'ACĒ, *Stomatoc'acē, Stomal'gia, Labrisul'cium, Cheiloc'acē, Uloc'acē, Cheilomala'cia, Stomatono'ma, Stomatonecro'sis,* from στομα, 'the mouth,' and κακος, 'evil:' *Cancer Oris, Canker.* Fœtor of the mouth with a bloody discharge from the gums. (F.) *Cancer aquatique;* see Cancer Aquaticus. Also, Scurvy.

Stomacace, Porphyra nautica—s. Gangrænosum, Cancer aquaticus — s. Universale, Purpura hæmorrhagica.

*STOMACAL,* Stomachal.

STOMACALGIA, Cardialgia.

STOMACH, *Stom'achus, Ventric'ulus, Nedys, Anocœ'lia, Gaster,* (F.) *Estomac,* from στομα, 'a mouth.' One of the principal organs of digestion. It is a musculo-membranous reservoir; continuous, on the one side, with the œsophagus; on the other, with the duodenum. It is situate beneath the diaphragm, between the liver and the spleen; and occupies the epigastrium and a part of the left hypochondrium. In it the food is converted into chyme. When viewed externally, the stomach has, 1. An *anterior face,* which looks a little upwards. 2. An *inferior face,* directed downwards. 3. An *inferior* or *colic margin,* which is convex and extensive, and is called the *greater curvature,* (F.) *Grand courbure.* It gives origin to the omentum majus. 4. A *superior* or *diaphragmatic margin,* which is shorter, concave, and is called the *lesser curvature,* (F.) *Petit courbure.* The lesser omentum is attached to this. 5. A *left* or *œsophageal orifice,* called, also, the *cardia, Os ventric'uli* or *upper orifice.* 6. A *right* or *intestinal,* or *inferior orifice,* called the *pylorus.* 7. A considerable dilatation, situate to the left of the cardia and greater curvature — the *great tuberosity of the stomach;* and, 8. A less extensive dilatation, situate to the right of the greater curvature, — *the lesser tuberosity* or *lesser cul-de-sac, Antrum Pylo'ri.* The inner surface of the stomach is of a reddish-white colour, and has a marbled appearance. It is constantly covered by thick mucus, and is lined by a mucous membrane, which presents numerous wrinkles. The parietes of the stomach consist of three membranes in superposition. The outermost is serous, and is an extension of the peritoneum; the middle coat is *muscular,* — some of its fibres running longitudinally; others, transversely, and others obliquely; the innermost membrane is of a mucous nature, *Crusta villo'sa ventric'uli, Gastro-mycod'eris,* but not exactly a continuation of the membrane that lines the œsophagus. The mucous and muscular membranes form, at the pylorus, a valve, called the *Pyloric valve.* These three coats are united by a dense, close, areolar membrane; and, between the mucous and muscular coats, along the two curvatures especially, is a quantity of muciparous glands, called *Glands of Brunner.* The arteries of the stomach are very numerous, and proceed from the coronaria ventriculi, the pyloric, splenic, and right and left gastro-epiploic. The veins have the same name, and pursue the same course as the arteries. They pour their blood into the trunk of the vena porta. Its lymphatic vessels are very numerous, and pass into ganglia, situate along the two curvatures. The nerves of the stomach proceed from the pneumogastric, and three divisions of the cœliac plexus.

Stomach Cell, see Favulus — s. Disease, Limosis — s. First, Ingluvies.

Stomach Pump, *Gastren'chyta, Antli'a gas'trica.* A useful instrument for conveying fluids to the stomach, when deglutition is impracticable, and for pumping out the contents of that organ. It consists of a forcing syringe, to the bottom and nozzle of which flexible tubes can be attached. When the object is to force fluids into the stomach, the stomach-tube must be attached to the nozzle, and passed down the throat, — the tube connected with the bottom of the syringe being placed in the fluid to be injected. To empty the stomach, the stomach-tube must be attached to the bottom of the instrument. This instrument has been of great service where poisons have been taken. The antidote, when any exists, and is at hand, should be administered immediately prior to its use.

The stomach pump was first employed in America by Dr. Physick, in the year 1812.

Stomach, Second, Proventriculus — s. Sick, Milk sickness — s. Third, Ventriculus callosus — s. Tube, see Tube, œsophageal.

STOM'ACHAL, *Stomach'ic, Stomach'ical, Cardi'acus, Stomach'icus, Stomacha'lis, Viscera'lis,* (F.) *Stomacal, Stomachique.* That which belongs to the stomach; that which is good for the stomach; which strengthens the stomach. A medicine that gives tone to the stomach.

STOMACHALGIA, Cardialgia.

STOMACHI RESOLUTIO, Dyspepsia.

STOMACHIC, Stomachal.

STOMACHICAL, Stomachal.

*STOMACHIQUE* Stomachal.

STOM'ACHUS, from στομα, 'mouth.' This word has been used in several different acceptations; for example, for the œsophagus, for the cardiac orifice of the stomach, (see Cardia,) and for the stomach itself. Hippocrates calls the neck of the bladder στομαχος κυστεως; and the neck of the uterus της μητρας στομαχος.

STOMAL'GIA, *Stomatal'gia, Stomatodyn'ia,* from στομα, 'mouth,' and αλγος, 'pain.' Pain in the mouth; *Stomac'acē.*

STOMAPYRA, Aphthæ — s. Aphtha, Aphthæ.

STOMATALGIA, Stomalgia.

STOMAT'IC, *Stomat'icus,* from στομα, 'mouth.' A medicine used in diseases, &c., of the mouth. Dentifrices, masticatories, &c., are stomatics.

*STOMATITE APHTHEUSE,* Stomatitis, aphthous — *s. Charbonneuse,* Cancer aquaticus — *s. Couenneuse,* Stomatitis, pseudo-membranous — *s. Crêmeuse pultacée,* Aphthæ — *s. Folliculeuse,* Stomatitis, aphthous — *s. Gangrêneuse,* Cancer aquaticus — *s. Mercurielle,* see Salivation, mercurial — s. *Ulcéreuse,* Stomatitis, aphthous.

STOMATI'TIS, from στομα, 'the mouth,' and *itis,* denoting inflammation. (F.) *Inflammation de la Bouche;* Inflammation of the mouth.

Stomatitis, Aphthous, *S. follic'ular, S. ulcerous, Emphly'sis Aphthæ, A. Adulto'rum,* (F.) *Stomatite, S. aphtheuse, S. folliculeuse, S. ulcéreuse.* An inflammation of the follicles of the mouth, constituting the aphthæ of the adult, which is generally accompanied by cephalic, gastric, and general disturbance. It may be either discrete or confluent, and requires general and local treatment, adapted to the case.

Stomatitis, Erythem'atous. Simple inflammation of the mouth.

Stomatitis, Exsudativa, Aphthæ—s. Follicular, S. aphthous — s. Gangrenous, Cancer aquaticus.

Stomatitis, Mercu'rial, *Hydrargyrostom'atis, Hydrargyrostomati'tis, Stomati'tis mercuria'lis.* Inflammation of the mouth induced by mercury.

Stomatitis of Nursing-women appears to be a variety of S. aphthous.

Stomatitis, Pseudomem'branous, (F.) *Stomatite couenneuse, Diphthérite buccale, Pseudomembranous inflammation of the mouth;*—in its worst form, *Stomatyphus,* (F.) *Fégarite.* Inflammation of the mouth accompanied by the exudation of a false membrane,—a disease which is rarely seen except in large foundling establishments.

Stomatitis, Ulcerous, S. aphthous — s. Vesiculosa infantum, Aphthæ.

STOMATOCACE, Stomacace.

STOMATODYNIA, Stomalgia.

STOMATO-GAS'TRIC, *Sto'mato-gas'tricus,* from στομα, 'the mouth,' and γαστηρ, the stomach.' Appertaining to the mouth and stomach,—as the *stomato-gastric* ganglia of the lower animals.

STOMATOMALACIA PUTRIDA, Cancer aquaticus.

STOMATONECROSIS, Cancer aquaticus, Stomacace.

STOMATONOMA, Stomacace.

STOMATOPA'NUS, from στομα, 'the mouth,' and πανος, 'a glandular tumour.' *Stomatophy'ma glandulosum, Panus Fau'cium.* Tumefaction of the glands of the mouth.

STOMATOPHY'MA, from στομα, 'the mouth,' and φυμα, 'a swelling.' A swelling in the mouth.

Stomatophyma Glandulosum, Stomatopanus.

STOMATOPLAS'TIC, *Stomatoplas'ticus;* from στομα, 'the mouth,' and πλασσω, 'I form. The operation of forming a mouth, where the aperture has been contracted from any cause.

STOMATORRHAG''IA, *Stomatorrhœ'a, Hœmorrhag''ia oris, H. fau'cium, San'guinis profluvium ex Orē, Hœmorrhoï'des Oris, Stomato'sis, Stomorrhag''ia,* (F.) *Hémorrhagie buccale,* from στομα, 'the mouth,' and ρηγνυμι, 'I break out.' Hemorrhage from the mouth.

Stomatorrhagia Alveolorum, Phatnorrhagia — s. Gingivarum, Ulorrhagia.

STOMATORRHŒA, Stomatorrhagia.

*STOMATOSCOPE,* from στομα, 'mouth,' and σκοπεω, 'I view.' Any instrument for keeping the mouth open, so as to permit the parts within to be inspected; *Speculum oris.*

STOMATOSEPSIS, Cancer aquaticus.

STOMATOSIS, Stomatorrhagia.

STOMATOSPASMUS, Trismus.

STOMATYPHUS, Stomatitis, pseudomembranous.

STOMOMANICON, Platysma myoides.

STOMORRHAGIA, Stomatorrhagia.

STONE IN THE BLADDER, Calculi, vesical — s. Binder, Osteocolla — s. Crop, Sedum — s. Crop, biting, Sedum — s. Mint, Cunila mariana — s. Pock, Acne — s. Root, Collinsonia Canadensis.

STONES, THE, Testes.

STOOL, Dejectio.

Stool, Calomel, see Calomel.

STORAX, Styrax — s. Liquida, Liquidambar styraciflua.

STOREY'S WORM CAKES. An empirical preparation, formed of *calomel* ℈j, *jalap.* ℥j, *zingib.* ℈ij, *sacch.* ℥j, *cinnab. antim.* q. s. to colour them; *syrup. simpl.* q. s. to make into cakes.

STORKBILL, Geranium maculatum.

STOVE. Old French *Estuve, Stupha;* a *Stew, Æstua'rium,* (F.) *Étuve.* A limited space, warmed artificially, and in which the air is slowly renewed. It is used for drying various substances, as plants, extracts, conserves, &c., or for taking vapour baths. In this case, the *stew* or *stove* is said to be *wet* or *humid;* in the opposite case, it is said to be *dry,* (F.) *sèche.* The latter, which is used by the Turks, is the *Lacon'icum* or *Calida'rium* of the Romans. The former is their *Tepida'rium* or *Vapora'rium.* These kinds of baths greatly excite the cutaneous transpiration; and are valuable agents in rheumatic and other affections.

STRABI, see Strabismus.

STRABILISMOS, Strabismus.

STRABIS'MUS, *Strabilis'mos, Parop'sis Strabismus,* from στραβος, 'twisted,' 'one who squints;' *Strabos'itas, Loxophthal'mus, Distor'sio, Lus'citas, Illo'sis, Ilo'sis, Helo'sis, Squinting, Goggle Eye,* (F.) *Strabisme, Vue louche, Louchement.* Want of concordance of the optic axes. It may be dependent upon natural or acquired inequality in the action of the motor muscles of the eye; on a convulsive state of one of those muscles; a difference in the sensibility of the two eyes; or a cerebral affection. In the treatment, if the disease seem to depend upon an excess of strength in one of the motor muscles, we must endeavour to give tone to that which is too weak, by placing before the eye a mask having a small aperture on the side to which it is necessary to direct the pupil; or by wearing glasses, provided with a piece of looking-glass, on the side to which the eye is vitiously turned; so that the reflection may be inconvenient, and occasion the organ to be turned in an opposite direction; or by putting a black patch on the angle opposite to that to which the eye is turned. If owing to weakness, the organ must be strengthened by being exerted alone, and by leaving the other at rest. If the disease be symptomatic of cerebral affection, attention must, of course, be directed to the latter.

Strabismus may be *single* or affect one eye only, or *double,* and it may be *convergent* or *divergent.*

Those affected with Strabismus are called *Strabi, Strabo'nes, Strabo'ni, Strebli, Illi, Squint'ers, Squint-eyed;* in French, *Louches, Bigles.*

Strabismus, Convergent, see Strabismus — s. Divergent, see Strabismus — s. Double, see Strabismus — s. Single, see Strabismus.

STRABONES, see Strabismus.

STRABONI, see Strabismus.

STRABOSITAS, Strabismus.

STRABOT'OMY, *Strabotom'ia,* from στραβος, 'one who squints,' and τομη, 'incision.' The operation for the removal of squinting by the division of the muscle or muscles that distort the eye-ball.

STRAIN, Sprain.

Strain, *colare,* (F.) *couler,* from στραγγειν, *stringere,* (F.) *estreindre,* 'to constrict or squeeze.' To pass decoctions, infusions, &c., forcibly through linen; also, to exert an effort. This is accomplished by fixing firmly the parts where the muscles to be exerted originate, in order that their full power may be developed.

STRAINING, Nisus.

STRAITS OF THE PELVIS, see Pelvis.

*STRAMOINE,* Datura stramonium.

STRAMONIA, Datura stramonium.

STRAMONIUM, Datura stramonium—s. Fœtidum, Datura stramonium—s. Majus album, Datura stramonium — s. Spinosum, Datura stramonium — s. Vulgatum, Datura stramonium.

STRANGAL'IDES, from στραγγυεω, 'I torment.' Small, hard tumours, which form in the breast, when the milk does not find issue.

STRANGALION, Tubercle.

STRANGALIS, Tubercle.

STRANGALISMUS, Strangulation.

STRANGERS' FEVER, see Fever, strangers'.

STRANGULATIO, Orthopnœa, Strangulation — s. Uterina, Angone.

STRANGULA'TION, *Strangula'tio, Pnix, Pnig'mos, Strangalis'mus,* (F.) *Étranglement, Strangulation.* State of a part too closely constricted. Thus we say that there is *strangulation* of an intestinal hernia, when the opening that gives passage to the portion of protruded intestine contracts, so as to intercept the continuity of the digestive canal. In *Legal Medicine,* it means the forcible obstruction of the air passages, by a ligature or by the hand, for criminal purposes. See Suffocation.

STRANGULATOR, see Lycoides.

STRANGURIA, Enuresis—s. Cruenta, Cystorrhagia.

*STRANGURIE,* Strangury — *s. Menstruelle,* Dysmenorrhœa.

STRANGU'RIOUS; same etymon as the next. Affected with, or of the nature of, strangury.

STRAN'GURY, *Strangu'ria, Paru'ria stillati'tia,* from στραγγειν, 'to squeeze,' and ουρον, 'urine:' *Dysu'ria, Uri'næ Stillicid'ium* vel *Substil'lum,* (F.) *Strangurie.* Extreme difficulty in evacuating the urine, which issues only drop by drop, and is accompanied with heat, pain, tenesmus at the neck of the bladder, &c. See Ischuria, and Retention.

STRATHPEFFER, MINERAL WATERS OF. A sulphuretted water, at Strathpeffer, a few miles west from Dingwall, in Ross-shire, Scotland. It contains sulphate of soda, sulphate of lime, chloride of sodium, sulphate of magnesia, and sulpho-hydric acid.

STRATIOTES, Achillea millefolium.

STRATUM BACILLATUM, see Tunica Jacobi — s. Malpighii, Corpus mucosum — s. Pigmenti, see Choroid — s. Proligerum, Proligerous disc.

STRAWBERRY, Fragaria — s. Bush, Euonymus Americanus — s. Shrubby, Rubus arcticus — s. Tree, Euonymus Americanus—s. Wild, Fragaria Virginiana.

STREAK, PRIMITIVE, Groove, primitive.

STREATHAM, MINERAL WATERS OF. Streatham is a village near London. The waters are saline and cathartic.

STREBLI, see Strabismus.

STREBLOSIS, Luxation.

STREMMA, Luxation, Sprain.

STREPITO'SUS MORBUS. 'Noisy disease.' A kind of flatulent disease, said by Sorbait to be not uncommon in the Austrian Alps, in which emphysematous tumours form on different parts of the body, — accompanied by sonorous excretion of gas by the mouth and anus.

STREPITUS AURIUM, Tinnitus aurium.

STRETCHING, Pandiculation.

STRIÆ, Vibices—s. Ciliares, Ciliary processes —s. Corneæ, Tenia semicircularis—s. Longitudinales Lancisii, see Corpus callosum — s. Medullares, see Processus teretes — s. Retinæ subjectæ ligamento ciliari, Halo signatus—s. Semilunares, Tænia semicircularis—s. Terminales, Tænia semicircularis—s. Transversæ Willisii, see Corpus callosum.

STRIATED MUSCULAR FIBRE, see Muscular fibre.

STRIATUS, *Cannelé,* Grooved, see Corpora striata.

STRIBILIGO, Efflorescence.

STRICTURA, Stricture — s. Ani, Stricture of the rectum — s. Intestini recti, Stricture of the rectum — s. Intestini recti spasmodica, Stricture of the rectum, spasmodic — s. Œsophagi callosa, Dysphagia constricta — s. Œsophagi spasmodica, Œsophagismus—s. Pharyngis seu œsophagi vera, Dysphagia constricta — s. Præputii, Phimosis — s. Urethræ, Urethrostenosis—s. Ventriculi, Stricture of the stomach.

STRICTURE, *Strictu'ra,* from *stringere, strictum,* 'to tie hard.' *Coarcta'tio, Stegno'sis,* (F.) *Rétrécissement.* A diminution or contracted condition of some tube or duct, as the œsophagus, rectum, urethra, &c. This must be dilated by appropriate bougies. Strictures may, also, occur in the intestines: they are unmanageable, with the exception of those of the rectum, which admit of topical applications.

STRICTURE OF THE ŒSOPHAGUS, Dysphagia constricta — s. of the Pharynx, Dysphagia constricta.

STRICTURE OF THE RECTUM, SPASMOD'IC, *Strictu'ra Intesti'ni Recti spasmod'ica, Obstruc'tio Recti spas'tica.* An affection occurring in the nervous especially, which subsides spontaneously, after a longer or shorter continuance.

Stricture of the rectum, *Strictu'ra Ani* seu *Intesti'ni Recti, Archostegno'ma, Rectosteno'sis, Euthyenterosteno'ma, Archostegno'sis, Archosteno'sis, Proctoëncli'sis, Angusta'tio* et *Restric'tio intestini recti vel ani, Stenocho'ria intesti'ni recti, Proctosteno'sis organ'ica,* occurs also organically, and is a very serious affection; being generally dependent upon scirrhus.

STRICTURE OF THE STOMACH, *Gastrosteno'sis, Coarcta'tio* seu *Strictu'ra ventric'uli.* See Gastrostenosis cardiaca, &c.

STRICTURE OF THE URETHRA, Urethrostenosis — s. of the Urinary bladder, Cystostenochoria — s. Vesicæ uriuariæ, Cystostenochoria.

STRIDOR DENTIUM, Brygmus.

STRIGA CARTILAGINOSA CORDIS, Isthmus of the fossa ovalis.

STRIGIL, *Strig'ilis, Stlen'gis, Stelen'gis.* A flesh-brush. Also, an instrument, anciently used in the baths, for scraping off the sweat.

STRIPED MUSCULAR FIBRE, see Muscular fibre.

STROBILITI'TES, from στροβιλος, *stro'bilus,* 'a cone of the pine.' Wine impregnated with the cones of the pine.

STROEMIA, Cadaba.

STROKE, APOPLEC'TIC. An apoplectic seizure.

STROKE, BACK, OF THE HEART, Impulse, diastolic.

STROKE, PARALYT'IC. A sudden attack of encephalo-spinal paralysis.

STROMA, *Strag'ulum, Stramen'tum;* from στρωννυω, στρωννυμι, 'to spread out; to cover.' The bed or foundation-texture of an organ, — as the stroma of the ovary. Applied, also, to the bed or base of any deposit — as the 'amorphous stroma' of scrofulous deposits.

STROMBULCUS, Forceps (bullet.)

*STRONGLE,* Strongylus—*s. Géant,* Strongylus gigas.

STRON'GYLUS, from στρογγυλος, 'round.' Hippocrates, Chabert, and others, mean the *Ascaris lumbricoï'des* by this term. The *Strongylus Gigas,* (F.) *Strongle, S. géant,* is, however, distinct. It has an obtuse, flat head: mouth surrounded with six flattish papillæ: the whole bursa of the male truncated: the tail of the female rounded. It is sometimes met with,—five inches, a foot, a foot and a half, and even three feet long, —and from two lines to half an inch in diameter. It is occasionally found in the human kidney; rarely in other viscera, and still more rarely in the intestinal tube.

STRONGYLUS, Teres.

STROPHOS, Tormina.

*STROPHULE,* Strophulous.

STROPH'ULUS, *Licheni'asis stroph'ulus, Ebullit''io, Exanthe'ma strophulus, Exor'mia strophulus, Red Gum, Red Gown, Tooth Rush, White Gum, Milk-spots,* (F.) *Strophule, Feux de dents.* It consists of an eruption of red, or sometimes whitish pimples; occurring in early infancy, chiefly about the face, neck, and arms, surrounded by a reddish halo; or interrupted by irregular patches of cutaneous blush. All the varieties under this genus arise in consequence of the extreme vascularity and irritability of the skin at this period of life, when the constitution is liable to be disturbed by irritation, either in the alimentary canal, gums or other parts. None of these eruptions are of any importance, and no medical treatment is usually necessary. If the stomach seem at all disordered, a little rhubarb and magnesia may be administered occasionally. Willan and Bateman reckon five species,—*Strophulus intertine'tus, Red gum* or *gown; S. albidus* or *white gum; S. confer'tus* or *rank red gum, Tooth rash; S. volat'icus* or *Erythe'ma volat'icum,* and *S. can'didus.*

STROPHULUS SYLVESTRIS, Ignis sylvaticus—s. Volaticus, Ignis sylvaticus.

STROPHUS, Tormina.

STRUCTIO, Structura.

STRUC'TURAL; same etymon as the next. Of, or belonging to, structure.

STRUCTURE, *Structu'ra, Struc'tio, Conforma'tio, Catasceu'ē,* from *struere, structum,* 'to build.' The arrangement of the different tissues or organic elements of which animals and vegetables are composed.

STRUMA, Bronchocele, Scrofula.

STRUMA ADIPO'SA, *Obes'itas colli.* Fatty neck. Prominence of the neck from obesity.

*STRUMES,* Scrofula.

*STRUMEUX,* Scrofulous.

STRUMOSIS CEREBRI, Encephalophymata—s. Pulmonum, Tubercles of the lungs.

STRUMOSUS, Scrofulous.

STRUMOUS, Scrofulous.

STRUTHIOPH'AGUS, from στρουθιον, 'a young ostrich,' and φαγω, 'I eat.' Struthiophagous tribes still exist in some parts of Africa.

STRUTHIUM, Saponaria.

STRUVE'S LOTION FOR HOOPING-COUGH, see Lotion, Struve's, for hooping-cough.

STRYCHNIA, *Strychni'na, Strych'nine, Strychni'num, Strych'nium, Vauqueline.* An alkaline principle; solid, crystalline, inodorous, bitter, and excessively poisonous, which has been discovered in the *Strychnos nux vomica.* (*Nucis vomicæ.* rasur. ℔iv; *calcis* pulv. ℥vj; *acid. muriat.* f℥iij; *alcohol., acid. sulphuric. dil., liquor. ammoniæ, carbon. animal. purif., aquæ,* āā q. s. Digest the nux vomica in two gallons of water, acidulated with a fluidounce of muriatic acid, for 24 hours: then boil for two hours, and strain with expression through a strong linen bag. Boil the residuum twice successively in the same quantity of acidulated water, each time straining as before. Mix the decoctions, and evaporate to the consistency of thin syrup; then add the lime previously mixed with a pint of water, and boil for ten minutes, frequently stirring. Pour the mixture into a double linen bag, and having washed the precipitate well with water, press, dry, and powder it. Treat the powder repeatedly with boiling alcohol, until deprived of its bitterness; mix the liquors, and distil off the alcohol by means of a water-bath. Mix the residue with water, and having applied heat, drop in sufficient diluted sulphuric acid to neutralize and dissolve the strychnia; then add purified animal charcoal; boil for a few minutes, filter, evaporate, and crystallize. Dissolve the crystals in water, and add sufficient solution of ammonia to precipitate the strychnia. Lastly, dry the precipitate on bibulous paper. Ph. U. S.) The medical action of strychnia on man and animals is exactly like that of the alcoholic extract of nux vomica. It is, however, more active. An eighth of a grain is sufficient to kill a large dog; and a quarter of a grain produces marked effects on the human body, when in health. It has been given in paralysis and other cases like the nux vomica. Dose, one twelfth to one eighth of a grain.

STRYCHNIA, ACETATE OF, Strychniæ acetas—s. Hydriodate of, Strychniæ hydriodas—s. Iodate of, Strychniæ iodas—s. Iodide of, Strychniæ hydriodas.

STRYCH'NIA, I'ODIDE of IODHYDRATE OF, (F.) *Iodure d'Iodhydrate de Strychnine,* is made by a solution of *ioduretted iodide of potassium* into a solution of a *salt of strychnia;* treating the precipitate with *boiling alcohol,* and crystallizing. Used in the same cases as strychnia. Dose, a sixth of a grain.

STRYCHNIA, NITRATE OF, Strychniæ nitras—s. Sulphate of, Strychniæ sulphas.

STRYCHNIA and ZINC, DOUBLE IODIDE OF, double Iodide of Zinc and Strychnia.

STRYCH'NIÆ ACE'TAS, *Strych'nium* seu *Strychni'num ace'ticum, Ace'tas strych'nii* seu *strych'nicus, Ac''etate* of *Strychnia* or *Strychnine* This salt is formed by the direct combination of *strychnia* with *acetic acid.* It is given in the same cases as pure strychnia.

STRYCH'NIÆ HYDRI'ODAS, *S. iodhy'dras, Strych'nium hydroiod'icum, Hydri'odas* seu *Iod hy'dras strych'nicus, Hydri'odate* or *Iodide of Strychnia,* is prepared by mixing a solution of *iodide of potassium* with a concentrated solution of *acetate of strychnia.*

STRYCH'NIÆ I'ODAS, *Strychni'næ I'odas, Strychni'na Ioda'ta, Strych'nium* seu *Strychni'num Iod'icum, I'odas Strych'nii* seu *Strych'nicus, I'odate of Strych'nia* or *Strychnine.* This salt may be formed by adding a concentrated solution of *iodic acid* to *strychnia;* treating with *boiling alcohol;* filtering, and leaving it to spontaneous evaporation.

STRYCHNIÆ NITRAS, *Strych'nium ni'tricum, Nitrate of Strychnia* or *Strychnine.* Used in the same cases as strychnia.

STRYCH'NIÆ SULPHAS, *Strych'nium sulphu'ricum, Sulphate of Strychnia* or *Strychnine.* Has the same properties.

STRYCHNINA, Strychnia.

STRYCHNINE, Strychnia.

STRYCHNINUM, Strychnia.

STRYCHNIUM, Strychnia—s. Aceticum, Strychniæ acetas—s. Nitricum, Strychniæ nitras—s. Sulphuricum, Strychniæ sulphas.

STRYCHNOS, Solanum dulcamara—s. Guianensis, see Curare—s. Ignatii, Ignatia amara.

STRYCHNOS NUX VOM'ICA, *Nux Vomica, Nux Metel'la, Caniram, Koochla tree. Family,* Strychnoideæ. *Sex. Syst.* Pentandria Monogynia. (F.) *Vomiquier.* A tree of the family *Strychnoïdes,* which grows in India, and the seeds of which have been long sold in the shops, under the names, *Nux Vomica, Vomic nut, Poison nut, Bachelors' buttons,* &c., (F.) *Noix vomique.* For a long time, these seeds were used only for poisoning rats; but of late years, an alcoholic extract has been prepared from them, which has been administered in paralytic affections, in small doses. Dose of the *Alcoholic Extract, Extrac'tum nucis vomi'icæ spirituo'sum, E. nucis vomicæ resino'sum, E. n. v. alcohol'icum,* (F.) *Extrait alcoholique de noix vomique,* one or two grains. It produces a kind of tetanic convulsion in the paralyzed parts, when given to the requisite extent. It has, also, been administered in chronic diar-

rhœa and dysentery. The following is the formula for the preparation of the Extrac'tum Nucis Vom'icæ of the Pharm. U. S. Take of *Nux vomica*, ℔j; *Alcohol*, a sufficient quantity. Expose the Nux Vomica to steam till it is softened; then, having sliced and dried it, grind it into powder. Introduce it into an apparatus for displacement, and pour alcohol upon it gradually, until the liquid passes without bitterness. Distil off the greater part of the alcohol from the filtered liquor, and evaporate the residue to the proper consistence.

The bark is the *false angustura* or false *cusparia bark*; *Rohun*.

The wood of *Strychnos colubri'na*, an Indian tree, contains strychnia. It was formerly considered a specific against the bites of venomous animals; and was recommended by Boerhaave in intermittents. It is the *Lignum Colubri'num*, (F.) *Bois de Couleuvre*.

Strychnos Toxicaria, see Curare.

STRYPHNA, Astringents.

STRYPHNOS, Acerb.

STUDIOSUS MEDICINÆ, Philiatros.

STUDIUM INANE, Aphelxia otiosa.

STUDY, BROWN, Aphelxia otiosa.

STUFFING, Cynanche trachealis.

STULTITIA, Fatuitas.

STUMP, (G.) Stumpf, (D.) *Stomp*, 'a stump;' also, 'blunt.' (F.) *Moignon*. The part remaining from which a limb or other part has been amputated or removed in any manner.

STUNNED. Old French, *Estonné*, (L.) *attonitus*, 'astonished.' (F.) *Étonné*. An epithet, applied to one who, in consequence of a fall or other accident, has received such a concussion of the brain as to deprive him, for a time, of his mental manifestations.

STUPA, *Stupha*, *Stuppa*, *Stupei'on*. Tow, used in certain surgical apparatuses and dressings. Also, a *Stupe*, that is, cloth or tow used in fomentations. A flannel or other article wrung out of hot water, plain or medicated, applied to a part, is a *stupe*. The act of applying such stupe is called *stuping*.

STUPE, Stupa.

STUPEFACIENTIA, Narcotics.

*STUPÉFACTIFS*, Narcotics.

STUPEFACTIO, Narcosis.

*STUPÉFIANTS*, Narcotics.

STUPEION, Stupa.

*STUPEUR*, Stupor.

STUPHA, Stove, Stupa.

STUPIA, Tin.

STUPIDITAS, Idiotism, Imbecility.

STUPING, see Stupe.

STUPOR, *Ecplex'is*, *Ecplex'ia*, *Consterna'tio*, (F.) *Stupeur*, from *stupere*, 'to be stupified.' Diminished activity of the intellectual faculties; often amounting to lethargy. It occurs in many affections, especially in the neuroses.

Stupor, Narcosis—s. Artuum, Obdormitio—s. Dentium, Hæmodia—s. Formicans, Formication—s. Mentis, Fatuitas—s. Vigilans, Catalepsy.

STUPPA, Stupa.

STUPRATION, Stuprum.

STUPRUM, *Rape*, *Stupra'tion*, (F.) *Défloration*, *Viol*. Forcible and illicit enjoyment of a married or unmarried female. When committed upon the latter, which is most commonly the case, it is also called, *Deflora'tion*, *Deflora'tio*, *Devirgina'tio*, *Vitia'tio*, *Apanthis'mus*, &c. In judging whether rape has been committed under such circumstances, the state of the genital organs; the age of the individual; and the possibility of accidents and diseases of the parts, will have to be considered. It will be necessary, also, to be acquainted with the evidences of virginity; and to determine,—if signs of virginity no longer exist,—whether its loss be attributable to copulation, or to the introduction into the vagina of any other body than the male organ, &c. *Recent deflowering* can, of course, be much more readily distinguished than that which has taken place some time.

STUTTERING, Balbuties.

STYAN, Hordeolum.

STYE, Hordeolum.

*STYMATES*. M. J. Cloquet has proposed this word, or *Stigmates*, from στιγμα, 'a mark,' to designate the marks, in form of cicatrices, which remain on the peritoneum after the obliteration of the neck of the hernial sac. They are, commonly, radiated folds, of a whitish appearance, more or less thick, and of a fibrous or fibro-cartilaginous nature.

*STYLET*, Specillum.

STYLI, Styloid processes.

STYLIFORM, Styloid.

STYLO-CERATOIDES, Stylo-hyoideus—s. Cerato-hyoideus, Stylo-hyoideus.

STYLO-CHONDRO-HYOÏDEUS. A name given, by Douglas and Albinus, to a fleshy fasciculus which the stylo-hyoid muscle sometimes presents, and which is attached to the lesser cornu of the os hyoides. It is the same fasciculus which Santorini calls *Stylo-hyoï'des novus*, *Stylo-hyoïdeus alter*.

STYLO-GLOSSUS. A muscle situate at the anterior and superior part of the neck. It is narrow behind, much broader before; is attached to the styloid process of the temporal bone, and to the stylo-maxillary ligament; and is inserted into the side of the tongue. It raises the base of the tongue and carries it backwards.

STYLO-HYOÏDEUS, *Stylo-hyoïdien*, *Stylo-cer'ato-hyoïdeus*, *Stylo-ceratoï'des*, *Stylo-hyoïdes major*. A muscle, situate at the superior, anterior, and lateral part of the neck. It is thin and narrow,—especially posteriorly: anteriorly, it opens to give passage to the tendon of the digastricus. It is attached to the styloid process of the temporal bone, and to the body of the os hyoides. It raises the os hyoides, and carries it backwards.

Stylo-hyoid Ligament is a fibrous, flattened cord, which passes from the styloid process to the lesser cornu of the os hyoides.

Stylo-hyoid Nerve is the second branch given off by the facial nerve.

STYLOID, *Sty'liform*, *Styloï'des*, *Graphioï'des*, *Graphoï'des*, *Graphio'des*, *Graphidoï'des*, *Belono'des*, from στυλος, 'a style,' 'a peg,' 'a pin,' and ειδος, 'shape.' Shaped like a peg or pin.

Styloid Cornua, see Hyoides os.

Styloid Proc''esses, *Pencil-like Processes*, *Proces'sus Beloïdes* seu *Belemnoïdes* seu *Belonoï'des* seu *Graphioïdes* seu *Graphoï'des*, *Styli*, are, 1. A long and slender process of the temporal bone, to which are attached the stylo-glossus, stylo-pharyngeus, and stylo-hyoideus muscles, and the stylo-hyoid and stylo-maxillary ligaments. 2. Two slender and pyramidal processes at the inferior extremities of the radius and ulna.

STYLO-MASTOID, *Stylo-mastoïdeus*. That which relates to the styloid and mastoid processes.

Stylo-mastoid Artery arises from the posterior auricular, and, in some subjects, from the occipital. It enters the stylo-mastoid foramen; passes along the aqueduct of Fallopius, and spreads its ramifications on the mucous membrane of the tympanum, and in the mastoid cells, and semi-circular canals; and terminates by anas-

tomosing with a branch of the *Arteria meningæa media*, which enters by the *Hiatus Fallopii*. Murray has given the name — *Stylo-mastoid* — to the posterior auricular artery itself.

STYLO-MASTOID FORA'MEN, *Foramen Stylo-mastoïdeum* or *F. Aquæduc'tus Fallo'pii*, (F.) *Trou anonyme*, is situate at the inferior surface of the petrous portion of the temporal bone, between the styloid and mastoid processes. It terminates the aqueduct of Fallopius, and gives passage to the facial nerve.

STYLO-MAX'ILLARY, *Stylo-maxilla'ris*. That which relates to the styloid processes and jaw.

The STYLO-MAXILLARY LIGAMENT is a ligamentous, flat cord, extending between the styloid process and the angle of the jaw.

STYLO-PHARYNGEUS, (F.) *Stylo-thyro-pharyngien*. A muscle, situate at the anterior and lateral part of the neck. It is slender; thin above; attached to the styloid process of the temporal bone, and terminates in the parietes of the pharynx, as well as at the posterior margin of the thyroid cartilage. It raises the pharynx and carries it backwards. Professor Chaussier has united, under the name *Stylo-pharyngien*, the three constrictor muscles of the pharynx, the stylo-pharyngeus, and palato-pharyngeus.

STYLOPH'ORUM DIPHYL'LUM, *Meconop'sis diphyl'la, Cel'andine Poppy, Horn Poppy, Bruise root*. An indigenous plant, of the *family* Papaveraceæ, growing from western Pennsylvania to Wisconsin, which flowers from May to August. The juice is fetid and narcotic. Infused in wine, it has been given internally in gravel; and has been applied externally to contusions, &c.

*STYLO-THYRO-PHARYNGIEN*, Stylo-pharyngeus.

STYLUS, Sound.

STYLUS EXCAVA'TUS, *Specil'lum excava'tum*. A hollow sound.

STYMA, Erection, Priapismus.

STYMATOSIS, Stimatosis.

STYM'MATA, from στυμμα, 'that which constricts or thickens.' The most solid ointments. Also, the ingredients proper for increasing their consistence.

STYPSIS, Astriction, Constipation.

STYPTERIA, Alumen, Styptics.

STYPTIC, EATON'S. A name first given to *Helvetius's Styptic*, when introduced into Great Britain. It is now usually made of *calcined green vitriol*, ℥j; *proof spirit*, tinged with a little oak bark, Oij.

STYPTIC, HELVETIUS'S, see Ferrum tartarizatum.

STYPTIC, RUSPINI'S, *Liquor Stypt'icus Ruspini*. A nostrum, said to consist of *gallic acid*, a small quantity of *sulphate of zinc* and *opium*, dissolved in a mixture of *alcohol* and *rose-water*, which has had much reputation as an internal and external astringent.

STYPTICS, *Contrahen'tia, Constricti'va Medicamen'ta, Constringen'tia, Anastal'tica, Stypte'ria*, from στυπω, 'I constringe.' Sometimes used synonymously with astringent, but generally applied to a substance employed to arrest hemorrhage, — *Enæ'mon*. A *mechanical styptic* is one that arrests the flow of blood, by being applied immediately to the mouth of the bleeding vessel, or by inducing a coagulum, *mechanically*, in it. A *chymical styptic* is one which coagulates, *chymically*, the blood around a bleeding orifice.

STYRAC''INUM O'LEUM. Oil obtained by boiling storax in good olive oil.

STYRAX, from στυραξ, 'a reed,' in which it was preserved. A resin obtained from the *Styrax officina'lis* and *S. calami'ta*. It is the *solid storax*; — *officinal storax*. There are two kinds of storax met with: 1. The *Red Storax, Gum Storax, Thus Judæo'rum, Styrax rubra, Styra'cis bal'samum, Balsamum styracis officinalis*, which is obtained by incision from the *Styrax officina'lis*, and, perhaps, from the *Liquidam'bar orienta'lis*. The purest is in tears; but it has lost some of its smell in drying. 2. *Common Storax, Styrax calami'ta*. That which has been received in reeds or vessels, and has had saw-dust added immediately to thicken it. The odour of storax is fragrant; the taste aromatic. It is considered, like the other balsams, to be stimulant and expectorant, but is rarely used long.

PU'RIFIED STORAX, *S. cola'ta, S. purifica'ta*, is prepared by dissolving storax in alcohol; straining the solution; then distilling off the alcohol with a gentle heat, until the storax acquires the proper consistence. — Ph. U. S. Dose, gr. j to xxx.

STYRAX ALBA, see Myroxylon Peruiferum — s. Benzoin, see Benjamin — s. Calamita, see Styrax — s. Liquida, Liquidambar styraciflua — s. Officinalis, see Styrax.

STYSIS, Erection, Priapismus.

SUAVEOLENS, Beneolens.

SUB. A common Latin prefix, signifying 'beneath.'

SUBAC'TIO, *Chiro'sis, Cheirosis*. The operation of making plasters, extracts, &c., with the hand, or with the pestle and mortar.

SUBAFFECTIO, Hydropathia.

SUBAGITATRIX, *Tribade*.

SUB-ATLOÏDEUS, *Infra-atloïdeus*, (F.) *Sous-atloïdien*. That which is situate beneath the atlas or first cervical vertebra. Chaussier has given this name to the second pair of cervical nerves.

SUB-AXOÏDEUS, *Infra-axoïdeus*, (F.) *Sous-axoïdien*. That which is below the *axis* or *vertebra dentata*. Chaussier has given this name to the third pair of cervical nerves.

SUBBORAS NATRICUM, Borax.

SUBCARTILAGINEUM, Hypochondre.

SUBCLA'VIAN, *Subcla'vius, Subclavicula'ris*, from *sub*, 'under,' and *clavis*, 'the clavicle.' That which is under the clavicle.

SUBCLAVIAN ARTERIES, (F.) *Artères sous-clavières*, are situate at the upper part of the chest, and the lateral and lower parts of the neck. The right arises at the corresponding side of the trachea, and comes off from the arteria innominata or brachio-cephalic trunk. The left leaves the aorta at the end of the arch. Both extend as far as the superior surface of the first rib, in the space between the scaleni muscles, beyond which they take the name *axillary arteries*. The subclavian arteries run, for some distance, without sending off any branch. In the neighbourhood of the first rib, however, they give off, 1. *Upwards*, the *vertebral* and *inferior thyroideal*. 2. *Downwards*, the *internal mammary* and *superior intercostal*. 3. *Outwards*, the *transverse cervical* or *posterior scapular*, the *superior scapular*, and the *posterior cervical* or *profunda*.

SUBCLAVIAN or SUBCLAVIUS MUSCLE, *Subclavia'nus*, (F.) *Costo-claviculaire* (Ch.), *Sous-clavier*, is situate at the superior and anterior part of the chest. It is attached, by its inner extremity, to the superior surface of the cartilage of the first rib; and by its superior margin and outer extremity to the inferior surface of the clavicle. This muscle depresses the clavicle, and carries it forward. When the shoulder is fixed, it can raise the first rib.

SUBCLAVIAN VEINS, (F.) *Veines sous-clavières*,

are continuations of the axillary, and extend from the inferior extremity of the scalenus anticus, in front of which they pass, to the vena cava superior, which they form by their union. The right subclavian vein is very short; the left, longer and broader. These veins receive the mouths of the internal and external jugulars, vertebral and superior intercostal. The left subclavian receives two veins more than the right,—the left internal mammary and left inferior thyroid. The thoracic duct opens into the left subclavian:—the corresponding great lymphatic vessel into the right.

SUBCLAVIC'ULA, from *sub*, 'under,' and *clavicula*, 'the clavicle.' The first rib.

SUBCLAVICULARIS, Subclavian.

SUBCLAVIUS, Subclavian muscle.

SUBCRUEN'TUS, 'somewhat bloody;' from *sub*, and *cruentus*, 'bloody;' *Hyphæ'mos*. That which has the colour and nature of blood. An epithet given to certain excreted substances, which are mixed with blood, or have the appearance of blood.

SUBCRURÆI, see Cruræus.

SUBCUTA'NEOUS, *Subcuta'neus*, from *sub*, 'under,' and *cutis*, 'the skin;' *Intercuta'neus*, (F.) *Sous-cutané*. That which is placed immediately under the skin.

Subcutaneus Colli, Superficialis colli — s. Malæ (Nervus), Orbitar nerve.

SUBDELIRIUM, Typhomania.

SUB'DITA, *Subditit''ia*, from *subdere*, 'to put under;' *Pros'theta*. Medicines introduced into some one of the natural apertures;—as suppositories, pessaries, &c.

SUBDITITIA, Subdita.

SUBDUCTIO, Dejection.

SUBER, *Cork*:—the bark of the *Quercus Suber* or *Cork Tree*. (F.) *Liége*. *Family*, Amentaceæ. *Sex. Syst.* Monœcia Polyandria. Cork, when burnt, is applied as a mechanical styptic to bleeding piles, &c. Surgeons use it for making tents; and it has been recommended to be worn as an amulet to suppress the secretion of milk!

SUBETH, Coma.

SUBFRONTA'LIS SUTU'RA. A suture resulting from the articulation of the os frontis with the nasal process of the superior maxillary bone, and the proper bones of the nose.

*SUBGRONDATION*, Depression.

SUBHUMERATIO, Catomismos.

SUBIGATOR, *Tribade*.

SUBINFLAMMATIO, Subinflammation — s. Hepatis, Hepatitis, chronic.

SUBINFLAMMA'TION, *Subinflamma'tio*, from *sub*, 'under,' and *inflammatio*. *Inflammatiun'cula*, *Hypophlegma'sia*. A mild degree of inflammation, so slight as hardly to deserve the name *inflammation*. Broussais understood by the term, an augmentation in the vital phenomena of the vessels that convey white blood. Lymphatic engorgements, scrofula, herpes, and cancer he considered subinflammations.

SUBINTRAN'TES FEBRES, from *sub*, 'under,' and *intrare*, 'to enter.' *Communican'tes febres*. Fevers primarily intermittent, whose paroxysms approximate, so that one paroxysm begins before that which preceded it has gone through its stages.—L. Bellini.

SUBJECTIVE SENSATIONS, see Sensation.

SUBJEE, Bangue.

SUBLIGACULUM, Truss.

SUBLIGATURA, Truss.

SUBLIMAMENTUM, Enæorema.

SUBLIMATE, CORROSIVE, Hydrargyri oxymurias.

SUBLIMA'TION, *Sublima'tio*, *Meteoris'mus*, *Hypso'sis*, from *sublimo*, 'I raise up.' An operation by which dry and solid matters are volatilized and condensed at the upper part of a subliming apparatus. Calomel, sal ammoniac, &c., are commonly obtained by sublimation. The product of sublimation is a *Sub'limate Sublima'tum*, (F.) *Sublimé*.

SUBLIMATUS CORROSIVUS, Hydrargyri oxymurias.

*SUBLIME*, Sublimis.

*SUBLIMÉ*, Enæorema, Sublimate — *s. Corrosif*, Hydrargyri oxymurias.

SUBLI'MIS, (F.) *Sublime*, 'high, elevated, superficial.' Anatomists have given the name *sublimis* to certain muscles, which are situate more superficially than their kindred muscles. These last they have called *profundi*. Of the former, the *flexor sublimis digitorum* is an example.

The French use the term '*respiration sublime*' for the respiration which is accompanied by considerable elevation of the ribs, and with separation of the alæ nasi at the time of inspiration.

SUBLINGUA, Uvula.

SUBLIN'GUAL, *Sublingua'lis*, (F.) *Souslingual*, from *sub*, 'under,' and *lingua*, 'the tongue.' That which is seated under the tongue.

Sublingual Artery, with some, is the *Lingual*. With others, it is a branch given off by the lingual opposite the genio-glossus muscle, which is distributed particularly to the sublingual gland, to the mylo-hyoid, and genio-glossus muscles, &c.

Sublingual Gland, *Glan'dula sublingua'lis*, *G. Bartholinia'na*, *G. Rivinia'na*, is seated in the substance of the inferior paries of the mouth, beneath the anterior part of the tongue. It is smaller than the submaxillary, of which it frequently seems to be only a prolongation. It is oblong, flattened, amygdaloid, and is covered by the mucous membrane of the mouth, beneath which it projects. This gland has 10 or 12 excretory ducts — *Ductus Rivinia'ni* seu *Walthe'ria'ni*—some of which open beneath the frænum linguæ, joining Wharton's duct, whilst others pierce the mucous membrane of the mouth separately. It has the same structure as the parotid.

SUBLINGUIUM, Uvula.

SUBLINGUUM, Epiglottis.

SUBLOB'ULAR, *Sublobula'ris*; from *sub*, 'under,' and *lobus*, 'a lobe.' That which is placed under a lobe.

Sublobular Veins of the Liver. The veins in which the intra-lobular veins terminate. By their union, the sublobular veins form the hepatic veins.

SUBLUXATIO, Sprain.

SUBMAX'ILLARY, *Submaxilla'ris*, *Inframaxilla'ris*, (F.) *Sous-maxillaire*, from *sub*, 'under,' and *maxilla*, 'the jaw.' That which is seated beneath the jaw.

Submaxillary Ganglion is a small nervous ganglion, situate opposite the gland. It seems to be formed by the superior branch of the Vidian nerve, and communicates with the lingual nerve of the inferior maxillary. Its filaments form a plexus which penetrates the submaxillary gland.

Submaxillary Gland, *Max'illary Gland*, *Hypognath'aden*, is a salivary gland, less than the parotid, seated at the inner side of the ramus and body of the inferior maxillary bone, in the triangular space between the two bellies of the digastricus. Irregularly ovoid, and flattened on three surfaces, it has the same aspect and organization as the other salivary glands. Its excretory duct is called *Wharton's Duct*, and terminates at the side of the frænum linguæ, by a very small orifice. It is also called *Ductus inferior*.

SUBMEN'TAL, *Submenta'lis*, (F.) *Sousmental*,

from *sub*, 'under,' and *mentum*, 'the chin.' Situate under the chin.

Submental Artery is furnished by the facial, near the base of the jaw. It passes forwards along the attachment of the mylo-hyoideus, to which it furnishes branches that cross it to anastomose with those of the sublingual. Near the median line it bifurcates, to be distributed to the chin and muscles of the infra-hyoid region.

Submental Vein, which accompanies the artery, opens into the labial.

SUBMER'SION, *Submer'sio*, from *sub*, 'under,' and *mergere, mersum*, 'to plunge.' The act of plunging, or being entirely plunged, in a liquid.

*Asphyx'ia by submersion, Drowning, Asphyxia Immerso'rum*, is not owing to a certain quantity of liquid being introduced into the alimentary or air-passages; but simply to the interception of air, and of the respiratory phenomena. It is a case of suffocation, the signs of which, on dissection, are equivocal, without circumstantial evidence.

SUBMISSIO, Remission—s. Cordis, Systole.

SUBMU'COUS, *Submuco'sus*; from *sub*, 'under,' and *mucus*. Under a mucous membrane,—as the '*submucous* areolar tissue.'

SUBMURIAS AMMONIACO-HYDRARGYRICUS, Hydrargyrum præcipitatum.

SUBMUS'CULAR, *Submuscula'ris*; from *sub*, 'under,' and *musculus*, 'a muscle.' Seated beneath muscles or a muscular layer.

SUBOCCIP'ITAL, *Suboccipita'lis*; from *sub*, 'under,' and *occiput*. That which is situated under the occiput.

Suboccip'ital Nerve, Occipital nerve.

SUBOR'BITAR, *Suborbita'rius, Infra-or'bitar, Infra-orbita'lis, Infra-orbita'rius*, (F.) *Sous-orbitaire*, from *sub*, 'under,' and *orbita*, 'the orbit.' That which is seated beneath the orbitar cavity.

Suborbitar Artery, *Infra-orbitar, A.*, proceeds from the internal maxillary, from which it separates near the anterior and superior part of the zygomatic fossa. It enters the infra-orbitar canal, and passes through it, giving branches to the anterior and superior dental canal; issues by the foramen infra-orbitarium; and divides, in the fossa canina, into a number of branches, which lose themselves in the neighbouring parts. The infra-orbitar vein follows the same course.

Suborbitar Canal, *Infra-orbitar Canal*, (F.) *Canal* ou *Conduit sous-orbitaire*, is a small canal, which runs obliquely through the substance of the inferior paries of the orbit. It begins, behind, by a simple gutter, and divides, anteriorly, into two branches, one of which descends into the anterior paries of the maxillary sinus, whilst the other passes out, in the canine fossa, by an orifice, called *Foramen-infra-orbitarium*, (F.) *Trou sous-orbitaire*. The infra-orbitar artery and nerve pass along it.

Suborbitar Fissure, *Infra-orbitar Fissure, Rima canal'lis orbita'rii, Fissu'ra infra-orbita'lis*. A fissure in the superior maxillary bone; the superior commencement of the suborbitar canal.

Suborbitar Fossa, Canine fossa.

Suborbitar Nerves, *Infra-orbitar Nerves*, seem to terminate the superior maxillary. They issue from the infra-orbitar canal by the foramen of the same name, and spread out in a radiated manner in the fossa canina, to divide into *superior* or *palpebral filaments, inferior* or *labial, internal* or *nasal*, and *external* or *buccal*.

SUBPERITONE'AL, *Subperitonea'lis*; from *sub*, 'under,' and *peritoneum*. That which lies under the peritoneum.

Subperitoneal Aponeurosis, Fascia, subperitoneal—s. Ganglia, see Spermatic ganglion.

SUBPLACENTA, Decidua membrana.

SUBPOPLITÆUS, Poplitæus muscle.

SUBPUBIC ARCH, *Arcus subpu'bicus*. A strong arch of the superior pelvic aponeurosis, which completes the posterior orifice of the obturator or subpubic canal.

Subpubic Membrane, Obturator membrane.

SUBPUBIO-FEMORALIS, Abductor brevis—s. Prostaticus, Compressor prostatæ.

SUBPUTRIS, Hyposaprus.

SUBSCAP'ULAR, *Subscapula'ris*, (F.) *Sous-scapulaire, Sous-scapulo-trochinien*, from *sub*, 'under,' and *scapula*, 'the shoulder-blade.' That which is beneath the scapula.

Subscapular Fossa, *Fossa Subscapula'ris*. A considerable excavation at the anterior surface or venter of the scapula, in which the subscapularis is seated.

Subscapular Muscle, *Subscapula'ris Muscle, Immer'sus, Infra-scapula'ris*, (F.) *Sous-scapulo-trochinien* (Ch.), *Porte-feuille, Muscle sous-scapulaire*. A muscle situate in the above-mentioned fossa. It is flat, broad, and triangular; is attached, by its base, to the subscapulary fossa and to the anterior lip of the edge of the spine of the scapula, and is inserted into the lesser tuberosity of the humerus. It carries the arm in rotation inwards. It can also depress it, and bring it towards the body.

Subscap'ular Nerves are two in number. One arises from the brachial plexus above the clavicle; the other from the posterior aspect of the plexus within the axilla. They are distributed to the subscapularis muscle.

SUBSE'ROUS, *Subsero'sus*; from *sub*, 'under,' and *serous*. Under a serous membrane,—as the '*subserous* areolar tissue.'

SUBSIDENTIA, Sediment.

*SUBSTANCE ÉMAILLÉE DES DENTS*, Enamel of the teeth—s. Horny, see Tooth.

SUBSTANCE, HYALINE, Cytoblastema—s. Intercellular, Cytoblastema—*s. Vitrée des Dents*, Enamel of the teeth.

Substance, White, of Schwann. A hollow cylinder within the tubular nervous fibre, which differs in composition and refracting power from the matter that occupies the centre of the tube.

SUBSTANTIA ADAMANTINA DENTIUM, Enamel—s. Filamentosa dentium, Enamel—s. Hyalina, Cytoblastema—s. Ossea dentium, see Tooth—s. Ostoidea, see Tooth.

Substant'ia Perfora'ta Me'dia. When the pia mater has been removed from the space between the crura cerebri termed the *intercru'ral* or *interpedunc'ular*, the surface appears cribriform from the perforations of the numerous minute vessels which penetrate it. This is the *substan'tia perfora'ta me'dia* of Vicq d'Azyr.

Substantia Pulposa Dentis, Dental pulp—s. Rhomboidea, Corpus dentatum—s. Spongiosa Urethræ, Corpus spongiosum urethræ—s. Vitrea dentium, Enamel of the teeth—s. Vitrea, Cytoblastema.

SUB'STANTIVE, *Substanti'vus*; from *substare*, (*sub* and *stare*,) 'to stand under or subsist.' An epithet applied by Dr. Paris to aliments which are nutritious, in contradistinction to *adjective* aliments, which are themselves not possessed of nutritive virtues, but impart to the digestive organs greater energy, so as to enable them to extract more nutriment from the substantive aliments. Meat, for example, is a *substantive* aliment: the condiment, as mustard, eaten with it, an *adjective* aliment.

SUBSTILLUM, Stillicidium.

SUBSULTIO, Palpitation.

SUBSUL'TUS TEN'DINUM, *Saltus ten'dinum, Clonus subsultus, Subsultus, Carpholog''ia spasmod'ica, Myopal'mus, Twitching of the Ten-*

*done*, (F.) *Soubresaut*, from *subsilire*, *subsultum*, (*sub* and *salire*,) 'to make short leaps.' Twitching, communicated to the tendons by the involuntary and instantaneous contraction of the muscular fibres. It is more observable at the wrist than elsewhere; and is an evidence of great cerebral irritability, and debility, when it occurs at an advanced period of fever.

The muscular agitations or twitchings observed in febrile diseases, especially of children, have been termed *Convulsibil'itas*, *Sclerotyr'bē febri'lis*, and *Irritabil'itas morbo'sa*.

SUBSURDITAS, Deafness.

SUB'UBERES, from *sub*, 'under,' and *ubera*, 'the breasts.' *Infan'tes sugen'tes*, *Sucking children*. Infants at the breast, in contradistinction to the *Exu'beres*, *απογαλακτοι*, or those which have been weaned.

SUBUN'GUIAL, *Subun'guical*, (F.) *Sous-ungéale*, from *sub*, 'under,' and *unguis*, 'a nail.' Belonging to parts under the nail; — as *subunguial exostosis*, (F.) *Exostose sous-ungéale*, an exostosis under the nail of the great toe especially.

SUBVERSIO STOMACHI, Vomiturition.

SUBVERTEBRA, Sacrum.

SUBVERTEBRUM, Sacrum.

SUBVOLA, Hypothenar.

*SUC*, Succus — *s. de Citron*, see Citrus medica — *s. Gastrique*, Gastric juice — *s. Médullaire*, Marrow — *s. du Limon*, see Citrus medica.

SUCCA'GO, from *succus*, 'juice.' The inspissated juice of plants; robs, jellies, &c.

SUCCEDA'NEUM, *Succida'neum*, *Substitu'tum*, *Antiballom'enum*, *Surroga'tum*, *Antemballom'enum*, *Quid pro quo*, from *succedere*, (*sub*, and *cedere*), 'to go under, to come in place of another.' An epithet for medicines that may be substituted for others possessing similar properties.

SUCCENTURIA'TUS, from *succenturiare* (*snb*, and *centuria*), 'to supply a soldier to fill a vacancy;' and hence, 'to substitute or put in the room of.' That which is a substitute for another; as Renes *succenturiati*, Ventriculus *succenturiatus*, &c.

SUCCHAR, Saccharum.

SUCCIDANEUM, Succedaneum.

*SUCCIN*, Succinum.

SUCCINCTURA, Diaphragm.

SUCCINCTUS, Diaphragm.

SUCCINI RESINA, Musk, artificial.

SUCCIN'IC ACID, *Ac''idum Suc'cini*, *A. Succin'icum*, *Acor Succin'eus*, *Sal Succini*, *Sal volatilē Succini*, has been considered antispasmodic and diaphoretic, in the dose of from five to twenty grains.

SUC'CINUM, *Elec'trum*, *Ambra*, *Ambram*, *Ampar*, *Berenī'cē*, *Amber*, *Yellow Amber*, (F.) *Succin*, *Ambre jaune*. This substance, which is found on the shores of the Baltic, is composed of a resinous matter, of essential oil, and an acid *sui generis*. It is inodorous, except when heated or rubbed; insipid; in fragments of a pale golden-yellow colour; transparent, and has a shining lustre. S.g. 1.08; insoluble in water, and slightly acted on by alcohol. It is used for affording its essential oil—the *O'leum* or *Bal'samum Suc'cini*, (F.) *Huile de Succin*. This oil possesses stimulant, antispasmodic, diuretic, and rubefacient properties.

The *O'leum Suc'cini rectifica'tum*, *Rectified Oil of Amber*, is made as follows:—*Oil of Amber*, Oj; *water*, Ovj. Mix in a glass retort, and distil until Oiv of the water have passed with the oil into the receiver; separate the oil from the water, and keep it in well-stopped bottles.—(Ph. U. S.)

The *White amber*, *Leucelec'trum*, (F.) *Ambre blanc*, is a variety.

SUCCINUM CINEREUM, Ambergris — *s.* Griseum, Ambergris.

*SUCCION*, Sucking.

SUCCISA, Scabiosa succisa — *s.* Pratensis, *S.* succisa.

SUCCOLATA, Chocolate.

SUCCORY, WILD, Cichorium intybus, Chironia angularis.

SUC'CUBUS, from *sub*, and *cubare*, 'to lie.' Some authors have used this word synonymously with nightmare. Others mean by it a female phantom, with which a man in his sleep may believe he has intercourse; — as *Incubus* has been applied to the male phantom, with which a female may dream she is similarly situate.

SUCCUS, *Chylus*, *Opos*, *Opis'ma*, *Chylis'ma*, *Eechylo'ma*, *Apothlim'ma*, *Juice*, (F.) *Suc*. The fluid obtained by pressing plants, flesh, &c.; *succus expres'sus*. It is, also, applied to certain animal fluids, as *S. Gastricus*, &c.

SUCCUS ACACIÆ GERMANICÆ INSPISSATUS, see Prunus spinosa—*s.* Acaciæ nostratis, see Prunus spinosa — *s.* Arborum, Sap — *s.* Cicutæ spissatus, Extractum conii — *s.* Cyrenaicus, Laserpitium.

SUCCUS ENTER'ICUS, *S. Intestina'lis*, *Intes'tinal Juice*. The fluid secreted from the lining membrane of the small intestines.

SUCCUS EXPRESSUS, Apothlimma — *s.* Gastricus, Gastric juice — *s.* Glycyrrhizæ, Extractum glycyrrhizæ — *s.* Hypocistidis, see Cytinus — *s.* Intestinalis, Succus entericus — *s.* Japonicus, Catechu — *s.* Limonis, see Citrus medica — *s.* Liquiritiæ, Extractum glycyrrhizæ — *s.* Nerveus, Nervous fluid — *s.* Nutritius, Chyle — *s.* Orni concretus, see Fraxinus ornus — *s.* Pancreaticus, see Pancreas — *s.* Spissatus Aconiti Napelli, Extractum aconiti — *s.* Spissatus atropæ belladonnæ, Extractum belladonnæ — *s.* Spissatus conii maculati, Extractum cicutæ — *s.* Spissatus hyoscyami nigri, Extractum hyoscyami — *s.* Spissatus lactucæ sativæ, Extractum lactucæ.

SUCCUS'SION, *Hippocrat'ic Succus'sion*, *Succus'sio*, from *succutio* (*sub*, and *quatio*), 'I shake from beneath.' A mode of ascertaining the existence of a fluid in the thorax, (*fluctuation by succussion*,) by giving the body one or more slight shakes.

SUCCUSSION, *Ballottement*.

SUCHOR, Saccharum.

SUCKING, *Suc'tio*, *Suctus*, *Athelx'is*, *Bdalsis*, *Myze'sis*, (F.) *Succion*, from *sugere*, *suctum*, 'to suck.' The act of drawing liquid into the mouth, by forming a vacuum with the tongue acting as a piston, during inspiration.

SUCKING BOTTLE. A bottle so formed, that, when filled with milk, it can be sucked from instead of the breast.

SUCKING CHILD, *Lactens*. A suckling.

SUCKLE, *Lactare*, *γαλακτοτροφειν*, *τιθηφυειν*, (F.) *Allaiter* ou *Alaiter*. To give suck. To nurse.

SUCKLING, Lactation, Sucking child.

*SUCRE*, Saccharum — *s. Candi*, Saccharum candidum — *s. de Lait*, Sugar of milk — *s. de Saturne*, Plumbi superacetas.

SUCTIO, Exsuctio, Sucking,

SUCTION POWER. The force exerted on the blood in the veins, by the active dilatation of the heart. See Derivation.

SUCTO'RIA, from *sugo*, 'I suck.' Animals provided with mouths for sucking. Also, organs for sucking or adhesion,—hence termed *suctorial* — as '*suctorial* oscula.'

SUCTORIAL, see Suctoria.

SUCTUS, Sucking.

SUDAM'INA, *Hydro'ata*, *Hidro'ta*, *Pap'ulæ sudora'les*, *Sufferusu'ræ*, *Alha'sef*, *Planta noctis*, *Boa*, from *sudor*, 'sweat.' Small vesicles,

which appear upon the skin, especially in the summer time, in hot countries, and in diseases attended with much sweating. It is a miliary eruption. See Miliary fever.

Sudamina, Desudatio, *Échauboulures*, Lichen tropicus.

SUDARIUM, Achicolum.

SUDATION, Hidrosis.

SUDATORIA, Hidrosis — s. Maligna, see Sudor Anglicus.

SUDATORIUM, Achicolum.

SUDOR, *Hidros*, (F.) *Sueur*, 'sweat.' The product of cutaneous transpiration, when visible on the surface of the body. It is colourless; of an odour more or less strong and variable; and of a saline taste. It is composed, according to Berzelius, of water, lactic acid, lactate of soda united with a little animal matter, chloride of sodium, and a little chloride of potassium, an atom of earthy phosphate, and some oxyd of iron.

Sudor, Miliary fever.

Sudor An'glicus, *Hidrou'osos*, *Hidrop'yra*, *Hidropyr'etos*, *Febris sudato'ria*, *Milia'ris sudato'ria*, *Sudor milia'ris*, *Morbus sudatorius*, *Ephem'era malig'na*, *E. sudatoria*, *E. Britan'nica*, *Pestis Britannica*, *Sudato'ria malig'na*, *E. An'glica pes'tilens*, *Sweating Sickness*, *Sweating Fever*, (F.) *Suette*, *S. Miliare*, *S. épidémique*, *Sueur Anglaise*. A very severe epidemic disease, characterized by profuse sweating, which appeared in England in 1486; and recurred, at different times, until about the middle of the 16th century. It was accompanied with coldness, excessive prostration of strength, palpitation, frequency and inequality of the pulse, &c., and terminated favourably or unfavourably in the course of 24 hours. The French have given the name Suette de Picardie, *Suette des Picards*, *Fièvre suante*; *Miliaris sudatoria*, *Sudor Picard'icus*, to an epidemic disease, which has appeared several times in that province; the principal symptoms of which were profuse sweats and a miliary eruption. The disease recurred in 1821, and has been described, at length, by M. Rayer, who considers it to consist of a simultaneous state of inflammation of various tissues; and proposes to class it with variola, scarlatina, and measles.

Sudor Colliquativus, S. Profusus.

Sudor Cruen'tus, *S. sanguin'eus*, *Hæmatidro'sis*, *Hæmathidro'sis*, *Epidro'sis cruen'ta*, *Hæmorrhag''ia per Cutem*, (F.) *Hématidrose*, *Sueur de Sang*; *Sweating of blood*, *Bloody sweat*, *Hem'orrhage from the skin*. Cutaneous perspiration intermixed with blood: — a very uncommon affection.

Sudor Dulcis, *Saccharorrhœ'a cuta'nea*, *Ephidro'sis sacchara'ta*. A discharge of saccharine matter by perspiration.

Sudor Localis, Meridrosis—s. Miliaris, Miliary fever, Sudor Anglicus—s. Partialis, Meridrosis.

Sudor Perfu'sus, *S. Colliquati'vus*. A profuse or immoderate sweat.

Sudor Sanguineus, Sudor cruentus — s. Universalis, Panhidrosis.

SUDORIFER, Sudoriferous, Sudorific.

SUDORIF'EROUS, *Sudor'ifer*, *Hydroph'orus*, from *sudor*, 'sweat,' and *fero*, 'I carry.' That which carries sweat, as the *sudoriferous* ducts or glands.

SUDORIF'IC, *Sudorif'icum*, *Sudor'ifer*, *Hidrot'icum*, *Hydrote'rium*, *Hydrotopœ'um*, *Hidropoët'icum*, from *sudor*, 'sweat,' and *facio*, 'I make.' A medicine which provokes sweating. See Diaphoretic.

Four Sudorific Woods, *Quat'uor ligna sudorifica*, were, formerly, *guaiacum*, *perfumed cherry*, *sarsaparilla*, and *sassafras*.

SUDORIPAROUS, see Perspiration.

SUDORIS NULLITAS, Anidrosis — s. Privatio, Anidrosis — s. Suppressio, Ischidrosis.

SUET, Sevum.

*SUETTE*, Sudor Anglicus — s. *Épidémique*, Sudor Anglicus — s. *Miliaire*, Sudor Anglicus — s. *de Picardie*, Sudor picardicus—s. *des Picards*, Sudor picardicus.

*SUEUR*, Sudor — s. *Anglaise*, Sudor Anglicus — s. *d'Expression*, Expression, sweat of — s. *de Sang*, Diapedesis, Sudor cruentus.

SUFFERSURÆ, Sudamina.

SUFFIMEN, Suffimentum.

SUFFIMENTUM, *Hypocapnis'ma*, *Suffi'men*, *Thymi'ama*, *Suffi'tus*, *Suffumiga'tio*, *Suffumiga'tion*, (F.) *Parfum*. A perfume; suffumige; fumigation.

SUFFITIO, Fumigation.

SUFFITUS, Fumigation, Suffimentum.

SUFFLATIO, Puffiness.

SUFFOCATIO, Suffocation, Orthopnœa — s. Hypochondriaca, Hypochondriasis—s. Hysterica, Angone — s. Stridula, Cynanche trachealis — s. Uterina, Angone.

SUFFOCA'TION, *Suffoca'tio*, *Præfoca'tio*, *Apopnix'is*, *Asphyx'ia*, *Melancœ'ma*, from *sub*, 'under,' and *focus*, 'a fire-place.' Death, or suspended animation from impeded respiration, whether caused by the *inhalation of noxious gases*, *drowning*, *hanging*, *strangling*, or *smothering*. The principal morbid appearances in such cases are: —the lungs of a deep-blue colour, with the blood extravasated in the air-cells; right auricle and ventricle filled with dark blood, as well as the neighbouring veins; lividity of the countenance, turgescence, and, perhaps, rupture of the vessels of the brain.

*Treatment of suspended animation by suffocation in general.* The patient must be conveyed into a room not too warm. Blood-letting must be used, if at all, with caution; — friction must be employed with salt, or warm flannels; stimulating fluids, in a dilute state, be poured into the stomach by means of a tube, and attempts be made to inflate the lungs. Laryngotomy, if necessary

Suffocation, *Pnigopho'bia*, (F.) *Étouffement*, is used for threatened suffocation, as *strangling* is. It means the state of dyspnœa and oppression experienced when a sufficient quantity of air does not enter the lungs, or when the chemical phenomena of respiration are imperfectly executed; as in cases of asthma.

*SUFFOCATION UTÉRINE*, Hysteria.

SUFFRAGO, Poples.

SUFFUMIGATION, Suffimentum.

SUFFUMIGE. Suffimentum.

SUFFUMIGIUM, Fumigation.

SUFFUMINATIO, Fumigation.

SUFFUSIO, Pseudoblepsia — s. Auriginosa Icterus—s. Bilis, Icterus—s. Colorans, Chromopsia—s. Dimidians, Hemiopia—s. Exclarans, Oxyopia — s. Fellis, Icterus — s. Lentis crystallinæ, Cataract—s. Metamorphosis, Metamorphopsia—s. Multiplicans, see Diplopia — s. Myodes, Metamorphopsia—s. Nigra, Amaurosis — s. Oculi, Cataract, Pseudoblepsia — s. Oculorum, Metamorphopsia — s. Radians, Scotasma — s. Sanguinis, Ecchymoma.

SUGAR, Saccharum — s. Barley, Penidium — s. Candy, Saccharum candidum — s. Cane, see Saccharum—s. Diabetic, Glucose—s. Fruit, Glucose — s. Grape, Glucose — s. Honey, Glucose — s. of Lead, Plumbi superacetas.

Sugar of Milk, *Sac'charum lactis*, *Galac'tosac'charum*, *Lactine*, (F.) *Sucre de Lait*, is obtained from whey by evaporation and crystallization. It possesses the demulcent properties of the sugars.

SUGAR, PINE, see Arrowroot — s. Starch, Glucose.

SUGARS, VARIOUS, see Saccharum.

SUGARBERRY, Celtis occidentalis.

SUGGILLA'TION, *Sugilla'tio, Livor, Sugillation, Œde'ma cruentum; a bruise;* from *sugillare,* 'to give a black eye.' By most authors used synonymously with ecchymosis and ecchymoma. It is, also, applied to the spots, or ecchymoses which occur in consequence of intrinsic causes,—in disease and in incipient putrefaction. It is common in dead bodies. To this last case it is, indeed, restricted by some medico-legal writers; and an interesting question sometimes arises :—Whether the appearance have been induced before death or afterwards? Whether it be a case of *ecchymosis* or of *suggillation*? In the former, the extravasated blood will usually be coagulated; not so in the latter. It is often, however, difficult to form a correct judgment without reference to the history of the case.

SUGGRUN'DIUM, perhaps from *suggredi,* 'to go under.' The cave of a house.

SUGGRUNDIUM OCULI, Superciliary arch — s. Superciliorum, Frontal protuberance.

SUICIDA, Autochir.

SUICIDAL INSANITY, Suicide.

SU'ICIDE, *Suici'dium:* from *sui cædes,* 'murder of one's self.' The act of killing one's self. *Autochi'ria, Autocton'ia, Idiocton'ia, Autophon'ia.* Suicide is very frequently the result of disease of the mind; the individual seeming, at times, to be irresistibly impelled to self-destruction. — *Melancho'lia Suicid'ium, M. autochi'ria, Suici'dal Insanity.* Also, one who commits self-murder.

*SUIE,* Fuligo.

*SUIF,* Sevum.

*SUITES DE COUCHES,* Lochia.

SULCATUS, *Cannelé,* Grooved.

SULCULUS LABII SUPERIORIS, Lacuna Labii superioris.

SULCUS, *Semicana'lis, Semicanalic'ulus.* A furrow. A groove. (F.) *Sillon.* Anatomists have given this name to grooves on the surface of bones and other organs.

French writers on anatomy often use the term *Sillons* for the grooves which lodge the arteries and creep on the surface of bones; whilst those that receive veins are called *gouttières,* 'gutters.' Also, the vulva.

SULCUS ANTERO-POSTERIOR JECORIS, see Liver —s. Labii superioris, Lacuna Labii superioris.

SULCUS, LAT'ERAL, ANTE'RIOR, OF THE SPINAL MARROW. A mere trace on the marrow, marked only by the attachment of the filaments of the anterior roots of the spinal nerves.

SULCUS, LATERAL, POSTERIOR, OF THE SPINAL MARROW, corresponds with the attachment of the posterior roots of the spinal nerves.

SULCUS TRANSVERSALIS, see Liver — s. Umbilicalis, see Liver.

*SULFATE D'AMMONIAQUE,* Ammoniæ sulphas.

SULFIDUM CARBONII, Carbonis sulphuretum.

SULFUR, Sulphur.

*SULFURE DE CARBON,* Carbonis sulphuretum.

SULPHAS ALUMINARIS, Alumen—s. Ammoniacæ Cupratus, Cuprum ammoniatum — s. Cadmicus, Cadmii Sulphas — s. Kalico-aluminicum, Alumen—s. Natricus, Soda, sulphate of—s. Zincicum, Zinci sulphas.

SULPHUR, *Sulfur, Scorith, Thei'on, Thion, Averich, Terra folia'ta, Fumus cit'rinus, Aq'uila, Brimstone,* (F.) *Soufre.* The *Native Sulphur* is called *Rock Sulphur, Sulphur vivum,* &c. Sulphur, as we meet with it, is in *rolls, Sulphur in rot'ulis, S. rotun'dum, Roll Brimstone.* It is a volcanic production, and is obtained, in large quantities, from Solfatara, in Italy. *Roll Sulphur* is impure sulphur, melted, and run into moulds. It is unpleasantly odorous, when heated or rubbed; insipid; solid, and brittle. S. g. 1.99. Fusible at 226°; volatilizable by heat, and condensing unchanged.

SULPHUR ANTIMONIATUM, Antimonii sulphuretum præcipitatum—s. Carburet of, Carbonis sulphuretum—s. Chloratum, Sulphur, Chloride of.

SULPHUR, CHLORIDE OF, *Sul'phuris Chlo'ridum, Sul'phuris Dichlo'ridum, Dichlo'ride of Sulphur, Protochlo'ride of Sulphur, Hypochlo'ride of Sulphur, Subchlo'ride of Sulphur, Sulphur chlora'tum, Hypochlore'tum sulphuro'sum, Bisulph'uret of Chlorine, Chlorum hypersulphura'tum,* is obtained by passing *dry chlorine gas* over washed and dried *flowers of sulphur,* until they are for the most part dissolved, and distilling the decanted fluid from the excess of dissolved sulphur. One drachm of the liquid to an ounce of lard has been used in lepra, psoriasis, and other chronic cutaneous diseases. Ten drops, dissolved in ether, have been given in adynamic fever.

SULPHUR, DICHLORIDE OF, Sulphur, chloride of—s. Hypochloride of, Sulphur, chloride of — s. Iodatum, Sulphuris iodidum — s. Iodide of, Sulphuris iodidum—s. Ioduret of, Sulphuris iodidum — s. Liver of, Potassæ sulphuretum.

SULPHUR LOTUM, *Sulphur sublima'tum lotum, Washed Sulphur, Magiste'rium Sulph'uris, Sulphuris Flores loti,* is prepared by pouring boiling water on sublimed sulphur, so as to wash away any acid it may contain, and then drying it.

SULPHUR PRÆCIPITA'TUM, *Lac Sulph'uris, Milk of Sulphur, Precip'itated Sulphur,* (F.) *Crème de Soufre,* is prepared by boiling sublimed sulphur and lime together, and adding muriatic acid to precipitate the sulphur.

SULPHUR, PROTOCHLORIDE OF, Sulphur, chloride of—s. Subchloride of, Sulphur, chloride of.

SULPHUR SUBLIMA'TUM, *Sulphur,* (Ph. U. S.) *Sublimed Sulphur, Flowers of Sulphur,* (F.) *Soufre sublimé, Fleurs de Soufre,* is the sulphur of commerce, sublimed in close vessels.

Sulphur is possessed of stimulant, laxative, and diaphoretic properties. As a laxative, it is used in hemorrhoidal and other affections. In the itch, applied externally and taken internally, it has been considered as a specific (?), and it is a valuable remedy in most cutaneous affections that are local. Dose, ʒss to ʒij.

The fæces or dregs, left in the purification or sublimation of sulphur, are called *Horse Brimstone, Dregs of Sulphur vivum, Sulphur caballi'num, S. vivum, Sulphuris vivi recremen'ta.* They are very impure, and are only used exterually.

SULPHUR, VEGETABLE, Lycopodium—s. Wort, Peucedanum.

SULPHURATUS, Sulphureous, Sulphurated.

SULPHU'REOUS, *Sulphuro'sus, Sulphu'rius, Sulphura'tus, Sulph'uretted.* Possessing the properties of, or relating to, or containing sulphur.

SULPHURETTED, Sulphureous — s. Hydrogen, see Hydrogen, sulphuretted.

SULPHURETUM AMMONIACÆ, Ammoniæ sulphuretum—s. Ammoniæ hydrogenatum, Liquor fumans Boylii—s. Kalicum, Potassæ sulphuretum —s. Lixiviæ, Potassæ sulphuretum.

SULPH'URIC ACID, *Ac'idum Sulphu'ricum* vel *Sulfuricum, Oleum Vitrio'li, Spir'itus Vitrioli, S. v. fortis, Acidum vitriol'icum, Oil of Vitriol, Spirit of Vitriol, Vitriol'ic Acid, Acidum Vitrioli dephlogistica'tum, Acor Sulphuris,* (F.) *Acide Sulphurique* ou *Sulfurique.* Sulphuric acid is inodorous; has a strong acid taste, and is corrosive. S. g. 1.845 (Ph. U. S.) It is escharotic,

stimulant, and rubefacient. Mixed with lard, it is sometimes used in local pains, and certain cutaneous affections.

Sulphuric Acid, Aromat'ic, *Ac''idum Sulphu'ricum Aromat'icum, A. vitriol'icum aromat'icum, A. vitriolicum alcoho'lē aromaticum, Elixir vitrio'li, E. v. aromaticum, E. vitrioli Mynsich'ti, E. vitrioli Edinburgen'sium, E. vitrioli cum tinctu'râ aromaticâ, E. vitrioli dulcē* seu *acido-aromat'icum, Alcohol cum aromat'ibus sulphurica'tus, Tinctu'ra acidi sulphurici,* is formed of *sulphuric acid,* f℥iijss; *ginger,* bruised, ℥j; *cinnamon,* bruised, ℥iss; *Alcohol,* Oij. — Ph. U. S. Dose, gtt. x to xxx.

Sulphuric Acid, Dilu'ted, *Ac''idum Sulphu'ricum Dilu'tum, Acidum vitriol'icum dilutum, Elixir of Vitriol, Elixir vitrio'li, Spir'itus vitrio'li ac''idus Vogle'ri,* (F.) *Acide sulfurique délayé,* is formed, according to the Pharmacopœia of the United States, by adding *aq. destillat.* f℥xij, to *acid. sulph.* f℥j. It is tonic, astringent, and refrigerant. Dose, gtt. x to xx, largely diluted. When used as a gargle, half a drachm may be added to ℥vj of water.

Very dilute sulphuric acid was formerly termed *Phlegma vitrioli.*

SULPHURIS CHLORIDUM, Sulphur, chloride of—s. Dichloridum, Sulphur, chloride of.

Sulph'uris Io'didum, *S. Iodure'tum, Sulphur Ioda'tum, Ioduret* or *Iodide of Sulphur,* (F.) *Soufre Iodure, Iodure de Soufre.* It is thus directed to be prepared in the Pharmacopœia of the U. S. (*Iodin.* ℥iv; *sulphur.* ℥j.) Rub the iodine and sulphur together in a glass, porcelain, or marble mortar, until they are thoroughly mixed. Put the mixture into a matrass, close the orifice loosely, and apply a gentle heat, so as to darken the mass without melting it. When the colour has become uniformly dark throughout, increase the heat so as to melt the iodide; then incline the matrass in different directions, in order to return into the mass any portions of iodine which may have condensed on the inner surface of the vessel: lastly, allow the matrass to cool, break it, and put the iodide into bottles, which are to be well stopped.

SULPHURIUS, Sulphureous.

SULPHUROSUS, Sulphureous.

SULPHUROUS, Sulphureous.

Sul'phurous Acid, *Ac'idum sulphuros'icum, A. sulph'uris volat'ilē, A. Sulphuro'sum* vel *Sulfurosum, Spir'itus sulphuris, Spiritus sulphuro'sus volat'ilis, Sp. sulphuris per campa'nam, Sp. vitrio'li phlogistica'tus, Gas sulphuris,* (F.) *Acide Sulfureux, Air Acide Vitriolique.* Obtained by treating mercury with concentrated sulphuric acid, or by burning sulphur. It is sometimes used in the gaseous,—at others, in the liquid state. Sulphurous acid gas is used to disinfect cloths, confined air, letters coming from infected places, &c. It is also exhibited, with great success, in the form of fumigation, in the treatment of certain chronic cutaneoous affections, and of sciatic and rheumatic pains in general. If respired pure, it acts in the manner of violent irritants; and is not long in producing death.

SULTZMALT, MINERAL WATERS OF. Sultzmalt is a village in the department of the Upper Rhine; where are several sources of cold, acidulous waters, which seem to contain carbonic acid, subcarbonate of soda, subcarbonate of lime, sulphate of lime, and a little bitumen. They are refrigerant, aperient, and alterative.

*SUMAC DES CORROYEURS,* Rhus coriaria—*s. Vénéneux,* Rhus toxicodendron.

SUMACH, Rhus coriaria.

SUMBUL. The name of a root, *Sum'buli radix, Jatamansi, Musk root,* presumed to belong to the Umbelliferæ family, much employed in Russia and Germany against cholera. Its exact botanical history is not determined. It contains a strongly odorous principle like that of musk; and is regarded as an antispasmodic.

SUMBULI RADIX, Sumbul root.

SUMEN, Hypogastrium.

SUMMER COMPLAINT. A popular name in the United States, for diarrhœa occurring in summer. It is often, also, made to include dysentery and cholera infantum. With some it means cholera infantum only.

Summer Diseases, see Estival — s. Rash, Lichen tropicus.

SUMMITAS CUTIS, Epidermis.

SUMMUS HUMERUS, Acromion.

SUNBURN, Ephelides — s. Dew, Drosera rotundifolia—s. Flower, false, Helenium autumnale — s. Flower, swamp, Helenium autumnale — s. Flower, tickweed, Coreopsis trichosperma — s. Flower, turpentine, Silphium perfoliatum — s. Pain, see Hemicrania — s. Rash, Lichen — s. Stroke, *Coup de Soleil* — s. Egyptian, *Coup de Soleil.*

SUPELLECTILE DIOGENIS, Palm.

SUPELLEX ANATOMICA, Museum anatomicum—s. Diogenis, Palm.

SUPER. A common Latin prefix; in composition, signifying 'above.'

SUPERBUS, Rectus superior oculi.

SUPERCHLORIDUM FORMYLICUM, Chloroform.

SUPERCILIARIS, Corrugator supercilii.

SUPERCIL'IARY, *Supercilia'ris,* from *super,* 'above,' and *cilium,* 'the edge of the eyelid.' That which relates to the supercilia or eyebrows. (F.) *Sourcilier* ou *Surcilier.*

Supercil'iary Arches, *Superciliary Ridges, Arcus supercilia'res, Suggrun'dia oculo'rum,* (F.) *Arcades sourcilières,* are two slightly projecting apophyses, situate at the anterior surface of the os frontis, above the superior margin of the orbits. They are separated by the nasal *bosse,* and covered by the superciliaris muscle, to which they give attachment.

Superciliary Ridges, Superciliary arches.

SUPERCIL'IUM, *Ophrys, Oph'rya, Vallum,* (F.) *Sourcil.* Same etymon. The eyebrows are two arched eminences,—convex above, and more or less prominent, according to the individual,—which lie on the superciliary arch of the os frontis, above the eyelids, and extend from the sides of the root of the nose to the temple. Their inner extremity or *head* is more prominent than the outer or *tail.* The eyebrows are covered with short and stiff hairs, which are directed, obliquely, from within outwards, and are, commonly, of the colour of the hair. The skin in which these hairs are implanted, rests on the *orbicularis palpebrarum, frontalis,* and *superciliaris* muscles, which move the eyebrows in different directions. The eyebrows serve as an ornament to the countenance; and by covering the eye defend it from the impression of too strong a light. They direct the perspiration also from the eye.

Supercilium Acetab'uli. The edge of the cotyloid cavity of the os innominatum.

SUPERCONCEPTION, see Superfœtation.

SUPEREVACUATIO, Hypercrisis.

SUPERFECUNDATION, see Superfœtation.

SUPERFICIA'LIS COLLI, *Subcuta'neus Colli.* A nerve formed by communicating branches from the second and third cervical nerves. It is distributed to the superficial parts of the neck.

SUPERFICIES PLANTARIS PEDIS, Sole.

SUPERFŒCUNDATIO, Superfœtation.

SUPERFŒTATIO, Superfœtation.

SUPERFŒTA'TION, *Superfœta'tio, Epicye'sis, Hypercye'sis, Superimprægna'tio, Epig'onē, Superfœcunda'tio, Superfecunda'tion, Superimpregna'tion*, from *super*, 'upon,' and *fœtare*, 'to bring forth young.' Conception of a fœtus—*epicye'ma*—in a uterus which already contains one. The impregnation of a female already pregnant. The possibility of this has been denied; but there is abundant evidence to show, that it is possible at a very early period of pregnancy. Twin cases may be of this kind of *superconception*.

SUPERGEMINALIS, Epididymis.

SUPERGENUALIS, Patella.

SUPERHUMERALE, Epomis.

SUPERIMPRÆGNATIO, Superfœtation.

SUPERIOR AURIS, Attollens aurem—s. Rotundus clitoridis, Ischio-cavernous.

SUPERLABIA, Clitoris.

SUPERLIGAMEN, Epidesmus.

SUPERLIGULA, Epiglottis.

SUPERNUTRITIO LIENIS, Splenoncus—s. Splenis, Splenoncus.

SUPEROXALAS KALICUM, Potass, oxalate of.

SUPERPURGATIO, Hypercatharsis.

SUPERSCAPULARIS, Supraspinatus—s. Inferior, Infra-spinatus.

*SUPINATEUR COURT* ou *PETIT*, Supinator radii brevis — *s. Grand* ou *long*, Supinator radii longus.

SUPINA'TION, *Supina'tio*, from *supinus*, 'lying on the back.' The movement in which the forearm and hand are carried outwards, so that the *anterior* surface of the latter becomes *superior*.

In Pathology, *Supination, Supinatio, Hyptias'ma, Hyptias'mus*, means the horizontal position on the back, with the head thrown back, and the legs and arms extended. It is often a sign of great weakness in disease.

SUPINA'TOR. Same etymon. That which produces supination. A name given to two muscles of the forearm.

Supinator Brevis seu Minor, Supinator radii brevis — s. Longus seu major, Supinator radii longus.

Supinator Radii Brevis, *S. brevis* seu *minor*, (F.) *Épicondylo-radial* (Ch.), *Supinateur court* ou *petit supinateur*. A muscle, seated at the outer and back part of the forearm. It is flattened, triangular, and curved upon itself, in such a manner that it embraces the superior extremity of the radius. It is attached, on the one hand, to the external tuberosity of the humerus, and to a small portion of the posterior surface of the ulna, and is inserted into the upper third of the outer and upper surfaces of the radius. It produces, by contracting, the motion of supination.

Supinator Radii Longus, *S. longus* sive *major, Bra'chio-radia'lis*, (F.) *Huméro-sus-radial* (Ch.), *Long* ou *grand supinateur*, is seated at the anterior and outer part of the forearm. It arises from the inferior part of the outer edge of the os humeri, and from the external intermuscular aponeurosis; and is inserted, by a long tendon, into the outer edge of the radius, near the base of the styloid process. It causes the supination of the forearm, which it can likewise bend on the arm.

SUPPEDANEA, Hypopodia.

SUPPLANTALIA, Hypopodia.

SUPPLEMENTA EPIPLOICA, Epiploic appendages.

SUPPLEMENTARY AIR, see Respiration.

SUPPORTER, ABDOMINAL, Belt, Russian —s. Utero-Abdominal, see Belt, Russian.

*SUPPOSITION DE PART*, Pregnancy, pretended.

SUPPOSITORIUM, Suppository — s. Uterinum, Pessary.

SUPPOSITORY, *Supposito'rium, Hypoth'eton, Bacil'lus, Balanis'mus, Bal'anus, Glans*, from *supponere*, (*sub*, and *ponere*, 'to put,') 'to put under.' Any solid medicine, in the form of a cone or cylinder, intended to be introduced into the rectum;—either for the purpose of favouring intestinal evacuations, or to act as an anodyne. Purgative suppositories are made of soap, aloes, or any other irritating substance.

SUPPRESSIO ALVI, Constipation — s. Lochiorum, Ischolochia—s. Lotii, Ischuria—s. Mensium, Amenorrhœa — s. Menstruationis, Amenorrhœa—s. Sudoris, Ischidrosis.

*SUPPRESSION DU FLUX MENSTRUEL*, Amenorrhœa—*s. de Part*, see Parturition—*s. d'Urine*, Ischuria.

SUPPURANS, Suppurative.

SUPPURA'TION, *Suppura'tio, Ecpye'ma, Purulen'tia, Pyo'sis, Pye'sis, Diapye'ma, Diapyo'sis, Pyogen'ia simplex, Pu'rulence, Pu'rulency*, (F.) *Aboutissement*. Formation or secretion of pus, (see, also *Pyogenia*,) from *sub*, 'under,' and *pus*. It is a frequent termination of inflammation, and may occur in almost any of the tissues. This termination is announced by slight chills, by remission of the pain, which, from being lancinating, becomes heavy; by a sense of weight in the part, and, when the collection of pus can be easily felt, by fluctuation. When pus is thus formed in the areolar membrane, and is collected in one or more cavities, it constitutes an *abscess*. If it be formed from a surface exposed to the air, it is an *ulcer*: and such ulcers we are in the habit of establishing artificially in certain cases of disease.

SUP'PURATIVE, *Suppu'rans, Suppurati'vus, Diapye'ticus, Ecpyo'ticus, Ecpyiscon'tus*. That which facilitates suppuration. Suppuratives are, generally, vesicants mixed with lard.

SUPRA. A common Latin prefix: in composition, signifying 'above.'

SUPRA-COSTA'LES, *Levato'res Costa'rum*, (F.) *Sur-costaux*, from *supra*, 'above,' and *costa*, 'a rib.' A name given to twelve small, fleshy fasciculi, which are flattened, triangular, and with radiating fibres. They pass from the transverse processes of the dorsal vertebræ to the superior margin of the rib beneath. Spigelius, Cowper, Boyer, Chaussier, and others consider them to form part of the intercostales externi.

SUPRA-OMPHALODYMIA, see Somatodymia — s. et Infra-omphalodymia, see Somatodymia.

SUPRA-OR'BITAR, *Supra-orbita'lis, Supra-orbita'rius*, (F.) *Sus-orbitaire*, from *supra*, 'above,' and *orbita*, 'the orbit.' That which is situate above the orbit.

Supra-Or'bitar Fora'men, *Fora'men Supra-orbita'rium, F. orbitarium supe'rius*, (F.) *Trou sus-orbitaire* ou *orbitaire supérieur*, is a foramen or notch completed by a ligament at the inner third of the orbitar arch. It gives passage to the *supra-orbitar* or *superciliary artery*, a branch of the ophthalmic, which ascends the forehead, and is distributed thereto.

SUPRA-PU'BIAN, *Supra-pubic, Supra-pubia'nus*, from *supra*, and *pubes*. That which is seated above the pubis.

Supra-Pubian Nerve, (F.) *Nerf sus-pubien*, is the internal ramus of the inguino-cutaneous branch of the first lumbar nerve. It is the *genito-crural* branch of Bichat. It descends almost vertically before the psoas muscle; and, near the crural arch, divides into two branches. One of

these accompanies the spermatic cord, and is distributed to the cremaster, scrotum, and integuments on the inner part of the thigh. The other issues from the pelvis with the femoral filaments; traverses the aponeurosis of the thigh, and is distributed to the integuments of the upper and anterior part of the limb.

SUPRA-RE'NAL, *Supra-rena'lis*, (F.) *Surrénal*, from *supra*, 'above,' and *ren*, 'the kidney.' Seated above the kidney—as the *supra-renal* capsule.

SUPRA-SCAPULAR; *Supra-scapula'ris*; from *supra*, 'above,' and *scapula*. Seated above the scapula; — as

Supra-scapular Nerve. This arises from the fifth cervical; passes through the supra-scapular notch, and is distributed to the supra-spinatus and infra-spinatus muscles.

SUPRA-SCAPULARIS, Supra-scapular, and Supraspinatus muscle.

SUPRA-SEMIORBICULARIS, Orbicularis oris.

SUPRA-SPINA'TUS, *Supra-spino'sus*, (F.) *Sur-épineux*, *Sus-épineux*, from *supra*, and *spina*. That which is seated above the spine.

Supra-spinata Fossa, (F.) *Fosse sus-épineuse*, is a triangular depression above the spine of the scapula.

Supra-Spinatus Muscle, *Super-scapula'ris*, *Supra-scapularis*, (F.) *Sus-spino-scapulo-trochitérien*, *Petit sus-scapulo-trochitérien* (Ch.), is situate in the fossa supra-spinata. It is elongated, thick, and triangular, and is attached, on the one hand, to the two inner thirds of the fossa supra-spinata; and terminates, on the other, at the anterior part of the great tuberosity of the humerus. This muscle raises the arm.

Supra-Spino'sa Ligamen'ta, *Supra-spinal lig'aments*, are two in number. 1. The *Dorso-lumbo-supra-spinal ligament*, (F.) *Ligament sur-épineux dorso-lombaire*, extending above the spinous processes of the dorsal and lumbar vertebræ from the 7th cervical as far as the median crista of the sacrum. 2. *Cervical-supra-spinal ligament*, (F.) *Ligament-sur-épineux cervical*, which extends above all the cervical spinous processes, and is attached, above, to the outer occipital protuberance.

*SUR*, *Supra*. A French prefix, signifying 'above.'

SURA, *Gastrocne'mē*, *Gastrocne'mia*, *Gastrocne'mium*; *calf of the leg*, (F.) *Mollet*, *Gras de Jambe*. The projection, formed at the posterior part of the leg by the gastrocnemii muscles. Also, the fibula.

*SURCILIER*, Corrugator supercilii, Superciliary.

*SURCOSTAUX*, Supracostales.

SURCULI FELLEI, Pori biliarii.

SURCULUS, Ramusculus.

*SURDENT* (F.), *supra*, 'above,' and *dens*, 'a tooth.' When a milk-tooth does not fall out at the period of the second dentition, but is merely forced to one side by the new tooth, it is called a *surdent*.

SURDITAS, Cophosis, Deafness.

*SURDITÉ*, Cophosis, Deafness.

SURDOMUTITAS, Deaf-dumbness.

*SUREAU COMMUN*, Sambucus.

*SURELLE*, Oxalis acetosella.

*SURÉPINEUX*, Supra-spinatus.

*SUR-EXCITATION*, see Excitement, and Super-excitation.

SURFEIT, Colica crapulosa.

SURGEON, *Chirur'geon*; old French, *Surgien*, *Chiro'nax*, *Chirur'gus*, *Vul'nerum med'icus*, *Cheiria'ter*, *Chiria'ter*, *Iātrus*, (F.) *Chirurgien*, from χειρ, 'the hand,' and εργον, 'work.' One who practises surgery. The surgeon, says Celsus, ought to be young, or, at all events, not advanced in life. His hand must be steady, expert, and never tremulous: he must use the right or left with equal facility: his sight must be clear and penetrating: his mind intrepid; and although unmoved when he proceeds to operate, he must not be in haste, nor cut less than is necessary, but finish his operation, as if the cries of the patient made no impression upon him.

In the middle ages, the Universities of Italy and Spain sent out educated surgeons, as well as physicians, under the name *chirurgi-physici*.

SURGEON-APOTH'ECARY. One who unites the practice of surgery with that of the apothecary. A *general practitioner*.

SURGEON-DENTIST, Dentist.

SUR'GEONCY. The office of a surgeon.

SUR'GERY, *Chirur'gia*, *Chiriatri'a*, *Cheirix'is*, *Chi'risis*, *Chirix'is*, *Chiris'mus*, *Metacheirix'is*, *Metachi'risis*, *Metachiris'mus*, *Tracta'tio manua'ria*, *Medici'na operati'va*, *Medici'na ef'ficax*, (F.) *Chirurgie*. The part of the healing art which relates to external diseases; their treatment; and, especially, to the manual operations adapted for their cure. Also, the office of a surgeon.

Surgery, Anaplastic, Morioplastice — s. Autoplastic, Morioplastice — s. Dental, Dentistry.

Surgery, Mil'itary, (F.) *Chirurgie militaire*, is that which relates to the operations to be performed on the field of battle, or subsequently; — with the attention to be paid to the wounded, &c.

Surgery, Op'erative, is termed *Aciur'gia*, *Acur'gia*, and *Acidur'gia*, (F.) *Médecine opératoire*.

Surgery, Plastic, Morioplastice.

SUR'GICAL, *Chirur'gicus*, (F.) *Chirurgical*, *Chirurgique*. That which relates to surgery; as *surgical* anatomy, *surgical* operations, *surgical* instruments, &c.

*SURGIEN*, Surgeon.

SURINAMINE, see Geoffræa Surinamensis.

*SUR-IRRITATION*, see Irritation.

*SUROXYGÉNÈSES*. A name given by Baumes to diseases attributed by him to superabundance of oxygen.

*SURPEAU*, Epidermis.

SURRECTA ALBA, Ranunculus flammula.

*SUR-RENAL*, Supra-renal.

SURROGATUM, Succedaneum.

*SURSELS*, see Salt.

*SURTOUTS LIGAMENTEUX DE LA COLONNE VERTÉBRALE*, Vertebral ligaments.

*SURUMPE* (S.) A disease to which the traveller in the Cordilleras is liable. It consists of a violent inflammation of the eyes, caused by the reflection of the bright rays of the sun. The eyes become highly inflamed, and the lids swell and bleed. The pain is intense, and frequently induces delirium. — Tschudi.

*SURVIE*, Survivorship.

SURVI'VORSHIP, (F.) *Survie*, from *supervivere*, (*super*, and *vivere*,) (F.) *survivre*, 'to live longer.' In *legal medicine*, this word means the probability that any individual has survived others in an accident, which has been fatal to all. This is often an important question, connected with the inheritance of property, and on which physiology can rarely afford more than presumptive grounds for conclusion.

*SUS*, *Supra*. A French prefix, signifying 'above.'

*SUS-ACROMIO-HUMÉRAL*, Deltoid.

*SUS-CARPIEN*; from *sus*, (F.) 'above,' and *carpe*, 'the wrist.' Above the wrist. An epithet given by Chaussier to the dorsal artery of the wrist — *Artère sus-carpienne* — a branch of the radial.

*SUS-ÉPINEUX*, Supra-spinatus—*s. Maxillo-labial*, Levator anguli oris — *s. Maxillo-labial, grand*, Levator labii superioris alæque nasi — *s. Maxillo-labial moyen*, Levator labii superioris proprius — *s. Maxillo-nasal*, Compressor naris — *s. Omphalodymie*, see Somatodymia — *s. Optico-sphéno-sclérotícien*, Rectus superior oculi—*s. Orbitaire*, Supra-orbitar — *s. Phalangien du pouce*, Abductor pollicis brevis—*s. Pubio-fémoral*, Pectinalis — *s. Scapulo-trochitérien, le plus petit*, Teres minor — *s. Scapulo-trochitérien, petit*, Supra-spinatus — *s. Spino-scapulo-trochitérien*, Supra-spinatus.

SUSCEPTIBIL'ITY, *Facilè suscipiens*, (*sub* or *sus*, and *capio*, 'I take,') 'easily taking, or undertaking.' Sensibility, in its most enlarged acceptation. Impressibility. This term, with the epithet *nervous*, is sometimes used for that increase in the moral sensibility which is particularly observed in nervous affections.

SUSCEPTIO INTESTINORUM, Intussusception.

SUSPENDICULUM, Cremaster.

SUSPENSA, Enæorema.

*SUSPENSOIRE*, Suspensory.

SUSPENSORIUM, Suspensory—s. Testis, Cremaster.

SUSPEN'SORY, *Suspenso'rius*, from *suspendere*, (*sub* or *sus*, 'under,' and *pendere*, 'to hang,') 'to hang under.' (F.) *Suspensoire*. That which sustains or suspends.

SUSPENSORY BANDAGE, *Suspenso'rium*, is a bandage intended to support the scrotum, in cases of disease of the testicle or of scrotal hernia. It consists of a kind of bag, fixed above to a cincture, and retained below by strings passing between the thighs, and fixed to the cincture behind.

SUSPENSORY LIGAMENT OF THE LIVER, *Ligamen'tum suspenso'rium he'patis, Perpendic'ulum he'patis*, is a triangular duplicature of the peritoneum, between the inferior surface of the diaphragm and the upper surface of the liver, which is continuous with the great falx of the umbilical vein.

SUSPENSORY LIGAMENT OF THE PENIS is a fibrocellular fascia, of a triangular shape, which extends from the anterior part of the symphysis pubis to the corpus cavernosum, which it sustains. A similar ligament belongs to the clitoris.

SUSPENSUM, Enæorema — s. Urinæ, Enæorema.

SUSPIRATION, Suspirium.

SUSPIRATUS, Suspirium.

SUSPIRITUS, Suspirium.

SUSPIR'IUM, *Suspira'tio, Suspira'tus, Suspir'itus*, from *sub* or *sus*, 'under,' and *spiro*, 'I breathe;' *Mygmus, Mych'mus, Mychthis'mus, Stenag'mus, Stenax'is, Sigh, Suspira'tion*, (F.) *Soupir*. A short breathing. A slow, voluntary contraction of the diaphragm and intercostal muscles, the effect of which is to restore the due relation between the circulation and respiration, or to free ourselves from an inconvenient sense of weight felt in the chest, when we are much depressed,—a weight, which appears to be chiefly dependent on the functions of the heart being disturbed through the moral influence. The sigh differs from the *sob*:—the latter being involuntary and spasmodic. Sighing, occurring in fevers to a great extent, indicates considerable depression. When accompanied with a vocal sound, it constitutes a *groan*.

SUSPIRIUM CARDIACUM, Angina pectoris.

SUSTENTACULUM, Aliment.

SUSTENTATOR CLITORIDIS, Erector clitoridis — s. Penis, Erector penis.

SUSURRATION, Whispering.

SUSURRUS, *Bourdonnement*: — s. Aurium, Tinnitus aurium.

SUTELA, Suture.

SUTERBERRY, Xanthoxylum fraxineum.

SUTORIUS, Sartorius.

SUTTER, Saccharum.

SUTURA ABDOMINALIS, Gastroraphy — s. Arcualis, Coronal suture — s. Biparietalis, Sagittal suture — s. Clavata, Suture, quilled — s. Corporis callosi externa, see Raphe — s. Cranii squamosa, Squamous suture — s. Dentata, see Suture — s. Frontoparietalis, Coronal suture — s. Jugalis, Sagittal suture—s. Lambdoidalis, Lambdoid suture — s. Limbosa, see Suture — s. Lepidoides, Squamous suture — s. Mendosa, Squamous suture — s. Notha, see Suture — s. Obelæa, Sagittal suture — s. Ossium Spuria, Harmony — s. Proræ, Lambdoid suture—s. Punctata, Suture, common — s. Puppis, Coronal suture — s. Rhabdoides, Sagittal suture — s. Serrata, see Suture, Sagittal suture — s. Vera, see Suture.

SUTURAL, *Sutura'lis*; same etymon as the next. Relating to a suture.

SUTURE, *Sutu'ra, Sute'la, Armē, Rhaphē*, from *suere, sutum*, 'to stitch;' *Dove-tail joint*, (F.) *Engrenure*. A kind of immovable articulation, in which the bones unite by means of serrated edges, which are, as it were, *dove-tailed* into each other. The articulations of the greater part of the bones of the scull are of this kind. The coronal, lambdoidal, and sagittal sutures are called *true sutures*, the two temporal are called *false sutures, suturæ nothæ*.

A *dentated suture* — *Sutu'ra denta'ta* — is one in which the processes are long and dentiform, as in the interparietal suture. In a *serrated suture* — *sutu'ra* seu *syntax'is serra'ta* — the indentations and processes are small and fine, like the teeth of a saw, as in the suture between the two portions of the frontal bone. In the *sutu'ra limbo'sa* there is along with the dentated margins a degree of bevelling of one, so that one bone rests on the other, as in the occipito-parietal suture.

SUTURE, in *Surgery, Rha'phē*, means an operation which consists in stitching the lips of a wound to procure their union. The suture was, at one time, largely employed; but, in modern times, its use has been wisely restricted. There are few wounds in which the edges may not be brought together by adhesive plaster appropriately applied. This kind of union, by adhesive plaster simply, has been absurdly termed *Sutura sicca* or *dry suture*, in opposition to the *Sutura cruenta* or suture properly so called. The suture is generally performed with waxed thread and straight or curved needles, according to the arrangement of parts.

The chief sutures are the *interrupted suture*, the *quilled suture*, the *glover's suture*, and the *twisted suture*. 1. The INTERRUP'TED SUTURE, (F.) *Suture à points séparés, Suture entrecoupée*, is performed by passing a needle, armed with a ligature, through the lips of the wound previously brought into contact; and then tying the extremities of the thread. The other stitches are made in the same manner. They are separate or interrupted. It is the suture most commonly used. 2. The QUILLED SUTURE, *Sutura clava'ta*, (F.) *Suture enchevillée* ou *emplumée* ou *empennée, Compound Suture*, is merely the interrupted suture, with this difference, that the ligatures are not tied over the face of the wound, but over two quills or rolls of plaster, or bougies, which are laid along the sides of the wound. It is used by some surgeons, on account of there being less danger of the stitches tearing out. It is not much employed. 3. The GLOVER'S SU-

TURE, *Contin'ued Suture, Uninterrup'ted Suture,* (F.) *Suture de Pelletier, Suture en surget,* is executed by introducing the needle first into one lip of the wound from within outwards, then into the other in the same way; and, in this manner, sewing up the whole extent of the wound. It has been chiefly used in wounds of the intestinal canal. It is now rarely employed except for stitching up dead bodies. The common stitch or suture, *Sutura puncta'ta,* (F.) *Suture à points passés,* has been used in similar cases. 4. The ROYAL STITCH or SUTURE is the name of an old operation for the cure of bubonocle. It consisted in putting a ligature under the hernial sac, close to the abdominal ring, and then tying that part of the sac, so as to render it impervious by the adhesive inflammation thus excited. 5. The TWISTED SUTURE, (F.) *Suture entortillée,* is employed, chiefly, to unite wounds of the cheeks and of the free edges of the lips. To perform it, a pin or needle is passed through the edges of the wound, so as to keep them accurately in contact. A piece of thread is then wound accurately around the pin, from one side of the division to the other, in the form of the figure ∞. The number of pins and sutures must, of course, correspond with the extent of the wound. This is the suture used in cases of harelip. 6. The *SUTURE À ANSE,* of Le Dran, has only been employed in cases of wounds of the intestines. For this purpose, the edges of the wound are brought together, and as many needles, with unwaxed threads, used as there are to be stitches. Each stitch is then made by passing a needle through the edges; and all the ligatures which belong to one side of the wound are tied together, and twisted so as to form a thread, which is fixed externally.

SUTURE, COMPOUND, Suture, quilled—s. Continued, Suture, glover's—*s. Écailleuse,* Squamous suture—*s. Empennée,* Suture, quilled—*s. Emplumée,* Suture, quilled—*s. Enchevillée,* Suture, quilled—*s. Entortillée,* Suture, twisted—*s. Entrecoupée,* Suture, interrupted—s. False, Harmony—*s. Occipitale,* Lambdoid suture—s. Occipito-parietal, Lambdoid suture—*s. de Pelletier,* Suture, glover's—*s. à Points passés,* Suture, common—s. *à Points séparés,* Suture, interrupted—s. Sagittal, see Sagittal suture—*s. Squameuse,* Squamous suture—*s. en Surget,* Suture, glover's—s. Superficial, Harmony—s. Uninterrupted, see Suture, glover's.

SWAB, from Sax. ꝑpebban, 'to clean with a mop.' A piece of sponge or rag tied to a rod of whalebone or wood, for cleansing the mouth of the sick, or applying remedial agents to deep-seated parts.

SWADDLING CLOTHES, Swathing clothes.

SWAGBELLY, Physconia.

SWALLOW, Hirundo—s. Wort, Asclepias vincetoxicum—s. Wort, orange, Asclepias tuberosa—Wort, tuberous-rooted, Asclepias tuberosa—s. Wort, white, Asclepias vincetoxicum.

SWALLOW'S NEST, Nidus hirundinis.

SWAMP CABBAGE, Dracontium fœtidum—s. Dogwood, Petela trifoliata—s. Sickness, Milk sickness—s. Wood, Cephalanthus occidentalis, Dirca palustris.

SWATHING CLOTHES, *Swaddling Clothes, Incunab'ula, Fasciæ, Panni,* from Sax. ꝑ þeban, 'to bind.' (F.) *Maillot.* The kind of clothing or bandaging formerly applied to children during the first year of life. It is now, properly, laid aside, and every freedom allowed to muscular exertion.

SWEAT, Sudor—s. Bloody, Sudor cruentus—s. Glands, see Perspiration—s. Root, Polemonium reptans—s. Scab, Crusta genu equinæ.

SWEATING, Hidrosis—s. Bath, Achicolum—s. of Blood, see Diapedesis, and Sudor cruentus—s. House, Achicolum—s. Plant, Eupatorium perfoliatum—s. Room, Achicolum—s. Sickness, Sudor Anglicus.

SWEATING SICKNESS, MALWAH. A disease which appears to be allied to the worst form of cholera, and to bear a close relation to malignant congestive fever. As its name imports, it occurs in Malwah in India.

SWEET BITTER, Triosteum—s. Bush, Comptonia asplenifolia—s. Fern, Comptonia asplenifolia—s. Flag, Acorus calamus—s. Pod, Ceratonium siliqua—s. Root, Aralia nudicaulis.

SWELLING, *Epanaste'ma, Exar'ma, Exœde'sis, Presis, Prœsma, Oncus, Extumefac'tio, Tumor, Tumefac'tio,* (F.) *Enflure, Gonflement,* from Sax. ꝑpellan, (D.) swellen (G.) schwellen, 'to swell.' Morbid increase of bulk in the whole, or a part, of the body. See Tumour.

SWELLING, WHITE, Hydrarthrus.

SWERTIA CHIRAYITA, Gentiana chirayita—s. Difformis, see Calumba—s. Frasera, see Calumba—s. Lutea, Gentiana lutea.

SWIETE'NIA FEBRIF'UGA, *S. So'mida, Soym'ida, S. Febrif'uga, Feb'rifuge Swiete'nia,* (F.) *Mahogan fébrifuge. Family,* Meliaceæ. *Sex. Syst.* Decandria Monogynia. The bark of this tree, which is a native of the East Indies, and called there *Rohena Bark,* has an aromatic odour and bitter taste. It is tonic and stomachic, and has been used in intermittents, and in diseases where bitter tonics are indicated. Dose, ʒj to ʒij of the powder.

SWIETE'NIA MAHOG'ANI, *Cedrus Mahog'ani, Mahogany Tree,* grows in the West Indies and tropical America, and is possessed of similar properties.

SWIETENIA SOMIDA, S. Febrifuga.

SWIMBLADDER, Airbladder.

SWIMMING, Natation—s. Bladder, Airbladder—s. of the Head, Vertigo.

SWOON, Syncope.

SWOONING, Syncope.

SYALADENI'TIS, *Inflamma'tio glandula'rum saliva'lium,* from σιαλον, 'saliva, αδην, 'a gland,' and *itis,* denoting inflammation. Inflammation of the salivary glands.

SYCAMINOS, Morus nigra.

SYCAMINUM, see Morus nigra.

SYCE, Ficus, Ficus carica.

SYCEA, Ficus.

SYCEPH'ALUS, from συν, 'with,' and κεφαλη, 'head.' A monster having two heads united together.

SY'CION, συκιον, from συκον, 'a fig.' A decoction of dried figs.

SY'CIOS ANGULA'TUS. *One-seeded star cucumber, Wild Bry'ony.* The roots and seeds of this indigenous plant, *Order* Cucurbitaceæ, are bitter, purgative and diuretic. It is used in dropsy in the same cases as bryony.

SYCI'TES, from συκον, 'a fig.' Wine, in which figs have been infused.

SYCITES, Catorchites.

SYCOMA, Ficus.

SYCO'SIS. Same etymon. A tumour of the shape of a fig. Also, a fungous ulcer. A horny excrescence about the eyelids. Dr. Bateman defines it:—an eruption of inflamed but not very hard tubercles occurring on the bearded portion of the face and on the scalp, in adults; and usually clustering together in irregular patches;—*Phyma Sycosis, Rose'ola fico'sa.* Of this he has given two species: 1. *Sycosis Menti, S. barbæ, Men'tagra, Menti'go, Varus Men'tagra, Chinwelk, Barber's Itch,* (F.) *Dartre pustuleuse mentagre:*

and, 2. *Sycosis Capil'li, S. Capillit'ii.* The treatment, in both cases, resembles that for porrigo favosa.

SYCOSIS, Ficus.

SYCUM, Ficus.

SYDERATIO, Sideratio.

SYLLEPSIS, Conception.

SYLLEPSIOLOG''IA, from *συλληψις*, 'conception,' and *λογος*, 'a description.' The doctrine of conception.

SYM, SYN, *συν*, 'with, together,' like the *cum, con, col, cor,* &c., of the Latins. A common prefix. Before *b, p, ph, ps,* and *m,* — *sym,* or *xyn,* is changed into *sym* or *xym,* (com;) before *c, ch, g, k,* and *x,* into *syn* or *xyn, συγ, ξυγ,* (con;) before *l* into *syl* or *xyl,* (col;) before *r* into *syr* or *xyr* (cor;) and before *s* into *sy* or *xy,* and *sys,* (co and cos.

SYMBLEPHARON, Ankyloblepharon.

SYMBLEPHARO'SIS, *Concre'tio palpebra'rum cum bulbo oc'uli,* from *συν,* 'with,' and *βλεφαρον,* 'an eyelid.' A preternatural adhesion between the eyelids; and especially between the upper eyelid and globe of the eye.

SYMBLEPHAROSIS, Ankyloblepharon.

SYMBOL, *Sym'bolum, Charac'ter,* (F.) *Caractère,* from *συμβαλλω* (*συν,* 'with,' and *βαλλω,* 'I throw'), 'I compare.' A sign or representation of something else.

The following are the symbols used in prescriptions:

℞, Recipe. See R.
gr., *Granum,* a grain.
℈, *Scrupulus* seu *scrupulum,* a scruple.
ʒ, *Drachma,* a drachm.
℥, *Uncia,* an ounce.
lb, *Libra,* a pound.
♏, *Minimum,* a minim.
fʒ, *Fluidrachma,* a fluidrachm.
f℥, *Fluiduncia,* a fluidounce.
O, *Octarius,* a pint.
C, *Congius,* a gallon.

SYMBOLE, Commissure.

SYMBOLEUSIS, Consultation.

SYMBOLISMUS, Sympathy.

SYMBOLIZATIO, Sympathy.

SYMBOLOGICA, Symptomatology.

SYMBOLUM, Sympathy.

SYM'MELES, from *συν,* 'with, and *μελος,* 'an extremity.' *Mon'opus.* A genus of monsters whose extremities are joined together: *Sirens.* — I. G. St. Hilaire.

SYMMETRIA, Symmetry.

SYMMET'RICAL, *Symmet'ricus, συμμετρος,* from *συν,* 'with,' and *μετρειν,* 'to measure.' An epithet given to those parts of the body, which, if seated on the median line, may be divided into two equal, and perfectly like halves; or which— if situate, the one to the right, the other to the left of this line — have a similar conformation, and a perfectly analogous arrangement.

SYMMETRICAL DISEASES, see Symmetry.

SYM'METRY, *Symmet'ria, Commen'sum, Membro'rum Om'nium Competen'tia, Propor'tio.* The regularity in form, observed in many parts, situate on the median line; and, also, the resemblance which exists between many organs that are situate on each side of the median line. Bichat first noticed that this symmetry was confined to the organs of animal life; as the head, brain, spine, organs of sense, locomotion, &c.

It has been affirmed — and there is evidence in favour of the assertion — to be a law of the animal economy, that, when uninfluenced by disturbing agents, all general or constitutional diseases affect equally and similarly the corresponding parts of the two sides of the body. This has been called the *Symmetry of Diseases;* and the resulting diseases are said to be *symmetrical.*

SYMMETRY OF DISEASES, see Symmetry.

SYMPARATERESIS, Observation.

SYMPASMA, Catapasma.

SYMPATHESIS, Sympathy.

SYMPATHET'IC, *Sympath'icus, Sympatheticus,* (F.) *Sympathique,* from *συν,* 'with,' and *παθος,* 'suffering.' That which depends on sympathy. Sympathetic affections of an organ are those morbid phenomena that supervene without any morbific cause acting directly on it, and by the reaction of another organ primarily affected. Thus, itching of the nose is a *sympathetic affection,* produced by irritation in the intestinal canal.

The epithet *sympathetic* is, also, given to different nerves. See Trisplanchnic, Pneumogastric, and Facial.

SYMPATHETIC, GREAT, Trisplanchnic nerve—s. Middle, Pneumogastric.

SYMPATHETIC POWDER, *Pulvis sympathet'icus* of Sir Kenelm Digby, was composed of *calcined sulphate of iron,* prepared in a particular manner. It was long supposed to be able to cure a wound, if applied to the weapon that inflicted it; or even to a portion of the bloody clothes. It is proper to remark, however, that the wound itself was carefully excluded from the air, and from all irritation.

SYMPATHETICUS MINOR, Facial nerve.

SYMPATHETISMUS, Sympathy.

SYMPATHIA, Consent of parts.

SYMPATHICUS, Sympathetic.

*SYMPATHIQUE,* Sympathetic.

SYM'PATHY, *Sympathi'a, Sympathe'sis, Compas'sio, Consensus, Sympathetis'mus, Xympathi'a, Conflux'io, Conspira'tio, Commer'cium, Consor'tium, Homoiopathi'a, Homoëth'nia, Adelphix'is, Symbolis'mus, Symboliza'tio, Sym'bolum.* The connexion that exists between the action of two or more organs, more or less distant from each other; so that the affection of the first is transmitted, secondarily, to the others, or to one of the others, by means unknown. A knowledge of the particular sympathies between different organs throws light on the etiology of diseases, their seat, and the particular organ towards which our therapeutical means should be directed. See Irritation.

SYMPEPSIS, Coction.

SYMPEXIS, Concretion.

SYMPHORA, Congestion.

SYMPHOREMA, Congestion.

SYMPHORESIS, Congestion.

SYMPHORICAR'PUS RACEMO'SUS, *Snowberry.* An indigenous plant, *Order* Caprifoliaceæ, *Tribe* Loniceræ, whose berries are large, bright white, and remain till winter; flowering from June to September. The root is tonic and astringent, and has been used in ague; and by the Indians in syphilis.

SYMPHYIA, Symphysis.

SYMPHYOCEPH'ALUS, *Metop'ages, Cephalop'ages,* from *συμφυης,* 'united together,' and *κεφαλη,* 'head.' A monstrosity in which twins are united by the head.

SYMPHYSEOT'OMY, *Symphysot'omy, Synchondrot'omy, Symphyseotom'ia, Symphysiotom'ia,* from *συμφυσις,* and *τεμνω,* 'I cut.' The *operation* or *section of the Symphysis, Sigaultian operation, Sigaultian section.* This operation is performed with the view of augmenting the diameter of the pelvis, in order to facilitate delivery in certain cases of faulty conformation of that cavity, with wedging of the head of the child therein. To perform the operation, (F.) *Décymphyser,* the fe-

male is placed on her back; the pubes is shaved; and, with a strong scalpel, the soft parts are divided on the median line. The articulation is then cut. As soon as the fibrous parts, which hold the bones together, are divided, they separate to a certain distance from each other; and the delivery may be accomplished. The knife, with which the operation is performed, is called, by the French, *Couteau symphysien.*

SYMPHYS'IA, from *συμφυσις*, 'a growing together.' A malformation consisting in the union of parts that are usually divided. — Breschet.

SYMPHYSIOTOMIA, Symphyseotomy.

SYM'PHYSIS, *Symphy'ia, Coalescen'tia, Coal'itus*, from *συμφυω* (*συν*, 'with,' and *φυω*, 'I grow'), 'I unite together.' A union of bones. The bond of such union. The aggregate of means used for retaining bones *in situ* in the articulations. The name symphysis has, however, been more particularly appropriated to certain articulations; as to the *symphysis pubis, sacro-iliac symphysis*, &c. See Monster.

Symphysis, Coalescence, Commissure, Insertion — s. Cartilaginea, Synchondrosis — s. Ligamentosa, Syndesmosis — s. Ossium muscularis, Syssarcosis—s. Pubis, Pubic articulation.

SYMPHYSOTOMY, Symphyseotomy.

SYMPHYTOS, Hereditary.

SYM'PHYTUM. Same etymon. *Symphytum officina'lē* seu *album* seu *Bohe'micum, Consol'ida major, Comf'rey, Alum, Alus*, (F.) *Grande Consoude. Family*, Borragineæ. *Sex. Syst.* Pentandria Monogynia. The roots of this European plant are very mucilaginous, and are employed as emollients. They are used in decoction in hæmoptysis, dysentery, chronic diarrhœa, &c.

Symphytum, Solidago virgaurea — s. Album, Symphytum — s. Bohemicum, Symphytum — s. Minimum, Bellis — s. Minus, Prunella — s. Officinale, Symphytum.

Symphytum Petræ'um, *Coris Monspelien'sis, Montpel'lier Coris.* An intensely bitter and nauseous plant, which is said to have been useful in syphilis. See, also, Sanicula.

SYMPLOCARP'US ANGUSTISPATHA, Dracontium angustispatha — s. Fœtida, Dracontium fœtidum.

SYMPOD'IA, *Monopod'ia*, from *συν*, 'together,' and *πους, ποδος*, 'a foot.' A monstrosity in which there is coalescence of the lower extremities.

SYMPTOM, *Sympto'ma, Ac'cidens, Casus*, from *συν*, 'with,' and *πτωμα*, 'a fall,' from *πιπτω*, 'I fall.' Any change, perceptible to the senses, in any organ or function, which is connected with morbific influence. It is by the aggregate and succession of symptoms that a disease is detected. The term *symptoms of symptoms* has been used for the effects which result from the symptoms of a disease; but which effects are not essentially connected with the disease itself. Thus, the debility arising from the frequency of evacuations in dysentery is a symptom of symptoms. See Sign.

SYMPTOMA TURPITUDINIS, Nymphomania.

SYMPTOMAT'IC, *Symptomat'icus.* That which is a symptom of some other affection. Thus we speak of a symptomatic disease, in opposition to one that is idiopathic.

SYMPTOMATOL'OGY, *Symptomatolog''ia, Symbolog''ica*, from *συμπτωμα*, 'a symptom,' and *λογος*, 'a treatise.' The branch of pathology, the object of which is the knowledge of symptoms.

SYMPTO'SIS, from *συν*, 'with,' and *πιπτω*, 'I fall.' Depression or collapse, emaciation or atrophy, either of the whole body or of a part.

SYNÆREMA, Corrugation.

SYNÆTION, Concausa.

SYNANCHE, Cynanche, Cynanche tonsillaris.

*SYNANCIE*, Cynanche.

SYNAPHYMENITIS, see Ophthalmia.

SYNAPTASE, see Amygdalin.

SYNARTHRODIA, Synarthrosis.

SYNARTHRO'DIAL, *Synarthrodia'lis*, from *συν*, 'with,' and *αρθρωσις*, 'articulation.' That which belongs to synarthrosis; as *Synarthrodial articulation.*

SYNARTHRO'SIS, *Synarthro'dia, Abarticula'tio, Coarticula'tio.* An immovable articulation. Synarthrosis includes three species: *Suture, Harmony*, and *Gomphosis.*

SYNATHROESIS, Congestion.

SYNATHROISMUS, Congestion.

SYNCAN'THUS, from *συν*, 'with,' and *κανθος*, 'the corner of the eye.' A morbid adhesion between the globe of the eye and the orbit.

SYNCHONDRO'SIS, *Sym'physis* seu *Cop'ula* seu *Connex'io cartilagin'ea, Chondrosyndesm'us*, from *συν*, 'with,' and *χονδρος*, 'a cartilage.' Union or articulation of bones by means of cartilage: — as the articulations of the ribs with the sternum, by means of their cartilages of prolongation.

SYNCHONDROTOMY, Symphyseotomy.

SYNCHRONIUS, Synchronous.

SYN'CHRONOUS, *Syn'chronus, Synchron'ius, Isoch'ronous*, from *συν*, 'with,' and *χρονος*, 'time.' That which occurs at the same time. Thus the pulsations of an artery may be synchronous with those of the heart.

SYNCHRONUS, Synchronous.

SYNCHYSIS, Confusion.

SYNCIPUT, Sinciput.

SYNCLONESIS, Synclonus.

SYN'CLONUS, *Synclone'sis*, from *συγκλονεω*, (*συν*, 'with,' and *κλονεω*, 'I shake,') 'I shake together.' *Clon'ici universa'les, Clonus*, (Young.) Tremulous, simultaneous, and chronic agitation of various muscles, especially when excited by the will. Also, general spasm, *spas'mus universa'lis.* See Tremor, Chorea, &c.

Synclonus Ballismus, Paralysis agitans — s. Beriberia, Beriberi — s. Chorea, Chorea — s. Raphania, Raphania — s. Saltans, Chorea — s. Tremor, Tremor.

SYNCOMIS'TUS, from *συγκομιζω*, (*συν*, and *κομιζω*,) 'I bring together.' *Autop'yros, Panis domes'ticus, secundarius, ciba'rius, confusa'neus.* Bread of the whole wheat or of the unsifted meal. *Household bread.* Also, a cataplasm made of the same.

SYN'COPAL, *Syncopa'lis, Syncop'ticus, Syncop'tus.* Same etymon as Syncope; as *Syn'copal Fever, Febris Syncopa'lis.* A pernicious intermittent, characterized by repeated attacks of syncope.

SYN'COPĒ, from *συγκοπτω*, 'I fall down.' *An'imi defec'tio, Animi deli'quium, Lcipopsych'ia, Lipopsych'ia, Apsych'ia, Apsyx'ia, Lipsis An'imi, Asphyx'ia, Apopsych'ia, Lipothym'ia, Leipothym'ia, Eclips'is, Su'bitus animi casus, Swoon, Swooning, Fainting, Fainting fit, Faintness, Exolu'tion*, (F.) *Évanouissement, Défaillance, Pamoison.* Complete and, commonly, sudden loss of sensation and motion, with considerable diminution, or entire suspension of the pulsations of the heart and the respiratory movements. Syncope is, commonly, an affection of no consequence; but, sometimes, it is an index of diseased heart. Placing the patient in the horizontal posture; sprinkling cold water over the face, and the application of volatile substances to the nose, are

all that will be required during the fit. See Asphyxia, and Suffocation.

An approach to this condition is termed *faintishness.*

Syncope Angina, Angina pectoris — s. Anginosa, Angina pectoris.

SYNCOPTICUS, Syncopal.

SYNCOPTUS, Syncopal.

SYNCRITICA, Astringents.

SYNDACTYLUS, Aschistodactylus.

SYNDESMI'TIS, see Ophthalmia. Also, inflammation of articular ligaments; *Inflamma'tio ligamento'rum.*

SYNDESMOG'RAPHY, *Syndesmograph'ia,* from συνδεσμος, 'a ligament,' and γραφη, 'a description.' A description of the ligaments. The part of anatomy which describes the ligaments.

SYNDESMOL'OGY, *Syndesmolog''ia,* from συνδεσμος, 'a ligament,' and λογος, 'a treatise, discourse.' A treatise on the ligaments.

SYNDES'MO-PHARYNGEUS. A fasciculus of the constrictor pharyngis superior.

SYNDESMOS, Ligament.

SYNDESMO'SIS, *Synneuro'sis, Synymen'esis, Connex'io* seu *Sym'physis ligamento'sa, Commis'su'ra ner'vea, Connerva'tio, Colliga'tio,* from συνδεσμος, 'ligament.' The articulation of two or more bones by means of ligament; — as of the radius with the ulna.

SYNDESMOT'OMY, *Syndesmatom'ia,* from συνδεσμος, 'ligament,' and τεμνω, 'I cut or dissect.' Dissection of the ligaments.

SYNDESMUS, Bandage, Ligament.

SYN'DROMĒ, from συν, 'with,' and δρομος, 'a course.' *Concur'sus, Concourse.* A name given by the Empirical Sect to the union of symptoms which takes place in diseases. *Syndromē pletho'rica,* for example, meant the union of symptoms produced by plethora.

SYNDYASMUS, Coition.

SYNECHES, see Continued fever.

SYNECHI'A, from συν, 'with,' and εχειν, 'to have,' or 'to hold.' Adhesion between the iris and transparent cornea, or between the iris and crystalline lens. The former case is called *Synechia ante'rior:* the latter, *S. poste'rior.*

SYNENERGIA, Synergy.

SYNERGIA, Synergy.

*SYNERGIE,* Synergy.

SYN'ERGY, *Synergi'a, Synenergi'a,* (F.) *Synergie;* from συν, 'with,' and εργον, 'work.' A correlation or concourse of action between different organs in health; and, according to some, in disease.

SYNESIS, Intellect.

SYNEUROSIS, Syndesmosis.

SYNEZI'ZIS, *Synize'sis, Consident'ia,* from συν, 'with,' and ζευγνυειν, 'to join.' *Parop'sis Synizesis, Cali'go à Synizesi, Caligo Pupil'læ, Imperfora'tio pupillæ, Closure* or *ocelu'sion* or *oblitera'tion of the Pupil, Phthisis Pupil'læ, Amyo'sis.* This disease is sometimes faulty conformation, depending upon the continued existence of the membrana pupillaris, or the absence of the pupil. It is, in other words, *congenital.* At other times, it is owing to accident, and supervenes on violent ophthalmia, or on the operation for cataract. They who are affected with synezizis are completely blind; — the iris having no central aperture. In certain cases, a remedy may be obtained by making an opening in the iris, which may supply the place of the pupil, and through which the rays of light may reach the retina. This operation is called the *operation for artificial pupil.*

SYNGENES, Hereditary.

SYNGENICUS, Congenital.

SYNHYMENESIS, Synymenesis.

SYNIMENESIS, Synymenesis.

SYNIZESIS, Considentia, Synezisis.

SYNNEUROSIS, Syndesmosis.

SYN'OCHA, from συνεχω, (συν, and εχω, 'I have or hold,') 'I continue.' *Inflam'matory Fever, Dynam'ic Fever, Angiop'yra, Sthenop'yra, Febris causo'des, F. caumato'des, Febris deu'rens, F. ardens, Febris contin'ua sanguin'ea, Febris contin'ua non putris, Syn'ochus* (Vogel), *Febris aemas'tica, Synochus imputris* (Galen,) *Febris acu'ta, F. acu'ta sanguin'ea, F. con'tinens, F. continens non pu'trida, F. angioten'ica, F. sthenica, F. sanguin'ea, Homot'onos, F. inflammato'ria, Ene'cia cauma, Enecia, F. ton'ica, Phlogop'yrus, Cauma, Calentura continua,* (F.) *Fièvre ardente, F. continente inflammatoire, F. sanguine, F. irritative, F. angeiotênique, F. inflammatoire, Gastro-entérite intense, General inflammation.* A species of continued fever, characterized by increased heat; and by quick, strong, and hard pulse; urine high-coloured; disturbance of mind slight. It requires, of course, the most active treatment.

Synocha Rheumatica, Rheumatism, acute—s. Vaccina, Vaccina.

SYN'OCHAL, *Synocha'lis;* same etymon. Relating to, or having the characters of, synocha.

SYN'OCHUS, *Ene'cia syn'ochus, Febris lenta,* (Linnæus,) same etymon. Continued fever, compounded of synocha and typhus: — in its commencement often resembling the former; in its progress, the latter: *Mixed fever, Common continued fever, Syn'ochoid fever.* See Continued fever, Fever, and Typhus.

Synochus, Synocha—s. Biliosa, Fever, gastric, Fever, bilious—s. Catarrhalis, Influenza—s. Icterodes, Fever, yellow—s. Imputris, Synocha—s. Miliaria, Miliary fever—s. Varicella, Varicella.

SYNOLCE, Spasm.

SYNONIA, Synovia.

SYNOSTEOG'RAPHY, *Synosteogra'phia,* from συν, 'with,' οστεον, a 'bone,' and γραφω, 'I describe.' The part of anatomy which describes the joints.

SYNOSTEOL'OGY, *Synosteolog''ia,* from συν, 'with,' οστεον, 'a bone,' and λογος, 'a treatise.' A treatise on the joints.

SYNOSTEO'SIS, *Synosto'sis,* from συν, 'with,' and οστεον, 'a bone. Union by means of bone.

SYNOSTEOT'OMY, *Synosteotom'ia,* from συν, 'with,' οστεον, 'a bone,' and τεμνειν, 'to cut.' Dissection of the joints.

SYNOSTOSIS, Synosteosis.

SYNO'VIA, from συν, 'with,' and ωον, 'an egg.' *Mucila'go, Un'guen articula'rē, Syno'nia, Axun'gia articula'ris, Unguen'tum* seu *Smegma articula'rē, Mucila'go articulo'rum* seu *junctura'rum, Humor articula'ris, Hydrarthrus, Humor* seu *Hu'midum nati'vum* seu *Gluten articulo'rum* (F.) *Synovie.* A fluid resembling the white of egg, which is exhaled by the synovial membranes surrounding the moveable articulations. The synovia has been found, on analysis, to consist of water, a little albumen, soda, chloride of sodium, phosphate of lime, and—Fourcroy fancied —uric acid. Its use is to lubricate the joints, and the sheaths in which tendons play.

SYNO'VIAL, *Synovia'lis.* That which relates to the synovia.

Synovial Glands, *Havers's Glands, Gland'ulæ articula'res, G. Synovia'les, G. Haversia'næ,* are the secretory fringes, which float in the interior of the synovial capsules (see Capsules.) They do not seem to be glandular. They have been

called *Syno'vial fim'briæ*, (F.) *Franges synoviales.*

SYNOVI'TIS; from *Synovia*, and *itis*, a termination denoting inflammation. A term, badly compounded, applied at times to inflammation of the synovial membrane.

SYNOVITIS RHEUMATISMALIS, Rheumatism, (acute.)

SYN'TASIS, *συντασις*, from *συντεινω*, (*συν*, and *τεινω*, 'I stretch,') 'I strain.' Tension of parts: hence *συντατικα*, are medicines which render parts tense. *Syntax'is*, on the other hand, means *Colliqua'tio*, or wasting of the body; from *συντηκω*, 'I melt together.'

SYNTAXIS, Articulation, Reduction, Taxis—s. Serrata, see Suture.

SYNTECOPYRA, Hectic fever.

SYNTECTYCOPYRA, Hectic fever.

SYNTENO'SIS, from *συν*, 'with,' and *τενων*, 'a tendon.' A species of articulation in which two bones are joined by means of tendon; as the sesamoid bones with the toes, the rotula with the tibia, &c.

SYNTERESIS, Prophylaxis.

SYNTERETICUS, Prophylactic.

SYNTEXIS, Colliquation, Consumption.

SYNTHENA. A term employed by Paracelsus to designate a species of epilepsy, accompanied by cardialgia and tormina.

SYN'THESIS, *Reu'nio*, 'composition or putting together,' from *συν*, and *τιθημι*, 'I place.' A surgical operation, which consists in uniting parts that are divided; and approximating such as are separated or distant from each other, *Reu'nio par'tium separata'rum*, *Syn'thesis of continu'ity*, means the union of the edges of a wound, or the approximation of the extremities of a fractured bone. *Synthesis of contigu'ity* is the reduction of displaced organs; as in cases of hernia and luxations.

SYNTHESIS, Composition.

SYNTHETIS'MUS, same etymon. The aggregate of operations and means for reducing a fracture, and maintaining it reduced:—comprising extension, counter-extension, coaptation, and bandaging.

SYNTRIMMA, Contritio.

SYNTRIPSIS, Contritio.

SYNTROPHOS, Connutritus.

SYNULOSIS, Cicatrization.

SYNULOTICA, Cicatrisantia.

SYNUSIA, Coition.

SYNYME'NESIS, *Synhyme'nesis*, *Synime'nesis*, from *συν*, 'with,' and *'υμην*, 'a membrane.' Union of bones by membrane, as in the case of the bones of the head in the fœtus.

SYNYMENESIS, Syndesmosis.

SYPHAR, Peritoneum.

*SYPHILIDES*, *Syphili'da*, (F.) *Dermo-syphilides*, *Dermatoses véroleuses.* Same etymon as Syphilis. The cutaneous eruptions that accompany constitutional syphilis are so denominated by the French writers.

SYPHILIDIA'TER, *Syphilidia'trus*, from *Syphilis*, and *ιατρος*, 'a physician.' A pox doctor. One who occupies himself in treating syphilis.

SYPHILIDOMANIA, Syphilomania.

SYPHYLIPHO'BIA; from *Syphilis* and *φοβος*, 'dread.' A morbid dread of syphilis, giving rise to fancied symptoms of the disease: a form of hypochondriasis.

SYPH'ILIS, *Morbus Gal'licus*, *Siphilis*, *Syphilis'mus*, *Cachex'ia venerea*, *Cachochym'ia Vene'rea*, *Malum vene'reum*, *Mor'bus Ital'icus*, *M. Hispan'icus*, *Puden'dagra*, *Lues*, *Me'vium*, *Lues vene'rea*, *Lues syphilis*, *Morbus aphrodis'ius*, *Syphilis venerea*, *S. maligna*, *Morbus Neapolita'nus*, *Morbus In'dicus*, *Patursa*, *Basilis'cus*, *Boœ*, *Sod'oma Gallo'rum*; *Venereal*, *Venereal Disease*, *Pox*, *French Pox*; (F.) *Vérole*, *Maladie vénérienne*, *Mal de Naples*, *Mal Français*, *Maladie de Vénus.* The etymology of syphilis is unknown. Some consider it to proceed from *συς*, 'a hog;' and others, from *σιφος*,—formed, by contraction, from *σιπαλος*, 'shameful,' 'dirty,' &c. It is an infectious disease, communicable by coition, or by the contact of parts that are only lined with a thin epidermis; as the lips, nipple, &c. It generally makes its first appearance by a chancre, followed sooner or later by a bubo. The chancre is a *primary* symptom or sore; but there are others which are *secondary* or *constitutional.* These are:—ulcers in the throat; copper-coloured blotches on the skin; pains in the bones, nodes, &c.: the last are sometimes termed *tertiary* phenomena. The origin of syphilis is not known. It is believed to have been introduced into Europe from America, at the end of the 15th century [?]. Its progress is extremely variable, as well as its duration, which is often unlimited, if left to itself. Mercury may be esteemed the best remedy, but the disease admits of cure without it. Almost every antisyphilitic composition, whose use is attended with success, probably contains mercury united with diaphoretics or other medicines. It is generally sufficient to keep the mouth sore for a fortnight for the cure of chancre: for venereal sore throat, and other recent constitutional symptoms, eight or ten weeks will be required; and, of course, a longer time, if these symptoms have persisted longer. Sometimes, after mercury has been given for a time, the symptoms continue stationary; and do not yield until the mercury has been discontinued, and tonics and eutrophics have been administered. The preparations of iodine have been much used, of late, in the revellent treatment of this disease.

SYPHILIS INDICA, Framboesia.

SYPHILIS PSEUDO-SYPHILIS, *Lues Syphilo'des*, *Pseudo-syphilis.* A term given to ulcers or other affections that resemble syphilis, but are indeterminate in their character,—the symptoms being irregular in their appearance, and usually yielding spontaneously, or under the use of tonics, change of air, &c. The condition has not been at all well defined. The *Sivvens*, *Radesyge*, &c., have been referred to this head.

SYPHILISMUS, Syphilis.

SYPHILOG'RAPHER, from *syphilis*, and *γραφω*, 'I describe.' A writer on syphilis.

SYPH'ILOID, *Syphiloï'des*; from *syphilis*, and *ειδος*, 'resemblance.' Resembling syphilis,—as 'a *syphiloid* affection.'

SYPHILOMA'NIA, *Syphilidoma'nia*,—vulgarly, *Noddle Pox.* A mania, with which some persons are affected, so that they subject themselves to antivenereal treatment, under the notion that they are affected with syphilis.

SYPHITA, Somnambulism.

SYPHOAURICULARIS, Otenchytes.

SYPHON, see Siphon.

SYRIGMOPHO'NIA, from *συριγμος*, 'whistling,' and *φωνη*, 'voice.' A piping state of the voice.

SYRIGMUS, Tinnitus aurium.

SYRINGA, Eustachian Tube, Fistula, Syringe, Trachea.

SYRINGA CLYSMATICA, Syringe, (Clyster.)

SYRIN'GA VULGA'RIS, *Lilac vulga'ris*, *Common Lilac.* The leaves and fruit are bitter and somewhat acrid, and have been used as a tonic and antiperiodic.

SYRINGE, *Syr'inx*, *Syrin'ga*, *Sipho Siphun'culus*, *Squirt*, (F.) *Seringue*, from *συριγξ*, 'a pipe.'

A familiar apparatus through which any liquor is squirted.

Various forms of syringe are used in medicine and surgery.

SYRINGE, CLYSTER, *Syrin'ga clysmat'ica, Clysantli'um,* (F.) *Clysopompe.* A syringe for administeriug clysters.

SYRINGE, CUPPING, Antlia sanguisuga.

SYRINGICUS, Fistulous.

SYRINGI'TIS EUSTA'CHII, Inflammation of the Eustachian tube.

SYRINGMOS, Tinnitus aurium.

SYRINGODES, Fistulous.

*SYRINGOTOME, Syringot'omus, Syringot'omum,* from συριγξ, 'a pipe,' 'a fistula,' and τεμνειν, 'to cut.' A surgical instrument, formerly used in the operation for *fistula in ano.* It is a bistouri, concave at its edge, and terminated by a long, flexible, probe-pointed stylet. This stylet or probe was first introduced by the external opening of the fistula into the rectum, whence it was drawn externally through the anus, carrying with it the cutting edge of the instrument, which divided the intermediate parts. The operation for fistula in ano has been called *Syringotomy.*

SYRINGOT'OMY, *Syringotom'ia.* Same etymon as the last. The operation for fistula in ano by incision.

SYRINX, Eustachian tube, Fistula, Syringe, Trachea—s. Hiera, Vertebral column.

SYRMAIS'MOS, from συρμαιζω, 'I evacuate.' A gentle evacuation by vomiting or stool.

*SYROP,* Syrup — *s. d'Ail,* Syrupus allii — *s. d'Armoise composé,* Syrupus aromaticus — *s. de Chicorée composé,* Syrupus de cichorio compositus —*s. des Cinq racines,* Syrupus e quinque radicibus — *s. de Cuisinier,* Syrupus de sarsaparillâ et sennâ compositus — *s. d'Éther,* Syrupus cum æthere sulphurico paratus—*s. de Gingembre,* Syrupus zingiberis—*s. de Guimauve,* Syrupus althææ —*s. de Longue vie,* Mellitum de mercuriali compositum — *s. de Mercure,* Syrupus de mercurio mediante gummi—*s. de Mûres,* Syrupus mori—*s. de Nerprun,* Syrupus rhamni — *s. de Pavots blancs,* Syrupus papaveris — *s. de Pommes composé,* see Syrupus sennæ — *s. de Quinquina avec le Vin,* Syrupus de kiuâ kinâ cum vino — *s. de Roses pâles,* Syrupus rosæ — *s. de Roses rouges,* Syrupus rosæ—*s. de Vinaigre,* S. aceti.

SYRUP, *Sirup, Syr'upus, Serapi'um, Serape'um,* (F.) *Syrop;* derived, according to some, from συρω, 'I draw,' and οπος, 'juice;' but more probably, from the Arabic *Siruph, Sirab,* or *Scharab,* which signifies 'a potion.' A saturated solution of sugar in water, either simply, or united with some vegetable or other principle. Syrups, in general, require two pounds of sugar to the pint, and they are judged to be sufficiently boiled when a portion, taken up in a spoon, flows like oil. In the Pharmacopœia of the United States, it is directed, that syrups, whose density is not precisely determined by the process, should have the s. g. 1.261, when boiling, and of about 1.319 at ordinary temperatures. Syrups should be kept in small bottles in a cool place. They are chiefly used to render medicines palatable. See Syrupus simplex.

SYRUP, see Syrupus — s. of Almonds, Syrupus amygdalæ—s. Antiscorbutic, Syrupus antiscorbuticus — s. of Buckthorn, Syrupus rhamni — s. of Capillaire, common, Syrupus simplex—s. of Cinchona with wine, Syrupus de kinâ kinâ cum vino — s. of Citric acid, Syrupus acidi citrici — s. of Clove July flower, Syrupus caryophylli rubri — s. of Clove pinks, Syrupus Caryophylli rubri — s. of Ether, Syrupus cum æthere sulphurico paratus—s. of Five roots, Syrupus e quinque radicibus—s. of Garlic, Syrupus allii — s. of Ginger, Syrupus zingiberis — s. of Gum Arabic, Syrupus acaciæ — s. SYRUPUS, S. simplex.

SYRUPUS ACA'CIÆ, *Syrup of Gum Arabic,* (*Acaciæ* ℥ij, *Sacchar.* ℥xv, *Aq.* fℨviij. Dissolve the gum in water; add the sugar, and strain. Ph. U. S.) A good pectoral syrup. Dose, fℨj to ℥iij.

SYRUPUS ACE'TI, *S. Ac''idi Aceto'si, Syrup of Vinegar,* (F.) *Syrop de Vinaigre.* (*Aceti* Oiiss, *sacch. purif.* ℔iiiss. Boil to form a syrup. *Ph. E.*) It is refrigerant and antiseptic. Dose, fℨj to fℨij.

SYRUPUS ACIDI ACETOSI, S. aceti.

SYRUPUS AC''IDI CIT'RICI, *Syrup of Citric Acid.* (*Acid. citric.* pulv. ℥ij; *Ol. Limon.* ♏iv; *Syrup.* Oij. Rub the acid and oil with an ounce of the syrup; add the rest of the syrup, and dissolve with a gentle heat. Ph. U. S.) Virtues the same as those of the Syrupus Limonis.

SYRUPUS CUM Æ'THERE SULPHU'RICO PARATUS, *Syrup of Ether,* (F.) *Sirop d'éther.* (Very *pure sugar,* 1000 p.; *distilled water,* 500 p.; dissolve in the cold, and strain; add *sulphuric ether,* 48 p. Shake for five or six days, and draw off the limpid syrup. *Ph. L.*) Properties like those of ether.

SYRUPUS AL'LII, *Syrup of Garlic,* (F.) *Syrop d'ail.* (*Allii* recent. concis. ℥vj, *acet. destillat.* Oj, *sacchar.* ℔ij. Macerate the garlic in the vinegar, in a glass vessel, for four days; then express the liquor and set it by, that the dregs may subside; lastly, add the sugar to the clear liquor, and proceed in the manner directed for syrup. *Ph. U. S.*) *Use,* same as that of garlic. Dose, fℨj to fℨiv.

SYRUPUS ALTHÆ'Æ, *Syrup of Marshmallow, Syrupus ex Althæ'â, S. de Althœâ, S. Althææ officina'lis,* (F.) *Syrop de Guimauve.* (*Althææ rad. recent.* cont. ℔ss, *sacch. pur.* ℔ij, *aquæ* Oiv. Boil the root in the water to one-half, and press out the liquor; when cold, defecate; add the sugar, and boil. *Ph. L.*) Emollient and demulcent. Dose, fℨj to fℨij.

SYRUPUS AMOMI ZINGIBERIS, S. zingiberis.

SYRUPUS AMŸG'DALÆ, *Syrup of Almonds, Syrup of Orgeat, Orgeat.*' (*Amygdal. dulc.* ℔j, *amygdal. amar.* ℥iv, *aquæ,* Oiij, *sacchar.* ℔vj. Blanch the almonds, and rub them in a mortar to a very fine paste, adding, during the trituration, three fluidounces of the water, and a pound of the sugar. Mix the paste thoroughly with the remainder of the water; strain with strong expression; add the remainder of the sugar to the strained liquor, and dissolve it with the aid of a gentle heat. Strain the syrup through fine linen, and having allowed it to cool, put it into bottles

which must be well stopped, and kept in a cool place. *Ph. U. S.*)

Syrupus Anticausoticus, see Anticausodic.

Syrupus Antiscorbu'ticus, *S. de Armora'ciâ compositus, Antiscorbu'tic Syrup.* (*Leaves of cochlearia, buckbean, water-cresses, horse-radish root* and *bitter oranges*, each ℔j, *cinnamon*, ℥iss. Cut, and pour on *white wine* ℔iv. Macerate for two days; distil over Oj in a sand-bath; add to this of *sugar*, ℔ij, and form a syrup. Again, take what remains in the cucurbit: pass it through cloth; let it rest; decant, and add *sugar* ℔ij; make into a syrup, and clarify with white of egg. Mix it with the first while yet warm. *Ph. P.*) Antiscorbutic, alterative, tonic, stomachic, &c. Dose, f℥ij to f℥ij.

Syrupus Aromat'icus, *S. de Artemisiâ compositus, Compound Syrup of Mugwort*, (F.) *Syrop d'armoise composé.* (*Tops of artemisia vulgaris*, in flower, ℥vj, *inula root, ligusticum levisticum*, and *fennel*, each ℥ss, *pennyroyal, catmint, savine leaves*, each ℥vj, *marjoram, hyssop, pyrethrum, rue, basil*, each ℥iij, *aniseed* and *cinnamon*, each ℥ix; bruise and macerate in *hydromel* ℔xviij; distil over Oss; add to this a pound of *sugar*. Again, take the liquid that remains in the cucurbit, strain it gently; and add *sugar* ℔iv. Then mix the two. *Ph. P.*) Tonic, emmenagogue, &c.

Syrupus de Armoraciâ Compositus, S. antiscorbuticus—s. de Artemisiâ compositus, S. antiscorbuticus—s. Asparagi, see Asparagus.

Syrupus Auran'tii, *S. Aurantio'rum, S. Citri Aurantii, S. Cor'ticis Aurantii, S. Aurantii Corticis* (Ph. U. S.), *S. e Cortic"ibus Aurantio'rum, S. de Corticē Aurantio'rum, Syrup of Orange peel.* (*Aurant. cort.* cont. ℥ij, *aq. ferv.* Oj, *sacch.* ℔ijss. Macerate the peel in the water for twelve hours. Add the sugar. *Ph. U. S.*) Stomachic. Dose, f℥j to f℥ij.

A *Syrup of Orange Juice, Orange Sherbet, Syrupus e succo Aurantiorum*, may be made by adding *white sugar* ℔ij to ℔j of the juice of oranges, strained and clarified.

Syrupus Balsamicus, S. tolutanus.

Syrupus Caryophyl'li Rubri, *S. Dianthi Caryophylli, Syrup of Clove July flower, Syrup of Clove Pinks, Syrupus infusio'nis florum caryophyllo'rum.* (*Petalorum dianth., caryoph. recent.* unguibus resectis ℔j, *aquæ bull.* Oiv, *sacch. purif.* ℔vij. *Ph. E.*) Aromatic.

Syrupus Cassiæ Sennæ, S. sennæ.

Syrupus de Cicho'rio Compos'itus, *S. de Rhea, Compound Syrup of Succory*, (F.) *Syrop de chicorée composé.* (*Root of succory* ℥vj, *leaves of succory* ℥ix, *leaves of fumitory* and *scolopendrium*, each ℥iij, *Alkekengi berries* ℥ij. Boil in *water* Oxiv to Oxij: pass through cloth, and dissolve in *white sugar* ℔v. Boil till it has the consistence of syrup. Again, take *water* Oviij, *rhubarb* ℥vj, *yellow sanders* and *cinnamon*, each ℥ss. Infuse for twenty-four hours; pass through linen, and add the preceding syrup. *Ph. P.*) It is laxative and stomachic. Dose, f℥j to f℥ss.

Syrupus Cinchonæ cum Vino, S. de kinâ kinâ cum vino.

Syrupus Cincho'niæ, *Syrup of Cincho'nia.* (*Simple syrup* one pound; *sulphate of cinchonia* nine grains. Mix.) Six spoonfuls are commonly sufficient to arrest an intermittent.

Syrupus Citri Aurantii, S. aromaticus.

Syrupus Col'chici Autumna'lis, *S. Colchici, Syrup of Meadow Saffron.* (*Rad. colch. autumn. recent.* ℥j, *acidi acetosi* f℥xvi, *sacch. pur.* ℥xxvj. Macerate the root in the vinegar for two days, occasionally shaking the vessel; then strain, with gentle expression. To the strained fluid add the sugar, and boil to a syrup. *Ph. E.*) Diuretic, antiarthritic. Dose, f℥j to f℥ss, or more.

Syrupus Corticis Aurantii, S. aromaticus—s. Citri mediceæ, S. limonum—s. e Succo citronum, S. limonum.

Syrupus Croci, *Syrup of Saffron.* (*Croci stigmat.* ℥j, *aquæ fervent.* Oj, *sacch. purif.* ℔iiss. *Ph. L.*) Cardiac. Chiefly used for colouring.

Syrupus Diacodion, Diacodion—s. Dianthi Caryophylli, S. caryophylli rubri.

Syrupus Emeti'næ, *Syrup of Em'etine.* (*Simple syrup* ℔j, *emetine* 16 gr.) In small doses, expectorant; and in large, emetic.

Syrupus Empyreumaticus, Melasses—s. Ferri iodidi, Liquor Ferri iodidi—s. Hydrargyri, Syrupus de mercurio mediante gummi—s. Infusionis florum caryophyllorum, Syrupus caryophylli rubri.

Syrupus Ipecacuan'hæ, *Syrup of Ipecacuanha.* (*Ipecac.* in pulv. crass. ℥j, *alcohol. dilut.* Oj, *sacchar.* ℔iiss, *aquæ* q. s. Macerate the ipecacuanha in the alcohol for 14 days, and filter. Evaporate the filtered liquor to 6 fluidounces, again filter, and add sufficient water to make the liquid measure a pint; add the sugar, and evaporate by a water-bath to a proper consistence. *Ph. U. S.*) It may also be prepared by displacement.

Syrupus de Jalap'â, *Syrup of Jalap.* (*Pulv. Jalapæ* ℥x, *sem. coriandr., fœnicul. dulc.* āā ℥ss; *aquæ* f℥xijss, *sacch.* ℥xxv. *Ph. P.*) Cathartic. Dose, f℥ij to f℥ss for children.

Syrupus de Kinâ Kinâ cum Vino, *S. Cincho'næ cum vino, Syrup of Cinchona with wine*, (F.) *Syrop de quinquina avec le vin.* (*Cort. cinchonæ officinalis* ℥ij, *ext. cinchonæ* ℥vj, *vini albi* (*Vin. Lunel.* vel *cujusvis ei similis*,) Oj, *alcohol* (s. g. .985, to .915.) f℥j, *sacchar. alb.* ℔iss. Bruise the cinchona; gradually add the alcohol, so as to form a soft mass; pour on the wine; macerate for two days, and strain. Dissolve the extract, add the sugar, and make a syrup. *Ph. P.*) Dose, f℥ss to f℥j.

Syrupus Krame'riæ, *Syrup of Rhatany.* (*Ext. Kramer.* ℥ij, *aquæ* Oj, *sacchar.* ℔ijss. Dissolve the extract in the water, and filter; then add the sugar, and form into syrup. *Ph. U. S.* It may also be made by displacement from *Kramer.* in pulv. crass. ℔j, *sacchar.* ℔iiss; *aq.* q. s.) An adjunct to astringent mixtures; or given in diarrhœa, a tea-spoonful to a child.

Syrupus Limonis, S. Limonum—s. Succi limonis, S. limonum.

Syrupus Limo'num, *S. limonis*, (Ph. U. S.) *S. citri med'icæ, S. e succo citro'num, S. e succo limo'num, S. succi limo'nis, Syrup of Lemon, Lemon Syrup.* (*Limon. succ.* colat. Oj, *sacchar.* ℔ij.) Cooling, antiseptic.

Syrupus e Meconio, S. papaveris—s. de Melle, Mellitum simplex.

Syrupus de Mercu'rio Median'tē Gummi, *Mercu'rius gummo'sus Plenck'ii, Syrupus Hydrar'gyri*, (F.) *Syrop de mercure* ou *Mercure gommeux de Plenck.* (*Hydrargyri pur.* ℥j, *p. gum. acaciæ*, ℥iij, *syrup diacod.* ℥ss. Rub together till the mercury is extinguished. *Ph. P.*) Possesses the properties of the blue pill. Dose, gr. ij to viij, or more.

Syrupus Mori, *S. e succo moro'rum, S. succi mori, Syrup of Mul'berries*, (F.) *Syrop de mûres.* (*Mori succ.* colat. Oj, *sacchar. purif.* ℔ij. *Ph. L.*) Gratefully refrigerant.

Syrupus e Succo Mororum, S. mori.

Syrupus Morphi'æ Aceta'tis, *Syrup of acetate of morphia.* (*Syrup*, one pint, *acetate of morphia*, gr. iv.) Dose, two tea-spoonfuls, as an opiate. It is about the strength of the same quantity of syrup of poppies.

Syrupus Morphiæ Sulpha'tis is made in the same way.

Syrupus Niger, Melasses.

Syrupus Papav'eris, *S. papaveris somnif'eri,*

*S. papaveris albi, S. e meco'nio, S. de meconio, Diaco'dion, Syrup of poppies,* (F.) *Syrop de pavots blancs* ou *diacode.* (*Papav. capsul.* exsiccat. et contus. exemptis seminibus, ℥xiv, *sacch. pur.* ℔ij, *aq. fervent.* cong. ijss. Macerate the capsules in water for 12 hours; boil to a gallon, and express strongly. Boil the liquor to Oij; and strain while hot. Defecate by rest, and boil to Oj, adding the sugar so as form a syrup. *Ph. L.*) One ounce contains about one grain of opium. Anodyne and demulcent.

The Dublin college has a SYRUPUS OPII, called *Common Syrup of Poppies,* which is made by dissolving 18 grains of the *Watery Extract of Opium* in 18 ounces of boiling water. Properties, those of opium and syrup.

SYRUPUS DE PAPAVERE ERRATICO, S. rhœados — s. de Pomis compositus, see S. sennæ.

SYRUPUS PROTEÆ, see Protea mellifera. *Syru'pus Pruni Virginia'næ,* Syrup of *Wild cherry bark.* (*Pruni Virginia.* in pulv. crass. ℥v, *saccher.* ℔ij, *Aquæ* q. s. Moisten the bark with water; let it stand for 24 hours; transfer it to a percolator; pour water gradually upon it, until a pint of filtered liquor has passed. Add the sugar in a bottle, and dissolve by agitation. Ph. U. S., 1851.) Dose, as a demulcent expectorant, f℥j to f℥iij.

SYRUPUS QUI'NIÆ, *Syrup of Quinia.* (*Simple syrup,* 2 pints, *sulphate of quinia,* 64 grains.) Six spoonfuls are commonly sufficient to arrest an intermittent.

SYRUPUS E QUINQUE RADI'CIBUS, *Syrup of five roots,* (F.) *Syrop des cinq racines.* (*Rad. apii, fœniculi, apii petroselini,* āā ℥v. Infuse for 24 hours in boiling water Oiiss, and strain. *Rad. asparag., rusci aculeati,* āā ℥v, *aquæ,* Ovij. Boil and reduce to half; adding, towards the end, the residue of the preceding infusion. Boil again for some minutes; strain, and add *white sugar,* ℔vj. *Ph. P.*) Aperient and diuretic. Used in obstructions of the liver, spleen, and mesentery; and in dropsy, &c. Dose, f℥ss to f℥j, or more.

SYRUPUS RHAMNI, *S. Rhamni cathar'tici, S. de Spinâ cervi'nâ, S. spinæ cervi'næ, Syrup of Buckthorn,* (F.) *Syrop de nerprun.* (*Rhamn. baccar.* succ. recent. Oiv, *zingib. rad.* concis., *pimentæ bacc.* contrit., āā ℥ss, *sacch. purif.* ℔iiiss. Defecate the juice for 3 days, and strain. To a pint of this, add the ginger and pimento; macerate for 4 hours, and strain; boil what remains to Oiss. Mix the liquors and add sugar, so as to form a syrup. *Ph. L.*) Cathartic, but apt to gripe. Dose, f℥iv to f℥ij.

SYRUPUS RHEJ, *Syrup of Rhubarb.* (*Rhei,* in pulv. crass. ℥ij; *Alcohol,* Oss; *Aquæ* Oiss; *saccher.* ℔ij. Mix the alcohol and water; pour f℥iv on the rhubarb, mixed with an equal bulk of sand, and allow the whole to stand four hours; put the mass into a percolater, and gradually pour on the remainder of the alcohol and water. By means of a water-bath, evaporate to f℥xiij; add the sugar, and make a syrup. *Ph. U. S.*) Dose to a child, as a laxative, one or two teaspoonfuls.

SYRUPUS RHEJ AROMAT'ICUS, *Aromatic Syrup of Rhubarb, Spiced Syrup of Rhubarb.* (*Rhej,* cont. ℥iiss; *Caryophyl.* cont., *Cinnam.* cont. āā ℥ss; *Myrist.* cont. ℥ij; *Alcohol. dilut.* Oij; *Syrup* Ovj. Macerate the rhubarb and aromatics in the diluted alcohol for 14 days, and strain; then, by means of a water-bath, evaporate the liquor to a pint, and while still hot, mix with the syrup previously heated. Ph. U. S.) It may also be made by the process of displacement.

The aromatic syrup of rhubarb is a gentle carminative cathartic. Dose to a child, f℥j; to an adult, f℥j.

SYRUPUS DE RHEO, Syrupus de Cichorio compositus.

SYRUPUS RHŒ'ADOS, *S. de papav'erē errat'ico, S. papaveris erratici, Syrup of Red Poppy,* (F.) *Syrop de coquelicot.* (*Rhœad. petal.* recent. ℔j, *aq. fervent.* f℥xviij, *sacch. purif.* ℔iiss. To the water, heated in a water-bath, add the petals. Remove the vessel; macerate for 12 hours; express; defecate, and add sugar to form a syrup. *Ph. L.*) Chiefly used to give colour.

A factitious syrup is often made of aloes, dissolved in simple syrup.

SYRUPUS ROSÆ, *Syrupus rosa'rum soluti'vus, S. e rosis siccis, S. rosæ centifo'liæ, S. rosa'ceus soluti'vus, Syrup of Roses,* (F.) *Syrop de roses pâles.* (*Rosæ centif. petal.* exsicc. ℥vij, *sacch. purif.* ℔vj, *aq. fervent.* Oiv. Macerate the petals for 12 hours. Evaporate the strained liquor to ℔iiss. Add the sugar. *Ph. L.*) Gently laxative. Dose, f℥ij to f℥iss, or more.

SYRUPUS ROSÆ GAL'LICÆ, *Syrup of Red Roses,* (F.) *Syrop de roses rouges.* (*Rosæ Gallic. petal.* exsicc. ℥vij, *aquæ bull.* Ov, *sacch. purif.* ℔vj; prepared like the last. *Ph. E.*) Mildly astringent. Added to stomachic infusions.

SYRUPUS SACCHARI, S. Simplex.

SYRUPUS SARSAPARIL'LÆ, *Syrup of Sarsaparilla.* (*Rad. Sarsap.* cont. ℔j, *aquæ bullient.* cong., *sacch. purif.* ℔j. Macerate the root for 24 hours; boil to Oiv. Strain while hot; add the sugar, and boil. *Ph. L.*) Used in the same cases as the root. Dose, f℥j to f℥iv, and more.

SYRUPUS DE SARSAPARIL'LÂ ET SENNÂ COMPOS'ITUS, *Compound Syrup of Sarsaparilla and Senna,* (F.) *Syrop de Cuisinier.* (*Rad. Sarsap.* concis. ℔ij. Infuse for 24 hours in *warm water* Oxij; boil for a quarter of an hour; pass with expression, and boil again the residuum in Ox of water. Reduce this to Ovj, and repeat the operation 2 or 3 times. Mix all the liquors and boil them together with *flowers of borage, white roses, senna leaves* and *anisced,* each ℥ij; reduce to half, pass, and add *honey* ℔ij. Boil to a syrup. *Ph. P.*) It is considered to be alterant, depurative, and sudorific. Dose, f℥ss to f℥ij.

A similar syrup, under the name SYRUPUS SARSAPARIL'LÆ COMPOS'ITUS, *Compound Syrup of Sarsaparilla,* is directed in the Pharmacopœia of the United States. (*Sarsaparill.* cont. ℔ij; *Lign. guaiac.* rasur. ℥iij; *Rosæ centifol., Sennæ, Glycyrrhiz.* cont. āā ℥ij; *Ol. Sassafras, Ol. Anisi.* āā m. v.; *Ol. Gaultheriæ* m. iij; *Alcohol. dilut.* Ox.; *Sacchar.* ℔viij. Macerate the sarsaparilla, guaiacum wood, roses, sénna, and liquorice root in the diluted alcohol for 14 days; express and filter. Evaporate the tincture in a warm bath to four pints; filter, add the sugar, and form into syrup. Lastly, having rubbed the oils with a small quantity of the syrup, mix them thoroughly with the remainder. *Ph. U. S.*)

It may also be made by the process of displacement.

SYRUPUS DE SCAMMO'NIO, *Syrup of Scam'mony.* (*Pulv. Scammon.* ℥ss, *sacch. alb.* ℥iv. *alcohol.* (s. g. .985 to .915) f℥viij. Heat the mixture moderately: then set fire to the alcohol with a lighted taper; agitate constantly, until the flame is extinguished. Suffer it to cool; pass through cloth, and add *Syrup of Violets,* f℥iv. *Ph. P.*) ℥j contains 18 grains of scammony. Dose, f℥j to f℥ss.

SYRUPUS SCILLÆ, *S. scillit'icus, S. scillæ marit'imæ, Syrup of Squills.* (*Acet. scillæ.* Oj, *sacch.* ℔ij.) Diuretic, expectorant, and emetic. Used in the same cases as the oxymel.

SYRUPUS SCILLÆ COMPOS'ITUS, *Mel Scillæ Compositum, Compound Honey of Squill, Compound Syrup of Squill, Hive Syrup.* (*Scillæ*

cont.; *Senegæ* cont. āā ℥iv; *Antim. et Potassæ Tart.* gr. xlviij; *Aquæ* Oiv; *Sacchar.* ℔iiiss. Pour the water upon the squills and seneka, and, having boiled to one-half, strain and add the sugar. Then evaporate to three pints, and while the syrup is still hot, dissolve in it the tartrate of antimony and potassa.)

It may also be made by the process of displacement. *Ph. U. S.*

It is often given as an emetic in cases of croup, and in catarrh, especially in children. Dose, to infants, 10 drops to a drachm, repeated every 15 minutes, if vomiting be desirable.

Syrupus Sen'egæ, *Syrup of Seneka.* (*Senegæ* cont. ℥iv; *Aquæ* Oj; *Sacchar.* ℔j. Boil the water with the seneka to one-half, and strain; then add the sugar, and form into syrup. *Ph. U. S.*)

It may also be formed by the process of displacement. *Ph. U. S.*

This is a favourite stimulant expectorant (?) with many practitioners. Dose, f℥j or f℥ij.

Syrupus Sennæ, *S. cassiæ sennæ, Syrup of Senna,* (*Sennæ* ℥ij, *sem. fœnicul.* cont. ℥j, *sacch. pur.* ℥xv, *aquæ bullient.* Oj. Macerate the senna leaves and fennel-seeds with a gentle heat for an hour. Strain; add the sugar, and make into a syrup. *Ph. U. S.*) Cathartic. Dose, f℥ij to f℥iss, or more.

The Parisian Codex has a *Syrupus de Sennâ* of a compound character, called *Syrupus de pomis compos'itus,* (F.) *Syrop de pommes composé.* It contains, also, borage, bugloss, &c. Dose, f℥ss to f℥ij.

Syrupus Simplex, *Syrupus* (Ph. U. S.), *S. Sac'chari, Sac'charum clarifica'tum, Liquid'rium, Simple Syrup, Syrup, Common syrup of capillaire.* (*Sacch. purif.* ℔iiss, *aquæ* Oj. Dissolve the sugar; set aside for 24 hours; remove the scum, and pour off the clear liquid.) Used to cover nauseous tastes, &c.

Syrupus de Spinâ Cervinâ, Syrupus rhamni — s. de Stœchade communis, see Lavendula.

Syrupus Toluta'nus, *S. Toluta'ni, S. toluif'eræ bal'sami, S. balsam'icus, Balsam'ic syrup, Syrup of tolu.* (*Tinct. Tolut.* f℥iss; *Aquæ* Oj; *Sacchar.* ℔iiss. Mix the tincture with the sugar in coarse powder; expose it on a shallow dish to a gentle heat, until the alcohol has evaporated; pour the water upon it; heat gradually until the sugar is dissolved, and strain. *Ph. U. S.*) Use—to give flavour.

Syrupus Vi'olæ, *S. violæ odora'tæ, S. viola'rum, S. e succo viola'rum, Syrup of Violets.* (*Flor. recent. viol. odorat.* ℔ij, *aq. bull.* Oviij, *sacch. pur.* ℔xv. Macerate, in a covered vessel, for 24 hours; pass, without expression, through linen; add the sugar so as to form a syrup. *Ph. E.*) Very gently laxative. Dose, f℥j to f℥ij.

Syrupus e Succo Violarum, S. violæ.

Syrupus Zingib'eris, *S. amo'mi zingiberis, Syrup of Ginger,* (F.) *Syrop de gingembre.* (*Tinct. Zingib.* f℥iv; *Aquæ* Oiv; *Sacchar.* ℔x. Mix the tincture with four pounds of the sugar in coarse powder; and expose it in a shallow dish to a gentle heat until the alcohol has evaporated. Add the rest of the sugar, and then the water in a covered vessel; heat gradually until the sugar is dissolved, and strain. *Ph. U. S.*) To the strained liquor add the sugar, and form a syrup.

N. B. The Parisian Codex contained a few other compound syrups besides those enumerated; amongst these is a *Syrup of calf's lungs, Syrupus e pulmon'ibus vituli'nis,* (F.) *Syrop de mou de veau,* as an expectorant.

These syrups are made according to the usual rule, and possess the virtues of the substances after which they are named.

SYSPA'SIA, from συσπαω, (συν, and σπαω, 'I draw,') 'I contract.' Clonic spasm, with diminished sensibility and inability of utterance. A genus in Good's Nosology, which includes convulsion, epilepsy, and hysteria.

Syspasia Convulsio, Convulsion — s. Epilepsia, Epilepsy — s. Hysteria, Hysteria.

SYSSARCO'SIS, from συν, 'with,' and σαρξ, 'flesh.' *Commissu'ra ossium car'nea, Symph'ysis ossium muscula'ris, Connex'io ossium corno'sa, Carna'tio, Concarna'tio.* Union of bones by means of muscles; such as the union of the os hyoides with the lower jaw, of the scapula with the ribs, &c.

SYSTALCIS, Systole.

SYSTAL'TIC, *Systal'ticus, Peristal'tic;* from συστελλω, (συν, and στελλω,) 'I contract.' A *systaltic motion* in a part is one in which there is alternate contraction and dilatation. See Systole.

SYSTAT'ICA, from συνιστημι, (συν, and ιστημι, 'I place,') 'I associate.' Diseases affecting several or all of the sensorial powers simultaneously; irritation or inertness of mind, extending to the muscles, or external senses; or of the muscles, or external senses, extending to the mind; — the 4th order, class *Neurotica,* of Good.

SYSTEM, *Syste'ma,* from συν, 'together,' and ιστημι, 'I place.' This word, taken in a good sense, means the collection and arrangement of different matters having an analogy to each other, or working towards the same end. In natural history, it means a methodical arrangement of beings for the purpose of facilitating their study. System is, however, sometimes used in an unfavourable sense in physical science, and often means, — a purely gratuitous supposition, by which the march of nature is attempted to be universally explained, and to which every thing is made to bend. In anatomy, system is an assemblage of organs, composed of the same tissues, and intended for similar functions; for instance, the *nervous system, muscular system,* &c.

SYS'TEMATISM. A method, according to which every fact of a science is collected around an opinion, true or false. One who reduces things to such a method is called a *Sys'tematist.*

SYS'TEMATIST, see Systematism.

SYSTEMATOL'OGY, *Systematolog''ia,* from συστημα, 'system,' and λογος, 'a discourse.' The doctrine or a treatise of systems.

*SYSTÈME VASCULAIRE À SANG NOIR,* see Vascular — *s. Vasculaire à sang rouge,* see Vascular.

SYSTEMIC. Belonging to the general system — as '*systemic* circulation' in contradistinction to the '*pulmonic.*'

SYS'TOLE. Same etymon as Systaltic; *Systal'sis, Constric'tio, Contrac'tio* seu *Angusta'tio* seu *Submissio* seu *Mica'tio cordis.* The movement of constriction or contraction of the heart, to give impulse to the blood, or to cause its progression. It is opposed to the *Diastole* of the organ.

SYS'TOLIC, *Systol'icus;* same etymon. Relating to the systole of the heart, — as 'systolic murmur.'

SYZYGIUM NERVORUM, Par nervorum.

# T.

T Bandage, *T. fas'cia, Fas'cia T. formis* seu *Heliodo'ri, Cru'cial Bandage.* A bandage shaped like the letter T. It consists of a strip of linen, of variable length and breadth, the middle of which is attached, at right angles, to the extremity of another strip, also of variable length and breadth. When two such strips are attached, at a distance from each other, the bandage is called a *double T.* This bandage is used, principally, for supporting the dressings after the operation for fistula in ano, in diseases of the perinæum, groin, anus, &c.

T Fascia, T Bandage.

*TABAC,* Nicotiana tabacum—*t. des Savoyards,* Arnica montana—*t. des Vosges,* Arnica montana.

TABACUM, Nicotiana tabacum.

*TABARZET,* Saccharum album.

TAB'ASHEER, *Tabaschir, Tabaxir.* A substance found in the knots of the bamboo, in the East Indies, as a consequence of a morbid condition of the part. It is distinguished for its great proportion of silicic acid, in combination with a small quantity of mineral and vegetable matters; as well as for its slight refractive property. It has been used in obstruction of the bowels. The sweet juice of the bamboo stalks has also been called *Tabasheer.*

TABEFACTION, Emaciation.

TABEFY, Emaciate.

TABEL'LA, *Tab'ula, Tabula'tum, Lozan'ga, Lozan'gia, Mor'sulus, Morsel'lus, a lozenge; Tessel'la,* (F.) *Tablette,* 'a small table.' A solid medicine, composed of a powder, sugar, and mucilage; and generally shaped like a disk. See Pastil, and Troch.

Tabella, Table.

TABELLÆ ABSORBENTES, T. de Magnesiâ.

Tabellæ Ac''idi Oxal'ici, *T. ad sitem, Lozenges of Oxalic Acid.* (*Acid. oxalic.* ʒj, *sacch. alb.* ʒss, *ol. limonis,* gtt. xviij vel gtt. xij. Make into lozenges with *mucilage of gum tragacanth. Ph. P.*) Lozenges are made in the same way with the citric and tartaric acids. They are refrigerant.

Tabellæ de Althæ'â, *Lozenges of Marshmallows.* (*Rad. althææ,* pulv., ʒiss, *sacchar. alb.* pulv. ʒivss; f. massa. *Ph. P.*) Demulcent; expectorant.

Tabellæ Antimonia'les Kuncke'lii, *Tabellæ de stib'ii sulphure'to, Lozenges of Sulph'uret of Ant'imony, Mor'suli antimonia'les, M. stibii, M. stibia'ti, Trochis'ci stibiati.* (*Amygdal. dulc.* ʒj, *sacch.* ℔ss, *sem. cardam., cinnam. pulv., sulph. antim. præpar.,* āā ʒj; fiant tabellæ. *Ph. P.* Each to weigh 10 grains.) Recommended in cutaneous diseases, blennorrhagia, arthritic pains, &c. Dose, 4 or more.

Tabellæ ad Ardorem Ventriculi, Trochisci carbonatis calcis — t. Cardialgicæ, Trochisci carbonatis calcis.

Tabellæ de Cat'echu et Magne'siâ, *Lozenges of Catechu and Magnesia,* (F.) *Tablettes de cachou et de magnésie.* (*P. catech.* ʒvj, *p. magnes.* ʒiv, *p. cinnam.* ʒiij, *sacch. alb.* ℔ss, *g. tragac.* gr. xij, *aq. cinnam.* q. s. ut f. massa. *Ph. P.* Each to weigh 12 gr.) Antacid, absorbent, and stomachic. Dose, 5 to 10 lozenges.

Tabellæ Cincho'næ, *T. de kinâ kinâ, Bark Lozenges.* (*Ext. cinchon.* sicc. ʒss, *sacch.* ʒiv, *cinnam.* ʒss, *mucilag. g. trag.* q. s. ut f. massa. *Ph. P.*) Tonic.

Tabellæ de Citro et Diacarthamo, T. de Scammonio et Sennâ.

Tabellæ de Ferro, *Steel lozenges, Tabulæ martia'les, T. instauran'tes, T. antichlorot'icæ.* (*Ferri limat. porphyriz.* ʒss, *p. cinnam.* ʒj, *p. sacch.* ʒv, *g. trag.* et *aq. cinnam.* q. s., ut fiat massa. Each lozenge to weigh 12 gr. *Ph. P.*) Tonic, stomachic. Dose, v to x.

*Aromatic lozenges of steel.* These consist of *sulphate of iron,* with a small proportion of the *Tincture of Cantharides.*

Tabellæ de Kinâ Kinâ, T. cinchonæ.

Tabellæ de Magnesiâ, *T. absorben'tes, Magnesia lozenges.* (*Magnes.* ʒj, *sacchar. alb.* ʒiv, *mucil. g. tragac.* q. s. *Ph. P.*) Absorbent and antacid.

Tabellæ de Rheo, *Rhubarb lozenges.* (*P. rhej* ʒss, *sacch.* ʒv, *mucilag. gum. tragac.* q. s.; f. massa. Each to contain 12 grains. *Ph. P.*) Stomachic and laxative.

Tabellæ de Scammo'nio et Sennâ Compos'itæ, *Compound lozenges of scammony and senna, T. de citro et diacar'thamo.* (*Scammon.* ʒiij, *Sennæ* ʒivss, *rhej.* ʒiss, *caryoph.* ʒj, *corticis limon. confect.* ʒj, *sacch.* ʒvj; f. massa. *Ph. P.*) Purgative. Dose, ʒij to ʒvj, or more.

Tabellæ ad Sitem, T. acidi oxalici — t. ad Sodam, Trochisci carbonatis calcis — t. de Stibii sulphureto, T. antimoniales Kunckelii.

Tabellæ de Sul'phure Sim'plices, *Simple sulphur lozenges.* (*Sulphur lot.* ʒss, *sacch.* ʒiv, *muc. g. tragac.* cum aquâ rosâ præpar. q. s. *Ph. P.*) Expectorant, demulcent, &c. Used in diseases of the chest, and in cutaneous affections. Dose, a lozenge.

Tabellæ de Sulph'uré Compos'itæ, *Compound sulphur lozenges.* (*Sulph. lot.* ʒij, *acid. benzoic.* gr. xij, *rad. irid. p.* ʒss, *ol. anisi,* gtt. viij, *sacch.* ʒvss, *g. trag.* q. s. *Ph. P.*) Aperient, expectorant, and stimulant. (?) Dose, 4 a day.

TABERNA MEDICA, Pharma copolium.

TABES, *Maras'mus Tabes, Tabum, Tab'idness,* from *tabere,* 'to consume;' *Te'kedon, Atroph'ia, Decline.* Emaciation of the whole body, with general languor, hectic fever, and, for the most part, depressed spirits.

Tabes, Atrophy, Phthisis — t. Coxaria, Ischiophthisis — t. Diabetica, Diabetes mellitus — t. Diuretica, Diabetes mellitus.

Tabes Dorsa'lis, *T. Dorsua'lis, Maras'mus tabes dorsa'lis, Phthisis no'tias* seu *dorsa'lis* seu *sicca, Myelophthi'sis, Myelatroph'ia, Tabes ossis sacri.* By this term is meant a wasting of the body, attended at first with a pain in the back or loins, and afterwards in the neck or head, — caused, it has been conceived, by too early or too frequent addiction to venery.

Tabes Glandularis, T. mesenterica, Scrofula — t. Ischiadica, Ischiophthisis — t. Lactea, Atrophia lactantium, see Galactia.

Tabes Mesenter'ica, *Atroph'ia mesenter'ica, Atroph'ia Infant'um, A. glandula'ris, A. infanti'lis, A. dorsi, Parabys'ma mesenter'icum, Ma'cies Infan'tum, Pædatroph'ia, Tabes glandula'ris, T. Scrofulo'sa, Scrof'ula mesenterica, Rachial'gia mesenterica, Myelophthi'sis sicca, Febris hec'tica infan'tum, Phthisis mesara'ica, Physco'nia mesenterica, Mesenteri'tis, Mesenter'ic Disease,* (F.) *Carreau, Chartre, Scrofules* ou *Écrouelles mésentériques, Étisie mésentérique, Rachialgie mésentérique, Atrophie mésentérique, Physconic mésentérique, Entéro-mésentérite, Tubercles des ganglions mésentériques, Phthisie mésentérique.* An en-

gorgement and tubercular degeneration of the mesenteric glands, followed by emaciation and general disorder of the nutritive functions. The disease is often owing to inflammation or irritation of the lining membrane of the intestines, giving occasion to enlargement of the glands of the mesentery, — as injury to the upper or lower extremities causes inflammation, and enlargement of the lymphatic glands of the axilla and groin. It occurs, particularly, in children of a scrofulous diathesis; and in those who are weaned too early, or fed on indigestible substances. Diarrhœa, emaciation, anorexia, or immoderate appetite; hardness and swelling of the abdomen; and, towards the end, hectic fever, are the chief symptoms of this affection; the prognosis of which is usually unfavourable. On opening the bodies of those who die of the disease, the mesenteric glands are found disorganized, tubercular, or in a more or less advanced state of suppuration. The treatment is the same as in scrophulosis. Frictions may be added over the abdomen and spine; and mercury, in small doses, so as to excite a new action in the system. The food must be easy of digestion, and the bowels be kept soluble.

Tabes Nutricum, Atrophia lactantium, see Galactia — t. Ossis sacri, Tabes dorsalis—t. Pectorea, Rachitis—t. Pulmonalis, Phthisis pulmonalis—t. Scrofulosa, T. mesenterica—t. Senum, Marasmus senilis.

TABESCERE, Emaciate.

TABID, *Tab'idus*, (F.) *Tabide*. Same etymon as Tabes. Relating or appertaining to tabes. Wasted by disease.

TABIDNESS, Tabes.

TABLE, *Tab'ula, Tabell'a, Tabula'tum, Lam'ina, Paries, Squama*. A name given to the plates of compact tissue, which form the bones of the cranium. Of these, one is external; the other *internal*, and called *Tab'ula vi'trea*, on account of its brittleness.

*TABLES DE MORTALITÉ*, Mortality, bills of.

TABLET, Trochiscus.

*TABLETTE*, Tabella.

*TABLETTES DE CACHOU ET DE MAGNÉSIE*, Tabellæ de catechu et magnesiâ.

*TABLIER*, Ventrale cutaneum.

*TABOURET*, Thlaspi bursa.

TABULA, Tabella, Table.

Tabulæ Antichloroticæ, Tabellæ de ferro — t. Instaurantes, Tabellæ de ferro — t. Martiales, Tabellæ de ferro.

TABULATUM, Tabella, Table.

TABUM, Ichor, Sanies, Tabes.

*TAC*, Influenza.

TACAMAHACA, Fagara octandra — t. Caragna, Caranna.

*TACHE*, Macula.

*TACHE EMBRYONNAIRE*, 'Embryonic spot;' *Cu'mulus, Ger'minal cu'mulus, Cu'mulus germinati'vus* seu *prolig'erus, A'rea germinati'va, Nu'cleus cicatric'ulæ* seu *blastoderm'atis*. A name given by M. Coste to a spot seen on the blastoderma about the end of the first week, from which the development of the embryo proceeds.

According to Bischoff, the blastodermic vesicle consists here of a double layer — the upper one the *serous* or *animal*; the lower, the *mucous* or *vegetative*; and between these is afterwards formed the *vascular layer*.

*TACHE GERMINATIVE*, see Molecule — t. de Naissance, Nævus.

TACHENCAUSIS, Combustion, human.

*TACHES HÉPATIQUES*, Chloasma.

*TACHES LAITEUSES*, *Plaques laiteuses*, 'milky spots or patches.' White spots occasionally seen on the heart, and regarded by many pathologists as the results of previous pericarditis.

*TACHES DE ROUSSURE*, Ephelides — t. *Rouges*, Spots, Red.

TACHYIA'TER, *Tachyiatrus*. Same etymon as the next. One who cures speedily.

TACHYIATRI'A, from ταχυς, 'quick,' and ιατρεια, 'healing.' The art of curing quickly.

TACH'YTOMY, *Tachytom'ia*, from ταχυς, 'quick,' and τομη, 'incision.' The art of cutting or operating rapidly.

TACITUR'NITY, *Tacitur'nitas, Sigē*, 'silence, from *tacere*, 'to be silent.' 'State of a person who does not speak.' Morbid taciturnity sometimes exists as a symptom of the neuroses, especially of melancholy.

TACT, *Tactus*, from *tangere, tactum*, 'to touch.' A modification of the sense of touch. Passive judgment by the cutaneous nerves regarding bodies exterior to the skin. Tact is passive: Touch, active.

TACTILE, *Tac'tilis*; same etymon. Relating or appertaining to touch.

TACTION, Touch.

TACTUS, Tact, Touch—t. Dolorificus, Haptodysphoria.

TÆDA, *Dæs, δαις*. A term used for a medicine employed under the form of fumigation, pessary, or troch.

TÆ'NIA, *Te'nia, Fas'cia*, from ταινια, 'a fillet, a riband.' See Bandage. Also a genus of intestinal worms, characterized by an elongated, flattened, and articulated body, with four suctorial oscula on the head. Of this genus, two only inhabit the human body—the *Tænia lata*, (see Bothriocephalus latus,) and *Tænia solium*.

Tænia Acephala, Bothriocephalus latus—*t. à Anneaux courts*, Bothriocephalus latus—*t. à Anneaux longs*, Tænia solium — t. Articulos demittens, Tænia solium—t. Cucurbitina, Tænia solium — t. Dentata, Bothriocephalus latus — t. Grisea, Bothriocephalus latus — t. Hippocampi, Corpora fimbriata—t. Humana armata, Tænia solium — t. Humana inermis, Bothriocephalus latus — t. Hydatigena, Hydatid — t. Lata, Bothriocephalus latus—*t. à Longues articulations*, Tænia solium—t. Membranacea, Bothriocephalus latus — t. Nervosa Halleri, Ganglion of Gasser — *t. Non armé*, Bothriocephalus latus — t. Osculis lateralibus geminis, Bothriocephalus latus—t. Osculis lateralibus solitariis, Bothriocephalus latus — t. Osculis marginalibus solitariis, Tænia solium—t. Osculis superficialibus, Bothriocephalus latus—t. Prima, Bothriocephalus latus — *t. Sans épine*, Tænia solium—t. Secunda, Tænia solium.

Tænia Semicircula'ris, *T. striata, Gem'inum centrum semicircula'rē, Limbus poste'rior cor'poris stria'ti, Striæ cor'neæ* seu *semiluna'res* seu *termina'les, Frænulum novum, Fascia semicircula'ris*, (F.) *Bandelette des éminences pyrifomes* (Ch.), *Bandelette, B. demicirculaire, Lame cornée*. A medullary, grayish, semitransparent layer, situate in the groove that separates the thalamus opticus from the corpus striatum in the lateral ventricle.

Tænia So'lium, *T. os'culis margina'libus solita'riis, Tænia cucurbiti'na, Tænia huma'na arma'ta, Hal'ysis solium, Vermis cucurbiti'nus, Lumbri'cus latus, Ténia sans épine, Tænia articulos demit'tens, So'lium, T. secunda, Ténia à longues articulations, Ténia à anneaux longs, Ver solitaire, V. cucurbitain, Long Tape Worm*, has an almost hemispherical, discrete head; an obtuse beak; the neck full anteriorly; all the joints slightly obtuse, the anterior very short; the next almost square, and the rest oblong; the marginal

foramina vaguely alternated. The tænia solium is commonly a few feet long: sometimes its length is enormous. It is said to have been met with 600 feet long. It principally inhabits the small intestines, and is not common. The oil of turpentine, in some form, largely exhibited, is perhaps the best remedy.

TÆNIA STRIATA, T. semicircularis — t. Tarini, Lamina cornea—t. Tenella, Bothriocephalus latus —t. Vulgaris, Bothriocephalus latus.

TÆNIÆ COLI, see Colon.

TÆ'NIAFUGE, *Tæniaf'ugum*, from *tænia*, and *fugo*, 'I drive off.' A remedy calculated to expel tænia.

TÆNIOLA, *Bandelette*. Used by Gerber for a simple, band-like, or flat fibre, *Filum tæniaformē*, seen under the microscope.

*TAFFETAS AGGLUTINATIF*, Sparadrapum adhæsivum — *t. d'Angleterre*, see Sparadrapum adhæsivum — *t. Épispastique*, Sparadrapum vesicatorium — *t. Gommé*, see Sparadrapum adhæsivum — *t. Vésicant*, Sparadrapum vesicatorium.

TAFIA, Rum.

*TAILLADE*, Incision, see *Entaille*.

*TAILLE*, Lithotomy — *t. Hypogastrique*, Hypogastric operation of lithotomy, see Lithotomy —*t. Par le rectum*, see Lithotomy—*t. Postérieure*, see Lithotomy — *t. Recto-vésicale*, see Lithotomy — *t. Sus-pubiénne*, see Lithotomy.

TAKAMAHAKA, Fagara octandra.

TAL. A word formerly employed for alkali. It also meant the dung of the peacock.

TALC EARTH, Magnesia.

TALCUM NEPHRITICUM, Nephreticus lapis.

TALEN'TUM, *ταλαντον*. An ancient weight equal to 54 pounds, 2 oz., 5 dr., and 24 grains *Poids de Marc*. See Weights and Measures.

TALEOLUS, Malleolus.

TALIACOTIAN OPERATION, Rhinoplastic.

TALINUM UMBELLATUM, see *Mistura*.

TALIPES, Kyllosis (Clubfoot) — t. Equinus, see Kyllosis — t. Valgus, see Kyllosis — t. Varus, see Kyllosis.

*TALON*, see Calcaneum.

TALPA, 'a mole.' *Topina'ria*, *Tupina'ria*, *Talpa'ria*, *Testu'do*, (F.) *Taupe*. A tumour situate on the head, which has been supposed to burrow like a mole.

TALPARIA, Talpa.

TALUS. Astragalus, Malleolus, see Calcaneum.

TAMARA CONGA, Averrhoa carambola.

TAMARÆA ZECLA, Tamarindus.

*TAMARIN*, Tamarindus.

TAMARIN'DI PULPA, *Pulp of tamarinds*, (*Tamarinds*, q. s. Digest them with a small quantity of water, until they become of a uniform consistence; then separate the seeds and filaments, by pressing through a hair-sieve. Ph. U. S.)

TAMARINDS, PULP OF, Tamarindi pulpa.

TAMARIN'DUS, *T. In'dica*, *Thamarindus*, *Oxiphœnicon*, *Sil'iqua Arab'ica*, *Balampul'li*, *Tamaræ'a zecla*, *Oxyphœni'cia*, *Aca'cia Indica*, *Tamarind tree*, (F.) *Tamarin*. *Family*, Leguminosæ. *Sex. Syst.* Triandria Digynia. The pulp of the tamarind with the seeds connected by numerous tough strings, is exported from the West Indies, preserved in syrup, — *Tamarindus*, (Ph. U. S.) It is refrigerant and laxative. *Tamarind whey* is made by boiling ℥ij of the pulp with ℔iss of milk. When strained, it is used as a diluent in fever.

TAMARISCUS, Tamarix Gallica.

TAM'ARIX, *T. Gal'lica*, *T. Pentan'dra*, *Tamaris'cus*. The *Tamarisk tree*. *Family*, Portulaceæ. *Sex. Syst.* Pentandria Pentagynia. The bark, wood, and leaves were formerly employed medicinally; — the former for its aperient and corroborant virtues, in obstructions of the liver; the latter in icterus, hæmoptysis, and some cutaneous affections.

*TAMBOUR, CAVITÉ DU*, Tympanum.

TAMPA BAY, see Saint Augustine.

TAMPON, see Plugging.

*TAMPONNEMENT*, Plugging.

TANACE'TUM, *T. vulga're*, *Tana'sia*, *Athana'sia*, *Parthe'nium mas*, *Tansy*, (F.) *Tanaisie vulgaire*. *Family*, Corymbiferæ. *Sex. Syst.* Syngenesia Polygamia. The leaves and flowers of tansy have a peculiar, strong odour, and warm, bitter taste. They are tonic, deobstruent(?), and anthelmintic. Dose, ℥ss to ℥j. The infusion is usually drunk as tea.

TANACE'TUM BALSAMI'TA, *Balsami'ta mas* seu *vulga'ris*, *B. suaveolens*, *B. major*, *Tanacetum horten'sē*, *Costus horto'rum*, *Mentha Roma'na* seu *Saracen'ica*, *Costmary*, *Alecost*, *Cock-mint*, (F.) *Menthe coq*, *Herbe au coq*, *Grand Baume*. A fragrant-smelling herb, somewhat resembling mint, and formerly much esteemed as a corroborant, carminative, and emmenagogue.

TANACETUM HORTENSE, T. balsamita.

TANACE'TUM MULTIFLO'RUM. A South African plant, which is used as a tonic, antispasmodic and anthelmintic. It is given in flatulency, gout, amenorrhœa and dropsy: but is especially prescribed in cases of ascarides lumbricoïdes and other entozoa. It is administered in the form of powder or infusion; the latter acting also, as a diaphoretic and diuretic. It is used likewise as a resolvent and anodyne fomentation.

*TANAISIE VULGAIRE*, Tanacetum.

TANASIA, Tanacetum.

TANGĒ, *ταγγη*, 'rancidity.' A putrescent tumour.

TANINUM, Tanninum.

TANNIC ACID, Tannin.

TANNICUM PURUM, Tannin.

TANNIN, from (F.) *tanner*, 'to tan.' *Tan'nicum purum*, *Tanni'num*, *Tani'num*, *Princip'ium adstringens* seu *Scytodep'sicum* seu *Byrsodep'sicum* seu *Coria'ceum*, *Scytodep'sium*, *Acidum Tan'nicum*, *A. Quercitan'nicum*, *Tannic acid*, (F.) *Acide tannique*. A principle obtained from oak bark and other astringent vegetables, so called from its forming the principal agent in the process of *tanning*. Pure tannin, obtained from galls, by the action of ether, (see Ph. U. S.) has been employed as an excellent and powerful astringent. Dose, two grains repeated several times a day.

TANSY, Tanacetum — t. Wild, Potentilla anserina.

TAPER, HIGH, Verbascum nigrum.

TAPE'TUM, *Ta'pestry*, *Tape'tum choroïdeæ*. A shining spot, on the outside of the optic nerve, in the eyes of certain animals, which is owing to the absence of the pigmentum nigrum, occasioning the reflection of a portion of the rays from the membrana Ruyschiana. Its use appears to be, by reflecting the rays, to cause a double impression on the retina, and thus add to the intensity of vision.

TAPETUM, see Corpus Callosum.

TAPETUM ALVE'OLI, *Membra'na exter'na den'tium*. The outer membrane of the teeth. The lining membrane or periosteum of the alveoli.

TAPEWORM, BROAD, Bothriocephalus latus — t. Long, Tænia solium.

TAPIOCA, see Jatropha manihot — t. Pearl, see Jatropha manihot.

TAPSUS BARBATUS, Verbascum nigrum.

TAPSARIA, Decoctum hordei.

TAR, see Pinus sylvestris — t. Barbadoes, Petroleum — t. Mineral, Pissasphaltum.

TAR'ACHĒ, *Tarax'is, Tarag'ma, Tarag'mus,* 'disorder.' A disorder of sight, which arises from a blow, compression of the eye, or the action of dust, smoke or other external cause. By some, it is understood to signify mild or incipient ophthalmia.

Ταραχη της κοιλιας, 'disturbance of the belly.' Diarrhœa.

TARAGMA, Tarache.

TARAGMUS, Tarache.

TARAGON, Artemisia dracunculus.

TARANTALISMUS, Tarantismus.

TARANTISM'US, *Tarentis'mus, Tarantalis'mus, Dinoma'nia, Chore'a Sancti Valenti'ni, Taren'tulism, Tar'antism.* A feigned or imaginary disease in Apulia, characterized by excessive avidity for dancing at the sound of instruments, and which was ascribed, by the vulgar, to the bite of the tarantula. A sort of tarantismus, considered peculiar to Africa, and believed to be spontaneous, has been called *Tarentismus Tangita'nus, Janon-tarentisme.*

TARAN'TULA, from Tarentum or Tarento, a town of Italy where it abounds; *Taren'tula,* (F.) *Tarentule.* A species of spider—the *Ara'nea Tarentula* of Linnæus, *Lyco'sa Tarentula* of Latreille, whose bite has been looked upon as dangerous. Music has been thought to cure it.

TARASCON, MINERAL WATERS OF. Chalybeate springs in the department of Arriège, France. They contain iron and carbonic acid.

TARAXACUM, Leontodon taraxacum — t. Dens leonis, Leontodon taraxacum.

TARAXIS, Tarache, see Ophthalmia.

TARCHON SYLVESTRIS, Achillea ptarmica.

TARENTISMUS, Tarantismus — t. Tangitanus, Tarantismus.

TARENTULA, Tarantula.

TARENTULISM, Tarantismus.

TARGAR, Juniperus communis.

TARI. Palm or cocoa wine, from which sugar was obtained, called *Jagre.* It was once used as a tonic.

TARI'NI PONS, *Interpedun'cular space, Posterior perforated space, Locus perfora'tus posti'cus.* A cineritious substance, between the corpora albicantia, which assists in forming the bottom of the third ventricle.

TARO, Arum esculentum.

*TARQUETTE,* Horniaria glabra.

TARSAL, *Tar'seus.* That which relates to the tarsus.

Tarsal Articulations result from the union of the bones of the tarsus with each other.

TAR'SEA LATA (LIGAMENTA). Three ligaments, described by Winslow as stretching from the edge of the orbit to that of the tarsi, with which, he thought, they formed a complete layer of the eyelids. Zinn could not trace the ligaments all the way to the tarsi; whilst Haller doubted altogether their ligamentous texture, and Zeis regards them as merely areolar substance.

TARSEUS, Tarsal.

TARSO-METATARSAL, *Tarso-metatar'seus.* That which relates to tarsus and metatarsus.

Tarso-Metatarsal Articulations are those between the bones of the second row of the tarsus and the metatarsal bones. The term *Tarso-metatarsal* is likewise applied to ligaments connected with these joints, some of which are *dorsal,* and others *plantar.*

*TARSO-MÉTATARSI-PHALANGIEN DU POUCE,* Adductor pollicis pedis—*t. Phalangien du pouce,* Flexor brevis pollicis pedis — *t. Sous-phalangien du petit orteil,* Flexor brevis minimi digiti pedis—*t. Sous-phalangettien du premier orteil,* Flexor brevis pollicis pedis.

TARSOPHY'MA, from *Tarsus,* and φυμα, 'a tumour.' A swelling of the tarsus.

TARSOR'RHAPHY, *Tarsorraph'ia,* from *tarsus,* 'the tarsal cartilage,' and ραφη, 'suture.' An operation for diminishing the size of the opening between the eyelids, when it is enlarged by surrounding cicatrices.

TARSOT'OMY, *Tarsotom'ia,* from *tarsus,* and τομη, 'incision.' The section or removal of the tarsal cartilages.

TARSUS, *Planta prima pedis, Rasse'ta* seu *Rasce'ta pedis, Pe'dium, Cavie'ulæ pedis nodus.* 1. The posterior part of the foot. The tarsus consists of 7 bones, arranged transversely in two rows, between which amputation is sometimes performed. The *first* or *Tibial row,* (F.) *Première rangée, R. jambière,* consists of the astragalus and os calcis; the *second* or *metatarsal,* (F.) *seconde rangée, R. métatarsienne,* of the scaphoides, cuboides, and three ossa cuneiformia. 2. The *Tarsi,* Tarsal cartilages, *Tarsal fibro-cartilages, Orchoi, Crepid'ines* seu *Coro'næ* seu *Chelæ* seu *Un'gulæ Palpebra'rum, Tharsi,* are two small cartilaginous layers, seated in the substance of the free edge of each cyelid. The upper is larger and broader than the lower. Both commence at the bifurcated extremity of the tendon of the orbicularis palpebrarum, and pass to the opposite commissure of the eyelids. They are broader in the middle than at their extremities.

TARTAR, Antimonium tartarizatum (improperly), Potassæ supertartras impurus — t. Calcareous, Potassæ subcarbonas — t. Crystals of, Potassæ supertartras — t. Emetic, Antimonium tartarizatum — t. Soluble, Potassæ tartras, see Potash.

TARTA'REI MORBI. A term employed by Paracelsus to designate certain diseases which he attributed to tartar.

TARTARI CRYSTALLI, Potassæ supertartras.

TARTAR'IC ACID, *Ac''idum tartar'icum, A. tartaro'sum, Acor tartar'icus, Acidum tar'tari essentia'lē, Tarta'reous acid, Sal tartari essentialē.* (*Potassæ bitart.* ℔iiss, *aq. destillat. ferv.,* cong. iij, *cretæ ppt.* ℔j, *acidi sulph.* ℔j. Boil the bitartrate with two gallons of the water, and gradually add the prepared chalk, until no more bubbles appear; let the tartrate of lime subside; then pour off the fluid and wash the tartrate of lime with distilled water, until it is tasteless. Pour upon it the sulphuric acid, diluted with a gallon of boiling distilled water; and set the mixture aside for 24 hours, occasionally stirring it. Filter and evaporate to crystallize. *Ph. L.*) It is refrigerant and antiseptic, but is chiefly used for making effervescent draughts with soda.

TARTARUM, Potassæ supertartras impurus—t. Vitriolatum, Potassæ sulphas.

TARTARUS AMMONIÆ, Ammoniæ tartras — t. Chalybeatus, Ferrum tartarizatum — t. Crudus, Potassæ supertartras impurus — t. Dentium, Odontolithos — t. Emeticus, Antimonium tartarizatum—t. Kalicoferricus, Ferrum tartarizatum—t. Kalinus, Potassæ tartras—t. Lixiviæ, Potassæ tartras — t. Martialis, Ferrum tartarizatum — t. Potassæ ferruginosus, Ferrum tartarizatum — t. Subpotassicus, Potassæ supertartras—t. Superpotassicus, Potassæ supertartras — t. Tartarizatus, Potassæ tartras.

*TARTRATE D'AMMONIAQUE,* Ammoniæ tartras.

*TARTRE BRUT,* Potassæ supertartras impurus—*t. Cru,* Potassæ supertartras impurus—*t. des Dents,* Odontolithos — *t. Émétique,* Antimonium

tartarizatum — *t. Stibié*, Antimonium tartarizatum.

TARTRUM SOLUBILE, Potassæ tartras.

TASIS, Extension, Tension.

TASTE, *Gustus, Geusis, Geuma, Geuthmos*, (F.) *Goût*. One of the five external senses, which instructs us of the savours of bodies, and of which the tongue is the principal organ.

*Gustation, Gustatio*, is the exercise of this faculty. In disease, the taste frequently becomes variously vitiated. The nerves of taste are probably the lingual branch of the fifth pair and the glosso-pharyngeal.

TASTE, Savour.

*TAUPE*, Talpa.

TAUROCOL'LA, from ταυρος, 'a bull,' and κολλα, 'glue.' Glue made of the ears and genitals of the bull. It was formerly much esteemed.

TAURUS, Penis, Perineum.

TAXIS, 'arrangement;' from τασσω, 'I order,' 'I arrange;' *Reposit''io, Reduc'tio, Syntax'is*. A methodical pressure exerted by the hand on a hernial tumour, for the purpose of reducing it. This operation is generally easy in herniæ that are free from adhesions, of small size, and with a large opening into the sac; but it is very difficult and frequently impracticable in those that are adherent or strangulated. To perform the taxis, the patient should be put in the horizontal posture, and in one in which the parietes of the abdomen are relaxed. The manual procedure varies in each species of hernia. In all cases, too strong pressure of the parts must be avoided; as inflammation and gangrene might be induced. The displaced organs must be pushed into the abdomen, according to the direction of the axis of the hernial sac. The reduction is sometimes favoured by blood-letting *ad deliquium;* the warm bath; warm fomentations; tobacco; emollient glysters; and, at times, by cold applications, as ice, &c. In a case of strangulated hernia, should the taxis fail, an operation becomes necessary.

TAXUS BACCA'TA. The *Yew tree, Smilax, Smilas, Thym'alos*, (F.) *If. Family*, Coniferæ. *Sex. Syst.* Dicœcia Monadelphia. The ancients believed the yew to be poisonous; but the fruit may be eaten without inconvenience. The leaves have been often recommended in epilepsy. The resin, obtained from the bark, has been called *albir*.

*TAYE*, Caligo.

TAYLOR'S REMEDY FOR DEAFNESS, see Allium.

TEA, Thea — t. Apple, see Apple tea — t. Bahama, Lantana camara — t. Beef, see Beef tea — t. Berried, Gaultheria — t. Berry, Gaultheria—t. Blaukenheim, see Galeopsis grandiflora — t. Brazil, Lantana pseudothea—t. Bushman's, Methyscophyllum glaucum — t. Caffre, Helichrysum nudifolium — t. Chicken, see Chicken tea — t. Flaxseed, Infusum Lini compositum—t. Ginger, Infusum Zingiberis — t. Hottentots', Helichrysum serpyllifolium — t. Labrador, Ledum latifolium—t. Lemon-peel, see Citrus medica — t. Marsh, Ledum palustre — t. Mexico, Chenopodium ambrosioides—t. Mountain, Gaultheria — t. Mutton, see Mutton tea—t. New Jersey, Celastrus—t. Oswego, Monarda coccinea—t. Redberry, Gaultheria — t. Slippery elm, Infusum Lini compositum—t. Soot, see Fuligokali—t. South sea, Ilex vomitoria — t. Spanish, Chenopodium ambrosioides — t. Veal, see Veal tea.

TEAR, Sax. ċeaɼ, *Lac'ryma, Lach'ryma, Lac'rima, Lac'ruma, Dacry, Dac'ryma, Dac'ryon, Humor lacryma'lis, Eyedrop*, (F.) *Larme*. An excrementitious humour, secreted by the lachrymal gland, and poured between the globe of the eye, and the eyelids, to facilitate the motions of those parts. The tears are saline, inodorous, and colourless. They turn the syrup of violets green; and contain chloride of sodium, with excess of base, phosphates of lime and soda, and albumen.

TEARS, DEERS', Bezoar of the deer.

TEASEL, CULTIVATED, Dipsacus sylvestris.

TEAT, Nipple.

TEAZEL, Eupatorium perfoliatum.

TECEDON, Phthisis.

TECNOCTONIA, Infanticide.

TECOLITHOS, Judæus (lapis.)

TECO'MA RADI'CANS, *Bigno'nia radi'cans, Trumpet flower, Trumpet creeper, Virgin'ia creeper*. Indigenous; the orange and scarlet flowers appearing in July. *Order*, Bignoniaceæ. The leaves are acrid.

TECTARIA CALAHUALA, see Calagualæ radix—t. Ferruginea, see Calagualæ radix.

TEETH, see Tooth — t. Eye, Canine teeth—t. Jaw, Molar teeth—t. Milk, see Dentition—t. Neck of the, Collum dentium — t. Vitreous substance of the, Enamel of the teeth.

TEETHING, Dentition.

TEGIMEN, Integument.

TEGMEN, Integument.

TEGULA HIBERNICA, Hibernicus lapis.

TEGUMEN, Integument.

*TÉGUMENT*, Integument.

TEGUMEN'TARY. Relating or appertaining to the integument.

TEGUMEN'TUM, Integument — t. Auris, see Tympanum — t. Ventriculorum cerebri, Centre, oval, of the brain.

*TEIGNE*, Pityriasis, Porrigo, Porrigo lupinosa — *t. Annulaire*, Porrigo scutulata—*t. en Anneau*, Porrigo scutulata — *t. Faveuse*, Porrigo favosa — *t. Furfuracée*, Porrigo furfurans—*t. Nummulaire*, Porrigo scutulata.

TEINESMOS, Tenesmus.

TEINODYN'IA; from τεινειν, 'to extend,' and οδυνη, 'pain.' Pain of the sinews or tendons.

TEINOPHLOGO'SIS; from τεινειν, 'to extend,' and φλογωσις, 'inflammation.' Inflammation of the sinews or tendons.

*TEINTURE*, Tincture — *t. Éthérée*, Æthereal — *t. Rubéfiante*, Tinctura cantharidis.

TEKEDON, Tabes.

TELA, Texture, Tissue — t. Accidentalis Medullaris, Encephaloid — t. Cellulosa, Cellular tissue — t. Emplastica, Sparadrapum — t. Erectilis, Erectile tissue — t. Galteri, Sparadrapum Galteri — t. Hippocratis cribrosa, Cellular tissue—t. Hymenochondroides, Tissue, cartilaginous — t. Hymenochondrodes, Tissue, cartilaginous — t. Ichthyocollæ glutinans, see Sparadrapum adhæsivum — t. Inodularis, Tissue, inodular — t. Organica, Histos — t. Vesicatoria, Sparadrapum vesicatorium.

TELAMON, Habena.

TELAMO'NES, τελαμωνες, 'bandages.' Charpie, used for wounds; or linen, employed for bandages.

TELANGECTASIS, Telangiectasia.

TELANGIECTA'SIA, *Telangiec'tasis, Telangec'tasis, Angieotelecta'sia, Hæmatotelangio'sis, Hæmotelangio'sis, Angiecta'sia, Anastomo'sis aneurysmat'ica;* from τελος, 'far,' αγγειον, 'vessel,' and εκτασις, 'dilatation.' Dilatation of vessels. Nævus maternus. Aneurism by anastomosis. According to some, fungus hæmatodes. See Hæmatodes fungus.

TELANGIECTASIA OCULI, Cirsophthalmus.

TELEPH'IUM, *Ulcus telephium*. The ancients gave this name to any ulcer of a very bad kind, and difficult to cure, because the wound, which

Achilles inflicted on Telephus, degenerated into a similar ulcer.

Telephium, Sedum telephium.

TELLURISMUS, Magnetism, animal.

TELUM, Penis.

*TEMPE*, Temple.

TEM'PERAMENT, *Temperamen'tum*, *Temperatu'ra*, *Tempera'tio*, *Tempe'ries*; originally from *tempus*, 'time,' the great *temperer*; *Complex'io*, *Crasis*, *Eucra'sia*. A name given to the remarkable differences that exist between individuals, in consequence of the variety of relations and proportions between the constituent parts of the body. Thus, of old, it was supposed that, according to the predominance of any one of the four humours then generally admitted,—blood, lymph, bile, and atrabilis or black bile,—the manifestations of the functions were *tempered* or modified so as to give rise to a *sanguine*, *lymphatic*, *choleric*, or *atrabilious* or *melancholic* predominance or temperament. The idea of the existence of certain of these humours has been banished; yet the influence of some, as of the blood, lymph, and bile, is still admitted by many. Too much influence has, doubtless, been assigned to temperament in the sense in which it was formerly and still is generally understood, although there can be no question that difference of organization occasions a difference in the activity of organs.

Temperament, Bilious, Choleric temperament.

TEM'PERANCE, *Sophros'ynē*, *Nephal'iotes*, *Sobri'etas*, *Sobri'ety*. Moderation, opposed to gluttony and drunkenness. The advantage of temperance, in a hygienic point of view, requires no comment.

*TEMPÉRANTS*, Sedatives.

TEMPERATIO, Temperament.

TEMPERATURA, Temperament.

TEMPERIES, Temperament.

TEMPLE, *Tempus*, *Re'gio Tempora'lis*, *Crotaphus*, (F.) *Tempe*. A depression, on each side of the head, between the forehead and eye anteriorly, and the ear posteriorly. The *temples*, distinguished into *right* and *left*, correspond to the temporal fossa on each side. The word is said to be from the Latin *tempus*, 'time,' because in this part the hair first begins to turn white, and to indicate age.

TEMPORAL, *Tempora'lis*. That which relates to the temples.

Temporal Aponeuro'sis is a very strong aponeurosis, of a bluish, shining colour, which is attached to the whole of the curved line of the temporal bone; to the posterior edge of the malar bone; to the superior margin of the zygomatic arch; and forms an envelope for the temporal muscle.

Temporal Arteries, *Crotaphite Arteries*, are several:—1. The *Temporal Artery*, properly so called, arises from the outer side of the superior part of the external carotid. It ascends between the ramus of the jaw, the meatus auditorius externus, and the parotid gland, which covers it as far as the zygomatic arch. Above this it becomes subcutaneous; and, when it has attained the middle of the temporal region, it divides into two branches; the one anterior—*A. tempora'lis fronta'lis* seu *inter'na* seu *ante'rior*; the other posterior—the *A. temporalis occipita'lis* seu *exter'na* seu *supe'rior*. The temporal artery, before its division, gives off, 1. Branches to the parotid; to the joint of the lower jaw; to the meatus auditorius, and to the masseter. 2. The *transverse artery of the face*. 3. The *middle temporal*, which arises beneath the cheek-bone, and traverses the temporal aponeurosis, immediately beneath that bone. II. The *Deep-seated Tem'porals*. *A. temporales profun'dæ*. These are two in number. They arise from the internal maxillary, and have been distinguished, from their position, into *anterior* and *posterior*. They send their principal divisions to the temporal muscle.

Temporal Bone, *Os tem'poris* seu *tempora'lē* seu *arcua'lē* seu *arma'lē* seu *parieta'lē inferius* seu *crotaphit'icum* seu *memen'to mori* seu *mendo'sum* seu *crot'aphus*, is seated at the lateral and inferior part of the cranium, of which it forms part; and contains, within it, the special organs of audition. It is usually divided into three portions:—1. The *squamous*, *Pars squamo'sa*, *Os lepidoï'des* seu *squamo'sum* seu *squamifor'mē*, (F.) *Portion écailleuse* ou *squameuse*. 2. The *mastoid portion*, and, 3. The *Petrous portion*, *Petrous Proc''ess*, *Pars petro'sa*, *Pyr'amis trigo'na*, *Os lapideum* seu *lapido'sum* seu *saxeum* seu *petro'sum* seu *lithoïdes* seu *durum* seu *præruptæ rupi assimila'tum* seu *nervalē*, *Pars pyramidalis ossis temporis*, (F.) *Portion pierreuse*, *Rocher*, *Os pétreux*, *Apophyse pyramidale*, *A. pétrée*.

It has, *first*, an *auricular* or *external face*, on which is a surface that makes part of the temporal fossa; the *zygomatic process*; the *glenoid cavity*; the *fissure of Glaser*; the *meatus auditorius externus*; the *mastoid process*; the *digastric groove*; the *canalis caroticus*; the *jugular fossa*; the *styloid process*; the *stylo-mastoid foramen*, &c. 2. A *cerebral* or *internal surface*, which corresponds to the cavity of the cranium, and on which is the *Pars petrosa*, the *hiatus Fallopii*, the *meatus auditorius internus*, the *fissure of the aquæductus vestibuli*, *a portion of the gutter for the lateral sinus*, &c. 3. A circumference, on which is observed the orifice of the *bony portion of the Eustachian tube* and the *acquæductus cochleæ*, &c. The temporal bone is articulated with the sphenoid, occipital, parietal, malar, and inferior maxillary bones. It is developed from five points of ossification.

Temporal Fossa is an excavation, observed at each side of the head. It is filled by the muscle whose name it bears, and is formed by the temporal and sphenoid, below; by the parietal and frontal bones, above; is separated, by a transverse crista, from the zygomatic fossa; and completed, before, by the cheek-bone.

Temporal Muscle, *Tempora'lis*, *Crotaphi'tes*, (F.) *Arcadi-temporo maxillaire*, *Temporo-maxillaire* (Ch.), is a broad, flattened, triangular muscle, which fills the temporal fossa. Its fibres are attached to the temporal aponeurosis and fossa; and all converge into a strong tendon, which passes under the zygomatic arch, and is inserted into the coronoid process of the lower jaw. This muscle raises the lower jaw, and applies the teeth against each other.

Temporal Nerves. These are distinguished into the *superficial temporal*, furnished by the inferior maxillary branch of the fifth pair, behind the condyle of the jaw; and the *temporales profundi*,—*anterior* and *posterior*,—furnished by the same nerve, at its exit from the cranium. Sömmering has given the name *temporal* to the divisions sent by the facial nerve to the temporal regions.

Temporal Veins were formerly called *Ætoi* or *Aëtoi Phlebes*, *Aq'uilæ Venæ*.

*TEMPORO-AURICULAIRE*, Attollens aurem.

TEM'PORO-FA'CIAL, *Tem'poro-facia'lis*. Belonging to the temple and face.

Temporo-facial Nerve, *Nervus temporo-facia'lis*. A branch of the facial nerve distributed to the face and temple.

*TEMPORO-MAXILLAIRE*, Temporal muscle.

TEMPORO-MAX'ILLARY, *Tem'poro-maxilla'ris*. That which belongs to the temporal bone and lower jaw.

Temporo-maxillary Articulation or joint of the lower jaw, is seated between the glenoid cavity and transverse process of the temporal bone on the one hand, and the condyle of the lower jaw on the other. Two thin cartilages cover the surfaces of these bones. The one is common to the transverse process and the portion of the glenoid cavity, anterior to the fissure of Glaser; the other belongs to the condyle. This articulation is furnished with an inter-articular fibro-cartilage, two synovial capsules, and two lateral ligaments: — the one internal, and the other external.

Temporo-maxillary Nerves of Bichat are the divisions of the facial nerve, distributed to the temporal and maxillary regions.

TEMPUS, Temple — t. Intercalare, Apyrexia, Intermission.

TEMULENCE, Temulentia.

TEMULEN'TIA, *Ebri'etas, Ebrios'itas, Methys'mus, Tem'ulence, Tem'ulency, Inebria'tion, Intoxica'tion, Drunk'enness:* — from wine, *Œnophlyg''ia, Œnophlyx'is, Vinolen'tia, Vi'nolence*, (F.) *Ivresse*. Plater gave this name to delirium; Ettmuller, to an apoplectic condition, depending upon drunkenness; the *Apoplex'ia Temulen'ta* or dead drunkenness. Commonly, *Temulentia* is used synonymously with drunkenness, *Methē;* and is often employed in the description of diseases to indicate a state resembling drunkenness. *Mania e Timulentiâ* is the same as *Delirium Tremens*.

TENACULA, Bone-nippers — t. Volsella, Forceps (lithotomy).

TENAC'ULUM, from *teneo*, 'I hold.' A kind of fine hook attached to a handle which is thrust through the parietes of a blood vessel to draw it out and enable it to be tied.

Tenaculum, Assalini's. An ingenious instrument, invented by Assalini. It consists of a forceps, or double tenaculum, the points of which are fine, sharp, and bifurcated, so as to be readily received into each other when the instrument is closed on the artery, which it is by a spring. It is of great use when the surgeon has no assistant at hand. The instrument is figured in S. Cooper's "First Lines."

*TENAILLE INCISIVE*, Bone-nippers.

TENASMUS, Tenesmus.

TENDON, *Tendo, Pronerva'tio*, from τεινω, 'I stretch.' *Tenon*, a *Sinew*. A fibrous cord, more or less round, long, or flattened; of a white, pearl colour, and composed of very close parallel fibres. The tendons are attached to the bones, by one extremity; by the other, they receive the insertions of the fleshy fibres: sometimes they afford attachment to fleshy fibres at both ends; — as in the digastric muscle. The tendons must be considered as so many cords, for transmitting the motion of muscles to the bones or levers.

*TENDON D'ACHILLE*, Achillis tendo.

Tendon, Cordiform, of the Diaphragm, Centre, phrenic.

TENDONS, TWITCHING OF THE, Subsultus tendinum.

TENEOTOMIA, Tenotomy.

*TÉNESME*, Tenesmus — *t. de l'Œsophage*, Œsophagismus — *t. Vésical*, Bradysuria.

TENES'MUS, *Teines'mos, Tenas'mus*, from τεινω, 'I stretch.' *Proc'tica Tenesmus, Proctospas'mus, Obstipa'tio Tenesmus, Tinag'mus*, (F.) *Ténesme, Épreintes*. Frequent, vain, and painful desires to go to stool; — one of the chief symptoms of inflammation of the lining membrane of the digestive tube, as of dysentery.

Tenesmus Vesicæ, Bradysuria — t. Vesicæ mucosus, Cystirrhœa.

*TENETTES*, Forceps (craniotomy).

*TÉNIA*, Tænia.

TENNESSEE', MINERAL WATERS OF. On the waters of the French Broad River, in this state, is a large, clear, thermal spring. The heat is so great that, on first going into the water, it is almost insupportable.

TENON, Tendon.

TENONT'AGRA, from τενων, 'tendon,' and αγρα, 'seizure.' A variety of gout, which affects the tendinous parts of muscles, or the tendinous ligaments which strengthen certain articulations.

TENONTOTOMIA, Tenotomy.

TENONTOTRO'TI, from τενων, 'tendon,' and τιτρωσκω, 'I wound.' They who are wounded in the tendons. — Galen.

TENOT'OMY, *Tenotom'ia, Teneotom'ia, Tenontoni'a, Sec'tio* seu *Dissec'tio ten'dinum*, from τενων, 'a tendon,' and τομη, incision.' The operation of dividing a tendon, often practised for the removal of loxarthrus, or deviation of the joints — as in club-foot.

*TENSEUR DE L'APONÉVROSE FÉMORALE*, Fascia lata muscle.

TEN'SION, *Ten'sio, Tensu'ra, Tasis, Diat'asis, Entonia*, (*Enton'ia* is, also, used for overtension,) *Conten'sio, Disten'sio*, from *tendere*, 'to stretch.' State of a part, which is stretched, when its textures are distended by the afflux of fluids, or the accumulation of gas; or when its fibres are drawn, as it were, in an opposite direction, and are, consequently, more resisting than usual.

TENSOR CHOROIDEÆ, Ciliary muscle — t. Palati, Circumflexus musculus.

Tensor Tarsi. A small muscle, belonging to the inner commissure of the eyelids, well described by Professor Horner, of Philadelphia, and hence termed *Muscle of Horner*. It is about three lines broad and six long; arises from the posterior flat surface of the os unguis, near its junction with the ethmoid bone, and passes forwards and outwards, lying on the posterior face of the lachrymal ducts. As it approaches the commissure of the lids, it splits into two nearly equal parts, each of which is appropriated to a duct, and inserted along its course, almost to the punctum lacrymale. Its chief office seems to be, to influence the position of the puncta lacrymale, and to regulate the course of the tears through the lachrymal ducts.

Tensor Tym'pani, *Inter'nus Auris, Internus Mal'lei*, (F.) *Salpingo-malléen*. A small muscle, which arises from the petrous portion of the temporal bone, and the cartilage of the Eustachian tube, and terminates by a tendon, which is reflected over the processus cochleariformis, and is inserted into the apophysis of the handle of the malleus.

Tensor Vaginæ Femoris, Fascia lata muscle.

TENSURA, Tension.

TENSUS, Penis.

TENT, *Tenta, Turun'da*, and its diminutive, *Turun'dula, Penic'ulus, Penicil'lus, Penicil'lum, Motor, Lemnis'cus*, (F.) *Tente, Mèche*, from *tentare*, 'to try or explore.' In surgery, tents are small rolls of lint, of a cylindrical or pyramidal shape, which are introduced into wounds and deep ulcers, to prevent them from closing before they are filled up from the bottom. Tents are sometimes, also, made of prepared sponge, gentian root, &c. They are not so much used as they formerly were.

TENTACULARIA, Filaria hominis bronchialis.

TENTACULUM CEREBELLI, Tentorium.

LENTA'MEN MED'ICUM. 'A medical trial.' An examination in medicine, in the Prussian universities, which is conducted both in writing and *vivâ voce* before the Dean of the Medical Faculty.

*TENTE*, Tent — *t. du Cervelet*, Tentorium.

TENTIGO VENEREA, Nymphomania — t. Veretri, Satyriasis.

TENTIPEL'LUM, from *tendo*, 'I stretch,' and *pellis*, 'the skin.' Ancient name of a cosmetic, with which, it was pretended, wrinkles could be effaced.

TENTO'RIUM, *T. cerebel'lo super-exten'sum, T. cerebelli, Tentac'ulum cerebelli, Septum transverse* (Ch.), *Transverse septum, Septum encepli'ali, Interscp'ta horizonta'lia Pacchio'ni, Proces'sus transver'sus durœ matris, Lateral Processes of the Dura Mater, Diaphrag'ma cer'ebri*, (F.) *Tente du cervelet, Plancher du Cerveau*, from *tendere, tentum*, 'to stretch.' A process of the dura mater, which separates the cerebrum from the cerebellum. It extends from the internal horizontal spine of the occipital bone, directly forwards to the sella Turcica of the sphenoid.

TENTORIUM CEREBELLI, Tentorium.

TENTUM, Penis.

TENTWORT, Asplenium ruta muraria.

TENUIS MATER, Pia mater.

TENUITAS AQUOSA, Predominium aquæ.

TEPHROSIA VIRGINIANA, Galega Virginiana.

TEPIDARIUM, see Stove.

TEPLITZ, Töplitz.

TERAS, Monster.

TERATOG''ENY, *Teratogen'ia*, from τερας, τερατος, 'a monster,' and γενεσις, 'generation.' The formation of monsters.

TERATOL'OGY, *Teratolog''ia*, from τερας, τερατος, 'a monster,' and λογος, 'a discourse.' A description, or the doctrine of monsters.

TERATOSIS, see Monster.

TERCERON, see Mulatto — t. Black, see Mulatto.

TEREBELLA, Trepan.

*TÉRÉBENTHINE*, Terebinthina—*t. de Bordeaux*, see Pinus sylvestris — *t. de Chio*, see Pistacia terebinthus—*t. de Copahu*, Copaiba—*t. Commune*, see Pinus sylvestris—*t. d'Égypte*, see Amyris opobalsamum—*t. de Gilead*, see Amyris opobalsamum — *t. du Grand Caire*, see Amyris opobalsamum—*t. de Judée*, see Amyris opobalsamum —*t. de Melèze*, see Pinus larix.

TEREBIN'THINA, from τερμινθος, or τερεβινθος, 'the turpentine tree.' *Tur'pentine, Botin, Albotim, Altilibat, Brutino*, (F.) *Térébenthine*. A substance, of the consistence of honey, which flows from many trees of the terebinthaceæ and coniferæ families. It is viscid; shining; more or less transparent; inflammable; of a warm, pungent taste; strong smell; and is entirely composed of resin and essential oil, without benzoic acid. It is soluble in alcohol. See Turpentine, Pinus palustris and Pinus sylvestris. All the turpentines are stimulant, diuretic, and cathartic.

TEREBINTHINA ARGENTORATENSIS, see Pinus picea — t. Balsamea, see Pinus balsamea — t. Canadensis, see Pinus balsamea — t. Chia, see Pistacia terebinthus — t. Communis, see Pinus sylvestris — t. Cypria, see Pistacia terebinthus — t. Empyreumatica, see Pinus sylvestris — t. Laricina, see Pinus larix—t. Veneta, see Pinus larix—t. Vera, see Pistacia terebinthus—t. Vulgaris, see Pinus sylvestris — *t. de Vénise*, see Pinus larix.

TEREBINTHUS, Terminthus—t. Gummifera, Cursera gummifera — t. Lentiscus, Pistacia lentiscus — t. Vulgaris, Pistacia terebinthus.

TEREBRA, Trepan.

TEREBRATIO, Trepanning.

TEREDO OSSIUM, Caries, Spina ventosa.

TERES, *Stron'gylus, Cylindrovi'des*, 'long and round.' An epithet given to many organs, the fibres of which are collected into round fasciculi.

TERES LIGAMEN'TUM, (F.) *Ligament rond*. This name is given to the round ligament in the cotyloid cavity of the os innominatum, which is attached to the head of the bone, and to the bottom of the cavity. It is, also, given to a small fibrous fascia, which extends from the coronoid process of the ulna to below the bicipital tubercle of the radius.

TERES MAJOR, (F.) *Anguli-scapulo-huméral, Scapulo-huméral* (Ch.), *Grand rond*, is situate at the inferior and posterior part of the shoulder. It is attached, on the one hand, to the outer surface of the scapula; to the corresponding part of its axillary margin; and, on the other, to the posterior margin of the bicipital groove of the humerus. It carries the arm backwards and inwards, and carries it, also, inwards in rotation. When it acts with the longissimus dorsi and pectoralis major, it applies the arm against the lateral part of the chest, and keeps it forcibly there.

TERES MINOR, (F.) *Le plus petit sus-scapulo-trochitérien*, (Ch.) *Petit rond, Margini-sus-scapulo-trochitérien, Nonus hu'meri Placenti'ni*, is situate at the posterior and inferior part of the shoulder; it is narrow and flattened, from above to below, in its inner half; and, from before to behind, in the outer. It is attached, on the one part, to the outer surface of the scapula, near its inferior angle; and, on the other, to the inferior part of the great tuberosity of the humerus. It depresses the arm, and causes it to turn on its axis from within outwards. It also carries it backwards.

TERESIS, Observation.

TERETRIUM, Trepan.

TERETRON, Trepan.

TERGAL, Dorsal.

TERGEMINI, Trigemini.

TERGUM, Dorsum, Vertebral column.

TERMINALIA, see Myrobalanus.

TERMINOLOGY, Nomenclature.

TERMIN'THUS, *Terebin'thus*, from τερμινθος, 'the turpentine tree.' *Phyma Anthrax, Terminthus, Berry* or *Fungous carbuncle*. The ancients gave this name to a tumour, surmounted by a black pustule, and resembling the fruit of the turpentine tree.

TERMINTHUS, Pistacia terebinthus.

TERMINUS SUPERIOR ASPERÆ ARTERIÆ, Larynx.

TERMONOLOGY, Nomenclature.

TERMS, Menses.

TERRA ABSORBENS MINERALIS, Magnesiæ carbonas—t. Aluminis, Argilla pura—t. Amara aërata, Magnesiæ carbonas—t. Amara sulphurica, Magnesiæ sulphas—t. Bolaris, Argilla pura —t. Foliata, Sulphur—t. Foliata mineralis, Soda acetata — t. Foliata tartari, Potassæ acetas — t. Fornacum, see Bricks — t. Fullonica, Cimolia purpurescens — t. Japonica, Catechu, Nauclea gambir.

TERRA LEM'NIA, *Argilla bolus flava, Lem'nian Earth, Lemp'nias*. A name given by the ancients to a solid, reddish, astringent, substance, prepared with the pulp of the fruit of the Baobab, an African tree, according to Prosper Alpinus. It seems, however, to be an argillaceous earth. It has been employed as an astringent.

Terra Livon'ica. A *terra sigilla'ta* or *sealed earth* from Livonia, redder than that from Silesia, and very astringent.

Terra Merita, Curcuma longa.

Terra Noceria'na. A whitish, soft, and astringent earth, found in the environs of Nocera, in Italy.

Terra Orlea'na, *Pigmen'tum urucu, Urucu,* (F.) *Rocou, Roucou, Bichet.* A pigmental matter obtained from the seeds of *Bixa Orleana* seu *Orella'na* seu *America'na, Orella'na, Orlea'na.* In Jamaica, it is recommended in dysentery, and is considered to possess astringent and stomachic qualities. It is called, according to its shape, *Flag, Roll,* or *Egg Annotto.*

*Spanish Annotto, Bixa,* is in small, oblong cakes. It is chiefly employed as a colouring matter.

Terra Os'sea, *Mate'ria ossea.* Bony matter. The earthy portion of bones.

Terra Ponderosa, Baryta—t. Ponderosa muriata, Baryta, muriate of — t. Ponderosa salita, Baryta, muriate of — t. Saponaria, Cimolia purpurescens.

Terra Portugal'lica, *Barros, Bucaros.* A reddish, astringent, styptic earth, obtained from Portugal.

Terra Sigilla'ta, *Sealed Earth.* A bole or earthy matter, made into little cakes or flat masses, and stamped with certain impressions, as with the head of the Grand Seignior. To these belong the *Terra Silesiaca, Terra Lemnia, T. Turcica.* See Bolus alba.

Terra Silesiaca, see Terra sigillata — t. Talcosa oxyanthracodes, Magnesiæ carbonas — t. Turcica, see Terra sigillata.

Terra Uri'næ. The earthy deposit in the urine.

Terra Vitrioli Dulcis, Colcothar.

TERRAPIN, Emys palustris.

*TERRE BOLAIRE,* Bolus—*t. Noix,* Bunium bulbocastanum — *t. Pesante,* Baryta — *t. Sigillée,* Bolus alba.

*TERRETTE,* Glechoma hederacea.

TERTIAN FEVER, *Febris tertia'na, An'etus tertianus, Tritæ'us, Tertian Ague,* (F.) *Fièvre tierce.* An intermittent, whose paroxyms recur every *third* day, or every 48 hours. The *mildest,* and the most *pernicious,* intermittents belong to this head. As a general rule, it is the most manageable form of ague.

TERTIANARIA, Scutellaria galericulata.

TESSARA, Cuboid.

TESSELLA, Tabella.

TEST, DANIEL'S, see Docimasia pulmonum — t. Hydrostatic, see Docimasia pulmonum — t. Ploucquet's, see Docimasia pulmonum—t. Static, see Docimasia pulmonum.

TESTA, see Ostrea.

Testa Præpara'ta, *Prepared Oyster-shell.* Oyster-shell, freed from extraneous matter, washed with boiling water, reduced to powder, and prepared in the same manner as Creta præparata.

TESTA'CEOUS, from *testa,* 'a shell.' A powder, consisting of burnt shells. These contain carbonate of lime chiefly, and hence the term has been applied to cretaceous substances. See Creta.

TESTÆ FORNACEÆ, Bricks—t. Ostreæ, see Ostrea.

TESTES. The *Testicles.* Vulgarly, the *Stones.* A name, also, given to the inferior tubercles of the corpora quadrigemina, to distinguish them from the superior, called *Nates.*

Testes Cerebri, see Quadrigemina corpora.

TES'TICLE, *Testis, T. viri'lis, Testic'ulus, Orchis, Pomum amo'ris, Did'ymus, Her'nia, Gemini* (pl.), *Gemelli* (pl.), *Ovum,* (F.) *Testicule,* from *testis,* 'a witness;' because the testicles are evidences of virility. The name of two glandular organs, contained in the scrotum, whose office is to secrete sperm. The substance of the testicle consists of numerous conical, flattened lobules — *lob'uli testis* — whose bases are directed towards the surface of the organ, and the apices towards the corpus Highmorianum. They are formed of a gray and softish substance, composed of tortuous canals, called *Tu'buli seminif'eri* vel *Vasa semina'lia,* folded on each other, and of extreme fineness; the number of which, according to the estimate of Monro, is 62,500, and the total length 5,208 feet. All these canals, uniting in their course, pass through the corpus Highmorianum, concur in forming the epididymis, and give origin to the vas deferens. The testicles are covered, immediately, by a fibrous membrane, of an opake white colour, and very tough, called *Tu'nica Albugin'ea,* or, simply, *Albugin'ea, Perites'tis,* of which the corpus Highmorianum is only an enlargement. Over this, again, is the tunica vaginalis, the second envelope of the testis.

Testicle, Swelled, Hernia humoralis.

TESTICONDUS, Crypsorchis.

*TESTICULE,* Testicle.

TESTICULUS, Testicle — t. Accessorius, Epididymis — t. Caninus, Orchis mascula.

TESTIMO'NIUM MATURITA'TIS. 'Evidence of fitness.' A certificate of complete education, required, in the Prussian universities, of a candidate, before he can be admitted to examination for the degree of Doctor of Medicine.

TESTIS FEMINEUS, Ovary — t. Irritable, Orchidalgia — t. Minor, Prostate — t. Muliebris, Ovary — t. Virilis. Testicle.

TESTUDINATIO CRANII, Camarosis.

TESTU'DO, *Chelo'nē,* (F.) *Tortue.* A genus of reptiles, including the turtle, the flesh of which is much esteemed as an article of diet.

Also, an encysted tumour, which has been supposed to resemble the shell of a turtle; *Emphy'ma encys'tis gang'lion.* See Talpa.

Testudo Cerebri, Fornix — t. Scapulæ, see Scapula.

TETAN'IC, *Tetan'icum, Spas'ticum, Convulsi'vum, Convul'sive,* from τεινω, 'I stretch.' A remedy, which acts on the nerves, and, through them, on the muscles, occasioning, in large doses, convulsions. The chief agents of this class are *Nux Vomica, Strychnia, Brucia, Arnica,* and *Toxicodendron.*

Also, an epithet for a tonic convulsion.

TETANOMATA, Tetanothra.

TETANO'THRA, *Tetanom'ata, Erugato'ria,* from τετανος, 'free from wrinkles.' Medicines which remove wrinkles. — Gorræus.

*TÉTANOS,* Tetanus.

TET'ANUS, from τεινω, 'I stretch.' *Spasm with rigidity, Convul'sio In'dica, Holoton'ia, Holoton'icus, Holotet'anus, Tet'anus universa'lis, Rigor nervo'sus* seu *nervo'rum, Exten'sio* seu *Disten'sio, Enta'sia tetanus, Cat'ochus cervi'nus, Catochus holoton'icus,* (F.) *Tétanos.* A disease which consists in a permanent contraction of all the muscles or merely of some, without alternations of relaxation. It is characterized by closure of the jaws; difficulty or impracticability of deglutition; rigidity and immobility of the limbs and trunk, which is sometimes curved forwards (*Emprosthot'onos*), sometimes backwards (*Opisthot'onos*), and sometimes to one side (*Pleurothot'onos*). When tetanus is confined to the muscles of the jaws, it is called *Trismus.* It is a most formidable affection. The means of treatment are: — copious and repeated blood-letting; bathing, cold and warm; powerful doses of opium,

and other narcotics. In *Traumat'ic Tetanus*, or that which supervenes on a wound, every extraneous matter must, of course, be removed from the wound, and soothing applications be made to it.

TETANUS ANTICUS, Emprosthotonos — t. Dolorificus, Cramp — t. Dorsalis, Opisthotonos — t. Lateralis, Pleurothotonos — t. Maxillæ inferioris, Trismus — t. Posterganeus, Opisthotonos — t. Posticus, Opisthotonos — t. Universalis, see Tetanus.

TETARTÆUS, Quartan.

TETARTOPHI'A, from τεταρτος, 'the fourth,' and φυω, 'I arise.' *Quarta'nus remit'tens.* A quartan, in which the intermission is inordinately short or imperfect.

*TÊTE*, Caput, Head — *t. de Veau*, Elephantiasis of the Greeks.

TETRADRACH'MON, from τετρας, 'four,' and δραχμη, 'a drachm.' A weight of four drachms or half an ounce.

TETRAGONUS, Platysma myoides.

TETRAHIT LONGIFLORUM, Galeopsis grandiflora.

TETRAMY'RON, from τετρας, 'four,' and μυρον, 'an ointment.' An ointment of four ingredients. — Galen.

TETRANGURIA, Cucurbita citrullus.

TETRANTHE'RA PICHU'RIM, *Faba Pichurim, F. Pechu'rei.* The seeds of this Brazilian plant have been used in diarrhœa, dysentery, flatulent colic, &c. Dose, ℈ij.

TETRA'O COTUR'NIX, *Coturnix*, the *Quail*, (F.) *Caille.* The quail is an esteemed article of diet. The Greek name is ορτυξ; and the places, called *Ortygia*, are named after it. The excrements of the quail were formerly extolled in epilepsy, and the fat in specks of the eye.

TETRAPHAR'MACUM, from τετρας, 'four,' and φαρμακον, 'a medicine.' A medicine consisting of four ingredients.

TETRAS'CELUS, from τετρα, 'four,' and σκελος, 'leg.' A monster having four legs. — Gurlt.

TETROB'OLON. The weight of four oboli, or two scruples. — Gorræus.

TETROROS, Astragalus.

TETTER, Herpes — t. Crusted, Impetigo — t. Honeycomb, Porrigo favosa — t. Humid, Eczema impetigo — t. Milky, Porrigo larvalis — t. Pustular, Impetigo — t. Running, Impetigo — t. Scaly, Psoriasis.

TETTERWORT, Chelidonium majus.

TEUCRIUM ÆGYPTIACUM, T. capitatum — t. Belium, T. capitatum.

TEUCRIUM CAPITA'TUM, *Poley Mountain of Montpel'lier, T. Bel'ium* seu *Ægypti'acum, Po'lium Capita'tum*, is, generally, substituted for the last. The common *Poley Mountain* is the *Teucrium monta'num*; and the *Golden Poley Mountain*, the *Teucrium Po'lium, Po'lion.*

TEU'CRIUM CHAMÆ'DRYS, *T. officina'lē, Chamædrys, C. minor repens, C. vulga'ris, Qucr'cula minor* seu *Calamandri'na, Trissa'go, Chamædrops, Trixa'go, Common German'der, Creeping Germander, Small Germander, English Treacle*, (F.) *Petit chêne, Germandrée officinale. Family*, Labiatæ. *Sex. Syst.* Didynamia Gymnospermia. This is possessed of aromatic and bitter properties. The dose of the dried powder is from ʒss to ʒj.

TEUCRIUM CHAMÆP'ITYS, *Chamæpitys, Arthet'ica. Arthretica, Aju'ga, A. Chamæp'itys, Bu'gula Chamæ'pitys, Abiga, Chamæmo'rus, Iva arthrit'ica, Holoc'yron. Io'nia, Sideri'tis, Common Groundpine.* (F.) *Petite Ivette.* Properties like the last. The tops or leaves have been recommended as aperients and tonics; especially in female obstructions, and in paralytic disorders.

TEUCRIUM CRET'ICUM, *T. hyssopifo'lium* seu *Rosmarinifo'lium, Rosmari'nus stœ'chadis facie, Poley-mountain of Candy, Po'lium Cret'icum.* The tops and whole herb enter into the old compounds, *Mithridate* and *Theriaca.* It has a moderately aromatic smell; and a nauseous, bitter taste, and is placed among the aperients and corroborants.

TEUCRIUM FLAVUM has similar properties to T. chamædrys.

TEUCRIUM HYSSOPIFOLIUM, T. Creticum.

TEUCRIUM IVA, *Chamæ'pitys moscha'ta, Iva moscha'ta Monspelien'sium, Iva, Chamæpitys anthyl'lus, French Groundpine*, (F.) *Ivette musquée.* It has similar virtues to T. Chamæpitys, but is weaker.

TEUCRIUM MARITIMUM, T. Marum.

TEUCRIUM MARUM, *T. marit'imum, Marum Syriacum, Marum Cret'icum, Majora'na Syriaca, Marum verum, M. Cortu'si, Chamæ'drys inca'na marit'ima* seu *marum, Marum germander, Syrian herb mastich, Cat thyme, Orig'anum Syriacum*, (F.) *Marum* ou *Germandrée maritime, Herbe aux chats.* A very aromatic plant, of a camphorated smell; formerly much used in medicine as a tonic, antispasmodic, emmenagogue, &c.

TEUCRIUM OFFICINALE, T. chamædrys—t. Palustre, T. scordium — t. Pyramidale, Ajuga — t. Rosmarinifolium, T. Creticum.

TEUCRIUM SCOR'DIUM, *T. palus'trē, Water Germander, Scordium, Trissa'go palus'tris, Chamædrys palustris* seu *scor'dium, Al'lium red'olens*, (F.) *Germandrée Scorodone, Sauge des bois, Germandrée aquatique.* The leaves have a garlicky smell, and bitterish, slightly pungent taste. It has the tonic properties of the other Teucria.

TEXTUM INTERLOBULARE, Interlobular tissue.

TEXTURA, Texture — t. Organica, Histos.

TEX'TURAL. Same etymon as Texture. Relating or appertaining to a texture.

TEXTURE, *Textu'ra, Textus*, from *texere, textum*, 'to weave.' *Tela, Hypha, Hyphē.* The particular arrangement of the tissues that constitute an organ.

TEXTUS, Texture, Tissue—t. Cellulosus, Cellular tissue—t. Desmosus, Desmoid tissue—t. Nervorum, Plexus nervorum — t. Organicus, Cellular tissue—t. Papillaris, Corpus papillare—t. Parenchymalis, Cellular tissue.

THÆRIA, Radzyge.

THAL'AMUS, θαλαμος, (F.) *Couche.* 'A room or chamber; a bed.' The place at which a nerve originates, or has been considered to originate.

THAL'AMI NERVO'RUM OPTICO'RUM seu OP'TICI, *Eminen'tiæ magnæ cer'ebri, Ganglia cerebri posti'ca, Crura medul'læ oblonga'tæ* (of some), *Stria'ta cor'pora super'na posterio'ra, Collic'uli nervo'rum optico'rum, Optic thal'ami, Posterior cer'ebral gan'glion*, (F.) *Couches des nerfs oculaires*, (Ch.) *Couches des nerfs optiques, Couches optiques.* Two rounded and irregular surfaces, which are seen exposed in the lateral ventricles of the brain, and in the third ventricle, the inferior surface of which presents two projections, called *Corpora geniculata*, that furnish several filaments to the optic nerves. The name was given from a belief that the optic nerves originate from them. They, however, arise more posteriorly, and adhere merely to the inner margin of those bodies. Gall considers, that the thalami act as ganglions to the nerves; and, hence, he calls them *Grand ganglion cérébral inférieur.* They are, also, called *Posterior ganglion of the cerebrum.* From the thalami and corpora striata fibres proceed upwards to constitute the convolutions of the brain, and the

various bands that connect the different parts of the brain together. The upper and inner parts of the thalami are so closely connected as to form one continued surface, called *Commissu'ra mollis*. The posterior parts turn downwards and outwards; after which they are elongated to form the two white cords, termed *Tractus op'tici*.

THALAMUS REGALIS, Pericardium.

THALIC'TRON, *Thalictrum*, *T. magnum*, seu *flavum* seu *flaves'cens* seu *praten'sē* seu *ni'gricans* seu *rugo'sum* seu *vagina'tum*, *Meadow-rue*, *Poor Man's Rhubarb*, *Rhubar'barum pau'perum*, (F.) *Pigamon jaunâtre*, *Rue des près*, *Fausse-Rhubarbe*, *Rhabarbe des pauvres*. *Family*, Ranunculaceæ. *Sex. Syst.* Polyandria Polygynia. The root resembles rhubarb in its properties.

THALIC'TRUM ANEMONOI'DES, *Meadow Rue*, *Rue-leaved Anem'ony*; an indigenous plant, flowering in April and May.

THAMARINDUS, Tamarindus.

THANASIMUS, Mortal.

THANATODES, Mortal.

THAN'ATOID, *Thanatoï'des*; from θανατος, 'death,' and ειδος, 'resemblance.' Resembling death. Apparently dead.

THANATOL'OGY, *Thanatolog''ia*, *Thnescolog''ia*, from θανατος, 'death,' and λογος, 'a discourse.' A description, or the doctrine, of death.

THANATOS, Death.

THAP'SIA, from the island Thapsus. The *deadly carrot*, *Thapsia ascle'pias*. *Family*, Umbelliferæ. *Sex. Syst.* Pentandria Digynia. The root operates violently, both upwards and downwards. It is not used.

THAPSUS BARBATUS, Verbascum nigrum.

THARSI, see Tarsus.

THASPIUM ATROPURPU'REUM, *Th. corda'tum*, *Round heart*. The flowers, which appear in June, are of a dark purple.

THAS'PIUM BARBINO'DĒ, *Meadow Parsnep*. An indigenous plant, of the Northern and Western States, — *Order*, Umbelliferæ, — which flowers in June. Flowers, yellow.

Both plants have been esteemed vulnerary, antisyphilitic, and diaphoretic; and as antidotes to the bite of a rattlesnake.

THASPIUM CORDATUM, Th. atropurpureum.

*THÉ*, Thea — *t. des Apalaches*, Ilex vomitoria — *t. de France*, Salvia — *t. d'Europe*, Salvia veronica — *t. de la Mer du sud*, Ilex vomitoria — *t. du Mexique*, Chenopodium ambrosioides — *t. de Simon Pauli*, Myrica gale — *t. Suisse*, Falltranck.

THEA, *Chaa*, *Tea*, (F.) *Thé*. There are two principal species of tea-plant; the *Thea Bohe'a*, and *Thea vir'idis*; the *black tea*, and the *green*. *Family*, Hesperideæ. *Sex. Syst.* Polyandria Monogynia. In commerce, many kinds of tea are met with. Several of the differences between these appear to result from the age at which the leaves have been collected, and the mode of their desiccation.

Tea-drinking was introduced into Europe about the year 1666; since which time its use has become almost universal; and, in spite of the assertions of medical terrorists, it is, except in particular idiosyncracies, entirely harmless.

By an analogical transference, very common in language, the word *Tea* has been used almost synonymously with infusion, as *Beef tea*, *Mint tea*, &c.

THEA GERMANICA, Veronica.

THEBE'SIUS, VEINS OF. A name given to supposititious branches of the coronary veins, which Christopher Adam Thebesius, a German anatomist, described as opening into the heart by small depressions observable in the right auricle; and which have been called *Foram'ina Thebe'sii*. No such veins can be demonstrated. The valve, at the orifice of the coronary vein, in the right ventricle, is called *Valvula Thebe'sii*, *V. Guiffartia'na*, *V. venæ magnæ*.

THECA, Case, Vagina, Sheath — t. Cerebri, Cranium — t. Cordis, Pericardium — t. Vertebralis, see Vertebral canal.

THEION, Sulphur.

THEIOPEGÆ, Water, mineral (sulphureous.)

THEIOTHERMÆ, Waters, mineral, sulphureous.

THELASIS, Lactation.

THELASMUS, Lactation.

THELASTRIA, Nurse.

THELE, Nipple, Papilla.

THELI'TIS, from θηλη, 'the female nipple,' 'the female breast,' and *itis*, denoting inflammation. Inflammation of the nipple.

THELON'CUS, Mastoncus.

THELOS, Mamma.

THELYGON'IA, from θηλος, 'pertaining to the female sex,' and γονη, 'generation.' The part taken by the female in the act of generation. Also, nymphomania.

THELYGONUM, Sperm (of the female.)

THELYPTERIS, Pteris aquilina.

THENAD, Thenal.

THENAL, *Thenar*; same etymon as *thenar*. Relating or appertaining to the thenar.

THENAL ASPECT. An aspect towards the side on which the thenar is situated.—Barclay. *Thenad* is used, adverbially, by the same writer, to signify 'towards the thenal aspect.'

THENAR, θεναρ, from θεινω, 'I strike.' The palm of the hand, or sole of the foot.

THENAR, Flexor brevis pollicis manus, Palm.

THENAR or THENAL EM'INENCE is the projection at the anterior and outer part of the hand, formed by the abductor brevis, opponens, and flexor brevis pollicles.

THENAR or THENAL MUSCLE. Riolan and Winslow give this name to the fleshy mass, formed of the abductor brevis, opponens pollicis and the anterior part of the flexor brevis pollicis In the foot, Winslow gives the name *Thenal muscle* to the abductor and flexor brevis pollicis pedis.

THEOBROMA CACAO, Cacao.

THEOMANIA, Demonomania.

THEOPLEGIA, Apoplexy.

THEOPLEXIA, Apoplexy.

THEORET'ICAL, *Theoret'icus*, *Theo'ricus*, from θεωρεω, 'I contemplate.' (F.) *Théorétique*. *Théorique*. That which is confined to theory, or is connected with it. An epithet also applied to a sect of physicians, who founded their doctrine chiefly on reasoning.

THEORIA, Theory.

*THÉORIQUE*, Theoretical.

THE'ORY, *Theo'ria*, from θεωρεω, 'I contemplate.' The speculative part of a science. The connexion established in the mind between a general fact, or the least possible number of general facts, and all the particular facts dependent thereon: for example, the motions of the heavenly bodies, and the most important natural phenomena are connected with a single fact, previously known by observation; viz. that the force of gravity acts inversely according to the square of the distance. This constitutes the theory of universal gravitation. *Theory* must not be confounded with *system*. Theory regards nature as it is, and is a rigid deduction from facts. *System* is too often the creature of the imagination, to which nature is made to bend.

THEORY OF MEDICINE, *Institutes of Medicine*, *Theoretical Medicine*, is that part of the science

which attempts philosophically to account for the various phenomena that present themselves during health as well as in disease. It is the philosophy of Medicine. The *Institutes of Medicine* are generally considered to comprise Physiology and its applications to Pathology, Hygiene, and Therapeutics. By some, it is considered to include General Pathology and General Therapeutics.

THEIOTHERMÆ, Waters, mineral, sulphureous.

THERAPEIA, Curation, Therapeutics.

THERAPEUSIS, Therapeutics.

THERAPEUTA, Therapeutist.

THERAPEUTICE, Therapeutics.

THERAPEU'TICS, *Therapeu'ticē, Therapeu'sia, Therapeu'sis, Iatroteek'nicē, Practice of Physic, Therapei'a, Therapi'a, Curato'ria Meth'odus, Methodus Meden'di*, from Θεραπευω, 'I wait upon, I alleviate, I attend upon the sick.' (F.) *Thérapeutique*. That part of medicine, the object of which is the treatment of disease. With others, the department which comprises an explanation of the *modus operandi* of medicines.

*THÉRAPEUTIQUE*, Therapeutics.

THERAPEU'TIST, *Therapeu'ta*. Same etymon. One who practises therapeutics. A practitioner of medicine. To be a good therapeutist, a man must be well versed in every department of medicine, and be capable of observing and reasoning well. He may be a good *observer*, and yet a bad *reasoner*. He cannot practise well unless he is both. Hence, the comparatively small number of good therapeutists.

THERAPIA, Therapeutics.

THERIA, Radzyge.

THERIAC, Theriaca — t. of Antipater, Antipatri theriaca.

THERIACA, Θηριακα, *The'riac*, from Θηρ, 'a ferocious or venomous animal,' and ακεομαι, 'I cure.' Treacle. (F.) *Thériaque*. A medicine, believed to be capable of curing or preventing the effects of the bite of a venomous animal. In this sense it is chiefly used by writers. *Theriac* and *Theriacal* have been used adjectively for medicinal.

THERIACA ANDROM'ACHI, *Venice Treacle*, is an ancient *alexipharmic electuary*; consisting of a farrago of 61 different ingredients, which possessed the most opposite properties. It was invented by Andromachus of Crete, and prepared by order of Nero. It has received various modifications; and, to the discredit of the *Faculté de Médecine* of Paris, has held its place in their Codex, with even an additional number of ingredients. The *Electua'rium Opia'tum polypharmacum* of the Codex has contained *acid ingredients*, 5; *astringent*, 5; *bitter*, 22; *indigenous aromatics*, 10; *umbelliferous aromatics*, 7; *balsams and resinous substances*, 8; *fetid ingredients*, 6; *narcotics*, 1; *earthy substances*, 1; *gummy* or *amylaceous*, 4; *saccharine*, 3; total 72! and one of these the *flesh of the viper!* A little more than a grain of opium is contained in each drachm of the compound.

THERIACA CELESTIS, Tinctura opii — t. Communis, Melasses — t. Edinensis, Confectio opii.

THERIACA GERMANO'RUM. An extract or rob, prepared from juniper berries. Used as a stomachic.

THERIACA LONDINEN'SIS, *Cataplasma Cymi'ni*. A cataplasm of *cumin seed, bay berries, germander snakeroot, cloves, honey*, and sometimes *opium*, or *syrup of poppies*.

THERIACA RUSTICORUM, Allium.

*THÉRIAQUE*, Theriaca.

THERIAKI. In Turkey, *opium-eaters*, or they who indulge largely in the use of opium, are so called.

THERIATRICA, Veterinary art.

THERIODES, Ferine.

THERIO'MA, *Therion*, from Θηρ, 'a venomous animal.' Any extremely malignant ulcer. Sometimes confined to ulcers of the lungs.

THERION, Therioma.

THERIOTOMY, Zootomy.

THERMA, Heat — t. Emphytum, Animal heat

THERMÆ, Θερμαι, *Ther'mata*. Warm baths or springs. See Waters (mineral.)

THERMÆ FABARLÆ, Pfeffers Mineral Waters of — t. Piperinæ, Pfeffers, Mineral Waters of — t. Plumbariæ, Plombières, Mineral Waters of.

THERMAL, *Therma'lis*; from Θερμη, 'heat,' Θερμος, 'hot.' Relating or appertainiug to heat. Hot, warm. As 'a *thermal* mineral water.'

THERMANTICA, Calefacients.

THERMASMA, Fomentation.

THERMATA, Thermæ.

THERMUM EMPHYTUM, Animal heat, Biolychnium.

THESIS, Θεσις, from τιθημι, 'to place.' 'A position or proposition.' *Disputa'tio, Inaug'ural Disserta'tion*. The name usually given to the essay composed by a candidate for graduation in medicine, which he is at times required to defend publicly. Often, however, it is a mere form, giving useless labour and trouble to the student, inasmuch as it is executed as a task, and never afterwards regarded by the preceptor or by others. Sandifort, Haller, Smellie, and Stoll, have published collections of these.

Also, a suffix denoting 'arrangement;' hence *Diathesis*.

THEVE'TIA A'HOUAI, *Ahouai*. The kernels of the nut of this Brazilian tree are said to be a violent poison. At the Antilles, its nuts are called *Noix de Serpent*; and they are used against the bites of serpents.

THIGH, Sax. Seoh, *Femur, Femen, Crus, Merus, Me'rium*, (F.) *Cuisse*. The part of the lower limb which extends from the pelvis to the leg. The thigh is larger at its superior than inferior part, and has the form of an inverted and truncated cone, slightly depressed from within outwards. *Above*, it is bounded, *anteriorly*, by the groin; *externally*, by the hip; *behind*, by the fold of the nates; and *within*, by the perineal region. *Below*, it is bounded, *anteriorly*, by the prominence of the knee; *posteriorly*, by the ham. It is formed of a considerable number of muscles, blood-vessels, lymphatics, nerves, &c.; and is covered by a strong aponeurosis.

THIGHBONE, Femur — t. Neck of the, Collum femoris.

THION, Sulphur.

THIRST, Sax. Ðyrꝛt, (D.) Dorst, *Sitis, Dipsa, Potio'nis deside'rium*, (F.) *Soif*. A simple desire or an absolute want for liquids. Physiologists are not entirely agreed regarding the seat of thirst; some place it in the fauces; others in the stomach. Its immediate cause is not known. It has been attributed to a dry condition of the nervous papillæ of the pharynx, produced by suppression of the salivary and mucous secretions. This is probably true; but, again, it is owing to the wants of the system, — a supply of fluid being required to compensate the numerous losses that are constantly taking place. Thirst is an *internal sensation*, — an *instinctive want* — arising from organization, and inexplicable. It is an urgent symptom in many diseases, particularly in those of vascular excitement.

THIRST, EXCESSIVE, Polydipsia — t. Morbid Dipsosis.

THIRSTY, Dipsodes.

THISTLE, BLESSED, Centaurea benedicta — t. Cotton, Onopordium acanthium — t. Globe, Echinops — t. Holy, Centaurea benedicta—t. Ladies', Carduus Marianus—t. Milk, common, Carduus Marianus — t. Pine, Atractylus gummifera — t. Sow, Sonchus oleraceus — t. Star, Centaurea calcitrapa — t. Yellow, Argemone Mexicana.

THLADIAS, Eunuch

THLASIAS, Eunuch.

THLASIS, Contusion — t. Depressio, Depression.

THLASMA, Contusion—t. Concussio, Concussion — t. Stremma, Sprain.

THLASPI, *Pennycress. Family*, Cruciferæ. *Sex. Syst.* Tetradynamia Siliculosa. Two species of thlaspi are directed, in some pharmacopœias, for medical use:—the *Thlaspi arven'sē* or *Treacle mustard*, and the *Thlaspi campes'trē* seu *hirsu'tum* seu *vulga'tius*, *Lepid'ium campes'trē*, *Lep'ia campes'tris*, *Ibe'ris campes'tris*, *Mith'ridate mustard*. The pharmaceutical properties of both kinds resemble those of common mustard.

Thlaspi Bursa, *Th. bursa'tum*, *Capsell'a bursa pasto'ris*, *Ibe'ris bursa pastoris*, *Nastur'tium bursa pastoris*, *Rodschie'dia bursa pasto'ris*, *Bursa pasto'ris*, (F.) *Bourse à berger*, *Bourse à pasteur*, *Tabouret*, *Shepherd's purse*. A common European plant, introduced into this country. It is slightly astringent, but is little used.

Thlaspi Bursatum, Thlaspi bursa — th. Nasturtium, Lepidium sativum—th. Sativum, Lepidium sativum.

THLIBIAS, Eunuch.

THLIPSENCEPH'ALUS, from θλιψις, 'compression,' and εγκεφαλος, 'the encephalon.' A monster in whom the skull is open, not merely in the frontal and parietal, but also in the occipital regions — a distinct fontanelle not existing.

THLIP'SIS, Θλιψις, *Compres'sio*. Compression, and especially constriction of vessels by an external cause. Oppression.

THNESCOLOGIA, Thanatology.

THOLUS, Achicolum—t. Diocleus, Scapha.

THOMPSO'NIAN. One who practises or believes in Thompsonianism.

THOMPSO'NIANISM, *Thomp'sonism*. A fanciful doctrine, of which a person of the name of Thompson, of New York, is the founder. One of its leading principles is, that the human body is composed of four *elements* (?), earth, air, fire and water; and one of its apothegms, — that metals and minerals are in the earth, and, being extracted from the depths of the earth, have a tendency to carry all down into the earth who use them; that the tendency of all vegetables is to spring up from the earth, and therefore to uphold mankind from the grave.

The Thompsonians are Botanic Physicians.

THORACENTE'SIS, *Paracente'sis Thora'cis*, from Θωραξ, 'the thorax,' and κεντησις, 'perforation.' Tapping the thorax. Perforation of the thorax.

*THORACHIQUE*, Thoracic.

THORAC''IC, *Thorac''icus*, from *thorax*, 'the chest;' (F.) *Thoracique* ou *Thorachique*. That what relates or belongs to the chest; as *Thoracic vis'cera*, &c.

Thoracic Inferior Artery, *Arte'ria Thorac''ica Exter'na Infe'rior* vel *Longa*, *A. mamma'ria externa*, *A. Thoracica inferior*, (F.) *Deuxième des Thoraciques* (Ch.), arises from the axillary, a little below the preceding, and descends vertically over the lateral part of the thorax, and the serratus major anticus. It afterwards bends inwards; becomes subcutaneous, and divides into several branches, which embrace the breast. It gives numerous ramifications to the pectoralis major, serratus anticus, intercostals, ganglions of the axilla, mamma, &c.

Thoracic Superior Artery, *Arte'ria Thoracica Exter'na Superior*, (F.) *Artère thoracique supérieure*, *Première des Thoraciques* (Ch.), arises from the axillary artery or from the acromial; and descends forwards between the pectoralis major and P. minor, to which it distributes itself by a great number of branches. In some subjects, there are two or three *Arteriæ thoracicæ externæ superiores*.

Thoracic Duct, *Ductus thorac''icus* seu *chy'lifer* seu *chyli* seu *lac'teus* seu *ro'rifer* seu *Pecqueti* seu *Pecquetia'nus*, *Vena alba thora'cis*, *Alveus ampulles'cens*, *Distributo'ria lactea thoracica*, *Ductus thoracicus poste'rior* seu *vertebra'lis*, *Galax'ia*, *Duct of Pecquet*, *Alimen'tary Duct*, (F.) *Canal* ou *Conduit Thoracique*, is the duct in which the lymphatics of the lower limbs, abdomen, left superior extremity, left side of the head, neck, and thorax terminate. It begins at the *receptaculum chyli*, which is formed by the union of five or six large lymphatic trunks,—themselves formed from the union of all the absorbent plexuses of the abdomen. The duct ascends into the chest through the pillars of the diaphragm, and by the side of the aorta and vena azygos. It contracts in dimension, as far as the 6th dorsal vertebra, when it inclines towards the left hand; ascends behind the arch of the aorta; passes behind the left internal jugular vein, and opens at the posterior part of the subclavian vein of the same side. Its embouchure is furnished with two valves, which prevent the blood from passing from the vein into the duct.

Thoracic Limbs are the upper limbs; so called because they are articulated with the lateral and upper parts of the chest.

Thoracic, Long or Inferior, Mammary inferior external artery.

Thoracic Nerves. The *short* or *anterior thoracic nerves* are two in number. They arise from the brachial plexus, and divide into an anterior and a posterior branch: — the former distributed to the pectoralis major muscle; the latter uniting with a branch of the other to form a loop, from which numerous branches are given off to the pectoralis major and p. minor.

The *long thorac''ic nerve*, *Poste'rior thorac''ic*, *External respiratory* of Sir Charles Bell, is a long branch, which arises from the fourth and fifth cervical nerves, immediately after their escape from the intervertebral foramina, and passes downwards to be distributed upon the serratus magnus muscle.

Thoracic Regions are the different regions of the chest. Thus we say, *anterior*, *lateral*, and *superior thoracic*, &c.

THORACICA, Pectorals.

THORACICS, FIRST OF THE, Mammary superior external artery.

*THORACIQUE*, Thoracic.

THORACOCENTE'SIS, from Θωραξ, 'the chest,' and κεντησις, 'puncture.' *Paracente'sis thora'cis*. Puncture of the chest to evacuate contained fluid — as in empyema.

THORACOCYSTIS, Thoracystis.

THOR'ACO-GASTRODID'YMUS, *Did'ymus sym'phyo-thoracogas'trius*, *Xyphodid'ymus*: from Θωραξ, 'the chest,' γαστηρ, 'the belly,' and διδυμος, 'a twin.' A monstrosity in which twins are united by the chest and abdomen.— Gurlt.

*THORACO-FACIAL*, Platysma myoides — *t. Maxillo-facial*, Platysma myoides.

THORACODID'YMUS, from Θωραξ, 'the chest,' and διδυμος, 'a twin.' A monstrosity in which twins are united by the thorax.— Gurlt.

THORACODYNE, Pleurodynia.

THORACOPATHI'A, from θωραξ, 'the chest,' and παθος, 'disease.' Disease or suffering in the chest.

THORACOSCOPIA, see Auscultation.

THORACOSCOPIUM, Stethoscope.

THORACYST'IS, *Thoracocystis*, from θωραξ, 'the chest,' and κυστις, 'a bladder.' Encysted dropsy of the chest. Hydatids in the chest.

THORAX, θωραξ, 'a cuirass, a coat of mail.' *Cith'arus, Venter me'dius, Pectus, Stethus, Scutum pec'toris*, the *Breast*, the *Chest, Bir, Chelys, Cassa*, (F.) *Poitrine*. One of the splanchnic cavities; bounded, posteriorly, by the vertebræ; laterally, by the ribs and scapula; anteriorly, by the sternum; above, by the clavicle; and below, by the diaphragm. It is destined to lodge and protect the chief organs of respiration and circulation — the lungs and the heart.

THORAX, Corset.

THORE, Sperm.

THORN APPLE, Datura stramonium—t. Red, Datura Sanguinea.

THOROUGHSTEM, Eupatorium perfoliatum.

THOROUGHWAX, Eupatorium perfoliatum.

THOROUGHWORT, Eupatorium perfoliatum.

THOROW-WAX, Bupleurum rotundifolium.

THORULUS STRAMINEUS, *Fanon*.

THREADWORM, Dracunculus—t. Long, Trichocephalus.

THREPSIS, Assimilation, Nutrition.

THREPSOL'OGY, *Threpsolog''ia*, from θρεψις, 'nutrition,' and λογος, 'a description.' The doctrine of, or a treatise on, the nutrition of organized bodies.

THREPTICE, Assimilation.

THRIDACE, Lactucarium.

THRIDAX, Lettuce.

THRIFT, LAVENDER, Statice limonium—t. American, Statice Caroliniana—t. Sea-side, Statice Caroliniana.

THRIX, Capillus, Hair.

THROAT, θροτε, θροτα, *Jugulum, Interstit''ium Jugula'rē, Guttur, Sphagē*. The anterior part of the neck. (F.) *Gorge*. Also, the *Fauces*, (F.) *Gosier*.

THROATROOT, Geum Virginianum, Liatris.

THROATWORT, Campanula trachelium.

THROBBING, *Pulsati'vus, Sphyg'micus, Sphygmo'des, Pul'satory*. A *throbbing pain*, (F.) *Douleur pulsative*, is a kind of pain which is, or seems to be, augmented by the pulsation of arteries.

THROE, Agony, Pains, labour.

THROMBI LACTEI, Infarctus mammæ lacteus.

THROMBOCYS'TIS, from θρομβος, 'a clot,' and κυστις, 'a cyst.' The cyst occasionally surrounding a clot of blood — as in encephalic hemorrhage.

THROMBOSIS, Coagulation, Thrombus.

THROMBUS, θρομβος, 'a clot,' from τρεφειν, 'to coagulate;' *Thrombo'sis, Trumbus, Hæmato'ma*. A small, hard, round, bluish tumour; formed by an effusion of blood in the vicinity of a vein which has been opened in the operation of bloodletting. The thrombus is most commonly owing to the opening in the vein and that of the skin not corresponding; to excessive smallness of the cutaneous orifice; or to small, fatty granules, which prevent the discharge of the blood. Compresses, dipped in salt water; camphorated spirit, and slight compression, usually disperse it. See Blood.

THROMBUS NEONATORUM, Cephalæmatoma.

THROTTLE, Trachea.

THROW, Agony, Pains, labour.

THROWORT, Leonurus cardiaca.

THRUSH, Aphthæ — t. Milk, Aphthæ — t. White, Aphthæ.

THRYPSIS, Comminution.

THUJA OCCIDENTALIS, Thuya occidentalis.

THUREA, Juniperus lycia—t. Virga, Juniperus lycia.

THUS, see Pinus abies—t. Fœmininum, see Pinus abies — t. Judæorum, Croton cascarilla, Styrax, Thymiama—t. Libanotos, Juniperus lycia—t. Masculum, Juniperus lycia—t. Verum, Juniperus lycia—t. Vulgare, see Pinus abies.

THUYA APHYLLA, see Sandarac.

THU'YA seu THUJA OCCIDENTA'LIS, *T. obtu'sa, Cupres'sus Arbor Vitæ, Arbor Vitæ, Tree of Life. Nat. Family*, Coniferæ. The leaves and wood were formerly in high repute as resolvents, sudorifics, and expectorants, and were given in phthisical affections, intermittent fevers, and dropsies. The expressed juice has been applied to condylomata. The arrangement of the medullary matter of the cerebellum, termed *Arbor Vitæ*, is also called *Thuya*.

THYLACIITIS, Gutta rosea.

*THYM*, Thymus.

THYMA, Thymion.

THYMALOS, Taxus baccata.

THYMASTHMA, Asthma thymicum.

THYMBRA, Satureia hortensis—t. Hispanica, Thymus mastichina.

THYME, CAT, Teucrium Marum—t. Common, Thymus — t. Lemon, see Thymus serpyllum — t. Mother of, Thymus serpyllum — t. Virginia, Pycnanthemum linifolium—t. Wild, Thymus serpyllum.

THYMELÆA, Daphne gnidium—t. Laureola, Daphne laureola — t. Mezereum, Daphne mezereum—t. Monspeliaca, Daphne gnidium.

THYMELCO'SIS, from θυμος, 'thymus,' and ἑλκος, 'an ulcer.' Ulceration of the thymus gland.

THYMI'AMA, θυμιαμα, 'a perfume;' *Muskwood, Thus Judæo'rum*, (F.) *Nareaphte*. A bark from Syria, Cilicia, &c., supposed to be the product of the liquid storax tree. It has an agreeable, balsamic smell; approaching that of liquid storax.

THYMIAMA, Fumigation, Suffimentum.

THYMIASIOTECHNIA, Thymiatechny.

THYMIASIS, Fumigation.

THYMIATECH'NY, *Thymiatech'nia, Thymiasiotech'nia, Cura fumigato'ria*, from θυμιαμα, 'an odour,' and τεχνη, 'art.' The art of employing perfumes in medicine.

THYM'ION, *Thyma, Thymus, Porrum, Porrus, Verru'ca rhagoï'dea, Verru'ca minor*, from θυμος, 'thyme.' A small wart on the skin, resembling a bud of thyme.

THYMIOSIS, Frambœsia — t. Indica, Frambœsia.

THYMI'TES. Wine impregnated with thyme.

THYMI'TIS, from θυμος, 'thymus,' and *itis*, denoting inflammation. Inflammation of the thymus gland.

THYMOPATHI'A, *Psychopathi'a*, from θυμος, 'the mind,' and παθος, 'affection.' A disease of the mind.

THYMOS, Rage.

THYMOXAL'MĒ, from θυμος, 'thyme,' οξυς, 'acid,' and ἁλς, 'salt.' A compound of thyme, vinegar, and salt.

THYMUS, θυμος, *Gland'ula Thymus, Corpus Thymiamum* seu *Thy'micum, Glan'dium, Thymus gland, Corpus incomprehensib'ilē* of Jos. Frank. An organ, the uses of which are totally unknown,

and which is seated in the upper separation of the anterior mediastinum. The thymus has the appearance of a glandular body. It is oblong; bilobate; soft, and very variable in size and colour. In the fœtus, it is very large, and contains in a central cavity — *reservoir of the thymus* — a milky fluid; but it gradually disappears, and in old age is scarcely discernible. The arteries, called *thymic*, are from the inferior thyroid, internal mammary, bronchial, and mediastinal. The veins have the same arrangement. It receives some nervous filaments from the pneumogastric nerves, the phrenic, and the inferior cervical ganglia.

Thymus, *T. vulga'ris* seu *tenuifo'lius* seu *horten'sis, Common Thyme*, (F.) *Thym, T. ordinaire. Family*, Labiatæ. *Sex. Syst.* Didynamia Gymnospermia. This herb has an agreeable, aromatic smell; and a warm, pungent taste. It is reputed to be resolvent, emmenagogue, tonic, and stomachic. It is not much used.

Thymus, Satureia capitata, Thymion—t. Calaminthus, Melissa calamintha—t. Capitatus, Satureia capitata—t. Ciliatus, T. mastichina—t. Creticus, Satureia capitata—t. Hortensis, Thymus—t. Includens, T. serpyllum.

Thymus Mastich'ina, *T. cilia'tus, Common herb Mastich, Marum vulga'rē, Samp'suchus, Clinopo'dia, Mastich'ina Gallo'rum, Thymbra Hispan'ica, Jaca In'dica.* A low, shrubby, Spanish plant, used as an errhine. It has a smell like mastich. Its virtues resemble those of the *Marum Syriacum;* but it is said to be less powerful.

Thymus Multiflorus, Melissa nepeta—t. Nepeta, Melissa nepeta.

Thymus Serpyl'lum, *T. inclu'dens, Mother of Thyme, Wild Thyme, Her'pylos, Herpyl'los, Serpyl'lum, Serpul'lum, Serpil'lum, Gila'rum, Serpyl'lum vulga'rē minus*, (F.) *Serpolet.* This plant has the same sensible properties as the garden thyme; but has a milder, and rather more grateful flavour. *Lemon Thyme*, the *Serpyllum citra'tum*, is merely a variety of the *Thymus Serpyllum.* It is very pungent; and has a particularly grateful odour, approaching that of lemons.

Thymus Sylvaticus, Clinopodium vulgare — th. Sylvestris, Satureia capitata — th. Tenuifolius, Thymus.

THYRA, *θυρα*, 'a gate, folding-door.' In composition, *Thyreo* and *Thyro*, *θυρεος*, 'a shield resembling a folding-door,' mean the thyroid cartilage.

THYREMPHRAXIS, Bronchocele.

THYREO, *Thyro*, in composition, relate to the thyroid cartilage or gland.

THYREOADENITIS, Thyreoitis.

THYREO-ARYT'ENOID, *Thyro-arytenoïdeus*, or *Thyro-arytenoïdes.* That which relates to the thyroid and arytenoid cartilages.

Thyreo-arytenoid Ligaments, *Inferior Ligaments of the Larynx, Lips of the Glottis, Vocal Cords*, are two ligaments about two lines broad, formed of elastic and parallel fibres, which are contained in a duplicature of the mucous membrane of the larynx. They extend horizontally from the anterior projection at the base of each arytenoid cartilage to the middle of the angle of union of the thyroid cartilage. They are the essential organs of voice. See Glottis.

Thyreo-arytenoid Muscles, Thyreo-arytenoïdei, are thin muscles, which arise from the middle and inferior part of the posterior surface of the thyroid cartilage; whence they proceed backwards and outwards, to be inserted into the outer part of the base of the arytenoid cartilage. They give the necessary tension to the ligaments of the glottis, in the production of the voice. Santorini has given the name *Thyreo-arytenoïdeus obliquus* to a portion of the *arytenoïdeus* muscle.

THYREO-EPIGLOT'TIC, *Thyreo-epiglottideus, Thyrepiglott'icus.* Sabatier and Santorini have given this name to the outer portion of the thyro-arytenoid muscle; because it passes from the thyroid cartilage to the anterior part of the epiglottis.

THYREO-HYOID, *Thyro-hyoïdeus, Thyrohyoïdes, Hyodeothyreo'des.* That which belongs or relates to the thyroid cartilage and os hyoides.

Thyreo-hyoid or Hyo-thyroid Membrane is a very broad, yellowish, fibrous membrane, thicker at the middle than at the extremities, which is attached above to the posterior surface of the body and great cornu of the os hyoides; and, below, to the whole superior edge of the thyroid cartilage.

THYREO-HYOĪDEUS or *Hyo-thyreoïdeus Muscle* is situate at the anterior and superior part of the neck. It is attached to the oblique line on the anterior surface of the thyroid cartilage; to the inferior edge of the body of the os hyoides, and to the anterior portion of its great cornu. It approximates the thyroid cartilage and os hyoides to each other, by raising the cartilage, and with it the whole larynx: or, it can depress the os hyoides.

THYREO-PHARYNGEUS, Thyro-Pharyngeus.

THYREOID, Thyroid.

THYREOIDEUS, Thyroideal.

THYREOI'TIS, *Thyreoïdeni'tis, Angi'na thyreoïdea*, from *θυρεος*, 'a shield,' and *itis*, denoting inflammation. Inflammation of the thyroid gland.

THYREONCUS, Bronchocele.

THYREOPHRAXIA, Bronchocele.

THYREPIGLOTTICUS, Thyreoëpiglottic.

THYRO, see Thyreo.

THYRO-ARYTĒNOID, Thyreo-arytenoid.

THYRO-CRICO-PHARYNGEUS, see Crico-pharyngeal.

THYRO-HYOIDEUS, Thyreo-hyoid.

THYRO-PHARYNGEUS, *Thyreo-pharyngeus.* Valsalva, Morgagni, Santorini, and Winslow have given this name to the portion of the constrictor pharyngis inferior, which is attached to the thyroid cartilage.

Thyro-Pharyngeus, Constrictor pharyngis, see Crico-pharyngeal.

THYRO-PHARYNGO-STAPHYLINUS, Palato-pharyngeus.

THYROCELE, Bronchocele.

THYROID, *Thy'reoid, Thyroï'des*, from *θυρα*, 'a gate or folding-door,' or from *θυρεος*, 'a shield,' and *ειδος*, 'form.' That which has the shape of a folding-door.

Thyroid Car'tilage, *Cartila'go Scutifor'mis, C. Scuta'lis, C. Clypea'lis, Coöpertorium, C. Pelta'lis* seu *pelta'tus, Scutum, Ada'mi Morsûs Os*, is the largest of the cartilages of the larynx, at the anterior part of which it is situate. It is larger transversely than vertically; broader above than below; and seems formed by the junction of the two quadrilateral plates, which produce, by their union, an angle that projects forwards. Its two posterior margins terminate above, and on each side, by an ensiform prolongation, called the *greater cornu of the thyroïd cartilage;* and, below, by a less prominent eminence, the *lesser cornu*, which is articulated with the cricoid.

Thyroid Gland, *Corpus Thyreoïdeum. Glan'dula Thyreoïdea*, (F.) *Gland* ou *Corps Thyroïde*, is an organ, the uses of which are not known. It covers the anterior and inferior part of the larynx,

as well as the first rings of the trachea, and seems to be composed of two lobes, flattened from before to behind, which are united by a transverse prolongation of the same nature as themselves, called the *Isthmus of the Thyroid Gland.* The tissue of the thyroid is soft, spongy, and of a brownish colour; but its intimate structure is unknown. It is formed of several distinct lobules; collected in lobes of greater or less size. These are composed of granulations, some of which contain a yellowish or milky fluid. The thyroid gland receives four large arteries, called *Thyroideal,* as well as corresponding veins. Its nerves proceed from the pneumogastric, and from the cervical ganglia. No excretory duct has ever been found in it. Its uses are not known.

THYROIDEAL, *Thyroïdeus, Thyreoïdeus,* (F.) *Thyroïdien.* That which concerns the thyroid gland or cartilage.

Thyroideal Arteries are two on each side. 1. The *superior Thyroideal, superior laryngeal, superior guttural,* arises from the anterior part of the external carotid, and proceeds to the upper part of the thyroid gland, after having given off a *laryngeal branch* and a *crico-thyroid.* 2. The *inferior Thyroideal, infe'rior gut'tural,* much larger than the last, arises from the upper part of the subclavian. It passes, in a serpentine manner, to the inferior part of the thyroid gland, to which it is distributed, after having given a number of branches to the neighbouring parts, among which is the *cervicalis ascendens.*

Thyroideal Veins are, 1. A *superior thyroideal,* and several *middle thyroideal,* which open into the internal jugular vein. 2. An *inferior thyroideal,* much larger than the preceding, whose branches form — by anastomosing with those of the opposite side, in front of the trachea — a very remarkable venous plexus, which J. Cloquet calls the *infra-thyroideal plexus.* The inferior thyroideal veins open,—the left into the corresponding subclavian;—the right, into the vena cava superior.

*THYROÏDIEN,* Thyroideal.

THYROPHRAXIA, Bronchocele.

THYRSUS, Penis.

*TIBI-PÉRONÉO-TARSIEN,* Peronæus longus.

TIB'IA. A Latin word, which signifies a *flute* or pipe. *Cnemē, Procne'mē, Procne'mium, Fo'cilē majus, Arun'do major, Canna major, Canna major* seu *domes'tica cruris.* The largest bone of the leg. A long, irregular, and triangular bone, situate on the inner side of the fibula. It has, 1. A *Superior* or *femoral extremity,* which is very large, rounded, and has two eminences at the sides, called *Tuberos'ities of the Tibia,* or *Tibial tuberosities.* The outermost is articulated with the fibula. On its head are two articular, oval, concave surfaces, separated by a process, called *Spine of the tibia,* which are articulated with the condyles of the *Os femoris.* 2. An *inferior* or *tarsal extremity,* having an articular surface beneath, which joins the astragalus; within, a triangular eminence, which forms the malleolus internus; and, on the outside, a triangular surface, which articulates with the fibula. 3. The body or shaft of the tibia has three faces, separated by three angles, the anterior of which is the most prominent, and is called the *spine* or *crista of the tibia* or *tibial spine.* It is the *shin.* The tibia is articulated with the femur, fibula, and astragalus. It is developed by three points of ossification, one for the body, and one for each extremity.

Tibia Minima, Fibula.

TIBIÆUS, Tibial.

TIB'IAL, *Tibia'lis, Tibiæ'us,* (F.) *Tibial, Jambier* That which relates to the tibia or to the leg.

Tibial Aponeuro'sis, (F.) *Aponévrose Jambière,* surrounds the muscles of the leg. It is continuous, above, with the femoral aponeurosis, and arises, also, from the head of the fibula, and from several fibrous expansions which detach themselves from the tendons of the triceps, sartorius, gracilis, and semitendinosus. Thence it descends around the leg, attaching itself to the whole extent of the anterior and inner edges of the tibia. It sends, below, an expansion, which passes before the tendo Achillis, and is continuous with the anterior annular ligament of the tarsus. It is attached, also, to the sheath of the peronei muscles.

Tibial Arteries are two in number. 1. The *Tibia'lis Anti'ca,* which arises from the popliteal artery, before its bifurcation; passes immediately through the opening in the upper part of the interosseous ligament, and reaches the anterior part of the leg; when it turns downwards, and descends obliquely, between the extensor communis digitorum pedis and the tibialis anticus, anterior to the interosseous ligament; glides under the anterior annular ligament of the tarsus, and takes the name *Dorsalis tarsi.* Amongst the numerous branches, given off by the tibialis antica, may be distinguished — the *Tibialis recur'rens, A. malleola'ris interna,* and *A. malleolaris externa.* 2. The *Tibialis posti'ca,* arises from the bifurcation of the popliteal artery; and, slightly tortuous, descends between the two planes of the posterior muscles of the leg; until it arrives under the arch of the calcaneum, where it divides into two branches — the *Plantar arteries.*

TIBIAD, see Tibial aspect.

TIB'IAL ASPECT. An aspect towards the the side on which the tibia is situated.—Barclay. *Tibiad* is used adverbially by the same writer, to signify, 'towards the tibial aspect.'

Tibial Nerves are two in number. 1. The *anterior tibial nerve, Prétibio-susplantaire,* (Ch.) One of the two branches in which the external popliteal terminates. It accompanies the arteria tibialis antica. 2. The *posterior tibial nerve, Branche tibiale du nerf fémoro-poplitée,* (Ch.) is the *internal popliteal.*

Tibial Veins, Anterior and Posterior, have the same arrangement as the arteries which they accompany.

TIBIA'LIS ANTI'CUS, *Cate'næ mus'culus,* (F.) *Tibio-sus-métatarsien, Tibio-sustarsien,* (Ch.) *Jambier antérieur.* A muscle situate at the anterior part of the leg. Above, it has the shape of a triangular prism; below, it is slender and tendinous. It is attached, above, to the anterior part of the external tuberosity of the tibia; to the superior half of the outer surface of that bone; and to the anterior surface of the interosseous ligament. Below, its tendon terminates at the base of the first cuneiform bone, and at the posterior extremity of the first metatarsal bone. This muscle bends the foot on the leg, and directs its point inwards, at the same time that it raises its inner edge. It can, also, bend the leg on the foot, and prevent it from falling backwards in standing.

Tibialis Gracilis, Plantar muscle.

Tibialis Posti'cus, (F.) *Tibio-tarsien, Tibiosous-tarsien,* (Ch.) *Jambier postérieur.* This muscle is situate at the posterior and deep part of the leg. It is thicker above than below; and is attached, above, to the posterior surface of the fibula; to the posterior surface of the tibia, and to the interosseous ligament. Its tendon terminates, below, at the tuberosity on the inferior extremity of the os scaphoides. This muscle extends the foot on the leg; at the same time rais-

ing its inner edge. It, likewise, extends the leg on the foot.

*TIBIO-CALCANIEN*, Soleus—*t. Phalangettien*, Flexor longus digitorum pedis profundus perforans — *t. Sous-tarsien*, Tibialis posticus — *t. Sus-métatarsien*, Tibialis anticus — *t. Sus-tarsien*, Tibialis anticus.

TIB'IO-TARSAL, *Tibio-tar'seus*, (F.) *Tibio-tarsienne*. What relates to the tibia and tarsus.

Tibio-Tarsal Articula'tion is the articulation of the foot with the leg. It is formed by the tibia and the astragalus; and is strengthened by lateral, and by anterior and posterior ligaments.

*TIBIO-TARSIEN*, Tibialis posticus.

TIC, *Twitching*, *Vellication*. A local and habitual convulsive motion of certain muscles; and, especially, of some of those of the face. It is, sometimes, called in France *Tic convulsif* ou *Tic non douloureux*, to distinguish it from *Tic douloureux* or *neuralgia faciei*, and has been termed a *partial chorea* or form of *chronic chorea*, *Spasmus facia'lis*, *Chore'a fa'ciei*.

*TIC DOULEUREUX*, Neuralgia, facial — *t. non douloureux*, see Tic.

TICKLE WEED, Veratrum viride.

TICKLING, (F.) *Chatouillement*. This word, sometimes, means the action of tickling (*titilla'tio*, *titillation*;) at others, the sensation produced by this action (*prurit'us*). A vivid sensation, which commonly causes laughter, and a state of general spasm that may be dangerous if too long protracted. There are some parts of the body, where we are easier tickled than others; for example, the sole of the feet, and the hypochondriac regions.

TICKSEED SUNFLOWER, Coreopsis trichosperma.

TICKWEED, Hedeoma — t. Sunflower, Coreopsis trichosperma.

TIDAL AIR, see Respiration.

*TIERCE*, see Tertian.

*TIGE PITUITAIRE*, Infundibulum of the brain — *t. Sus-sphénoïdale*, Infundibulum of the brain.

TIGILLUM, Crucible.

TIGLIA seu TIGLII GRANA, see Croton Tiglium.

TIGRETIER, see Mania, dancing.

TIGULA, Saccharum.

TIKIMMA, Cacoucia coccinea.

TILBURY, MINERAL WATERS OF. A saline chalybeate at West Tilbury, in Essex, England. It is not much frequented.

TILIA, *T. Europæ'a* seu *grandiflo'ra* seu *cordifo'lia* seu *pauciflo'ra* seu *platyphyll'a*, *Phil'yra*. The *Lime tree* or *Linden tree*, *Basswood*, *Whitewood*, *Spoonwood*, (F.) *Tilleul*. *Family*, Tiliaceæ. The flowers have been supposed to possess anodyne and antispasmodic virtues.

*TILLEUL*, Tilia.

TILLICHERRY CORTEX, Nerium antidysentericum.

TILMA, Linteum.

TILMOS, Evulsion.

TILMUS, Carphologia.

TILY, OF THE INDIANS, Viburnum dentatum.

TIMAC. The name of an East India root, but of what vegetable is not clear. It is said to possess diuretic properties; and hence has been given in dropsies.

TIMIDUS, Rectus inferior oculi.

TIN, (D.) Ten. *Stannum*, *Cassit'eros*, *Cattit'eros*, *Stangos*, *Ju'piter*, *Stu'pia*, *Laos*, *Plumbum album* seu *can'didum*, *Plumbum candidum*, (F.) *Étain*. A solid metal; of a peculiar odour when rubbed; insipid; colour whitish; s. g. 7.291; giving a peculiar *tinkling* sound when struck. It is used, in medicine, only as a mechanical anthelmintic. Dose, ʒj of the *Pulvis Stanni*, *Stannum granula'tum* or *Granular tin*, in molasses. This is made by melting tin in an iron vessel over the fire, and, while it is cooling, stirring until it is reduced to a powder, which is passed through a sieve.—Ph. U. S.

Tin, Butter of, Tin, muriate of—t. Chloruret of, Tin, muriate of—t. Deutohydrochlorate of, T. muriate of.

Tin-Foil, *Stannum folia'tum*, *Stanni'olum*, is used for plugging carious teeth, &c.

Tin-Glass, Bismuth — t. Granular, see Tin — t. Muriate of, superoxygenated, T. muriate of.

Tin, Muriate of, *Butter of Tin*, *Fuming liquor of Liba'vius*, *Mu'rias Stanni*, *Murias Oxyd'uli Stanni*, *Chlor'uret of Tin*, *Deu'to-hydro-chlorate of Tin*, *Superoxygena'ted Muriate of Tin*. This is formed of *Tin*, one part; *concentrated muriatic acid*, three parts. To be crystallized by the aid of heat. A violent cathartic. Dose, gr. ij or iij.

Tin, Sulphuret of, Aurum musivum.

TINAGMUS, Concussion.

TINASMUS, Tenesmus.

TINCTU'RA, from *tingere*, *tinctum*, 'to dye.' *Tincture*, *Essen'tia*, (F.) *Teinture*, *Alcoolat*, *Alcohol*. The term tincture is generally restricted to spirituous solutions of vegetable, animal, and some saline substances. It corresponds, therefore, with the word *Quintes'sence*, in one of its old significations; and with the *Alcoola'tum* of the *Codex* of Paris. It is not unusual, however, to speak of *aqueous tincture*, *ethereal tincture*, &c. Tinctures are made either with pure alcohol or proof spirit. The former are precipitated by water: and, therefore, are seldom used internally; the latter are common additions to infusions, decoctions, &c. They ought not, of course, to be united with any vehicle which can decompose them, or separate any thing from them in a palpable form; unless such decomposition is desired by the prescriber. In making tinctures, the ingredients should be reduced to a coarse powder; and the maceration be made in close vessels, exposed to a heat of about 80°, and frequently shaken. When completed, they must be filtered, and put away for use in close bottles. When the process of displacement is employed, great care must be taken, so that the substances treated may be, as far as possible, exhausted of their soluble principles, and a perfectly clear tincture be obtained. To those who are not familiar with the process, the plan of maceration is preferable. —*Ph. U. S.*

Tinctura Absin'thii Compos'ita, *Compound Tincture of wormwood*, *Essen'tia absin'thii composita* seu *amara*. (*Absinth.*, *artem. pontic.*, *caryoph.* āā ʒss, *sacch.* ʒij. *alcohol.* Oss. Macerate for fifteen days. *Ph. P.*) Tonic, stomachic, vermifuge, and carminative. Dose, fʒij to fʒss.

Tinctura Acaciæ Catechu, T. catechu — t. Acetatis ferri cum alcohole, see T. ferri acetatis — t. Acidi sulphurici, Sulphuricum acidum aromaticum.

Tinctura Aconi'ti, (Ph. U. S. 1842.) *Tinctu'ra Aconi'ti folio'rum*, (Ph. U. S. 1851.) *Tincture of Aconite*, (*Aconit. folior.* ʒiv, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter through paper. It may also be made by displacement. Ph. U. S.) Dose, gtt. v. It is rubbed on the seat of neuralgia.

Tinctura Aconi'ti Radi'cis, *Tincture of Aconite root*, (*Aconit. radicis*, contus. ℔j, *Alcohol.* Oij. Macerate for 14 days; express and filter. It may also be prepared by displacement. Ph. U. S.) Uses same as the last.

Tinctura Æthe'rea Camphora'ta, *Solu'tio cam'phoræ æthe'rea, Liquor nervinus Bangii, Spiritus sulphu'rico-æthereus camphora'tus, Naphtha vitrioli camphora'ta.* (*Camphor.* p. i. *Æther sulphuric.* p. ii.) Stimulant in atonic diseases, arthritic cardialgia and spasm. Dose, 20 to 30 drops in white wine.

Tinctura Ætherea Ferri, Alcohol (seu Tinctura) sulphurico-æthereus ferri — t. Alcoholica Chinæ composita, T. cinchonæ composita—t. Alcoholica corticum aurantiorum Whyttii, Tinctura cinchonæ amara — t. Alexipharmaca Huxhami, Tinctura cinchonæ composita.

Tinctura Al'oes, *T. Al'oes Socotori'næ, Essen'tia Aloes, Al'cohol cum Aloë perfolia'tâ, Tincture of Aloes.* (*Aloes,* pulv. ℥j, *ext. glycyrrh.* ℥iij, *aquæ* Oiss, *alcohol.* Oss. Macerate for 14 days, and filter. Ph. U. S.) Properties, those of aloes. Dose, f℥ss to f℥iss.

Tinctura Aloes Æthe'rea, *Æthe'real Tincture of Aloes, Tinctura aloes vitriola'ta.* (*Aloes Socot., Myrrh,* āā ℥iss, *croci* ℥j, *sp. ætheris sulph.* Oj. Digest the myrrh in the ether for 4 days; then add the aloes and saffron. Ph. E.) Stimulant and cathartic. Dose, f℥j to f℥ij.

Tinctura Aloes Compos'ita, *Elix'ir Proprieta'tis, E. aperitif'rum, E. Aloes, Tinctura Aloes cum Myrrhâ, T. Aloës et Myrrhæ,* (Ph. U. S.,) *T. Aloes et Myrrhæ croca'ta, Elixir of long life, Compound Tincture of Aloes,* (F.) *Elixir de longue vie, Baume de vie de Lelièvre,* (*Aloes,* in pulv., ℥iij, *croci,* ℥j, *Tinct. Myrrhæ,* Oij.) Macerate for 14 days, and filter. Purgative and stomachic. Dose, f℥j to f℥ij.

*Boerhaave's Elixir* consisted of *aloes, myrrh, saffron,* and *tartrate of potassa,* digested in *alcohol* and *water.*

*Radcliffe's Elixir* is formed of *Aloës Socotr.* ℥vj, *cort. cinnam., rad. zedoar,* āā ℥ss, *rad. rhei* ℥j, *coccinell.* ℥ss, *syrup. rhamni* ℥ij, *sp. tenuior.* Oj. *aquæ puræ* f℥v.

Tinctura Aloes et Myrrhæ, T. aloës compositа — t. Aloes et myrrhæ crocata, T. A. compositа — t. Aloes vitriolata, T. A. ætherea — t. Amara, T. gentianæ composita — t. Amomi repentis, T. cardamomi — t. Amomi zingiberis, T. zingiberis.

Tinctura Angustu'ræ, *Tincture of Angustura.* (*Cort. cuspar.* in pulv. crass. redact. ℥ij, *sp. vin. ten.* Oij. Digest. Ph. D.) Dose, f℥j to f℥ij.

Tinctura Antifebrilis Warburgi, see Bebeeru.

Tinctura Antiodontal'gica, *Toothache Tincture.* (*Tannin.* ℈j, *Mastich,* gr. v, *æther.* ℥ij. M.) To be applied on cotton wool, to the tooth previously dried.

Tinctura Aristolochiæ Serpentariæ, T. serpentariæ — t. Aromatica, T. cinnamomi compositа—t. Aromatica ammoniata, Spiritus ammoniæ aromaticus.

Tinctura Assafœ'tidæ, *T. Fer'ulæ Assafœtidæ, Tincture of Assafœtida, T. fœtida, T. assafœtidæ,* (*Assafœtid.* ℥iv, *alcohol.* Oij. Macerate for 14 days and filter.) Dose, gtt. xv to f℥j.

Tinctura Assafœtidæ Ammoniata, Spiritus Ammoniæ fœtidus.

Tinctura Auran'tii, *T. Cor'ticis Aurantii, Tincture of Orange Peel.* (*Aurant. cort.* recent. ℥iij, *sp. rect.* Oij. Digest for 14 days.) Stomachic. Used as an adjunct to stomachic draughts. Dose, f℥ss to ℥ij.

Tinctura Aurea, Alcohol seu tinctura sulphurico-æthereus ferri.

Tinctura Belladon'næ, *Tincture of Belladonna.* (*Belladonnæ,* ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days; express, and filter through paper. It may, also, be prepared by displacement. *Ph. U. S.*)

Tinctura Benzo'ini Compos'ita, *Compound Tincture of Benzoin, T. Benzoes composita, Bal'samum Cathol'icum, B. Per'sicum, Balsamum traumat'icum, Elixir traumaticum, Friar's Balsam, Vervain's Balsam, Wade's Drops, Jesuit's drops, Commander's Balsam, Wound Balsam, Balsam for cuts.* (*Benzoin.* ℥iij, *styrac. purif.* ℥ij, *Balsam. tolut.* ℥j, *aloes,* in pulv. ℥ss, *alcohol.* Oij. Macerate for 14 days and filter. Stimulant.) Used chiefly to wounds and ulcers.

The basis of *Turlington's Balsam of Life* is the Compound Tincture of Benzoin. The following form is recommended by a committee of the Philadelphia College of Pharmacy: — *Alcohol.* Oviij, *Benzoin.* ℥xij, *Styrac. liquid,* ℥iv, *Aloes Socotrin.* ℥j, *Balsam Peruvian.* ℥ij, *Myrrhæ,* ℥j, *Rad. Angelic.* ℥ss, *Balsam Tolut., Ext. Glycyrrh.* āā ℥iv. Digest for 10 days, and strain.

The *Essence of Coltsfoot* consists of equal parts of the *Compound Tincture of Benzoin* and *Balsam of Tolu,* to which is added double the quantity of *Rectified Spirit of Wine.* It is sold as a pectoral.

Tinctu'ra Calum'bæ, *T. Columbæ, T. Colombo, Tincture of Columbo, Columbo Bitters,* (*Calumb. rad.* cont. ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days; express, and filter. *Ph. U. S.*) Dose, f℥ss to ℥iv. It may, also, be made by displacement.

Tinctura Camphoræ, Spiritus camphoræ.

Tinctura Cam'phoræ Compos'ita, *T. Opii Camphora'ta,* (Ph. U. S.,) *Compound Tincture of Camphor, Camphorated Tincture of Opium, Elixir Paregor'icum, Paregor'ic Elixir.* (*Opii,* in pulv. *Acid Benzoïc.* āā ℥j, *ol. anisi,* f℥j, *mellis despumat.* ℥ij, *Camphor.* ℈ij, *alcohol. dilut.* Oij. Macerate for 14 days, and filter through paper. *Ph. U. S.*) One fluidounce contains nearly gr. ij of opium. Anodyne. Dose, f℥j to f℥iij.

*Squire's Elixir,* an empirical carminative preparation, is thus made, according to one formula. (*Opii* ℥iv, *camphor.* ℥j, *coccinell.* ℥j, *fœnicul. dulc.* ℥ij, *tinct. serpent.* Oj, *sp. anisi.* cong. ij, *aquæ* Oij, *auri musivi,* ℥vj.)

Tinctura Canthar'idis, *T. C. Vesicato'riæ, T. Lyttæ, T. Meloës vesicato'rii, Tincture of Blistering Flies, T. of Spanish Flies,* (F.) *Teinture rubéfiante.* (*Cantharid.* cont. ℥ij, *alcohol. dilut.* Oij. Macerate for 14 days; express, and filter. It may, also, be prepared by displacement. *Ph. U. S.*) Stimulant and diuretic, but not often used internally. Externally, stimulant. Dose, gtt. x.

*Matthew's Injection,* a once celebrated nostrum for fistula in ano, consisted wholly of a dilute *Tincture of Cantharides.*

Tinctura Cap'sici, *Tincture of Capsicum.* (*Capsic.* ℥j. *alcohol. dil.* Oij. Macerate for 14 days, and filter. It may, also, be prepared by displacement.) Stimulant. Dose, f℥ss to ℥j.

Tinctura Cardamo'mi, *T. amo'mi repen'tis, Tincture of Car'damoms.* (*Cardam.* cont. ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, strain, and filter. It may, also, be made by displacement.) Use, the same as the seeds. Dose, f℥j to f℥iv.

*Solomon's Balm of Gil'ead,* an empirical preparation, seems to be an aromatic tincture. — of which *Cardamoms* form a leading ingredient, — made with brandy. Some affirm that it contains *cantharides.*

Tinctura Cardamomi Compos'ita, *Compound Tincture of Card'amoms, Stomach Tincture, Tinctura Stomach'ica.* (*Cardamom.* cont. ℥vj. *Curui.* cont. ℥ij, *cinnam.* cont. ℥v, *Uvæ passæ* demptis acinis, ℥v, *cocci.* cont. ℥j, *alcohol. dilut.* Oiss.

Macerate for 14 days; express and filter. *Ph. U. S.*) Stomachic and carminative. Dose, f℥ij to f℥iv.

TINCTURA CARMINATI'VA SYL'VII, *Alcoola'tum Carminati'vum Sylvii, Carminative Elixir of Sylvius.* (*Rad. angelic.* 4 p., *rad. imperator., galang.* āā 6 p., *fol. rosmarin., majoran., rutæ, basilic.* āā 48 p., *baccar. laur. nobil.* 12 p. *sem. angelic., ligust. levist., anis.* āā 16 p., *zingib., nuc. moschat.* āā 6 p., *cinnam.* 12 p., *caryoph., cort. limon.* āā 4 p. Add *alcohol* 1500 p. Macerate and distil, 1000 p. *Ph. P.*) A warm stomachic, carminative, &c. Dose, ℥ss to f℥ss.

TINCTURA CASCARIL'LÆ, *T. Croto'nis Eleuthe'riæ, Al'cohol cum Croto'nē Cascarillâ, Tincture of Cascarilla.* (*Cascarill. cort.* cont. ℥iv, *sp. ten.* Oij. *Ph. L.*) Dose, f℥j to f℥iv.

TINCTURA CASTO'REI, *T. Castorei Ros'sici, Essen'tia Castorei, Al'cohol castoria'tum, T. Castorei Canaden'sis, Tincture of Castor.* (*Castor* cont. ℥ij, *alcohol.* Oij. Macerate for 7 days, express, and filter.) Tonic and antispasmodic. Dose, gtt. xx to f℥ij, or more.

TINCTURA CASTOREI COMPOS'ITA, *Compound Tincture of Castor.* (*Cast.* ℥j, *g. asafœtid.* ℥ss, *alcohol. ammoniat.* Oj. *Ph. E.*) Antispasmodic. Dose, f℥j to f℥iv. Called, also, *Elixir fœ'tidum, Tinctura castorei fœtida* seu *fœtida ammonia'ta.*

TINCTURA CAT'ECHU, *Tinctura Japon'ica, T. Mimo'sæ Catechu, T. Aca'ciæ Catechu, Tincture of Catechu.* (*Catech.* ℥iij, *cinnam.* contus. ℥ij, *alcohol. dilut.* Oij. Macerate for 14 days, express and filter. *Ph. U. S.*) Astringent. Dose, f℥j to f℥ij.

The *Concentrated Solution of Charcoal*, sold for cleaning the teeth, seems to be little more than the tincture of catechu.

TINCTURA CICUTÆ, T. conii maculati.

TINCTURA CINCHO'NÆ, *T. Cor'ticis Peruvia'ni Simplex, T. Cort. Peruvia'ni, Tincture of Cinchona, Tincture of Bark.* (*Cinchon. flav.* in pulv. ℥vi, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter through paper. It may, also, be made by displacement. *Ph. U. S.*) Dose, f℥j to ℥iv or more.

TINCTURA CINCHO'NÆ AMA'RA, *Elixir antihypochondri'acum, E. rob'orans Whyt'tii, E. Whyttii, Essen'tia Cor'ticis Peruvia'ni Composita, Tinctu'ra alcohol'ica corticum aurantio'rum Whyttii, T. Kinki'næ ama'ra, Elixir stomach'icus spirituo'sus.* (*Cinch.* p. viij, *Gentian. Rad., Cort. Aurant.* p. iij. *Alcohol* (.900) 96 p. Digest. Dose, one or two teaspoonfuls.

TINCTURA CINCHONÆ AMMONIA'TA, *T. Cor'ticis Peruvia'ni volat'ilis, Ammoniated Tincture of Bark, Volatile Tincture of Bark.* (*Cinchon. lancifol. cort.* cont. ℥iv, *sp. ammon. aromat.* Oij. *Ph. L.*) In dyspepsia, combined with acidity and languor.

TINCTURA CINCHONÆ ÆTHE'REA COMPOS'ITA, *T. Kinæ Kinæ æthe'rea compos'ita, Elixir'ium Antisep'ticum Docto'ris Chaussier, Chaussier's Antisep'tic Elixir.* (*Cinchon. officin.* ℥ij, *cascarill.* ℥ss, *cinnam.* ℥iij, *croci* ℥ss, *sacch. alb.* ℥xxxviij. Put these bruised into a matrass, and add *vin. alb. Hispanic.* vel *vin. muscat., alcohol.* āā Oj. Macerate for two days, and add *sulphuric ether* f℥iss. *Ph. P.*) Tonic, stimulant, and antiseptic. Dose, f℥ss to f℥j.

TINCTURA CINCHONÆ COMPOS'ITA, *Compound Tincture of Cinchona* or *Bark, Huxham's Tincture of Bark, T. Cor'ticis Peruvia'ni Composita, T. febrif'uga Docto'ris Huxha'mi, Essen'tia Chinæ, E. Cor'ticis Peruvia'ni Alexiphar'maca Huxhami, Essen'tia antisep'tica Huxhami, Tinctu'ra Alexiphar'maca Huxhami, Tinctu'ra Alcohol'ica Chinæ Compos'ita.* (*Cinchon. rubr.* pulv. ℥ij, *aurant. cort.* cont. ℥iss, *serpent.* cont. ℥iij, *croci, santal.* āā ℥j, *alcohol. dilut.* f℥xx. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may, also, be made by displacement. More grateful than the simple tincture. Dose, f℥j to f℥iij.

TINCTURA CINNAMO'MI, *Tincture of Cinnamon, Essen'tia Cinnamomi, T. Lauri Cinnamomi,* (*Cinnam.* cont. ℥iij, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may, also, be prepared by displacement. Stomachic. Dose, f℥j to f℥iij.

TINCTURA CINNAMO'MI COMPOS'ITA, *Compound Tincture of Cinnamon, Tinctu'ra Aromat'ica, Essen'tia Aromatica, Alcoöl cum Aromat'ibus Compos'itus, Eau de Bonferme* ou *d'Armagnac.* (*Cinnam.* cont. ℥j, *cardam.* cont. ℥ss, *zingib.* cont. ℥iij, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may, also, be prepared by displacement. Use, same as the last. Dose, f℥j to f℥iij.

TINCTURA DE COCHLEA'RIIS, *Alcoola'tum de Cochlea'riis, A. antiscorbu'ticum.* (*Fol. cochlear. recent.* 2500 p., *rad. armoraciæ,* 230 p., *alcohol.* (22° to 32° Beaumé) 3000 p., distil off 2000 p. *Ph. P.*) Antiscorbutic. Dose, f℥ij to ℥j.

TINCTURA COL'CHICI, *T. C. Sem'inis,* (*Ph. U. S.*), *Tincture of Colchicum Seed.* (*Colchic. sem.* cont. ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may, also, be prepared by displacement. Dose, ten to sixty drops.

TINCTURA COLCHICI SEMINIS, T. colchici—t. Columbæ, T. Calumbæ.

TINCTURA CONI'I, *T. C. Macula'ti, T. Cicu'tæ, Tincture of Hemlock.* (*Conii fol.* ℥iv, *alcohol. dil.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be made by displacement. Use; — the same as that of the leaves.

TINCTURA CONII MACULATI, T. conii — t. Convolvuli Jalapæ, T. jalapii — t. Corticis aurantii, T. aurantii — t. Corticis Peruviani composita, T. cinchonæ comp. — t. Corticis Peruviani simplex, T. cinchonæ — t. Corticis Peruviani volatilis, T. cinchonæ ammoniata.

TINCTURA CROCI SATI'VI, *T. Croci, Tincture of Saffron.* (*Croci Angl.* cont. ℥j, *alcohol. dilut.* ℥xv. *Ph. E.*) Slightly stomachic (?). Dose, f℥j to f℥iij.

TINCTURA DE CROCO COMPOS'ITA, *Elixir'ium de Garus, Alcoola'tum de Croco Compos'itum, Compound Tincture of Saffron, Elixir of Garus.* (*Aloes Socotr.* 320 p., *myrrh.* 64 p., *croci.* 32 p., *cinnam., nuc. moschat., caryoph.* āā, 16 p. *alcohol.* 1000 p. *aq. flor. aurant.* 5000 p. Digest for two days, distil 4000 p. and add *syrup of capillaire,* 5000 p. *Ph. P.*) Aromatic, cordial, stomachic. It is also called *Elixir cordia'lē et stomach'icum,* and *E. anticol'icum croça'tum.*

TINCTURA CROTONIS ELEUTHERIÆ, T. cascarillæ.

TINCTURA CUBEB'Æ, *Tincture of Cubebs.* (*Cubeb.* cont. ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may, also, be prepared by displacement. Dose, one or two fluidrachms.

TINCTURA DIGITA'LIS, *Tincture of Digitalis, T. Digitalis purpu'reæ.* (*Digital.* ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter.) It may, also, be prepared by displacement. Use, same as that of the leaves. Dose, gtt. x.

TINCTURA FEBRIFUGA DOCTORIS HUXHAMI, T. cinchonæ composita.

TINCTURA FERRI ACETA'TIS, *Tincture of Acetate of Iron.* (*Potass. acetat.* ℥ij, *sulph. ferri* ℥j, *sp. rectif.* Oij. Rub the acetate and sulphate into a soft mass. Dry and rub with the spirit. Digest for 7 days, and pour off. *Ph. D.*) Tonic and astringent. Dose, gtt. xx to f℥j. The Dublin college directs a *Tinctura Acetatis Ferri cum Alcoho'lē,* which differs from the other, in having

half the quantity, only, of the *Acetate of Potass.*

Tinctura Ferri Ammonia'ta, *Tincture of Ammoniated Iron, T. Ferri Ammoniaca'lis, T. Florum martia'lium, T. Martis Mynsich'ti.* (*Ferri ammon.* ℥iv, *sp. ten.* Oj. *Ph. L.*) *Use* — same as that of the ammoniated iron. Dose, f℥ss to f℥ij.

Tinctura Ferri Chloridi, T. ferri muriatis.

Tinctura Ferri Muria'tis, *T. Ferri chlo'ridi,* (Ph. U. S.), *T. Ferri sesqui-chlo'ridi, Liquor Ferri muria'tis, Tincture of Muriate of Iron, T. Martis in Spiritû Salis, T. M. cum Spiritû Salis, T. Ferri Muria'ti, Tincture of Steel, Alcohol ferra'tus.* (*Ferri subcarb.* ℔ss, *acid. muriat.* Oj, *alcohol.* Oiij. Add the acid to the subcarbonate in a glass vessel, and shake during three days. Pour off and add the spirit. *Ph. U. S.*) Tonic and styptic. Dose, gtt. x to xx.

*Bestucheff's Tincture* or *Klaproth's Tincture* is an ethereal tincture of chloride of iron. It is composed of dry *perchloride of iron,* one part; *Hoffmann's anodyne liquor,* seven parts.

The *Antivenereal Drops,* at one time so celebrated at Amsterdam, were examined by Scheele, and found to be a tincture of chloride of iron and corrosive sublimate.

Tinctura Ferri Sesquichloridi, T. Ferri muriatis — t. Ferulæ Asafœtidæ, T. Asafœtidæ — t. Florum martialium, T. ferri ammoniata — t. Fœtida, T. asafœtidæ — t. Fœtida ammoniata, T. castorei composita — t. Fuliginis, see Fuligo.

Tinctura Gal'bani, *Tincture of Galbanum.* (*Galb.* ℥ij, *sp. tenuior.* Oij. *Ph. D.*) Stimulant and antispasmodic. Dose, f℥j to f℥iij.

Tinctura Galla'rum, *T. Gallæ,* (Ph. U. S.) *Tincture of Galls.* (*Gall.* contus. ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, express and filter. *Ph. U. S.*) It may, also, be prepared by displacement. Astringent. Dose, f℥j to ℥iij.

Tinctura Gentia'næ Compos'ita, *Compound Tincture of Gentian, Tinct. Ama'ra, Spirit Bitters, Elix'ir Stomach'icum.* (*Gent.* concis. ℥ij, *aurant. cort.* ℥j, *cardam.* cont. ℥ss, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. It may, likewise, be prepared by displacement. *Ph. U. S.*) Tonic and stomachic. Dose, f℥j to f℥iij.

*Brodum's Nervous Cordial* consists of the *Tinctures of Gentian, Columba, Cardamom,* and *Bark,* with the *Compound Spirit of Lavender,* and *Wine of Iron.*

*Stoughton's Elixir* is a compound tincture of gentian. The *Elixir'ium Docto'ris Stoughton* seu *Tinctu'ra Ama'ra* of the Parisian Codex is prepared as follows: — *Absinth. summit.* exsiccat., *Teucri chamædrys., Rad. gentian., cort. aurant.* āā ℥vj, *cascarillæ* ℥j, *rhei* ℥ss, *aloes socotr.* ℥j, *alcohol.* Oij.) Digest.

Tinctura Guai'aci, *T. G. Officina'lis, Tincture of Guai'acum.* (*Guaiac.* ℔ss, *alcohol.* Oij. Macerate for 14 days, and filter.) Stimulant and sudorific. Used especially in rheumatic and arthritic cases. Nearly the same as *Hill's Essence of Bardana* or *Burdock.*

Tinctura Guai'aci Ammonia'ta, *Ammoniated Tincture of Guai'acum, T. Guaiaci'na Volat'ilis, Elixir Guai'aci Volatilis, Al'cohol cum Guai'aco officina'le ammonia'tus, Al'cohol ammoniæ et Guai'aci, T. Guai'aci,* (*P. L.* 1788,) *Vol'atile Tincture of Guai'acum.* (*Guaic.* pulv. ℥iv, *sp. ammon. arom.* Oiss. Macerate for 14 days, and filter.) Properties same as the last. Dose, f℥j to f℥ij.

*Hatfield's Tincture* — a nostrum — consists of *Guaiacum* and *Soap,* āā ℥ij, *rectified spirit,* Oiss.

Tinctura Helleb'ori, *T. H. Nigri, Tincture of Black Hellebore, T. Melampo'dii.* (*Helleb. nigr.* cont. ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, express and filter. It may also be prepared by displacement. *Ph. U. S.*) Dose, f℥ss to f℥j.

Tinctura Hiera, Vinum aloes.

Tinctura Hu'muli, *Tincture of Hops.* (*Humuli,* ℥v, *alcohol. dilut.* Oij.) Tonic and sedative. Dose, f℥ss to f℥iij.

Tinctura Hyoscy'ami, *T. Hyoscyami nigri, Tincture of Henbane.* (*Hyoscyam. fol.* ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, express and filter. It may also be prepared by displacement. *Ph. U. S.*) Narcotic, anodyne. Dose, gtt. xx to f℥ij.

Tinctura Io'dini, (Ph. U. S., 1842,) *Tinctu'ra Iodin'ii,* (Ph. U. S., 1851,) *Alcohol Io'dii, Tincture of Iodine.* (*Iodin.* ℥j, *alcohol.* Oj. Dissolve. *Ph. U. S.*) The tincture spoils by keeping, or at least, deposits the iodine. It has been much used in goître, &c. Dose, ten drops three times a day.

Tinctura Iodini Compos'ita, (Ph. U. S., 1842,) *Tinctura Iodin'ii Composita,* (Ph. U. S., 1851,) *Compound Tincture of Iodine.* (*Iodin.* ℥ss, *Potassii iodid.* ℥j, *Alcohol.* Oj. Dissolve. *Ph. U. S.*) Dose, 10 to 30 drops.

Tinctura Jala'pii, *T. Jala'pæ,* (Ph. U. S.,) *T. Convol'vuli Jalapæ, Tincture of Jalap, Vali'ga.* (*Jalap.* pulv. ℥vi, *Alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be made by displacement. Cathartic. Dose, f℥j to f℥iv.

Tinctura Jala'pii Compos'ita, *Elixir Jalap'æ Compos'itum, Elixir purgans, Essen'tia cathol'ica purgans Roth'ii, Elixir anthelmin'ticum Sueco'rum, Eau de vie Allemande.* (*Jalap.* ℔ss, *Scammon.* ℥j, *Alcohol.* (22°) Ovj. Macerate for eight days. *Ph. P.*) Dose, 60 to 100 drops.

Tinctura Japonica, Tinctura catechu — t. Kinæ kinæ ætherea composita — t. Cinchonæ ætherea composita — t. Kinkinæ amara, Tinctura cinchonæ amara.

Tinctura Kino, *Tincture of Kino.* (*Kino,* in pulv., ℥vj; *Alcohol. dilut.* q. s. Put the kino, mixed with an equal bulk of sand, into a percolator, and gradually pour on diluted alcohol until f℥viij of filtered liquor pass. The tincture should be renewed frequently, and kept in closely stopped bottles. Ph. U. S.) Astringent. Dose, f℥j to f℥ij.

Tinctu'ra Krame'riæ, *Tincture of Rhatany.* (*Kramer.* in pulv. ℥vj, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Dose, f℥j to f℥ij.

Tinctura Lauri Cinnamomi, Tinctura cinnamomi — t. Lavandulæ composita, Spiritus lavand. comp. — t. Lyttæ, Tinctura cantharidis — t. Martis Glauberi, see Ferrum tartarizatum — t. Martis in spiritû salis, Tinctura ferri muriatis — t. Martis, Mynsichti, Tinctura ferri ammoniata — t. Martis vinosa, Vinum ferri — t. Melampodii, Tinctura hellebori nigri — t. Meloes vesicatorii, Tinctura cantharidis — t. Metallorum, Lilium Paracelsi — t. Mimosæ catechu, Tinctura catechu.

Tinctu'ra Lobe'liæ, *Tincture of Lobelia.* (*Lobel.* ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Dose, f℥j to f℥ij.

Tinctu'ra Lupuli'næ, *Tincture of Lu'puline.* (*Lupulin.* ℥iv, *alcohol.* Oij. Macerate for 14 days, and filter. *Ph. U. S.*) Dose, f℥j to f℥ij.

Tinctura Meloes Vesicatorii, Tinctura cantharidis.

Tinctura Moschi, *Tincture of Musk, Essence of Musk.* (*Mosch.* in pulv. redact. ℥ij, *sp. vini rect.* Oj.) Dose, f℥j to f℥iv.

Tinctura Myrrhæ, *Tincture of Myrrh, Simple Tincture of Myrrh.* (*Myrrhæ* contusæ ℥iv, *alcohol* Oiij. Macerate for 14 days, and filter. *Ph.*

*U. S.*) Tonic, deobstruent, antiseptic, and detergent. It is chiefly used in gargles, and applied to foul ulcers, spongy gums, &c.

*Hudson's Preservative for the Teeth and Gums* consists of *Tinct. myrrh., tinct. cinch., aq. cinnam.* āā ℥iij, *eau d'arquebusade,* ℥j, *pulv. gum. Arab.* ℥ss. M.

Tinctura Nervina Bestucheffii, Tinctura seu alcohol sulphurico-æthereus ferri—t. Nervina Halensis, Tinctura seu alcohol sulphurico-æthereus ferri—t. Nervino-tonica, Lamotte's, Alcohol seu tinctura sulphurico-æthereus ferri.

Tinctura Nucis Vom'icæ, *Tincture of Nux Vomica.* (*Alcohol.* s. g. .837, f℥j; *Dry Extract of Nux Vomica,* 3 gr.) Dose, gtt. v to xxx, in cases where the nux vomica is indicated.

It is directed, in the last edition of the Ph. U. S. (1851), to be prepared as follows:—*Nucis vomicæ* rasur., ℥viij; *alcohol,* Oij. Macerate for 14 days, express, and filter. It may also be prepared by the process of displacement. Dose, gtt. v to xx.

Tinctura Olei Menthæ Piperi'tæ, *Tincture of Oil of Peppermint, Essence of Peppermint.* (*Ol. menthæ piperitæ,* f℥ij, *alcohol.* Oj. Dissolve. Ph. U. S.) Dose, 5 drops, as a carminative.

Tinctura Olei Menthæ Vir'idis, *Tincture of Spearmint, Essence of Spearmint,* is made in the same manner. Ph. U. S.

Tinctura Opii, *Tincture of Opium, Liquid Lau'danum, Theriaca cœles'tis, Al'cohol cum Opio, Tinctura Theba'ica, Tinctura Sedati'va.* (*Opii* pulv. ℥ijss, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) Nineteen minims contain about one grain of opium. Properties, those of opium. Dose, gtt. xx to lx and more. By macerating the dregs remaining after making the *Tinctura Opii* in a solution of *Tartaric Acid,* a solution is obtained, which is said to be devoid of the exciting and constipating properties of the tincture of opium. Gray calls it *Haden's Liquor Opii Sedati'vus.*

Tinctu'ra Opii Aceta'ta, *Ac"etated Tincture of Opium.* (*Opii* ℥ij; *aceti,* f℥xij; *alcohol.* Oss. Rub the opium with the vinegar; add the alcohol, and having macerated for 14 days, express and filter. *Ph. U. S.*) Twenty drops are equivalent to a grain of opium.

Tinctura Opii Ammonia'ta, *Ammo'niated Tincture of Opium, Edinburgh Paregor'ic Elix'ir.* (*Flor. benz., croci,* āā ℥iij, *opii* ℥ij, *ol anisi* ℥ss, *alcohol. ammoniat.* f℥xvj. Digest. *Ph. E.*) f℥j contains one grain of opium. Used like the *Tinctura Camphoræ Composita.*

Tinctura Opii Camphorata, Tinctura camphoræ composita—t. Plumbosa, Liquor plumbi subacetatis dilutus.

Tinctura Quas'siæ, *T. Quassiæ excel'sæ, Tincture of Quassia.* (*Quassiæ rasur.* ℥ij, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Tonic. Dose, f℥j to ℥ij.

Tinctura Qui'niæ Sulpha'tis, *Tincture of Sulphate of Qui'nia.* (*Sulphate of Quinia,* gr. vj; *alcohol,* (.847) f℥j. M.) Dose, f℥j to ℥iv, in the day.

A *Tinctura Cincho'niæ Sulpha'tis* may be made in a similar manner.

Tinctura Rhabarbari, Tinctura rhei—t. Rhabarbari composita, Tinctura rhei—t. Rhabarbari vinosa, Vinum rhei palmati.

Tinctura Rhei, *T. Rhabarb'ari, T. Rhabarbari spirituo'sa, T. Rhœi, T. Rhei palma'ti, Tincture of Rhubarb.* (*Rhei,* contus. ℥iij, *cardam.* cont. ℥ss, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. It may also be prepared by displacement. *Ph. U. S.*) Stomachic or purgative, according to the dose employed: f℥j to ℥ij, as a stomachic; f℥iv to ℥j, as a purgative.

Tinctura Rhei Compos'ita, *T. Rhabarbari composita, Compound Tincture of Rhubarb.* (*Rhei rad.* concis. ℥ij, *glycyrrhiz. rad.* cont. ℥ss, *zingib. rad.* concis., *croci stigmat.* āā ℥ij, *aquæ* f℥xij, *sp. ten.* Oj. *Ph. L.*) Properties same as the last.

Tinctura Rhei et Al'oes, *Tincture of Rhubarb and Aloes, Elixir sacrum.* (*Rhei* concis ℥x, *aloes,* pulv. ℥vj, *cardam.* cont. ℥ss, *alcohol dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) Properties like the last.

*Rymer's Car'diac Tincture* consists of an infusion of *Capsicum, Camphor, Cardamom seeds, Rhubarb, Aloes* and *Castor* in *Proof Spirit,* with a very small quantity of *Sulphuric Acid.*

Tinctura Rhei et Gentia'næ, *Tincture of Rhubarb with Gen'tian, Tinctura Rhei Ama'ra.* (*Rhei* cont. ℥ij, *gentian.* cont. ℥ss, *alcohol. dilut.* Oij. Macerate for 14 days, express and filter. *Ph. U. S.*) It may also be prepared by displacement. Properties same as the last.

Tinctura Rhei et Sennæ, *Tincture of Rhubarb and Senna, Warner's Gout Cordial.* (*Rhei* cont. ℥j, *sennæ,* ℥ij, *coriandr.* cont., *fœnicul.* cont. āā ℥j, *santal.* rasur. ℥ij, *croci ext. glycyrrhiz.* rad. āā ℥ss, *uvar. passar.* acinis exemptis, ℔ss, *alcohol. dilut.* Oiij. Macerate for 14 days; express and filter. *Ph. U. S.*) Dose, f℥ss to f℥ij.

Tinctura Rhœi, Tinctura rhei—t. Rhœi amara, Tinctura rhei et gentianæ—t. Sacra, Vinum aloes.

Tinctura Sanguina'riæ, *Tincture of Bloodroot.* (*Sanguinar.* cont. ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Dose, 30 to 60 drops.

Tinctura Saponis Camphorata, Linimentum saponis—t. Saponis et opii, Linimentum saponis et opii.

Tinctura Scillæ, *Tincture of Squill.* (*Scillæ* ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. It may also be made by displacement. *Ph. U. S.*) Dose, gtt. xv to lx.

Tinctura Sedativa, Tinctura opii.

Tinctura Sennæ, *T. Sennæ Compos'ita, Elixir Salu'tis, Daffy's Elixir, Tincture of Senna.* (*Sennæ fol.* ℥iij, *carui sem.* cont. ℥ij, *cardam. sem.* cont. ℥j, *uvarum passarum* demptis acinis, ℥iv, *sp. ten.* Oij. *Ph. L. & D.*) Stomachic, carminative and cathartic. Dose, f℥ij to f℥j.

Tinctura Sennæ et Jala'pæ, *Tincture of Senna and Jalap.* (*Sennæ* ℥iij, *jalap.* pulv. ℥j, *coriandr.* cont., *carui* cont., āā ℥ss, *cardam.* cont ℥ij, *sacch.* ℥iv, *alcohol. dilut.* Oiij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Dose, f℥ij to f℥j.

Tinctura Serpenta'riæ, *T. S. Virginia'næ, T. Aristolochi'æ Serpentariæ, Tincture of Snakeroot.* (*Rad. serpent.* ℥iij, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Tonic. Dose, f℥ss to f℥ij.

Tinctura Stomachica, Tinctura cardamomi composita.

Tinctura Stramo'nii, *Tincture of Stramo'nium.* (*Stramon. sem.* cont. ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Dose, ten to twenty minims.

Tinctura Strych'niæ. *Tincture of Strych'nia.* (*Alcohol.* s. g. .837, Oj, *strychniæ* gr. iij.) Dose, 6 drops to 24. Properties, those of strychnia.

Tinctura seu Al'cohol Sulphu'rico-Æthereus Ferri, *Guttæ nervi'næ, Liquor Anod'ynus Martia'lis, Al'cohol æthe'reus ferru'tus, Naph'tha*

*Vitrioli Martia'lis, Solutio Muriatis ferrici æthe'rea, Spir'itus sulphurico-æthe'reus martialis, Tinctu'ra nervi'na Halen'sis, T. Ton'ico-nervi'na Halen'sis, Tinctura au'rea, T. nervina Bestucheffii, T. nervino-ton'ica (Lamotte's), T. æthe'rea ferri, Æther Martia'lis, De La Motte's Golden Drops, Bestucheff's Nervous Tincture, Elixir d'Or de M. le Général De La Motte.* An ethereal solution of muriate of iron. It is much used in gout, hypochondriasis, &c.

TINCTURA SULPHURIS VOLATILIS, Liquor fumans Boylii — t. Thebaica, Tinctura opii, Vinum opii.

TINCTURA TOLUIF'ERÆ BAL'SAMI, *Tincture of Balsam of Tolu, T. Bal'sami Toluta'ni, T. Toluta'ni*, (Ph. U. S., 1842.) *T. Toluta'na*, Ph. U. S., 1851), (*Bals. Tolutan.* ℥iij, *alcohol* Oij.) Reputed to be expectorant and corroborant. Dose, f℥ss to f℥j, or more.

TINCTURA TONICA NERVINA HALENSIS, Alcohol (seu Tinctura) sulphurico-ætherus ferri.

TINCTURA VALERIA'NÆ, *Tincture of Valerian.* (*Valerian.* cont. ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, express, and strain. It may also be prepared by displacement. *Ph. U. S.*) Stimulant and antispasmodic. Dose, f℥ss to ℥ij.

TINCTURA VALERIANÆ AMMONIA'TA, *Ammo'niated or Volatile Tincture of Valerian, T. Valerianæ Volat'ilis.* (*Valerianæ* cont. ℥iv, *sp. ammon.* arom. Oij. Macerate for 14 days, express, and filter. It may also be made by displacement. *Ph. U. S.*) Like the former. Dose, f℥ss to f℥ij.

TINCTURA VERA'TRI, *T. Veratri albi, Tincture of White Hellebore.* (*Rad. veratri alb.* cont. ℥viij, *alcohol. dilut.* Oijss. *Ph. E.*) Emetic and cathartic; but not very manageable. Dose, gtt. v to x.

TINCTURA ZINGIB'ERIS, *T. Amo'mi Zingiberis, Tincture of Ginger.* (*Zingib.* cont. ℥viij, *alcohol.* Oij. Macrate for 14 days, express, and filter. It may also be made by displacement. *Ph. U. S.*) Stimulant and carminative. Dose, f℥ss to f℥j.

TINCTURE OF ACETATE OF IRON, Tinctura ferri acetatis—t. of Aconite, Tinctura aconiti — t. of Aconite root, Tinctura aconiti radicis — t. of Balsam of Tolu, Tinctura toluiferæ balsami — t. of Bark, Tinctura cinchonæ — t. of Bark, ammoniated, Tinctura cinchonæ ammoniata — t. of Bark, compound, Tinctura cinchonæ composita —t. of Bark, Huxham's, Tinctura cinchonæ composita — t. of Bark, volatile, Tinctura cinchonæ ammoniata—t. of Belladonna, Tinctura belladonnæ—t. Bestucheff's, see Tinctura ferri muriatis—t. of Blistering Fly, Tinctura cantharidis — t. Cardiac, Rymer's, Tinctura rhei et aloes — t. of Colchicum seeds, Tinctura colchici — t. of Colombo, Tinctura Calumbæ — t. of Cubebs, Tinctura cubebæ — t. of Galls, Tinctura gallarum — t. of Ginger, Tinctura zingiberis — t. for the Gout, Dr. Wilson's, see Colchicum autumnale — t. Hatfield's, see Tinctura guaiaci ammoniata — t. of Hellebore, white, Tinctura veratri — t. of Hemlock, Tinctura conii maculati — t. of Henbane, Tinctura hyoscyami — t. of Hops, Tinctura humuli — t. of Iodine, compound, Tinctura iodini composita—t. of Iron, ammoniated, Tinctura ferri ammoniata — t. of Iron, muriated, Tinctura ferri muriatis—t. Klafroth's, see Tinctura ferri muriatis — t. of Lobelia, Tinctura lobeliæ — t. of Ludwig, see Ferrum tartarizatum — t. of Lupuline, Tinctura lupulinæ — t. of Musk, Tinctura moschi — t. Nervous, Bestucheff's, Tinctura seu alcohol sulphurico-ætherus ferri — t. of Oil of Peppermint, Tinctura Olei menthæ piperitæ — t. of Oil of Spearmint, Tinctura olei menthæ viridis — t. of Opium, acetated, Tinctura opii acetata — t. of Orange-peel, Tinctura aurantii — t. of Rhatany, Tinctura krameriæ — t. of Rhubarb, Tinctura rhei — t. of Rhubarb and aloes, Tinctura rhei et aloes — t. of Rhubarb and gentian, Tinctura rhei et gentianæ—t. of Rhubarb and senna, Tinctura rhei et sennæ — t. of Saffron, Tinctura croci — t. of Saffron, compound, Tinctura de croco composita — t. of Senna and jalap, Tinctura sennæ et jalapæ—t. of Snakeroot, Tinctura serpentariæ — t. of Soap, camphorated, Linimentum saponis—t. of Spanish Fly, Tinctura cantharidis—t. of Squill, Tinctura scillæ — t. of Steel, Tinctura ferri chloridi—t. Stomach, Tinctura cardamomi composita — t. of Stramonium, Tinctura stramonii — t. for the Teeth, Greenough's, see Spiritus armoraciæ compositus — t. Toothach, Tinctura antiodontalgica — t. of Wormwood, compound, Tinctura absinthii composita.

TINDER, Boletus igniarius.

TINEA, Porrigo—t. Faciei, Porrigo larvalis — t. Favosa, Porrigo favosa — t. Ficosa, Porrigo scutulata — t. Furfuracea, Porrigo furfurans — t. Granulata, Porrigo scutulata, Porrigo lupinosa—t. Lactea, Porrigo larvalis — t. Lupina, Porrigo lupinosa—t. Mucosa, Porrigo lupinosa—t. Porriginosa, Porrigo furfurans — t. Tondens, Porrigo decalvans.

TINKER'S WEED, Triosteum.

TINKLING, METALLIC, *Tintement métallique.*

TINNIMENTUM METALLICUM, *Tintement métallique.*

TINNI'TUS AU'RIUM, *Fluctua'tio* seu *Son'itus au'rium, Paracu'sis imagina'ria, Susur'rus au'rium, Ote'chus, Syrig'mus, Syring'mos, Sib'ilus aurium, S. clango'sus, Strep'itus* seu *Sibilis'mus aurium, Echos, Eneche'ma, Bombus, Murmur,* 'ringing of the ears,' from *tinnire*, 'to ring.' (F.) *Tintement, Tintouin, Bourdonnement, Bruissement.* An imaginary sound, like the ringing of a bell, the noise of wind, the murmur of water, &c., heard in health and in sickness. It is, often, an accompaniment of cerebral disorder.

*TINTEMENT*, Tinnitus aurium — *t. Bullaire, T. métallique.*

*TINTEMENT MÉTALLIQUE* (F.), *Tintement bullaire, Tinnimen'tum metal'licum, Canor stethoscop'icus, Metallic Respiration, Metallic Voice, Metallic Tinkling.* A particular noise, heard by the stethoscope when applied to the chest, and which, according to Laënnec, resembles that caused by striking glass, metal, or porcelain, with a pin; but is, perhaps, more like the sound of the keys of a musical snuff-box. The *tintement métallique* or *metallic tinkling* is heard on causing the patient to speak or breathe; but is more distinct when he coughs. When the phenomenon is not so strongly marked, it produces only the *metallic resonance.* The 'metallic tinkling,' is a pathognomonic symptom of a communication between the bronchia and cavity of the chest; in other words, of *Pneumothorax.*

TINTINNABULUM, Uvula.

*TINTOUIN*, Tinnitus aurium.

TIPSARIA, Decoctum hordei.

*TIRE-BALLE*, Forceps (bullet.)

*TIRE-FOND*, (F.) A surgical instrument, formerly used to elevate the piece of bone sawed off by the trephine.

*TIRE-PUS*, Pyulcon.

*TIRE-TÊTE*, (F.) A name given to different instruments used for extracting the head of the child when left in the uterus, and in certain cases of difficult labour. The crotchet is one of those, as well as the *Tire-tête à bascule* of Levret, &c.

TIRES, Milk sickness.

TISANE, *Pti'sana* or *Ptis'sana, Ptisane*, from πτισανη, 'pearl barley,' itself from πτισσω, 'I decorticate.' A name given to aqueous medicines, containing but little, if any, medicinal agent.

The ancients gave the name particularly to the decoction of barley.

*TISANE COMMUNE,* Decoctum hordei.

TISIC, Phthisis.

TISICAL, Phthisicus.

*TISSU,* Tissue — *t. Accidental,* see Accidental, and Tissue, accidental—*t. Caverneux,* Cavernous texture — *t. Celluleux des os,* Cancelli — *t. Inodulaire,* Tissue, inodular — *t. Lardacé,* see Lardaceous — *t. Spongoïde,* Spongoid tissue.

TISSUE, *Textus, Tela,* (F.) *Tissu.* By this term, in anatomy, is meant the various parts, which, by their union, form the organs; and are, as it were, their anatomical elements. Histological anatomy is the anatomy of the tissues, which are the seat of the investigations of the pathological anatomist. The best division, indeed, of diseases would be according to the tissues mainly implicated. For the elementary tissues, see Fibre. The compound tissues, which, by associating or combining variously, form every organ of the body, have been variously classed: but every division is imperfect and liable to objection. The following, by Messrs. Todd and Bowman, is one of the most recent.

TABULAR VIEW OF THE TISSUES OF THE HUMAN BODY.

| | *Examples.* |
|---|---|
| 1. Simple membrane, homogeneous, or nearly so, employed alone, or in the formation of compound membranes. | Posterior layer of the cornea.—Capsule of the lens.—Sarcolemma of muscle, &c. |
| 2. Filamentous Tissues, the elements of which are real or apparent filaments. | White and yellow fibrous tissues.—Areolar tissue. |
| 3. Compound membranes, composed of simple membrane and a layer of cells of various forms, (epithelium or epidermis.) or of areolar tissue and epithelium. | Mucous membrane—Skin.—True or secreting glands—Serous and synovial membranes. |
| 4. Tissues which retain the primitive areolar structure as their permanent character. | Adipose tissue.—Cartilage.—Gray nervous matter. |
| 5. Sclerous or hard tissue. | Bone.—Teeth. |
| 6. Compound tissues. | |
| *a.* Composed of tubes of homogeneous membrane, containing a peculiar substance. | Muscle.—Nerve. |
| *b.* Composed of white fibrous tissues and cartilage. | Fibro-cartilage. |

TISSUE, ACCIDENTAL or ADVENTITIOUS, consists of every substance — foreign to the primitive organization of the economy, but yet organized and living — which may be developed in the anterior or at the surface of organs. Laënnec divides the accidental issues into two sections: 1. Those that resemble others in the animal economy, or *analogous accidental tissues;* and, 2. Those that have nothing analogous in the body, and which are always the result of a morbid process — the *heterologous* or *heteroclite accidental tissues.* To the first class belong, ossifications; accidental fibrous, fibro-cartilaginous, cartilaginous, areolar, and corneous tissues; hairs; the serous membranes of certain encysted tumours; the mucous membranes of fistulous canals, and accidental synovial membranes. To the second belong tubercles, scirrhi, melanosis, &c.

TISSUE, AREOLAR, Cellular tissue.

TISSUE, CARTILAG''INOUS, *Hymenochondro'des* seu *Hymenochondroï'des* (*Textura* seu *Tela.*)

TISSUE, CRIBRIFORM, Cellular tissue — t. Fibrous, see Fibrous — t. Filamentous, Cellular tissue.

TISSUE, INOD'ULAR, *Tela inodula'ris,* (F.) *Inodule, Tissu inodulaire.* A name given by Delpech to an accidental fibrous tissue developed in suppurating wounds, which is the principal agent in cicatrization. It has, at first, the appearance of a reddish cellulo-fibrous layer; but soon loses its vascularity; and its fibres, which pass in all directions, become of a dull white colour, and of a consistence and hardness, that may be compared to those of the strongest articular ligaments. It is well seen in the cicatrix left after burns.

TISSUE, LAMINATED, Cellular tissue — *t. Ligamentous,* Desmoid tissue — t. Mucous, Cellular tissue — t. Porous, Cellular tissue — t. Reticulated, Cellular tissue.

TIT, Nipple.

TITHENE, Nurse.

TITHYMALUS CYPARISSA, Euphorbia cyparissias — t. Lathyris, Euphorbia lathyris — t. Latifolius, Euphorbia lathyris — t. Palustris, Euphorbia palustris — t. Paralias, Euphorbia paralias.

TITILLAMENTUM, Gargarism.

TITILLATION, Tickling.

TITTHE, Nipple.

TITTHION, Nipple.

TITTHIS, Nipple.

TITTHOS, Mamma, Nipple.

TITUBANTIA, *Bredouillement.*

TITUBATIO, Fidgets, Vacillatio.

TO-AND-FRO-SOUND, *Bruit de frottement.*

TOAD-FLAX, Antirhinum linaria — t. f. Bastard, Comandra umbellata.

TOAST-WATER, *Aqua tostæ panis.* Toast well half a slice of a stale quartern loaf; put it into a pitcher, and pour over it a quart of water. After two hours, decant the water from the bread. It is a common drink in febrile affections.

TOBACCO, Nicotiana tabacum — t. English, Nicotiana rustica — t. Indian, Lobelia inflata — t. Poison, Hyoscyamus niger — t. Wild, Lobelia inflata.

TOCETOS, Parturition.

TOCODOMYCODORITIS MALIGNA VAGINALIS, Colpocace puerperarum.

TOCOLOGY, Obstetrics.

TOCOS, Parturition.

TODDY TREE, Mamei.

TOE, Digitus pedis.

TOEPLITZ, see Toplitz.

TOFUS, Tophus.

*TOILE D'ARAIGNEE,* Araneæ tela — *t. Choroïdienne,* see Choroid — *t. de Gaultier,* Sparadrapum Galteri.

TOKAS, Puerpera.

TOKOLOGY, Obstetrics.

TOLA, Tonsil.

TOL'ERANCE, *Toleran'tia;* from *tolerare,* 'to bear.' The power of bearing. A word used by the Italian school of Rasori, to signify the power of bearing large doses of certain potent remedies, as tartrate of antimony and potassa. See Contro-stimulus.

TOLES, Tonsil.

TOLIUM, Tonsil.

TOLLES, Tonsil.

TOLLUM, Tonsil.

TOLUIF'ERA BAL'SAMUM, *Myrox'ylon Toluif'erum. Family,* Terebinthaceæ. *Sex. Syst.* Decandria Monogynia. The name of the tree which affords the *Balsam of Tolu, Balsamum Toluta'num, Toluta'num, Toluif'eræ Balsami Balsamum, Goac'onaz, Red Balsam of Peru,* (F.) *Baume de Tolu, B. de Carthagène.* It has a very fragrant odour, and warm, sweetish taste; is thick, and of a reddish-yellow colour. It is stimulant and expectorant, (?) and is used in coughs. It is chiefly, however, employed on account of its flavour.

TOLUTANUM, see Toluifera balsamum.

TOMATA, Solanum lycopersicum.

TOMĒ, *Tom'us,* τομη, τομος, 'incision.' A common suffix, as in Lithotomy, Bronchotomy, &c.

TOME, Cut, Incision.

TOMEION, Knife.

TOMEN'TUM CER'EBRI, from *tomentum*, 'a flock of wool.' The infinite number of small vessels which pass between the pia mater and convolutions of the brain. They enter the substance of the brain at right angles.

TOMEUS, Knife.

TOMIS, Scissors.

TOMOTOCIA, Cæsarean section.

TONE, *Tonus*, from τεινω, 'I stretch.' The state of tension or firmness proper to each organic tissue. It is the effect of tonicity.

TONE, Elasticity.

TONGA, see Datura sanguinea.

TONGRES, MINERAL WATERS OF. The town of Tongres is about a league from Maestricht in the Low Countries. The springs, of which there are several, are chalybeate, containing carbonates of iron and magnesia.

TONGUE, Sax. tunz, (D.) Tong, *Lingua, Glossa, Glotta*, (F.) *Langue*. The tongue is a muscular, symmetrical, and very mobile organ; situate in the mouth, from the os hyoides and epiglottis to the incisor teeth. Its particular use is, to procure the sensation of savours; and it aids in the acts of sucking, mastication, deglutition, pronunciation, and expuition. It has the shape of a pyramid, flattened above and below; rounded at its angles, and terminated, anteriorly, by a blunt point. Its *upper surface*, called the *dorsum*, is free, flat, and divided into two portions by a median furrow, *lin'ea media'na;* at the posterior extremity of which is the *foramen cæcum* or *Fora'men of Morgagni*. The *inferior surface* is free, and covered by the mucous membrane on its anterior third and sides: but behind and in the middle it is attached to the lower jaw by means of the genio-glossus; and to the hyoides by the hyoglossus. Its *margins* are rounded; thick behind, thinner anteriorly. Its *tip*, or *point*, or *dental extremity* is rounded and free: — the *root, base*, or *hyoid extremity, Radix linguæ*, is continuous with the epiglottis and velum palati. It is very thick at the foramen cæcum; but thinner as it approaches the hyoid bone. The tongue is composed of muscles, and covered by a mucous membrane — *Pcriglot'tis, Involu'crum linguæ, Membra'na* seu *Tu'nica vagina'lis* seu *Cutis* seu *Epider'mis* seu *Tunica* seu *Involu'crum muco'sum* seu *Crusta villo'sa linguæ* — which forms also the frænum beneath the tongue. On this membrane are seen the different *papillæ*. The nerves of the organ proceed from the *inferior maxillary, glosso-pharyngeal* and *hypoglossal*. The first and second are connected with taste; the last with the motions of the organ. Some recent observers, however, consider the glosso-pharyngeal to be the special nerve of gustation. The arteries are the *lingual*, from the external carotid; and the *palatine* and *tonsillar*, from the labial. The veins are the *superficialis linguæ, ranina, lingualis*, and *submentalis*. They open into those of the pharynx and larynx. Its lymphatic vessels pass into ganglia, situate at the edge of the hyoglossi muscles.

TONGUE, BLACK. A fever which prevailed in the western States in the winter of 1842–3; probably typhoid fever. According to some, an epidemic erysipelas.

TONGUE, HERNIA OF THE, Glossocele — t. Inflammation of the, Glossitis — t. Red, fever, see Typhus — t. Scraper, *Cure-langue* — t. Tie, see Ankyloglossum.

TON'IC, *Ton'icus*. Same etymon as *Tone*. Relating to tone.

*Tonic, Ton'icus, Tono'ticus, Antasthen'icus*, (F.) *Tonique, Fortifiant*, in Therapeutics, means a medicine, which has the power of exciting slowly, and by insensible degrees, the organic actions of the different systems of the animal economy, and of augmenting their strength in a durable manner. Bitter, vegetable substances which are not associated with an acrid or narcotic principle; preparations of iron; cold water, &c., act as tonics. They are also called *Comfortan'tia, Confortati'va, Corroboran'tia, Confirman'tia, Roboran'tia*, &c.

The following are the chief Tonics: — Acidum Arseniosum, Acidum Nitricum, Acidum Sulphuricum, Argenti Nitras, Bismuthi Subnitras, Carbo Ligni, Cascarilla, Cinchona, Cinchonia, Colomba, Cornus Florida, Cupri Acetas, Cupri Sulphas, Cuprum ammoniatum, Cusparia, Eupatorium perfoliatum, Ferri Præparata, Gentiana, Liriodendron, Lupulina, Piperina, Prunus Virginiana, Quassia, Quinia, Salix, Salicina, Serpentaria, Zinci præparata; Aquæ minerales acidulæ et ferruginiæ, Mental Tonics, (Confidence, Hope, Amusement.)

TONIC POWER, Irritability.

TONIC SPASM, *Spasmus ton'icus, Convul'sio tonica, Conductio, Spas'ticus, Tonos, Ento'nia, En'tasis, Enta'sia*. A rigid contraction of muscles without relaxation, as in trismus, tetanus, &c. See Tetanus and Spasm.

TONIC''ITY, *Tonic''itas*. The faculty that determines the general tone of the solids. Excessive tonicity causes *er'ethism* or *crispness;* deficient tonicity, *atony* or *weakness*. *Tonicity* has been used in the same sense as irritability.

*TONIQUE*, Tonic.

TONOS, Tonic spasm—t. Trismus, Trismus.

TONOTICUS, Tonic.

TONSIL, *Tonsil'la, Amyg'dala, Paristh'mia, Paristh'mium, Amphibran'chium, Glan'dula colli, Tola, Tollcs, Toles, To'lium, Tollum, Spongos, An'tias*, Pl. *Anti'ades, Almond of the ear, Almond of the throat*, (F.) *Amygdale, Tonsille*. An ovoid collection of follicles, about half an inch in length, similar in shape to an almond, and situate, on each side, between the pillars of the velum palati. The inner surface, projecting into the isthmus of the throat, is covered by the mucous membrane, in which are the orifices of a dozen cells, whence a transparent, viscid mucus oozes on pressure. This mucus is destined to facilitate deglutition, by lubricating the isthmus faucium; and is forced out during the passage of the alimentary bolus.

TONSILLÆ PESTILENTES, Cynanche maligna.

TONSILLARUM GANGRÆNA, Cynanche maligna.

*TONSILLE*, Tonsil.

TONSILLIT'IC, *Tonsillit'icus*. Belonging or relating to the tonsils; as the '*tonsillitic* branches of the glosso-pharyngeal nerve.'

TONSILLITIS, Cynanche tonsillaris.

TONSORIUS CULTER, Razor.

TOOTH, Sax. toð, *Dens, Odous*, (F.) *Dent*. The teeth, *Dentes, Mord'ices*, are small, hard bones, fixed in the alveoli of each jaw, and serving to lay hold of, and to cut, tear, and triturate alimentary substances. True teeth are found only in man, the mammalia, reptiles, and fish. The teeth have, in general, the shape of an irregular cone, the base of which is towards the interior of the mouth; and the apex, single or divided, towards the bottom of the alveoli. Each tooth has a part situate out of the alveolus, and covered by a vitriform substance. This part is called the *crown* or *coro'na*. It is bounded by a narrower portion, called the *cervix*, (F.) *collet*, which separates it from the portion in the alveolus—the *fang* or *root*, (F.) *racine*. In the adult, the teeth are 32 in number; 16 to each jaw:

these consist of 4 *incisors*, 2 *canine*, 4 *bicuspidati*, and 6 *molares*. (See these various terms.) The teeth enclose a vascular and nervous pulp, in a central cavity, *Cav'itas Pulpæ, Carum Dentis, Antrum denta'lē*. They are formed of a very hard, compact tissue; and the corona is covered by a vitreous substance called *Enam'el*. The incisor and canine teeth are developed by a single point of ossification; the lesser molares, by two; and the larger, by four or five. See Dentition. Researches by Retzius, Müller and others, have led them to believe that the *ivory* of the tooth or *Dentine, Substan'tia os'sea* of Malpighi, *proper tooth substance, bone of the tooth, osseous substance of tooth, tooth bone*, consists of tubular fibres, which contain organic deposits of calcareous salts; and of intertubular substance, in which are observed corpuscles or osseous cells of the tooth, called by Professor Owen *calcig''erous cells*, which also contain earthy salts. At the part where the enamel terminates at the cervix of the tooth, the *crusta petro'sa, cemen'tum* or *cortical substance*, commences in an extremely thin stratum, passes down and gradually increases in thickness towards the extremity of the root, where it is generally the thickest. It is said by Nasmyth to have been traced on the enamel, and Purkinje and Fränkel thought that it lined the cavitas pulpæ. They gave it the name *Substantia ostoïdea*. It is the *mate'ria tarta'rea* of Malpighi. It has been found, however, that the hard substance deposited on the inner surface of the dentine, at the age of twenty years or later, and which encroaches on the cavity, has a distinct structure from the cement, and resembles in part dentine, and in part bone. It is the *horny substance* of Blumenbach, the *osteodentine* of Owen, and the *secondary dentine* of Tomes. In the compound teeth of the herbivorous animal, a deposition is found on the surface of the enamel, which has been called *cementum*. Müller, however, regards it to be a deposit from the salts and the saliva, and to be essentially the same as what is called tartar in the human subject.

TOOTH-ACH, Odontalgia—t. Bone, see Tooth—t. Bush, Xanthoxylum fraxineum—t. Tree, Aralia spinosa, Xanthoxylum clava Herculis.

TOOTH EDGE, *Agacement des dents*, Hæmodia—t. Paste, Dentifricium—t. Rash, Strophulus—t. Shell, dog-like, Dentalium.

TOPHACEOUS CONCRETION, Tophus.

TOPHUS, *Tofus, Osteot'ophus, Topha'ceous Concretion*. A collection of hard, calcareous matter, which forms, particularly, at the surface of joints affected with gout; (see Calculi, arthritic,) and occasionally, in the interior of organs, around the teeth, &c. It likewise meant gravel and chalaza.

TOP'IC, *Top'ical, Top'icus*. A local application; (F.) *Topique*. See Local.

TOPICUS, Local.

TOPINARIA, Talpa.

*TOPIQUE*, Topic.

TÖPLITZ or TEPLITZ, MINERAL WATERS OF. Töplitz is a town of Bohemia, celebrated for its numerous thermal springs. The water contains chloride of sodium, carbonate, and sulphate of soda; and carbonates of lime and iron, &c. Temp. 114° to 122° Fahr.

Toplitz, Töplitz.

TOPOGRAPHICAL ANATOMY, see Anatomy.

TORCULAR, Tourniquet.

Tor'cular Heroph'ili, The *Press of Heroph'ilus, Lechenei'on, Lenos, Lenum, Fourth Sinus*, (F.) *Confluent des Sinus, Pressoir d'Hérophile*. A smooth and polished cavity, of irregular shape, in which several sinuses of the dura mater meet. It is situate before the internal occipital protuberance, at the union of the three great duplicatures of the dura mater. It has six openings into it:—one above, that of the superior longitudinal sinus; two below, answering to the occipital sinuses; one anterior, belonging to the straight sinus; and two lateral, and very broad, which lead into the lateral sinuses; and convey from the cavity the blood that has been poured into it by the others.

TORCULUM, Tourniquet.

TORDY'LIUM, *T. Officina'lē, Ses'eli Cret'icum* seu *Monta'num*, (F.) *Séseli de Crète. Family*, Umbelliferæ. *Sex. Syst.* Pentandria Digynia. The seeds and roots of this Southern European plant are considered carminative and diuretic. They enter into the theriaca.

TORE'NIA ASIAT'ICA, *Cæla-dolo*. A small Malabar plant, the juice of whose leaves, sweetened with sugar, is said to cure gonorrhœa.

TORMENTIL, Geranium maculatum, Tormentilla.

TORMENTIL'LA, *T. erec'ta* seu *sylves'tris* seu *officina'lis* seu *tubero'sa, Fraga'ria tormentil'la officina'lis, Potentill'a tormentill'a, Common Tormen'til, Upright Septfoil, Heptaphyl'lum, Consol'ida rubra*, (F.) *Tormentille. Family*, Rosaceæ. *Sex. Syst.* Icosandria Polygynia. The root has a slightly aromatic odour; and austere, styptic taste. It is astringent. Dose, of the powder, gr. x to ʒj.

TORMENTUM, Ileus, Intussusceptio.

TOR'MINA, *Strophos, Cœlial'gia, Encœlial'gia, Anile'ma, Anile'sis, Gripes, Mulligrubs*, (F.) *Tranchées*. Acute colicky pains. Dysentery.

Tormina Celsi, Dysentery—t. Parturientium, Pains, labour—t. Post partum, see Pains, labour.

TORNACULUM, Tourniquet.

TOROS'ITAS, *Corpulen'tia carno'sa, Hab'itus athlet'icus*. Muscular strength; from *torosus*, 'brawny,'—*tori*, 'brawn.'

TOROSUS, Muscular.

TORPEDO, Narcosis.

TORPEFACTIO UNIVERSALIS, Holonarcosis.

TORPID, *Tor'pidus*, (F.) *Engourdi*; from *torpeo*, 'I am benumbed.' Numb. Incapable of exertion and of feeling. Dull, stupid, inactive.

TORPIDITAS, Torpor.

TORPIDUS, Narcotized, Torpid.

TORPOR, *Torpid'itas, Noth'rotes, Parap'sis expers*, (F.) *Engourdissement*, from *torpere*, 'to be numbed.' State of a part which becomes numb, and almost incapable of motion. *Torpor, Torpid'ity, Torpid'ness, Tor'pitude* are also applied to a debilitated, sluggish condition of a part or of the whole of the body; *Aër'gia*, (F.) *Accablement*.

Torpor, Narcosis—t. of the Colon, see Colon, torpor of the—t. Intestinorum, Constipation—t. Soporificus, Nocar.

TORQUAY. A town in Devonshire, England, which, on account of the mildness of its climate, and its sheltered situation from the bleaker winds, is a frequent retreat for the phthisical invalid.

TOR'SION, *Tor'sio*. The act of twisting. Torsion of the extremities of bleeding vessels, *Angios'trophē*, until the blood ceases to flow, is sometimes used to arrest hemorrhage from divided vessels.

*TORTELLE*, Erysimum.

TORTICOL'LIS, *Obstip'itas, Caput obsti'pum, Obsti'pa cervix, Obstip'itas cap'itis* seu *Colli, Collum obsti'pum, Trachel'agra, Enta'sia Loxia, Lox'ias, Cephalox'ia, Ancylode'rē, Ancylode'ris, Rhæbocra'nia, Auchenorrheu'ma, Rheumatis'mus colli, Rh. Cervi'cis, Stiffneck, Wryneck*: from *torquere, tortum*, 'to twist,' and *collum*, 'the neck.'

A variety of rheumatism, seated in the muscles of the neck, which prevents the motion of the head, and causes the patient to hold it inclined to the side affected. It is, commonly, of short duration; usually disappearing in a few days. Rubefacients are the best topical applications. The term is also applied to permanent contraction of the muscles of the neck, which causes the head to be held to one side. The remedy is the division of the contracted muscles.

TORTOISE, FRESHWATER, GREAT, Hydraspis expansa.

*TORTUE*, Testudo.

TORTURA ORIS, Canine laugh, Neuralgia faciei—t. Oris paralytica Linnæi, Paralysis, Bell's.

TOR'ULA CEREVIS'IÆ, *Saccharom'yces* seu *Mycoder'ma cerevisiæ*, *Cryptococ'cus ferment'um*, *Yeast plant*. One of the simplest forms of vegetation, capable, under favourable circumstances, of vegetating rapidly, and assisting in producing the fermentation of saccharine substances. The plant has been found in vomited fluids, and in fæces.

TORULUS GLANDIS, Crown of the glans.

TORUS, Muscle — t. Manûs, Metacarpus.

TOTA BONA, Chenopodium bonus Henricus.

TOTUM CARNOSUM, Pancreas.

TOUCH, *Tactus*, *Tac'tio*, *Haphē*, *Hapsis*, *Tac'tion*, *Palpa'tion*, (F.) *Toucher*. One of the five senses, and that which makes known to us the palpable qualities of bodies, such as their consistence, quality, &c. It is seated, particularly, in the hands; and differs from tact in being active.

TOUCH-ME-NOT, Impatiens fulva.

TOUCH, ROYAL. It was at one time almost universally believed, in England, that the royal touch would remove *Scrofula* or *King's Evil*, (as it was thence called.) This superstition is now entirely exploded. Edward, the Confessor, was the first English king who *touched* for the Evil.

*TOUCHER*, Esaphe, Touch.

TOUCHWOOD, Boletus igniarius.

*TOUR DE MAÎTRE*, *Coup de maître*.

*TOURBILLON VASCULAIRE*, Vasa vasorum.

*TOURNESOL*, Heliotropium Europæum.

*TOURNIOLE*, Paronychia.

TOUR'NIQUET, *Tor'cular*, *Tor'culum*, *Tornac'ulum*, *Præ'lium*, *Præ'lium*, *Præ'lium* seu *Prelum arteria'lē*, *Verticil'lum*, *Fas'cia tor'tilis*, from (F.) *tourner*, 'to turn.' A surgical instrument for stopping the course of blood in the limbs, by exerting a strong compression upon the principal artery. It was invented by a French surgeon, Morel, in the middle of the 17th century; and was modified subsequently, by Nuck, Verduc, Monro, Petit, and Louis. It is used to suspend, for a time, the circulation in a limb, during great operations; to arrest arterial hemorrhage in cases of wounds; to compress certain aneurismal and other tumours, &c.

*TOUS-LES-MOIS*, *Am'ylum canna'ceum*. A fecula obtained from the root of *Canna coccin'ea*. It resembles potato starch, and may be substituted for arrow-root. It is obtained from St. Kitts.

*TOUTE BONNE*, Salvia sclarea.

*TOUTE ÉPICE*, see Myrtus pimenta — t. *Saine*, Sanicula.

*TOUX*, Tussis—t. *Bleue*, Pertussis — t. *Bronchique*, Bronchial cough, Cough, tubal—t. *Caverneuse*, see Cavernous respiration — t. *Convulsive*, Pertussis — t. *Quinteuse*, Pertussis — t. *Tubaire*, Bronchial cough, Cough, tubal.

TOXICÆMIA, Toxicohæmia.

TOXICAL, Poisonous.

TOXICATIO. Poisoning.

TOXICODENDRON, Rhus toxicodendron.

TOXICOHÆ'MIA, *Toxicæ'mia*, from τοξικον, 'a poison,' and 'αιμα, 'blood.' Poisoning of the blood.—Piorry.

TOXICOL'OGY, *Toxicolog''ia*, from τοξικον, (itself from τοξον, 'a bow,') 'a poison,' and λογος, 'a description.' A treatise on poisons.

TOXICO'SES, (G.) Toxikosen, from τοξικον, 'a poison.' A family of diseases, according to the classification of Fuchs, caused by the reception of poisons into the system.

TOXICUM, Poison, Venom.

TRABECULA CEREBRI, Corpus callosum—t. Cordis, Columnæ carneæ.

TRABECULÆ SPLENIS, see Spleen—t. Willisii, Chordæ Willisii.

TRABES CORDIS, Columnæ carneæ.

TRABS, Penis—t. Cerebri, Corpus callosum—t. Medullaris, Corpus callosum.

TRACE, PRIMITIVE, Groove, primitive.

TRACHE'A, (generally, however, accented *Tra'chea*,) *Trache'a arte'ria*, *Bronchus*, *As'pera arteria*, *Fis'tula spiritua'lis*, *F. pulmona'lis*, *Canna*, *Syrin'ga*, *Syrinx*; the *Windpipe*, *Throttle*, (F.) *Trachée artère*, from τραχυς, 'rough,' and αρτηρια, 'artery,' composed of αηρ, 'air,' and τηρειν, 'to keep.' The trachea is a cylindrical, fibro-cartilaginous and membranous tube, flattened behind, and situate on the median line, before the vertebral column, from the inferior part of the larynx, as far as the third dorsal vertebra. There it divides into two branches, the *bronchia*, which separate to go to each lung. The trachea, the function of which is to convey air to the lungs during respiration, is composed, 1. Of cartilaginous rings, *An'nuli cartilagin'ei*, *Segmen'ta cartilagin'ea*, *Orbes cartilagino'si*, incomplete behind; situate one above the other, and kept *in situ* by a fibrous membrane. 2. Of a mucous membrane, which lines it internally, and contains numerous mucous follicles. 3. Of transverse muscular fibres, not well-marked, which occupy its posterior surface. 4. Of vessels, which proceed from the superior and inferior thyroideal; and, 5. Of nerves, that are given off by the pneumogastric and the cervical ganglia. The breathing tubes of insects are termed *Tracheæ*.

TRACHEA ARTERIA, Trachea.

TRACHEÆ, see Trachea.

TRA'CHEAL, *Trachea'lis*. Appertaining to the trachea. An epithet applied to respiration as heard through the stethoscope opposite the trachea, larynx, and root of the bronchia; the air appearing as if sucked in from the cylinder during inspiration, and expelled during expiration.

TRACHEAL GLANDS. Mucous follicles on the posterior surface of the trachea. They are small, flattened ovoid bodies.

*TRACHÉE ARTÈRE*, Trachea.

TRACHEITIS, Cynanche trachealis.

TRACHELAGRA, Torticollis.

TRACHELIAN, Cervical.

TRACHELISM'US, from τραχηλον, 'the neck.' A term proposed by Dr. Marshall Hall, for a fancied spasmodic action of the muscles of the neck, which he esteems to be the cause of many morbid phenomena, by inducing compression of the veins of the neck and an impeded return of blood from the head.

TRACHELITIS, Cynanche trachealis.

TRACHELIUM AMERICANUM, Lobelia cardinalis.

*TRACHÉLO-ATLOIDO-OCCIPITAL*, Obliquus superior capitis—t. *Atloïdo-basilaire*, Rectus capitis lateralis — t. *Basilaire*, Rectus capitis in-

ternus major — *t. Basilaire, petit,* Rectus capitis internus minor.

TRACHE'LO-DIAPHRAGMAT'IC, *Trachelo-diaphragmat'icus.* The fourth pair of cervical nerves, whence the phrenic nerve chiefly arises. — Chaussier.

*TRACHÉLO-MASTOÏDIEN,* Complexus minor — *t. Occipital,* Complexus — *t. Phyma,* Bronchocele — *t. Scapulaire,* Levator scapulæ.

TRACHELOS, Collum.

TRACHEOCELE, Bronchocele.

TRACHEOPHONY, Laryngophony.

TRACHEOPHTHISIS, see Phthisis laryngea.

TRACHEORRHAG''IA, *Hæmop'toë* seu *Hæmop'tysis laryngæ'a et tracheal'is,* from τραχεια, 'the trachea,' and ρηγνυμι, 'to break forth.' Hæmorrhage from the trachea.

TRACHEOSTENO'SIS, from τραχεια, 'the trachea,' and στενωσις, 'contraction.' Contraction or narrowness of the trachea.

TRACHEOTOMY, see Bronchotomy.

TRACHITIS, Cynanche trachealis.

TRACHO'MA, *Aspre'do,* from τραχυς, 'rough.' *Gran'ular conjuncti'va, Gran'ular eyelid,* (F.) *Asperité des Paupières.* A roughness of the inner surface of the eyelids; granular eyelids. A variety of ophthalmia, of which three kinds have been designated: — *T. sabulo'sum,* from sand, &c., getting between the eyelids; *T. caruncelo'sum, Phadaro'des, Phadaro'sis, Morum pal'pebræ inter'næ,* from fleshy excrescences; and *T. herpet'icum,* from hard pustules on the inner surface of the eyelids. This last is, also, called *Fico'sis,* and *Pal'pebra fico'sa.*

TRACT, OPTIC, see Optic nerves — t. Respiratory, see Respiratory tract.

TRACTATIO MANUARIA, Surgery.

TRACTORATION, Perkinism, see Tractors, metallic.

TRACTORS, METAL'LIC. Metallic agents, introduced by Dr. Elisha Perkins, of Connecticut, about the end of the last century, to cure diseases. The parts were rubbed with these tractors, and hundreds of thousands of cases were reported to have been cured by the *Tractora'tion.* The affections, in which they were chiefly used, were local inflammations, and pains in different parts. The good effects were, doubtless, owing to the influence exerted by the mind over the body. The bubble did not exist long. See Perkinism.

TRACTUS INTESTINORUM, Intestinal Tube — t. Opticus, see Optic nerves — t. Respiratorius, Respiratory tract.

TRACTUS SPIRA'LIS FORAMINULEN'TUS. Minute openings at the base of the modiolus, arranged in a spiral manner, which transmit the filaments of the cochlear nerve. The central canal of the Tractus is longer than the rest, and is called *Tu'bulus centra'lis modi'oli.*

TRADESCAN'TIA VIRGIN'ICA, *Spiderwort;* indigenous; *Order,* Commelynaceæ; flowering from May to August. The roots are demulcent.

TRAGACAN'THA, *Gummi Tragacan'tha, G. Astrag'ali Tragacanthæ, Gum Tragacanth, Gum Dragon.* The concrete juice of the *Astragalus Tragacantha* or *Astragalus Verus,* a native of Persia. *Family,* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. (F.) *Gomme Adragant, Adragant.* This gum is inodorous; nearly insipid; of a whitish colour; semi-transparent, and striated. It is in thin, vermiform pieces; and does not form a smooth, uniform mucilage with water. It is demulcent, but is rarely used alone.

TRAGEA AROMATICA, Pulvis cinnamomi compositus.

TRAG''ICUS, *Tragien* (Ch.), from Tragus. A small, flat, triangular muscle which almost wholly covers the outer surface of the tragus, arising from its base, and terminating at the top of the eminence.

*TRAGIEN,* Tragicus.

TRAGOMASCHA'LIA, *Tragomas'chalē,* from τραγος, 'a goat,' and μασχαλη, 'axilla.' The strong, unpleasant odour of the armpits.

TRAGOPHONIA, Egophony.

TRAGOPO'GON, *Barba hirci,* from τραγος, 'a goat,' and πωγων, 'beard.' A genus of plants; *Family,* Cichoraceæ. *Sex. Syst.* Syngenesia Polygamia Æqualis. (F.) *Barbe de Bouc;* of which the roots of the *Tragopogon porrifo'lium, Salsifi, Oyster-root,* and the young shoots of the *T. praten'sē, Meadow Salsifi, Common Goat's Beard,* (F.) *Salsifis des près,* are eaten as food. The root of the latter has been used as a diuretic.

TRAGOSELINUM, Pimpinella saxifraga — t. Angelica, Ligusticum podograria — t. Magnum, Pimpinella magna — t. Majus, Pimpinella magna — t. Saxifraga, Pimpinella magna.

TRAGUS, τραγος, 'a goat;' from its being furnished, in some persons, with hair, like the beard of a goat. *Hircus, Hirquus.* A small, flattened, triangular nipple, situate before the meatus auditorius externus, which it appears to conceal. It is covered with hair in old people, whence its name. Also, the peculiar goat-like smell of the axillæ.

TRAGUS MATTHIOLI, Salsola kali.

*TRAINASSE,* Polygonum aviculare.

TRAMIS, Perinæum.

TRANCE, Catalepsy, Ecstasis.

*TRANCHÉES,* Tormina — *t. Utérines,* Pains, after.

TRANSFIGURATIO, Transformation.

TRANSFORMA'TION, *Transforma'tio, Transfigura'tio, Transmuta'tio, Metab'olē,* from *trans,* 'beyond,' and *forma,* 'form.' Change of form.

*TRANSFORMATIONS DE TISSU,* (F.) The French pathologists designate thus the change that occurs in an organ, the tissue of which becomes similar to that of another organ. The chief transformations are cartilaginous, osseous, and adipous. See Tissue.

TRANSFU'SION, *Transfusio,* from *transfundere* (*trans,* and *fundere,* 'to pour'), 'to pour from one vessel into another.' *Transfusio Sanguinis, Cura Medea'na, Methæmachym'ia, Hæmatometach'ysis, Hæmometach'ysis, Diach'ysis, Transplanta'tio med'ica nova, Chirur'gia transfuso'ria, Exotichæmato'sis.* The act of passing the blood of one animal into the veins of another; an operation which was formerly used to fulfil various therapeutical intentions. It has been revived in cases of uterine hemorrhage; and, apparently, with some success.

The operation can only be performed safely on animals having like kinds of blood. See Globule.

TRANSLATION, Metastasis.

TRANSMUTATIO, Transformation.

TRANSPIRATIO, Perspiration — t. Unilatera, Hemidiaphoresis.

TRANSPLANTA'TIO, *Metaphytei'a.* A pretended method of curing diseases, devised by Paracelsus — by making them pass from one individual to another, either animal or vegetable.

TRANSPLANTATIO, Morioplastice — t. Medica nova, Transfusion.

TRANSPLANTA'TIO DENTIS, *Insit''io dentis.* The act of transplanting a tooth from one person to another.

TRANSPORT, Delirium.

TRANSPOSITIO, Metathesis.

TRANSPOSIT"ION, *Transpositio*, from *trans*, over,' and *ponere*, 'to put.' *Metath'esis*. Change of situation.

Transposition of the Vis'cera, *Polype'ria promis'cua translati'va, Intus inver'sus*, is a congenital vice of conformation, which consists in the viscera being found out of the situations they ordinarily occupy: the heart, for example, being on the right side; the liver on the left, &c.

TRANSUDATIO, Diapedesis.

TRANSUDA'TION, *Transuda'tio*, from *trans*, 'through,' and *sudare*, *sudatum*, 'to sweat.' The passage of a fluid through the tissue of any organ, which may collect in small drops on the opposite surface, or evaporate from it.

Transudation, Exosmose.

*TRANSVERSAIRE ÉPINEUX*, Transversalis dorsi—*t. Épineux du cou*, Semispinalis colli —*t. Grêle*, see Sacro-lumbalis — *t. Épineux du dos*, Semi-spinatus dorsi.

*TRANSVERSAL DE LA CONQUE*, Transversalis auris — *t. du Nez*, Compressor nasi — *t. des Orteils*, Transversus pedis.

TRANSVERSALIS, Transverse.

Transversa'lis Abdom'inis, (F.) *Lombo-abdominal*, (Ch.) *Transverse de l'Abdomen*. This muscle is seated, deeply, on the lateral parts of the abdomen. It is flat, thin, and broader before than behind. It is attached, above, to the cartilage of the last true rib, and to those of every false rib; and, below, to the inner lip of the crista of the ilium; to the two outer thirds of the crural arch, and to the upper part of the puhis. Its fibres, moreover, are inserted, behind, by means of broad aponeuroses, into the top of the transverse and spinous processes of the first four lumbar vertebræ; and, before, into the linea alba, and the ensiform cartilage. This muscle, all of whose fibres have a transverse direction, constricts the belly, and diminishes the base of the chest, by drawing inwards the ribs to which it is attached.

Transversalis Anticus Primus, Rectus capitis lateralis — t. Collateralis colli, see Sacro-lumbalis.

Transversa'lis Colli, *Transversalis Major colli, Portion of the Sacro-spinal* (Ch.), (F.) *Transversaire*. A muscle, seated at the posterior and lateral part of the neck and upper part of the back. It is attached to the transverse processes of the five or six lowest vertebræ of the neck; and to those of the four or five first dorsal. It extends the vertebræ of the neck, and inclines them to its side.

Transversalis Colli, Semi-spinalis colli.

Transversalis Dorsi, *Transverso-spinalis, Multif'idus Spinæ, Lumbo-cervical portion of the Spinal* (Ch.), (*Transverso-spinalis Lumbo'rum, Transverso-spinalis Dorsi, Transverso-spinalis Colli,*) *Mus'culus sacer, Spinales et transversales lumborum, Semi-spinalis internus* sive *Transverso-spinalis colli pars interna* (Winslow), *Lombo-dorsi-spinal*, &c., (F.) *Transversaire épineux*. This muscle, usually called, by English anatomists, *Multifidus spinæ*, and including all the *transverso-spinales*, is situate in the vertebral gutters, extending from the posterior part of the sacrum to the second cervical vertebræ. It is thicker in the neck and loins than in the back and behind the sacrum. Its use is—to straighten the vertebral column, and to impress upon it a slight rotary motion.

Transversalis Nasi, Compressor naris.

TRANSVERSARIUS, Transverse.

TRANSVERSE, *Transver'sus, Transversa'lis, Transversa'rius*, from *trans*, 'over,' and *vertere*, 'to turn.' That which runs across: also, that which relates to the transverse processes of the vertebræ.

Transverse Artery of the Face, arises from the temporal; passes transversely across the face, in front of the condyle of the lower jaw, and gives its branches to the different muscles of the cheek.

Transverse Fissure, see Liver—t. Ligament of the Atlas, Annular ligament.

Transverse Perineal Artery, *Urethro-bulbar* (Ch.), is given off from the upper branch of the internal pudic; and passes inwards and forwards above the transversus perinæi muscle, as far as the bulb of the urethra, into which it dips, subdividing into numerous branches.

Transverse Proc"esses of the Ver'tebræ, *Diapophyses*, of Owen, (F.) *Apophyses transverses des vertèbres*, are the bony eminences that jut out transversely and posteriorly from the sides of the vertebræ.

Transverse Suture, *Sutu'ra transversa'lis*, runs across the face, and sinks into the orbit; joining the bones of the skull to those of the face, but with so many irregularities and interruptions, that it can scarcely be recognised as a suture.

*TRANSVERSE DE L'ABDOMEN*, Transversalis abdominis — *t. de l'Oricule*, Transversus auris — *t. du Périnée*, Transversus perinæi.

TRANSVERSO-SPINAL, Semi-spinalis colli, Semi-spinalis dorsi — t. Spinalis, Transversalis dorsi — t. Spinalis colli. Semi-spinalis colli — t. Spinalis dorsi, Semi-spinalis dorsi.

TRANSVER'SUS AURIS, *Transver'sus Auric'ulæ*, (F.) *Transverse de l'Oricule* (Ch.), *Transversal de la Conque*, is often wanting. It is formed of some transverse fibres, situate transversely, behind the projection of the helix which divides the concha into two portions.

Transversus Pedis, *Scandula'rius*, (F.) *Transversal des Orteils, Métatarso-sous-phalangien transversal du premier orteil* (Chaussier). A muscle, which arises by fleshy slips from the heads of the metatarsal bones of the three outer toes. Its tendon is inserted into the base of the first phalanx of the great toe, being blended with that of the adductor pollicis.

Transversus Perinæi, *Leva'tor Ani parvus, Ischio-périneal* (Ch.,) (F.) *Transverse du Périnée*, is placed at the posterior part of the perinæum. It is thin, triangular, and situate transversely. Its external extremity is attached to the ramus and tuberosity of the ischium: its inner extremity is confounded with its fellow of the opposite side, and with the anterior part of the sphincter ani and posterior part of the bulbo-cavernosns. The use of this muscle is, — to compress the urethra, and to support the rectum and bladder. To a fasciculus of this muscle, Santorini has given the name *Ure'thræ Eleva'tor* seu *Ejacula'tor*.

Transversus Perinæ'i Alter, *Prostat'icus inferior*. A small muscle which occasionally accompanies the last.

TRAPA NATANS, (F.) *Macre flottante, Noix d'Eau, Chataigne d'Eau*. *Sex. Syst.* Tetrandria Monogynia. The plant which affords the *Nuces Aquat'icæ, Trib'uli aquatici, Caltrops*. The nut is considered nutrient and demulcent, and is said to be useful in diarrhœa from abrasion of the bowels, and in calculus. A poultice is sometimes made of it to discuss hard and indolent tumours.

*TRAPÈZE*, Trapezium, Trapezius.

TRAPE'ZIUM OS, τραπεζιον. So called from its shape. *Os multan'gulum majus*, (F.) *Os trapèze*. The first bone of the second row of the carpus. It is articulated, above, with the scaphoides; below, with the first bone of the meta-

carpus; within, with the trapezoides, and second metacarpal bone. Anteriorly, posteriorly, and externally, it gives attachment to ligaments.

TRAPE'ZIUS, *Cuculla'ris*, (F.) *Dorso-sus-acromien* (Ch.), *Trapèze, Capuchon*. A muscle, seated at the posterior part of the neck and shoulder, and at the upper part of the back. It has the shape of a trapezium; is attached, on the one hand, to the inner third of the upper curved line of the occipital bone; to the posterior cervical ligament; to the spinous process of the 7th cervical vertebra; and to those of all the dorsal vertebræ; and, on the other hand, to the spine of the scapula; the acromion and the outer third of the posterior margin of the clavicle. Its upper fibres are situate obliquely downwards and outwards; the transverse and inferior, obliquely outwards and inwards. This muscle elevates the shoulder; carries it backwards, or depresses it, according as its upper, middle, or lower fibres contract separately. It straightens the head, also, and inclines it to one side.

TRAP'EZOID LIGAMENT. The anterior part of the coraco-clavicular ligament. It is a very strong, fibrous fasciculus, which has the shape of a trapezium, and is situate obliquely, between the acromion process and clavicle.

TRAPEZOÏ'DES, OS, *Os multan'gulum minus, Os pyramida'lē carpi*, from τραπεζιον, 'a trapezium,' and ειδος, 'shape or resemblance.' The second bone of the second row of the carpus,—so called from its shape. It is smaller than the trapezium, on the inside of which it is situate. It is articulated, above, with the os naviculare; below, with the second metacarpal bone; on the outside, with the trapezium; and internally, with the magnum. Anteriorly and posteriorly, it affords attachment to ligaments.

*TRAUBENCUR*, Grape cure.

TRAULISMUS, see Balbuties and Blæsitas.

TRAULOTES, see Blæsitas.

TRAUMA, Wound.

TRAUMAT'IC, *Traumat'icus, Vulnera'rius, Vul'nerary;* from τραυμα, 'a wound.' Any thing relating to a wound.

TRAUMATICA, Detergents, Vulneraries.

TRAUMATICUS, Traumatic, Vulnerary.

TRAUMATOP'YRA, *Febris traumat'ica;* from τραυμα, 'a wound,' and πυρ, 'fire.' A wound fever, or fever consecutive to a wound.

TRAVAIL, Parturition.

*TRAVAIL D'ENFANT*, Parturition.

TRAVELLER'S JOY, Clematis vitalba.

TREACLE, Melasses, Theriaca — t. English, Teucrium chamædrys — t. Venice, Theriaca.

TREAD, Cicatricula—t. of the Cock, Molecule.

TREE, ELK, Andromeda arborea—t. of Life, Thuya occidentalis—t. Sour, Andromeda arborea.

*TRÈFLE D'EAU*, Menyanthes trifoliata.

TREFOIL, Hepatica triloba — t. Bean, stinking, Anagyris — t. Marsh, Menyanthes verna—t. Sour, Oxalis acetosella — t. Shrubby, Ptelea trifoliata — t. Water, Menyanthes trifoliata.

TREMA, Foramen.

*TREMBLEMENT*, Tremor — *t. Métallique*, see Tremor.

TREMBLES, Milk-sickness.

TREMBLING, Tremor.

TREMELLA AURICULA, Peziza auricula.

TREMOR, *Trepida'tio, Syn'clonus Tremor, Tromo-spasmus, Tromus, Trembling*, (F.) *Tremblement*, from *tremere*, 'to tremble.' Involuntary agitation of the body, or of some part of it, without any obstacle to voluntary motion. It depends, generally, upon debility of the muscular, or of the nervous system; and, hence, is observed in convalescence, and in typhoid affections. It occurs, also, in old people; in hard drinkers; workers in mercury, lead, &c.: in the last case, it is called by the French, *Tremblement métallique*, *Tremor metal'licus*. Tremor seems to resemble paralysis more than convulsion. See Paralysis agitans and Pavitatio.

TREMOR CORDIS, Hippus, Palpitation — t. Metallicus, see Tremor — t. Purring, *Frémissement cataire*.

TREPAN, *Trep'anum, Terebel'la, Trip'anon, Pereter'ium, Peretor'ium, Serra versat'ilis, Chœn'icis, Chœnic'ion, Ter'ebra, Ter'etron, Tere'trium, Vertib'ulum, Try'panon*, (F.) *Trépan*, from τρυπαω, 'I perforate.' A surgical instrument resembling a wimble, and worked in the same manner. It is used for removing portions of bone, and particularly of the bones of the skull. The term *trepan* is given more particularly to the part of the instrument that makes the perforation. The handle is so constructed as to receive different bits, as the Crown, the *Trépan perforatif* or *Perite'rion*, the *T. exfoliatif* or *Desquamato'rium trep'anum*, and the *T. abaptis'ta*.

In Great Britain and the United States, this instrument has been superseded by the trephine, which is more manageable.

TREPANATIO, Trepanning.

*TRÉPANATION*, Trepanning.

TREPAN'NING, *Terebra'tio, Anatre'sis, Cephalotripe'sis, Trepana'tio, Trype'sis, Tresis, Prisis, Prismus, Fora'tio*, (F.) *Trépanation*. Same etymon as Trepan. The methodical application of the trepan.

TREPANON, Trepan.

TREPANUM, Trepan.

TREPHINE. The instrument which has replaced the trepan in some countries. It consists of a simple, cylindrical saw; with a handle placed transversely like that of a gimlet, and from the centre of the circle, described by the teeth of the saw, a sharp little perforator projects, called the *Centre-pin*. The centre-pin is capable of being removed, at the surgeon's option, by means of a key for the purpose. It is used to fix the instrument until the teeth of the saw have made a circular groove, sufficiently deep for it to work steadily. The pin must then be removed. Sometimes the pin is made to slide up and down, and to be fixed in any position, by means of a screw.

TREPHOUSA, Nurse.

TREPIDATIO, Tremor—t. Cordis, Cardiotromus.

TREPON'DO. A weight of three pounds. — Scribonius.

TRE'SIS, τρησις, from τρεω, 'I bore.' Properly, a perforation. A wound. A forcible solution of continuity in a soft part, commencing externally. A genus in the nosology of Good.

TRESIS, Trepanning, Wound — t. Causis, Burn — t. Punctura, Puncture — t. Vulnus, Wound — t. Vulnus laceratum, see Laceration — t. Vulnus simplex, Cut.

*TRESSAILLEMENT*, Shuddering.

TRESSO'RIA, *Episi'on*, επισειον. A term formerly applied to the hair covering the mons veneris, the absence of which has, by the vulgar, been esteemed a matter of reproach.

TRI, τρι, in composition, 'three.' Hence:

*TRIANGLE MÉDULLAIRE*, Fornix.

TRIANGLE, VESICAL, see Urinary Bladder.

TRIAN'GULAR, *Trigo'nos, Triangula'ris*, from *tris*, for *tres*, 'three,' and *angulus*, 'an angle.' That which has three angles.

TRIANGULAR LIGAMENT or INFRA-PUBIAN is a ligamentous fascia with short fibres, situate transversely beneath the symphysis pubis, which it strengthens.

TRIANGULARIS, Depressor anguli oris — t. Coccygis, Coccygeus—t. Nasi, Compressor naris.

Triangula'ris Sterni, *Sterno-costal* (Ch.,) *Pectora'lis inter'nus.* A muscle situate at the anterior and inner part of the chest, behind the cartilages of the ribs. It has the shape of a lengthened triangle, the base of which is directed downwards. It is attached to the posterior, lateral, and inferior part of the sternum, whence its fibres pass upwards and outwards, and terminate by as many distinct digitations at the cartilages of the 3d, 4th, 5th, and 6th true ribs. This muscle depresses the ribs and contributes to expiration.

TRIBAS, (F.) *Tribade*, from τριβω, 'I rub.' *Frictrix, Frica'trix, Futu'tor, Mas'cula, Subagita'trix, Subiga'tor.* A female whose clitoris is so large as to cause her to be regarded as an hermaphrodite. One who acts as a male with another female.

TRIBULI AQUATICI, see Trapa natans.

TRIBUTUM LUNARE, Menses — t. Menstruum, Menses.

TRICÆ, Plica—t. Incuborum, Plica—t. Scroforum, Plica.

TRICAGO, Teucrium chamædrys.

TRICAUDALIS, Retrahens auris.

TRICEPS, from *tris* for *tres*, 'three,' and *caput*, 'head.' A name given to muscles that have three fleshy bundles at one of their extremities.

Triceps Adduc'tor Fem'oris. Under this appellation are comprehended three distinct muscles; *Adductor brevis, A. longus*, and *A. magnus.*

Triceps Auris, Retrahens auris—t. Brachialis, Triceps extensor cubiti.

Triceps Cruris, *Femora'lis*, (F.) *Triémoro-rotulien* (Ch.,) *Crural, Triémoro-tibi-rotulien, Triceps crural, T. de la cuisse*, is situate at the anterior, inner, and outer part of the thigh. It is formed of three bundles at its superior extremity, viz. 1. A middle fasciculus (the *crura'lis* of most anatomists.) 2. An external fasciculus (the *vastus externus*) and 3. An inner fasciculus (the *vastus internus.*) It is attached, above, to the anterior, inner, and outer surfaces of the femur, and to the two edges of the linea aspera, from the base of the trochanter to within four fingers' breadth of the knee. Below, it terminates by a large tendon, which is attached to the base and edges of the patella, as well as to the inner and outer tuberosities of the tibia. The triceps extends the leg on the thigh, and conversely.

*TRICEPS DE LA CUISSE*, Triceps cruris—t. *Crural*, Triceps cruris.

Triceps Exten'sor Cu'biti, *Triceps brachia'lis*, (F.) *Scapulo-huméro-olécranien* (Ch.), *Triceps brachial.* This muscle, which occupies all the posterior part of the os humeri, is described as two muscles by Douglas, and as three by Winslow. It arises by three heads. The first or long head,—*long head of the biceps externus* of Douglas, *Anconeus major* of Winslow,—arises from the anterior extremity of the inferior costa of the scapula, near its neck, and below the origin of the teres minor The second head, or *short head of the biceps externus* of Douglas, *Anconeus externus* of Winslow, arises from the upper and outer part of the os humeri, at the base of the great tuberosity; and the third head,—*Brachialis externus* of Douglas, *Anconeus internus* of Winslow, —the shortest of the three, arises from the back part of the os humeri, behind the flat tendon of the latissimus dorsi. These three portions unite about the middle of the arm, so as to form one thick and powerful muscle, which is inserted at the upper part of the olecranon. It extends the forearm on the arm, and conversely.

Triceps Magnus, Adductor magnus—t. Minor, Adductor longus femoris—t. Secundus, Adductor brevis.

TRICHÆ INCUBORUM, Plica.

TRICHANGIECTA'SIA, *Angidiecta'sia, Trichocirsus*, from θριξ, τριχος, 'a hair,' αγγειον, 'a vessel,' and εκτασις, 'dilatation.' Morbid dilatation of the capillary vessels.

TRICHAUX'Ē; from θριξ, τριχος, 'hair,' and αυξη, 'increase.' Increase in the quantity and size of the hair, without change of texture.

TRICHERA ARVENSIS, Scabiosa.

TRICHIA, Entropion.

TRICHI'ASIS, *Trichio'sis, Tricho'sis*, from θριξ, τριχος, 'hair.' *Morbus pila'ris.* This name has been given to several affections. 1. To a disease of the kidneys or bladder, in which filamentous substances, resembling hairs, are passed in the urine. This is also called *Pilimic'tio.* It must be regarded as a variety of *Catar'rhus vesi'cæ.* 2. To a painful swelling of the breasts, in child-bed women, when the milk is excreted with difficulty: — a disease attributed, by Aristotle, to a hair swallowed by accident and carried to the breasts through the circulation; and 3dly, To inversion of the eye-lashes. See Entropion.

TRICHIASIS LACTEA, Infarctus mammæ lacteus.

TRICHILIA, Cathartics.

TRICHI'NA SPIRA'LIS. Same etymon. A small species of entozoa discovered in the muscles of voluntary motion. Trichinæ consist of very minute cysts, of an oblong figure, having considerable resemblance, in size and colour, to young pediculi, and are somewhat allied to the eels found in paste and vinegar. No symptoms have as yet been observed to be pathognomonic of their presence.

TRICHIOSIS, Trichiasis — t. Distrix, Distrix.

TRICHIS'MUS. Same etymon. *Capilla'tio, Fissu'ra pila'ris.* A capillary fracture, fissure, or crack.

TRICHIURIA, Trichocephalus.

TRICHOCEPH'ALUS, *Trichoceph'alus dispar:* from θριξ, τριχος, 'a hair,' and κεφαλη, 'head.' *Trichu'ris, Trichuris vulgaris, Trichuris intestina'lis, As'caris trichu'ria, Trichiu'ria, Trichocephalus hom'inis, Mastigo'des hominis, Long thread-worm.* A worm, from an inch and a half to two inches long; the head acute; the body spirally involuted in the male, almost straight in the female. The *trichocephalus dispar* generally inhabits the cæcum and colon, and is rarely met with in the small intestines. It gives rise to no peculiar symptoms, and requires the usual anthelmintic treatment.

TRICHOCIRSUS, Trichangiectasia.

TRICHOLABIS, Madisterium.

TRICHOLABIUM, Madisterium.

TRICHOLOGIA, Carphologia.

TRICHOMA, Capillamentum, Plica.

TRICHOMANES, Asplenium trichomanoides —t. Crenata, Asplenium trichomanoides.

TRICHOMATION, Capillamentum.

TRICHOMATOSE HAIR, Plica.

TRICHOM'ONAS, *Trichom'onad*; from θριξ, τριχος, 'a hair,' and μονας, μοναδος, 'unity.' An animalcule found by by M. Donné in the mucus of the vagina, where cleanliness has not been attended to, and to which he has given the name *Trichom'onas vagina'lis.* By some it is considered to be nothing more than separated ciliated epithelium from the uterus.

TRICHON'OSUS, from θριξ, τριχός, 'hair,' and νοσος, 'disease.' A disease of the hair.

TRICHOPHY'IA, *Trichophyt'ica*, from θριξ,

τριχος, 'hair,' and φυειν, 'to grow. Remedies that promote the growth of the hair.

TRICHOPHYTON TONSURANS, see Porrigo decalvans.

TRICHOSCHISIS, Schizatrichia.

TRICHO'SIS, *Pila'rē malum;* from θριξ, τριχος, 'hair.' Morbid organization or deficiency of hair. A genus in the system of Good.

Trichosis, Entropion, Trichiasis — t. Area, Porrigo decalvans — t. Athrix, Alopecia — t. Distrix, Distrix—t. Furfuracea, Porrigo furfurans — t. Hirsuties, Hirsuties—t. Plica, Plica — t. Poliosis, Poliosis — t. Setosa, Hystriciasis.

TRICHOTON, Scalp.

TRICHURIS, Trichocephalus.

TRICLISPERMA GRANDIFLORA, Polygala paucifolia.

TRICUS'PID, *Tricus'pis, Tricuspida'lis, Tricuspida'tus,* from *tris* for *tres,* 'three,' and *cuspis,* 'a point.' That which has three points.

Tricuspid Valves, *Val'vulæ Tricus'pides* seu *triglo'chines* seu *trisul'cæ,* are three triangular, valvular duplicatures, formed by the inner membrane of the right cavities of the heart, around the orifice by which the auricle communicates with the ventricle. The elongated and pointed top of each of these valves is continuous with the chordæ tendineæ, which set out from the columnæ carneæ of the heart. These valves are depressed to allow the blood to flow from the auricle into the ventricle; and are raised to prevent its reflux into the auricle.

TRIENS, *Un'cia quatuor.* The third part of a pound. Four ounces, Troy. — Galen.

TRIFACIAL, Trigemini.

*TRIFÉMORO-ROTULIEN,* Triceps cruris — t. *Tibi-rotulien,* Triceps cruris.

TRIFOLIUM ACETOSUM, Oxalis acetosella — t. Aquaticum, Menyanthes trifoliata — t. Aureum, Hepatica triloba—t. Cervinum, Eupatorium cannabinum—t. Fibrinum, Menyanthes trifoliata — t. Hepaticum, Hepatica triloba.

Trifolium Melilotus Officinalis, *T. offic''ina'lē, Melilo'tus cit'rina, Melilotus, Lotus sylves'tris, Ser'tula Compa'na, Trifo'lium caballi'num, Coro'na regia, Trifolium odora'tum, Common mel'ilot,* (F.) *Mélilot. Family,* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. The infusion or distilled water of this plant has been employed in cases of ophthalmia. It has also been used in fomentations, glysters, &c.

Trifolium Officinale, T. melilotus officinalis — t. Paludosum, Menyanthes trifoliata — t. Palustre. Menyanthes trifoliata.

TRIGAS'TRIC, *Trigas'tricus, Triven'ter;* from τρεις, 'three,' and γαστηρ, 'belly.' That which has three bellies. An epithet for muscles so circumstanced.

TRIGEM'INI, *Tergem'ini,* from *tris,* 'three,' and *gem'inus,* 'double;' 'threefold,' 'triplets.' The *fifth pair of nerves, Par trigem'inum, Nervi divi'si, N. gustato'rii, Nervus quintus, Par quintum nervorum cerebra'lium, N. tremellus, N. mixtus, N. sympathet'icus me'dius, N. sympath'icus medius, N. anon'ymus, N. innomina'tus, Par trium funiculo'rum, Trifa'cial,* (F.) *Nerf gustatif innominé, Nerf à trois cordes, Nerf trijumeau.* This nerve arises below the tuber annulare by one large posterior root from the corpora restiformia, and by two small anterior roots from the corpora olivaria, whence, proceeding forwards to the side of the sella Turcica, the filaments composing the large root form a ganglion — the Gasserian. Emerging from this ganglion, the filaments, of which the large root consists, form, with those constituting the small roots, and which had not passed through the ganglion, two flattened trunks, each of which is soon divided into three branches, in such a manner, however, that the *first,* or *ophthalmic branch,* and the *second* or *upper maxillary,* are composed exclusively of the filaments that arose from the corpora restiformia and passed through the Gasserian ganglion; whilst the *third* or *lower maxillary branch* is composed in part of those filaments, and in part of those that arose from the corpora olivaria, and passed on one side of the ganglion without going through it. The whole, therefore, of the first and second branches, and a part of the third are sensiferous nerves, whilst the remaining part of the third—the *manducatory* or *masticatory* — is wholly motiferous, and passes to the pterygoid and other muscles concerned in mastication.

*TRIGONE CÉRÉBRAL,* Fornix—*t. Vésical,* see Urinary Bladder.

TRIGONEL'LA FŒNUM, *T. Fœ'num Græ'cum, Fen'ugreek, Fœ'nugreek, Fœnum Græ'cum, Bu'ceras, B. Fœnum Græ'cum, Carphos, Ægoc''eras,* (F.) *Fénugrec. Family,* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. A native of the south of France. The seeds have a strong, disagreeable smell, and an unctuous, farinaceous taste; accompanied by a slight bitterness. They are chiefly used in poultices.

TRIGONOS, Triangular.

TRIGONUS VESICÆ, see Urinary bladder — t. Lientaudi, see Urinary bladder.

*TRIJUMEAUX,* Trigemini.

TRIL'LIUM LATIFO'LIUM, *Broadleaf Bethroot, Bethroot, Rattlesnake root, Wakerobin, Coughroot, Indian Balm, Ground Lily, Jews' Harp, Indian Shamrock, Pariswort, Truelove. Sex. Syst.* Hexandria Trigynia. A plant peculiar to North America, which blossoms in the spring. The root is astringent.

There are many species of Trillium, all of which possess the same properties.

TRIOCEPHALIA, Aprosopia.

TRIOR'CHIS, from τρεις, 'three,' and ορχις, 'a testicle.' One who has three testicles.

TRIOSTEOSPERMUM, Triosteum.

TRIOS'TEUM, *T. Perfolia'tum* seu *majus, Trioosteosper'mum, Bastard Ipecacuan'ha, Fever Root, Feverwort, Tinker's weed, Horse ginseng, Ipecac., Wild Coffee, White ginseng, Gen'tian, White Gentian, Sweet Bitter.* In very large doses, the bark of the root proves emetic. It is a good cathartic, in doses of twenty or thirty grains. It sometimes operates as a diuretic.

*TRIPE DE ROCHE.* Different lichens of the species Gyrophora, inhabiting the arctic regions of America, bear this name. They are eaten as food by the hunters.

TRIPHAR'MACUM, τριφαρμακον. A medicine composed of three ingredients.

TRIPLET, from *triplex,* 'triple.' One of three children born at the same accouchement or gestation. Also, relating to triplets — as a '*triplet* conception.'

Triplet Monsters, *Monstra trip'lica* seu *trigem'ina,* are such as have parts of the body tripled. They are rare.

TRIPSIS, Contusio, Trituration.

TRIPUDIATIO SPASTICA, Chorea.

TRIQUETRUM, (OS,) Cuneiform (bone.)

TRISIS, Brygmus.

TRISMUS, from τριζω, 'I gnash.' *Enta'sis Trismus, Capis'trum, Tonos Trismus, Locked Jaw, Spasmus* seu *Rigor* seu *Tet'anus maxill'æ inferio'ris, Gnathospas'mus, Stomatospas'mus,* (F.) *Mal de Machoire.* Spastic closure of the under jaw; a partial tetanus. Cullen makes two va-

rieties—*T. nascen'tium*, *T. neonato'rum*, *Nineday fits*, (F.) *Sarrête*, attacking infants during two weeks from birth; and *T. traumaticus*, originating from a wound.

Trismus Capistratus, *Brédissure*—t. Catarrhalis maxillaris, Neuralgia maxillaris—t. Clonicus, Neuralgia faciei—t. Cynicus, see Canine laugh—t. Diastrophe Sauvagesii, Paralysis, Bell's—t. Dolorificus, Neuralgia faciei—t. Maxillaris, Neuralgia faciei—t. Nascentium, see Trismus—t. Neonatorum, see Trismus—t. Sardonicus, Risus sardonicus.

TRISPER'MUM, from τρεις, 'three,' and σπερμα, 'a grain or seed.' A cataplasm, consisting of three seeds,—*cumin*, *bay*, and *smallage*. Gorræus.

TRISPLANCHIA, Cholera.

TRISPLANCH'NIC, *Trisplanch'nicus*; from τρεις, 'three,' and σπλαγχνον, 'viscus.' That which relates to three orders of viscera.

Trisplanchnic Nerve, *Great sympathet'ic*, *Intercos'tal*, *Ganglion'ic nerve*, *Nerve of organ'ic life*, *Ver'tebral nerve*;—named by Bichat the *organic nervous system*, in opposition to the other nervous parts, called the *animal nervous system*. Gall terms it, the *nervous system of the automat'ic functions*. It has also been called the *organic nervous system*, and *ganglionic nervous system*. It is called *Trisplanchnic*, because it distributes its branches to the organs in the three great splanchnic cavities—the head, chest and abdomen. It is composed of a series of ganglia, united by intermediate branches, and passing along the side of the spine to the lowest part of the trunk; communicating, by a branch, with each of the thirty pairs of spinal nerves and several of the cerebral nerves; and detaching nerves from its several ganglia, which accompany the arteries, and are distributed, particularly, to the organs of involuntary functions. At its upper part, it is concealed in the canalis caroticus and cavernous sinus, and is joined there by a branch of the 6th pair of nerves, and by a twig from the Vidian nerve of the 5th pair. In passing down by the side of the spine, it forms three ganglia in the neck:—the *superior*, *middle*, (*thyroid ganglion*,) and *inferior*, (*ver'tebral ganglion*); 12 in the back—the *thoracic*; 5 in the loins—the *lumbar*; and three or four *sacral*. When it reaches the coccyx it unites with its fellow from the opposite side, forming a small ganglion—the *coccygeal*, *Gan'glion impar*, *az'ygous gan'glion*. Meckel divides it into two portions—1. The *central ganglions* or *central part*, composed of the numerous ganglionic plexuses in the abdomen; the centre of which is the *semilunar* and *solar plexuses*. 2. The *external ganglions*, *Limitrophes* or *external part*, which comprise the series of ganglions situate at the sides of the spine, from the base of the cranium to the sacrum. The great sympathetic seems to form a distinct nervous system, destined for the organs of involuntary motion; for although communicating with both brain and spinal marrow, it does not seem to be immediately under the influence of either.

TRISPLANCHNITIS, Cholera, (spasmodic.)

TRISSAGO, Teucrium chamædrys—t. Palustris, Teucrium scordium.

TRISTEMANIA, Melancholy.

TRISTERN'AL. Béclard has given this name to the third bony portion of the sternum;—that which corresponds to the third intercostal space.

TRISTITIA, Athymia, Mœror.

TRITÆOPHYA AMERICANA, Fever, yellow.

TRITÆOPH'YES. *Tritæoph'ya*, from τριταιος, 'tertian,' and φυω, 'I originate.' A fever, whose type approaches the tertian. Sauvages gave the name *Tritæophya Vratislavien'sis*, to an epidemic, which broke out in the Prussian army at Breslaw, in the middle of the last century.

TRITÆUS, Tertian fever.

TRIT'ICUM ÆSTI'VUM, *T. cerea'lē* seu *Cevallos* seu *compac'tum* seu *erina'ceum* seu *Gaertneria'num* seu *Linnæa'num* seu *pruino'sum*, 'Summer wheat;' and Trit'icum Hybern'um seu *glaucum* seu *Mu'ticum* seu *Sic'ulum*, *Winter wheat*, (F.) *Froment*. *Family*, Gramineæ. *Sex. Syst.* Triandria Digynia. From these plants our wheaten flour is obtained, by grinding the seeds—*Wheat*, *Pyrus*, *Frumen'tum*—and to them we are indebted for our bread and pastry. The nutritive properties of wheaten flour are so well known as not to need comment.

*Bread*, (F.) *Pain*, mixed with milk, constitutes the ordinary emollient poultice;—and the *crumbs of bread*, *Micæ panis*, are a common excipient for pills and boluses.

Triticum Arvense, T. repens—t. Cereale, T. æstivum—t. Cevallos, T. æstivum—t. Compactum, T. æstivum—t. Faginum, Polygonum fagopyrum—t. Gaertnerianum, T. æstivum—t. Glaucum, T. hybernum, and T. repens—t. Hybernum, see T. æstivum—t. Muticum, T. hybernum—t. Linnæanum, T. æstivum—t. Pruinosum, T. æstivum.

Trit'icum Repens, *T. arven'sē* seu *glaucum*, *Agrop'yrum læviu'simum*, *Bromus glaber*, *Gramen cani'num*, *Gramen dioscor'idis*, *G. repens*, *Lolia'ceum radi'cē repen'tē*, *Dog-grass*, *Couch-grass*, *Quickens*, (F.) *Chiendent*. The roots are sweet, and possess aperient properties. They are said, also, to be diuretic.

Triticum Siculum, T. hybernum.

TRITIO, Contritio, Trituration.

TRITON PALUSTRIS, see Ectozoa.

TRITURA, Contritio.

TRITURA'TION, *Tritura'tio*, *Trituˊra*, *Tritus*, *Tri'tio*, *Tripsis*, from *terere*, *tritum*, 'to bruise.' The act of reducing a substance to powder.

Trituration, Contritio.

TRITUS, Contritio, Trituration.

TRIVELIN, see Liver.

TRIVENTER, Trigastric.

TROCAR, *Trochar*, *Acus paracent'ica* seu *paracentet'ica*, *A. trig'uetra vulga'ris*, *Paracenti'cion*, *Paracentcte'rion*. Corrupted from the (F.) *Troisquarts* or *Trocart*, 'three quarters;' so called from the triangular shape of the point—*Trig'uetrum*. An instrument used for evacuating fluids from cavities, particularly in ascites, hydrocele, &c. A trocar consists of a perforator or stylet and a cannula, which is so adapted to the perforator, that, when the puncture is made, both enter the wound with facility; after which, the stylet being withdrawn, the cannula remains in the wound and affords the fluid a ready passage outwards.

*TROCART*, Trocar.

TROCH, Trochiscos.

TROCHAN'TER, *Trokanter*, *Rota'tor*, from τροχαω, 'I turn.' Anatomists have given the names *great* and *little trochanter* to two processes at the upper extremity of the femur. The *great trochan'ter*, *glutus*, is the one on the outside; the *less* is lower down and more internally. Both afford attachment to rotator muscles of the thigh, and hence their name. Chaussier, by the word *trochanter*, means the larger process, the smaller he calls *trochantin*.

TROCHANTER'IAN, *Trochanteria'nus*, *Trokanter'ian*. That which belongs or relates to the great trochanter.—Chaussier.

TROCHANTIN'IAN, *Trokantin'ian*, *Trochantinia'nus*. That which belongs or relates to the trochantin or lesser trochanter.

TROCHAR, Trocar.

TROCHES OF CARBONATE OF LIME, Trochisci carbonatis calcis — t. of Chalk, Trochisci carbonatis calcis — t. Escharotic, Trochisci escharotici — t. Gum, Trochisci gummosi — t. of Ipecacuanha, Trochisci ipecacuanhæ — t. Liquorice, Trochisci glycyrrhizæ — t. Liquorice, with opium, Trochisci glycyrrhizæ cum opio — t. of Magnesia, Trochisci magnesiæ — t. Nitre, Trochisci nitratis potassæ — t. of Peppermint, Trochisci menthæ piperitæ.

TROCHIA, Orbit.

TROCHILIA, Trochlea.

TROCHIN, from τροχειν, 'to turn.' Chaussier has given this name to the smaller of the tuberosities at the upper extremity of the os humeri; because it gives attachment to one of the rotator muscles of the arm,—the subscapularis.

TROCHIN'IAN, *Trochinia'nus*. That which belongs or relates to the trochin.

TROCHIS'CUS, *Phthois, Artis'cus, Collix, Colix, Phthois'cos, Rot'ula, Cyclis'mos*, diminutive of τροχος, 'a wheel.' A *troch* or *round* table, (F.) *Trochisque*. See Pastil, and Tabella. A solid medicine, prepared of powders, incorporated by means of mucilage, crumb of bread, juices of plants, &c. In French nomenclature, the *trochisque* differs from the *tablette*,—the former containing no sugar. This form of preparation is adapted for the purpose of allowing the medicines of which the troch is composed to dissolve slowly in the mouth, and to pass gradually into the stomach.

The Parisian Codex has two formulæ for troches for external use.

Trochisci Bechici Nigri, T. glycyrrhizæ glabræ.

Trochisci Carbona'tis Calcis, *Troches of Car'bonate of lime, T. of chalk, Tabellæ ad ardo'rem ventric'uli, Lozenges for the heartburn, Tabel'læ cardial'gicæ, T. ad sodam, Trochis'ci e cretâ, T. cretæ* (Ph. U. S.) (*Cret.* ppt. ℥iv; *acaciæ*, in pulv. ℥j; *myrist.* in pulv. ℥j; *sacch.* in pulv. ℥vj. M. Form into troches with *water*.) Antacid and absorbent.

Trochisci e Cretâ, Tr. carbonatis calcis — t. Cretæ, T. carbonatis calcis.

Trochisci vel Pastil'li Emeti'næ Pectora'les, *Pectoral Lozenges of Em'etine*. (*Sugar*, ℥iv; *emetine*, 32 grains. Form into lozenges of nine grains each.) One is a dose.

Trochisci Escharot'ici, *Escharot'ic Troches*. (*Hydrarg. oxymur.* p. 8; *amyli*, p. 16; *mucilag. g. tragac.* q. s. Make into troches, to which a few drops of laudanum may be added. — Ph. P.) Used in foul ulcers, to remove excrescences, &c.

Trochisci Escharot'ici de Min'io. (*Oxyd. plumbi. rubr.* p. 16; *hydrarg. oxymur.* p. 32; *mic. panis*, p. 128; *aq. rosæ*, q. s. — Ph. P.) Used like the last.

Trochisci Glycyrri'zæ Glabræ, *Liq'uorice troches, Black pectoral lozenges, Trochis'ci bech'ici nigri.* (*Ext. glyc. glabr., gum. acac.* āā p. j; *sacch. purif.* p. ij. Dissolve in warm water; strain; evaporate, and form into troches.—Ph. E.) Demulcent. To allay cough.

Trochisci Glycyrrhi'zæ cum O'pio, *T. G. et opii* (Ph. U. S.), *Trochisci Theba'ici, T. sedati'vo-balsam'ici, T. pectora'les regis Dano'rum, Liquorice Troches with Opium, Wistar's Lozenges.* (*Opii*, in pulv. ℥ss; *ext. glycyrrhiz.* in pulv., *sacchar.* in pulv., *acaciæ*, in pulv., āā ℥x; *ol. anisi*, f℥j. Make into troches.—Ph. U. S.) Demulcent and anodyne.

*Spitta's Lozenges* for coryza, hoarseness, and sore-throat, are composed as follows:—(*Cubeb. recent.* in pulv. ℥ij; *extract. glycyrrhiz.* ℥j; *myroxyl.* ℥j; *acaciæ*, ℥iv; *syrup*, q. s. ut fiant trochisci gr. x singulis.

Trochisci Gummo'si, *Gum Troches*. (*G. acac.* p. v; *amyli*, p. i; *sacch. pur.* p. xij. Make up the troches with rose-water. — Ph. E.) Demulcent.

Trochis'ci Ipecacuan'hæ, *Troches of Ipecacuanha*. (*Ipecacuanh.* in pulv. ℥ss; *sacchar.* in pulv. ℥xiv; *marantæ*, in pulv. ℥iv; *mucilag. tragacanth.* q. s. Make into troches.—Ph. U. S.)

Trochisci Magne'siæ, *Troches of Magne'sia*. (*Magnes.* ℥iv; *sacchar.* ℔j; *myrist.* pulv. ℥j; *mucilag. tragacanth.* q. s. Make into troches.—Ph. U. S.) Useful in acidity of the stomach, with constipation.

Trochisci Menthæ Piperi'tæ, *Troches of Peppermint.* (*Ol. menth. piperit.* f℥j; *sacchar.* in pulv. ℔j; *mucilag. tragacanthæ*, q. s. Make into troches.—Ph. U. S.) Used as a carminative.

Trochisci Nitra'tis Potas'sæ, *Nitre Troches*. (*Nitrat. potassæ*, p. j; *sacch. pur.* p. iij. Make into troches with mucilage of tragacanth. — Ph. E.) In slight inflammatory sore-throat and fever.

Trochisci Pectorales Regis Danorum, Tr. glycyrrhizæ cum opio — t. Sedativo-balsamica, Tr. glycyrrhizæ cum opio.

Trochis'ci Sodæ Bicarbona'tis, *Troches of Bicar'bonate af Soda.* (*Sodæ bicarb.* ℥iv; *sacchar.* in pulv. ℔j; *mucilag. tragacanth.* q. s. To be made into a mass, and divided into troches, each weighing ten grains. — Ph. U. S.)

The *Pastilles de Vichy, Pastilles digestives d'Hauterive-Vichy, Pastil'li digesti'vi Darcet'ii*, composed of *bicarbonate of soda, oil of peppermint*, and *sugar*, are much used in France, like the Vichy waters, in cardalgia, gout, and lithiasis.

Trochisci Stibiati, Tabellæ antimoniales Kunckelii — t. Thebaici, T. glycyrrhizæ cum opio.

*TROCHISQUE*, Trochiscos.

TROCH'ITER, from τροχειν, 'to turn.' The larger of the two tuberosities at the upper extremity of the os humeri; so called because it affords insertion to rotator muscles. — Chaussier.

TROCHITER'IAN, in the language of Chaussier, means any thing belonging or relating to the trochiter.

TROCH'LEA, *Trochil'ia*, (F.) *Trochlée* ou *Troklée*. A pulley; from τροχαω, 'I turn,'—for example, the articular surface at the lower extremity of the os humeri; so called from its forming a kind of pulley on which the ulna moves, in flexion and extension of the forearm. Also, the cartilaginous pulley over which the tendon of the trochlearis muscle passes, at the upper and inner part of the orbit.

Trochlea Labyrinthi, Cochlea.

TROCHLEARIS, Obliquus superior oculi.

*TROCHLÉATEUR, GRAND*, Obliquus superior oculi—*t. Petit*, Obliquus superior oculi.

*TROCHLÉE*, Trochlea.

TRO'CHOID, from τροχος, 'a wheel,' and ειδος, 'resemblance.' *Trochoï'des, Ax'ea commissu'ra.* An articulation, in which one bone turns upon another, like a wheel upon its axle; as the *Atloïdo-axoid articulation.*

TROCHOIDES, Axea commissura.

*TROÊNE*, Ligustrum vulgare.

*TROISQUARTS*, Trocar.

TROKANTER, Trochanter.

TROKANTERIAN, Trochanterian.

TROKANTINIAN, Trochantinian.

*TROKLÉE*, Trochlea.

TROMOMANIA, Delirium tremens.

TROMOPARANŒA, Delirium tremens.

TROMOS, see Paralysis agitans.

TROMOSPASMUS, Tremor.

*TROMPE*, Tuba — *t. d'Eustache*, Eustachian tube—*t. de Fallope*, Tuba Fallopiana—*t. Utérine*, Tuba Fallopiana.

TROMUS, Tremor.

*TRONC*, Trunk—*t. Brachial*, Brachial artery —*t. Basilaire*, Basilary artery.

TROPÆ'OLUM MAJUS, *Indian Cress*, *Nastur'tium Indicum*, *Acrivi'ola*, *Flos sanguin'eus monar'di*, *Nastur'tium Peruvia'num*, *Cardamin'dum majus*, *Car'damum majus*. *Family*, Geraniaceæ. *Sex. Syst.* Octandria Monogynia. (F.) *Cresson des Indes*, *Cresson du Mexique*, *Capucine*. An antiscorbutic.

TROPÆ'OLUM TUBERO'SUM, *Ulluco*. A tuberous plant, cultivated in the Sierra, Peru. It is smaller than the potato.

TROPHALIS, Colostrum.

TROPHE, Aliment, Cibatio, Pabulum.

TROPHI. Same etymon as Trophy. In insects, the parts of the mouth that are employed in receiving and preparing the food.

TROPH'ICAL, *Troph'icus*. Same etymon as Trophy. Relating to nourishment or nutrition.

TROPH'ICAL NERVES. The organic nerves, or nerves of the sympathetic system, have been so termed, from a belief that they were concerned in nutrition.

TROPHIMOS, Nutrition.

TROPHONEURO'SIS, from τροφη, 'nourishment,' and *neurosis*. A morbid condition of the process of nutrition owing to diminished nervous influence.

TROPHON'OSI, *Trophonu'si*, from τροφη, 'nourishment,' and νοσος, 'a disease.' Diseases of nutrition.

TROPH'Y, *Troph'ia*, τροφη, a suffix denoting 'nourishment or nutrition;' as hyper*trophy*, 'excess of nourishment or nutrition.'

TROPONU'SI, *Morbi trop'ici*, from τροπη, the solstitial or tropical point where the sun turns or alters its course, and νουσος, 'a disease.' Diseases that prevail in the tropics.

TROSTER, see Spirit.

*TROU*, Foramen—*t. Anonyme*, Foramen stylomastoideum—*t. Aveugle* ou *Borgne*, Cæcum foramen—*t. Borgne* of the Medulla oblongata, Foramen cæcum of the medulla oblongata—*t. de Botal*, Botal foramen, Ovale foramen—*t. Déchiré antérieur*, Lacerum anterius foramen—*t. Déchiré postérieur*, Lacerum posterius foramen—*t. Épineux*, Spinale foramen—*t. Mentonnier*, Mental foramen—*t. Optique*, Foramen opticum—*t. Orbitaire supérieur*, Foramen supra-orbitarium—*t. Orbitaire supérieur*, Orbitar foramen superior—*t. Ovale*, Ovale foramen—*t. Rond, petit*, Spinale foramen—*t. Sous-orbitaire*, see Suborbitar canal —*t. Sous pubien*, Obturatorium foramen—*t. Sphéno-épineux*, Spinale foramen—*t. Sus-orbitaire*, Foramen supra-orbitarium.

*TROUS CAROTIDIENS*, Carotica foramina —*t. Condyloïdiens*, Condyloidea foramina—*t. de Conjugaison*, Conjugationis foramina—*t. de Conjugaison*, see Vertebræ—*t. Olfactifs*, Olfactory foramina—*t. Rachidiens*, Spinal foramina.

*TROUSSE-GALANT*, Cholera morbus.

*TROUSSEAU*, Fasciculus.

*TROUSSEAUX ARRIÈRE-MÉSENTÉRIQUES*, (F.) A name given by Winslow to the nervous plexus situate between the two mesenteric plexuses, of which it is a dependence, and which descends into the pelvis to concur in the formation of the hypogastric plexus.

TRUBS, Lycoperdon tuber.

TRUCULENTUS, Homicidal.

TRUELOVE Paris, Trillium latifolium.

*TRUFFE*, Lycoperdon tuber.

TRUFFLE, Lycoperdon tuber.

TRUMBUS, Thrombus.

TRUMPET CREEPER, Tecoma radicans—t. Flower, Tecoma radicans—t. Weed, Eupatorium purpureum.

TRUNCUS, Trunk.

TRUNK, *Truncus*, (F.) *Tronc*. The principal part of the body, to which the limbs are articulated. The trunk has been divided into three parts:—a *superior*, the *head*; a *middle*, the *thorax*, and an *inferior*, the *pelvis*. These three regions contain the great splanchnic cavities. They are united by a common *stalk*—the vertebral column. To the *middle* are articulated the superior extremities; and, to the *inferior*, the lower extremities.

The *trunk* of an artery, vein, nerve, or lymphatic, is its largest part, which has not yet given off branches. It is, also, applied to the parent vessel, after branches have been sent off.

TRUSS, from (F.) *trousser*, 'to tie up.' *Brache'rium*, *Brachie'rium*, *Brachi'lē*, *Brachi'rolum*, *Bracheri'olum*, *Amma*, *Hamma*, *Subligac'ulum*, *Subligatu'ra*, (F.) *Brayer*. A hernial bandage for keeping hernia reduced. The ancient trusses were inelastic. They consisted simply of a pad and strap. At the present day, elastic bandages are alone employed. They possess the advantage of making an equable and continuous pressure on the aperture of the sac; and of yielding to the changes of form in the abdominal parietes. The most important part of these bandages is a piece of narrow steel, flat, and adapted to the shape of the body. This is the *spring*, (F.) *Ressort*. It embraces the body on the side affected; extends from beyond the spine, and terminates opposite the ruptured part, by an iron plate to which it is riveted. The posterior surface of this plate is furnished with a convex *pad*, (F.) *Pelote*, adapted in shape and size to the aperture which it has to close. The spring is covered with leather, and its inner surface is padded; a strap extends from its posterior extremity; passes round the sound side, and is attached to the plate of the pad. This strap is pierced with numerous holes, which allow the patient to tighten or slacken it at pleasure. Trusses have been variously constructed; and different patents obtained for the modifications. They all act upon the above principle. Sometimes they have a double pad.

TRYGODES, Feculent.

TRYPANON, Trepan.

TRYPESIS, Trepanning.

TRYPSIS, Friction.

TSCHERBET, Sherbet.

TSIANA, Costus.

TSJAMPACA, Michelia champaca.

TUBA, Tube—t. Aristotelica, Eustachian tube —t. Cæca, Tuba, Fallopiana—t. Uterina, Tuba Fallopiana—t. Vocalis, Tube, vocal.

TUBAL RESPIRATION, see Murmur, respiratory.

TUBE, *Tuba*, *Trumpet*, *Salpinx*, (F.) *Trompe*. A name given to some parts which are hollow, and have the shape of a trumpet.

TUBE, ALIMENTARY, Canal, alimentary—t. Eustachian, Eustachian tube.

TUBE, FALLO'PIAN, *Tuba Fallopia'na* seu *Fallopii*, *Hys'terosalpinx*, *Oviduc'tus mulie'bris*, *Vas def'erens mulie'ris*, *Tuba uteri'na*, *T. cæca*, *Ductus varico'sus* seu *Proces'sus latera'lis* seu *Mea'tus semina'lis* seu *Me'atus semina'rius u'teri*, (F.) *Trompe de Fallope*, *T. utérine*, is a canal, floating in the abdomen, and extending on each side from the superior angles of the uterus as far as the sides of the brim of the pelvis. They are 4 or 5 inches long. Near the uterus, they are straight

and very narrow; but, in their course, they widen, become tortuous, and terminate by a free, expanded, and *fim'briated extremity;* called, also, *Folia'ceum ornamen'tum, Morsus diab'oli, Infundib'ulum* seu *Digitatio'nes* seu *Fim'briæ* seu *Vexillæ tuba'rum Fallo'pii, Lacin'iæ tuba'rum Fallopii,* (F.) *Morceau frangé, Pavillon de la trompe, Morceau du diable.* Within, the tubes are hollow and lined by a mucous membrane: the tissue exterior to which is spongy and erectile. The use of the Fallopian tubes is to conduct the sperm to the ovarium, and the fecundated ovum back to the uterus. They establish a communication between the cavity of the peritoneum and that of the uterus, the abdominal termination being termed *Os'tium abdomina'lē;* the uterine, *Os'tium uteri'num.*

Tube, Intestinal, Canal, alimentary.

Tube, Œsophage'al, *Stomach Tube.* A long elastic gum tube, capable of being passed into the œsophagus or stomach.

Tube, Rectal, *Defeca'tion tube.* An elastic gum tube, similar to the last, which is sometimes passed into the colon, to remove air from that intestine, or to enable enemata to be thrown up into it.

Tube, Stomach, see Tube, œsophageal.

Tube, Vocal, *Tuba voca'lis.* The part of the air-passages above the inferior ligaments of the larynx, including the passages through the nose and mouth.

TUBER, Hump, Lycoperdon tuber, Tubercle — *t. Atloïdo-occipital,* Rectus capitis posticus minor — t. Cibarium, Lycoperdon tuber.

Tuber Cine'reum. A grayish tubercle, seen at the base of the brain behind the commissure of the optic nerves, which is continuous with the infundibulum.

Tuber Frontale, Frontal protuberance — t. Gulosorum, Lycoperdon tuber — t. Gutturosum, Bronchocele — *t. Ischio-trochantérien,* Quadratus femoris — t. Ischii, see Ischiatic — t. Nigrum, Lycoperdon tuber — t. Pellagra, Pellagra — t. Tympani, Promontory of the tympanum.

TUBERA TERRÆ, Lycoperdon tuber.

TU'BERCLE, *Tuber'culum, Tuber, Strangal'ion, Stran'galis, Tuber'culous depos'it,* a *Kernel,* (vulg.), *a Knot* (vulg.), (F.) *Tubercule.* A tumour in the substance of organs, from the production of new matter: — sensation null; growth sluggish. In *Pathological Anatomy,* the term is generally given to a species of degeneration which consists of an opake matter, of a pale yellow colour: this, in its crude condition, has a consistence analogous to that of concrete albumen: it subsequently becomes soft and friable, and gradually acquires a consistence and appears analogous to those of pus. Tubercles may be developed in different parts of the body; but they are most frequently observed in the lungs and mesentery. Pulmonary tubercles, *Pneumophy'mata, Tuber'cula Pulmo'num,* (F.) *Tubercules pulmonaires,* are the cause of *Tuber'cular Phthisis. Mesenteric tubercles* are often met with in the same affection, but particularly in *Tabes Mesenterica.* Laënnec classes tubercles among the accidental tissues which have no resemblance to the natural tissues, and which never exist except in consequence of morbid action. Others consider them as a scrofulous degeneration. Broussais conceives that they are produced exclusively by inflammation of the white vessels, whose existence, however, is more than questionable. When tubercles in any organ are few in number, they may pass to the state of permanent induration without danger to the patient; but when they are very numerous, they usually cause serious mischief. Dr. Baron considers that they are produced by hydatids. The morbid condition which gives rise to the development of tubercles, *Tuberculiza'tion,* is termed *Tuberculo'sis, Morbus tuberculo'sus, Strumosis* seu *Phymato'sis pulmonum,* and *Dyscra'sia Tuberculo'sa.* Tubercles are seen of various forms,—to wit, in fine points, ( (F.) *Poussière tuberculeuse,*) gray and yellow granulations, miliary tubercles; and gray or yellow tubercular masses, softened, and cretaceous.

Tubercle, Black, Melanosis.

TUBERCLES OF THE AREOLA, see Mamma.

TUBER'CULA ARAN'TII, *Cor'pora Arantii, Corpus'cula Aran'tii, Tubercles of Arantius* or *Aranzi.* Small eminences at the middle part of the convex edge of the semilunar valves of the pulmonary artery and aorta.

Tubercula Arthritica, Calculi, arthritic — t. Cerebri, Encephalophymata — t. Gonorrhoica, Gonorrhœa impura — t. Hepatis, *Hépato-strumosie* — t. Intestinorum, Enterophymata — t. Nervorum nodosa, Ganglions, nervous — t. Parva duræ matris, Glandulæ Pacchioni — t. Peritonæi, Cœliophymata — t. Pulmonum, see Tubercles, (of the lungs) — t. Quadrigemina, Quadrigemina Tubercula.

TUBER'CULAR, *Tuber'culous, Tuberculo'sus, Tuber'culate,* (F.) *Tuberculeux.* That which relates to tubercles, or which is formed by tubercles.

Tubercular or Tuberculous Constitution or Diathesis, *Phthisio'sis,* is the habit of body which predisposes to tubercular phthisis; as *Tuberculous Cachex'ia, Tuberculo'sis, Morbus tuberculo'sus, Dyscra'sia tuberculo'sa,* is the condition of one labouring under tuberculosis.

Tubercular Matter. A morbid production, contained in cysts, or loose in the tissue of organs. It varies, in its consistence, at the different periods of the tubercular affection: being, at first, compact, and yellowish; at times, calcareous; afterwards pultaceous, semi-fluid, and curdy. See Tubercle.

Tubercular Phthisis, is that produced by the development of tubercles in the lungs.

Tubercular Sore Throat, Pharyngitis, follicular.

TUBERCULATE, Tubercular.

Tuberculate Sarco'ma of Ab'ernethy, *Emphy'ma Sarcoma tuberculo'sum, Tumor tuberculosus.* Tubercles, firm, round, and clustering; pea-sized or bean-sized; yellowish or brownish-red; when large, disposed to ulcerate, and produce a painful, malignant, and often fatal sore. Found chiefly in the lymphatic glands of the neck; often, simultaneously, in other glands and organs.

TUBERCULATED LIVER, Cirrhosis.

*TUBERCULE,* Tubercle.

*TUBERCULES DES GLANDES LYMPHATIQUES,* Scrofula — *t. du Foie, Hépatostrumosie — t. des Ganglions mésentériques,* Tabes mesenterica — t. of the Larynx and Fauces, Pharyngitis, follicular — t. Miliary, see Granulation — *t. Pisiformes,* Mamillary tubercles — *t. Pulmonaires,* see Tubercle — *t. Quadrijumeaux,* Quadrigemina corpora.

*TUBERCULEUX,* Tubercular.

TUBERCULIZATION, see Tubercle.

TUBERCULOSIS, see Tubercle, and Tubercular Cachexia — t. Laryngis et Tracheæ, Phthisis laryngea — t. Pulmonum, Phthisis pulmonalis — t. Vertebrarum, Vertebral disease.

TUBERCULOSUS, Tubercular.

TUBERCULOUS, Tubercular — t. Deposit, Tubercle — t. Disease of the Lungs, Phthisis pulmonalis — t. Dust, *Poussière tuberculeuse.*

TUBER'CULUM CINE'REUM, 'Ash-coloured tubercle,' diminutive of *tuber; Fasci'ola*

*cine'rea.* A mass of cineritious substance at the top of the calamus scriptorius, which is continuous below with the posterior horn of cineritious substance in the cord, and upon the sides with the corpus restiforme.

Tuberculum Lacrymale, see Lachrymal puncta — t. Loweri, Lower, tubercle of.

TUBEROSITAS, Tuberosity — t. Tympani, Promontory of the tympanum.

*TUBÉROSITÉ BICIPITALE,* Bicipital tubercle—*t. Sciatique,* see Ischiatic.

TUBEROS'ITY, *Tuberos'itas,* from *tuber,* 'a bump.' Anatomists have given this name to an eminence or process, the surface of which is unequal and rough; and which gives attachment to muscles or ligaments.

TUBI MEMBRANACEI, see Villous membranes.

TU'BULAR, *Tubula'ris,* (F.) *Tubulaire.* Same etymon as the next. Relating to or having the form of a small tube.

Tubular Blowing Sound, see Murmur, respiratory—t. Neurine, see Neurine—t. Substance of the Kidney, see Kidney.

TUBULE, *Tu'bulus;* diminutive of *Tuba.* A small tube.

TUBULI BELLINI, Uriniferous tubes — t. Duræ matris, Sinuses of the dura mater—t. Nervei, Nerve fibres — t. Pelvis renum, see Calix — t. Uriniferi Bellini, Uriniferous tubes.

TUBULUS, Cannula — t. Centralis Modioli, see Tractus spiralis foraminulentus.

TUBUS ACUSTICUS, Ear-trumpet — t. Alimentaris, Canal, alimentary — t. Intestinorum, Canal, alimentary—t. Nervorum, Neurilemma—t. Vermicularis cæci, Appendix vermiformis cæci.

TUCKAHO, Lycoperdon tuber.

*TUE-CHIEN,* Colchicum autumnale.

TULBAG'HIA ALLIA'CEA. A South African plant, *Nat. Ord.* Asphodeleæ, the bulbs of which, boiled in milk, are recommended in phthisis and as an anthelmintic.

*Tulbaghia cepa'cea* and *T. viola'cea* serve the same purpose.

TULIP TREE, Liriodendron.

*TULIPIER,* Liriodendron.

TULIPIFERA LIRIODENDRON, Liriodendron tulipifera.

TUMEFACTIO, Swelling—t. Mollis, Puffiness.

TUMESCENTIA PITUITOSA, Leucophlegmatia.

*TUMEUR,* Tumour — *t. Anomale,* see Hæmatodes fungus — *t. Blanche,* Hydrarthrus — *t. Caverneuse,* see Hæmatodes fungus — *t. Encéphaloïde,* Encephaloid — *t. Erectile,* see Hæmatodes fungus—*t. Hémorrhagiale circonscrite,* see Aneurism — *t. Lymphatique des articulations,* Hydrarthrus—*t. Variqueuse,* see Hæmatodes fungus.

TUMOR, Swelling, Tumour—t. Albus, Hydrarthrus—t. Anomalus, Hæmatodes fungus—t. Artuum, Obdormitio—t. Capitis Sanguineus, Cephalæmatoma — t. Carneus, Sarcoma—t. Cysticus, Encystis—t. Cysticus serosus, Hygroma—t. Fibrosus, Tumour, fibrous—t. Ficosus, Ficus—t. Flatulentus, Emphysema — t. Fugax, see Fugacious — t. Fungosus articuli, Spina ventosa — t. Fungosus sanguineus, Hæmatodes fungus — t. Gangliformis, Ganglion, nervous — t. Genarum, Meloncus — t. Genu albus, Genocace — t. Glandulæ parotideæ, Parotidoncus — t. Lacteus, Galactocele — t. Lardeus, Steatoma—t. Malarum, Meloncus—t. Ovarii, Oarioncus — t. Parotidis, Parotidoncus — t. Prostatæ, Prostatoncus—t. Renalis, Nephroncus — t Sanguineus, Hæmatoma — t. Squamiformis carnosus, Lepidosarcoma — t. Tuberculosus, Tuberculate sarcoma — t. Tunicatus, Encystis — t. Uteri, Hysteroncus.

TUMOUR, from *tumeo,* 'I swell;' *Tumor, Oncos, Oncus, Epar'ma, Eparsis, Emphy'ma, Excrescen'tia* (Sauvages,) *Ecphy'ma,* (F.) *Tumeur.* A rising or prominence, of greater or less size, developed by a morbific cause in some part of the body. Cullen defines a tumour to be "a partial swelling without inflammation." Sauvages restricts the term to a rising formed by the congestion of a fluid; and he calls *excrescences* those which have a fleshy or osseous consistence. Boyer defines it "any preternatural eminence developed on any part of the body." Good uses it synonymously with tubercle. Boyer's is the best general definition. Tumours differ greatly from each other; according to their seat, the organs interested, their nature, &c.

The French use the term *Tumeur blanche* synonymously with *White Swelling;*—see Hydrarthrus. The term is, however, applied by the generality of surgeons to swellings of the greater joints, without change of colour of the skin, and of a more or less firm consistence, which are dependent upon disease of the osseous or of the soft parts about the joint.

Scrofula is the most common cause of these affections.

Tumour, Erec'tile. A tumour produced by the development of a soft, vascular tissue, which is susceptible of elevation and depression. See Erectile.

Tumour, Fibrous, *Fibrous growth, Fibro'ma, Tumour fibro'sus, Inohylo'ma.* A tumour or growth formed of fibrous tissue.

Tumour, Laminated, Nacreous Fatty, Cholesteatoma — t. Milk-like, Encephaloid.

Tumour, Var'icose, *Tumor varico'sus.* A circumscribed, bluish tumour, formed by the dilatation and turgescence of the capillary vessels of a part.

Tumour, Vascular, see Hæmorrhois.

TUNAS, see Cactus opuntia.

TUNBRIDGE, MINERAL WATERS OF. A celebrated acidulous chalybeate in Kent, England, a few miles distant from the village of Tunbridge, and thirty-six miles south of London, which is much frequented. It contains carbonic acid, carbonate of iron, and sulphate of magnesia.

TUNDA OCULI, Conjunctiva membrana.

TUNDUS CORDIS, Mucro cordis.

TUNIC, *Tu'nica, Chi'ton,* a *coat.* An envelope. A name given to different membranes, which envelop organs; as the tunics or coats of the eye, stomach, bladder, &c.

TUNICA ACINALIS, Uvea — t. Aciniformis, Uvea — t. Acinosa, Uvea — t. Adnata, Conjunctiva — t. Agnata, Conjunctiva — t. Alba oculi, Sclerotic — t. Albuginea, Albuginea — t. Albuginea oculi, Sclerotic — t. Allantoides, Allantois — t. Arachnodes, Arachnoid membrane—t. Aranea, Arachnoid membrane — t. Caduca, Decidua — t. Candida oculi, Sclerotic — t. Carnosa, Panniculus carnosus — t. Conjunctiva, Conjunctiva — t. Costalis, Pleura—t. Crassa, Decidua—t. Crystallina, Arachnoid membrane — t. Dura oculi, Sclerotic — t. Durior et crassa, Sclerotic — t. Elytroides, Vaginalis tunica — t. Erythroides, Cremaster—t. Exterior ovi, Decidua — t. Extima oculi, Sclerotic — t. Farciminalis, Allantois — t. Filamentosa, Decidua

Tunica Granulo'sa. An investment of the ovum exterior to the zona pellucida, described by Dr. Barry, but the existence of which, as a structure, distinct and independent from the membrana granulosa, is denied.

Tunica Hortensis, Dianthus caryophyllus — t. Innominata oculi, Sclerotic — t. Interna oculi, Retina.

Tunica Jaco'bi. A highly delicate serous

membrane, interposed between the retina and the choroid coat, discovered by Dr. Jacob, of Dublin. Its structure is curious, being composed of cylindrical, transparent, highly refractive staff-shaped bodies, and hence called *Stratum bacilla'tum*, which are arranged perpendicularly to the surface of the retina, their outer extremities being imbedded, to a greater or less depth, in a layer of the pigmentum nigrum.

TUNICA MUSCULARIS, Dartos — t. Nervorum, Neurilemma — t. Perforata, Uvea — t. Prætensa abdominis, Peritonæum — t. Reticularis, Retina — t. Retiformis, Retina — t. Rhagoides, Choroidea tunica, Uvea—t. Rubicunda scroti, Dartos—t. Rubra, Dianthus caryophyllus—t. Ruyschiana, see Choroid — t. Subcostalis, Pleura — t. Thoracis, Corset — t. Uvalis, Uvea — t. Uvea, Uvea — t. Uviformis, Uvea — t. Vaginalis, see Vaginal — t. Vaginalis Linguæ, see Tongue — t. Vaginalis Propria, Vaginal coat of the Testicle — t. Vaginalis reflexa, Vaginal coat of the Testicle — t. Vasculosa oculi, Choroid, see Eye.

TUNICA VASCULO'SA TESTIS, *Pia mater testis.* An extremely delicate membrane, consisting of minute ramifications of the spermatic vessels united by areolar tissue, which separates the lobules of the testis from each other. It is situate immediately within the tunica albuginea, and encloses the substance of the gland. It sends processes inward that separate the lobules, in the same manner as the pia mater is reflected between the convolutions of the brain.

TUNICA VITREA, Hyaloid membrane.

TUNICULA, Clitoris.

*TUNIQUE ALBUGINÉE,* Albuginea.

TUNNYFISH, SALTED, Omotarichos.

TUPHLO-ENTERITIS, Typhlo-enteritis.

TUPHUS, Typhus.

TUPINARIA, Talpa.

TURBA HÆMORRHOIDALIS, see Hæmorrhois

TURBATIONES ANIMI, Affections of the mind.

TUR'BINATED BONES, *Ossa turbina'ta.* Bones shaped like a top; from *turbo* or *turben,* 'a top.' *Ossa spongio'sa, Cornua, Conchæ na'rium, Tur'bines nasi* seu *na'rium, Conchyl'ia, Bucci'na, Lam'inæ spongio'sæ nasi, Ossa tertia maxillæ superio'ris.* Very thin, bony plates, rolled up in the form of horns, and situate in the nasal fossa. 1. *Os spongio'sum supe'rius* or *Cornet de Morgagni;*—the highest. 2. *Os spongiosum me'dium,* the *middle cornu* of French anatomists, — the *ethmoid'al cornu* or *Os spongiosum superius, Os turbinatum,* of English anatomists, *Os convolu'tum superius, Concha, C. na'rium superius, C. Morgagnia'na,* (F.) *Cornet Moyen.* This bone projects inwards and downwards into the cavity of the nose, from the ethmoid cells at the side of the nasal lamella, and serves to enlarge the organ of smell. It is convex towards the septum, and concave outwards. 3. *Os spongiosum* vel *turbinatum inferius, Concha inferior, Convolu'tum inferius os, Os sous-ethmoïdal,* (Ch.), projects at the under part of the side of the nose, is convex towards the septum, and concave outwards. It is connected to the os maxillare, os palati, and os unguis. 4. *Sphenoïd'al cornu.*

All the turbinated bones extend the olfactory surface.

TURBINES NASI SEU NARIUM, Turbinated bones.

*TURBITH BLANC,* Globularia alypum — t. Mineral, Hydrargyrus vitriolatus — t. Montpellier, Globularia alypum — t. Plant, Convolvulus turpethum.

TURBO CEREBRI, Pineal gland.

TURGENTIA, Turgescence.

TURGES'CENCE, *Turges'cency, Turgid'ity, Tur'gidness, Turgescen'tia, Turgen'tia, Orgas'mus,* from *turgescere,* 'to swell.' Superabundance of humours in a part. The term *Turgescence of Bile* was formerly used to denote the passage of that fluid into the stomach, and its discharge by vomiting. A vital action of turgescence or expansibility—*Turgor vita'lis*—has been presumed to exist in certain organs, as in the capillaries; but the generality of physiologists do not admit it.

TURGESCENTIA, Turgescence.

TURGESCEN'TIA VESIC'ULÆ FELL'EÆ, *Asci'tes Hep'ato-cys'ticus, Physco'nia bilio'sa, Hepatal'gia Petitia'na, Cystoce'lē bilio'sa, Hydrocholecys'tis, Hydrops vesi'cæ fell'eæ,* (F.) *Hydropisie de la Vésicule du Fiel, Distension de la Vésicule du Fiel, Cholicystiectasie.* Distension of the gall-bladder by bile.

TURGIDITY, Turgescence.

TURGIDNESS, Turgescence.

TURGOR VITALIS, see Turgescence.

TURMERIC, Curcuma longa, Sanguinaria Canadensis.

TURN OF LIFE, see Menses.

TURNING, *Versio, V. fœtûs,* from (F.) *tourner,* 'to turn.' (F.) *Version.* The operation of bringing down the feet, or some part of the lower extremity, when the presentation of the child is such that it cannot be delivered by the natural efforts.

TURNIP, Brassica rapa — t. Dragon, Arum triphyllum — t. Indian, Arum triphyllum — t. Pepper, Arum triphyllum.

TURNS, Menses.

TURPENTINE, Terebinthina — t. Bordeaux, see Pinus sylvestris — t. Briançon, see Pinus cembra — t. Chio, see Pistacia terebinthus — t. Common, see Pinus sylvestris — t. Common, American, see Pinus sylvestris — t. Cyprus, see Pistacia terebinthus — t. Damarra, see Pinus damarra—t. Dombeya, see Dombeya excelsa—t. Horse, see Pinus sylvestris — t. Strasburg, see Pinus picea — t. Tree, Pistacia terebinthus — t. Venice, see Pinus larix — t. Venice, true, see Pistacia terebinthus — t. White, see Pinus sylvestris.

TURPETHUM, Convolvulus turpethum — t. Minerale, Hydrargyrus vitriolatus — t. Nigrum, Hydrargyri oxydum cinereum.

TURQUOISE. This stone has been long imagined to change its colour, according as the wearer is at the time in good or bad health: — a superstitious notion.

TURTLE BLOOM, Chelone glabra—t. Green, Chelonia mydas — t. Head, Chelone glabra.

TURUNDA, Tent.

TURUNDULA, Tent.

TUSSACA RETICULATA, Goodvera pubescens.

TUSSEDO, Tussis.

TUSSICULA, Tussis.

TUSSIC'ULAR, *Tussicula'ris, Tussiculo'sus,* from *tussis,* 'a cough.' Relating to a cough, or to a slight cough.

TUSSICULOSUS, Tussicular.

TUSSILA'GO, *T. Far'fara* seu *vulga'ris, Be'chium, Be'chion, Cal'ceum equi'num, Chamæleu'cē, Chamægei'ron, Fi'lius ante patrem, Farfarel'la, Galliomarchus, Farfara, Farfara Be'chium, Ungula caballi'na, Coltsfoot,* (F.) *Pas d'âne. Family,* Corymbiferæ. *Sex. Syst.* Syngenesia Polygamia Superflua. It is demulcent and expectorant, and has been used in coughs, and pulmonary affections in general, and in some cutaneous diseases.

TUSSILAGO FARFARA, Tussilago — t. Hybrida, T. petasites.

Tussilago Petasi'tes, *T. hy'brida* seu *Petasites hermaphrodita, Butterbur, Pestilent-wort, Petasites, Petasites major* seu *rubens* seu *officina'lis* seu *hy'bridus* seu *vulga'ris.* The roots of this plant have been recommended as aperient and alexipharmic.—They have a strong smell; and a bitterish, acrid taste, of the aromatic kind, but not agreeable.

Tussilago Petasites Hermaphrodita, T. petasites—t. Vulgaris, Tussilago.

TUSSIS—diminutive, *Tussic'ula; Cough, Coughing, Begma, Bex, Tusse'do, Bexis, Tussis nervo'sa, Catar'rhus, Pneusis Tussis,* (F.) *Toux.* Violent, sonorous, frequent, and short expirations, by means of which the air, in passing rapidly through the bronchia and trachea, carries along with it the mucus of the parts, which forms the sputa. The cough is said to be *dry,* when unaccompanied by expectoration. It is symptomatic of many diseases. See Bronchitis.

Tussis Amphemerina, Pertussis—t. Asinina, Pertussis—t. Bronchica, Cough, tubal, see Bronchitis—t. Canina, Pertussis—t. Catarrhalis Simplex, Catarrh—t. Clamosa, Pertussis—t. Clangosa, Pertussis—t. Convulsiva, Pertussis—t. Delassans, Pertussis—t. Ferina, Pertussis—t. Pueros strangulans, Pertussis—t. Quinta, Pertussis—t. Senilis, Bronchitis (chronic)—t. Spasmodica, Pertussis—t. Stomachalis, Pertussis—t. Suffocans, Pertussis—t. Suffocativa, Pertussis—t. Tussiculosa, Pertussis.

TUSSIVE; *Tussi'vus;* from *tussis,* 'cough.' Belonging or relating to cough:—as *tussive* vibration; the vibration of the parietes of the chest, caused by coughing.

TUTAM'INA, pl. of *Tuta'men,* 'a defence,' 'a protection,' from *tutare,* 'to defend.' Parts are so called which defend or protect each other.

Tutamina Cer'ebri are the scalp, pericranium, bones of the skull, and the meninges.

Tutamina Oc'uli are the eyebrows, eyelids, and lachrymal apparatus.

TUTENAG, Zincum.

TUTHIA, Tutia.

TU'TIA, *Pom'pholyx, Cadmi'a, Alfasa, Mesera, Capni'tis, Tuthia, Ox'ydum zinci impu'rum.* The oxyd of zinc that attaches itself to the chimneys of furnaces in which ores of zinc are smelted. It is in the form of gray incrustations; and is sometimes used for making an eye-salve. It is prepared, for this purpose, by levigation.

TWIN, Gemellus.

TWINKLING OF THE EYE, Nictation.

TWINLEAF, COMMON, Jeffersonia Bartoni.

TWINROOT, Orchis.

TWINS, SIAMESE. Two brothers, Chang and Eng, connected by means of a ligamentous band passing from the epigastrium of one to that of the other, who were exhibited in various parts of Europe and America, about the year 1830. They are now [1851] living in North Carolina: both are married, and have children. See Xiphopages.

TWITCHING, Tic.

TYCH'ICA, from τυχη, 'accident.' Fortuitous lesions or deformities. The 7th class of Good's *Nosology.*

TYLE, Callosity

TYLOMA, Callosity.

TYLOSIS, Callosity.

TYLUS, Callosity.

TYMMA, Wound.

*TYMPAN,* Tympanum.

TYMPANAL, Tympanic.

TYMPANIA, Tympanites.

TYMPANIAS, Tympanites.

TYM'PANIC, *Tympan'icus, Tym'panal;* same etymon as tympanum. Relating to the tympanum, as 'tympanic canal.'

Tympanic Nerve, see Petrous ganglion.

TYMPANITA, Tympanites.

*TYMPANITE,* Tympanites.

TYMPANI'TES, *Emphyse'ma Abdom'inis, Hydrops Tympanites, Affec'tio tympanit'ica, Ectympano'sis, Pneumato'sis Abdom'inis, Hydrops abdominis aëreus, Aëro'sis, Aero-enterecta'sia, Physocce'lia, Tympano'sis, Physe'ma, Physe'sis, Hydrops siccus et flatulentus, Tympa'nia, Tympa'nias, Tympani'ta, Tympani'tis, Emphyse'ma Tympanites, E. Tympanit'icum, Metereorismus, Tym'pany, Me'teorism, Wind dropsy,* (F.) *Tympanite, Pneumatose péritonéale, Ballonnement,* from τυμπανον, 'a drum;' so called because the abdomen is distended with wind, and sounds like a drum when struck. A swelling of the abdomen, caused by accumulation of air in the intestinal tube or in the peritoneum. Tympanites may be idiopathic or symptomatic. The former depends upon exhalation of air from the inner surface of the intestine, or from the decomposition of substances contained in it; the latter is the result of some organic affection, and often depends upon obliteration of the digestive tube, which prevents the gas from escaping. Idiopathic tympanites may be more readily cured. The symptomatic is usually fatal. On dissection in such cases, the stomach and intestines are found enormously distended; with strangulation or disorganization of some part of the mucous membrane of the intestine. Carminatives may be proper when tympanites depends upon atony of the digestive organs: but, in cases of the symptomatic kind, they cannot be productive of advantage, and may do harm.

Sometimes the air is contained in the cavity of the peritoneum—constituting *Tympani'tes abdomina'lis, Aéropéritonie,* of some:—the accumulation in the intestines being called *Tympani'tes intestina'lis.*

Tympanites, Uterine, Physometra.

TYMPANI'TIS, *Inflamma'tio tym'pani;* from τυμπανον, 'a drum,' and *itis,* denoting inflammation. Inflammation of the lining membrane of the middle ear, Also, tympanites.

TYMPANOSIS, Tympanites.

TYM'PANUM, τυμπανον, 'a drum.' The *Drum* or *barrel of the ear.* The names *Cavity of the Tympanum* or *Cavity of the Drum, Cav'itas Tym'pani, Antrum* seu *cavitas antro'sa Auris, Cavum Tym'pani,* (F.) *Tympan, Cavité du tympan, Caisse du tambour*—have been given to a cavity of an irregular shape, which constitutes the middle ear, and has been compared to a drum. It is situate in the pars petrosa of the temporal bone, between the meatus auditorius externus and the labyrinth. This cavity is lined by a mucous membrane; and communicates, externally, by means of the Eustachian tube, which is situate between it and the pharynx. The tympanum has six parietes. 1. An *external,* which is almost entirely formed of the *Membrane of the Drum, Membrana tympani, Diaphrag'ma auris, Mediasti'num* seu *Tegumen'tum auris, Myrin'gu, Myrinx,* (F.) *Membrane du tympan*—a species of thin, transparent, circular septum; convex within, and concave without, which closes the inner extremity of the meatus auditorius. 2. An *internal,* on which are the *Fenes'tra ova'lis, Prom'ontory,* and *Fora'men rotun'dum.* 3. A *superior.* 4. An *inferior,* on which is the *glenoid fissure.* 5. A *posterior,* on which are the opening of the mastoid cells, and the pyramid. 6. An *anterior,* on which are the *Proces'sus cochleaform'is* and the inner orifice of the *Eustachian tube.* The cavity of the tympanum is crossed by a series of four small bones, articulated with each other by diarthrosis, moved by

certain muscles, and representing a kind of bent lever extending from the membrana tympani to the fenestra ovalis. They are called the *Bones* or *Ossicles of the Ear*, and are the malleus, incus, os orbiculare, and stapes.

For the nervous plexus of the tympanum, see Petrosal Ganglion, and Otic Ganglion.

Tympanum Minus, see Fenestra — t. Secundarium, see Fenestra.

TYMPANY, Tympanites — t. of the Womb, Physometra.

TYPE, *Typus*, *Periodus morbi*, from τυπος, 'a stamp,' itself from τυπτω, 'I strike.' The *type* is the order in which the symptoms of a disease exhibit themselves, and succeed each other. It may be continued, intermittent, or remittent.

TYPHA ANGUSTIFOLIA has the same proties as

Typha Aromatica, Acorus calamus.

Typha Latifolia, *Cattail*, *Reed mace*, (F.) *Massette*, *Masse d'Eau*, (τιφος, 'a marsh,' [?]). A plant common in marshes and ponds, in this country and in Europe. *Family*, Typhaceæ. *Sex. Syst.* Monœcia triandria. Its roots have been used in dysentery and blennorhagia. The young shoots, before they reach the surface of the water, taste like asparagus, when boiled.

The down, (F.) *Aigrette*, *Poils*, which accompanies the flowers, has been applied to burns like cotton.

TYPHICUS, Typhoid.

*TYPHIQUE*, Typhoid.

TYPHLITIS, Typhlo-enteritis.

TYPHLO-ENTERI'TIS, *Typhlo-enteritis*, *Typhli'tis*, *Typhloteri'tis*, *Inflamma'tio Cæci*, *Phleg'monous Tumour of the Cæcum*, (F.) *Inflammation du Cæcum*, from τυφλος, *cæcus*, and *enteritis*, 'inflammation of the intestines.' Inflammation of the cæcum, occasionally leading to perforative ulceration.

TYPHLOENTERUM, Cæcum.

TYPHLOPS, Cæcus.

TYPHLOSIS, Cæcitas.

TYPHLOTERITIS, Typhlo-enteritis.

TYPHLOTERON MONOCOLON, Cæcum.

TYPHLOTERUM, Cæcum.

TYPHLOTES, Cæcitas.

TYPHODES, Typhoid.

*TYPHOÉMIE ENTÉRIQUE*, see Typhus.

TYPHOHÆMIA, see Putrefaction.

TYPHOID, *Typhoïdes*, *Typho'des*, *Ty'phicus*, *Typho'sus*, *Lac'tica*, (F.) *Typhique*, *Typhoïde*, *Typhode*. Appertaining to or resembling typhus; as *Typhoid Fever*. Also, according to some, *Typhous Fever*, typhus. Fuchs has employed the word *Typhoïde* for a family of diseases, to distinguish them from *phlogoses*; of this family, *Stomacace*, *Pharyngocace*, and *Pneumocace* are examples.

Typhoid Affection, see Typhus — t. Fever of India, Cholera.

TYPHOMA'NIA, from τυφος, 'stupor,' and μανια, 'delirium.' *Delirium with stupor*, *Subdelir'ium*. The kind of delirium common in typhus.

Typhomania, Coma vigil, Insomnia.

TYPHONIA, Coma vigil.

TYPHOSEPSES, Typhoseptoses.

TYPHOSEPTO'SES, *Typhosep'ses*, from τυφος, 'stupor,' and σηψις, 'putrefaction.' Typhous affections.

TYPHOSUS, Typhoid.

TYPHOUS, *Typho'sus*; same etymon as Typhus. Belonging or relating to typhus.

Typhous Depos'it. A peculiar substance of new formation found in the areolar membrane between the mucous and muscular coats of the patches of Peyer in typhoid fever.

Typhous Fever, see Typhoid.

TYPHUS, *Semipes'tis*, *Typhus*, *Febris Typho'des*, *Febris asthen'ica* seu *adynam'ica*, *Asthenop'yra*, (F.) *Fièvre adynamique*, *F. ataxique*, *F. adynamique ataxique*, *Typhus d'Europe*, from τυφος, 'stupor.' A fever characterized by small, weak, and unequal, but usually frequent pulse, with great prostration of strength, and much cerebral disturbance; its duration being usually from a fortnight to three weeks or longer. It is continued fever, accompanied with great cerebral irritation and prostration. (See Fever.) By most writers, this disease has been divided into two varieties—the *Typhus mitior* and *Typhus gravior*.

Typhus Mit'ior, *T. simplex*, *T. nervo'sus*, *T. comato'sus*, *Fe'bris lenta nervosa*, *Blechrop'yrus*, *F. pu'trida nervosa*, *F. hec'tica malig'na nervosa*, *Nervous Fever*, *Neurop'yra*, *Neuropy'etus*, (F.) *Fièvre nerveuse*, is characterized by slight shiverings, heavy, vertiginous headach; great oppression, peculiar expression of anxiety, nausea, sighing, despondency, and coma or quiet delirium.

Typhus Gra'vior, *Typhus car'cerum*, *T. castren'sis*, *T. anthropophthor'acus*, *True Typhus*, *Exanthemat'ic typhus*, *Nervous fever with exanthem'atous erup'tion*, *Conta'gious typhus*, *Febris nervo'sa epidem'ica*, *F. nervo'sa exanthemat'ica*, *F. malig'na cum sopo're*, *F. nervo'sa petechia'lis*, *F. pestilentia'lis Euro'pæ*, *Typhus contagio'sus exanthemat'icus*, *T. nostras*, *T. Europæ'us*, *T. commu'nis*, *T. bel'licus*, *T. exanthemat'icus*, *T. Hiber'nicus*, *Pestis bel'lica*, *Febris pes'tilens malig'na*, *Febris nau'tica pestilentia'lis*, *Febris petechia'lis*, *Typhus petechia'lis*, *Porphyro-typhus*, *Pulicula'ris morbus*, *Febris puncticula'ris*, *F. Saprop'yra*, *F. car'cerum et nosocomio'rum*, *F. Putrida*, *F. con'tinens pu'trida*, *F. contin'ua pu'trida*, *Septop'yra*, *Putrid Fever*, *Jail Fever*, *Hospital Fever*, *Ship Fever*, (F.) *Fièvre des Camps*, *F. nautique*, *F. d'Hôpital*, *F. nosocomiale*, *F. des Prisons*, *F. lenticulaire*, *Typhus contagieux*, is attended with rigors and heat, alternating; little or no perspiration; pulse, tense and hard, usually quick, but fluttering; pain over the forehead and vertex; a '*mulberry rash*,' appearing on the fifth to the seventh day of the disease, and lasting till the end; delirium, succeeded by stupor, signs of incipient putrescency,—as true petechiæ, vibices, hemorrhages, &c. Typhus, under particular circumstances, seems to be communicable by contagion; but if proper attention be paid to cleanliness and ventilation, there is not much danger of communication. The general principles of treatment, laid down under the head of Fever, are applicable here. All the varieties of continued fever resemble each other in the cardinal points, although they may differ in many of their characters. Ventilation and cleanliness; warm or cold ablution or sponging; keeping the bowels free; and attending to symptoms as they may rise, with the avoiding of all irritation of every kind, are the main indications. When symptoms of great prostration occur, the strength must be supported by wine; and tonics be exhibited, with the mineral acids. Of the tonics, the sulphate of quinia is perhaps as good as any, whilst it is free from the objection which applies to most others,—of being too bulky. In the whole management of this affection, however, the physician has to discriminate carefully between oppression and prostration. The former may require evacuants; the latter cannot.

Of late, certain observers have endeavoured to show, that there is an essential difference between typhoid fever and typhus; that the former is an abdominal affection, and dependent upon, or con-

nected with, an inflamed or ulcerated condition of the mucous follicles of the intestines; hence it has received the names *Fièvre mésentérique, F. typhoïde, Maladie* ou *Affection typhoïde*, F. *entéro-mésentérique, Entérite typho-hémique, Typhoémie entérique, Entéro-mésentérite typhoïde, Exanthème intestinale, Dothinentérie, Dothinentérite*, &c., *Ileodiclidite, Entérite folliculeuse, Gastro-entérite* with nervous affection of the brain, *Follicular gastro-enteritis, F. enteritis, Enteri'tis folliculo'sa, Typhus abdomina'lis, T. intestina'lis, T. Sporad'icus, Enterotyphus, T. gangliona'ris abdomina'lis, Febris intestina'lis ulcero'sa, F. nervo'sa gas'trica, F. nervo'sa enter'ica, F. enter'ica, F. nervo'sa mesenter'ica, Enterhelio'sis nervo'sa, Typhus enter'icus, Ileop'yra, Ileotyphus, Typhoid affection, Enteric fever.* Accompanying this form of fever there is generally a typhoid eruption, consisting of rose-red papulæ, (see Spots, red,) which appear mostly on the abdomen. They are distinct from true petechiæ, as they can be removed by pressure; and distinct also from sudamina, which are perhaps the universal accompaniments of sweating, and are consequently a variety of miliaria. The common continued fever or synochus of Great Britain, and of this country, has been presumed by some to be this variety: but farther observations are needed to establish the distinctions which have been attempted; and there is reason to believe, that the abdominal affection is a complication, existing in certain cases and epidemics of adynamic fever, and not in others. The *Red Tongue Fever* of Kentucky is considered by Professor Bartlett to be typhoid fever.

Certain modern French writers have considered the Typhus of the European continent, *Typhus of Europe, Peste d'Europe, pestilential fever, contagious typhus, Hungary fever, Hospital fever, camp fever, jail fever, lenticular petechial fever*, &c., to be identical with the typhoid affection. They admit but one fever on the European continent — the typhoid. Typhus, they maintain — but by no means establish the position — to be peculiar to England.

TYP'IC, *Typ'ical, Typ'icum*, (F.) *Typique*. Same etymon as *Type*. Characterized by periodicity, — as a '*typical* fever;' or one which observes a particular type.

TYPOSES, see Periodicity.

TYPUS, Type.

TYRANNUS, see Critical days.

TYRBASIA, Agitation.

TYRBE, Agitation.

TYREM'ESIS, *Tyrotem'esis*, from τυρος, 'cheese,' and εμεσις, 'vomiting;' *Tyro'sis, Tyreu'sis*. Vomiting of curdy matter, in infants especially.

TYREUSIS, Tyremesis, Tyrosis.

TYRIA, Porrigo decalvans.

TYRIASIS, Elephantiasis Arabica.

TYRODES, Cheesy.

TYROMA, Porrigo decalvans.

TYROS, Cheese.

TYROSIS, Tyremesis. Also, the curdling of milk in the stomach; *Tyreu'sis*.

TYROTEMESIS, Tyremesis.

# U.

UBERIS APEX, Papilla.

ULA, Gingivæ.

ULATROPH'IA, from ουλον, 'the gum,' and *atrophia*, atrophy. Shrinking of the gums; falling away of the gums.

ULCER, *Ulcus*, (diminutive *Ulcus'culum*,) *Helcos, Elco'sis, Elco'ma, Helcus, Helco'ma*, a *Sore*, (F.) *Ulcère*. A solution of continuity in the soft parts, of longer or shorter standing, and kept up by some local disease or constitutional cause. Richerand makes four great distinctions between a wound and an ulcer. 1. A wound arises from the action of an extraneous body: — the cause of an ulcer is inherent in the economy. 2. A wound is always idiopathic: — an ulcer is always symptomatic. 3. A wound has essentially a tendency to heal, because the action of its cause has been momentary: — an ulcer, on the contrary, has a tendency to enlarge, because its cause persists. 4. The treatment of a wound is purely surgical; that of an ulcer is medical as well. The immediate cause of an ulcer is an augmented action of the absorbents; and a specific action of the small vessels, which secrete pus from the blood. Ulcers have been variously divided, according to their nature; — into *simple, sinuous, fistulous, fungous, gangrenous, scorbutic, syphilitic, cancerous, inveterate, scrofulous, phagedenic, virulent, cacoëthic, sordid, carious, varicose*, &c. The treatment consists in removing, by appropriate means, the internal and the local causes which keep up the ulceration, and in exciting the vessels of the part, where necessary, by appropriate bandaging, &c.

Ulcer, Malignant, Hospital gangrene — u. Putrid, Hospital gangrene.

ULCERA INTESTINALIA, Gastrelcosis — u. Laryngis, Phthisis laryngea — u. Serpentia oris, Aphthæ — u. Uteri, see Metrophthisis — u. Ventriculi, Gastrelcosis — u. Vesicæ, Cystophthisis.

UL'CERATED, *Ulcera'tus, Exulcera'tus, Helco'des*, (F.) *Ulcéré*. In the state of an ulcer. Affected with ulcers.

ULCERATIO INTESTINALIS, Enterelcosis — u. Ventriculi, Gastrelcosis.

ULCERA'TION, *Ulcera'tio, Exulceratio, Pyogen'ia corrosi'va*. A superficial ulcer. The formation of an ulcer — *Exelco'sis, Elco'sis*, and *Helco'sis*.

*ULCÈRE*, Ulcer — *u. du Larynx*, Phthisis laryngea.

UL'CEROUS, *Ulcero'sus, Helco'des, Helcoïdes*.

Having the character of an ulcer. Affected with ulcers.

ULCERS, EGYPTIAN, Ægyptia ulcera.

ULCUS, Ulcer—u. Atonicum, Rupia—u. Cacoethes, see Cacoethes—u. Cancrosum, Cancer, Chancre—u. Dacryodes, see Dacryodes—u. Depascens, Phagedenic ulcer—u. Ferinum, Phagedenic ulcer—u. Fistulosum, Hypophora—u. Hypulum, see Hypulus—u. Narium fœtens, Ozæna—u. Obambulans, Phagedenic ulcer—u. Pulmonum, Phthisis pulmonalis—u. Sinuosum, Hypophora—u. Syriacum, Cynanche maligna—u. Telephium, Telephium—u. Tuberculosum, Lupus—u. Uteri, Hysterelcosis, Leucorrhœa.

ULCUSCULA PRÆPUTII, Herpes præputii.

ULCUSCULUM, Ulcer—u. Cancrosum, Chancre.

ULE, Cicatrix.

ULETICUS, Gingivalis.

ULICUS, Gingivalis.

ULI'TIS, from *ουλος*, 'solid,' (*σαρξ ουλη*, 'solid flesh:') hence, *ουλον*, 'the gum.' *Inflamma'tio gingi'væ, Periodonti'tis gingiva'rum*, (F.) *Gengivite, Inflammation des gençives*, from *ουλον*, 'the gum,' and *itis*, denoting inflammation. Inflammation of the gums.

ULITIS SEPTICA, Cancer aquaticus.

ULLUCO, Tropæolum tuberosum.

*ULMAIRE*, Spiræa ulmaria.

ULMARIA, Spiræa ulmaria—u. Palustris, Spiræa ulmaria.

ULMUS, *U. campes'tris* seu *glabra* seu *monta'na* seu *nuda* seu *sati'va* seu *scabra, Ptelea, Common Elm*, (F.) *Orme. Family*, Amentaceæ. *Sex. Syst.* Pentandria Digynia. The inner, rough bark of this tree is inodorous; and has a bitter, austere, and mucilaginous taste. It is considered tonic, alterative, and diuretic; and has been used, chiefly, in lepra and other cutaneous affections.

ULMUS ALA'TA, *Lynn Wahoo*. The bark of the root has been used successfully as a cataplasm in phlegmonous inflammation.

ULMUS AMERICA'NA, *U. fulva, Rough-leaved Elm, Red Elm, Slippery Elm*. The inner bark is highly mucilaginous, and is used in coughs, diarrhœas, and dysenteries; also, as a poultice for tumours; lacerated and contused wounds, &c.

ULMUS CAMPESTRIS, Ulmus—u. Fulva, U. Americana—u. Glabra, Ulmus—u. Montana, Ulmus—u. Nuda, Ulmus—u. Sativa, Ulmus—u. Scabra, Ulmus.

ULNA, *O'lenē, Foc''ilē inferius* seu *majus, Cubna Bra'chii, Os cu'biti inferius, Os procubita'lē, Cu'bitus, Cubit, Arun'do bra'chii major*. Anatomists have given this name to the bone of the forearm which forms the prominence of the elbow, during the flexion of that joint. It is the longer and larger of the two bones, and is inserted at the inner side. Its upper and larger extremity has, behind, a considerable process, called *olecranon*; and, before, a smaller one, called *coronoid*. These two eminences are separated from each other by the greater *sigmoid* or *semilunar fossa* or *olec'ranoid cavity*, which receives the articular trochlea of the humerus. The tubercle of the ulna is a small, rough spot, under the root of the coronoid process, for the insertion of the *Brachialis internus*. On the outside of this extremity of the bone is the *lesser sigmoid cavity*. It is articulated with the head of the radius. The inferior extremity of the cubitus, which is much smaller than the superior, and articulated with the radius, has a surface that corresponds to the fibro-cartilage which separates it from the os cuneiforme; and a pointed process, called *styloid*. The body of the ulna is manifestly triangular. It is articulated with the os humeri and radius, and, mediately, with the os cuneiforme. It is developed by three points of ossification.

Also, the elbow.

ULNAD, see Ulnar aspect.

ULNAR, Cubital.

ULNAR ASPECT. An aspect towards the side on which the ulna is situated.—Barclay. Ulnad is used adverbially by the same writer, to signify 'towards the ulnar aspect.'

ULNARIS, Cubital—u. Externus, see Cubital muscles—u. Gracilis, Palmaris longus—u. Internus, see Cubital muscles.

ULOCACE, Cancer aquaticus, Stomacace.

ULON'CUS, from *ουλον*, 'the gum,' and *ογκος*, 'tumour.' Swelling of the gums; epulis.

ULORRHAG''IA, *Stomatorrhag''ia, Hæmorrhag''ia gingivarum, Ulorrhœ'a*, from *ουλον*, 'the gum,' and *ρηγνυμι*, 'I break forth.' Bleeding from the gums.

ULORRHŒA, Ulorrhagia.

ULOTICA, Cicatrisantia.

UL'TIMI-STERNAL. Professor Béclard has given this appellation to the sixth or last bony portion of the sternum. He calls it also *Ensisternal*.

UL'TIMUM MO'RIENS, 'last dying.' A term given to the part of the economy which dies last.

ULVA CRISPA, Fucus crispus.

UMBIL, YELLOW, Cypripedium luteum.

UMBILIC, Umbilical, Umbilicus.

UMBIL'ICAL, *Um'bilic, Umbilica'lis, Umbilica'tus*, from *umbilicus*, 'the navel.' That which belongs or relates to the navel.

UMBILICAL ARTERIES, which exist only in the fœtus, seem, as it were, continuations of the primitive iliacs. They clear the umbilical ring, and proceed to the placenta, to which they carry the residuum of the blood sent to the fœtus by the umbilical vein. As soon as respiration is established, the blood ceases to pass by the umbilical arteries, which become obliterated, as well as the vein, and are transformed into two very strong ligamentous cords,—the vein forming the *Ligamen'tum rotun'dum* of the liver.

UMBILICAL CORD, Funiculus umbilicalis.

UMBILICAL REGION, *Re'gio umbilica'lis, Mesogas'trium Re'gio gas'trica* seu *Mesogastrica*, (F.) *Région ombilicale*, is the middle region of the abdomen, in which the umbilicus is placed. The sides of this are called the *flanks* or *lumbar regions*. In the umbilical region are the omentum majus; the inferior extremity of the duodenum; the jejunum; and the greater part of the mesentery; the aorta; vena cava; the trunks of the renal arteries and veins; the origin of the spermatic arteries, &c.

UMBILICAL RING, *An'nulus umbilica'lis*, (F.) *Anneau ombilical*, is a fibrous ring which surrounds the aperture of the umbilicus, and through which umbilical hernia occurs in children.

UMBILICAL VESICLE, Vesicula umbilicalis.

UMBILICAL VESSELS, (F.) *Vaisseaux ombilicaux*, include the two arteries, and umbilical vein. The umbilical vein arises from the placenta, and terminates at the fissure on the inferior surface of the liver of the fœtus, to which it conveys the blood necessary for its nutrition.

UMBILICALIS, Umbilical.

UMBILICATUS, Umbilical.

UMBILI'CUS, *Umbo, Om'phalos, Umbili'cum, Radix ventris, Mesompha'lium, Meson'phalum, Protme'sis*, (*navel of a new-born child;*) the *umbilic*, the *navel;* from *umbo*, 'the button or prominence in the midst of a buckler,' or from *υμφαλος*, or rather *ομφαλος*, which signifies the same, as well as the navel; (F.) *Ombilic, Nombril*.

round cicatrix, about the median line of the abdomen. It is in the situation of an aperture, which, in the fœtus, affords passage to the vessels of the umbilical cord.

Umbilicus Mari'nus, *Cotyle'don marina, Andro'sacē, Acetab'ulum marinum, Andro'sacē Matthi'oli, Fungus petræ'us marinus.* A submarine production, found on the rocks and the shells of fishes, in the south of France. It is reputed to be anthelmintic and diuretic.

UMBO, Elbow, Umbilicus.

UMBRELLA TREE, Magnolia tripetala.

*UMSCHLAG*, see Compress.

UNBOWELING, Exenterismus.

UNCARIA GAMBIR, Nauclea Gambir.

UNCAS, INDIAN, Veratrum viride.

UNCIA, Ounce.

UN'CIFORM, *Uncifor'mis, Uncina'tus,* from *uncus,* 'a hook,' and *forma,* 'shape.' That which has the shape of a hook.

Unciform Bone, *Os unciform'ē, Os hama'tum, Os uncina'tum,* (F.) *Os crochu.* The fourth bone of the second row of the carpus. Its shape is very irregular. Inwards and forwards, it has a considerable eminence, which is curved upon itself, and gives attachment to the annular ligament of the carpus. It is articulated with the os semilunare, os magnum, os cuneiforme, and the fourth and fifth metacarpal bones. It is developed from a single point of ossification.

Unciform Eminence, Hippocampus minor.

UNCINATUS, Unciform.

UNCINUS, Hook.

UNCTION, Inunction, Unguentum, Unguentum hydrargyri.

UNCUS, Hook.

UNDERCLIFF, ISLE OF WIGHT, ENGLAND, (CLIMATE OF.) The Undercliff comprehends a tract of country from Dunnose to St. Catherine's Hill, on the southeast coast, about six miles in length, and from a quarter to half a mile in breadth. It is well protected from the colder winds; and the climate is remarkably equable, as well as mild and dry, so that there are not many days during the winter in which the invalid cannot take some exercise in the open air. It is an excellent climate for the pulmonary valetudinarian.

UNDIM'IA. A name given, by Paracelsus, to a tumour, filled with a gelatinous matter, like the white of an egg.

UNDOSUS, Cymatodes.

UNDULATIO, Fluctuation.

UNEDO, Arbutus unedo — u. Papyracea, Arbutus unedo.

UNGUEAL MATRIX, see Nail.

UNGUEN, Unguentum — u. Articulare, Synovia.

UNGUENT, ARMATORY, Hoplochrysma.

UNGUENTARIA, see Myristica moschata.

UNGUENTA'RIUS, *Myropœ'us, Myrep'sus, Myropo'les, Myropo'lus, Pigmenta'rius;* from *unguen'tum,* 'an ointment.' One who makes and sells ointments. A perfumer.

UNGUEN'TUM, *Unguen, Myron, Unction,* (F.) *Onguent,* from *ungere,* 'to anoint.' Ointment. Ointments are topical applications, of a consistence more or less analogous to that of lard. They are used, chiefly, as local applications to ulcers and wounds; but are sometimes rubbed upon a part in cutaneous affections; and, especially, where it is desired that the constituents of the ointment should be absorbed. Ointments are of less consistence than cerates, although the terms are often used indiscriminately.

Unguen'tum Ac''idi Nitro'si, *Ointment of Nitrous Acid, Poma'tum* vel *Unguen'tum Ni'tricum* vel *Oxygena'tum,* (F.) *Pommade oxygénée, Graisse oxygénée, Pommade d'Alyon.* (*Adip. suillæ,* ℔j; *acid. nitros.* ʒvj. Melt the fat, and rub in the acid gradually, till cold. *Ph. E.*) Stimulant. Used in itch and other cutaneous eruptions, and in foul ulcers.

Unguentum Adipoceræ Cetorum, Ceratum cetacei — u. Ægyptiacum, Linimentum æruginis — u. Ægyptium album, Crinomyron — u. Album, Unguentum cetacei — u. Album Resolvens, Linimentum ammoniæ fortius.

Unguentum de Althæâ, *Marsh mal'low Ointment, U. de Terebin'thinâ et cerâ, Cera'tum de Althæâ, Emplas'trum mucilagino'sum, E. emol'liens, E. cit'rinum, E. flavum, E. de Althæâ, Unguentum flavum, U. Cit'rinum, U. resi'næ pini sylves'tris compos'itum* seu *resumptivum* seu *leniti'vum,* (F.) *Onguent de guimauve, O. d'althéa.* (*Olei de mucilaginibus,* 1000 p., *ceræ flavæ,* 250 p., *resinæ terebinthin.,* āā 125 p. Liquefy; strain and stir till cold. *Ph. P.*) *Common Olive Oil* might be substituted for the *Oil of Mucilages.*

Unguentum Amygdalinum, Ceratum Galeni.

Unguentum Antimo'nii, *U. A. Tartariza'ti, U. A. Potassio-tar'tratis, U. tar'tari emet'ici, Ointment of tar'tarized an'timony.* (*Antimon. et potass. tartrat.* in pulv. subtiliss. ʒij, *adipis.* ʒj.) If a drachm of this ointment be rubbed upon any part, night and morning, it will excite, in a few days, a painful pustular eruption. Hence, it is employed as a counter-irritant. This preparation is also called *Ung. Tar'tari stibia'ti* seu *emet'ici, Ung. e Tar'taro stibia'to, Adeps Tartarē stibii medica'tus, Ung. Tar'tratis Potass'æ stibia'ti,* (F.) *Pommade d'Autenrieth, Pommade stibiée.*

Unguentum Antimonii Potassio-Tartratis, Unguentum antimonii — u. Antimonii tartarizati, U. antimonii — u. Antipernium, see Antipernius.

Unguentum Aquæ Rosæ, *Ointment of Rose water, Cold Cream.* (*Aq. Rosæ,* fʒj; *ol. amygdal.* fʒij; *cetacei,* ʒss; *ceræ albæ,* ʒj. Melt together, in a water-bath, the oil, spermaceti, and wax; then add the rose-water, and stir until it is cold. *Ph. U. S.*) Cooling to irritated surfaces.

Unguentum Armarium, Hoplochrysma — u. Arthanitæ, see Arthanita — u. Articulare, Synovia — u. Basilicon flavum, Ceratum resinæ — u. Basilicon nigrum, Unguentum resinæ nigræ — u. Basilicum viride, Unguentum subacetatis cupri.

Unguentum Belladon'næ, *Ointment of Belladonna.* (*Ext. belladonnæ* ʒj; *adipis* ℥j; M. *Ph. U. S.*) An anodyne application to irritable ulcers, &c.

Unguentum Cantharidis, Unguentum lyttæ.

Unguen'tum Ceræ (*albæ* vel *flavæ*), *Wax Ointment, Unguentum simplex,* (*Ph. U. S.*) *Linimen'tum simplex, Oil and Bees' Wax,* (F.) *Onguent de cire.* (*Ceræ* ℔j, *adipis* ℔iv, *Ph. U. S.* or — *ceræ* ʒij, *ol. oliv.* ℥v.) Emollient. A mild dressing. Also, the basis of most of the compound ointments.

Unguentum Ceratum, Ceratum Galeni — u. Cerussæ, Unguentum oxidi plumbi albi, Unguentum plumbi subcarbonatis — u. Cerussæ acetatæ, Ceratum plumbi superacetatis, U. plumbi superacetatis — u. Citrinum, U. de althæâ, U. hydrargyri nitratis.

Unguentum Ceta'cei, *Unguentum Sper'matis Ceti, U. album, Linimen'tum album, Spermace'ti ointment,* (F.) *Onguent de blanc de baleine.* (*Cetacei* ʒvj, *ceræ albæ* ʒiv, *ol. oliv.* fʒiij. *Ph. L.*) The ordinary dressing for blisters and excoriations.

Unguen'tum Creaso'ti, *Ointment of Cre'asote.* (*Creasot.* fʒss; *adipis,* ʒj. Add the creasote to the lard previously melted with a moderate heat, and stir constantly till cold. *Ph. U. S.*) Used in chronic cutaneous affections.

Unguentum Cupri Subacetatis, Unguentum subacetatis cupri.

Unguentum Digesti'vum Simplex, *U. Terebin'thinæ et ovo'rum vitel'li, Simple digestive ointment,* (F.) *Onguent digestif simple.* (*Terebinthin. pur.* 64 p. *Vitell. ovor.* No. 2, vel 32 p. Mix, for a long time, in a glass mortar, and add, gradually, enough of the *Oil of Hypericum* (*Millepertuis*) to make a soft ointment. *Ph. P.*) Detergent. It may be rendered more so by adding a little of the *Acetate of copper.*

Unguentum Elemi, Balsam of Arcæus, Unguentum elemi compositum.

Unguentum El'emi Compos'itum, *Linimen'tum Arcæ'i, Unguentum e gummi elemi, Ung. de Terebin'thinâ et adip'ibus, U. elemi, Ointment of Elemi,* (*F.*) *Baume d'Arcéus.* (*Elemi* ℔j, *terebinthinæ vulgaris* ℥x, *sevi præparati* ℔ij, *olivæ olei* f℥ij. Melt the elemi with the suet; remove it from the fire; and mix in the turpentine and oil. Strain the mixture through a linen cloth. *Ph. L.*) Stimulant and digestive. To keep open issues, &c.

Unguentum Epispas'ticum de Daphnē Gnidio, *Adeps Cor'ticē daphnes gnidii medica'tus,* (F.) *Pommade de Garou.* (*Adip. præpar,* 320 p., *ceræ,* 32 p., *cort. daphn. gnid.* 128 p. Melt the fat and wax; and add the bark softened in water. Boil until the water is evaporated; then pass through cloth. *Ph. P.*) To keep open blisters, issues, &c. See Unguentum Mezerei.

Unguentum Epispasticum Fortius, Cerate of cantharides—u. Epispasticum mitius, Unguentum lyttæ—u. Epispasticum viride, Ungueutum lyttæ medicatum—u. Flavum, Unguentum de althææ—u. e Gummi elemi, Unguentum compositum — u. Hellebori albi, Unguentum veratri.

Unguentum Gallæ, *Ointment of Galls,* (*Gallæ* in pulv. ℥j; *adipis.* ℥vij. M. *Ph. U. S.*) As an astringent in piles, indolent ulcers, &c.

Unguen'tum Hydrar'gyri, *U. cæru'leum, U. Neapolita'num, Blue ointment, Cera'tum mercuria'lē, Adeps Hydrar'gyro medica'tus, Mercurial Ointment, Unction,* (F.) *Onguent mercuriel* ou *Napolitain.*

The *Strong Mercurial Ointment, Unguentum Hydrargyri fortius* of the London Pharmacopœia, *Unguen'tum Hydrar'gyri* (Ph. U. S.), is thus made —*Hydrarg.* ℔ij, *adipis* ℥xxiij, *sevi* ℥j. Rub till the globules entirely disappear.

The *Milder Mercurial Ointment, — Unguentum Hydrargyri Mitius,* —is made by adding, to one pound of the strong, two pounds of lard.

Mercurial ointment is antisyphilitic and discutient. It is rubbed on the inside of the thigh, in venereal affections; especially in those cases where mercury, given internally, runs off by the bowels. The *stronger* ointment is used for this purpose. The *weaker* is employed as a dressing, or as an application to cutaneous eruptions.

Unguentum Hydrargyri Ammoniati, Unguentum hydrargyri præcipitati albi — u. Hydrargyri calcis albæ, Unguentum hydrargyri præcipitati albi—u. Hydrargyri compositum, Unguentum hydrargyri nitratis—u. Hydrargyri deutoxydi nitrati, Unguentum hydrargyri nitrico-oxydi—u. ex Hydrargyro mitius dictum cinereum, Unguentum oxydi hydrargyri cinereum.

Unguentum Hydrargyri Nitra'tis, *U. H. nitrati, U. supernitra'tis hydrargyri, Ointment of Nitrate of Mer'cury, Citrine Ointment, Bal'samum mercuria'lē, Ung. hydrar'gyri compos'itum, U. mercurialē cit'rinum, Adeps nitra'tē hydrargyri medica'tus, Unguentum citrinum ad scabiem,* (F.) *Onguent de nitrate de mercure, O. citrin contre la gale.* (*Hydrarg.* ℥j, *acid. nitric.* f℥xiv, *olei bubuli* f℥ix, *adipis* ℥ij. Dissolve the mercury in the acid; and, while hot, add the oil and melted lard. *Ph. U. S.*

A milder ointment,—*Ung. Nitratis Hydrargyri mitius,* — is made with triple the quantity of oil and lard. It is stimulant and detergent, and is much used as an application to herpes, porrigo, and cutaneous eruptions. The weaker ointment is sometimes used in ophthalmia tarsi, &c.

Unguentum Hydrargyri Ni'trico-ox'ydi, *Ung. subnitra'tis hydrargyri, Ung. Oxydi Hydrargyri rubri, U. H. oxidi rubri* (*Ph. U. S.*), *Ointment of Nitric Oxyd of Mercury, Bal'samum ophthal'micum rubrum, Unguentum deutox'ydi hydrarg. nitrati, Red Precip'itate Ointment, Golden Ointment, Singleton's Eye Salve, U. Hydrargyri rubri, U. ex Hydrargyro oxyda'to rubro, U. mercurii rubrum, U. ophthal'micum rubrum, U. subnitra'tis hydrargyr'ici.* (*Hydrarg. oxid. rubr.* in pulv. subtiliss. ℥j; *Ung. simpl.* ℥j. Add the oxyd, reduced to a fine power, to the melted ointment. Ph. U. S.) Stimulant and escharotic. Applied to foul ulcers, to inflammation of the tarsi, &c. &c.

*Belleville's Cerate,* which has been long used in cases of scalled head, and of chronic cutaneous diseases in general, is made as follows:—*Plumbi acet.* ℥j; *hydrarg. oxid. rubr.* ℥ss; *hyd. chlorid. mit.* ℥ij; *ceræ albæ* ℥iv; *ol. olivæ* ℥vj. Melt the last two, and add the others in fine powder.

Unguentum Hydrargyri Oxidi Rubri, Unguentum hydrargyri nitrico-oxydi — u. ex Hydrargyro oxydato rubro, Unguentum hydrargyri nitrico-oxydi—u. Hydrargyri oxydi rubri, Unguentum hydrargyri nitrico-oxydi.

Unguentum Hydrargyri Præcipita'ti Albi, *U. Hydrar'gyri ammonia'ti,* (*Ph. U. S.*), *U. submuria'tis hydrargyri ammonia'ti, Unguentum ad scabiem Zelleri, U. mercuria'lē album, U. mundif'icans Zelleri, Ointment of white precipitate, Ung. e mercu'rio præcipita'to, Ung. calcis hydrargyri albæ.* (*Hyd. ammon.* ℥j, *ung. simpl.* ℥iss. Melt the fat, and add the precipitate.) Detergent. Used in cutaneous eruptions, to destroy vermin, &c.

Unguentum Hydrargyri Rubri, U. Hydrargyri nitrico-oxydi — u. Hydrargyri submuriatis ammoniati, U. Hydrargyri præcipitati albi — u. Hydrargyrici subnitratis, U. hydrargyri nitrico-oxydi—u. Hydrargyri subnitratis, U. hydrargyri nitrico-oxydi — u. Hydrargyri supernitratis, U. hydrargyri nitratis—u. Infusi meloes vesicatorii, U. lyttæ — u. Irritans, U. lyttæ.

Unguen'tum Io'dini, *U. Iodin'ii, Ointment of Iodine.* (*Iodin.* ℈j; *Potass. iodid.* gr. iv; *Aquæ* ♏vi; *Adipis.* ℥j. Rub the iodine and iodide first with the water until liquified, and then with the lard until mixed. *Ph. U. S.*) Used as a local application to goitrous and other swellings.

Unguentum Io'dini Compos'itum, *U. Iodin'ii compositum, Compound Ointment of Iodine.* (*Iodin.* ℥ss; *Potassii iodid.* ℥j; *Alcohol,* f℥j; *adipis* ℥ij. Rub the iodine and iodide first with the alcohol and then with the lard until they are well mixed. *Ph. U. S.*)

Unguentum Lau'rinum, *O'leum lau'rinum, Adeps lauro-medica'tus, Bay Ointment,* (F.) *Onguent* ou *Huile de laurier.* (*Fol. lauri,* 500 p., *adip. suillæ,* 1000 p. Bruise in a marble mortar; evaporate all humidity by boiling; and add *Bay berries,* in powder, 500 p. Digest and pass through linen. *Ph. P.*) Reputed to be corroborant and nervine. It is simply emollient.

Unguentum Lenitivum, U. de althæa — u. Liliaceum, Crinomyron.

Unguentum Lyttæ, *Ung. canthar'idis, U. re.. sicato'rium, U. irri'tans, U. ad vesica'ta, Blister.. ing Salve, Ung. infu'si mel'oes vesicato'rii, Ointment of Spanish Flies, Ointment of Infusion of Spanish Flies, Unguentum epispas'ticum mit''ius, Milder blis'tering Ointment.* (*Cantharid.* in pulv.

℥ij; *aquæ destillat.* Oss; *cerat. resin.* ℥viij. Boil down the water with the Spanish flies to one-half, and strain; then mix the cerate with the strained liquor, and evaporate to the proper consistence. *Ph. U. S.*) It is stimulant and epispastic; and is chiefly used for keeping up the discharge from a blistered surface.

Unguentum Lyttæ Medica'tum, *Adeps cantharid'ibus medica'tus, Poma'tum* seu *Unguentum epispas'ticum vir'idē stim'ulans ac'ribus, Green blis'tering Ointment,* (F.) *Pommade épispastique verte.* (*Pomati* vel *unguenti cantharid.* 64 p., *unguent. populei* 168 p., *ceræ albæ* 256 p., *cupri acetat., ext. opii,* āā 24 p. Melt the unguentum populeum, and wax, and add, as they cool, the oxyd of copper, cantharides, and opium. *Ph. P.*) Use, same as the last.

Unguentum Lyttæ Medica'tum A'liud, *Adeps cantharid'ibus medica'tus alius, Poma'tum epispas'ticum flavum et mit''ius, Yellow Blistering Ointment,* (F.) *Pommade épispastique jaune.* (*Pulv. cantharid.* 120 p., *adip. præp.* 1680 p., *aquæ* 250 p. Melt the lard; mix the cantharides, and add the water at the same time; place the whole on a gentle fire; stir continually for two hours, and add a little water to replace that which has been evaporated. Pass through linen and strain. Keep it in a water-bath, and add powdered *turmeric,* 8 p. Let it cool till the superfluous liquid separates; pour off and add *yellow wax,* 250 p., *Oil of Lemon,* 8 p. *Ph. P.*) A complex preparation. Use, same as the last.

An ointment, not very philosophically combined, was used by Dr. Physick, which is known by the name of "*Dr. Physick's Issue Ointment.*" It is made by boiling half an ounce of powdered *cantharides* in two ounces of *rose-water,* and evaporating until one-half of the fluid is driven off, having previously added 15 grains of *tartar emetic.* The decoction is to be strained, and three ounces of *olive oil,* an ounce and a half of *white wax,* and one ounce of *spermaceti* added to it, and the mixture then boiled till all the water is evaporated.

Unguentum Melanicum Causticum, Causticum Æthiopicum.

Unguentum Mercuriale Album, Unguentum hydrargyri præcipitati albi — u. Mercuriale citrinum, Unguentum hydrargyri nitratis—u. e Mercurio præcipitato, Unguentum hydrargyri præcipitati albi — u. Mercurii rubrum, Unguentum hydrargyri nitrico-oxydi—u. Mundificans Zelleri, Unguentum hydrargyri præcipitati albi.

Unguentum Mez'ereI, *Ointment of Mezereon.* (*Mezer.* incis. transversim, ℥iv; *adipis,* ℥xiv; *ceræ albæ,* ℥ij; moisten the mezereon with a little alcohol, and beat in an iron mortar, until reduced to a fibrous mass; then digest it with the lard, in a salt-water bath, for 12 hours; strain forcibly, and allow the strained liquor to cool slowly, so that any undissolved matters may subside; from these separate the medicated lard; melt it with the wax at a moderate heat, and stir constantly till they are cold. Ph. U. S.) To keep open blisters, issues, &c.

Unguentum Muria'tis Hydrargyri Oxygena'to Medica'tum, *Adeps muria'tē hydrargyri oxygena to medica'tus, Cyrillo's Ointment,* (F.) *Pommade de Cyrillo.* (*Hydrar. oxymur.* 4 p.; *adipis suillæ præp.* 32 p.—Ph. P.) Antivenereal and alterative. Used in friction, ℥ss at a time.

Unguentum Nardinum, see Nardus Indica — u. Neapolitanum, Unguentum hydrargyri — u. Nervinum, Unguentum Sambuci — u. Nitricum vel oxygenatum, Unguentum acidi nitrosi.

Unguentum Ophthal'micum, *Adeps ox'ido hydrargyri rubro et plumbi aceta'tē medica'tus, Regent's Pommade ophthalmique,* (F.) *Pommade ophthalmique.* (*Butyr. recent., aq. rosar. lavat.* 4½ p.; *camphor., oxyd. hydrarg. rubr., acetatis plumbi,* āā 0.25 p. Mix intimately.—Ph. P.) In chronic inflammation of the conjunctiva or tarsi.

Unguentum Ophthalmicum, Unguentum oxidi zinci impuri—u. Ophthalmicum rubrum, Unguentum hydrargyri nitrico-oxydi.

Unguentum Ox'idi Hydrargyri Cine'rei, *Adeps* seu *Unguentum ex hydrargyro mit'ius dictum cinereum, Ointment of gray oxide of mercury,* (F.) *Onguent gris.* (*Oxyd. hydrarg. ciner.* p. j; *adipis suilli,* p. iij.—Ph. E.) Properties like the mercurial ointment. It is not much used.

Unguentum Ox'idi Plumbi Albi, *Ung. cerus'sæ, Ung. album, Ung. subaceta'tis plumbi, Ointment of white oxide of lead, White ointment.* (*Ung. simplicis,* p. v; *oxyd. plumb. alb.* p. j.—Ph. E. and P.) Cooling and desiccative. Applied to excoriated and burnt surfaces.

Unguentum Oxidi Plumbi Carbonati, U. Plumbi subcarbonatis — u. Oxidi zinci, Unguentum zinci.

Unguentum Ox'idi Zinci Impu'ri, *Unguentum tu'tiæ, Ung. ophthal'micum, Eye-salve, Adeps ox'idi zinci medica'tus, Tutty ointment, Ointment of impure oxide of zinc.* (*Linim. simpl.* p. v; *oxyd. zinc. imp. præp.* p. j.—Ph. E.) Generally used in ophthalmia tarsi and atonic ophthalmia.

Unguentum Picis Liq'uidæ, *Ung. Picis, Ung. e Picē. Tar Ointment.* (*Picis liquid., sevi,* sing. ℔j. Melt, and stir till cold.) Stimulant and detergent. Used in tinea capitis, and other cutaneous eruptions.

Unguentum Picis Nigræ, Unguentum resinæ nigræ — u. Plumbi acetatis, Ceratum plumbi superacetatis — u. Plumbi carbonatis, Unguentum plumbi subcarbonatis — u. Plumbi oxydi carbonati, Unguentum plumbi subcarbonatis — u. Plumbi subacetatis, Unguentum oxidi plumbi albi—u. Plumbici carbonatis, Unguentum plumbi subcarbonatis.

Unguentum Plumbi Subcarbona'tis, *U. plumbi carbona'tis, Cera'tum de cerus'â, Ung. album, U. album simplex, U. carbona'tis plumbici, U. cerus'sæ, U. oxidi plumbi carbona'ti,* (F.) *Onguent blanc de Rhazes, O. de cerusse, O. de Tornamira.* (*Plumbi carbonat.* in pulv. subtiliss. ℥ij; *Unguent. simpl.* ℔j. Add the carbonate of lead to the ointment previously softened over a gentle fire, and mix.—Ph. U. S.) Chiefly used as a dressing for burns.

Unguentum Plumbi Superaceta'tis, *U. aceta'tis plumbi, Ointment of sugar of lead, Unguentum saturni'num, U. cerus'sæ aceta'tæ, Bal'samum universa'lē.* (*Olive oil,* ℔ss; *white wax,* ℥iss; *superacetate of lead,* ℥ij.) Cooling, desiccative. Called, also, *Balsamum saturni'num, Buty'rum satur'ni, Linimen'tum plumba'tum, Poma'tum satur'ni, Ung. triphar'macum.*

Unguentum Popule'um, *Adeps papav'erē, hyoscy'amo, et belladon'nâ medica'tus.* (Fresh buds of the *populus nigra,* 500 p., macerated in *adeps suillus præp.* melted, 1500 p., for 24 hours. Preserve this. Take *black poppy leaves, belladonna, hyoscyamus, black nightshade,* āā 128 p.; bruise in a mortar with the former preparation; boil until all the humidity is evaporated, and strain.—Ph. P.) Anodyne. Applied to local inflammations, hemorrhoids, sore nipples, cancer, &c. Green elder ointment is often sold for this.

Unguentum Populeum, see Populus.

Unguentum Potas'sæ Hydrioda'tis, *U. potas'sii io'didi, Ointment of hydri'odate of potass.* (*Potass. iodid.* in pulv. subtil. ℥j; *aq. bullient.* f℥j; *adipis,* ℥j. Dissolve the iodide in the water, and mix the solution with the lard.—Ph. U. S.) Half a drachm of this ointment is rubbed on scrofulous glands, goître, &c.

Unguentum Potassii Iodidi, Unguentum Po-

tassæ Hydriodatis — u. Pulvis meloes vesicatorii, Cerate of cantharides—u. Resinæ flavæ, Ceratum resinæ flavæ.

Unguentum Resi'næ Nigræ, *Ung. resinæ nigrum, Ung. basil'icon nigrum, Ung. tetrapharm'acum, Black basilicon, Black resin ointment, Unguentum picis nigræ.* (*Resin. nigr., ceræ flavæ, resinæ flav.* āā ℥ix; *olei olivæ*, Oj.—Ph. L. *Uses*, the same as the *Ceratum resinæ* or *Yellow basilicon.*

Unguentum Resinæ Pini Sylvestris Compositum, Unguentum de Althæâ—u. Resinosum, Ceratum resinæ flavæ — u. Resumptivum, Unguentum de althæâ.

Unguentum Sabinæ, Ceratum Sabinæ.

Unguentum Sambu'ci, *Ung. sambu'cinum, Green ointment, Unguentum nervi'num, Elder ointment,* (F.) *Onguent de sureau.* (*Sambuci flor.* ℔ij; *adipis præp.* ℔ij. Boil.—Ph. L. and D.) Emollient.

Unguentum Saturninum, Unguentum plumbi superacetatis—u. ad Scabiem Zelleri, Unguentum hydrargyri præcipitati albi—u. Simplex, Ceratum Galeni, Unguentum ceræ — u. Solidum de cicutâ, Emplastrum cicutæ — u. Spermatis ceti, Unguentum cetacei.

Unguentum Stramo'nii, *Ointment of Stramo'nium.* (*Ext. stramon. fol.* ℥j; *adipis*, ℥j. Rub the extract with a little water until uniformly soft, and then with the lard. — Ph. U. S.) An anodyne ointment to irritable ulcers, hemorrhoids, &c.

Unguentum Subaceta'tis Cupri, *U. cupri subaceta'tis* (Ph. U. S.), *Ung. deter'gens, Ung. basil'icum vir'idē, Ung. æru'ginis, Bal'samum viridē, Ointment of subacetate of copper, Ver'digris ointment.* (*Cupri subacet.* in pulv. subtiliss. ℥j; *ung. simpl.* ℥xv. Add the subacetate to the ointment previously melted with a moderate heat, and stir till cold. — Ph. U. S.) Detergent and escharotic.

Unguentum Sulphura'tum ad Sca'biem, *Adeps sul'phurē et ammo'niæ muria'tē medica'tus.* (*Adipis*, 120 p.; *sulph. lot.* 60 p.; *ammoniæ muriat., aluminæ sulphat.* āā 4 p.; fiat unguentum. — Ph. P.) Antipsoric.

*Bailey's Itch Ointment* is composed of *olive oil, lard, nitre, alum, sulphate of zinc,* and *cinnabar;* scented with *oil of aniseed, oil of origanum,* and *oil of spike,* and coloured with *alkanet-root.*

Unguentum Sulphura'tum Alcali'num ad Sca'biem, *Adeps sul'phurē et carbona'tē potassæ medica'tus, Hel'merick's Alcaline Sulphura'ted Itch Ointment.* (*Adip. præp.* 800 p.; *sulphur. lot.* 200 p.; *carbonat. potass. pur.* 100 p.; fiat ung.— Ph. P.) Use, same as the last.

*Bateman's Itch Ointment* resembles this. It is coloured with *cinnabar,* and scented with *essence of bergamot.*

Unguentum Sul'phuris, *Ung. e sulph'urē, Sulphur ointment.* (*Sulph.* ℔j; *adip.* ℔ij. — Ph. U. S.) Used chiefly in itch, and some herpetic affections.

Unguentum Sulphuris Compos'itum, *Compound Sulphur Ointment, Itch Ointment, Unguentum Antipsor'icum, Jackson's Itch Ointment, Pommade Antipsorique de Jasser.* (*Sulph. sublim.* ℔ss; *veratri rad.* contus. ℥ij; *potassæ nitrat.* ℥j; *saponis mollis*, ℔ss; *adipis*, ℔iss; *ol. bergamot.* ℳxxx. — Ph. L.) The Unguentum Sulphuris Compositum of the Pharm. U. S., is made as follows:—*Sulphur.* ℥j; *hydrargyri ammoniat., acid. benzoic.* āā ℥j; *ol. bergamot., acid. sulphuric.* āā f℥j; *potassæ nitrat.* ℥ij; *adipis*, ℔ss. To the melted lard add the other ingredients, and stir till cold. Use, the same as the last; but it is more stimulating.

Unguentum Sulph'uris Iod'idi, *Ointment of Iodide of Sulphur.* (*Sulphur. iodid.* ℥ss; *adipis*, ℥j. Rub the iodide with a little of the lard; add the remainder, and mix.—Ph. U. S.) An excellent application in chronic cutaneous affections.

Unguentum Susinum, Crinomyron.

Unguentum Tab'aci, *Tobacco Ointment.* (*Tabac. recent.* concis. ℥j; *adipis*, ℔j. Boil the tobacco in the lard, over a gentle fire, till it becomes friable; then strain through linen. — Ph. U. S.) Applied to irritable ulcers, tinea capitis, &c.

Unguentum Tartari Emetici, U. antimonii tartarizati — u. Tartari stibiati, U. antimonii tartarizati — u. e Tartaro potassæ stibiati, U. antimonii tartarizati — u. Tartratis potassæ stibiati, U. antimonii tartarizati — u. de Terebinthinâ et adipibus, U. elemi compositum — u. de Terebinthinâ et cerâ, U. de althæâ — u. Terebinthinæ et ovorum vitelli, U. digestivum simplex—u. Tetrapharmacum, Basilicon, U. resinæ nigræ — u. Tripharmacum, U. plumbi superacetatis — u. Tutiæ, U. oxidi zinci impuri.

Unguentum Vera'tri, *U. V. albi, Unguentum helleb'ori albi, White hellebore ointment.* (*Veratr.* pulv. ℥ij; *adipis*, ℥viij; *olei limon.* ℳxx.) Used in cases of itch, where sulphur is objected to. It is not equally efficacious.

The principal ingredients in the Edinburgh Ointment are *white hellebore* and *muriate of ammonia.*

Unguentum ad Vesicata, U. lyttæ—u. ad Vesicatoria, Cerate of cantharides — u. Vesicatorium.

Unguentum Zinci, *Ung. ox'idi zinci, U. zinci oxidi* (Ph. U. S.), *Zinc ointment.* (*Zinci oxid.* ℥j; *adipis*, ℥vj. Use, the same as that of the *Unguentum tutiæ.*

Unguentum Zinci Oxidi, U. zinci.

UNGUIS, Hippocampus minor, Nail, Pterygion — u. Avis, Hippocampus minor — u. Halleri, Hippocampus minor — u. Odoratus, Blatta Byzantia.

Unguis Os, *Os lachryma'lē.* A small, quadrilateral, very thin, and semi-transparent bone, which has been compared to a human *nail,* and is situate at the anterior and inner part of the orbit. It aids in the formation of the lachrymal gutter and the nasal duct. It is articulated with the frontal, superior maxillary, ethmoid, and inferior spongy bones, and is developed by a single *punctum ossificationis.*

UNGULA CABALLINA, Tussilago.

UNGULÆ PALPEBRARUM, see Tarsus.

UNILOC'ULAR, *Unilocula'ris,* from *unus,* 'one,' and *loculus,* 'a cell.' Having one cell or cavity, as *Biloc'ular* means having two cells or cavities; *multiloc'ular,* having many.

UNIO, Pearl.

UNIOCULUS, Cyclops, Monoculus.

UNIPARIENS, Uniparous.

UNIPARIENT, Uniparous.

UNIP'AROUS, *Unipa'rient, Uniparien,* from *unus,* 'one,' and *pario,* 'I bring forth.' Producing one at a birth.

UNISE'MA DELTIFO'LIA, *Pontede'ria corda'ta, Shovel Pickerelweed, Pond Shovel, Shovel-leaf, Water Plantain.* An indigenous plant, *Ord.* Pontederiaceæ, *Sex. Syst.* Hexandria Monogynia, which grows in water, and flowers from June to August. The root is emollient and astringent.

UNI'TING BANDAGE, (F.) *Bandage unissant.* A bandage for bringing the edges of a wound into approximation. The arrangement of such a bandage differs according as the wound is transverse or longitudinal.

UNIVOCAL GENERATION, see Generation.

UNOCULUS, *Borgne,* Cyclops, Monoculus.

UNORGANIZED, Inorganic.

UNSTRIPED MUSCULAR FIBRE, see Muscular fibre.

UNWELL, see Menstruation.

UPAS. A word used in the Archipelagos of Molucca and Sunda, and signifying *Vegetable Poison, Ipo, Bohon Upas, Boa Upas, Pohon Antiar, Boon Upas.* A substance used by the natives of those places for poisoning their arrows. The smallest quantity is capable of destroying the largest animal. The tree which produces it is said to be the *Antia'ris Toxica'ria.* Another species of upas, the *U. Tieuté,* is the produce of a *Strychnos.* Many idle stories are told regarding the upas, most of which are fabulous.

U'RACHUS, *U'racus, Urinac'ulum,* from *ουρον,* 'urine,' and *εχω,* 'I contain.' (F.) *Ouraque.* The urachus, in certain animals, is a long membranous canal, which arises from the bladder, makes its exit from the abdomen by the umbilicus, and terminates in the pouch called *allantois.* According to Sabatier, this is the arrangement of the urachus in the human fœtus; but Bichat and other anatomists consider, that when the canal exists in it, it is a malformation. They regard it as a kind of suspensory ligament of the bladder, extending from the top of that organ to the umbilicus; and, at the umbilicus, confounded with the abdominal aponeurosis.

URACRATIA, Enuresis.

URACUS, Urachus.

URÆ'MIA, from *ουρον,* 'urine,' and *'αιμα,* 'blood.' A condition of the blood in which it contains urine or urea.

URALI, Curare.

URANA, Ureter.

URANE, Urinal.

URANISCONI'TIS, from *ουρανισκος,* 'the palate,' and *itis,* denoting inflammation. *Palati'tis.* Inflammation of the palate.

URANISCOPLAS'TICĒ, from *ουρανισκος,* 'the roof of the mouth,' and *πλαστικος,* 'forming.' The operation of engrafting in case of deficiency of the soft palate.

URANISCORRHAPHIA, Staphylorraphy.

URANISCOS, Palate.

URANORRHAPHIA, Staphylorraphy.

URAPOSTE'MA, *Absces'sus urino'sus, Urœde'ma.* A tumefaction produced by the escape of urine. An abscess containing urine.

URARI, Curare.

URAS, Urate.

URATE, *Uras, Lithate, Lithas;* from *ουρον,* 'urine.' A generic name for salts, formed by the combination of uric or lithic acid with different bases. *Urate* or *Lithate of Soda* is found in arthritic calculi:—*Urate* or *Lithate of Ammo'nia* in some urinary calculi.

URE'A, *Uren, Uren'ium, U'ricum, Mate'ria urino'sa, Princip'ium* seu *Sal urino'sum,* (F.) *Urée.* Same etymon. A white, pearly, brilliant substance, in transparent plates, inodorous, and of a cool taste; very soluble in water; deliquescent, and soluble in alcohol. It exists, in great quantity, in the urine; and is an essential part of it. It has been used as a diuretic. Dose, gr. xv to ℈j.

UREC'CHYSIS, *Urech'ysis,* from *ουρον,* 'urine,' and *εκχυσις,* 'effusion.' Effusion of urine into the cellular membrane.

UREDO, Urticaria.

*URÉE,* Urea.

UREMA, Urine.

UREN, Urea.

URENIUM, Urea.

URENS, Caustic.

UREORRHŒA, Diabetes.

URESIÆSTHESIS, Diuresiæsthesis.

URESIS, Micturition.

URE'TER. Same etymon as Urate. *U'rana, Vena alba renum, Cana'lis ner'veus fistulo'sus renum, Ductus* seu *Ductor Uri'næ, Vas urina'rium,* (F.) *Uretère.* A long, excretory canal—membranous and cylindrical—which conveys the urine from the kidney to the bladder. It extends, obliquely, between the pelvis of the kidney, with which it is continuous, and the *bas fond* of the bladder, into which it opens. It enters at the posterior and inferior part, for some distance between the coats, and opens into the cavity of the bladder, at the posterior angle of the *Trigone vésical.* The ureter is formed of an exterior, white, opake, and fibrous membrane; and of an inner, which is mucous.

URETERAL'GIA, from *ουρητηρ,* 'the ureter,' and *αλγος,* 'pain.' Pain in the course of the ureter,—as from calculus, *Ureteral'gia calculo'sa.*

URETERALGIA CALCULOSA, see Ureteralgia—u. Inflammatoria, Ureteritis.

*URETÈRE,* Ureter.

URETER'ICUS. An epithet for ischury, &c., arising from an affection of the ureter.

URETERI'TIS, *Ureteral'gia inflammato'ria, Ureterophlegma'sia.* Inflammation of the ureter; generally caused by calculus.

URETERO-LITH'ICUS, from *ουρητηρ,* 'the ureter,' and *λιθος,* 'a stone.' An epithet applied to ischury or other affection caused by a stone in the ureter.

URETEROL'ITHUS. Same etymon. Calculus in the ureter.

URETEROPHLEGMASIA, Ureteritis.

URETERO-PHLEGMAT'ICUS, from *ουρητηρ,* 'the ureter,' and *φλεγμα,* 'phlegm or mucus.' Any affection caused by mucus accumulated in the ureter.

URETERO-PY'ICUS, from *ουρητηρ,* 'the ureter,' and *πυον,* 'pus.' An epithet applied to affections caused by the presence of pus in the ureter.

URETERORRHAG''IA, from *ουρητηρ,* 'the ureter,' and *ραγη,* 'rupture.' Hemorrhage from the ureter.

URETERO-STOMAT'ICUS, from *ουρητηρ,* 'the ureter,' and *στομα,* 'orifice.' That which is dependent upon obstruction of the orifice of the ureter.

URETERO-THROMBOÏ'DES, from *ουρητηρ,* 'the ureter,' *θρομβος,* 'grumous blood,' and *ειδος,* 'resemblance.' Ischury from grumous blood in the ureter.

URE'THRA, *ουρηθρα, Cana'lis* seu *Mea'tus* seu *Ductus urina'rius, Urias, Ure'tra, Fis'tula urina'ria, Iter urina'rium* seu *Uri'næ;* (F.) *Urèthre, Urètre,* from *ουρον,* 'urine.' The excretory ducts for the urine in both sexes; and for the sperm in man. In the latter, it is 8 or 10 inches long; and extends from the neck of the bladder to the extremity of the penis, in which its external aperture is situate. In the male urethra, three portions are distinguished:—1. A *Prostatic portion,* near the bladder, about an inch and a quarter in length, which traverses the prostate gland:—2. A *membranous portion, Isthmus ure'thræ, Pars ure'thræ membrana'cea,* from 8 to 10 lines long, which is separated from the rectum by the areolar tissue only:—3. A *spongy portion,* which expands, anteriorly, to form the glans, and which commences at the *bulb of the urethra.* Before opening externally, the canal has a dilatation, called the *Fossa* or *Fossic'ula navicula'ris.* On the interior of the urethra two white lines are perceptible—the one above, the other below. The latter commences at the *verumontanum;* and at the surface of this, the *ejaculatory ducts,* and *prostatic ducts* open. The urethra is lined, in its whole extent, by a mucous membrane; on which

are seen, particularly at the bulb, the orifices of a number of follicular ducts, *Lacunæ* or *Sinuses of Morgagni*. At about an inch and a half from the opening of the meatus, one of these lacunæ is generally found, much larger than the rest, and is named *Lacuna Magna*. The arteries of the urethra are numerous, and proceed from the internal pudic, — the largest branches entering the bulb. The veins follow the course of the arteries. The lymphatics pass into the inguinal and hypogastric plexuses. The nerves come from the pudic and gluteal. In the *female*, the urethra is only about an inch long. It is wider than in man, and susceptible of great dilatation. It is very wide at its commencement; and descends obliquely forwards, to terminate at the top of the external aperture of the vagina by the *mea'tus urina'rius*. In its course, it is slightly curved, the concavity being forwards.

URETHRA, BLIND DUCTS OF THE, see Cæcus — u. Mucous lacunæ of the, see Cæcus.

URE'THRAL, *Urethra'lis. Ure'thricus*, from *ουρηθρα*, 'the urethra.' Relating to the urethra.

URETHRAL'GIA, from *ουρηθρα*, 'the urethra,' and *αλγος*, 'pain.' Pain in the urethra. Gonorrhœa.

*URÈTHRE*, Urethra.

URETHREMPHRAXIS, Urethrophraxis.

URETHRITIS, Gonorrhœa.

URETHROBLENNORRHŒ'A, from *ουρηθρα*, 'the urethra,' *βλεννα*, 'mucus,' and *ρεω*, 'I flow.' Gonorrhœa; gleet.

URETHROCYSTAUCHENOTOMIA, see Lithotomy.

URÈTHROCYSTEOANEURYSMATOTOMIA, see Lithotomy.

URETHROCYSTEOTRACHELOTOMIA, see Lithotomy.

URETHROHÆMORRHAGIA, Urethrorrhagia.

URETHROPHRAX'IS, *Urethremphrax'is*, from *ουρηθρα*, 'the urethra,' and *φρασσω*, 'I obstruct.' Obstruction of the urethra.

URETHROPLAS'TIC, *Urethroplas'ticus*; from *ουρηθρα*, 'the urethra,' and *πλασσω*, 'I form.' An epithet given to the operation *urethroplasty* which supplies defects in the canal of the urethra through which the urine escapes.

URETHRORRHA'GIA, *Urethrohæmorrha'gia, Caulorrha'gia stillatit''ia, Hæmatu'ria stillatit''ia*, from *ουρηθρα*, 'the urethra,' and *ρηγνυμι*, 'I break out.' Hemorrhage from the urethra. — Frank.

URETHRORRHŒ'A, from *ουρηθρα*, 'the urethra,' and *ρεω*, 'I flow.' A discharge of any kind from the urethra.

URETHROSTENO'SIS, *Strictu'ra ure'thræ, Urosteno'sis*, from *ουρηθρα*, 'the urethra,' and *στενωσις*, 'narrowness.' Stricture of the urethra.

URETHROT'OMUS, (F.) *Uréthrotome*, from *ουρηθρα*, 'the urethra,' and *τεμνω*, 'I cut.' An instrument so called by Le Cat, with which he divided the skin, and laid open the urethra, in the operation for lithotomy. Also, an instrument for dividing strictures of the urethra.

URETHROT'OMY, *Urethrotom'ia*; same etymon. An operation, which consists in opening the urethra for the removal of stricture. See *Boutonnière*.

URETHRYMENO'DES, from *ουρηθρα*, 'the urethra,' and *υμην*, 'a membrane.' That which is caused by a membrane formed in the urethra.

URETICUS, Diuretic, Urinary.

URETRA, Urethra.

*URÈTRE*, Urethra.

URETRIS, Urinal.

URIAS, Fistula, (urinary,) Urethra.

URIASIS, Lithia, Uresis.

URIC ACID, *Ac''idum u'ricum, Ac''idum urolith'icum, Acidum lith'icum, Lithic Acid, Urylic Acid*. An acid which exists in human urine, chiefly, if not wholly, in the form of urate of soda or urate of ammonia, and which in combination constitutes the greater part of urinary calculi. It is often deposited from the urine in health. See Calculi, urinary.

URIC OXIDE, *Ox'idum u'ricum, Xanthic oxide, Xanthine, Urous acid*. A substance not discovered in healthy urine, although probably bearing some relation to the yellow colouring matter. It is a very rare ingredient of calculous concretions, and little is known either of its chemical or pathological history.

URICUM, Urea.

URICUS, Urinary.

URINA CEREBELLA, see Cerebella—u. Chyli, see Urine — u. Cibi, see Urine — u. Diabetica, Urine, diabetic — u. Febrilis, Urine, febrile — u. Furfuracea, see Furfuraceous—u. Galactodes, see Galactodes—u. Genitalis, Sperm—u. Jumentosa seu Jumentaria, Urine, jumentous — u. Mucosa, Cystirrhœa — u. Nephelodes, see Nepheloid — u. Oroboides seu Orobodes, see Oroboides — u. Pericardii, see Pericardium — u. Potûs, see Urine — u. Sanguinis, see Urine—u. Vaccæ, Urine, cows'.

URINACULUM, Urachus, Urinal.

URINÆ PROFLUVIUM, Diabetes — u. Suppressio, Ischuria—u. Stillicidium, Strangury—u. Substillum, Strangury.

U'RINAL, *Urinato'rium, Chernib'ium, U'ranē, Ure'tris, Urinac'ulum, Urodochi'um, Urod'ochē, Urodoche'um, Uratra'cium, Matra'cium, Mat'ula, Matel'la*; from *urina*, 'urine.' A name given, 1. To certain vessels, used to pass the urine into. 2. To reservoirs, of different shapes and character, which are adapted to the penis, in cases of incontinence of urine, and which are intended to receive the urine as it flows off.

URINALIS, Diuretic, Urinary.

URINARIA, Antirhinum linaria, Leontodon taraxacum.

U'RINARY, *Urina'rius, Urina'lis, Urino'sus, U'ricus, Uret'icus*. Same etymon. That which relates to the urine.

URINARY BLADDER, *Vesi'ca Urina'ria, Cystis, Urocys'tis*, (F.) *Vessie*. A musculo-membranous reservoir, intended for the reception of the urine, until the accumulation of a certain quantity solicits its excretion. The bladder is situate in the hypogastric region, between the rectum and pubis in man; and between the pubis and vagina in the female. Its upper region is not covered, except by the peritoneum, posteriorly. From its centre arises the *urachus*. Its lower region is bounded, anteriorly, by the prostate, in man; and rests on the vesiculæ seminales and rectum. In the female, it corresponds to the vagina. The lowest portion of this region bears the name *Bas-fond*. The anterior surface of the organ is not covered by peritoneum. It is attached to the symphysis pubis by a fibro-cellular expansion called the *anterior ligament*. The posterior ligaments are duplicatures of the peritoneum on its posterior surface, which extend from this surface to the rectum in the male, and to the uterus in the female. The bladder is composed of a serous membrane, formed by the peritoneum;—of a muscular membrane; of a somewhat thick layer of areolar tissue; and is lined on its inner surface, by a mucous membrane, which is, sometimes, raised up, here and there, in long prominences or *columnæ* by the muscular fibres beneath. To this condition, the French anatomists give the term—*vessie à colonnes*. In the *bas-fond* the two ureters open, and the urethra commences; and the triangular

space, which the apertures of these three canals leave between them, is called, by the French, the *Trigône vésical* or *Vesical Triangle, Trigo'nus* seu *Trigo'num vesi'cæ* seu *Lieutau'di*. In the orifice of the urethra, which is also called the neck of the bladder, there is, at its lower part, a more or less prominent tubercle, which is formed by the anterior angle of the *Trigone vésical*, and is called the *Vesical uvula, U'vula vesi'cæ*, (F.) *Luette vésicale*.

The arteries of the bladder proceed from the hypogastric, umbilical, sciatic, middle hemorrhoidal, and internal pudic. Its veins, which are more numerous than the arteries, open into the hypogastric venous plexus. Its nerves emanate from the sciatic and hypogastric plexuses; and its lymphatic vessels pass into the hypogastric ganglia.

Urinary Calculi. The calculi which form in the urinary passages. See Calculi, urinary.

Urinary Passages, (F.) *Voies urinaires*. The aggregate of canals and cavities intended to contain the urine and convey it externally. These *ways* are composed of excretory ducts, which form the tubular portion of the kidney; of calices; pelvis; ureters; bladder; and urethra.

URINATORIUM, Urinal.

URINE, *Uri'na, U'ron, Ure'ma, Lot'ium, Lot, Lapis aw'reus, Omich'ma, Recremen'ta* seu *Retrimen'ta vesi'cæ, Aqua pedum, Aqua*. An excrementitial fluid; secreted by the cortical part of the kidney; filtered through the tubular portion; poured *guttatim* from the apices of the tubular papillæ into the pelvis of the kidney; and transmitted by it to the ureters; which convey it slowly, but in a continuous manner, into the bladder, where it remains deposited, until its accumulation excites a desire to void it. The excretion of the fluid takes place through the urethra; and is caused by the action of the abdominal muscles and diaphragm and the contraction of the fibrous coat of the bladder. Urine is transparent; of a citron-yellow colour; of a peculiar odour, and of an acid, saline, and slightly bitter taste. That which is passed some time after taking fluid, is less coloured, and less odorous and dense than that which is voided 7 or 8 hours after eating. The first is the *Uri'na potûs*, (F.) *Urine de la Boisson, Urine from drink:* — the latter *Uri'na san'guinis*, (F.) *Urine de la digestion, Urine de la coction, Urine cuite, Cocted urine, Urine of digestion*. Three distinct varieties of urine may, according to Dr. Golding Bird, be recognised: *First*. That passed some little time after drinking freely of fluids, which is generally pale, and of low specific gravity—1.003 to 1.009—*Urina potûs*. *Secondly*, That secreted after the digestion of a full meal; s. g. 1.020 to 1.028, or even 1.030 —*Urina chyli* vel *cibi*. *Thirdly*, That secreted independently of the immediate stimulus of food and drink, as after a night's rest, which is usually of average density—1.015 to 1.025, and presents the essential characters of urine—*Urina sanguinis*.

The following are the ordinary constituents of healthy human urine:—urea, uric acid, [hippuric acid;] extractive matters, embracing alcohol extract, spirit extract, and water extract, with their respective constituents; mucus; brown colouring matter of the urine, (hæmaphæin;) red colouring matter of the urine, (uroërythrin;) carbonic, lactic, hydrochloric, sulphuric, phosphoric, silicic, and hydrofluoric acids; soda; potassa; ammonia; lime; magnesia; and peroxide of iron. The proportion of solid matters in 1000 parts of urine may vary from 20 to 70. The following table expresses the relative amounts of the different components in every 100 parts of the solid matter, according to the analysis of different observers:

| | Berzelius. | Lehmann. | Simon. | Marchand |
|---|---|---|---|---|
| Urea, | 45.10 | 49.68 | 33.80 | 48.91 |
| Uric Acid, | 1.50 | 1.61 | 1.40 | 1.59 |
| Extractive matter, Ammonia, Salts, and Chloride of Sodium, | 36.30 | 28.95 | 42.60 | 32.49 |
| Alkaline Sulphates, | 10.30 | 11.58 | 8.14 | 10.18 |
| Alkaline Phosphates, | 6.88 | 5.96 | 6.50 | 4.57 |
| Phosphates of lime and magnesia, | 1.50 | 1.97 | 1.59 | 1.81 |

Its average specific gravity is about 1.015. The quantity passed by the adult in the 24 hours varies. On the average it may amount to two pounds and a half. Sometimes, the urine, in health and disease, exhibits appearances that have received special names. Thus, that which is characterized by a deficiency of solid matters generally, has been called *Hydru'ria*, (*'ὑδωρ*, 'water;') by a deficiency of urea, *Anazotu'ria*, (*αν*, privative, and *azote;*) by a superabundance of urea, *Azotu'ria*. Urine in which the deposit consists of lithic acid, and the lithates, has been termed *Lithu'ria;* and that in which the deposit consists of the earthy and earthy-alkaline phosphates, *Phosphu'ria Ceramu'ria*, (*κεραμος*, 'potters' earth,') &c. &c. At times, a *pellicle* forms on the surface (*Cremor urinæ*) which consists of mucus and some salts: at others, there is a *cloud*, (*Nubec'ula, nubes,*) towards its upper part, which is called *Enæore'ma* when it is suspended, as it were, about the middle of the liquid. Occasionally, there is a sediment, to which the names *Hypos'tasis, Sedimen'tum*, &c., have been given. (See these various words.) The urine is often deserving of attention in disease; but it has been considered a matter of more importance than it merits. Some empirics have presumed to pronounce on the nature of disease by simply inspecting it. See Uroscopy.

Human urine was, at one time, considered aperient; and was given in jaundice, in the dose of one or two ounces. Cow's urine, *Urina Vaccæ, Allflower water*, was once used, warm from the cow, as a purge, in the dose of 0ss.

Urine has been variously designated by pathologists, according to its appearance, &c., for example:—

Urine, Anæ'mic, *Uri'na anæ'mica*. Used, but not felicitously, for the form of urine that occurs in anæmia, chlorosis, &c.—Becquerel.

*URINE ARDENTE*, Ardenturine—u. Bloody, Hæmaturia—*u. de la Boisson*, Urine, hysterical, see Urine—*u. de la Coction*, see Urine.

Urine, Crude, (F.) *Urine crue*. Urine that is thin, transparent, and but little coloured, affording neither cloud nor deposite.

*URINE CRUE*, Urine, crude—*u. Cuite*, see Urine.

Urine, Cystinic, *Cystinu'ria*. Urine containing cystine or cystic oxide in solution, or as a deposite.

Urine, Diabetic, *Uri'na diabe'tica*. Urine passed in *Diabetes mellitus, Melitu'ria*. It contains a large quantity of sugar analogous to that of the grape, which may be separated in the form of crystals. In other respects, the urine is very abundant and very limpid in that affection.

*URINE DE LA DIGESTION*, see Urine.

Urine, Drop'sical, is an ammoniacal urine, often containing much albumen and scarcely any urea.

Urine, Dyspep'tic, has been found to precipitate tannin abundantly, and to soon putrefy.

*URINE ÉPAISSE*, Urine, mucilaginous.

Urine, Febrile, *Uri'na febri'lis*. Urine discharged in inflammation and inflammatory fever.

URINE, FILAMENTOUS, see Filamentous.

URINE, FLOC'CULENT, (F.) *Urine floconneuse*, is when the fluid is troubled by flocculi, suspended in it.

URINE, FURFURA'CEOUS, see Furfuraceous—*u. Floconneuse*, Urine, flocculent—*u. des Goutteux*, Urine, gouty.

URINE, GOUTY, (F.) *Urine des goutteux*, contains much phosphate of lime, and, after severe attacks of gout, precipitates a mixture of the uric and rosacic acids.

*URINE HUILEUSE*, Urine, oily.

URINE, HYSTER'ICAL, is clear, colourless, and similar to the *Urine de la Boisson*.

URINE, ICTER'ICAL, contains bile.

URINE, INCONTINENCE OF, Enuresis.

URINE OF INFLAM'MATORY DISEASES. This is, generally, small in quantity, and very high-coloured.

URINE, INVOLUNTARY DISCHARGE OF, Enuresis.

URINE, JUMEN'TOUS, *Uri'na jumento'sa* seu *jumenta'ria*, (F.) *Urine Jumenteuse*. A term used, by the French, for ammoniacal urine, rendered turbid by a substance similar to small grains of dust, which causes it to resemble the urine of herbivorous animals.

*URINE LACTESCENTE*, U. milky—*u. Laiteuse*, Urine, milky.

URINE, MILKY, (F.) *Urine lactescente* ou *laiteuse*. White and troubled urine.

URINE, MUCILAG''INOUS, (F.) *Urine épaisse*. Urine containing much mucus.

URINE, NERVOUS. Thin and very liquid urine; such as is passed shortly after the attack of nervous diseases.

URINE OF NERVOUS FEVERS is generally very thin; and often deposits a mixture of uric and rosacic acids.

URINE, OILY, (F.) *Urine huileuse*, is that which pours like oil, or which has an oily pellicle at its surface.

URINE, OXAL'IC, *Oxalu'ria*. Urine containing a salt of the oxalic acid.

URINE, PHOSPHORES'CENT, *Phosphoru'ria, Phosphu'ria*. Urine which is luminous or phosphorescent.

URINE, PUR'PURIC, see Porphyruria.

URINE, RICK'ETY, contains much phosphate of lime.

URINE, SANDY, Arenosa urina—u. Stoppage of, Ischuria—*u. Ténue*, Urine, thin.

URINE, THIN, (F.) *Urine ténue*. Urine that is transparent, slightly coloured, and but little dense.

URINIF'EROUS, *Urinifer*, from *ουρον*, 'urine,' and *fero*, 'I carry.' That which carries urine.

URINIFEROUS SUBSTANCE OF THE KIDNEY, see Kidney.

URINIF'EROUS TUBES OR DUCTS OF BELLI'NI, *Tu'buli* vel *duc'tus urinif'eri Belli'ni, Tu'buli Belli'ni, Bellinia'ni Ductus, Bellinia'næ Fis'tulæ*. The collection of small tubes, converging from the cortical part of the kidney to the apices of the papillæ.

URINODES, Urinous.

URINOM'ETER, from *ουρον*, 'urine,' and *μετρον*, 'measure.' A small hydrometer for taking the specific gravity of urine. The urinometer suggested by Dr. Prout is divided into 60 degrees, the zero being the point at which it floats in distilled water. The numbers on the scale added to 1000, the specific gravity of water, give the particular specific gravity: thus, supposing the number cut by the surface of the liquid to be 30, it would indicate a s. g. of 1.030. The letters H. S. on the back of the scale mean "healthy standard," which ranges from 10° to 20°.

U'RINOUS, *Urino'sus, Urino'des*. Having the character of urine. Similar to urine.

UROCE'LE, *Œde'ma scroti urino'sum, Urocheoce'lē, Oscheoce'lē urina'lis*, from *ουρον*, 'urine,' and *κηλη*, 'a rupture.' A tumour of the scrotum, owing to the effusion of urine into the same, and into the areolar tissue.

UROCHES'IA, *Urochez'ia*, from *ουρον*, 'urine,' and *χεζειν*, 'to go to stool.' A discharge of urine by the bowels.

UROCRASIA, Enuresis.

UROCRIS'IA, from *ουρον*, 'urine,' and *κρινω*, 'I judge.' *Urocrite'rion*. A judgment formed either of the urine, or of disease after inspecting the urine.

UROCRITERION, Urocrisia.

UROCYSTIS, Urinary bladder

UROCYSTITIS, Cystitis.

UROCYSTOCATARRHUS, Cystirrhœa.

URODIAL'YSIS, from *ουρον*, 'urine,' and *διαλυσις*, 'dissolution, loss of strength.' A partial and temporary suspension of the function of the kidney, such as occurs in the course of most acute diseases. A condition of the function of the kidney and of the urine, similar to that observed in acute diseases, but without local mischief or preceding inflammatory fever, has been termed, when occurring in children, *Urodial'ysis Neonato'rum*; in the aged, *Urodialysis Senum*.—Schönlein.

URODOCHIUM, Urinal.

URODYN'IA, from *ουρον*, 'urine,' and *οδυνη*, 'pain.' Pain during the excretion of the urine.

URŒDEMA, Urapostema.

UROGEN'ITAL, *Urogenita'lis, Gen'ito-u'rinary, Gen'ito-urina'rius*. Relating or appertaining to the urinary and genital apparatuses.

UROGENITAL SINUS, *Sinus uro-genita'lis*. A cavity or canal in the embryo of the mammalia opening externally, in which the excretory ducts of the Wolffian bodies, the ureters and the efferent parts of the generative apparatus, terminate internally. It is prolonged into the urachus. Subsequently it becomes separated by a process of division into a *pars urina'ria* and a *pars genita'lis*. The former, extending towards the urachus, is converted into the urinary bladder; whilst from the latter are formed the *vesiculæ seminales* in the male, and the middle portion of the uterus in the female.—J. Müller.

UROLITHI, Calculi, urinary.

UROLITHIASIS, Lithia.

UROLITHOLOG''IA; from *ουρον*, 'urine,' *λιθος*, 'a stone,' and *λογος*, 'a description.' A description of urinary calculi.

UROLITHOTOMIA, Lithotomy.

UROMANTI'A, from *ουρον*, 'urine,' and *μαντεια*, 'divination.' The art of divining diseases by simple inspection of the urine; *Urosco'pia*. One professing to be able to do this is called *Uroman'tes*. Vulgarly, a water-doctor.

UROMPH'ALUS, *Her'nia U'rachi*. A monstrosity, which consists in the protrusion of the urachus at the umbilicus.

URON, Urine.

URON'CUS, from *ουρον*, 'urine,' and *ογκος*, 'a swelling.' A urinary swelling.

URONOL'OGY, *Uronolog''ia*, from *ουρον*, 'urine,' and *λογος*, 'a description.' The part of medicine which treats of the urine.

UROPHTHISIS, Diabetes mellitus.

UROPLA'NIA, from *ουρον*, 'urine,' and *πλανη*, 'wandering.' The presence of urine in other parts than the urinary organs.

UROPOE'SIS, *Uropoïe'sis*, from *ουρον*, 'urine,' and *ποιεω*, 'I make.' *Secre'tio uri'næ* seu *lo'tii*. The secretion of urine by the kidney.

UROPOIESIS, Uropoesis.

UROPYGION, Coccyx.

UROPYGIUM, *Croupion.*

URORRHAGIA, Diabetes.

URORRHŒA, Enuresis, Diabetes.

UROSCHEOCELE, Urocele.

UROSCOPIA, see Uromantia.

URO'SES, from *ουρον*, 'urine.' Diseases of the urinary organs.—Alibert.

UROSTEALITH, *Urosteal'ithos*, from *ουρον*, 'urine,' *στεαρ*, 'suet,' and *λιθος*, 'stone.' A peculiar fatty ingredient of urinary calculi, discovered by Heller.

UROSTENOSIS, Urethrostenosis.

UROUS ACID, Uric oxide.

UROZEMIA, Diabetes — u. Albuminosa, Kidney, Bright's disease of the—u. Mellita, Diabetes mellitus.

URTI'CA, *U. Dioi'ca* seu *major* seu *his'pida*, *Pyr'ethrum*, the *Common stinging nettle*, *Ad'icē*, (F.) *Ortie. Family*, Urticeæ. *Sex. Syst.* Monœcia Tetrandria. This plant has been long used for medical and culinary purposes. The young shoots, in the spring, are considered to possess diuretic and antiscorbutic properties.

URTICA BALEARICA, U. pilulifera — u. Dioica, Urtica — u. Hispida, Urtica — u. Iners magna fœtidissima, Galeopsis — u. Major, U. dioica — u. Minor, U. urens — u. Mortua, Lamium album.

URTICA PILULIF'ERA, *Pill-bearing Nettle*, *U. Pilulo'sa* seu *Roma'na* seu *Balea'rica*, (F.) *Ortie Romaine.* The seed was formerly given in diseases of the chest.

URTICA PILULOSA, U. pilulifera—u. Roman, U. pilulifera.

URTICA URENS, *U. minor*, *Dwarf nettle*, (F.) *Ortie brulante.* A lesser variety of the nettle, possessing similar virtues.

Nettles have been used as stimulants to paralytic limbs.

*URTICAIRE*, Urticaria.

URTICA'RIA, from *urtica*, 'a nettle;' *Enanthe'sis urtica'ria*, *Ure'do*, *Scarlati'na urtica'ta*, *Cnido'sis*, *Urtica'ria porcel'lana*, *Exanthe'ma urtica'tum*, *Epinyc'tis prurigino'sa*, *Febris urtica'ta*, *Pur'pura urticata*, *Febris rubra prurigino'sa*, *Saltans rosa*, (F.) *Urticaire*, *Fièvre Ortie*, *Porcelaine*, *Nettle-rash*; vulgarly *Hives*, *Bold Hives*; from *urtica*, 'a nettle,' because the eruption resembles that produced by the stings of a nettle. A disease distinguished by those elevations of the cuticle called *wheals.* They have a white top, and are often surrounded by a diffuse redness. They excite intolerable itching, especially when the person is warm in bed. The eruption frequently goes and comes once or more in the 24 hours, and is generally dependent upon gastric derangement. In some people, nettle-rash is induced by shell-fish, eggs, nuts, &c. It is not usually a disease of any consequence, and its treatment is limited to the use of absorbent laxatives, and simple general means. Willan has described six varieties of the complaint;—*Urtica'ria febri'lis*, *U. evan'ida*, *U. perstans*, *U. confer'ta*, *U. subcuta'nea*, and *U. tubero'sa.*

URTICARIA PORCELLANA, Essera, Urticaria.

URTICA'TIO, *Cnido'sis*, *Urtica'tion*, from *urtica*, 'a nettle.' A sort of flagellation, with nettles;—used with the intention of exciting the skin.

URUCU, Terra Orleana.

URYLIC ACID, Uric acid.

USNEA, Lichen saxatilis — u. Florida hirta, Lichen plicatus — u. Hirta, Lichen plicatus — u. Plicata, Lichen plicatus

USSACU, Hura Brasiliensis.

USTILAGO, Ergot.

USTIO, Burn, Ustion.

USTION, *Us'tio*, *Causis*, from *urere*, *ustum*, 'to burn.' The act of burning or of applying the actual cautery. Also the effect of cauterization; a burn.

USTULA'TIO, *Ustula'tion.* A pharmaceutical operation by which a substance is dried by heat.

USUALIA, Officinals.

USUS, Habit.

UTER, Uterus.

UTERI ADSCENSUS, Hysteria—u. Anteversio, Hysteroloxia anterior—u. Carcinoma, Metrocarcinoma—u. Convulsivus morbus, Lorind matricis—u. Coryza, Leucorrhœa—u. Exulceratio, Hysterelcosis—u. Flexio, Hysteroloxia — u. Inclinatio, Hysteroloxia—u. Obliquitas, Hysteroloxia — u. Pronatio, Hysteroloxia anterior — u. Pruritus, Nymphomania — u. Reflexio completa, Hysteroloxia posterior — u. Retroversio, Hysteroloxia posterior — u. Rheuma, Leucorrhœa — u. Ulcus, Hysterelcosis — u. Versio incompleta, Hysteroloxia.

U'TERINE, *Uteri'nus*, from *uterus*, 'the womb.' That which belongs or relates to the womb.

UTERINE ARTERY, *Arte'ria uteri'na hypogas'trica.* Its size is always in a ratio with the greater or less state of development of the uterus. It arises from the hypogastric, either separately or with the umbilical, or from the internal pudic; passes upon the lateral parts of the vagina, to which it gives branches; and afterwards ascends on the sides of the uterus, and divides into a considerable number of very tortuous branches, which enter the tissue of the organ.

UTERINE MUSCLE OF RUYSCH consists of some fleshy fibres at the fundus of the uterus, which he regarded as forming a particular muscle.

UTERI'NUS FRATER. In law, a brother by the mother's side.

UTERO-ABDOMINAL SUPPORTERS, see Belt, Russian.

UTERO-GESTATION, Pregnancy.

UTEROMANIA, Nymphomania.

U'TERUS, *Uter*, *Utric'ulus*, *Loci*, *Loci mulie'bres*, *Vulva*, *Venter*, *Arvum natu'ræ*, *Conceptac'ulum*, *Matrix*, *Ager natu'ræ*, *Hys'tera*, *Metra*, *Stera*, *An'gus*, *Delphys*, *Alvus*, *Epompha'lion*, *Gaster*, *Mater*, *Nedys*, *Postrema*, the *Womb*, (F.) *Matrice*, *Sein.* The uterus, destined to lodge the fœtus from the commencement of conception till birth, is a hollow symmetrical organ, having the shape of a truncated conoid: it is situate in the pelvis, between the bladder and the rectum, above the vagina, and below the convolutions of the small intestine. The uterus is flattened from before to behind, and is nearly an inch in thickness. It is two inches broad at its highest part, and becomes narrower towards the vagina; terminating in a contracted portion, called the *cervix* or *neck*, to distinguish it from the rest of the organ, called the *body.* From its *fundus* or upper portion, the Fallopian tubes pass off. The mouth is called *Os U'teri* or *Os Tincæ.* The cavity is very small, and its parietes are thick. The portion of the cavity corresponding with the body is triangular and flattened. Its superior angles present the extremely fine orifices of the Fallopian tubes. The cavity of the neck is slightly dilated before opening into the vagina. The uterus is composed, 1. Of a *serous membrane.* This is external, and furnished by the peritoneum; which is reflected upon the uterus from the posterior surface of the bladder and the anterior surface of the rectum. It forms, also, the *broad ligaments of the uterus*, *Ligamen'ta lata*, *Alæ vespertilio'nis*, *Re'tia U'teri.* These contain, above, the Fallopian tube; beneath and anteriorly, the round ligaments; and, behind, the ovary. They are two membranous productions or duplicatures of the peritoneum, sent from the edges of the uterus and posterior extremity of the vagina, in a transverse direction, to be fixed to, and line, the side of the pelvis. 2. Of a *mucous membrane*, which is a prolonga-

tion of that of the vagina, and extends into the tubes. 3. Of a *proper tissue*, whose thickness is considerable. It is of a close texture; is grayish and elastic; and resists the instrument that divides it. Its intimate nature is but little known. During gestation it is truly muscular. The arteries of the uterus proceed from the spermatic and hypogastric. Its veins follow the same course, and bear the same name as the arteries. They are very tortuous, and form large sinuses in the parietes of the organ, called *U'terine Si'nuses*. Its nerves proceed from the sciatic and hypogastric plexuses. Its lymphatic vessels are very multiplied; and during pregnancy acquire enormous dimensions. The changes experienced by the uterus during gestation, and after delivery, are very numerous and important to be known. They regard its situation, direction, size, shape, texture, connexions, vital properties, &c.

Uterus, Abdomen — u. Anteversion of the, Hysteroloxia anterior.

Uterus Bif'idus. A double uterus. One separated into two cavities.

Uterus Duplex, Dihysteria — u. Hour-glass contraction of the, *Chaton*—u. Inclinatus, Hysteroloxia.

Uterus, Ir'ritable, *Neural'gia of the Uterus*. A disease characterized by deep-seated pain in the lower part of the abdomen, and in the back and loins; generally diminished by lying down, and increased by exercise, and more severe for a few days preceding and during menstruation. On examination *per vaginam*, the uterus is found to be tender on pressure; and the cervix and body slightly swollen, but not usually indurated. It is an obstinate affection, but frequently ends of itself after years of suffering. The treatment must be,— the horizontal posture; local bloodletting to the uterus; emollients; soothing injections; narcotics, warm bath, &c. See Hysteralgia.

Uterus, Inversion of the, *Inver'sio U'teri, Metranas'trophē, Œdopto'sis Uteri inver'sa*, (F.) *Inversion de la Matrice, Renversement de la Matrice*. The uterus, displaced and turned inside out. This can only happen through want of caution on the part of the medical practitioner. It is a fatal accident, unless speedily reduced. This must be done by gradually returning the superior part, by grasping it with the hand, and making the rest follow.

Uterus Masculinus, see Ejaculatory ducts — u. Obliquus, Hysteroloxia — u. Retroversion of the, Hysteroloxia posterior.

Uterus, Rupture of the, *Metrorrhex'is, Hysterorrhex'is, Ruptu'ra Uteri, Perfora'tio Uteri, Laceration of the Womb*, (F.) *Rupture de la Matrice*. This dreadful accident occurs during labour, and is known to have taken place, when the child's head suddenly recedes during a pain, with vomiting, sinking of the pulse, cold sweats, &c. When it is evident that this has occurred, the hand must be passed into the uterus, and the feet of the child be brought down.

Cases are on record, in which partial lacerations of the uterus have healed, and the patient has done well. This is a rare event, and not to be anticipated.

UTRICLE, see Semicircular canals.

UTRIC'ULAR, *Utricula'ris*; from *utriculus*, 'a small bag or bottle.' Relating to or resembling a small bag or bottle.

Utricular Glands, *Glan'dulæ utricula'res*. The glands or follicles in the interior of the uterus, which are concerned in the formation of the decidua.

UTRICULUS, see Ejaculatory ducts, Uterus — u. Communis, see Semicircular canals — u. Lacteus, Receptaculum chyli.

UVA, Uvula, see Vitis vinifera — u. Inversa, Paris — u. Lupina, Paris — u. Ursi, see Arbutus uva ursi — u. Vulpina, Paris.

Uvæ Corinthiacæ, see Vitis Corinthiaca.

Uvæ Passæ, *Rhages, Dried Grapes, Raisins*, see Vitis vinifera.

Uvæ Passæ Majores, see Vitis vinifera — u. Passæ minores, see Vitis Corinthiaca — u. Passæ sole siccatæ, see Vitis vinifera.

UVATIO, Ceratocele, Staphyloma.

U'VEA, from *uva*, 'an unripe grape.' *Tu'nica acino'sa* seu *acinifor'mis* seu *uva'lis* seu *acina'lis* seu *uvifor'mis, Rhagoï'des, Tu'nica rhagoïdes* seu *uvea* seu *perfora'ta, Membrana uvea, Rhox*, (F.) *Uvée*. Some anatomists have given this name to the choroid coat of the eye; others, to the posterior layer of the iris, on account of the black and very thick varnish that covers it.

Uvea, Commissure of the, Ciliary ligament.

*UVÉE*, Uvea.

UVEI'TIS; a word of hybrid formation; from *uvea*, 'the uvea,' and *itis*, denoting inflammation; properly, *Rhagodeï'tis*. Inflammation of the uvea.

UVIGENA, Uvula.

UVIGERA, Uvula.

UVULA, diminutive of *uva*, 'a grape.' *Pinnac'ulum for'nicis guttura'lis, Uva, Staph'ylē, Tintinnab'ulum, Columel'la, Cion, Ci'onis, Garga'reon, Colum'na oris, Gurgu'lio, Intersep'tum, Processus* seu *Cartila'go U'vifer, Uvig''ena, Uvig''era, Pap of the Throat, Himas, Plectrum, Sublin'gua, Sublin'guium*, (F.) *Luette*. A fleshy appendix or prolongation, which hangs from the middle or free edge of the velum palati. The uvula has a conical shape, and is of a greater or less size in individuals. It is formed, especially, by the mucous membrane of the velum palati; and contains, within it, the azygos uvulæ muscle. Its use is not clear.

Also, a small prominence or lobule in the portion of the cerebellum that forms the posterior boundary of the fourth ventricle. It is on the median line, and behind the nodulus.

Uvula, see Vermiform process inferior — u. Decidua, Staphylœdema — u. Relaxata, Staphylœdema — u. Vesicæ, see Urinary bladder — u. Vesical, see Urinary bladder.

U'VULAR, *Uvula'ris*, from *uvula*. That which belongs to the uvula.

Uvular Glands are small follicles, belonging to the mucous membrane covering the uvula.

UVULARIA, Ruscus hypoglossum.

Uvula'ria Perfolia'ta, *Smaller Bellwort*; indigenous: *Order*, Melanthaceæ; flowering in May and June. The root, when fresh, is subacrid and mucilaginous. A decoction of the plant is used in sore mouth. It is said to cure the bites of rattlesnakes.

UVULI'TIS, a word of hybrid formation, from *uvula*, and *itis*, denoting inflammation. *Angi'na uvula'ris, Staphyli'tis, Cioni'tis, Inflamma'tio u'vulæ*, (F.) *Inflammation de la Luette, Falling down of the Palate*. Inflammation of the uvula.

# V.

VACCIN, see Vaccina.

VACCI'NA, *Vaccin'ia, Vari'ola vaccina, V. vaccin'ica, V. tuto'ria, V. tutrix, Exanthe'ma vaccina, E. antivariolo'sum, Syn'ocha vaccina, Vacci'ola, Vacci'ola vera, Vacci'na primig''ena* seu *vaccinato'ria* seu *antivariolo'sa, Vacciola scutella'ta, Vari'olæ tuto'riæ, Cow-pox, Kine Pock, Inoc'ulated Cow-pox, Emphly'sis vaccina inser'ta,* from *vacca,* 'a cow;' (F.) *Vaccine.* The cow-pox is a disease of the cow, arising spontaneously, which, if transmitted to man by means of inoculation, may preserve him from small-pox contagion. The promulgation of this valuable property of the vaccine virus is due to Dr. Jenner. When inoculating for small-pox in Gloucestershire, in 1775, he was surprised to meet with a number of persons in the same district, on whom the insertion of the virus produced no effect, although they had never passed through the small-pox. On investigation, he found that all these persons had previously been affected by a pustular eruption of the cow, which they had taken by milking the animal; and which eruption they called *Cow-pox.* This discovery induced him to institute experiments, and he found that such preservative effect actually existed. The *Vaccine Virus, Virus Vacci'num,* (F.) *Vaccin,* or the fluid of the eruption, is not now usually taken immediately from the cow; experience having demonstrated, that it is nearly as efficacious when obtained from the human vesicle. The characteristic of cow-pox eruption is: — a semi-transparent, pearl-coloured vesicle, with a circular or somewhat oval base; its upper surface, until the end of the 8th day, being more elevated at the margin than in the centre; and the margin itself being turgid, shining, and rounded, so as often to extend a little over the line of the base. This vesicle is filled with clear lymph; contained in numerous little cells, that communicate with each other. After the 8th or 9th day from the insertion of the virus, it is surrounded by a bright red, circumscribed areola, which varies in its diameter, in different cases, from a quarter of an inch to two inches; and is usually attended with a considerable tumour, and hardness of the adjoining areolar membrane. This areola declines on the 11th or 12th day; the surface of the vesicle then becomes brown in the centre; and the fluid in the cells gradually concretes into a hard, rounded scab or crust, of a reddish-brown colour, which at length becomes darker, contracted, and dry, but is not detached till three weeks after vaccination. It leaves a permanent, circular cicatrix, about five lines in diameter, and a little depressed; the surface being marked with very minute pits or indentations, denoting the number of cells of which the vesicle had been composed. This is the progress of the *genuine cow-pox.* At times, fever occurs about the 9th or 11th day; but, at others, not the slightest indisposition is felt. Aberrations from this progress occur, which must be attended to; as the same preservative influence is not exerted by *irregular* or *spurious cow-pox.* If the eruption runs speedily to a height, has an aureola too early, is irregular at its edges, and contains pus instead of a limpid fluid, — it cannot at all be depended upon.

Small-pox occurs, at times, as an epidemic after vaccination. For a while, the enthusiastic advocates of vaccination would not admit the affection to be small-pox; and, accordingly, they gave it the name Varioloid. It is unquestionably small-pox, but modified, and greatly divested of its terrors by previous vaccination; and it is said to happen less frequently after vaccination than after *small-pox inoculation.* Vaccination is now practised every where, except among those in whom ignorance and prejudice exclude the lights of reason and philanthropy. There is ground, however, for the belief, that for full protection revaccination may be occasionally necessary.

VACCINA ANTIVARIOLOSA, Vaccina — v. Primigena, Vaccina — v. Tutoria, Vaccina — v. Tutrix, Vaccina — v. Vaccinatoria, Vaccina.

*VACCINAL,* Vaccine.

VACCINA'TION, *Vaccina'tio,* from *vacca,* 'a cow;' *Cow-pox inoculation, Jenne'rian inoculation.* An operation which consists in inserting the vaccine virus under the cuticle, so that it may come in contact with the absorbents. It is extremely simple, and requires merely that the point of the lancet should be held under the cuticle for a short time. The best time for taking the matter from the *Cow-pox vesicle,* for vaccination, is about the 7th or 8th day, before the appearance of the aureola, when it ought to be limpid and transparent. The most certain method is, to pass it from arm to arm; but this is not always convenient; and, hence it is taken upon *points* or pieces of quill, or between glasses. It must, of course, be softened for use. This is done by means of a little water, which does not destroy its efficiency. The scab, too, which falls off about the end of three weeks—sooner or later — is capable of communicating the affection, if dissolved in water; and this is the most common method of transmitting the vaccine virus in some countries.

VAC'CINATOR, *Vac'cinist,* one who inoculates for the cow-pox.

*VACCINE,* Vaccina.

VACCINE, *Vacci'nus, Vaccina'lis,* (F.) *Vaccinal;* same etymon. Relating or appertaining to vaccination, as the '*vaccine* vesicle,' '*a vaccine* physician.'

VACCINEL'LA. A term employed by some to designate spurious cow-pox.— *Vaccin'oïs, Vacci'ola spu'ria* seu *lepro'sa.*

VACCINIA, Vaccina—v. Palustris, Vaccinium oxycoccos.

VACCINIST, Vaccinator.

VACCINIUM MACROCARPON, see V. oxycoccos.

VACCIN'IUM MYRTIL'LUS, *Vitis idæ'a myrtill'lus.* The *Myrtle Berry, Vaccin'ia myrtill'lus, Bilberry, Blea-berry, Whortle-berry, Black Whorts, Vaccin'ium nigrum,* (F.) *Airelle Anguleuse, Raisin de Bois. Family,* Vaccineæ. *Sex. Syst.* Octandria Monogynia. The berries — *Baccæ Myrtillo'rum* — are esteemed to be antiscorbutic, when prepared with vinegar. They are also said to possess antiseptic and sub-astringent properties when dried. They are not used in medicine; but are frequently eaten with milk and sugar.

VACCINIUM NIGRUM, V. myrtillus.

VACCINIUM OXYCOC'COS, *Oxycoc'cos, O. palus'tris, Schollera oxycoccos, Vaccinia palus'tris, Vitis Idæ'a palus'tris, Moorberry, Cranberry, Mossberry, Swamp Redberry, Sourberry,* (F.) *Canneberge.* The berries are pleasantly acid and cooling. They make an agreeable preserve. The common American Cranberry is from *Vaccinium macrocarpon.*

Vaccin'ium Punctatum, V. vitis idæa — v. Resinosum, Gaylussacia resinosa.

Vaccinium Stamin'eum, *Buckberry, Squaw Huckleberry, Deerberry.* The leaves of these plants are astringent.

Vaccinium Vitis Idæ'a, *V. puncta'tum, Vitis Idæ'a puncta'ta, Red Bilberry, Am'pelos Idæ'a, Whortleberry, Cowberry,* (F.) *Airelle* ou *Canneberge ponctuée.* A decoction of the leaves has been used in calculous affections. They are astringent. The ripe berries are pleasantly acid, and refrigerant. *Whortleberries* are furnished by different species of Vaccinium.

VACCINOIS, Vaccinella.

VACCINUS, Vaccine.

VACCIOLA, Vaccina — v. Leprosa, Vaccinella — v. Scutellata, Vaccina — v. Spuria, Vaccinella — v. Vera, Vaccina.

VACILLA'TIO, *Tituba'tio,* from *vacillare,* 'to waver.' Staggering; waddling — *claudica'tio anat'ica.*

Vacillatio Dentium, Odontoseisis.

*VAGIN,* Vagina.

VAGI'NA, 'a sheath,' *Vagi'na mulie'bris* seu *uteri'na* seu *U'teri* seu *Penis, Sinus mulie'bris* seu *Pudo'ris* seu *Puden'di, Col'eus, Peris, Perin, Colpos, Vulvo-uterine canal,* (F.) *Vagin.* A cylindrical canal, five or six inches long; situate within the pelvis, between the bladder and rectum. It communicates by one extremity, *Aulos,* with the vulva; by the other, with the womb, the neck of which it embraces. The vagina is lined, internally, by a mucous membrane; and is partly closed, in young females, by the hymen, and carunculæ myrtiformes. — Around the mucous membrane is a layer of spongy, erectile tissue; and a cellulo-vascular membrane. A constrictor muscle; numerous vessels furnished by the vaginal artery, particularly; veins and nerves, proceeding from the sciatic plexus, also, enter into the composition of the organ.

The term Vagina or sheath, *Theca,* is extended to many parts, which serve as envelopes to others.

*Sheath,* (F.) *Gaîne,* is sometimes applied to the fascia enveloping the limbs; to areolar membrane, enveloping the muscles, and entering between their fibres; to that which surrounds the blood-vessels; to the synovial membranes surrounding tendons, and lining the gutters of bones, &c.

Vagina Cordis, Pericardium — v. Femoris, Fascia lata aponeurosis — v. Funiculi Umbilicalis, see Funiculus umbilicalis — v. Glissonii, Capsule of Glisson — v. Malleolaris externa, Retinaculum tendinum perinæorum — v. Muliebris, Vagina — v. Muscularis, Perimysium — v. Nervorum, Neurilemma — v. Penis, Vagina — v. Portæ, Capsule of Glisson — v. Uterina, Vagina.

Vagina of the Vena Porta, *Sheath of the Vena Porta,* (F.) *Gaîne de la Veine-porte,* is the areolar membrane that accompanies the divisions of the vena porta into the substance of the liver.

VAGINÆ SYNOVIALES, Bursæ mucosæ.

VAG''INAL, *Vagina'lis,* from *vagina,* 'a sheath.'—Relating or pertaining to a sheath.

Vaginal Artery. This exists, as a matter of course, only in the female. It arises from the hypogastric or from the uterine, vesical, internal pudic, umbilical, &c., and sends its branches, first to the lateral parts of the vagina, and afterwards to the anterior and posterior surfaces.

Vaginal Bil'iary Plexus. A plexus of ramifications of the hepatic duct through the capsule of Glisson.

Vaginal Branches of the Vena Porta are those which have to pass through the sheath of the capsule of Glisson, previous to entering the interlobular spaces. In this course, they form the *vaginal plexus.* There are, also, *vaginal branches,* and a *vaginal plexus* formed by the hepatic artery.

Vaginal Coat of the Eye, see Eye.

Vaginal Coat of the Testicle, *Tu'nica Vagina'lis, T. Elytroï'des* vel *Elytro'des,* is the serous membrane which envelops the testicle. Before the descent of the testicle, the tunica vaginalis does not exist. It is formed by a prolongation, furnished by the peritoneum to the testicle when it issues from the abdomen. The tunica vaginalis forms a close sac, investing the testicle and epididymis, without containing them in its cavity, and reflected so as to form a bag around the circumference of the testis; hence it is divided into *Tu'nica vagina'lis pro'pria* and *Tu'nica vagina'lis reflex'a.* Between the two layers, the inner surface is smooth, and lubricated by a serous fluid.

Vaginal Ganglia, see Spermatic ganglion.

Vaginal Plexus, see Vaginal branches of the vena porta.

Vaginal Process of the Temporal Bone, (F.) *Apophyse vaginale* ou *engaînante, Gaîne de l'apophyse styloïde, Chaton,* is a bony crista, which embraces the base of the styloid process.

VAGINITIS, Leucorrhœa (vaginal.)

*VAGISSEMENT,* Cry, Vagitus.

VAGI'TUS, (F.) *Vagissement.* The cry of the new-born child. *Squalling.*

Vagi'tus Uteri'nus. The cry of the child in utero.

VAGUS NERVUS, Pneumogastric.

*VAIRON* (F.), *Dispar oc'ulus.* One who has eyes of different colours. It also means a *wall-eyed* animal, or one whose iris is surrounded by a whitish circle.

*VAISSEAU,* Vessel — *v. Sanguin,* Blood-vessel.

*VAISSEAUX CAPILLAIRES,* Capillary vessels—*v. Chylifères.* Chyliferous vessels—*v. Lactés,* Chyliferous vessels — *v. Lactifères,* Lactiferous vessels — *v. Ombilicaux,* Umbilical vessels.

VALANIDA, Fagus sylvatica.

VALANTIA APARINE, Galium aparine.

VALERIAN, AMERICAN, Cypripedium luteum, Valeriana pauciflora — v. Garden, Valeriana phu — v. Greek, Polemonium reptans — v. Officinal, Valeriana — v. Wild, Valeriana.

VALERIA'NA, *V. officina'lis, Wild Vale'rian, Valeriana minor, Offic''inal Valerian. Family,* Dipsaceæ. *Sex. Syst.* Triandria Monogynia. The root, *Valeria'na,* (Ph. U. S.) has been long extolled as an efficacious remedy in epilepsy, and in a variety of nervous complaints. It has been also advised as a tonic, antispasmodic, and emmenagogue. It has a strong, fetid odour; bitterish, subacrid, and warm taste; and its virtues are extracted by water and alcohol.

Valeriana Capen'sis, a South African species, has similar virtues.

Valeriana Celt'ica, *V. Saxat'ilis, Celtic Nard, Spica Cel'tica, S. Alpi'na, Nardus Cel'tica, Saliun'ca, Nardum Gall'icum, Spica Cel'tica Dioscor'idis,* (F.) *Nard Celtique.* The roots of this Alpine plant have been recommended as a stomachic, carminative and diuretic. It has a moderately strong smell, and a warm, bitterish, subacrid taste.

Valeriana Denta'ta, *V. locus'ta, Corn Salad.* A wholesome, succulent plant, cultivated in Europe as a salad. It is antiscorbutic and gently aperient.

Valeriana Major, V. phu — v. Locusta, V. dentata — v. Minor, Valeriana — v. Officinalis, Valeriana.

Valeriana Pauciflo'ra, *American Valerian,* has the properties of the other Valerians.

Valeriana Phu, *V. major, Garden Valerian*, (F.) *Grand Valériane*. The root has been recommended in rheumatism; especially in sciatica, and in epilepsy.

Valeriana Saxatilis, V. celtica.

*VALÉRIANE GRAND*, Valeriana phu.

*VALET À PATIN* (F.), *Volsel'la Pati'ni*. The common ligature forceps is a modification of this instrument invented by one Patin. It consists of two branches, united at the middle by a hinge, which may be separated or approximated by means of a screw or running ring. It is used for seizing hold of vessels that are to be tied.

VALETUDINARIUM, Hospital.

VALETUDINARIUS, Sickly, Valetudinary.

VALETU'DINARY, *Valetudina'rian, Valetudina'rius, Inval'idus*, from *valetudo*, 'health.'—One of delicate health. One subject to frequent diseases. An *Invalid*.

VALETUDO, Sanitas—v. Adversa, Disease—v. Bona, Sanitas—v. Commoda, Sanitas—v. Secunda, Sanitas.

VALGUS, see Kyllosis

VALIGA, Tinctura jalapii.

VALITUDO, Sanitas.

VALLECULA, Valley.

VALLEY, *Vallec'ula*, (F.) *Grand Scissure Médiane du Cervelet*. The deep fissure on the inferior part of the cerebellum, which divides it into two symmetrical portions.

VALLUM. The eyebrow or supercilium. Also, a species of bandage.—Galen.

VALS, MINERAL WATERS OF. A French acidulous chalybeate at Vals, six leagues from Viviers, in the department of Ardèche. There are five springs, containing carbonic acid, sulphate of iron, and alum. They are employed in passive hemorrhages, leucorrhœa, &c.

VALVE, *Val'vula, Dielis*, (F.) *Valvule*, from *valvæ*, 'folding-doors,' itself from *valvo*, 'I fold up.' A small door. Any membrane or duplicature of a membrane, which prevents a reflux of humours or other matters in the vessels and canals of the animal body. There are some valves, whose functions appear to be,—to retard or to modify the course of substances along canals, &c. See *mitral, sigmoid, tricuspid, ileo-cœcal valve*, &c.

Valve of Fallopius, Bauhin, valve of—v. Ileo-cœcal, Bauhin, valve of—v. Ileo-colic, Bauhin, valve of—v. of Tulpius, Bauhin, valve of—v. of Varolius, Bauhin, valve of

VALVES, SEMILUNAR, Sigmoid valves.

VALVULA, Valve—v. Cæci, Bauhin, valve of—v. Cerebelli, Valvula Vieussenii—v. Coli, Bauhin, valve of—v. Foraminis ovalis, Ovalis fossa—v. Guiffartiana, see Thebesius, veins of—v. Ilei, Bauhin, valve of—v. Magna Cerebri, V. Vieussenii.

Valvula Semiluna'ris, *Plica Semiluna'ris, Membran'ula semiluna'ris conjuncti'va, Plica luna'ta*. A small doubling of the tunica conjunctiva, which lies between the caruncula lacrymalis and the ball of the eye. In birds, this is large, and called *Membra'na nic'titans* vel *Pal'pebra ter'tia*.

Valvula Tarini, Velum medullare posterius—v. Thebesii, see Thebesius, veins of—v. Vaginæ, Hymen—v. Venæ magnæ, see Thebesius, valve of.

Valvula Vieusse'nii, *Velum Vieussenii, Val'vula cerebel'li* seu *Willisia'na* seu *magna cer'ebri, Velum interjec'tum cerebelli, V. apoph'ysi vermiformi obtentum, Lacu'nar ventric'uli quarti superior, Velum medulla'rē* seu *medulla'rē anti'cum* seu *ante'rius*, (F.) *Valvule de Vieussens, Voile médullaire supérieure*. A thin, medullary lamina, over the under end of the Aquæductus Sylvii and upper part of the fourth ventricle. At the sides of the valves are two medullary tracts, called *Proces'us ad Testes, Colum'næ Val'vulæ Vieussenii, or Oblique intercer'ebral Com'missure*.

Valvula Willisiana, Valvula Vieussenii.

VALVULÆ BICUSPIDALES, Mitral valves.

Valvulæ Conniven'tes. Numerous circular folds in the intestinal canal from the pyloric orifice through the greater part of the small intestine. They are folds of the mucous membrane; and their chief use appears to be, to retard the course of the alimentary mass, and to afford a larger surface for the origin of chyliferous vessels.

Valvulæ Cordis, Ostiola cordis—v. Cordis mitrales, Mitral valves—v. Triglochines, Tricuspid valves—v. Trisulcæ, Tricuspid valves.

*VALVULE*, Valve—*v. d'Eustache*, Eustachian valve—*v. de Pylore*, see Pylorus—*v. de Vieussens*, Valvula Vieussenii.

*VALVULES, V. Épiscopales*, Mitral valves—*v. Sigmoïdes* ou *Semilunaires*, Sigmoid valves.

VANELLOE, Vanilla.

VANIL'LA, *Banil'ia, Banilas, Banilloës, Banilla, Benzo'ënil, Ar'acus aromat'icus*, (F.) *Vanille, Baume de Vanille*. The *Vanelloe—Sil'iqua vanill'æ* seu *Banill'æ* seu *Vaniglie* seu *vanillie* seu *Ar'aci aromat'ici*—is a long, flattish pod; containing, under a wrinkled, brittle shell, a reddish-brown pulp, with small, shining, black seeds. The parasitic plant which affords this pod is the *Epiden'drum Vanilla, Vanill'a aromat'ica* seu *Mexica'na*. *Family*, Orchideæ. *Sex. Syst.* Gynandria Monandria. Vanelloes have an unctuous, aromatic taste, and a fragrant smell, like that of some of the finer balsams, heightened with musk. Although chiefly used as perfumes, they are reputed to possess aphrodisiac virtues.

Vanilla Aromatica, see Vanilla.

*VAPEURS*, Hypochondriasis, Hysteria.

VAPORA'RIUM, *Atmiste'rion, Laconi'cum, Py'ria, Pyriate'rium, Vapour bath*. A useful remedy in rheumatic and cutaneous affections; and wherever it is important to relax the cutaneous capillaries. In the *Russian Vapour Bath*, the vapour is produced by throwing water over hot stones. Its temperature is from 122° to 145°.

Vaporarium, Hypocaustum, see Stove.

VAPORATIO, Evaporation.

VAPORES UTERINI, Hysteria.

VAPOUR, Flatulence—v. Bath, Vaporarium.

VAPOURISH, Hypochondriac, Hysterical.

VAPOUROUS, Windy.

VAPOURS, Hypochondriasis, Hysteria.

VAPOURY, Hypochondriacal, Hysterical.

VARA, *Barre*.

VAREC, Kelp—*v. Vésiculeux*, Fucus vesiculosus.

VARENI, Ambulo-flatulentus, Gout (wandering.)

*VARICE*, Varix.

VARICELL'A, (diminutive of *Variola*, Smallpox,) *Em'phlysis varicella, Exanthe'ma varicella, Syn'achus varicella, Chicken pox, Variola lymphat'ica, V. spu'ria, V. sylves'tris, Variolæ nothæ, V. illegit'imæ, Pseudo-variolæ, V. volat'icæ, V. puellæ, Æoll'ion, Æoll'ium*, (F.) *Varicelle, Petite vérole volante, Vérolette*. A disease characterized by vesicles scattered over the body, which are glabrous, transparent, and about the size of peas. They appear in successive crops, are covered by a thin pellicle, and, about the third, fourth, or fifth day from their appearance, burst at the top, and concrete into small, puckered scabs, which rarely leave a pit in the skin. Three varieties have, sometimes, been designated. 1. The *V. lentiformes*, or *lenticular chicken pox*,

which are irregularly circular, and flattened on the top; the fluid being at first whitish, and afterwards straw-coloured. This is the *common chicken pox*. 2. The *Varicella conifor'mis, Conoi'dal Chicken Pox, Pem'phigus variolo'des, Variola lymphat'ica, Hydrach'nis, Swine Pox, Water Pox, Water Jags*, in which the vesicles are generally acuminated, and the fluid pellucid throughout; and, 3dly, the *Varicel'la globula'ris* or *Hives*, in which the vesicles are globular and larger; the fluid being, at first, whey-coloured, and afterwards yellowish. These divisions are, however, very arbitrary, for they are generally confounded.

Variola has been, sometimes, mistaken for this disease, and conversely. A little attention to the history of the eruption in the two affections will prevent error. Varicella is not contagious. At times, it prevails epidemically. It cannot be propagated by inoculation. The treatment is extremely simple; rest, abstinence, and the antiphlogistic regimen, being all that is generally required.

Varicella Varioloidea, Varioloid.

VARICIFOR'MES PARAS'TATÆ. A name given, by some authors, to the ducts of the epididymis, because they seem knotty and varicose.

VARICOBLEPH'ARON, from *varix*, and *βλεφαρον*, 'eyelid.' A varicose tumour of the eyelid.

VARICOCE'LĒ, from *varix*, and *κηλη*, 'a tumour;' *Oscheoce'lē varico'sa, Her'nia varico'sa, Ramex varico'sus, Spermatoce'lē, Cirsocele.* A varicose dilatation of the veins of the scrotum and spermatic cord. This latter variety of the disease is more common on the left side than the right. It appears under the form of a soft, doughy, unequal, knotty, compressible, and indolent tumour, situate in the course of the cord, and increasing from below upwards. It is less when the individual is in the recumbent posture, and increases when he is erect. It is, ordinarily, an affection of no moment, and is very common, requiring merely the use of a proper suspensory bandage. It has been advised, in bad cases, to tie the enlarged vein, but the operation is not free from danger induced by phlebitis. Sir A. Cooper has proposed the removal of a portion of the scrotum, so as to render the remainder of the scrotum a natural bandage. This plan has been found effectual.

VARICOM'PHALUS, from *varix*, and *ομφαλος*, 'the umbilicus.' Varicose tumour of the umbilicus; cirsomphalus.

VAR'ICOSE, *Varico'sus*, (F.) *Variqueux.* Affected with varix; or belonging to, or connected with, varix; — as a *varicose vein*, a *varicose ulcer*, that is, one kept up by *varices*.

VARICOSITAS CONJUNCTIVÆ, Cirsophthalmia.

VARIC'ULA, *Varix parva.* A diminutive of *varix*. Also, a varicose swelling of the veins of the tunica conjunctiva.—M. A. Severinus.

VARI'OLA, *Variolæ, V. veræ, Varioli, Small-Pox, Empye'sis Variola, Euphlog''ia, Chaspē, Æolec'thyma, Pox* (N. of England), *Pestis variolo'sa, Febris variolo'sa;* from *varius*, 'spotted,' or from *vari*, 'pimples;' (F.) *Variole, Petit Vérole, Picote.* A disease, now of somewhat less interest than before the discovery of vaccination. It is of a very contagious nature, and is supposed to have been introduced into Europe from Asia, at an early period of the middle ages. It is characterized by fever, with pustules, appearing from the third to the fifth day, and suppurating from the eighth to the tenth, and it possesses all the distinctive properties of the major exanthemata. It is capable of being produced by inoculation, but this *inoculated small-pox* — *Vari'ola inser'ta* — communicates the disease as readily through the air as the *natural small-pox*, or that received without inoculation.

Small-pox is distinguished into two classes, according to the character of the eruption, the *discrete* or *distinct*, and the *confluent*. 1. In Variola Discre'ta, *Empyesis variola discreta, Variola discreta benig'na, Variolæ regulares* seu *discretæ, Distinct Small-pox*, the pustules are usually of the size of peas; distinct, distended, and circular; the intervening spaces being red; the fever inflammatory throughout, and ceasing when the eruption is complete. 2. In Variola Con'fluens, *Empyesis variola confluens, Variolæ regula'res confluen'tes, Vesic'ulæ Divæ Bar'baræ, Vésicules de Sainte-Barbe* or *Confluent Small-pox*, the pustules are confluent, or run together; flaccid and irregularly circumscribed; the intervening spaces being pale, and the accompanying fever typhoid. In children, diarrhœa, and, in adults, ptyalism, with swelling of the hands and feet, generally appear, towards the period of the *sec'ondary fever*, which occurs from the tenth to the thirteenth day. The fever that precedes and accompanies the eruption is called the *Eruptive fever*. The prognosis is favourable in the distinct kind, if properly managed. The confluent is always dangerous, — the unfavourable symptoms being — flattening of the pustules, or subsidence of the eruption; the breathing becoming much obstructed or oppressed; or marks of inflammatory and congestive affections occurring in the different viscera. The treatment of the distinct kind is very simple: the antiphlogistic regimen, with catharties, being all that is necessary. The confluent kind requires the same management as typhus fever.

When the pimples are confluent in patches, the patches, being, however, separated by intervals of unaffected skin; it constitutes the clustered, coherent, or corymbose variety — *Vari'ola corymbo'sa*.

Variola Amboinensis, Frambœsia—v. Corymbosa, see Variola—v. Inserta, Variola (by inoculation)—v. Lymphatica, Varicella—v. Mitigata, Varioloid.

Vari'ola sine Vari'olis, *Vari'olous Fever.* These terms are applied to cases occasionally observed during the prevalence of variola, in which the constitutional phenomena are present without the cutaneous eruption.

Variola Spuria, Varicella—v. Vaccina, Vaccina—v. Vaccinatorum, Varioloid.

VARIOLÆ, Variola—v. Equinæ, see Grease—v. Illegitimæ, Varicella—v. Modificatæ, Varioloid—v. Nothæ, Varicella—v. Pucellæ, Varicella—v. Sylvestris, Varicella—v. Tutoriæ, Vaccina—v. Veræ, Variola—v. Volaticæ, Varicella.

VARIOLATION, Inoculation (Small-pox.)

*VARIOLE*, Variola.

VARIOLI, Variola.

VAR'IOLOID, *Varioloïs, Varioloï'des, Vari'ola modifica'ta, V. mitiga'ta, V. vaccinato'rum, Varicel'la, Varioloïdea*, from *variola*, small-pox, and *ειδος*, 'form,' — resembling small-pox. This is, really, small-pox, modified by previous inoculation or vaccination; and hence it has been properly called *modified small-pox*. That it is small-pox is proved by the fact, that matter, taken from a varioloid pustule, will communicate small-pox to one who has never had it naturally or by inoculation, or who has never been vaccinated. It is, almost always, a milder disease than small-pox; and this circumstance, with its shorter duration, exhibits the salutary effects of previous vaccination or inoculation. It has appeared epidemically.

VARIOLOIS, Varioloid.

*VARIQUEUX*, Varicose.

VARIX, *Phlebeurys'ma, Phlebec'tasis, Her'nia* seu *Ecta'sia vena'rum, Angiecta'sia veno'sa, Ix'ia, Cirsus, Cedma, Var'icose Vein*, (F.) *Varice*, is considered, by some, to come from the verb *variare*, 'to turn,' to twist,'—on account of the sinuosities of varicose veins. Dilatation of a vein. Varices are owing to local retardation of the venous circulation; and, in some cases, to relaxation of the parietes of the veins. They are very common in the superficial veins of the lower limbs, especially of pregnant females. The tumour or tumours, formed by varices, are soft, knotty, unequal, indolent, and livid; without pulsation, and yielding readily to the impression of the finger; but returning as soon as the compression is discontinued. Sometimes, the vein bursts and gives rise to hemorrhage. The treatment is usually palliative, and consists in exerting a uniform and constant pressure upon the part, by means of an appropriate bandage. The radical cure has, also, been obtained by extirpation, division of the vein, or ligature. The second course is apt to be followed by phlebitis.

VAROLI, BRIDGE OF, Pons Varolii.

VARUS, Acne, Ionthus, see Kyllosis—v. Mentagra, Sycosis.

VAS, Vessel, Penis—v. Deferens mulieris, Tuba Fallopiana—v. Urinarium, Ureter.

VASA ABSORBENTIA, Absorbent vessels—v. Capillaria, Capillary vessels.

VASA CHYLOPOIËT'ICA URINIF'ERA. Blood-vessels, which, according to Lippi, convey drinks from the chyliferous vessels to the renal veins.

VASA EFFERENTIA, see Efferent—v. Exhalantia, Exhalant vessels—v. Hydragoga, Lymphatic vessels—v. Lactea, Chyliferous vessels, Lactiferous vessels—v. Meningea, Meningeal vessels—v. Sedalia, Hæmorrhoidal vessels—v. Lymphatica, Lymphatic vessels—v. Nutritia, Vasa vasorum—v. Recta, see Rete testis—v. Resorbentia, Absorbent vessels, Lymphatic vessels.

VASA VASO'RUM, *V. nutrit''ia*. Small vessels that supply larger. However minutely a vessel is traced, its parietes will be found supplied with blood for its nutrition by a smaller vessel.

VASA VORTICO'SA, (F.) *Tourbillon vasculaire*. The contorted vessels which creep on the choroid coat of the eye; ciliary veins.

VASCOA AMPLEXICAU'LIS. A South African shrub, *Nat. Ord.* Leguminosæ, the roots of which taste like liquorice. They are used, in decoction, in catarrh and phtisis, and are a good substitute for liquorice.

VAS'CULAR, *Vascula'ris, Vasculo'sus, Angei'al.* from *vas*, 'a vessel.' That which belongs or relates to vessels;—arterial, venous, or lymphatic; but generally restricted to blood-vessels only. Full of vessels. Bichat gave the name *Vascular system* to the blood-vessels, and of this he made two divisions. 1. The *Arterial system*, or *System of red blood*, (F.) *Système vasculaire à sang rouge*, which commences with the radicles of the pulmonary veins; and includes the pulmonary veins, the left cavities of the heart and the aorta with all its ramifications. The blood, in this system, is distributed to the general capillary system, where it loses its arterial quality and becomes venous. 2. The *Venous system* or *Vascular system of black blood*, (F.) *Système vasculaire à sang noir*, carries the blood from every part of the system to the lungs. It takes its origin in the general capillary system; continues in the veins, right auricle, and ventricle of the heart and the pulmonary artery and its branches, and is finally lost in the capillary system of the lungs. See Circulation.

VASCULAR LAYER, see Tache embryonnaire—v. Radicals, Radical vessels—v. Substance of the Kidney, see Kidney—v. System, intermediate, Capillary system—v. System, peripheral, Capillary system—v. Tumour, see Hæmorrhois.

VASCULAR'ITY. The state of being vascular, or largely supplied with vessels.

VASCULUM, Penis, Vessel.

VAS'CULUM ABER'RANS, *Appendix to the Epidid'ymis*. A small convoluted duct, of variable length, generally connected with the duct of the epididymis, immediately before the commencement of the vas deferens.

*VASE À SAIGNER*, Cup.

VASTUS. That which is *vast* or has a great extent.

VASTUS EXTERNUS and VASTUS INTERNUS are two considerable, fleshy masses, which form part of the Triceps cruris.

VASUM, Vessel.

VATERIA INDICA, see Copal.

VATICINIUM CHIROMANTICUM, Chiromancy.

VAULT, (old F. *Voulte*,) 'a round or turn;' from *volvere, volutum*, 'to turn;' *Fornix, Cam'era*, (F.) *Voûte*. A name given by anatomists to several parts which are rounded superiorly; concave and arched inferiorly,—as the *Vault of the cranium* or the upper part of the skull,—the *Palatine vault* or *roof of the mouth*, &c., &c.

VAUQUELINE, Strychnina.

VEAL TEA. This may be made in the same manner as beef tea, by using a pound of fillet of *veal*, free from fat and sliced, and a pint and a half of *boiling water*; and boiling for half an hour. It may also be made with the same quantity of the fleshy part of a knuckle of veal.

VECORDIA, Idiotism.

VECTIS, Lever—v. Elevatorius, Elevator—v. Triploides, Elevator, triploid.

VEGETARIAN, see Vegetarianism.

VEGETA'RIANISM. Same etymon as Vegetation. A modern term, employed to designate the view, that man, for his full mental and corporeal developement, ought to subsist on the direct productions of the vegetable kingdom, and totally abstain from flesh and blood. An embracer and practiser of this doctrine is called a *vegetarian*.

*VÉGÉTATIF*, Vegetative.

VEGETA'TION, *Vegeta'tio*, 'growing like a plant,' from *vigeo*, 'I flourish.' A morbid part, which rises as an excrescence in syphilis, &c.—as the *Cauliflower excrescence*, &c. The term is also applied to the fleshy granulations or *Hypersarcoses*, which sometimes arise at the surfaces of wounds or ulcers.

VEG''ETATIVE, *Vegetati'vus*, (F.) *Végétatif*, same etymon as the last. Having relation to growth or nutrition; hence, the *vegetative* or nutritive functions.

VEGETATIVE LAYER, see Tache embryonnaire.

VEGETATIVUS, Vegetative.

VE'HICLE, *Vehic'ulum, Oche'ma, Constit'uens*, (F.) *Véhicule*, from *vehere*, 'to carry.' Any thing which serves to carry; thus air is the *vehicle* of sound; the arteries are the *vehicles* of the blood, &c. In *Pharmacy*, the name *vehicle* is given to any excipient; or to substances which serve as the media of administration for any medicine.

*VÉHICULE*, Vehicle.

VEILED PUFF, see Cavernous respiration.

VEIN, *Vena*, diminutive *ven'ula, Phlebs, Phleps*, (F.) *Veine*. The veins are vessels for the conveyance of black blood from every part of the body to the heart. They are found wherever there are arteries, and, altogether, form the *venous system*,

which may be subdivided into two distinct secondary systems. 1. The *General venous system*, which commences in all the organs, by very minute radicles; and terminates in the heart by the vena cava and the coronary vein. 2. The *Abdominal venous system*, which is limited to the abdominal cavity; commences, also, by a great number of branches, and terminates in the liver by a single trunk, which subdivides in that organ. It is called, also, the *System of the Vena Porta*, or the *Portal System*. See Porta. The veins form two sets, one *deep-seated, Venæ satel'lites, V. concom'ites*, which accompany the arteries; the other *superficial* or *subcutaneous*. Their parietes, which are thinner than those of the arteries, are composed of two coats; the one, external, loose, extensible, and with parallel, longitudinal fibres—the *proper membrane;* the other, the *common* or *inner membrane*, which is thin, polished, and has numerous duplicatures or folds forming parabolic valves. These valves are most numerous in the veins of the lower extremities. The coats of the veins are supplied with small arteries or *vasa vasorum*, veins, and lymphatics. They have not as many nervous filaments as the arteries. These filaments are from the great sympathetic.

## TABLE OF THE VEINS.

### I. VEINS WHICH FORM THE SUPERIOR VENA CAVA.

1. Subclavians.
- Receive the 1. Axillary which
  - Receives the 1. Basilic, formed of the
    - 1. Posterior ulnar.
    - 2. Anterior ulnar.
    - 3. Median basilic.
  - 2. Cephalic, forming the
    - 1. Superficial radial.
    - 2. Median cephalic.
  - 3. Circumflex veins.
  - 4. Inferior scapular.
  - 5. Long thoracic.
  - 6. Superior thoracic.
  - 7. Acromial veins.
- 2. External Jugular.
  - Receives the 1. Internal maxillary, composed of the
    - 1. Pterygoid.
    - 2. Spheno-palatine.
    - 3. Alveolar.
    - 4. Infra-orbitar.
    - 5. Mental.
    - 6. Inferior dental.
    - 7. Deep temporal.
  - 2. Superficial Temporal, composed of the
    - 1. Middle temporal.
    - 2. Anterior auriculars.
    - 3. Transverse of the face.
  - 3. Posterior Auricular. The trunk then takes the name of *External Jugular*, and in its course along the neck, receives—
  - 4. Cervical cutaneous.
  - 5. Trachelo-scapular, &c.
- 3. Internal Jugular.
  - Receives
    1. Superior Cerebral Veins.
    2. Veins of the Corpus Striatum.
    3. Veins of the Choroid plexus.
    4. Superior Cerebellar Veins.
    5. Inferior Cerebellar Veins.
    6. Lateral and inferior Cerebral Veins.
  - 7. Ophthalmic Vein, composed of the
    - 1. Lachrymal.
    - 2. Central of the retina.
    - 3. Infra-orbitar.
    - 4. Ciliary.
    - 5. Ethmoidal.
    - 6. Palpebral, and
    - 7. Nasal Veins.
  - 8. Facial Vein, called *angular*, near the eye, receiving the
    - 1. Palpebral, and
    - 2. Superciliary Veins.
    - 3. Dorsals of the nose.
    - 4. Superior, 5. Inferior, Coronaries of the lip.
    - 6. Several Buccal and
    - 7. Masseteric Veins.
    - 8. Ranine,
    - 9. Submental, and
    - 10. Inferior Palatine.
  - 9. Lingual and Pharyngeal Veins.
  - 10. Superior thyroid.
  - 11. Occipital, and
  - 12. Veins of the Diploë.
- 2. Right Internal Mammary Vein.
- 3. Inferior Thyroid Vein, opening into the Vena Cava, between the two Subclavians.

4. Vena Azygos, which receives the
1. Right Bronchial.
2. Intercostal Veins.
3. Semi-azygos.

### 2. VEINS WHICH FORM THE INFERIOR VENA CAVA.

1. Common Iliacs.
- Receive the 1. External Iliacs, formed by the—
  - 1. Femoral or Crural, which is a continuation of the
  - 2. Popliteal, commencing by 3. veins which accompany the fibular arteries, and receiving the—
    - 1. External Saphena and
    - 2. Internal Saphena, which receive—
      1. Several abdominal veins.
      2. Circumflex Iliac, and
      3. External pudic veins.
- 2. Internal Iliacs which receive the—
  - 1. Vesical Veins, commencing with the
  - 2. Sacro-lateral Veins.
    1. Dorsal veins of the penis of the male.
    2. Veins of the clitoris, in the female.
- 3, Middle Sacral Vein.
- 4. Lumbar Veins—four in number on each side, commencing by an—
  1. Abdominal branch.
  2. Dorsal branch.
- 5. Spermatic Veins, commencing with the
  1. Spermatic plexus in the male.
  2. Ovarium, Fallopian tube, &c. in the female.
- 6. Renal Veins.
- 7. Capsular and Adipose Veins.
- 8. Hepatic Veins.
- 9. Middle, 10. Left, and 11. Right Hepatic Veins.
- 12. Inferior Diaphragmatic Veins, two in number

### 3. VEINS OF THE HEART.

1. Great right Coronary.
2. Small right Coronary.
3. Left Coronary Veins.

### 4. VEINS WHICH FORM THE VENA PORTÆ.

1. Splenic Vein.
- Receives the
  1. Veins which correspond to the vasa brevia.
  2. Right and left gastro-epiploic.
  3. Duodenal, and
  4. Pancreatic veins.
  5. Coronary Vein of the Stomach, and
  6. Small mesenteric vein.

2. Superior Mesenteric Vein.

VEIN, BRONCHIAL, LEFT, see Azygos—v. Demi-azygous, see Azygos—v. Frontal, see Facial vein—v. Semi-azygous, see Azygos, (vena)—v. Superior intercostal, left, see Azygos—v. Tibio-malleolar, Saphena, great—v. Palato-labial, Facial vein—v. Peroneo-malleolar, Saphena minor—v. Varicose, Varix.

*VEINE*, Vein—*v. Cave*, Cava vena—*v. Céphalique*, Jugular vein, internal—*v. Céphalique du pouce*, Cephalic vein of the thumb—*v. Cubitale cutanée*, Basilic vein—*v. Fessière*, Gluteal vein—*v. de Médine*, Dracunculus—*v. Porte*, Porta vena *v. Prélombo-thoracique*, Azygos, (vena)—*v. Préparate*, Cephalic vein—*v. Radiale cutanée*, Cephalic vein—*v. Sans paire*, Azygos, vein—*v. Trachélo-sous-cutanée*, Jugular vein, external.

*VEINES ARTÉRIELLES*, Arterial veins—*v. Ciliaires*, Ciliary veins—*v. Sous-clavières*, Subclavian veins—*v. Sus-hépatiques*, Hepatic veins.

VEINS, CORONARY, Cardiac veins—v. Intralobular, Hepatic veins—v. Supra-hepatic, Hepatic veins.

VEINSTONE, Phlebolite.

VELAMEN NATIVUM, Integument.

VELAMENTA BOMBYCINA, Villous membranes—v. Cerebralia, Meninges—v. Infantis, Membranes of the fœtus.

VELAMENTUM ABDOMINALE, Peritonæum—v. Corporis commune, Integument—v. Nativum, Integument.

*VELAR*, Erysimum.

VELLICATION, Tic.

VELOSYNTHESIS, Staphylorraphy.

VELUM, Velum pendulum palati—v. Apophysi vermiformi obtentum, Valvula Vieussenii—v. Interjectum cerebelli, Valvula Vieussenii — v. Medullare anticum, Valvula Vieussenii.

VELUM MEDULLA'RĒ INFERIUS, (F.) *Voile médullaire inférieur.* A name given, by Reil, to the medullary band or strip, by which the cerebellum communicates with the medulla.

VELUM MEDULLA'RĒ POSTE'RIUS seu POSTI'CUS seu SEMILUNA'RĒ, *Val'vula Tari'ni.* The small posterior valve of the cerebellum; a thin medullary plate, situate between the medulla oblongata and vermis inferior, in front of the nodulus.

VELUM PALATI, Velum pendulum palati — v. Palatinum, Velum pendulum palati.

VELUM PEN'DULUM PALA'TI, 'Pendulous veil of the palate.' *Velum, Velum Palati'num, Velum Palati, Velum Pen'dulum, Velum Staphyli'num, Pala'tum pen'dulum, Pen'dulum pala'ti, Claustrum Palati, Soft Palate, Palatum Mollē,* (F.) *Septum Staphylin* (Ch.), *Voile du Palais.* A moveable, soft, and broad septum, attached to the posterior extremity of the palatine arch, and separating the mouth from the pharynx. Its form is nearly quadrilateral. Its *anterior surface* corresponds to the mouth; the *posterior* to the pharynx. Its *superior edge* is fixed to the palatine arch; the inferior is free, floating, and has an appendix at its middle — the *uvula.* The lateral margins of the velum are held down by two folds, separated from each other by a triangular space; these are called the *pillars;* the anterior passes to the base of the tongue, the posterior to the sides of the pharynx. The velum palati is formed of a mucous coat, which contains numerous follicles, and of a muscular stratum, in which are the peristaphylini interni and p. externi muscles, the glossostaphylini, the pharyngo-staphylini and the palato-staphylinus. The arteries of the velum palati are furnished by the internal maxillary, the labial and the superior pharyngeal. Its veins open into the internal jugular. Its nerves are sent off from the ganglion of Meckel, and come from the palatine branches. The glosso-pharyngeal nerve, likewise, sends it some filaments.

VELUM STAPHYLINUM, Velum pendulum palati —v. Vieussenii, Valvula Vieussenii.

VELVET LEAF, Pareira.

VENA, Vein, Penis—v. Alba renum, Ureter—v. Alba thoracis, Thoracic duct — v. Apoplectica, Jugular vein, internal—v. Arteriosa, Porta vena, Pulmonary artery—v. Capitis, Cephalic vein—v. Cava, Cava vena—v. Cubiti interior, Basilic vein —v. Demiazygos, see Azygos—v. Faleis cerebri, Sinus longitudinal inferior — v. Hemiazyga, see Azygos—v. Lactea, Porta vena—v. Magna, Porta vena—v. Medina Arabum, Dracunculus—v. Medinensis, Dracunculus—v. Ostiaria, Porta vena—v. Pari carens, Azygos, (vena)—v. Portalis, Porta vena — v. portarum, Porta vena — v. ad Portas, Porta vena—v. quæ ad Portas est, Porta vena — v. Ramalis, Porta vena — v. sine Pari, Azygos, (vena)—v. Stelechiæa, Porta vena—v. Subalaris, Vena axillaris—v. Terminalis, Circulus venosus.

VENÆ APOPLECTICÆ, Jugular veins — v. Cavæ hepatis, Hepatic veins—v. Centrales, Intralobular veins—v. Concomites, see Vein—v. Galeni, Choroid, (veins)—v. Innominatæ, see Innominatum — v. Intralobulares, Intralobular veins — v. Lacteæ, Chyliferous vessels — v. Lymphaticæ, Lymphatic vessels — v. Micantes, (arteries,) see Artery — v. Pulsatiles, (arteries,) see Artery—v. Satellites, see Vein—v. Soporales, Jugular veins v. Sphagitides, Jugular veins.

VENÆSECTIO, see Blood-letting—v. Revulsoria, see Blood-letting.

VENÆ VORTICO'SÆ. The veins which principally form the external or venous layer of the choroid coat of the eye; so called from their peculiar arrangement; from *vertex* seu *vortex,* 'a whirlpool.'

VENAL, Venous.

VENEFICIUM, Poisoning.

VENENATION, Poison, Poisoning, Venom.

VENENATUS, Venomous.

VENENOSE, Venomous.

VENENUM, Poison, Venom.

VENE'REAL, *Vene'reus, Aphrodisiacus, Vene'rean,* (F.) *Vénérien,* from *Venus,* 'the goddess of pleasure.' That which relates to the pleasures of love. In a more restricted sense, the word *venereal* is synonymous with *syphilitic,* and also with *syphilis.* Some authors have proposed that those diseases should be called *venereal* which are produced by excess in venery; and that *syphilitic* should be limited to those which are the result of impure connexion. It is, also, used in the same sense as aphrodisiac, — adapted to excite venereal desire.

VENEREAL DESIRE, Libido — v. Disease, Syphilis.

*VÉNÉRIEN,* Venereal. This term, also, means one labouring under syphilis; as *Hôpital des vénériens.*

VENERIVAGUS, Libidinous.

VEN'ERY. Same etymon. The pleasures of love. Sexual communication. Coition.

VENESECTION, see Blood-letting.

*VENIMEUX,* Venomous.

*VENIN,* Venom.

VENOM, *Vene'num, Tox'icum, Venena'tion,* (F.) *Venin.* A poisonous fluid secreted by certain animals, as the viper, in a state of health, and which they preserve in a particular reservoir, to use as a means of attack or defence. It differs, according to some, from *virus,* as the latter is always the result of a morbid process, which may be produced by the individuals who receive it, in their turn, and be transmitted to others.

VENOM, QUICKENING, Sperm—v. Vital, Sperm.

VEN'OMOUS, *Venena'tus, Ven'enose,* (F.) *Venimeux.* An epithet applied to animals which have a secretion of venom, as the viper, rattlesnake, &c.; and, by some, to liquids in the animal body, which have been so perverted by previous disease, that their contact occasions serious mischief in sound individuals; as happens in hydrophobia. Virus is more commonly used in this ease.

VENOSITAS, Venosity — v. Sanguinis, Prædominium sanguinis venosi.

VENOS'ITY, *Venos'itas, Ve'nousness, Venous state, Venous cachex'ia, Melanœ'mia, Melano'sis universa'lis,* from *vena,* 'a vein.' A condition in which, it has been supposed, the blood is moved slowly; is more venous; and the venous blood itself in greater quantity. This state is said to be chiefly observed in hemorrhoids, gout, hypochondriasis, melancholia, &c. — Puchelt.

VENOUS, *Venal, Veno'sus.* Same etymon. Appertaining to a vein, or to the blood of the veins; as *venous* cachexia, *venous* pulse.

VENOUS CACHEXIA, Venosity — v. Hum, *Bruit de Diable* — v. State, Venosity — v. System, abdominal, Porta vena — v. System, see Vascular.

VENOUSNESS, Venosity.

*VENT,* Wind.

VENTER, Abdomen, Belly, Uterus. In law, venter designates the maternal parentage of children. Thus, if A were B's child by his first wife, he would be described in law as "by the first

*venter*." "A died seised, leaving two infant daughters by different *venters*."

VENTER IMUS, Abdomen, Hypogastrium, Neiæra — v. Inferius, Abdomen — v. Infimus, Abdomen—v. Magnus, Ingluvies—v. Medius, Thorax —v. Parvus, Hypogastrium—v. Propeudens, Hysteroloxia anterior—v. Renum, Pelvis of the kidney — v. Supremus, Cavum cranii.

*VENTEUX*, Windy.

VENTILA'TION, *Ventila'tio*, from *ventus*, 'wind.' The act of renewing the air of vessels, hospitals, and apartments, or of situations where many people are collected together. The utility of such renewal must be evident, when it is considered that atmospheric air loses its oxygen during respiration, and that carbonic acid supplies its place. Stagnant air, also, becomes loaded with numerous impurities; and hence one of the greatest hygienic improvements, of modern times, has been a proper attention to circulation of air. It is, moreover, one of the most valuable additions to our stock of therapeutical agencies in many diseases.

Instruments used for the purpose of renewing the air, in ships, apartments, &c., have been called *ventilators*.

*VENTOSITÉ*, Flatulence.

VENTOSITY, Flatulence.

*VENTOUSES SCARIFIÉES*, Cupping with the scarificator.

*VENTOUSES SÈCHES*, Cupping, dry.

VENTRAL, Abdominal.

VENTRAL HER'NIA, *Her'nia ventra'lis*. Direct hernia occurring in any part of the abdomen. It is most frequently found between the recti muscles.

VENTRALE, Belt (Russian).

VENTRALE CUTA'NEUM, 'Cutaneous apron.' (F.) *Tablier*. An elongation of the nymphæ in the Bosjesman female, which hangs down before the vulva like an apron.

*VENTRE*, Abdomen—*v. Inférieur*, Abdomen —*v. Resserré*, Constipation.

VENTRE INSPICIENDO DE, see De ventre inspiciendo.

VEN'TRICLE, *Ventric'ulus*, diminutive of *venter*, 'belly.' Literally, a *little belly*. A name given, in anatomy, to various parts.

VENTRICLE OF ARAN'TIUS. A small cavity, lined with gray substance, at the point of the calamus scriptorius.

VENTRICLES OF THE BRAIN, *Ventric'uli* seu *Cavita'tes* seu *Sinus Cer'ebri*, (F.) *Ventricules du cerveau*, are five cavities in the interior of that organ, which are distinguished into the *lateral ventricles*, *middle ventricle*, *fourth ventricle* or *ventricle of the cerebellum*, and *fifth ventricle*. The *middle ventricle* or *third ventricle*, (F.) *Ventricule moyen du cerveau*, is situate in front of the pineal gland. It is bounded, *above*, by the tela choroidea and the fornix; *below*, by a portion of cerebral substance, which separates it from the base of the cranium; *laterally*, by the thalami nervorum opticorum; *anteriorly*, by a medullary cord, called the *anterior commissure*; and, *posteriorly*, by another medullary cord, called the *posterior commissure*. It communicates with the lateral ventricles by two openings, situate behind the anterior pillar or crus of the fornix. The *Lateral ventricles*, *Ventric'uli latera'les*, *V. magni*, *V. majo'res*, *V. prio'res*, *V. superio'res*, *V. tricor'nes*, (F.) *Ventricules latéraux*, are two in number. They are large, and, owing to their considerable curvature, occupy a great part of the cerebral centre. They are bounded, *above*, by the inferior surface of the corpus callosum; *anteriorly*, by the curved portion of the same body; *posteriorly*, by a considerable mass of cerebral substance; and, *internally*, they are separated from each other by the septum of the ventricles, — a medullary plate, which is given off from the lower part of the corpus callosum. The lateral ventricles have, in their upper and anterior portion, the *Corpora striata*, *Thalami optici*, and *Tænia semicircularis*: — their inferior portion contains the *corpus fimbriatum*, *cornu Ammonis*, &c. The *Fourth ventricle*, *Ventriculus cerebelli* seu *quartus*, *V. Aran'tii*, *Sinus rhomboï'deus*, (F.) *Quatrième ventricule*, is situate beneath the *aqueduct of Sylvius*, by which it communicates with the third ventricle. It extends from this aqueduct to the upper part of the medulla; and is seated in the substance of the tuber annulare. The *Fifth ventricle*, *Ventric'ulus septi pellu'cidi*, *Incisu'ra septi*, (F.) *Cinquième ventricule*, is the small serous cavity between the laminæ of the septum lucidum; called, also, *Fissure* or *Fossa of Sylvius* or *Sinus of the septum lu'cidum*.

VENTRICLES OF THE HEART, *Ventric'uli cordis*, *Specus cordis*, (F.) *Ventricules du cœur*, are two in number. The *Right ventricle*, *Pulmonary ventricle*, *Ventric'ulus anterior*, *V. primus*, *V. pulmona'lis*, (F.) *Ventricule droit* ou *pulmonaire*, is situate at the fore-part of the heart, the base and apex corresponding to those of the heart. In it are seen the *Columnæ carneæ* and *Cordæ tendineæ*. The right ventricle communicates with the right auricle by the *Ostium venosum*, and from it the *Pulmonary artery* arises. Around the auricular orifice is a tendinous margin or ring, from which the tricuspid valve is given off. The use of the ventricle is to send the blood, by its contraction, along the pulmonary artery to the lungs. The *Left ventricle*, *Ventric'ulus aor'ticus*, *V. posterior*, *V. secundus*, (F.) *Ventricule gauche* ou *aortique*, is situate at the posterior and left part of the heart. Its parietes are much thicker and stronger than those of the right, owing to its having to send the blood over the whole system. The inner surface has the same general appearance as that of the right. The *Columnæ carneæ* and *Cordæ tendineæ* are, however, much stronger. It communicates with the left auricle by means of the *Mitral valve*; and from it proceeds the largest blood-vessel of the body — the aorta.

VENTRICLES OF THE LARYNX, *Sac'culi laryngei*, *Sinuses of the larynx*, (F.) *Ventricules* ou *Sinus du larynx*, are two depressions in the larynx, comprised between the superior and inferior ligaments.

VENTRICLE, PULMONARY, V. right.

*VENTRIC'ULAR*, *Ventricula'ris*. Same etymon as Ventricle. Relating to a ventricle.

*VENTRICULE AORTIQUE*, Ventricle, left — *v. Cinquième*, Ventricle, fifth — *v. Droit*, Ventricle, right—*v. Gauche*, Ventricle, left—*v. Moyen du Cerveau*, Ventricle, middle, of the brain — *v. Pulmonaire*, Ventricle, right—*v. Quatrième*, Ventricle, fourth.

*VENTRICULES DU CERVEAU*, Ventricles of the brain — *v. du Cœur*, Ventricles of the heart—*v. Latéraux*, Ventricles, lateral.

VENTRICULI CORDIS, Ventricles of the heart — v. Dilatatio, Gastrectasis — v. Dissolutio, Gastro-malacia — v. Duræ matris, Sinuses of the dura mater — v. Emollitio, Gastro-malacia — v. Exulceratio, Gastrelcosis — v. Fluxus, Gastrorrhœa — v. Inflammatio, Gastritis — v. Laterales, see Ventricles, lateral of the brain — v. Magni, Ventricles, lateral, of the brain—v. Majores, Ventricles, lateral—v. Metamorphosis gelatiniformis, Gastro-malacia—v. Perforatio, Gastro-brosis—v. Priores, Ventricles, lateral — v. Pseudophlogosis resolutiva et colliquativa, Gastro-malacia — v. Superiores, Ventricles, lateral — v. Tricornes, Ventricles, lateral — v. Ulceratio, Gastrelcosis.

VENTRICULUS, Stomach, Ventricle—v. Anterior, Ventricle, right — v. Aorticus, Ventricle, left—v. Arantii, see Ventricles of the brain.

VENTRICULUS CALLOSUS, 'Callous stomach.' The *gizzard* or *third stomach* of the gallinaceous bird. It consists of a double-bellied or *digastric* muscle; is lined by a firm cuticle, and forms a kind of pouch, depending from the alimentary tube, in which the second stomach terminates, and from which the duodenum or *Ventriculus succenturiatus* issues. In the interior of the gizzard there are numerous pebbles, which seem to be destined to aid in the trituration of the food. The gizzard is an organ of mastication, and is possessed of great muscular power.

VENTRICULUS CEREBELLI, see Ventricles of the brain — v. Posterior, Ventricle, left — v. Primus, Ventricle, right — v. Pulmonalis, Ventricle, right — v. Quartus, see Ventricles of the brain — v. Secundus, Ventricle, left—v. Septi Pellucidi, see Ventricles of the brain—v. Succenturiatus, Duodenum.

*VENTRILOQUE*, Engastrimythos.

VENTRILOQUISM, see Engastrimyth.

VENTRILOQUIST, Engastrimythos.

VENTRILOQUY, see Engastrimyth.

VENTROSITAS, Physconia.

VENTUS, Wind.

VEN'ULA, *Phlebion*, diminutive of *Vena*. See Vein. A small vein. Hippocrates seems to use it in the same sense as *Arteria*.

VENULÆ CENTRALES, Intralobular veins —v. Intralobulares, Intralobular veins.

VENUS, Clitoris, Coition, Cuprum—v. Crystals of, Cupri subacetas — *v. Crystaux de*, Cupri subacetas.

*VER CUCURBITAIN*, Tænia solium — *v. Cutané*, Dracunculus — *v. Filaire*, Dracunculus—*v. de Guinée*, Dracunculus—*v. Luisant*, Cicindela —*v. de Médine*, Dracunculus—*v. Solitaire*, Bothriocephalus latus, Tænia solium.

VERATRIA, Veratrina.

VERATRI'NA, *Vera'tria*, *Ver'atrine*. A vegetable alkali, found in the seeds of *Vera'trum sabadil'la*, *V. officina'lē*, *Helo'nias officina'lis*, and *Asagræ'a officina'lis*, which are known in commerce under the names *Cebadill'a*, *Cevadill'a*, and *Sabadill'a*, and are imported from Mexico. They usually occur, in commerce, mixed with the fruit of the plant, are two or three lines long, of a black colour, and are shining, flat, shriveled, winged, and elastic seeds. *Veratrine* is solid, white, pulverulent, and inodorous; of a very acrid taste; decomposable by heat; very soluble in water, and soluble in alcohol. When prepared in the usual manner, it still contains other substances, — *Sabadil'lin*, *Ver'atrin*, gum resin of the sabadilla, and black greasy matter. It is extremely poisonous, and but little used internally in medicine. Magendie has given it as an emetic and drastic in very small doses. It has been recommended to be applied in the way of friction, or endemically, (from gr. v to xx to ʒj of lard or cerate,) in various neuralgic affections. The following is the formula for its preparation in the Pharmacopœia of the United States:—Take of *cevadilla*, ℔ij; *alcohol*, 2 gallons; *sulphuric acid*, *solution of ammonia*, *purified animal charcoal*, and *magnesia*, each a sufficient quantity. Boil the cevadilla in a gallon of the alcohol, in a retort with a receiver attached, for an hour, and pour off the liquor. To the residue add another gallon of the alcohol, together with the portion recently distilled; again boil for an hour, and pour off the liquor. Repeat the boiling a third time with the remaining alcohol, and with that distilled in the previous operation. Press the cevadilla, mix and strain the liquors, and, by means of a water-bath, distil off the alcohol. Boil the residue three or four times in water acidulated with sulphuric acid, mix and strain the liquors, and evaporate to the consistence of syrup. Add magnesia in slight excess, shake the mixture frequently, then express and wash what remains. Repeat the expression and washing two or three times, and having dried the residue, digest it with a gentle heat several times in alcohol, and strain after each digestion. Distil off the alcohol from the mixed liquor, boil the residue for fifteen minutes in water with a little sulphuric acid and purified animal charcoal, and strain. Having thoroughly washed what remains, mix the washings with the strained liquor, evaporate with a moderate heat to the consistence of syrup, and then drop in as much solution of ammonia as may be necessary to precipitate the veratria. Lastly, separate and dry the precipitate. See Colchicum autumnale.

VERA'TRUM ALBUM, *Helleb'orus albus*, *Elleb'orum album*, *Elleborus albus*, *Cherbachem*, *White hellebore*, (F.) *Hellébore blanc*. *Sex. Syst.* Polygamia Monœcia. *Nat. Ord.* Melanthaceæ (Lindley.) The root or rhizoma of this common European plant is indebted to the veratrine for its properties. It is inodorous; has a bitterish, acrid, nauseous taste, and is violently emetic and purgative, even when applied to an ulcerated surface. It is, also, possessed of errhine properties, and acts, externally, as a stimulant. It is rarely exhibited internally. Sometimes it is given as a *sneezing powder*; but it operates with great violence. It forms, also, an itch ointment. See Ung. Veratri.

VERATRUM LUTEUM, Chamælirium luteum.

VERATRUM SABADIL'LA, *Sabadilla*, *Sabatilla*, *Canis Interfec'tor*, *Caus'ticum America'num*, *Cevadil'la Hispano'rum*, *Sevadilla*, *Hor'deum caus'ticum*, (F.) *Cévadille*. The seeds of this plant have been used, mostly as anthelmintics. Dose, gr. ij to a child, four years old. It possesses the same general properties as the veratrum album.

VERATRUM VIR'IDĒ, *American Hellebore*, *Swamp hellebore*, *Indian poke*, *Indian Uncas*, *Poke weed*, *Bear weed*, *Itch weed*, *Tickle weed*, *Earth gall*, *Devilbit*, *Wolfbane*, *Puppet root*, is indigenous in the swampy districts of almost every part of the United States. Its properties are like those of the genus.

VERBASCULUM, Primula veris.

VERBASCUM ALBUM, V. thapsus — v. Alatum, V. thapsus — v. Collinum, V. thapsus — v. Crassifolium, V. thapsus—v. Elongatum, V. thapsus—v. Lychnitis, V. thapsus—v. Montanum, V. thapsus.

VERBAS'CUM NIGRUM, *Black Mullein*, *Cande'la re'gia*, *Thapsus barba'tus*, *Tapsus barba'tus*, *Candela'ria*, *Lana'ria*; and VERBAS'CUM THAPSUS, *V. thapsoï'des* seu *ala'tum* seu *colli'num seu album* seu *crassifo'lium* seu *elonga'tum* seu *Lychni'tis* seu *monta'num* seu *simplex*, *Phlogmus*, *Phlomus*, *Phlox*, *great broad-leaved Mullein*, *High Taper*, *Cow's Lungwort*, or *Yellow Mullein*, (F.) *Molène*, *Bouillon blanc*; *Family*, Solaneæ; *Sex. Syst.* Pentandria Monogynia,—especially the latter,—have been used as emollient, applied externally in the form of fomentation. The large leaves have been chosen for this purpose. Occasionally, the mucilage which they contain has been extracted by decoction or infusion, and administered in pectoral affections.

VERBASCUM SIMPLEX, V. thapsus — v. Thapsoides, V. thapsus — v. Thapsus, see V. nigrum.

VERBE'NA HASTA'TA, an American species, is more bitter than the European, and said to be emetic.

VERBE'NA OFFICINA'LIS, *Verbena*, *Dichro'mos*,

*Verbena'ca, Periste'rium, Hierobo'anē, Herba sacra, Vervain, Purvain,* (F.) *Verveine. Family,* Pyrenaceæ. *Sext. Syst.* Diandria Monogynia. A plant formerly held sacred; used in sacrifices, and suspended round the neck as an amulet. In the form of cataplasm, it is said to have relieved obstinate headachs, and to have been of service in scrofula. It is not used.

VERBE'NA URTICIFO'LIA, an indigenous species, has been used in poisoning from Rhus Toxicodendron.

VERBENACA, Verbena officinalis.

VERBESINA ACMELLA, Spilanthus Acmella.

VERBUS, Penis.

*VERCOQUIN, Phreni'tis vermino'sa.* A form of phrenitis, attributed to the presence of a worm in the brain!

*VERDET,* Cupri subacetas.

VERDIGRIS, Cupri subacetas.

VERENDA, Genital organs.

VERETRUM, Penis.

*VERGE,* Penis — *v. d'Or,* Solidago virgaurea.

*VERGERETTE DE PHILADELPHIE,* Erigeron Philadelphicum.

*VERGETURES,* Vibices.

VERJUICE, *Ompha'cium,* (F.) *Verjus, Verdjus.* A sour kind of grape. Also, an acid liquor, prepared from very sour grapes or crab-apples. It is principally used in culinary preparations; although, occasionally, an ingredient in medicinal compounds. See Vitis vinifera.

*VERJUS,* Verjuice.

VERMES, Worms—v. Cerebri, Choroid plexus.

*VERMICULAIRE BRULANTE,* Sedum.

VERMICULAR, Vermiform.

VERMICULARIS, Lumbricalis, Sedum.

VERMICULI SPERMATICI, Spermatozoa.

VERMIC'ULUM, *Vermye'ilum.* An elixir; a tincture. — Ruland and Johnson.

VERMICULUS CAPILLARIS, Dracunculus.

VER'MIFORM, *Vermic'ular, Vermicula'ris, Vermifor'mis,* from *vermis,* 'a worm,' and *forma,* 'form.' That which resembles a worm.

VERM'IFORM PROC''ESSES, *Proces'sus Vermiform'es, Protuberan'tiæ vermiformes, Montic'uli cerebel'li, Appen'dices vermiformes, Vermis, Worm,* (F.) *Éminences vermiformes du cervelet,* are two medullary projections, at the surface of the cerebellum. The *superior vermiform process, Vermis superior cerebelli,* is an elongated projection, at the anterior and middle part of the superior surface of the cerebellum; — and the *inferior vermiform process, Vermis inferior cerebelli, Pyr'amid of Malacarne,* is a somewhat large projection, situate in the depression at the inferior surface of the same organ. The inferior vermiform process is usually described as consisting of three portions—the *pyramid,* the *uvula,* and the *nodulus.* The anterior portion of the superior vermiform process is elevated, and termed *Montic'ulus.*

VERMIFUGE, Anthelmintic.

VERMIFUGE, MATHIEU'S. This consisted of two distinct electuaries; the one for killing, the other for expelling tape-worm. The former is made of an ounce of *tin filings,* and six drachms of *fern root.*

VERMIFUGUS, Anthelmintic.

VERMILION, Hydrargyri sulphuretum rubrum.

*VERMILLON DE PROVENCE,* Antimonii sulphuretum rubrum.

VERMINATIO, Helminthiasis.

VERMINATION, CUTANEOUS, Malis.

*VERMINEUX,* Verminous.

VERM'INOUS, *Vermino'sus,* (F.) *Vermineux.* That which is caused by worms; as a *verminous affection.*

VERMIS, Vermiform processes — v. Bombycinus, Cornu ammonis — v. Cerebelli, Vermiform process—v. Cerebri, Fever, Hungary—v. Cucurbitinus, Tænia solium — v. Digiti, Paronychia.

VERMITIO, Helminthiasis.

VERNIX CASEO'SA, 'cheesy varnish.' The fatty varnish, or deposit, often found on the fœtus, which is secreted by the sebaceous follicles of the skin.

VERNIX SICCA, Sandarac.

VERNO'NIA ANTHELMIN'TICA, *Ascari'cida anthelmin'tica, Calagirah, Calageri.* A plant which is indigenous in India. *Family,* Compositæ. *Sex. Syst.* Syngenesia Polygamia superflua. It has great celebrity in the East Indies, and is a bitter tonic; but the seeds are chiefly used as an anthelmintic, in cases of ascarides and lumbrici in children.

VERNO'NIA NOVEBORACEN'SIS, *Iron weed, Flat top;* an indigenous plant; whose purple flowers appear in August and September, is reported to possess cathartic properties.

*VÉROLE,* Syphilis — *v. Petite,* Variola — *v. Petite volante,* Varicella.

*VÉROLETTE,* Varicella.

VERONI'CA, *Veronica officina'lis* seu *Tournefor'tii, Veronica mas, Thea German'ica, Beton'ica Pauli, Chamæ'drys, Male Veronica, Fluellin, Official Speedwell,* (F.) *Véronique, Thé d'Europe. Family,* Rhinanthodeæ. *Sex. Syst.* Diandria Monogynia. This plant was once used as a pectoral.

VERONICA AQUATICA, V. beccabunga.

VERONICA BECCABUN'GA, *Beccabunga, Anagal'lis aquat'ica, Laver German'icum, Veronica aquat'ica, Cepæ'a, Water Pim'pernel, Brooklime, Brooklime Speedwell, Water Speedwell, Neckweed, Water Purslain,* (F.) *Véronique cressonée.* This plant was formerly used in a variety of diseases. It is, however, almost insipid and inodorous; and has been long banished from practice.

VERONICA MAS, Veronica — v. Officinalis, Veronica.

VERONICA PEREGRI'NA, *Neckweed, Purslain, Speedwell;* indigenous; flowering from April to June, is given internally in scrofulosis, and is applied as a wash to scrofulous tumours.

VERONICA PURPUREA, Betonica officinalis — v. Tournefortii, Veronica — v. Virginica, Leptandra Virginica.

*VÉRONIQUE,* Veronica—*v. Cressonée,* Veronica beccabunga.

*VERPA,* Penis.

*VERRE,* Vitrum — *v. d'Antimoine,* Antimonii vitrum.

VERRU'CA, diminutive *Verru'cula, Ecphy'ma verruca, Phymato'sis verruco'sa,* a *Wart,* (F.) *Verrue.* A small, hard, mamillary tumour, which forms at the surface of the skin, and particularly on that of the hands and face. Warts are generally rugous at the surface, and broad at the base; their roots being implanted in the derma by whitish filaments, which are dense, semifibrous, and very numerous.

Warts may be destroyed by caustic, or removed by excision. Their vitality is, generally, not great.

VERRUCA CARNOSA, Condyloma — v. Formicaria, Formica — v. Minor, Thymion — v. Palpebrarum, see Hydatid — v. Pensilis, Acrochordon — v. Rhagoïdea, Thymion.

VERRUCARIA, Calendula officinalis, Heliotropium Europæum.

VERRUCOSE, Warty.

VERRUCOUS, Warty.

VERRUCULA, Verruca.

*VERRUE,* Verruca.

*VERS,* Worms.

VERSE-CHARMS, see Charm.

VERSIO, Turning — v. Fœtûs, Turning — v. Spontanea, Evolution spontaneous — v. Uteri, Hysteroloxia.

*VERSION*, Turning.

*VERT-DE-GRIS*, Cupri subacetas.

VERTEBRA DENTATA, Axis — v. Dorsi Prima, Lophia — v. Lumborum Prima, Asphaltites — v. Magna, Sacrum.

VER'TEBRÆ, *Spon'dyli*, (F.) *Vertèbres;* from *vertere*, 'to turn.' This name has been given to the bones, which by their union form the vertebral or spinal column. The vertebræ are short, thick, very angular bones; twenty-four in number, and situate one above another. The *body—centrum*, of Owen—of the vertebra is the middle and anterior portion. Above and below it is articulated, by means of a fibro-cartilage, with the contiguous vertebræ. The *Processes*, (F.) *Masses apophysaires*, of each vertebra are:—1. The *spinous process*, situate behind, and in the median line. 2. The two *transverse processes*, standing off from each side. 3. The *four articular* or *oblique processes—zygapophyses*, of Owen—two *superior*, and two *inferior*—which serve to unite the vertebræ with each other. These transverse and articulating processes are made continuous with the lateral and posterior parts of the body of the vertebra by narrow bony portions or pedicles, on each of which are notches. These, by their union with similar notches in the contiguous vertebra, form the lateral foramina, (F.) *Trous de conjugaison*, through which the spinal nerves leave the vertebral canal. The different processes are united with each other, so as to form a kind of ring of the lateral and posterior parts of the vertebra; and the foramen, within this,—that is, between the body and processes,—concurs in forming the vertebral canal. The vertebræ have particular characters, according to the regions they occupy. They are divided into seven *cervical*, twelve *dorsal*, and five *lumbar*. The first cervical is called *atlas;* the second, *axis* or *vertebra dentata;* and the seventh, *vertebra proëminens*. The vertebræ are articulated with each other. Those of the back are joined, moreover, to the ribs. The first or atlas is articulated with the occipital bone; and the last lumbar vertebra with the sacrum. The cervical vertebræ are developed by nine points of ossification; the dorsal and lumbar by eight.

VER'TEBRAL, *Vertebra'lis*. That which relates or belongs to the vertebræ.

VERTEBRAL ARTERY, *Posterior cerebral artery*, (Ch.,) is the largest of the branches of the subclavian. It arises from the posterior part of that vessel; is lodged in a canal, (F.) *Petit canal vertébral*, formed by the foramina in the transverse processes; enters the cranium, and proceeds to anastomose with its fellow of the opposite side, and to form the *Basilary artery*. Besides the branches sent to the neck, the vertebral artery gives off the *anterior* and *posterior spinal arteries*, and the *inferior cerebellous*, in the cavity of the cranium.

VERTEBRAL COLUMN, *Rachis*, *Rhachis*, *Notos*, *Acnes'tis;* the *Spine;* the *back bone*, *Cari'na*, *C. hom'inis*, *Spina dorsi* seu *vertebra'lis*, *Colum'na spina'lis*, *C. vertebra'lis*, *C. dorsi*, *Spina Dorsum*, *Tergum*, *Compa'ges Vertebra'rum*, *Acan'tha*, *Sacra fis'tula*, *Hi'era Syrinx*, (F.) *Colonne vertébrale*, *Épine du dos*, *Échine*. A kind of bony column, situate at the posterior and central part of the trunk; extending from the head to the sacrum; flexible in every direction, yet very solid and hollowed by a canal called *vertebral*, which gives it lightness without diminishing its strength, and runs through its whole length. The vertebral column is formed by the superposition of the vertebræ. It represents a pyramid, whose base is below. Anteriorly, it is convex in the neck; concave in the back, and convex, again, in the loins. Behind, the curvatures are of course the reverse of these. There is also, in the dorsal region, a lateral curvature, the concavity of which is towards the left side. Considered as a whole, the vertebral column has an *anterior* or *prespinal* surface; a *posterior* or *spinal;* two *lateral;* a *base;* and an *apex* or top. In the nomenclature of Chaussier, the anterior surface, in the neck, is called *trachelian;* in the back, *predorsal;* and in the loins, *prelumbar*. The dorsal surface has, at its middle, the spinous processes; and, at its sides, the *vertebral gutters*, (F.) *Gouttières vertébrales*, formed by the succession of the *vertebral plates*, (F.) *Lames vertébrales*, which, by their junction, constitute the spinous processes. These are filled by the sacro-spinalis muscle. The sides or lateral surfaces present the foramina resulting from the union of the *vertebral notches*, (F.) *Échancrures vertébrales*. These are called *vertebral foramina*, (F.) *Trous de conjugaison*, and give passage to the *vertebral nerves*. The base of the vertebral column is oblique, to unite with the sacrum; and forms with it an angle, called *sacro-vertebral angle* or *promontory*. The *apex* or *top* of the vertebral column is articulated with the occipital bone. Sometimes, the term *vertebral column* includes the whole of the column from the occipital bone to the extremity of the coccyx. The *Vertebral* or *Spinal Canal*, *Rachid'ian Canal*, *Solen*, *Cana'lis medullæ Spina'lis*, *Specus pro medull'a Spina'li* seu *vertebra'lis*, exists through the whole of the vertebral column, whose curvatures it follows. It is continuous, above, with the cranium; below, with the sacral canal, if we consider the vertebræ to terminate at the sacrum. It is lined by a prolongation of the meninges, forming the *Theca vertebra'lis*, and lodges the spinal marrow.

The vertebral column, which unites lightness with solidity, serves to support the head and chest. It is the seat of all the movements of the trunk, the weight of which it transmits to the pelvis. It lodges and protects the spinal marrow, and gives passage to the vertebral nerves, and to numerous vessels.

VERTEBRAL DISEASE, *Rachial'gia* (of some,) *Caries of the Ver'tebræ*, *Spondylarthroc'acē*, *Spondyloc'acē*, *Kypho'sis inflammato'ria*, *K. paralyt'ica*, *Gibbos'itas cario'sa*, *Ca'ries vertebra'rum*, *Spondylal'gia*, *Spondylopyo'sis*, *Tuberculo'sis Vertebra'rum*. The spinal column is liable to distortion, (see Hump,) at times, without the vertebræ being much, if at all, diseased. At other times, a more formidable affection is induced; the vertebræ becoming carious, and the intervertebral cartilages ulcerated; followed by a more or less complete loss of power over the lower extremities. In such case, on examining the spine, one or more of the spinous processes is found to project beyond the rest. The disease was first well described by Mr. Percival Pott; and, hence, it has been called, by the French, *Maladie de Pott*, (*Malum Pot'tii*, *Gibbus Pot'tii*, or *Pott's disease*.) It usually occurs in scrofulous subjects, and the treatment consists in establishing a counter-irritation by blisters, issues, or the moxa, opposite the transverse processes of the diseased vertebræ. The sore must be suffered to remain open and the patient kept in the horizontal posture until the use of the limbs is recovered; employing tonics, the free admission of fresh air, &c., at the same time.

VERTEBRAL LIG'AMENTS, (F.) *Ligaments vertébraux*, *Surtouts ligamenteux de la colonna ver-*

*tébrale*, are distinguished into *anterior* and *posterior*. They consist of long, ligamentous coverings; the *anterior* occupying the anterior part of the vertebral column; and the *posterior* seeming to arise from the occipito-axoid ligament, and seated behind the bodies of the vertebræ, from the axis to the sacrum.

VERTEBRAL NERVE, Trisplanchine.

VERTEBRAL NERVES, *Spinal Nerves*, spring successively from the spinal marrow; from its origin to its termination. These nerves—30 pairs in all—arise by two roots; one *anterior*, from the *anterior* or *an'tero-lat'eral column* of the spinal marrow, and the other *posterior*, from the *posterior column*, and afterwards issue by the vertebral and sacral foramina. Each of these roots seems to have a distinct function; the *posterior* being destined to convey sensation to parts; the *anterior*, motion. On the posterior root, before its junction with the anterior, there is a ganglion. Of the 30 pairs, 7 are *cervical nerves*, 12 *dorsal*, 5 *lumbar*, and 6 *sacral*. See Nerves.

*VERTÈBRES*, Vertebræ.

VERTEBRODYMIA, see Somatodymia.

VERTEBRO-ILIAC LIGAMENT, Ileo-lumbar ligament.

VERTEX, *Cor'yphē*, *Acrori'a*, *Spon'dylus*. The top or highest part of the head. See Sinciput.

VERTEX CORDIS, Mucro Cordis — v. Cubiti, Olecranon — v. Palpitans, Fontanella.

VERTIBULUM, Trepan.

VERTICULA, Articulation.

VERTICULUM, Articulation.

VERTICULUS, Articulation.

*VERTIGE*, Vertigo.

VERTIG"INOUS, *Vertigino'sus*, (F.) *Vertigineux*. Relating or pertaining to vertigo. Giddy.

VERTI'GO, from *vertere*, 'to turn;' *Dinos*, *Ilin'gos*, *Gid'diness*, *Diz'ziness*, *Dinus verti'go*, *Hallucina'tio vertigo*, *Autal'gia vertigo*, *Circumgyra'tio*, *Swimming of the head*, (F.) *Vertige*, *Étourdissement*. A state in which it seems that all objects are turning round; or that the individual himself is performing a movement of gyration. Two varieties have been designated; — *simple vertigo*, where the objects are seen; and *scotodynia*, in which the sight is obscured, and the individual often falls. Vertigo is dependent upon the condition of the brain; and often announces an attack of apoplexy or epilepsy.

VERTIGO TENEBRICOSA, Scotodynia.

VERUGAS (S.), from *verruca*. A peculiar disease affecting certain localities of Peru, which manifests itself by sore-throat, pains in the bones, and other febrile symptoms. In the course of a few days, an eruption of red pimples or boils appears. These sometimes increase in magnitude till they become nearly as large as an egg, and discharge blood copiously. It is ascribed to the water of certain springs in the valleys, and especially in that of Surea: called *Agua de Veruga*. — Tschudi.

VERUMONTANUM, Gallinaginis caput.

VERVAIN, Verbena officinalis.

*VERVEINE*, Verbena officinalis.

VESA'NIA, *Vesa'niæ*, 'madness.' Derangement of the intellectual and moral faculties, without coma or fever. Many nosologists have used this as a generic term; under which they have included the different species of mental alienation, hypochondriasis, somnambulism, and even hydrophobia. See Nosology.

VESANIA MANIA, Mania.

VESANIÆ, Insanity.

VESICA BILIARIA, Gall-bladder—v. Cordis, see Pericardium—v. Fellea, Gall-bladder—v. Intestinales, Vesicula umbilicalis—v. Prostatica, see Ejaculatory Ducts — v. Saccata, Stricture of the urinary bladder — v. Urinaria, Urinary bladder.

VESICÆ IRRITABILITAS, Cysterethismus — v. Unguinosæ tendinum, Bursæ mucosæ.

VES'ICAL, *Vesica'lis*, from *vesica*, 'the bladder.' That which belongs or relates to the bladder.

VESICAL ARTERIES vary in number and origin. The umbilical artery always sends off two or three: the middle hemorrhoidal, internal pudic, and obturator furnish others, which ramify and anastomose in the parietes of the bladder; the hypogastric furnishes one which is somewhat larger, the *Vesico-prostatic* (Ch.), and proceeds to the *bas-fond* of the bladder, sending numerous ramifications to it as well as to the surrounding parts.

VESICAL GANGLIA, see Spermatic Ganglion — v. Triangle, see Urinary Bladder.

VESICAL VEINS, much more numerous than the arteries, open into the hypogastric plexus.

VESICANT, Blister, Epispastic.

VESICARIUM, Ovarium.

VESICA'TION, *Vesica'tio*; same etymon, (F.) *Vésication*. The action of a vesicant. The formation of blisters.

*VÉSICATOIRE*, Blister — *v. Magistral*, Magistral.

VESICATORIUM, Blister.

VESICLE, Vesicula—v. Allantoid, Allantois—v. Blastodermie, see Molecule — v. Cowpox, see Vaccination.

VESICLE OF DEVELOPMENT, *V. of Evolution*. A vesicle or cyst concerned in histogeny.

VESICLE OF EVOLUTION, V. of Development — v. Germinal, see Molecule — v. Purkinjean, see Molecule — v. Umbilical, Vesicula umbilicalis.

VESICLES OF DE GRAAF, Folliculi Graafiani.

VES'ICO-VAG"INAL, *Vesi'co-vagina'lis*. Relating to the bladder and the vagina; as *vesico-vaginal fistula*.

VESIC'ULA, *Cystinx*, *Ves'icle*; diminutive of *vesica*, 'a bladder.' A small bladder or cyst.

VESICULA, *Ves'icle*, *Ecphly'sis*, *Cystinx*, in pathology, means a small orbicular elevation of the cuticle containing lymph, which is sometimes clear and colourless, but often opake and whitish or pearl-coloured. It is succeeded, either by a scurf, or by a laminated scab.

VESICULA ÆNIGMATOSA, Vesicula umbilicalis — v. Alba, Vesicula umbilicalis — v. Bilis, Gall-bladder — v. Blastodermatica, see Molecule — v. Chyli, Receptaculum chyli—v. Erythroidea, Erythroid vesicle—v. Fellis, Gall-bladder—v. Gangrænescens, see Anthrax — v. Germinativa, see Molecule—v. Omphalo-mesenterica, Vesicula umbilicalis—v. Ovalis, Vesicula umbilicalis—v. Prolifera, see Molecule — v. Prostatica, see Ejaculatory Ducts.

VESIC'ULA UMBILICA'LIS, *Umbil'ical Ves'icle*, *Vesicula alba* seu *om'phalo-mesenter'ica* seu *æniymato'sa* seu *ova'lis*, *Vesi'ca intestinalis*, *Intestinal Vesicle*, *Vit'elline Pouch*. A small, pyriform, round, or spheroidal sac, which, about the fifteenth or twentieth day after fecundation, is of the size of a common pea, and probably acquires its greatest dimensions in the course of the third or fourth week. After the seventh week, it becomes shrivelled and disappears insensibly. It seems to be situate between the chorion and amnion, and is commonly adherent either to the outer surface of the amnion, or to the inner surface of the chorion, but at times is loose between them. The *vitelline ped'icle*, which attaches the vesicle to the embryo, is continuous with the intestinal canal; and, up to twenty or thirty days of embryonic life, is hollow;—*Ductus om'phalo-mesenter'icus* seu *vitello-intestina'lis* seu *vitella'rius*.

*vitelline Duct.* Its arteries are the omphalo-mesenteric. The *vitelline fluid,* contained in the vesicle, has been compared, from analogy, to the *vitellus* or yolk of birds; and, like it, is an oleaginous substance, and presumed to be inservient to the nutrition of the embryo.

VESICULÆ constitute the 6th order of Bateman's classification of *Cutaneous Diseases.*

VESICULÆ, see Villous membranes — v. Divæ Barbaræ, Variola confluens — v. Gingivarum, Aphthæ—v. Pulmonales, see Cellule—v. Rotundæ cervicis uteri, Nabothi glandulæ — v. Sanguinis, Globules of the blood — v. Seminales mulierum, Nabothi glandulæ—v. Spermaticæ, Vesiculæ seminales.

VESICULÆ SEMINA'LES, *V. Semina'ria* seu *spermat'icæ, Cap'sulæ semina'les, Conceptac'ula seminaria, Goneeys'tides,* (F.) *Vésicules séminales, Gardouches, Greniers,* are two small membranous sacs, which serve as reservoirs for the sperm, and probably secrete a fluid to be mixed with the sperm. They are situate beneath the bladder, and above the rectum, behind the prostate and to the outer side of the vasa deferentia. They are of an irregular conoidal shape; flattened from above to below; embossed on their surface, and of a grayish tint. Their *posterior extremity* or *fundus* terminates by a round cul-de-sac. Their *anterior extremity* or *neck* is narrow and elongated, and is continuous with the excretory duct of the vesicula. This duct joins the vas deferens, and forms with it the ejaculatory duct. The interior of the vesiculæ exhibits several cells, which communicate with each other, and are lined by a very thin, mucous membrane.

VESIC'ULAR, *Vesicula'ris.* Of or belonging to a vesicle:—full of or containing small vesicles or cells. The cortical or gray matter of the brain is sometimes termed *vesicular.* See Cortex cerebri and Neurine.

*VÉSICULE BILIAIRE,* Gall-bladder—*v. du Fiel,* Gall-Bladder—*v. Germinative,* see Molecule —*v. Ovulifère,* see Folliculi Graafiani.

*VÉSICULES DE GRAEF,* Folliculi Graafiani —*v. de Sainte Barbe,* Variola confluens—*v. Séminales,* Vesiculæ seminales.

VESPA, Wasp.

VESSEL, *Vas, Vasum,* diminutive *Vasculum, Angei'on, Angos, Conceptac'ulum,* from (L.) *vas, vasculum,* (F.) *Vaisseau.* A canal, more or less elastic, formed by the superposition of membranes, and distinguished, according to its uses and general arrangement, into *Artery, Vein,* and *Lymphatic.* See, also, Vascular.

*VESSELOUP,* Lycoperdon.

*VESSIE,* Urinary bladder—*v. à Colonnes,* see Urinary bladder — *v. Col de la,* Collum vesicæ.

*VESSIE NATATOIRE,* Air-bladder.

VESTIBULAR NERVE, see Auditory Nerve.

VES'TIBULE, *Vestib'ulum,* from *vestio,* 'to cover.' The porch or entrance to a house.

VESTIBULE, *Vestib'ulum, V. Vagi'næ, Prona'us, Atrium Vagi'næ, Amb'itus genita'lis mulie'bris,* is a smooth cavity between the perinæum and nymphæ in the female, which leads to two passages — to the urethra above, and to the vagina below.

VES'TIBULE OF THE EAR, *Vestib'ulum, V. labyrin'thi,* (F.) *Vestibule.* A cavity of an irregular shape, which forms part of the labyrinth or internal ear. The vestibule is situate on the inner side of the tympanum; on the outer side of the meatus auditorius internus; before the semicircular canals, and behind the cochlea. It is lined by a particular membrane, and contains the liquor of Cotunnius and branches of the auditory nerve. There is also another membrane, constituting the *mem'branous vestibule,* but it is not an exact imitation of the osseous cavity. It is composed of two distinct sacs, which open into each other — the *sac'culus vestib'uli,* and the *sacculus.* There are three contiguous *cavities* in the vestibule; one of which, the *semi-oval,* is situate above; another, the *hemispherical,* below; and the third, or *sulciform,* which is the orifice of the aquæductus vestibuli, behind.

VESTIBULUM LABYRINTHI, Vestibule of the ear—v. Vaginæ, Vestibule.

*VESTIGE* (F.), *Vestig''ium,* 'a vestige,' 'a trace.' A kind of fracture of flat bones, consisting of a simple incision having the mark of the instrument that caused it. The term is also applied to a part of the body, which may have no evident use in man, and yet may be greatly employed in animals. For example, the muscles of the external ear in man are almost devoid of use, or are *vestiges* of what they are in certain animals.

VESTIGIUM, Sole, *Vestige* — v. Foraminis ovalis, Ovalis fossa—v. Pedis, Metatarsus.

VESTI'TUS, *Esthe'ma, Esthe'sis, Clothing, Res vestia'ria, Dress, Vesture,* (F.) *Vêtement,* from *vestire, vestitum,* 'to clothe.' Any substance used for the purpose of covering nakedness, or preserving from atmospheric temperature by being worn on the body. The best clothing in winter is composed of articles that are bad conductors of caloric, and do not admit of ready evaporation of the matter of perspiration. In this respect, woollen vestments deserve the first place, and cotton the second. Colour has likewise to be regarded — the darkest hues transmitting the heat most readily through them. It has been found that the same rule applies to odours—the darker colours retaining a greater amount of odorous particles than the lighter. Hence the necessity of white walls, white bed-clothes, &c., in the wards of hospitals; for it is probable that the like law applies to contagious miasms.

VESTURE, Vestitus.

VETA, Puna.

*VÊTEMENT,* Vestitus.

VETERANA, Rubeola.

VETERINARIUS, see Hippiater and Veterinary.

VET'ERINARY, *Veterina'rius,* (F.) *Vétérinaire,* from *veterinus,* 'that which bears burdens;' itself from *vetere,* 'to carry.' That which appertains to beasts of burden: hence, *veterinary surgeon,* (see Farrier,) *veterinary college,* and *veterinary medicine.*

VETERINARY ANATOMY, see Anatomy.

VETERINARY ART, *Ars* seu *Medici'na veterina'ria, Zoöi'asis, Zoiatri'a, Theriat'rica, Mulomedici'na, Zoötherapi'a, Zoötherapeu'ticē, Ars zoiat'rica, Far'riery.* The art of treating the diseases, &c., of cattle.

VETERNOSITAS, Coma vigil.

VETERNUS, Coma vigil.

VETONICA CORDI, Betonica officinalis.

VETULA, Sacrum.

VEXILLA TUBARUM FALLOPII, see Tube, Fallopian.

VEXILLUM, *Drapeau.*

VIA, Way — v. Curandi, Ratio medendi — v. Stomachi et ventris, Œsophagus.

VIABILITY, see Viable.

VI'ABLE, *Viab'ilis,* from *via,* 'way;' or from (F.) *vie,* 'life,' (Orfila.) A word, which may be introduced with great advantage from the French into our language. It is an epithet applied to a fœtus whose organs are properly formed, and so developed as to permit its continued existence. Every fœtus is not *viable.* Anencephali have lived ten or twelve days, yet they are not viable; a part or the whole of the brain being wanting.

The older the fœtus, the more viable is it. It is an idle prejudice that a child, born at the end of eight months, is less likely to live than one born at the end of seven. The signs of *viability* are drawn from the weight, length, external conformation, &c., of the fœtus. It may be laid down as a general rule, that no fœtus born before the end of the seventh month is viable.

VIÆ CHYLIFERÆ, Chyliferous vessels.

VIÆ CLANDES'TINÆ, *Clandestine Passages.* Supposititious secret ways or passages or 'royal roads,' to account for the rapid transmission of substances taken into the stomach to the kidneys or bladder.

VIÆ EXTRAORDINARIÆ LACTIS, Galactoplania —v. Lacrymales, Lachrymal passages — v. Primæ, Ways, digestive—v. Secundæ, Ways, second.

VIAL, Phiala.

VIBI'CES, *Mol'opes, Striæ,* (F.) *Vergetures.* Large purple spots, like the marks produced by the strokes of a whip, which appear under the skin in certain malignant fevers. They are unfavourable indications, as they denote great prostration.

VIBRAMEN, Oscillation.

VIBRANS, Vibratory.

*VIBRATILE,* Vibratory.

VIBRATIL'ITY, *Vibratil'itas,* from *vibrare,* 'to oscillate.' Capability of being thrown into vibration.

VIBRATIO, Oscillation—v. Cardiaca, Palpitation—v. Cordis, Palpitation.

VIBRATION, PECTORAL, see Fremitus—v. Tactile, see Fremitus—v. Tussive, see Tussive.

VIBRATIONS OF SOUND, see Sound.

VIBRATOR, Deferens vas.

VI'BRATORY, *Vi'brative, Vibrans,* (F.) *Vibratile,* from *vibrare,* 'to quiver.' An epithet applied to the pain that accompanies some neuralgiæ, which seems to the patient to vibrate among the nerves.

VIBRATORY MOTION, see Cilia.

VIBRATUS, Oscillation.

VIB'RIO; from *vibrare,* 'to quiver.' A genus of infusory animalcules, of which different species are met with,—for example, *Vib'rio pro'lifer* in almost all putrescent fluids containing protein, and in the pus of chancres; in which last the *V. lincola* has likewise been found.

VIBRIS'SÆ, from *vibrare,* 'to quiver.' The hairs which grow at the entrance of the nostrils and of other outlets. In the feline tribe, the whiskers.

VIBURNUM CASSINOIDES, Ilex Paraguensis.

VIBUR'NUM DENTA'TUM, *Arrow Wood, Mealy Tree, Tily* of the Indians. A high indigenous shrub, of the same family as V. lentago; the bark of which has been used by the Indians as a diuretic.

VIBURNUM LÆVIGATUM, Ilex Paraguensis.

VIBURNUM LENTA'GO, *Sweet Viburnum, Nannyberry.* A handsome indigenous tree, of the honeysuckle *family*—Caprifoliaceæ—which flowers in May and June. It has been used as an antiperiodic.

VIBUR'NUM PRUNIFO'LIUM, *Black Haw, Sloe-leaved Viburnum.* Indigenous: flowering in May. The leaves have been used as tea.

VIBURNUM, SLOW-LEAVED, V. prunifolium—v. Sweet, V. lentago.

VIC-LE-COMPTE, MINERAL WATERS OF. Vic-le-Compte is a small village in the department of Puy de Dôme, three leagues from Issoire; where there is an acidulous chalybeate, which is aperient.

VICA'RIOUS, *Vica'rius,* from *vicis,* 'change, place.' Taking the place of another:—as 'vicarious secretion,' *Secre'tio vica'ria;* a secretion which takes place in one part instead of another.

VICAR'S BRAY, MINERAL WATERS OF. This spring is situate in Perthshire, Scotland, about two miles from Dollor, and near to Blarngone. The water is one of the strongest chalybeates known.

*VICE,* Cachosis.

VICHY, MINERAL WATERS OF. Carbonated alkaline chalybeates, the sources of which are at Vichy, six leagues from Moulins, in the department of Allier. The springs are seven in number. Almost all are thermal; give off bubbles of carbonic acid gas, and have a slightly sulphureous odour. They deposite carbonates of lime and magnesia, and a little oxide of iron; and afford, on analysis, carbonates of lime, soda, iron, and magnesia, carbonic acid, sulphate of soda, and chloride of sodium. They are employed as tonics, particularly in chronic affections of the abdominal viscera, in old catarrhs, diseases of the joints, &c.

VICHY WATER, FACTIT''IOUS, *Aqua Vicien'sis,* (F.) *Eau de Vichy,* is made of simple *acidulous water,* impregnated with twice its bulk of *carbonic acid,* ℥xxss; *subcarbonate of soda,* gr. xxxij; *sulphate of soda,* gr. xvj; *chloride of sodium,* gr. iv; *subcarbonate of magnesia,* gr. ss; *chloride of iron,* gr. ¼. Mix. *Ph. P.*)

VICIA ERVILIA, Ervum.

VIC''IA FABA, *Faba, F. major* seu *vulgaris, Or'obus faba.* The *Common Garden Bean,* (F.) *Fève* ou *fève des marais. Family,* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. A native of Egypt, of which there are many varieties. Beans are not easy of digestion. They are proverbially flatulent, especially when old. When young, they are more digestible and wholesome. Bean meal was one of the four resolvent meals of the ancients.

VICINITRACTUS, Erysipelas.

VICINITRAHA, Erysipelas.

VICTORIALIS FEMINEA, Gladiolus vulgaris — v. Longa, Allium victoriale — v. Rotunda, Gladiolus vulgaris.

VICTÛS RATIO, Diet.

*VIDANGES,* Lochia.

VIDIAN CANAL, Pterygoid canal.

*VIE,* Life—*v. Durée de la,* see Longevity—*v. Mogenne,* see Longevity.

*VIEILLESSE,* Senectus.

*VIERGE,* Virgin.

*VIF ARGENT,* Hydrargyrum.

VIGILANCE, Insomnia.

VIGILANTIA, Egregorsis.

VIGILATIO, Egregorsis.

VIGILIA, Egregorsis.

VIGILIÆ, Egregorsis—v. Nimiæ, Coma vigil.

VIGILIUM, Egregorsis.

*VIGNE,* Vitis vinifera—*v. Blanche,* Bryonia alba—*v. du Nord,* Humulus lupulus—*v. Vierge,* Bryonia alba.

VIGOR, Acme.

VILLA FRANCA, (CLIMATE OF.) This little town is situate immediately to the eastward of Montalbano, which separates the bay of Villa Franca from that of Nice. It is on the southern declivity of a steep and lofty range of mountains; and is more effectually sheltered from the north and north-west winds than Nice, with the climate of which that of Villa Franca closely corresponds.

VILLI, see Villous membranes.

VILLOUS, *Villo'sus,* from *villus,* a hair.'

VILLOUS MEMBRANES or COATS, *Velamen'ta Bombyc''ina,* (F.) *Membranes villeuses, Membranes veloutés,* are such as are covered with soft papillæ or *Villi, Flocci, Floc'culi, Vesic'ulæ, Cylin'dri, Tubi Membrana'cei,* constituted of blood-vessels,

nerves, and absorbents; or such as are covered with fine down, so as to cause them to feel soft and velvety. The term is, however, chiefly restricted to the former. Chaussier gives the name *simple villous membranes* to the serous membranes; and that of *complicated* or *follicular villous membranes* to the mucous membranes. On these membranes there are bodies endowed with *ciliary motion.*

*VIN,* Wine — *v. de Bordeaux,* Claret — *v. de Poulet,* see *Poulet—v. de Quinquina composé,* Vinum de kinâ kinâ compositum—*v. Sec,* Sack.

*VINAIGRE,* Acetum, see Aceticum acidum—*v. Scillitique,* Acetum scillæ — *v. de Bois,* Pyroligneous acid.

*VINAIGRES MÉDICINAUX,* Acetica.

VINCA MINOR, *Vinca pervin'ca, Clem'atis daphnoi'des major, Lesser periwinkle,* (F.) *Pervenche, Violette des Sorciers.* It has bitter and astringent properties, and has been used in gargles and diseases of the chest.

VINCETOXICUM, Asclepias vincetoxicum.

VINCTURA, Fascia.

VINCULA, Fascia.

VINCULUM, Bandage, Lien — v. Caninum, Frænum penis—v. Linguæ, Frænum linguæ—v. Præputii, Frænum penis—v. Umbilicale, Funiculus umbilicalis.

VINE, Vitis vinifera—v. Grape, Vitis vinifera —v. Poison, Rhus radicans—v. Wild, Pareira.

VINEGAR, AROMATIC SPIRIT OF, see Aceticum acidum — v. of Cantharides, Acetum cantharidis—v. Common, Acetum — v. Distilled, see Aceticum acidum—v. Marseilles, Acetum aromaticum—v. of Meadow saffron, Acetum colchici —v. of Opium, Guttæ nigræ—v. Radical, Aceticum acidum — v. of Squills, Acetum scillæ — v. of the Four Thieves, Acetum aromaticum — v. Thieves', Acetum aromaticum — v. Whey, see Acetum—v. of Wood, see Aceticum acidum.

*VINETTIER,* Oxycantha Galeni.

*VINEUX,* Vinous.

VINOLENTA, see Temulentia.

VINOLENTIA, Temulentia.

VINOSUS, Vinous.

VINOUS, *Vino'sus, Œno'des, Œnoï'des.* Relating to wine. Having the character of, or resembling, wine. Made of wine.

VINUM, Wine, Sherry wine, (Ph. U. S. 1842,) see Wine.

VINUM ABSINTHII'TES, *Wine of Wormwood.* (*Fol. absinth. exsic., absinth. Pontic.,* āā ℥vj, *vini albi* Oiv. Macerate for 24 hours, and strain. *Ph. P.*) Stimulant, tonic, febrifuge, vermifuge.

VINUM ADUSTUM, Brandy — v. Album, Sherry wine, (Ph. U. S. 1851,) see Wine—v. Album Hispanicum, see Wine—v. Album Montanum, see Wine.

VINUM AL'OËS, *V. aloës Socotori'næ, Vinum aloët'icum, V. aro'mo-aloëticum, Wine of Aloes, Tinctu'ra hi'era, Tinctura sacra.* (*Aloës* in pulv. ℥j, *cardam.* cont., *Zingib.* cont., āā ℥j; *vini alb.* Oj. Macerate for 14 days, and filter. *Ph. L.*) Purgative and stomachic, according to the dose. Dose, f℥j to f℥ij.

VINUM AMARUM, V. Gentianæ comp.—v. Amarum scilliticum, &c., V. diureticum amarum — v. Amarum cum spiritû vini, V. gentianæ compositum — v. Antimoniale, V. antimonii tartarizati—v. Antimoniatum Huxhami, V. antimonii tartarizati—v. Antimonii potassio-tartratis, V. antimonii tartarizati.

VINUM ANTIMONII, *V. antimo'nii tartariza'ti, V. tart'ratis antimonii, V. antimo'nii potas'sio-tartratis, Liquor tar'tari emet'ici, Solution of tartarized antimony, Essen'tia antimonii* seu *stib'ii, Antimonial wine, Vinum benedic'tum, Vinum antimonia'tum Huxha'mi, V. antimoniale, Aqua benedic'ta Rulan'di, Vinum emet'icum.* (*Ant. et Potass. tart.* ℈j, *vini albi* f℥x. Dissolve the tartarized antimony in the wine. Ph. U. S.) Each fluidounce contains two grains of the tartrate.

The ordinary *Antimonial wine* is made with *glass of antimony* ℥j, *sherry* Oiss.

*Ward's Red Drop* consists of a strong vinous solution of *tartarized antimony.*

VINUM ANTISCORBU'TICUM, *Antiscorbu'tic wine.* (*Rad. armoraciæ recent.* ℥j, *fol. cochleariæ recent., nasturtii aquat., trifol. aquatic., semin. sinap.,* āā ℥ss, *ammoniæ muriat.* ʒij, *vin. albi* Oij. Macerate for 36 hours; filter, and add *tincturæ cochlear.* ℥ss. *Ph. P.*) Stimulant and tonic. Dose, f℥ss to f℥ij.

VINUM AROMAT'ICUM, *Aromatic wine.* (*Species aromatic.* ℥iv, *vin. rubr.* Oij. Macerate for 6 days and filter. *Ph. P.*) Stimulant and tonic. Used, externally, in fomentations, embrocations, &c.

VINUM AROMO-ALOETICUM, V. aloes — v. Benedictum, V. antimonii tartarizati.

VINUM CAMPA'NUM, *V. Campana'cum.* Champagne wine. A well-known sparkling wine of France.

VINUM CANARINUM, see Wine—v. Chalybeatum, V. ferri — v. Cinchonæ compositum, V. de kinâ kinâ comp.

VINUM COL'CHICI, *Wine of Colchicum, V. Colchici Radi'cis, Want's Eau d'Husson.* (*Colchic. rad.* bene contus. ℞j, *vini alb.* Oij. Macerate for 14 days, with occasional agitation, and then express strongly, and filter. Ph. U. S.) It may also be prepared by displacement. Diuretic, sedative, and purgative. Chiefly used in gout. Dose, gtt. 40 to f℥j.

*Reynold's Specific* for gout and rheumatism consisted of the fresh bulb of *Colchicum* ℥viij, *Sherry wine,* f℥xvj. The colchicum was macerated for eight or ten days in the wine, at a gentle heat; coloured with *syrup of poppies* and flavoured with *rum.* Reynolds is said to have killed himself by takiug an over-dose of it.

VINUM COLCHICI RADICIS, V. colchici.

VINUM COLCHICI SEM'INIS, *Wine of Colchicum seed.* (*Colchic. sem.* cont. ℥iv; *vini alb.* Oij. Macerate for 14 days, with occasional agitation, then express and filter. *Ph. U. S.*) Dose, f℥j to f℥ij.

VINUM CBEMATUM, Brandy.

VINUM DIURET'ICUM AMA'RUM, *Vinum amarum scillit'icum compos'itum in Charita'tis Nosocomi'o usurpa'tum, Bitter diuret'ic wine.* (*Cort. cinchon., Winteran., limon.,* āā ℥ij, *rhus toxicodendr., scillæ, cacumin. angelicæ,* āā ℥ss, *fol. absinth., melissæ,* āā ℥j, *baccar. junip., macis,* āā ℥ss, *vin. alb.* Oviij. Macerate and filter. *Ph. P.*) Stimulant, tonic, and diuretic. Dose, f℥ss to f℥iss.

VINUM EMETICUM, V. antimonii tartarizati.

VINUM ER'GOTÆ, *Wine of Ergot.* (*Ergotæ,* cont., ℥ij; *vini alb.* Oj. Macerate for 14 days, with occasional agitation; then express, and filter. Ph. U. S.) Dose, ♏xx to f℥j to produce the peculiar effects of ergot.

VINUM FERRATUM, V. Ferri.

VINUM FERRI, *V. chalybea'tum, Steel wine, Wine of Iron, Vinum ferra'tum, V. Martia'tum, V. Martis, Tinctura Martis vino'sa, Tinctura Martis cum vino.* (*Iron,* ℥j, *super-tartrate of Potass,* in powder, ℥vj, *distilled water,* Oij or q. s., *proof spirit,* f℥xx. Rub the iron and supertartrate of potass together, and expose them to the air in a flat vessel, moistened with a fluidounce of water, for a fortnight; agitating every day with a spatula, and sprinkling them with water, to keep them moist. Then dry with a gentle heat, and mix with ℥xxx of *distilled water.* Filter the fluid and add the spirit. *Ph. L.*) Tonic. Dose, f℥j to f℥iv.

It is sometimes made by adding *two pints of*

*wine* to *two ounces of iron filings;* macerating and filtering.

VINUM GENTIA'NÆ COMPOS'ITUM, *V. Ama'rum, Compound wine of gentian, Infu'sum ama'rum vino'sum, Vinum amarum cum spiritû vini, Wine bitters.* (*Rad. gentian. luteæ* ℥ss, *cort. cinchon. offic.* ℥j, *cort. aurant.* ℥ij, *canellæ alb.* ℥j, *alcohol. dilut.* f℥iv, *vini alb. Hispanic.* Oijss. *Ph. E.*) Dose, f℥j to f℥vj.

VINUM HIPPOCRATICUM, Claret—v. Hispanicum, Vinum, see Wine—v. Hordeaceum, Cerevisia—v. Hydatodes, see Hydatoid.

VINUM IPECACUAN'HÆ, *Ipecacuan'ha wine.* (*Ipecacuan.* cont. ℥ij, *vini alb.* Oij.) Macerate for 14 days, express, and filter. Emetic and diaphoretic. Dose, as an emetic, f℥iv to f℥x.

VINUM DE KINÂ KINÂ COMPOS'ITUM, *V. cincho'næ compositum, Compound bark wine,* (F.) *Vin de quinquina composé.* (*Cort. cinchon.* pulv. ℔ss, *quassiæ, cort. Winteran., cort. aurant.* sicc., āā ℥ss, *alcohol.* (12° to 22° Beaumé) Oj. Macerate for 24 hours; and add *vini albi* Ovj. Macerate for four days, and filter. *Ph. P.*) Tonic, febrifuge, and stomachic. Dose, f℥ss to f℥ij.

VINUM MARTIATUM, V. ferri—v. Martis, V. ferri—v. Medicatum, see Claret.

VINUM MEDICINA'LĒ, *Medicated Wine.* Wine, holding in solution one or more medicines. Medicinal wines are obtained by macerating or digesting medicinal substances in wine. They differ, of course, according to the nature of the medicine employed, the strength of the wine, &c. In a late Pharmacopœia of the London College, all the wines were changed into weak tinctures; but the old names were left unaltered. Sherry is the wine usually employed. The following are medicated wines.

VINUM MERUM, Acratum—v. Nicotianæ tabaci, V. tabaci—v. Opiatum fermentatione paratum, Laudanum abbatis Rousseau.

VINUM O'PII, *Wine of Opium, Vinum de opio compos'itum, Laud'anum liq'uidum Sydenha'mi, Laudanum liquidum Hoffman'ni, Tinctu'ra Theba'ica, Ford's laudanum.* (*Opii* in pulv. ℥ij; *cinnam.* cont., *caryophyll.* cont. āā ℥j; *vini albi* Oj. Macerate for 14 days; express and filter.—Ph. U. S.) Narcotic. Dose, gtt. xv to f℥j.

VINUM DE OPIO COMPOSITUM, V. opii—v. Picatum, Pissites.

VINUM PORTUGAL'ICUM, *V. rubrum,* (Ph. U. S. 1851.) Wine of Portugal or of Oporto. Port wine. A strong astringent wine, not much drunk in the United States; but greatly used in England.

VINUM QUI'NIÆ, *Wine of Quinia.* (*Wine* ℔ij, *sulphate of quinia* gr. x. Mix.) Dose, f℥iss or more; according as it is used as a stomachic, or to arrest ague. A *Vinum Cincho'niæ* may be made in the same way.

VINUM RHEI, *V. R. palma'ti, Rhubarb Wine, Tinctura Rhabar'bari Vino'sa, Vinum Rhabarbari, Elixir Rhei dulcē, E. R. Compos'itum.* (*Rhei* cont. ℥ij, *canellæ* cont. ℥j, *alcohol. dilut.* f℥ij, *vini albi,* Oj. Macerate for 14 days; express and filter.—*Ph. U. S.*) Laxative and stimulant. Dose, f℥iv to f℥iss.

VINUM RHEI PALMATI, V. Rhei—v. Rhenanum, see Wine—v. Rhabarbari, V. rhei palmati—v. Rubrum, V. Portugallicum—v. Rubrum Portugallicum, see Wine.

VINUM TAB'ACI, *Vinum Nicotia'næ Tabaci, Tobac'co Wine.* (*Tabac.* incis. ℥j, *vini albi,* Oj. Macerate for 14 days; express and strain. Ph. U. S.) Narcotic, diuretic, and antispasmodic. In dropsical cases, colica pictonum, and ileus. Not used. Dose, gtt. xx to xxxvj.

VINUM VERA'TRI, *V. V. albi, Wine of White Hel'lebore.* (*Veratri cont.* ℥iv; *Vini albi,* Oj. Macerate for 14 days, express and filter.—*Ph. U. S.*) In cutaneous affections, and in gout. Dose, ten minims.

VINUM VERATRI ALBI, V. Veratri.

VIOL, Stuprum.

VI'OLA, *Viola odora'ta* seu *mar'tia, Ion, Matrona'lis, Viola'ria,* the *Sweet Violet,* (F.) *Violette à bouquets, V. odorante.* The flowers of the sweet violet have a pleasant, peculiar odour, and scarcely any taste. They are slightly laxative.

VIOLA CANI'NA, *V. sylves'tris.* The *Dog Violet.* The root of this plant is emetic and cathartic. Dose, ℈j.

VIOLA IPECACUANHA, see Ipecacuanha—v. Lutea, Cheiranthus cheiri—v. Martia, Viola—v. Odorata, Viola—v. Palustris, Pinguicola vulgaris.

VIOLA PEDA'TA, *Viola,* (Ph. U. S.) This indigenous violet, which grows from New England to Carolina, is regarded by some as a useful demulcent in pectoral affections.

VIOLA SYLVESTRIS, V. Canina.

VIOLA TRI'COLOR, *Heart's ease, Pansies, Jace'a tricolor, Herba* seu *Flos Trinita'tis,* (F.) *Pensée, P. sauvage.* The decoction of this beautiful little plant has been recommended in diseases of the skin, &c. Its roots are, also, emetic and cathartic.

VIOLARIA, Viola.

VIOLET, DOG, Viola canina—v. Bloom, Solanum dulcamara—v. Sweet, Viola.

*VIOLETTE À BOUQUETS,* Viola—*v. Odorante,* Viola—*v. des Sorciers,* Vinca minor.

*VIOLIER JAUNE,* Cheiranthus cheiri.

VIORNA, Clematis vitalba.

VIPER, EGYPTIAN, Aspis—v. Grass, Scorzonera—v. Ten inch long, Echidna ocellata.

VIPERA, Coluber berus.

VIPERARIA, Aristolochia serpentaria, Scorzonera.

VIPERINA VIRGINIANA, Aristolochia serpentaria.

VIR, Penis—v. Effœminatus, Gynæcaner.

VIRAGO, see Pogoniasis.

VIRGA, Penis—v. Cerca, *Bougie*—v. Cerebri, Pineal gland.

VIRGILIA, Cladrastis tinctoria.

VIRGIN, *Virgo, Par'thenus, Expers nuptia'rum,* (F.) *Vierge, Pucelle.* A female who has never had sexual intercourse. Applied, also, occasionally to the male so circumstanced.

VIR'GINAL, *Virgina'lē,* from *virgo,* 'a virgin.' The external genital organs of the virgin.

VIRGINAL MEMBRANE, Hymen.

VIRGIN'IA, MINERAL WATERS OF. There are several celebrated mineral springs in Virginia, on the western side of the Blue Ridge. Two *Thermal* springs exist in Bath county. The *Warm Spring,* as it is called, issues with a bold stream, sufficient to turn a mill, and to keep the water of its basin at the temperature of 97°. The *Hot Spring* is a few miles from the Warm. Its temperature is 107°. They are both slightly sulphureous. The *Sweet Springs* are at the eastern foot of the Allegheny, in Botetourt county; 42 miles from the Warm Springs. The water has a temperature of 70°, and is highly impregnated with carbonic acid. The *White Sulphur,* as well as the *Red Sulphur,* and *Salt Sulphur Springs,* are also much celebrated. The Red Spring is affirmed to exert a sedative influence on the pulse, diminishing the number of its beats. About 15 miles from Staunton are *Stribling's Springs*—a sulphuretted water; and near Warrenton, in Fauquier county, there is a sulphureous water, called *Lee's Springs,* which is much frequented. *Berkley* and *Capon Springs* are likewise celebrated.

VIRGINIA, Hymen.

VIRGIN'ITY, *Virgin'itas, Parthenev'a, Integ'-*

*ritas, Maid'enhood, Maid'enhead,* (F.) *Virginité, Pucélage.* The state of one who has never had carnal commerce.

VIRGIN'S BOWER, COMMON, Clematis vitalba, Clematis Virginica — v. Bower, upright, Clematis recta—v. Sweet-scented, Clematis flammula.

VIRGIN'S MILK, *Lac Vir'ginis, Lac Virgina'lē,* (F.) *Lait virginal.* A tincture of benjamin or of any other balsam, precipitated by the addition of water, which gives it a milky appearance. Also, sub-acetate of lead precipitated by water. It has been used as a cosmetic to remove freckles, &c.

VIRGINITAS DEFLORATA, Defloration.

VIRGO, Virgin—v. Aurea, Solidago virgaurea.

VIRGULA, Penis.

VIRIDE ÆRIS, Cupri subacetas — v. Montanum, Cuprum.

VIRILE, Penis.

VIRILES'CENCE; from *vir,* 'a man.' The state of the aged female in which she assumes certain of the characteristics of the male.—Mehliss.

VIRILIA, Pudibilia.

VIRILITY, Adult age.

VIROSUS, Virulent.

VIRTUE, Faculty.

VIRTUS FORMATRIX, Plastic force — v. Plastica, Plastic force.

VIR'ULENT, *Virulen'tus, Viro'sus,* from *virus.* That which is of the nature of a virus or which is caused by a virus. Highly noxious.

VIRUS, from *vis,* 'force.' A Latin word, which signifies poison; but which, in medicine, has a somewhat different acceptation. By it is understood a principle, unknown in its nature and inappreciable by the senses, which is the agent for the transmission of infectious diseases. Thus we speak of the *variolic, vaccine,* and *syphilitic viruses. Virus* differs from *venom* in the latter being a secretion natural to certain animals, whilst the former is always the result of a morbid process; —a *morbid poison.*

VIRUS, Ichor, Poison, Sanies — v. Vaccine, see Vaccina — v. Vitale, Sperm.

VIS, Force — v. Adhæsionis, Cohesion (force of) — v. Attractionis, Cohesion (force of) — v. Aucta, Sthenia — v. Cohæsionis, Cohesion (force of) — v. Conservatrix, V. medicatrix naturæ — v. Elastica, Elasticity — v. Essentialis, Plastic force.

VIS EXPUL'TRIX. The organic force by which, it was supposed, the useless was removed from the body.

VIS FORMATIVA, Plastic force — v. Generatrix, Potentia generandi—v. Imminuta, Asthenia—v. Insita, Irritability—v. Irritabilitatis, Irritability.

VIS MEDICA'TRIX NATU'RÆ, *Vis conserva'trix, Autocrati'a, Autonom'ia, Autocrato'ria, Authygian'sis, Autotherapei'a, Physiat'ricē, Physioautocrati'a, Physiautocrati'a.* A term, employed by some, to express that instinctive healing power, in an animal or vegetable, by virtue of which it can repair injuries inflicted upon it, or remove disease.

VIS MOR'TUA. Under this name Haller included the mechanical properties of membrane, —flexibility, extensibility, elasticity, &c.—which are totally independent of the vital properties. They remain some time after the complete extinction of life in all its functions; seem to be connected with the mechanical arrangement of particles and the chymical composition of the substance in which they reside, and not to be affected until the progress of decomposition has become sensible.

VIS MUSCULARIS, Myodynamia—v. Nervorum, Nervous power—v. Nervosa, Nervous power—v. Plastica, Plastic force—v. Reproductiva, Plastic force—v. Vitæ, Irritability.

VIS VITA'LIS, *Vis* seu *Fac'ultas Zo'tica,* (F.) *Force vitale.* The *vital force* — *Biod* of Baron Von Reichenbach — which distinguishes living matter from the dead. Also, Irritability.

VIS ZOTICA, Vis vitalis.

*VISAGE,* Countenance.

VISCAGO BEHEN, Cucubalus behen.

VISCERA, Entrails.

VISCERAL, Splanchnic.

VISCERALIS, Stomachal.

VISCERATION, Exenterismus.

*VISCÈRES,* Entrails.

VISCONIA, Physconia.

VISCUM ALBUM, *Mis'tletoe, Ixos, Ix'ia, Dabach,* (F;) *Gui.* A parasitic plant, which grows on a number of trees. *Family,* Caprifoliaceæ. *Sex. Syst.* Dioecia Tetrandria. That of the oak—*Viscum quercī'num* — has been most celebrated, but it does not differ from the others. It was, at one time, much used in epilepsy and other neuroses; the wood or leaves being given in powder, in the dose of ʒss or ʒj. The berries, also called *Pommes hemorrhoïdales,* from their supposed virtues, are drastic; and, when applied externally, are maturative.

VISCUM CAPEN'SĒ. A South African parasitic shrub, which grows on the stems of several species of Rhus and Euclea.

VISCUM FLAVES'CENS, *Yel'lowish Mis'tletoe,* indigenous, has been given in similar cases as the *Viscum album.*

VISIO, Pupil, Vision.

VIS'ION, *Vis'io, Visus,* from *videre, visum,* 'to see;' *Opsis, Omma,* (F.) *Vue.* The action of seeing. The *sight.* The sight is one of the five senses, and the eye is its organ. By it we distinguish colours, and appreciate most of the physical qualities of external objects. The eye is composed of different transparent media, whose curvatures and refractive powers are so combined as to render insensible the aberrations of sphericity and refrangibility, and to concentrate the numerous rays proceeding from more or less distant objects. These rays traverse, successively, the transparent cornea, the aqueous humour, the crystalline, the vitreous humour, and strike upon the retina, on which they impress the figure of the object whence they have proceeded; and, in order that no obscurity may arise from the reflections that might otherwise occur, the anterior of the eye is lined by a membrane—the choroid—which is itself covered internally by a dark pigment. This absorbs the light, like the dark pigment in the interior of telescopes, and thus obviates confusion. As the rays proceeding from an object must cross each other in their course to the retina, it follows that those proceeding from the upper part of an object must fall upon the lower part of the retina, and conversely; so that the object must be impressed upon the retina in an inverted position; yet experience teaches us to appreciate the position accurately.

VISION, BINOCULAR, see Binocular — v. Coloured, Chromopsia — v. Double, Diplopia — v. Single, see Binocular.

VISORIUM ORGANUM, Eye.

VISORIUS, Visual.

VIS'UAL, *Visua'lis, Viso'rius.* Same etymon. That which concerns the sight or belongs to vision.

VISUAL ANGLE is the angle formed by the crossing of two rays, proceeding from opposite points of any body, in their passage through the pupil. It is by the size of this angle that we judge, to a certain extent, of the dimensions of objects.

VISUS, Vision — v. Acris, Oxydercia — v. Acrior, Nyctalopia — v. Coloratus, Chromopsia — v. Debilitas, Asthenopia — v. Decolor, Achromatopsia—v. Dimidiatus, Hemiopia—v. Diurnus, Hemeralopia—v. Duplicatus, Diplopia—v. Hebetudo, Amblyopia — v. Juvenum, Myopia—v. Lucidus, Photopsia — v. Muscarum, see Metamorphopsia — v. Nocturnus, Nyctalopia — v. Senilis, Presbytia.

VITA, Life—v. Propria, Irritability.

VITAL, *Vita'lis, Biot'ic, Biot'icus,* (F.) *Vital,* from *vita,* 'life.' Relating or appertaining to life; — as

VITAL DYNAMICS, see Dynamic—v. Force, Vis vitalis.

VITAL PRIN'CIPLE, *Flam'mula* seu *Aura vita'lis, Microcosme'tor,* (F.) *Flamme vitale, Vital Flame.* The principle which, in association with matter, as in organized bodies, controls its manifestations and properties, and distinguishes organized matter from the inorganic. We know nothing of this principle, except in its connexion with organization.

VITAL PROPERTIES, see Properties, vital — v. Statistics, Statistics, medical.

VITALBA, Clematis vitalba.

VITAL'ITY, *Vital'itas,* from *vita,* 'life.' The vital principle: also used in the sense of vital action or movement.

VITALIZE, To endow with life.

VITALS, *Vita'lia.* Parts that are necessary for life — the heart, lungs, and nervous centres more especially.

VITARO'BORANT, PALMER'S. A farinaceous preparation, which appears to consist of a mixture of the red or Arabian lentil and wheat flour, the latter in considerable amount, sweetened with sugar. It bears considerable resemblance to Revalenta.

VITELLARY, Vitelline — v. Membrane, Zona pellucida.

*VITELLINE,* Zona pellucida.

VIT'ELLINE, *Vitel'linus, Vit'ellary,* from *vitellus,* 'the yolk of an egg.' Appertaining to or resembling the vitellus or yolk.

VITELLINE DISC, Proligerous Disc — v. Fluid, see Vesicula umbilicalis.

VITELLINE PED'ICLE or APOPH'YSIS, is the pedicle which attaches the umbilical vesicle to the embryo. See Vesicula umbilicalis.

VITELLINE POUCH, Vesicula umbilicalis — v. Vessels, Omphalo-mesenteric.

VITELLO-MESENTERIC, Omphalo-mesenteric.

VITELLUM OVI, see Ovum.

VITELLUS OVI, see Ovum.

VITEX, *V. Agnus Castus* seu *verticilla'ta, Agnus Castus,* (F.) *Gattilier, Petit Poivre, Poivre sauvage. Family,* Pyrenaceæ. *Sex. Syst.* Didynamia Angiospermia. The *Chaste Tree.* The seeds, when fresh, have a fragrant smell, and an acrid, aromatic taste. Formerly, they were celebrated as antaphrodisiacs.

VITI SALTUS, Chorea.

VITIA PRIMÆ CONFORMATIONIS, see Monster.

VITIATIO, Stuprum.

VITILIGINES, Ephelides.

VITILIGO, Lepra — v. Alphus, Lepra alphoides—v. Melas, Lepra nigricans—v. Nigra, Lepra nigricans.

VITIS ALBA SYLVESTRIS, Bryonia alba — v. Apyrena, see V. Corinthiaca.

VITIS CORINTHIACA. *Family* of the Vines. *Sex. Syst.* Pentandria Monogynia. This plant affords the *Uvæ passæ mino'res, Passæ Corinthiacæ, Pas'sulæ mino'res, Uvæ Corinthiacæ, Corinthiacæ, Currants,* (F.) *Raisins de Corinthe;* which are the dried fruit of the *Vitis Corinthiaca* or *Vitis apyre'na;* and are similar, in their properties, to the raisin.

VITIS IDÆA MYRTILLUS, Vaccinium myrtillus — v. Idæa Palustris, Vaccinium oxycoccos — v. Idæa punctata, Vaccinium vitis idæa—v. Sativa, V. vinifera.

VITIS VINIF'ERA, *V. sati'va, Am'pelos, A. Œnoph'oros.* The *Grape vine, the Vine,* (F.) *Vigne.* Vine leaves and the tendrils have an astringent taste, and were formerly used in diarrhœa, hemorrhage, &c. The juice or sap, called *Lac'ryma,* has been recommended in calculous disorders and in cases of chronic ophthalmia. The juice of the unripe fruit is called *Verjuice.* The *Grape, Uva, Botrys, Staph'ylé, Rhax,* (F.) *Raisin,* when ripe, is a wholesome delicious fruit; and, when dried, forms the *Uvæ passæ majo'res, Pass'ulæ majo'res, Uvæ passæ solè siccа'tæ, Zibebæ, Raisins.* These are inodorous; and to the taste, sub-acidulous, sweet, and mucilaginous. They are demulcent and nutritive.

VITIUM, Disease—v. Caducum, Epilepsy.

VITIUM CONFORMA'TIONIS. A disease or fault of conformation.

VITIUM DIVINUM, Epilepsy — v. Herculeum, Epilepsy—v. Scrophulosum, Scrofula.

VITRARIA, Parietaria.

VITREOUS, Hyaline—v. Humour, Corpus vitreum—v. Humour of the ear, *Vitrine auditive.*

VITREUS, Hyaline.

*VITRINE AUDITIVE* (F.), from *vitrum,* 'glass;' *End'olymph, Liquor of Scarpa, Fluid of Scarpa, Vitreous Humour of the Ear.* The fluid contained in the *membranous labyrinth* of the ear, so called from its resemblance to the *vitreous* humour of the eye.

VITRIOL, Ferri sulphas — v. Blue, Cupri sulphas — v. Cæruleum, Cupri sulphas — v. Green, Ferri sulphas — v. Roman, Cupri sulphas — v. White, Zinci sulphas.

VITRIOLUM ALBUM, Zinci sulphas — v. Ammoniacale, Ammoniæ sulphas—v. Cupri, Cupri sulphas—v. Cyprium, Cupri sulphas—v. Ferri, Ferri sulphas — v. Goslariense, Zinci sulphas — v. Martis, Ferri sulphas — v. Romanum, Cupri sulphas—v. Veneris, Cupri sulphas—v. Viride, Ferri sulphas—v. Zinci, Zinci sulphas.

VITRUM, *Hy'alos, Glass, Brancia,* (F.) *Verre,* from *videre,* 'to see.' Glass, coarsely powdered, has been sometimes used to remove specks of the cornea.

Powdered glass has been regarded, but erroneously, as a poison. It acts only mechanically.

The saline scum, which swims on glass when first made, has been used in tooth-powders. It is called *Sandiver, Sel de verre, Glass Gall, Fel vitri,* &c.

VITRUM ANTIMONII, see Antimonii vitrum — v. Hypoclepticum, Separatorium — v. Oculare, see Spectacles—v. Sublimatorium, Aludel.

VITTA, *Bandelette,* Caul.

VIVÆSECTIO, Vivisection.

VIVERRA CIVETTA, see Civetta.

*VIVIPARITÉ,* see Viviparous.

VIVIP'AROUS, from *vivus,* 'alive,' and *pario,* 'I bring forth.' An epithet applied to animals whose young are brought forth detached, without requiring to be hatched, as in the *Oviparous.* The condition may be termed *Vivip'arousness,* (F.) *Viviparité.* See Generation.

VIVIPAROUSNESS, see Viviparous.

VIVISEC'TION, *Vivisec'tio, Vivæsec'tio, Biotom'ia,* from *vivus,* 'alive,' and *secare, sectum,* 'to cut.' The act of opening or dissecting living animals. One who performs vivisections is a vivisector.

VOCAL, Oral—v. Tube, see Tube, vocal.

VOCALIS, Vowel.

*VOCE DI PETTO,* see Voice—*v. di Testa,* see Voice.

VOICE, *Vox, Audē, Phonē,* (F.) *Voix,* from *vocare,* 'to name, to call.' An appreciable sound produced by the air, when driven from the lungs, throwing the inferior ligaments of the glottis into vibration. The function by which this is effected has been called *Phona'tion.* It is a function of *animal* life; and, in animals, is limited to the production of the *simple* or *instinct'ive voice,* as well as in the idiot; but, in intellectual man, becomes much more complicated and articulated,—an evidence of his intellectual superiority.

VOICE, ARTIC'ULATED, *Speech, Loque'la, Glossa, Glotta, La'lia, Phrasis,* (F.) *Parole, Voix articulée,* is the voice as produced by the glottis, modified by the motions of the tongue, lip, and other parts of the vocal tube. Most physiologists agree in regarding the glottis, or the space between the thyro-arytenoid ligaments plus the ligaments themselves, as the part where vocal sounds are formed; but the mechanism of this formation is a matter of dispute. The greater part of individuals regard the glottis and its ligaments, with the *vocal tube,* or the space which the sound has to traverse after it is produced in the glottis, as a reed instrument, like the clarionet, the inferior ligaments of the glottis constituting the reed. In speech, as ordinarily effected, the tongue, lips, teeth, &c., are concerned, but there are some authentic cases on record, where it has been accomplished after the tongue has been removed. In such cases, the articulated voice must have been produced in the glottis alone, or in it aided by an obscure action of the parts above it.

The singing voice is not limited to the larynx; the pharynx would seem to be concerned also. The notes that are produced in the latter have been termed *supra-laryngeal,* or *notes of the second register.* They constitute the *pharyngeal voice, falsetto* or *faucette* voice or *voce di testa,* (I.) The *laryngeal voice* or *voice of the first register,* is the *Voce di Petto,* (I.)

VOICE, BLEATING, Egophony—v. Cavernous, Pectoriloquy.

VOICE, CHOL'ERIC, *Vox Choler'ica.* The peculiar husky voice of those affected with cholera.

VOICE, CONVUL'SIVE, *Vox convulsi've,* (F.) *Voix convulsive.* A neurosis of the voice, consisting in the production of discordant sounds—acute and grave—which cannot be brought to the natural tones by any effort of volition. It seems to be caused by disordered contraction of the muscles of the larynx.

VOICE, FALSETTO, see Voice—v. Goat's, Egophony—v. Laryngeal, Laryngophony, see Voice—v. Pharyngeal, see Voice—v. Tracheal, Laryngophony.

*VOIE,* Way.

*VOIES DIGESTIVES,* Ways, digestive—*v. Lachrymales,* Lachrymal passages—*v. Premières,* Ways, digestive—*v. Secondes,* Ways, second—*v. Urinaires,* Urinary passages.

*VOILE DU PALAIS,* Velum pendulum palati—*v. Médullaire inférieure,* Velum medullare inferius—*v. Médullaire supérieure,* Valvula Vieussenii.

*VOIX,* Voice—*v. Aigre,* see Acid—*v. Articulée,* Voice, articulated, Pectoriloquy—*v. Bourdonnante,* see Resonance—*v. Bronchique,* Resonance—*v. Caverneuse,* Pectoriloquy—*v. Chévrotante,* Egophony—*v. Égophonique,* Egophony—*v. de Polichinelle,* Egophony—*v. Sénile,* Egophony—*v. Tubaire,* see Resonance.

VOLA, Palm—v. Manûs, Palm—v. Pedis, Sole.

VOLATICA, Lichen.

VOLATILIZA'TION, *Volatilisa'tio, Volatisa'tio,* from *volare,* 'to fly.' The operation of reducing volatilizable substances into gas or vapour.

VOLATISATIO, Volatilization.

VOLIT''ION, *Volit''io,* from *volo,* 'to will.' The act of willing. Hence:

VOLIT''IONAL, relating to volition. Thus the muscles may be moved by a *volitional* or by an *emotional* impulse.

VOLNUS, Wound.

VOLSELLA, Acanthobolos, Forceps, Madisterium—v. Patini, *Valet à Patin.*

VOLTAISM, Galvanism.

VOLTUS, Countenance, Face.

VOL'UNTARY, *Hecu'sius, Volunta'rius,* from *voluntas,* 'will.' Relating to the will; as '*voluntary* muscles;' muscles which act in obedience to the will.

VOLUNTAS, *Volen'tia, Arbit'rium, Cupidi'tas, Boule'sis, Thele'ma,* (F.) *Volonté.* Will or desire.

VOLUN'TAS SEU CUPID'ITAS DESEDEND'I, *Lubi'do intesti'ni.* The desire to go to stool.

VOLVULUS, Ileus—v. Intestinorum, Intussusceptio.

VOMENDI CONAMEN INANE, Vomiturition.

VOMER, 'a ploughshare;' *Os vo'meris, Ara'trum, Os maxill'æ superio'ris undec''imum.* One of the bones of the face, so called from its resemblance. It is an azygous bone, forming the posterior part of the septum narium. It is thin, flat, and quadrilateral; and is articulated, below, to the superior maxillary and palatine bones; and above, to the sphenoid, ethmoid, and cornets of Bertin. It is developed by a single point of ossification. Also, the penis.

VOM'ICA, *Pyocys'tis,* from *vomere,* 'to vomit,' 'to cast up.' (F.) *Vomique, Crachement de pus.* A term used by some authors for any encysted collection of purulent matter in the interior of a viscus. The acceptation is commonly, however, restricted to purulent collections in the lungs, encysted or not, which may be discharged by the mouth, by breaking into the bronchial tubes. Two kinds of vomicæ are distinguished; the one caused by the softening or breaking down of pulmonary tubercles; the other, of much more rare occurrence, formed by a circumscribed abscess of the lungs. Instead of opening into the bronchia, the abscess is sometimes discharged into the cavity of the pleura, causing empyema.

VOMICINE, Brucia.

*VOMIQUE,* Vomica.

*VOMIQUIER,* Strychnos nux vomica.

*VOMISSEMENT,* Vomiting—*v. de Sang,* Hæmatemesis.

VOMIT, Emetic—v. Black, Fever, yellow, Melæna.

VOMIT, DRY, OF MARRIOTT. A once celebrated emetic, called 'dry,' from its having been given without solution. It consisted of equal portions of tartrate of antimony and potassa, and sulphate of copper.

*VOMITIF,* Emetic.

VOMITINE, Emetine.

VOM'ITING, *Vom'itus, Vomit''io, Vomit''ium, Vom'itum, Evomit''io, Ana'tropē, Em'esis vomit''io, Palmus vom'itus, Ægritu'do ventric'uli, Spewing, Puking, Sickness of the Stomach,* (F.) *Vomissement,* from *vomere,* 'to cast up.' The act by which solids and liquids, contained in the stomach, are ejected by the mouth. Vomiting is the effect of some special irritation of the nerves of the stomach, calling, by reflex action, on the appropriate muscles to expel the contents of the viscus. It is not accomplished solely by the contraction of the stomach, as was for a long time believed. That organ, indeed, assists in the

process; but the main cause is the compression exerted upon the parietes of the viscus by the diaphragm and abdominal muscles. Vomiting is a symptom common to numerous diseases. At times, it is sympathetic, as in affections of the kidney, uterus, brain, &c. At others, it is symptomatic, as in gastritis, peritonitis, &c. When very troublesome, it may often be palliated by effervescent draughts, aromatics, sinapisms, or blisters to the epigastric region, &c.

VOMITING AT PLEASURE, Regurgitation — v. of Blood, Hæmatemesis — v. Stercoraceous, Copremesis.

VOMITIO, Vomiting—v. Sanguinis, Hæmatemesis.

VOMITIUM, Vomiting.

VOMITO NEGRO, Fever, yellow — v. Prieto, Fever, yellow.

VOMITORIUM, Emetic.

VOMITORY, Emetic.

VOMITUM, Vomiting.

VOMITURIT''ION, *Vomituri''tio, Emes'ia, Dysemes'ia, Subver'sio stom'achi.* Same etymon as Vomiting. Ineffectual efforts to vomit; *Vomen'di cona'men ina'nē, Retching, Reaching, Heav'ing.* Some authors mean, by this term, a vomiting of but little matter, or that which is effected almost without effort. The first acceptation is the most general.

VOMITUS, Vomiting — v. Cruentus, Hæmatemesis—v. Fæculentus, Copremesis—v. Marinus, Nausea marina—v. Navigantium, Nausea marina —v. Niger, Fever, yellow—v. Pituitosus, Blennemesis—v. Profusus, Hyperemesis—v. Purulentus, Pyemesis—v. Sanguinis, Hæmatemesis—v. Stercoris, Copremesis.

VOORARA, Curare.

VOUACAPUA AMERICANA, Geoffræa inermis.

*VOÛTE*, Vault—*v. Médullaire*, Corpus callosum — *v. à Trois Piliers*, Fornix.

VOWEL, *Voca'lis*, from Latin *vox*, 'the voice,' and *voco*, 'to call.' (F.) *Voyelle.* Physiologically, a continuous breath or sound, produced in the glottis; but more or less modified by the form of the vocal tube, through which it has to pass. In the English language, *a, e, i, o, u, w*, and *y* are vowels.

VOX, Voice — v. Cholerica, Voice, choleric — v. Clangosa, Oxyphonia — v. Convulsiva, *Voix Convulsive*—v. Nasalis, Rhinophonia—v. Rauca, Raucedo, Raucous voice—v. Raucisona, Raucous voice.

*VOYELLE*, Vowel.

*VUE*, Vision — *v. Courte*, Myopia — *v. Diurne*, Hemeralopia—*v. Faible*, Amblyopia—*v. Longue*, Presbytia—*v. Louche*, Strabismus—*v. Nocturne*, Nyctalopia.

VULGA, Vulva.

*VULNÉRAIRE*, Vulnerary — *v. Suisse*, see Falltranck.

VULNERARIUS, Traumatic.

VUL'NERARY, *Vulnera'rius, Traumat'icus, Traumatic*, from *vulnus, vulneris*, 'a wound.' (F.) *Vulnéraire.* A name applied by the ancients to medicines, which they considered capable of favouring the consolidation of wounds. The property has been ascribed to various plants.

VULNERATIO NERVI, Neurotrosis.

VULNUS, Wound — v. Laceratum, see Laceration — v. Sclopetarium, Wound, gun-shot — v. Simplex, Cut.

VULNUSCULUM, Wound.

VULPIS MORBUS, Alopecia.

*VULTUEUX* (F.), *Vultuo'sus.* Corvisart has used the expression, *Face vultueuse, Fa'cies vultuo'sa*, for the face, when it is more florid and swollen than in the natural state. This appearance, which is observed in active aneurism of the heart, according to Corvisart, is owing to the afflux of blood into the arterial capillaries, and hence differs from the livid and swollen appearance caused by the accumulation of blood in the venous capillaries, constituting the *Face injectée.*

VULTUS, Countenance, Face — v. Tetricus et Mœstus, Scythropasmus.

VULVA, Uterus, see Vulva.

VULVA, from *valva*, 'a door.' *Hortus, Cunnus, Puden'dum mulie'brē, Sinus pudo'ris, Choiros, Arvum, Bucca, Bulga, Cadur'cus, Custos, Femen, An'nulus, Femur summum, Follic'ulus, Fundus, Gre'mium, Hia'tus, Lanu'vium, Navis, Oppid'ulum, Specus, Vulga, Cymba, Saltus, Clitor'ium, Os'tium, Sulcus, Amphicaus'tis, Concha, Porcus, Porta, Interfemineum, Mulie'bria, Fossa magna mulie'bris, Episei'on, Es'chara, Hor'tulus cupidinis, Bouba'lios, Byssos, Cava, Caver'na, Delphys, Delta, Fovea, Gynæce'um*, the *Female puden'dum*, the *Female organs of generation*, the *Female parts, Loci mulie'bres*, (F.) *Vulve.* A longitudinal opening between the projecting parts of the external organs of generation in the female, extending from the mons veneris to the perineum, and which is called, also, *Fossa magna.* Some anatomists mean, by this term, the whole of the external genital organs of the female:—mons veneris; labia majora, and the cleft or vestibule separating them; the clitoris; nymphæ; meatus urinarius; entrance of the vagina; with the hymen or the carunculæ myrtiformes, fossa navicularis and fourchette.

VULVA, *Fora'men commu'nē ante'rius, Iter ad infundib'ulum, Iter* seu *Ad'itus ad ter'tium ventric'ulum, Rima ad infundib'ulum, Apertu'ra ante'rior ventric'uli ter'tii cerebri.* An opening situate at the junction of the optic thalami, in the third ventricle of the brain, and immediately beneath the anterior crus of the fornix.

*VULVAIRE*, Chenopodium vulvaria.

VULVAR, *Vulva'ris*, from *vulva.* That which relates to the vulva. Chaussier gives this name to the external pudic arteries, because they are distributed to the vulva.

VULVARIA, Chenopodium vulvaria.

*VULVE*, Vulva.

VULVI'TIS, a hybrid word, from *vulva*, and *itis*, denoting inflammation. Inflammation of the vulva.

VULVO-UTERINE CANAL, Vagina.

# W.

WAD, Graphites.

WAHOO, see Euonymus.

WAISTCOAT, STRAIT, *Indu'cula*, (F.) *Camisole, Gilet de force.* A dress, used for restraining maniacs, or those labouring under violent delirium. It has long sleeves, which are tied behind the body, so that the arms cannot be extricated from them. It ought, of course, to be made of very resisting materials.

WAKE-ROBIN, Arum maculatum, Trillium latifolium.

WALE, Wheal.

WALKING, *Gressus, Incess'us, Deambula'tio, Ambula'tio, Bad'isis*, (F.) *La marche.* The action by which we change place, by means of a succession of steps in the same direction. In walking forwards, the centre of gravity is constantly altered; and a series of small, parabolic curves is described on the heads of the thigh-bones, the extent of which is regulated by volition, under the guidance of vision.

WALLA'CHIA, MINERAL WATERS OF. There are many excellent sulphureous springs in this country, especially those at Bobotsch, Finceschti, Sibitchiudi Suz, Bräsa, Otschin, Serboneschte, Kimpalungi, Kosia, and Oloneschti. Chalybeate and saline springs have, also, been found at Sibitschiudi Suz.—Siller.

WALLFLOWER, Cheiranthus cheiri.

WALLRUE, Asplenium ruta muraria.

WALNUT, Juglans regia—w. White, Juglans cinerea.

WALTON, MINERAL WATERS OF. A mineral spring near Tewkesbury, in Gloucestershire, England. It is an acidulous chalybeate.

WANT, from past participle of Sax. ƿanian, 'to wane,' 'to fall away.' 'Need of that which is necessary.' (F.) *Besoin.* This word is sometimes used to express the imperious necessity which compels us to take food, drink, &c. (See Hunger and Thirst.) In a more general sense, it means the impressions transmitted by the organs to the brain, when it is necessary that they should act: these wants are called *instinctive desires* and *internal sensations* or *stimuli.* Such are the desires or wants to eat, drink, void the urine, breathe (*besoin de respirer*), &c.

WANT, in the sense of indigence, (L.) *Egestas, Indigen'tia*, is the cause of a number of diseases.

WARBURG'S FEVER-DROPS, see Bebeeru.

WARD'S ESSENCE FOR THE HEADACH, Linimentum camphoræ compositum—w. White Drops, see Hydrargyri nitras.

WARMBRUNN, MINERAL WATERS OF. Much frequented springs in Silesia, about a league from Hirschberg. They are thermal, 95° to 100° Fah., and are chiefly used as baths. The impregnating materials are carbonate of soda, sulphate of soda, sulphate of lime, chloride of sodium, carbonate of magnesia, and sulphohydric acid gas.

WARM SPRINGS, see Virginia, mineral waters of.

WARNERA CANADENSIS, Hydrastis Canadensis.

WART, Verruca—w. Corneous, Cornu.

WARTY, *Ver'rucose, Ver'rucous, Verruco'sus*, from Sax. ƿeapt. Full of warts. Resembling, relating, or belonging to warts.

WARTY TUMOUR OF CICATRICES. A name given by Mr. Howship to the tumour, which sometimes appears on an old scar, many years, perhaps, after the injury that caused it.

WASH, BLACK, see Hydrargyri submurias—w. Preventive, Lotion, Hannay's—w. White, Liquor plumbi subacetatis dilutus.

WASHERWOMAN'S SCALL, Psoriasis diffusa.

WASP, *Vespa, Sphex*, (F.) *Guêpe.* A genus of gregarious insects, like the bee and the ant. They are armed with a sting, which pours a poisonous fluid into the puncture made by it. (See Poisons, Table of.) The best application is the sp. ammoniæ aromaticus, or some preparation of ammonia.

WASSERBURG, MINERAL WATERS OF. Wasserburg is a town of Bavaria, seated on the Inn, 28 miles east of Münich. The water, called, also, *Aqua Aga'tii*, contains carbonic acid; carbonates of lime and magnesia; sulphates of lime and magnesia; chloride of sodium, carbonate of soda and oxide of iron.

*WASSERKUR*, Hydrosudotherapeia.

WATER, Sax. ƿæter, (G.) Wasser, *Aqua, Hydor, ὑδωρ, Alma*, (F.) *Eau, Protox'ide of hydrogen.* Water was at one time regarded as a simple element. It is now known to consist of eight parts by weight of oxygen, and one of hydrogen. It freezes at 32°, and boils at 212° of Fahrenheit; and is taken as the unit in all tables of specific gravity of solid and liquid substances. Water, as we meet with it, is very different in its state of purity; generally, it contains small quantities of saline matter; at other times, as in sea-water and mineral waters, it is largely impregnated. The characters of water, as met with under ordinary circumstances, are well compared by Celsus, *"Aqua levissima pluvialis est; deinde fontana; tum ex flumine; tum ex puteo; post hæc ex nive, aut glacie; gravior his ex lacu; gravissima ex palude."* Pure water is one of the best diluents that can be used. When cold, and especially when iced, it is one of the most useful refrigerants; and, in the form of the cold, tepid, and warm bath, it is serviceable in numerous diseases.

WATER OF AIX-LA-CHAPELLE, see Aix-la-Chapelle—w. Allflower, Urine, cows'—w. Apple, Apple-tea—w. Barley, Decoctum hordei.

WATER BED. A bed, contrived by Dr. Arnott, which, in consequence of its being placed on water, is well adapted for the bedridden.

WATER, BINELLI, Aqua Binellii—w. of Bitter Almonds, Aqua Amygdalarum concentrata—w. Brash, Pyrosis—w. Brocchieri, Aqua Brocchierii—w. Camphor, Mistura Camphoræ.

WATER CANKER, Cancer aquaticus.

WATER, CARUI, STRONG, Spiritus carui—w. Chicken, Chicken-tea—w. Cinnamon, Aqua cinnamomi—w. Cinnamon, strong, Spiritus cinnamomi—w. Cologne, *Eau de Cologne.*

WATER CURE, Hydrosudotherapeia.

WATER, DISTIL'LED, *Aqua destilla'ta*, (F.) *Eau distillée, Holy water*, is generally ordered in extemporaneous prescriptions, but is rarely used. In some cases, however, it is absolutely necessary; as water, containing any saline impregnation—hard water, for example—decomposes certain substances. Distilled water has been recommended as a diet-drink in cancerous affections; and it is used in the religious ceremonies of the Catholic church. In the Pharmacopœia of the United States, it is directed to be made as follows:—Take of *water*, ten gallons. First distil

two pints, and throw them away; then distil eight gallons. Keep the distilled water in glass bottles.

Water-doctor, see Uromantia.

Water-dressing. The treatment of wounds and ulcers by the application of water. It generally consists in dipping folds of lint in water, and placing them on the part:—the whole being covered with oiled silk or elastic gum.

Water, Epileptic, of Langius, Langii aqua epileptica — w. Fennel, Aqua fœniculi.

Water Flag, Yellow, Iris pseudacorus.

Water, Florida,—a celebrated perfume,—may be made of *Ol. Bergami* f ℥iv; *Tinct. benzoin. c.* f ℥ij; *Alcohol.* cong.

Water, Goulard, Liquor plumbi sub-acetatis dilutus.

Water, Hard. Common water, which decomposes and curdles soap; in contradistinction to *soft water*, which is readily miscible with soap. The hardness of water depends upon the presence in it of earthy salts, the most common of which is sulphate of lime.

Water, Holy, Water, distilled — w. Honey, see Mel — w. in the Head, Hydrocephalus — w. Hungary, Spiritus rosmarini.

Water Jags, see Varicella.

Water, Lake, *Aqua ex lacu*, (F.) *Eau de lac*, is apt to be impure, from decayed animal and vegetable matters. A great deal will, however, depend upon the magnitude of the collection, and the degree of stagnation.

Water, Laurel, see Prunus lauro-cerasus — w. Lavender, Spiritus lavandulæ — w. Lemon-peel, see Lemonpeel Tea — w. Lime, Liquor calcis — w. Lime, compound, Liquor calcis compositus — w. Magnesia, aerated, Magnesia, fluid — w. Magnesia, carbonated, Magnesia, fluid.

Water, Marsh, *Aqua paludo'sa*, (F.) *Eau de Marais*, is the most impure of all. It is generally more stagnant, and of course more loaded with decomposing animal and vegetable matters.

Water, Mineral, *Aqua minera'lis, A. salu'bris, A. medica'ta, Fons saluta'rius, F. medica'tus, F. sote'rius, Aqua sote'ria*, (F.) *Eau minérale*. Water, holding in solution different saline and gazeous substances in sufficient quantity to be possessed of medicinal properties, or of a temperature different from that of the ordinary springs of the country.

Mineral waters may be divided into four classes: — 1. *Gazeous* or *Acidulous*. 2. *Chalybeate*. 3. *Saline*. 4. *Sulphureous*. These may be *thermal*, or *cold*, — *natural*, or *artificial*. Many of these divisions, however, run into each other; some of the substances, which they hold dissolved, belonging to one class as well as to another.

1. *Ga'zeous, Acid'ulous* or *Car'bonated Min'eral Waters, Aquæ minera'les acid'ulæ*, (F.) *Eaux minérales gazeuses* ou *acidules*. The waters referred to this class are those that contain carbonic acid gas in such quantity as to communicate to it certain sensible qualities. Waters impregnated with free carbonic acid, sparkle when drawn from the spring, or when poured into a glass. They have a sharp, acidulous taste; but become vapid from exposure to the air. Along with the carbonic acid, there are generally present portions of saline, earthy or metallic matter, chiefly carbonates of lime, magnesia, and iron. Waters, highly impregnated with carbonic acid gas, are grateful to the stomach; increase the appetite, and are diuretic; hence, their utility in dyspepsia, hypochondriasis, and gout. Their properties are, of course, modified by the saline matter that may be also contained in them. The most celebrated amongst the acidulous waters are those of Bar, Chateldon, St. Myon, Mont d'Or, Langeac, Seltzer, Schlangenbad, Sultzmatt, Pyrmont, Spa, Carlsbad, Cheltenham, Scarborough, Saratoga, Ballston, and the Sweet Springs of Virginia.

2. *Chalyb'eate* or *Ferru'ginous Mineral Waters, Aquæ minera'les ferrugino'sæ, A. Chalybea'tæ, A. Martia'les*, (F.) *Eaux minérales ferrugineuses*, contain iron — sulphate, chloride or carbonate, generally the latter — held in solution by an excess of acid. Chalybeate waters have a peculiar styptic taste. They are transparent when taken from the spring; but, when exposed for some time to the air, a pellicle forms on the surface, and a deposite of the iron takes place. Chalybeate waters are used as tonics in debility of all kinds; in all cases, in fact, where iron is considered to be indicated. They are the most numerous of all the classes of mineral waters. In this dictionary, those only are specified which have some celebrity; yet there are upwards of ninety; whilst there are more than sixty of the saline, and upwards of thirty-five of the sulphureous. The most celebrated chalybeates are those of Tunbridge, Scarborough, Spa, Bussang, Forges, Vichy, Pyrmont, Passy, Provins, and Vals.

3. *Saline Mineral Waters, Aquæ minerales sali'næ, Amna alcaliza'ta* (Paracelsus,) *Hydralmæ*, (F.) *Eaux minérales salines*. Waters, holding in solution different saline substances in greater quantity than the acidulous waters. They differ in properties, according to the salts contained in them. The salts usually present are sulphates, chlorides, and carbonates; and the bases, with which the acids forming these are combined, are soda, magnesia, and lime. Saline mineral waters are usually aperient; and the most noted are those of Seltzer, Sedlitz, Balaruc, Bourbonne-les-Bains, Baden, Epsom, Cheltenham, &c.

To this class may also be added *Sea water*.

4. *Sulphu'reous Mineral Waters, Aquæ minerales sulphu'reæ*; when warm, termed *Theiothermæ, Theiopegæ, Theother'mæ, Fontes sulphu'rei cal'idi*, (F.) *Eaux minérales sulfureuses, Eaux sulfurées, E. sulfureuses, E. hépatiques*, &c. These waters owe their distinguishing character to an impregnation of sulphuretted hydrogen, and are at once recognized by their peculiar fetid smell, resembling that of rotten eggs. They usually contain saline substances, which modify their powers. From the action of the sulphuretted hydrogen, they are useful in cutaneous affections; and, from the combined action of this and the saline matter, they are valuable agents in diseases of the digestive organs. They are also employed in cutaneous eruptions; and the warm sulphur baths have been especially celebrated in such cases, as well as in rheumatic affections. The most renowned sulphureous waters are those of Baréges, Bagnères-de-Luchon, Cauterets, Bonnes, Aix in Savoy, Aix-la-Chapelle, Enghien, Harrogate, Moffat, Virginia Springs, &c.

Some springs, as those of Bath, Buxton, Dax, Matlock, Warm and Hot Springs of Virginia, &c., are almost pure *Thermal Mineral Waters*. They are valuable agents in rheumatic affections; the warmth being equable during the whole period the individual is immersed in them; which cannot be the case in the artificial thermal bath.

The following Table by Dr. Pereira exhibits the composition of some of the principal mineral waters.

# FIXED CONSTITUENTS

## ENTERING INTO THE COMPOSITION OF SOME OF THE MORE CELEBRATED

## MINERAL SPRINGS.

PROPORTIONS IN 10,000 PARTS OF WATER.

NOTE.—In reducing the analyses contained in this Table to a uniform measure, in order to render them susceptible of direct comparison with each other, the old English gallon is assumed to be as = 58,338 grains; the wine pint = 7305 grains; the imperial gallon = 70,000 grains; and the German 16-ounce measure = 7368 grains.

The different salts have been reduced to their elementary constituents by Wollaston's scale of chemical equivalents.

### THERMAL.

WATER, MINERAL, Aciduleus water, simple.

WATERS, MINERAL, ARTIFICIAL, (F.) *Eaux minérales artificielles* ou *factices*. These are imitations of the natural; and some of them — as the factitious Cheltenham water, and Sedlitz water — answer the purpose of the natural water tolerably well. The aciduleus and chalybeate waters are, however, most easily imitated.

WATER, NUTMEG, Spiritus myristicæ — w. Parsnep, creeping, Sium — w. Pennyroyal, spirituous, Spiritus pulegii — w. Peppermint, Aqua menthæ piperitæ.

WATER POX, see Varicella.

WATER, PROTOXIDE OF NITROGEN, Aqua nitrogenii protoxydi.

WATER QUALM, Pyrosis.

WATER, RAIN, *Aqua pluvia'lis, A. plu'via, A. Im'brium*, (F.) *Eau de pluie*, when collected at a distance from houses or other elevated objects, is the purest natural water, and has the least specific gravity. The only bodies which it usually holds in solution, are carbonic acid, and minute traces of carbonate of lime and chloride of calcium.

WATER, RICE, see Oryza.

WATER, RIVER, *Aqua fluviat'ilis*, is derived from the conflux of numerous springs and rain water. It is, generally, pretty pure.

WATER, ROSE, Aqua rosæ.

WATER, SEA, *Aqua Mari'na, Humor Dor'idis*, (F.) *Eau de Mer*. This contains chlorides of sodium, magnesium and calcium, and sulphate of magnesia. It is cathartic, and forms the usual glyster at sea. It makes an excellent tonic bath; superior in most cases—especially in scrofula — to the fresh water-bath.

WATER, SEARLE'S PATENT OXYGENOUS AERATED, Aqua Nitrogenii protoxydi — w. Seydschutz, Sedlitz water.

WATER SHIELD, Brasenia hydropeltis.

WATER, SNOW, *Aqua niva'ta*, (F.) *Eau de neige*, has usually been deemed unwholesome. It exactly resembles rain water in composition, and is equally salubrious.

WATER, SODA, Acidulous water, simple — w. Soft, see Water, hard — w. Spearmint, Aqua menthæ viridis.

WATER, SPRING, *Aqua fonta'na, Hydrope'gē*, (F.) *Eau de fontaine*, contains, in addition to the substances detected in rain water, more or less sulphate of lime. When this is to such an extent as to curdle soap, the water is said to be *hard*; if not, *soft*. Hard water is, of course, inferior to soft, for domestic and medicinal purposes.

WATER, STYPTIC, Sydenham's solutio sulphatis cupri composita — w. Tar, see Pinus sylvestris — w. Toast, see Toast-water.

WATER, WELL, *Aqua putea'lis* seu *Putea'na, A. ex pu'teo*, (F.) *Eau de puit, Eau de source*, is the same as spring water, but liable to impregnation, owing to the land springs filtering into the wells, and conveying impurities into them.

WATERS, DISCHARGED OR BROKEN, Profusio aquæ — w. Distilled, Aquæ destillatæ — w. First, Primitiæ.

WATTWEILER, MINERAL WATERS OF. Wattweiler is a small town in the department of Haut-Rhin, at the foot of the Vosges. The waters are aciduleus chalybeates, and contain carbonates of iron, lime, and soda; chloride of sodium, and free carbonic acid.

WAX, Cera — w. Ear, Cerumen.

WAX, MYRTLE. A wax obtained from the fruit of *Myri'ca cerif'era*. It has been prescribed in dysentery.

WAX, YELLOW AND WHITE, Cera flava et alba.

WAXING KERNELS, *Crescen'tiæ*, (F.) *Croissances, Croissants, Glandes de croissance*. A popular term for small tumours, formed by an enlargement of the lymphatic glands—in the groins of children particularly. They have been looked upon as connected with the growth of the body, — hence their name.

WAY, Saxon wæg, *Via, Passage, Odos*, (F.) *Voie*. A name given to different canals.

WAYS, DIGESTIVE, *Digestive Pas'sages, Primæ Viæ*, (F.) *Voies digestives, Premières voies*, are the series of hollow organs of digestion, composed of mouth, œsophagus, stomach, and small and large intestines. The term is often restricted to the first three of these.

WAYS, SECOND, *Second Passages, Secun'dæ viæ*, (F.) *Secondes voies*, comprise the chyliferous, lymphatic and blood vessels.

WEAKSIGHTEDNESS, Asthenopia.

WEAL, Wheal.

WEANING, from Saxon wenan, 'to wean;' *Ablacta'tio, Apogalactis'mus*, (F.) *Sévrage*. The act of depriving the infant, permanently, of the breast, in order to feed it on other and more solid nourishment.

WEANING BRASH, see Brash, weaning.

WEATHERCOCKS, Impatiens.

WEB, MUSCULAR, Panniculus carnosus.

WEB-EYE, Caligo.

WEDGED, (D.) weggh e, *Inclu'sus, Inhæ'rens*, (F.) *Enclavée*. The head of the fœtus is said to be wedged in the pelvis, when it remains fixed, notwithstanding the uterine efforts.

The condition is called *Incunea'tio* seu *Inclava'tio fœtûs, Spheno'sis, Inhærens*, (F.) *Enclavement*. See Paragomphosis.

WEED, see Mastitis — w. in the Breast, see Mastitis — w. Dyer's, Reseda luteola — w. Field, Anthemis cotula—w. Horsefly, Sophora tinctoria — w. Milk, Apocynum androsæmifolium — w. Soldiers', Matico—w. Silver, Potentilla anserina.

WEEPING, Fletus.

WEIGHT, from Saxon pægan, 'to weigh;' (F.) *Pésanteur*. A sensation of heaviness or pressure over the whole body, or over a part — the stomach or head, for example.

WEIGHTS AND MEASURES, *Pon'dera et Mensu'ræ*, (F.) *Poids et Mésures*. The importance of possessing a uniform system of weights and measures has impressed the scientific of all countries, and numerous endeavours have been made to accomplish the object. It is, however, a matter of considerable difficulty, and one not likely to be attained. The new French measures are are upon decidedly the best footing, but they are not adopted out of France. The greatest diversity prevails over Europe in the measures, both of weight and capacity. Some of the following tables will show, that every subdivision of the pound, as well as the pound itself, differs in England and in France.

## WEIGHTS.

*Troy Weight, as used by the British Apothecaries. —Pondus pharmaceu'ticum* seu *medicinal.*

| | | |
|---|---|---|
| The *pound* ℔ | contains | 12 ounces. |
| The *ounce* ℥ | | 8 drachms. |
| The *drachm* ʒ | | 3 scruples. |
| The *scruple* ℈ | | 20 grains. |
| The *grain* gr. | | |

These, and the signs by which they are denoted, are the same in all the British Pharmacopœias, as well as in the American.

| *lb.* | | *Oz.* | | *Drm's.* | | *Scrup.* | | *Grs.* |
|---|---|---|---|---|---|---|---|---|
| 1 | = | 12 | = | 96 | = | 288 | = | 5760 |
| | | 1 | = | 8 | = | 24 | = | 480 |
| | | | | 1 | = | 3 | = | 60 |
| | | | | | | 1 | = | 20 |

*Poids de Marc.*

| | | |
|---|---|---|
| The *pound* | contains | 16 ounces. |
| The *ounce* | | 8 drachms. |
| The *drachm* | | 3 scruples. |
| The *scruple* | | 24 grains. |
| The *grain* | | |

*Avoirdupois.*

| *Pound.* | *Ounces.* | *Drachms.* | *Troy grains.* |
|---|---|---|---|
| *lb.* 1. = | 16 = | 256 = | 7000 |
| | 1 = | 16 = | 437.5 |
| | | 1 = | 27.34375 |

The avoirdupois drachm is sometimes divided into three scruples, and the scruple into ten grains. The pound of 7680 grains avoirdupois = 7000 grains troy, and hence 1 grain troy = .97 grain avoirdupois.

The *Poids de Marc* is that employed by the French Pharmaciens, when the new weights are not. The Avoirdupois is now used by the Dublin College.

The following tables exhibit the relative value of the old French and English weights:

| *Poids de Marc.* | *Troy Wt.* | *Avoird.* | *Troy grs.* |
|---|---|---|---|
| 1 pd. (*livre*) = | 1.31268*lb* = | 1.080143*lb* = | 7561 |
| 1 oz. (*once*) = | .984504*oz* = | 1.080143*oz* = | 472.5625 |
| 1 dr. (*gros.*) = | .954504*dr* = | | 59.0703125 |
| 1 gr. = | | | .820421 |

| *Troy.* | | *Poids de Marc.* | | *French grains.* |
|---|---|---|---|---|
| 1 pound | = | 0.76180 *lb.* | = | 7561 |
| 1 ounce | = | 1.01574 *once* | = | 585.083 |
| 1 drachm | = | 1.01574 *gros* | = | 73.135 |
| 1 grain | | | | 1.219 |

| *Avoirdupois.* | | *Poids de Marc.* | | *French grains.* |
|---|---|---|---|---|
| 1 pound | = | 0.925803 *lb.* | = | 8532.3 |
| 1 ounce | = | 0.925803 *once* | = | 533.27 |

| | | |
|---|---|---|
| To convert French grains into Troy grains, divide by | } | 1.2189 |
| " Troy grains into French grains, multiply by | | |

VALUES OF THE GRECIAN, ROMAN, AND ARABIAN WEIGHTS AND MEASURES IN POIDS DE MARC.

1. *Weights of the Ancient Greeks.*

| | lbs. | oz. | dr. | gr |
|---|---|---|---|---|
| The *talent* (ταλαντον) | 54 | 2 | 5 | 24 |
| The *mina* (μινα) | 14 | 3 | 40 | |
| The *drachm* (δραχμη) | 1 | 11 | | |
| The *obolus* (οβολος) | | | | 13 |
| The *cerotion* (κερατιον) | | | | 4 |
| The *chalcus* (χαλκους) | | | | 2 |
| The *septon* (σεπτον) | | | | ½ |

2. *Weights of the Ancient Romans.*

| | oz. | dr. | gr. |
|---|---|---|---|
| The *pound* (*libra*) | 10 | 6 | 48 |
| The *ounce* (*uncia*) | 7 | 16 | |
| The *duella* | 2 | 29 | |
| The *sicilicus* | 1 | 58 | |
| The *sextula* | 1 | 14 | |
| The *consular denier*, *denarius* | 1 | 2 | |
| The *imperial denier* or *drachm*, *drachma* | | 65 | |
| The *victoriatus* | | 37 | |
| The *scriptulum* or *scruple* | | 21 | |
| The *obolus* | | 11 | |
| The *siliqua* | | 4 | |

The Greeks divided their obolus into *chalci* and *lepta:* some divided it into 6 *chalci*, and each *chalcus* into 7 lepta; others into 8 chalci, and every chalcus into 8 lepta or *minuta*.

Dr. Milligan, in his edition of Celsus, gives the following table, exhibiting the Troy weight of measures of capacity and of weight in use amongst the Romans.

| | *Urna.* | *Libra.* | *Uncia.* | *Denarius.* | *Scrupulus.* | *Sextans.* | *Chalcus.* | *Grana.* |
|---|---|---|---|---|---|---|---|---|
| Amphora | 2 = | 80 = | 960 = | 6720 = | 20160 = | 40320 = | 403200 = | 420480 |
| Urna | 1 = | 40 = | 480 = | 3360 = | 10080 = | 26160 = | 210600 = | 210240 |
| Congius | ½ = | 10 = | 120 = | 840 = | 2540 = | 5040 = | 50400 = | 52920 |
| Sextarius | 1 2-3 = | 20 = | 140 = | 420 = | 840 = | 840 = | 8400 = | 8760 |
| Libra | 1 = | 12 = | 84 = | 252 = | 504 = | 504 = | 5040 = | 5256 |
| Hemina | 8 4-7 = | 60 = | 180 = | 360 = | 360 = | 360 = | 3600 = | 3759 |
| Acetabulum | 2 1-7 = | 15 = | 45 = | 90 = | 90 = | 90 = | 900 = | 939 |
| Sesqui-cyathus | 2 1-7 = | 15 = | 45 = | 90 = | 90 = | 90 = | 900 = | 939 |
| Cyathus | 1 3-7 = | 10 = | 30 = | 60 = | 60 = | 60 = | 600 = | 626 |
| Sescuncia | 1½ = | 10½ = | 31½ = | 63 = | 63 = | 63 = | 630 = | 657 |
| Uncia | 1 = | 7 = | 21 = | 42 = | 42 = | 42 = | 420 = | 438 |
| Cochleare | | 2½ = | 7½ = | 15 = | 15 = | 15 = | 150 = | 156 |
| Drachma | | 1 = | 3 = | 6 = | 6 = | 6 = | 60 = | 62 4-7 |
| Denarius | | 1 = | 3 = | 6 = | 6 = | 6 = | 60 = | 62 4-7 |
| Scrupulus | | | 1 = | 2 = | 2 = | 2 = | 20 = | 20 2-3 |
| Scrupulus dimidiatus | | | ½ = | 1 = | 1 = | 1 = | 10 = | 10 1-3 |
| Obolus | | | | 1 = | 1 = | 1 = | 10 = | 10 1-3 |
| Sextans | | | | 1 = | 1 = | 1 = | 10 = | 10 1-3 |
| Chalcus | | | | | | | 1 = | 1 1-3 |

He gives also the following '*Carmen Mnemonicum*,' which exhibits the analogies of the Roman and British imperial weights.

To the congius and gallon, each, ten pounds allow,
On the bushel and amphora eighty bestow;
Rome's pound, as in Troy weight, twelve ounces obtains,
But her ounce is Aboirdupois, strictly, in grains:
Denarii drams, scruples scrupli define,
Sextarius answers to our bottle of wine,
And the mna's a short pint — fourteen ounces in fine.

3. *Weights said to be of the Arabians, Modern Greeks, and Latins of the barbarous periods of the Middle Ages.*

| | oz. | dr. | gr. |

A good section on weights and measures is contained in the edition of "The Seven Books of Paulus Ægineta," by Mr. Francis Adams, published by the Sydenham Society of London, vol. iii, p. 609, London, 1847.

Besides the weights and measures above mentioned, employed by the moderns, there are modes of estimating the quantities of substances by approximation. For example:—

A *glassful* or *cupful*, ((F.) *Verre*,) is reckoned to contain 4 or 5 fluidounces.

A *wine-glassful*, 1½ ounce or two ounces.

A *table-spoonful*, ((F.) *Cuiller à bouche*,) about half an ounce.

A *coffee* or *dessert-spoonful*, about 3 drachms.

A *tea-spoonful*, a fluidrachm.

A *handful, manipulus*, ((F.) *Poignée*,) as much as can be held in the hand.

The *Pugillus* ((F.) *Pincée*) is as much as can be held by the three fingers.

These last quantities are occasionally prescribed by the French practitioners. Their weights must, of course, vary, according to the article. The authors of the Parisian codex have valued them, as regards certain substances.

| | French. oz. | dr. |
|---|---|---|
| A *Manipulus* of barley weighs | 3 | 2½ |
| " linseed | 1 | 4 |
| " linseed meal | 3 | 3 |
| " dried mallow leaves | 1 | 3 |
| " dried cichory leaves | 1 | 0 |
| " flowers of the tilia | 1 | 2½ |

| | dr. | scr. | gr. |
|---|---|---|---|
| A *Pugillus* of chamomile flowers weighs | 2 | | |
| " arnica | 1 | 2 | |
| " marsh-mallow | 1 | 1 | |
| " mallow | | | 60 |
| " fennel seeds | | 1 | 60 |
| " aniseed | 1 | ½ | 60 |

A *hen's egg*, newly laid, weighs about 2 ounces and 2 drachms: when deprived of its shell, 2 ounces. The *white* weighs 1 ounce, 2 drachms, and 57 grains: the *yolk*, 5 drachms and 15 grains.

WEILBACH, MINERAL WATERS OF. The village of Weilbach is in the plain between the Maine and the southern extremity of the Taunus hills. It has in its neighbourhood a cold sulphureous alkaline spring, the water of which is bottled and exported, although not of great efficacy. Its use is at times combined with that of the saline springs in Nassau, and of Baden-Baden, in various chronic abdominal and thoracic affections.

WELD, Reseda luteola.

WELK, *Whelk*. An inequality; a protuberance; a cutaneous eruption of this character. Acne.

WEMDING, MINERAL WATERS OF. These waters are situate about four leagues from Donawert in Bavaria. They contain sulphuretted hydrogen; carbonates of lime, magnesia, and soda; sulphates of lime and magnesia; a little chloride of calcium, and oxide of iron; and are much used in asthenic diseases.

WEN, Sax. Þen, *Lu'pia, Tumour*, (F.) *Loup*. A name given to circumscribed, indolent tumours, without inflammation or change of colour of the skin. They may be met with in almost every part of the body. Their magnitude, as well as nature, is very variable. The term is sometimes given to an encysted tumour, and to bronchocele.

WESTERN ISLANDS, Azores.

WEST INDIES, (CLIMATE OF.) The climate of the West Indies has long been regarded as favourable to the consumptive. In confirmed consumption, it appears, however, to be positively injurious. As a prophylactic for those predisposed to consumption, it is generally favourable. The nature of the patient's constitution, in regard to the effects of elevated temperature, has always to be taken into account. In diseases that are benefited by warm climates, the West Indies afford an appropriate residence. The islands in which the invalid can best obtain all the advantages of the climate, are Jamaica, Barbadoes, St. Vincents, Antigua, St. Kitts, and Santa Cruz.

WHAHOO, see Euonymus.

WHEAL, *Weal, Wale*. A ridge, or elevation of the skin, produced by a rod or whip; or as if produced in that manner. Such elevations are seen in urticaria.

WHEAT, Triticum—w. Indian, Zea mays—w. Turkey, Zea mays.

WHELK, Acne, Welk—w. Chin, Sycosis—w. Rosy, Gutta rosea.

WHEY, Serum lactis—w. Mustard, see Sinapis—w. Rennet, see Serum lactis—w. Tamarind, see Tamarindus—w. Vinegar, see Acetum—w. Wine, Wine whey.

WHIFFING MURMUR, see Murmur, respiratory.

WHISKY, see Spirit. A spirituous liquor obtained from oats, potatoes, &c., by distillation.

WHISKY LIVER, Liver, nutmeg.

WHIS'PERING; evidently an onomatopœia (*hooisp'ering*), *Susurra'tio, Susurra'tion*. Articulation of the air sent through the vocal tube without any action of the glottis.

WHISTLING, *Sifflement*, see *Râle sibilant*.

WHITE, Flake, Plumbi subcarbonas.

WHITE BALL, Cephalanthus occidentalis—w. Leaf, Pyrola maculata, Spiræa tomentosa—w. Leg, Phlegmatia dolens—w. Matter of the brain, see Cerebrum—w. Root, Angelica lucida, Asclepias tuberosa.

WHITE, SPANISH, Bismuth, subnitrate of.

WHITE SWELLING, Hydrarthrus—w. Swelling of lying-in women, Phlegmatia dolens—w. Substance of Schwann, see Nerve fibre—w. Sulphur, see Virginia, mineral waters of—w. Weed, Chrysanthemum leucanthemum—w. Wood, Liriodendron, Tilia.

WHITENESS OF COMPLEXION, Paleness.

WHITES, THE, Leucorrhœa.

WHITLEYA STRAMONIFOLIA, Anisodus luridus.

WHITLOW, Paronychia.

WHOOPING-COUGH, Pertussis.

WHORLYWORT, Leptandria purpurea.

WHORTLEBERRY, Vaccinium myrtillus, Vaccinium vitis idæa—w. Bears', Arbutus uva ursi.

WHORTS, BLACK, Vaccinium myrtillus.

WIDOW-WAIL, Cneorum tricoccum, Daphne Alpina.

WIESBADEN, MINERAL WATERS OF, see Wisbaden.

WIESSAU, MINERAL WATERS OF. These waters are situate about four leagues from the convent of Waldsassen in Bavaria. They contain

carbonic acid; carbonates of lime and magnesia; chlorides of calcium, magnesium, and aluminum; carbonate of soda, and much oxide of iron. The Bavarians consider them to resemble the waters of Pyrmont.

WILD, Sax. þilδ, (D.) Wild. An epithet given to the countenance, when not in harmony with the condition of the individual, and indicating strong mental emotion; — a *wild look*, (F.) *Physiognomie égarée.*

WILDBAD, MINERAL WATERS OF. Wildbad is a small town of Wurtemberg, three German miles from Baden-Baden. It is much frequented as a watering-place. The water is thermal, from 95° to 100° of Fahr., and is much employed in cases in which thermal waters are indicated. It is used internally, a pint not containing more than a grain of solid ingredients, which consist of salts of soda and lime. The proportion of carbonic acid gas is very small.

WILDUNGEN, MINERAL WATERS OF. Wildungen is situate a few miles from Cassel in Germany. In its neighbourhood are several mineral springs; the chief of which, according to Stucke, contain a bituminous matter; chloride of sodium and sulphate of soda; carbonate and sulphate of lime, &c. They are used, chiefly, as refrigerants.

WILL, Voluntas.

WILLOW, Salix.

Willow Herb, common, Lythrum salicaria — w. Herb, great, Epilobium augustifolium — w. Herb, purple, Lythrum salicaria — w. Herb, purple veined, Epilobium coloratum.

Willow, Low-bush, Salix humilis — w. Speckled, Salix humilis — w. Red, Cornus sericea — w. Rose, Cornus sericea — w. Sweet, Myrica gale.

WIND, Sax. þinδ, *Ventus, An'emos*, (F.) *Vent.* Winds exert considerable influence on the animal economy; acting by their temperature, which necessarily modifies that of the circumambient air, as well as by their moisture or dryness, and by the emanations of different kinds, which they transport to greater or less distances. The winds which blow over a considerable extent of country, are dry and serene: those which come from the ocean are moist and chilly.

Wind Dropsy, Emphysema, Tympanites — w. Flower, Anemone — w. Pipe, Trachea — w. Root, Asclepias tuberosa.

WINDINESS, Flatulence.

WINDY, *Flatulen'tus, Flat'ulent, Va'pourous*, (F.) *Venteux.* That which causes wind or flatulence; also, that which is caused by wind or flatulence; as *windy food, windy colic*, &c. Also, one affected with flatulence, or who is 'troubled with the wind.'

WINE, Sax. þin, (G.) Wein, originally, perhaps, from οινος, *Œnos, Vinum*, (F.) *Vin.* A name given by chymists to all liquors that have become spirituous by fermentation. The term is generally, however, restricted to the fermented juice of the grape, or of fruits, the product of whose fermentation resembles, in almost all respects, that of the juice of the grape. Wine is composed of alcohol; saccharine matter; malic acid; tartaric acid; bitartrate of potass; acetic acid; an extractive colouring matter, more or less bitter, and partly resinous; and sometimes of an aromatic substance. The extractive colouring matter is chiefly met with in red wines. All these constituents, except the alcohol, are found ready formed in the grape. The alcohol proceeds from the decomposition of the saccharine matter. A part of the acetic acid is also formed during fermentation.

The following table, drawn up by Mr. Brande, exhibits the quantity of spirit in different kinds of wine and liquors. It is proper, however, to remark, that many of these wines are prepared for the London market, and are more brandied, or "reinforced," than the same varieties sold in the United States. This is strikingly the case with port. Dr. Henderson, too, has remarked, that some of the wines analyzed by Mr. Brande were mixed with a considerable quantity of adventitious alcohol. Dr. Henderson's additions and corrections have the letter H. affixed.

Proportion of Alcohol, s. g. 0.825, in one hundred parts by measure of the following Wines, and Malt and Spirituous Liquors.

The only wine recommended in some pharmacopœias is *Sherry, Vinum, Vinum album Hispan'icum, Leuce'nus.* It is a *dry wine;* the least variable in its properties, and agrees best with the dyspeptic. Other wines used officinally are—*Canary* or *Sack wine, Vinum Canari'num; Mountain wine, Vinum album monta'num; Tent wine; Rhenish wine, Vinum Rhena'num;* and *Port wine, Vinum rubrum Portugal'licum.*

The wines habitually drunk are almost innumerable. Those that are sweet, or contain a large portion of free, saccharine matter, are decidedly the least wholesome to the dyspeptic.

When wine is good, and of a proper age, it is tonic and nutritive; when new, flatulent and cathartic, disagreeing with the stomach and bowels. In medicine, it is a valuable tonic in the last stage of typhus, when the skin is not too hot and dry. Its use, however, requires great caution; and when once commenced under proper circumstances, it cannot be suddenly dropped without mischief. It is, perhaps, the best permanent stimulus in the catalogue of the materia medica.

*Mulled Wine* is made as follows:—Take of bruised *cinnamon* ℥ss; half a *nutmeg* grated; and ten bruised *cloves.* Infuse in boiling *water* Oss for an hour; strain and add *sugar* ℥j. Pour the whole into a pint of hot *Port* or *Sherry.* Useful in adynamic conditions.

WINE, AMINÆAN, Aminænum vinum—w. of Aloes, Vinum aloes—w. Antimonial, Vinum antimonii tartarizati—w. Antiscorbutic, Vinum antiscorbuticum—w. Aromatic, Vinum aromaticum—w. Bark, compound, Vinum de kinâ kinâ compositum—w. Barley, Cerevisia—w. Bitter, diuretic, Vinum diureticum amarum.

WINE BITTERS, *Vinum gentia'næ compositum.* The formulæ for these may be various. The following is as good and as agreeable as any. (*Rad. gentian.* ℔j, *cort. aurant.* ℥x, *sem. cardam.* cont. ℥iv, *cinnam. cort.* ℥iv, *wine,* foreign or domestic, three gallons and a half.) Tonic and stomachic.

WINE, CEDAR, Cedrinum vinum—w. Champagne, Vinum campanum—w. Chian, Chium vinum—w. of Colchicum, Vinum colchici—w. of Colchicum seed, Vinum colchici seminis—w. of Ergot, Vinum ergotæ—w. of Gentian, compound, Vinum gentianæ compositum—w. of Hellebore, white, Vinum veratri—w. Ipecacuanha, Vinum ipecacuanhæ—w. of Iron, Vinum ferri—w. Medicated, Vinum medicinale—w. Mulled, see Wine—w. of Opium, Vinum opii—w. Port, Vinum Portugallicum—w. Pullet, *Poulet, vin de*—w. of Quinia, Vinum quiniæ—w. Rhubarb, Vinum rhei palmati—w. Sherry, Vinum—w. Steel, Vinum ferri—w. Tobacco, Vinum tabaci.

WINE WHEY, *White Wine Whey.* Take of good *milk* two-thirds of a pint, and add *water* to make a pint. Take of *sherry,* or any other good white *wine,* two glasses, and of *sugar* a dessert-spoonful. Place the milk and water in a deep pan on the fire; and the moment it boils, pour into it the wine and sugar. Stir assiduously for 12 or 15 minutes, whilst it boils. Lastly, strain through a sieve.

It is a good mode of giving wine in adynamic states.

WINE, WHITE, see Wine—w. of Wormwood, Vinum absinthites.

WING-SEED, Ptelea trifoliata.

WINKING, Scardamygmus.

WINTER-BARK TREE, Wintera aromatica—w. Berry, Virginia, Prinos—w. Berry, smooth, Prinos lævigatus—w. Berry, whorled, Prinos.

WINTER BLOOM, Hamamelis Virginiana—w. Cough, Bronchitis, chronic—w. Green, Gaultheria—w. Green, round-leaved, Pyrola—w. Green, spotted, Pyrola maculata.

WINTERA, see Wintera aromatica.

WIN'TERA AROMAT'ICA, *Drimys Winteri, Winter'na aromat'ica, Winter-bark Tree.* The bark, *Wintera* (Ph. U. S.), *Cortex Winter'nus, Cortex Winteranus Magellan'icus, Cortex Magellan'icus, Cinnamo'mum Magellan'icum,* (F.) *Écorce de Winter, Canelle poivrée,* is very much allied in its properties to Canella alba.

WINTERANA AROMATICA, Wintera aromatica.

WISBADEN, MINERAL WATERS OF. Wisbaden is a town of Germany, about 6 miles north of Mainz, and 22 west of Frankfort. It has been long celebrated for its hot springs; and is much frequented. There are numerous cold and thermal springs,—the former containing sulphohydric acid; the latter being saline and acidulous. The temperature of the hot springs varies from 117° to 160° Fahr.

WISMUTHUM, Bismuth.

WOAD, Isatis tinctoria.

WOLFBANE, Veratrum viride.

WOLFSBANE, Aconitum—w. Wholesome, Aconitum anthora.

WOLFSCLAW, Lycopodium.

WOLFSJAW, see Harelip.

WOMANHOOD, Mulieritas.

WOMB, Uterus—w. Falling down of the, Prolapsus uteri.

WOMB GRAIN, Ergot.

WOMB, LACERATION OF THE, Uterus, rupture of the—w. Tympany of the, Physometra.

WOOD, BRAZIL, Cæsalpinia echinata—w. Elk, Andromeda arborea—w. Fernambuco, Cæsalpinia echinata.

WOOD-LICE, Onisci aselli—w. Nicaragua, see Cæsalpinia—w. Peach, see Cæsalpinia—w. Pernambuco, Cæsalpinia echinata—w. Sampfen, Cæsalpinia sappan—w. Sappan, Cæsalpinia sappan—w. Sorrel, Oxalis acetosella—w. Sour, Andromeda arborea—w. Waxen, Genista tinctoria.

WOODBINE, COMMON, Lonicera periclymenum.

WOODROOF, SWEET-SCENTED, Asperula odorata.

WOODS, SUDORIF'IC, (F.) *Bois sudorifiques.* This term is applied, collectively, to the guia-

cum, sassafras, china, and sarsaparilla; which are often used together to form the sudorific decoction.

WOORARA, Curare.

WORM, see Alembic, Vermiform process — w. Bark tree, Geoffræa inermis — w. Cakes, Story's, see Cakes, worm, Story's — w. Disease, Helminthiasis — w. Goosefoot, Chenopodium anthelminticum—w. Grass, perennial, Spigelia Marilandica.

Worm, Guinea, Dracunculus.

Worm Loz'enges, Ching's. Empirical preparations, which consist of yellow and brown lozenges. The former are directed to be taken in the evening; the latter on the following morning. The *Yellow Lozenges.* (*Saffron,* ℥ss, *water,* Oj; boil, and strain; and add of *white panacea of mercury,* (calomel washed in spirit of wine,) ℔j, *white sugar,* 28 ℔s, *mucilage of gum tragacanth* q. s., to make a mass. Divide, so that each lozenge may contain a grain of the panacca.) The *Brown Lozenges.* (*Panacea* ℥vij, *resin of jalap* ℔iijss, *white sugar* ℔ix, *mucilage of gum tragac.* q. s. Each lozenge to contain gr. ss of the panacea.)

Worm Lozenges, Sherman's, are said to be composed of *calomel, gamboge,* and *sugar.*

*Peters's Worm Lozenges* are said to be composed in a similar manner.

Worm Root, Spigelia Marilandica — w. Seed, Artemisia santonica, Chenopodium anthelminticum — w. Seed, goosefoot, Chenopodium anthelminticum — w. Weed, Corsican, Corallina Corsicana, Polanisia graveolens—w. Weed, white, Corallina — w. Wood, biennial, Artemisia biennis—w. Wood, common, Artemisia absinthium — w. Wood, creeping, Artemisia rupestris — w. Wood, lesser, Artemisia Pontica — w. Wood, Roman, Artemisia Pontica—w. Wood, Sea, Artemisia maritima — w. Wood, silky, Artemisia glacialis.

WORMIA'NA OSSA seu OSSIC'ULA, *O. epacta'lia, O. raphogeminan'tia, O. triq'uetra, O. triangula'ria Bla'sii, Claves calva'riæ, O. sutura'rum,* (F.) *Os Wormiens, Clefs du crâne, Os épactaux, Os surnuméraires,* (Ch.), *Os intercalés, Os triangulaires.* Small bones, which are sometimes observable in the sutures of the bones of the cranium, of which they form a part. They were called *Wormiana,* from Olaus Wormius, who is said to have first described them. They had been previously, however, mentioned by G. Andernach, a physician at Strasburg. The Ossa Wormiana exist more commonly in the sutures of the vault of the skull; especially in the lambdoidal, sagittal, and squamous. They are uncommon at the base of the skull. Their size is very variable, and shape irregular. Their structure and development are similar to those of the other bones of the cranium; and, like them, they are bounded by sutures.

WORMS, originally from (L.) *Vermes; Intes'tinal Worms, Entozo'a, Entozoa'ria, Enterozo'a, Endozo'a, Vermes intesti'ni, Entelminth'a, Enthelmin'thes, Helmin'thi, Helminth'ia Alvi, H. pod'icis, Splanchnelmin'tha, Entoparasites,* (F.) *Vers, Vers intestinaux, Entozoaires.* Animals whose common character is that of existing only in other animals; hence their name *entozoa,* from ἐντος, 'within,' and ζωον, 'animal.' They are met with, not only in the natural cavities, but even in the tissue of the organs. Cuvier, Rudolphi, Brera, Bremser, Laënnec, and others, have endeavoured to classify them, — some according to their shape; others, according to their anatomical characters.

The following table exhibits the entozoa, which have been met with in the human body, and their usual habitat:—

| *Entozoa.* | *Where found.* |
|---|---|
| Trichoceph'alus dispar, Oxyu'ris vermicula'ris, As'caris lumbricoï'des, Bothrioceph'alus latus, Tæ'nia so'lium, Ditrachyc'eras rudis, | Intestines. |
| Diploso'ma crena'ta, Spirop'tera hom'inis, Dactyl'ius aculea'tus, | Urinary bladder. |
| Dis'toma hepat'icum, | Gall bladder. |
| Stron'gylus gigas, | Kidney. |
| Fila'ria oc'uli, | Eye. |
| Acephalocyst'is endog''ena, | Liver. |
| Echinococ'cus hom'inis, | Liver, Spleen, and Omentum. |
| Polys'toma pinguic'ola, | Ovary. |
| Polys'toma vena'rum seu sanguic'ola, Hexathyrid'ium vena'rum, | Veins. |
| Fila'ria bronchia'lis, | Bronchial glands. |
| Trichi'na spira'lis, Cysticer'cus cellulo'sæ, | Muscles. |
| Acephalocyst'is multif'ida, | Brain. |
| Fila'ria medinen'sis, | Cellular texture. |

The most common of these are:—the Oxyures vermiculares, Ascarides lumbricoïdes, and Tænia, which are found in the intestines. The origin of these worms is extremely singular, and more favourable than any other fact to the hypothesis of spontaneous generation in the lowest tribes of animated nature. They are certainly not identical with any worms out of the body. They are most commonly met with in children improperly fed; but their presence cannot be positively detected by any symptom, except that of the discharge of the worms themselves in the evacuations. They may, of course, give rise to every kind of irritation in the intestinal tube, and to sympathetic disturbance in most of the functions; but all these signs may be produced by intestinal irritation resulting from other causes.

*Anthelmintics* or *vermifuges,* employed, as the name imports, for their removal, may be of two kinds—*mechanical* and *true.* To the first class—the *mechanical*—belong *Emetics, Purgatives, Mucuna, powdered Tin,* &c. To the latter—the *true anthelmintics, — Turpentine, Chenopodium anthelminticum, Pink-root, Semina Santonici,* &c. Of these, the best is turpentine. See Oleum terebinthinæ. The great object, however, is to prevent their generation. This must be done by generous diet, fresh air, and tonics, where necessary.

WORT, Sax. ṗẏṛt, *Mustum, Infu'sum Bynes* seu *Bra'sii* seu *Malti,* (F.) *Moût de la Bière.* An infusion of malt. This has been recommended in scurvy. One measure of ground malt is added to three equal measures of boiling water. The mixture must be well stirred, and left to stand covered three or four hours. Dose, one to four pints, daily. It has, also, been recommended in other cases, where a strong putrescent disposition appeared to prevail in the fluids, as in cancerous and phagedenic ulcers. It is not now employed.

WOUND, Sax. ṗunδ, *Vulnus, Volnus,* (diminutive *Vulnus'culum,*) *Plaga, Trauma, Troma, Tresis, Tresis Vulnus, Blabē, Tymma,* (F.) *Plaie, Blessure.* A solution of continuity in the soft parts, produced by some mechanical agent. Wounds present innumerable differences, as regards their situation; the parts interested; their direction; size; shape; the nature of the instrument or agent by which they are produced; their more or less simple or complex character, duration, &c. A wound is called *incised,* (F.) *Coupure, Incision,* when made by a cutting instrument;—*punctured,*

*Nygma*, (F.) *Piqure*, when made by a pointed instrument; — *lacerated*, (F.) *Déchirure, Plaie par arrachement*, when the parts are lacerated or torn by the wounded body; *poisoned, Cellulitis venena'ta, Necu'sia*, (F.) *Plaie envenimée*, when some virulent or venomous substance has been introduced;—and *contused*, (F.) *Plaie contuse*, when produced by a blunt body. *Gunshot wounds, Sclopetopla'gæ, Vul'nera sclopeta'ria*, (F.) *Plaies d'armes à feu* ou *d'arquebusade, Coup de feu*, belong to the last division.

WOURALI, Curare.

WOURARI, Curare.

WOURARU, Curare.

WRACK, SEA, Fucus vesiculosus.

WRACK, BLADDER, YELLOW, Fucus vesiculosus.

WRAPPING UP, (OF THE HYDROPATHISTS,) *Emaillottage*.

WRENCH, Sprain.

WRIGHTIA ANTIDYSENTERICA, Nerium antidysentericum.

WRINKLE, Sax. ppincle, *Ruga, Rytis, Rhacus, Rhachus, Rhagus, Rhysse'ma, Corruga'tio cutis*, (F.) *Ride*. A furrow or fold in the skin of the face, forehead, vagina, &c. See Corrugation.

WRINKLED, *Rugo'sus, Rugous, Rugose*, (F.) *Ridé*. Full of wrinkles.

WRIST, Carpus.

WRIST-DROP. Paralysis of the muscles of the forearm, induced by the poison of lead.

WRITERS' SPASM, see Spasm, writers'.

WURALI, Curare.

*WURSTGIFT*, Allantotoxicum.

WRONG HEIR, Cancellus.

# X.

XALAPPA, Convolvulus jalapa.

XANTHIC OXIDE, Uric oxide.

XANTHINE, Uric oxide.

XAN'THIUM, *X. struma'rium* seu *Orienta'lē* seu *Vulga'rē, Barda'na minor, Lappa minor, Lesser Burdock, Burweed, Burthistle, Clotbur*, (F.) *Lampourde, Petit Glouteron, Petite Bardane*. This herb, as one of its names imports, was once esteemed for the cure of scrofula. The seeds have been administered in cutaneous affections.

XANTHIURIA, Xanthuria.

XANTHOP'SIA, from ξανθος, 'yellow,' and οψις, 'vision.' Yellow vision, — as sometimes occurs in jaundice.

XANTHORRHIZA, Xanthorrhiza apiifolia.

XANTHORRHI'ZA APIIFO'LIA, *Xanthorrhiza, X. simplicis'sima, X. Marboï'ca, Zanthorrhiza tincto'ria, Yellow Root, Parsley-leaved Yellow Root* or *Yellow wort, Shrub yellow root*. The root of this American plant — *Xanthorrhiza*, (Ph. U. S.) —is a strong and pleasant bitter; and, in the dose of two scruples, sits easy upon the stomach.

XANTHOS, Yellow.

XANTHO'SIS. A term applied to the yellow discoloration often observed in cancerous tumours — especially in encephaloid of the testicle. — Lebert.

XANTHOX'YLUM CLAVA HER'CULIS, *Prickly Ash, Toothach Tree*, (F.) *Clavalier à feuilles de frêne, Frêne épineux*. The bark—*Xanthoxylum*, (Ph. U. S.) — is a very strong stimulant and powerful sialagogue. It has been given, internally, in rheumatism. Another species—*Xanthoxylum fraxinifo'lium, Xanthoxylum fraxin'eum, Shrubby prickly ash, Toothach bush, Pell'itory, Yellow wood, Suterberry*, — possesses active powers. A spirituous infusion of the bark has been highly recommended in cases of violent colic. The fresh juice, expressed from the roots of the xanthoxylum, is said to afford relief in the dry bellyache of the West Indies. A decoction of the bark is sometimes used as a wash to foul ulcers.

XANTHU'RIA, *Xanthiu'ria*, from ξανθος, 'yellow,' and ουρον, 'urine.' A condition of the system and of the urine, in which xanthic oxide is deposited from the urine.

XANTICA, Carminatives.

XANTOLINA, Artemisia santonica.

XENODOCEUM, Hospital.

XENODOCHEUM, Hospital.

XERANSIS, Arefaction, Drying.

XERANTIA, Siccantia.

XERA'SIA. Same etymon; from ξηρος, 'dry.' A disease of the hairs, which become dry, cease to grow, and resemble down covered with dust.—Galen.

XERION, Catapasma.

XEROCOLLYR'IUM, from ξηρος, 'dry,' and κολλουριον, 'a collyrium;' *Collyr'ium siccum*. A dry collyrium.

XERODER'MA, from ξηρος, 'dry,' and δερμα 'skin.' Diminution of secretion of the sebaceous glands.

XEROMA, Xeropthalmia—x. Conjunctival, Xerophthalmia.

XEROMA, LACHRYMAL. Suppression of the lachrymal secretion.

XEROMYCTER, Xeromycteria.

XEROMYCTE'RIA, *Xeromycter*, from ξηρος, 'dry,' and μυκτηρ, 'the nose.' Dryness of the nose.

XEROMYRON, *Unguen'tum siccum*; from ξηρος, 'dry,' and μυρον, 'an ointment.' A dry ointment. — Gorræus.

XEROPHA'GIA, from ξηρος, 'dry,' and φαγω, 'I eat.' Excessive use of dry aliment. A kind of regimen to which the ancient athletæ subjected themselves, with the view of increasing their strength.

XEROPHTHAL'MIA, *Ophthal'mia sicca, Ophthalmoxero'sis, Xero'ma*, from ξηρος, 'dry,' and οφθαλμια, 'inflammation of the eye.' An inflammation of the eye, without discharge. The term —as well as *Conjuncti'val Xero'ma*, and *Cutic'ular Conjuncti'va* — has been given to cases in which the conjunctiva is so changed, that it presents more of the characters of skin than of mucous membrane. It is incapable of radical cure. Also, lippitudo.

XEROTRIBIA, see Friction.

XEROTRIPSIS, Friction, dry.

XIPHISTERNUM, Xiphoid.

XIPHODES, Xiphoid.

XIPHODYMUS, Thoraco-gastrodidymus.

XIPHOID, *Xiphoï'des, Xipho'des, Ensifor'mis*, from ξιφος, 'a sword,' and ειδος, 'shape;' *Cartila'go Xiphoïdes, C. Xiphoïdea, C. Scuta'lis, C. Ensiformis, C. Pelta'lis* seu *pelta'tus, En'siform cartilage, Furcel'la infe'rior, Mucrona'tum os*.

*Mucrona'ta Cartila'go, Chondros, Processus xiphosterna'lis* seu *xiphoïdes* seu *sterni xiphoïdeus, Xiphisternum*, (F.) *Appendice* ou *cartilage xiphoïdes, C. Mucroné, Appendice sous-sternale, Palette.*. The name of the appendix which terminates the sternum beneath; and which is so called from some resemblance to a sword.

XIPHOID LIG'AMENT, *Costo-xyphoid L.* (F.) *Ligament xiphoïdien* ou *costo-xiphoïdien*, is a small, very thin, ligamentous fasciculus, which passes from the cartilage of prolongation of the 7th rib to the anterior surface of the xiphoid cartilage, into which it is inserted by its fibres decussating with those of the opposite ligament.

XIPHOP'AGES, *Did'ymus Symphyo-epigas'trius*; from ξιφος, 'a sword,' and πηγνυμι, 'I fix.' A monstrosity, in which twins are united by the epigastrium, as in the case of the Siamese twins.

XYLO-ALOES, Agallochum — x. Balsamum, see Amyris opobalsamum — x. Cassia, Laurus cassia — x. Cinnamomum, Laurus cinnamomum.

XYLUM, Gossipium.

XYMPATHIA, Sympathy.

XYRIS, Iris fœtidissima.

XYRIS BULBO'SA, *X. In'dica, X. Carolinia'na, Yellow-eyed Grass*; indigenous; *Order*, Xyridaceæ; flowering from July to September. The roots and leaves are said to be used by the Hindoos in lepra, and chronic cutaneous diseases in general.

XYRUM, Novacula.

XYRUS, Novacula.

XYSMA, Linteum, Rasura, Scobs.

XYSMOS, Rasura.

XYSTER, Raspatorium.

XYSTOS, Linteum.

XYSTRUM, Raspatorium—x. Ophthalmicum, Ophthalmoxyster.

# Y.

YAM. This esculent root is principally obtained from three species of *Dioscorea, — ala'ta bulbif'era*, and *sati'va*. They grow spontaneously in both the Indies, and their roots are eaten promiscuously, as the potato is with us. Their taste is somewhat like the potato.

YAM ROOT, WILD, Dioscorea villosa.

YARD, Penis.

YARROW, COMMON, Achillea millefolium.

YAUPON, Ilex vomitoria.

YAWNING, from Sax. ȝeonan, *Chasmē, Chasmus, Hia'tus, Osce'do, Oscita'tio, Clonus pandiculatio maxilla'rum, Gaping*, (F.) *Baillement*. Yawning consists of a deep inspiration, with considerable separation of the jaws, executed slowly and in an involuntary manner, and followed by a prolonged and more or less sonorous expiration. This respiratory movement is preceded by a feeling of oppression in the epigastric region, and in the muscles of respiration and mastication. Yawning has been conceived to be owing to torpor in the pulmonary circulation; the causes producing it being commonly *ennui*, fatigue, sleepiness, monotonous sounds, hunger, sympathy, &c. Yawning often precedes the invasion of certain intermittents, attacks of hysteria, &c., and it may, by its frequency, and obstinacy, become a true disease.

YAWROOT, Stillingia.

YAWS, Frambœsia.

YEAST, Yest—y. Plant, Torula cerevisiæ.

YELK, see Ovum.

YELLOW, *Flavus, Lu'teus, Xanthus*, from past participle of Sax. ȝeælan, 'to burn.' One of the seven primitive colours.

YELLOW ASH, Cladrastis tinctoria — y. Berry, Podophyllum montanum — y. Fever, see Fever, Yellow—y. Fever, mild, see Relapse.

YELLOW LIGAMENTS, (F.) *Ligaments jaunes*, occupy the spaces between the *vertebral plates*, from the interval, which separates the second vertebra from the third, to that which separates the last vertebra from the sacrum. They are so called in consequence of their colour.

YELLOW PAINT, Hydrastis Canadensis — y. Root, Jeffersonia Bartoni — y. Root, Pársley-leaved, Xanthorrhiza apiifolia — y. Root, Shrub, Xanthorrhiza apiifolia — y. Star, Helenium autumnale—y. Weed, Ranunculus acris—y. Wood, Xanthoxylum fraxineum — y. Wort, Parsley-leaved, Xanthorrhiza apiifolia.

YELLOWS, Cypripedium luteum, Icterus, Ranunculus acris.

*YERBA DEL SOLDADA*, Matico — *y. de Huaca*, Datura sanguinea.

YEST, *Yeast*, Sax. ȝeȝt, from ýȝt, 'a storm,' ýȝtiȝ, 'stormy;' *Cerevis'iæ Fermen'tum, Spuma Cerevis'iæ, Barm*, (F.) *Levure, Levure de la Bière*. The scum, which collects on the surface of beer whilst fermenting. Yest is antiseptic and tonic. It has been much extolled in putrid fevers, — a table-spoonful being given as a dose, in porter, wine, &c. It is, also, applied, in the form of cataplasm, to foul ulcers. In all these cases, it acts by virtue of the generation of carbonic acid gas.

*YEUX ARDENS*, Ardent eyes — *y. d'Ecrevisse*, Cancrorum chelæ.

YEW TREE, Taxus baccata.

YLECH, Ilech.

YLIATHR, Ilech.

YOLK, see Ovum.

YOUTH, Adolescence.

YOPON, Ilex vomitoria.

YPSELOGLOSSUS, Basioglossus.

YRIDES, Orpiment.

YSAM'BRA, *Pedigam'bra*. An ancient Spanish poison, of which hellebore formed the greatest part.

YUCCA, Jatropha manihot.

Y-WER-A, see Spirit.

# Z.

ZACCHARUM, Saccharum.

ZAEL, Borosail.

ZAFFRAN, Crocus

ZAMBO, see Mulatto.

ZAMIA INTEGRIFOLIA, see Arrowroot—z. Pumila, see Arrowroot.

ZANNA. A kind of Armenian bole, used by the ancients as a desiccative. It was also called *Zarnacha*.

ZANTHORRHIZA APIIFOLIA, Xanthorrhiza apiifolia.

ZANTHOXYLUM CLAVA HERCULIS, Xanthoxylum clava Herculis.

ZAPANIA NODIFLORA, Anacoluppa.

ZARNACHA, Zanna.

ZARSA, Smilax sarsaparilla.

ZARZAPARILLA, Smilax sarsaparilla.

ZEA MAYS, *Z. vulga'rē, Mays zea* seu *Americ'na, Mays, Indian Corn, Corn, Turkey Wheat, Maize, Ador, Indian Wheat,* (F.) *Mais, Graine de Turquie, Blé d'Inde, Blé d'Espagne, Blé d'Italie, Blé de Turquie.* A native of America, and much used over the whole of the continent as an article of diet. It is ground for the same purposes as wheat, and forms an excellent bread.

*ZĒDOAIRE ROND,* Kæmpferia rotunda.

ZEDOARIA, Kæmpferia rotunda — z. Longa, see Kæmpferia — z. Rotunda, see Kæmpferia.

ZEDOARY, Kæmpferia rotunda.

ZELOSIS, Zelotypia.

ZELOTYP'IA, from ζηλος, 'love,' and τυπος, 'form,' 'model;' *Zelo'sis.* It has been proposed to apply this name to the violent mental affection produced by the acknowledged or presumed infidelity of a beloved object; and to the consequences of such affection; — melancholy, mania, &c.

ZEMA, Decoction.

ZEN'ICON, ξενικον. Ancient name of a Keltic poison, used for poisoning arrows.

ZEPHACH, Peritonæum.

ZERMA, Zerna.

ZERNA, *Zerma.* Amongst the barbarous Latin writers it signified ulcerated impetigo, *Impeti'go ulcera'ta.*

ZERUMBET, Cassumuniar.

ZESIS, Effervescence, Decoction.

ZEST, see Citrus medica.

ZESTOLUSIA, Bath, hot.

ZIBEBÆ, see Vitis vinifera.

ZIBETHUM, Civetta.

ZIGNITES, Zingrites.

ZINC, *Zincum, Zinkum, Speltrum, Speauter, Tutenag, Zinchum, Zint, Stannum In'dicum.* Perhaps formed etymologically from (G.) Zin, 'Tin.' A metal obtained from calamine and blende. Its colour is bluish-white; lustre of the fresh surface considerable, but soon dulled, from the facility with which it oxidates; hard; texture striated. S. g. 7.190. Melts at 700° Fah., burns with a bright flame in a higher temperature, and is volatilized in the form of a white, flocculent oxyd. Its use, in medicine, is in the formation of the following preparations.

*ZINC, ACÉTATE DE,* Zinci acetas—z. Butter of, Zinci chloridum — z. Chloride of, Zinci chloridum — z. *Chlorure de,* Zinci chloridum — z. Ferrohydrocyanate of, Zinci cyanuretum — z. Flowers of, Zinci oxydum — z. Hydrocyanate of, Zinci cyanuretum — z. Iodide of, Zinci Iodidum —z. Ioduret of, Zinci Iodidum.

ZINC AND MORPH'IA, DOUBLE I'ODIDE OF. (F.) *Iodure double de Zinc et de Morphine.* This salt is prepared by boiling *iodide of iodhydrate of morphia with water and zinc,* after they have acted on each other for some days; filtering and crystallizing. It is considered to combine the properties of morphia and the salts of zinc, and has been prescribed as an anodyne and antispasmodic. Dose, a quarter of a grain.

*ZINC, OXIDE DE,* Zinci oxydum — z. Oxyd of, Zinci oxydum.

ZINC AND STRYDI'NIA, DOUBLE I'ODIDE OF. This salt is prepared by digesting for several days in hot water, *iodide of iodhydrate of strychnia and zinc;* filtering and crystallizing. It has been proposed in the same cases as strychnia.

*ZINC, SULFATE DE,* Zinci sulphas—z. Sulphate of, Zinci Sulphas—z. Valerianate of, Zinci Valerianas.

ZINCHUM, Zincum.

ZINCI ACE'TAS, *Ac"ètate of Zinc,* (F.) *Acétate de Zinc.* (*Plumbi acet.* ℔j, *zinc. granul.* ℥ix, *aquæ destillat.* Oiij. Dissolve the acetate of lead in the water, and filter. Add the zinc to the solution, and agitate them occasionally together, in a stopped bottle, for five or six hours, or until the liquid yields no precipitate, with a solution of iodide of potassium. Filter the liquor, evaporate it with a moderate heat to one-fifth, and set it aside to crystallize. Pour off the liquid, and dry the crystals on bibulous paper.

Should the crystals be coloured, dissolve them in distilled water, and having heated the solution, drop into it, while hot, a filtered solution of chlorinated lime, until it ceases to let fall sesquioxide of iron; filter the liquor, acidulate it with a few drops of acetic acid, evaporate, and crystallize.—*Ph. U. S.*)

Frequently used to form a gently astringent wash in ophthalmia and other local inflammations; and as an injection in gonorrhœa.

ZINCI CARBONAS IMPURUS, Calamina.

ZINCI CAR'BONAS PRÆCIPITA'TUS, *Precip'itated carbonate of Zinc.* (*Zinci sulphat., sodæ carbonat.* āā ℔j; *aq. bullient.* cong. Dissolve the sulphate of zinc and carbonate of soda respectively in Oiv of water. Mix the solutions; stir, and set the mixture by, that the powder may subside. Having poured off the liquid, wash the precipitated carbonate of zinc with hot water, until the fluid of the washings is nearly tasteless, and dry with a gentle heat. — Ph. U. S.) Used to prepare the Zinzi oxidum.

ZINCI CARBONAS PRÆPARATUS, Calamina præparata.

ZINCI CHLO'RIDUM, *Z. chlorure'tum, Zincum chlora'tum, Z. muriat'icum* (*oxydatum*), *Chloride* or *Chloruret of Zinc, Butter of Zinc,* (F.) *Chlorure de Zinc.* (*Zinc.* in frustulis, ℥ijss; *acid. nitric., cretæ præparat.* āā ℥j; *acid. muriat.* q. s. To the zinc, in the porcelain vessel, add gradually sufficient muriatic acid to dissolve it; strain, add the nitric acid, and evaporate to dryness. Dissolve the dry mass in water, add the chalk, allow the mixture to stand for 24 hours, filter, and again evaporate to dryness. — Ph. U. S.) It is very deliquescent in the air, forming the *Butter of Zinc, Buty'rum Zinci.*

Chloride of Zinc is a powerful escharotic, and has been lately employed as an effective antiseptic.

ZINCI CHLORURETUM, Z. chloridum.

ZINCI CYANURE'TUM, *Hydrocy'anas Zinci, Zincum Cyanogena'tum, Z. Borus'sicum, Z. Zoöticum, Hydrocy'anate of Zinc.* This salt is formed by adding sulphate of zinc to hydrocyanate of potassa so long as any precipitate is thrown down. When dried and calcined at a low heat, the product is a mixture of cyanuret of zinc and of potassium. It has been recommended in nervous cardialgia. Dose, from one-sixteenth to one-twelfth of a grain.

It is chiefly used as a caustic; one part of the chloride being mixed with four, three, or two parts of flour, according to the desired strength, and a few drops ef water being added to form a paste.

ZINCI FERROHYDROCY'ANAS, *Cyanure'tum Ferrozin'cicum, Zincum Ferrohydrocyan'icum, Ferrohydrocyanate of Zinc.* Made by the mutual decomposition of boiling-hot solutions of sulphate of zinc and ferrocyanate of potassa. It has been recommended in the same cases as the last preparation.

ZINCI HYDROCYANAS, Zinci cyanuretum.

ZINCI IOD'IDUM, *Z. Iodure'tum, Zincum Ioda'tum, Iode'tum Zinci* seu *Zin'cicum, Protoïodure'tum Zinci, Iodide* or *Iod'uret of Zinc.* This salt

is made by boiling together *iodine* and *zinc* to dryness, and subliming. An ointment, composed of a drachm to an ounce of lard, has been used in cases where the external use of iodide of potassium is indicated.

ZINCI IODURETUM, Z. iodidum — z. Nix, Zinci oxydum.

ZINCI OX'YDUM, *Zincum calcina'tum, Oxyd of Zinc, Flowers of Zinc, Nihil Album, Lana Philosopho'rum, L. Philosoph'ica, Nix Zinci, Nihil Gris'eum, Pom'pholyx,* (F.) *Oxide de Zinc.* (Procured by burning zinc in a long, deep, crucible, placed so as to collect the sublimate. Also, by exposing the precipitate thrown down from a solution of *sulphate of zinc* by *carbonate of ammonia* to a strong heat, so as to drive off the carbonic acid.—Ph. U. S.) It is tonic and antispasmodic; externally, detergent and desiccative. Employed in epilepsy, chorea, &c. For its external use, see Ung. Zinci.

ZINCI OXYDUM IMPURUM, Tutia.

ZINCI SULPHAS, *Sulphate of Zinc, Zincum Vitriola'tum, Vitrio'lum Album, White Vitriol, V. Goslarien'sē, V. Zinci, Sulphas Zin'cicum, Gilla Vitrioli, Gilla Theophras'ti, Sal Vomito'rium Vitrioli, Chalcan'thum Album, White Copperas, Sal Vitrioli,* (F.) *Sulfate de Zinc.* (*Zinc.* in frustul. ℥iv; *acid. sulphuric.* ℥vj; *aquæ destillat.* Oiv. To the zinc and water, previously introduced into a glass vessel, add by degrees the sulphuric acid, and, when the effervescence shall have ceased, filter the solution through paper; then boil it down till a pellicle begins to form, and set aside to crystallize.—Ph. U. S.) The sulphate of zinc is inodorous; taste, styptic. It is in white, semitransparent, efflorescent crystals; soluble in three parts of water at 60°. It is emetic, tonic, antispasmodic, and, externally, astringent. A nostrum, sold under the name *Antipertus'sis,* and, as its title imports, given in hooping-cough, contains this salt as its chief ingredient. It is emetic. Dose, as an emetic, gr. x to ℥ss; as a tonic, gr. j to ij. Used externally as a collyrium, gr. j to water f℥j.

ZINCI VALERIA'NAS, *Vale'rianate of Zinc.* A salt formed by saturating valerianic acid with freshly prepared carbonate of zinc. It is in pure white, pearly scales, and has been recommended as a tonic in neuralgic diseases, epilepsy, &c. The dose is one or two grains several times a day.

ZINCUM, Zinc — z. Borussicum, Zinci cyanuretum—z. Calcinatum, Zinci oxydum—z. Chloratum, Zinci chloridum — z. Cyanogenatum, Zinci cyanuretum — z. Ferrohydrocyanicum, Zinci ferrohydrocyanas — z. Iodatum, Zinci iodidum — z. Muriaticum, Zinci chloridum — z. Vitriolatum, Zinci sulphas — z. Zooticum, Zinci cyanuretum.

ZINGIBER, Amomum zingiber—z. Cassumuniar, see Cassumuniar — z. Cliffordia, see Cassumuniar — z. Germanicum, Arum maculatum — z. Officinale, Amomum zingiber—z. Purpureum, see Cassumuniar—z. Spurium, see Cassumuniar—z. Zerumbet, see Cassumuniar.

ZINGIBERIN, Piperoid.

ZINGRI'TES, *Zigni'tes.* A stone, resembling glass; to which the ancients attributed marvellous properties.

ZINKUM, Zincum.

ZINT, Zincum.

ZINZIBER, Amomum zingiber.

ZIPHAC, Peritonæum.

ZIRBUS, Epiploon — z. Adipinus, Epiploon, gastro-colic.

ZIZA'NIA AQUAT'ICA, *Wild Rice;* called by the Indians, *Menomene,* grows abundantly on the marshy margins of the northern lakes and waters of the upper branches of the Mississippi. The grain resembles oats. It furnishes the northern savages and the Canadian traders and hunters with their annual supplies of grain.

ZIZYPHUM, Jujube.

ZIZYPHUS JUJUBA, see Jujube—z. Nitida, see Jujube—z. Sativa, see Jujube—z. Sylvestris, see Jujube.

ZOA'GRIA, from *ζωη,* 'life,' and *αγρεω,* 'I catch up.' The saving and preservation of life. *Zoösis.* A reward for preserving life; *Sostrum.* A votive offering hung up in the temples for life saved.

ZOANTHRO'PIA, *Melancholi'a zoänthro'pia,* from *ζωον,* 'an animal,' and *ανθρωπος,* 'a man.' A species of monomania, in which the patient believes himself transformed into an animal. Lycanthropia and cynanthropia belong to this species of monomania.

ZOARA, Insomnia.

ZOE, Life.

ZOGRAPHIA, Zoographia.

ZOIATRIA, Veterinary art.

ZOIATRUS, Hippiater.

ZOMIDIUM, Jus.

ZOMOS, *Consommé,* Jus.

ZONA, Herpes zoster — z. Castitatis, Hymen — z. Ciliaris, Ciliary zone — z. Ignea, Herpes zoster.

ZONA PELLU'CIDA, *Oolem'ma pellu'cidum, Vitellary membrane,* (F.) *Vitelline, Membrane vitelline.* The membrane that surrounds the yolk in the mammalia is so called on account of its thickness and peculiar transparency.

ZONA SERPIGINOSA, Herpes zoster — z. Virginitatis, Hymen.

ZONA TENDINO'SA. The whitish circle around the auriculo-ventricular orifice of the right side of the heart.

ZONE, Cingulum.

ZONULA CILIARIS, see Ciliary, and Ciliary zone — z. Cochleæ, see Lamina spiralis — z. Hildani, Cingulum Hildani — z. Zinnii, see Ciliary.

ZOÖCHEMIA, Chymistry, animal.

ZOÖCHEM'ICAL, *Zoöchym'ical, Zoöchem'icus* seu *Zoöchym'icus.* Appertaining or having relation to animal chymistry.

ZOÖCHEMY, Chymistry, animal.

ZOÖCHYMY, Chymistry, animal.

ZOÖGENIUM, Azote.

ZOÖG''ENY, *Zoögen'ia, Zoögen'esis,* from *ζωον,* 'animal,' and *γενεσις,* 'generation.' The doctrine of animal formation.

ZOÖG'RAPHY, *Zoögra'phia, Zogra'phia,* from *ζωον,* 'an animal,' and *γραφη,* 'a description.' A description of animals. The natural history of animals.

ZOÖHEMATINE, Hæmatine.

ZOÖHY'LAS, from *ζωον,* 'an animal,' and *'υλη,* 'matter.' Animal matter.

ZOÖHY'LICA CONCREMEN'TA. Concretions formed of animal matter.

ZOÖIASIS, Veterinary art.

ZOÖL'OGIST, *Zoölogis'ta, Zoöl'ogus,* from *ζωον,* 'an animal,' and *λογος,* 'description.' One skilled in the natural history of animals.

ZOÖL'OGY, *Zoölog''ia.* Same etymon. The natural history of animals.

ZOÖMAGNETISMUS, Magnetism, animal.

ZOÖMYCUS, Mucus.

ZOÖMYXA, Mucus.

ZOÖN, Animal.

ZOÖNOM'IA, *Organozoönom'ia, Zoön'omy,* from *ζωον,* 'an animal,' and *νομος,* 'law.' The laws which govern the organic actions of animals in general:—*Animal Physiol'ogy, Zoophysiolog''ia.*

ZOONOSOLOG''IA, from ζωον, 'an animal,' νοσος, 'a disease,' and λογος, 'description.' The nosology of animals.

ZOÖPATHOLOG''IA, from ζωον, 'an animal,' παθος, 'a disease,' and λογος, 'a description.' The pathology of animals.

ZOÖPH'AGOUS, *Zoöph'agus*, (F.) *Zoöphage*. from ζωον, 'an animal, and φαγω, 'I eat.' Feeding on animals. Carnivorous.

ZOÖPHTHALMUS, Hydrophthalmia.

ZOÖPHYSIOLOGIA, Physiology, animal, Zoonomia.

ZO'ÖPHYTE, *Zoöph'ytum*, *Phytozo'ön*, *Animal plant*, from ζωον, 'an animal,' and φυτον, 'a plant.' A name given to the lowest class of animals, which seem to form the transition between the animal and the vegetable kingdoms.

ZOÖSIS, Animation, Zoagria.

ZOÖSPERMATA, Spermatozoa.

*ZOÖSPERMES*, Spermatozoa.

ZOOTHAP'SIS, from ζωη, 'life,' and θαπτω, 'I inter.' Burial alive. Premature interment.

ZOOT'OMIST, *Zootom'icus*. Same etymon as the next. One who dissects animals.

ZOÖT'OMY, *Zoötom'ia*, from ζωον, 'an animal,' and τεμνω, 'I cut.' *Theriot'omy*, *Anatom'ia anima'lis* seu *comparati'va* seu *compara'ta*, *Compar'ative Anatomy*. The anatomy of animals. Animal anatomy.

ZOPISSA, see Pinus sylvestris.

ZOPYRON, Fomites.

ZOSTER, Herpes zoster.

ZOSTERA MARINA, Pila marina — z. Maritima, Pila marina.

ZOZAR, Saccharum.

ZUCARO, Saccharum.

ZUCCARUM, Saccharum.

ZUCHAR, Saccharum.

ZUCHARUM, Saccharum.

ZUCHRA, Saccharum.

ZULAPIUM, Julep.

ZYGAPOPHYSES, see Vertebræ.

ZYGOMA, Malæ os.

ZYGOMAT'IC, *Zygomat'icus*, *Juga'lis*, *Jugal*. That which relates to the *zygoma* or cheek-bone.

Zygomatic Arch, see Zygomatic process — z. Bone, Malæ os.

Zygomatic Fossa is the space included between the posterior margin of the outer ala of the pterygoid process, and the crista which descends from the malar tuberosity to the superior alveolar margin.

Zygomatic Muscles are two in number. 1. *Zygomat'icus major*, *Distort'or Oris*, (F.) *Zygomato-labial* (Ch.), *Muscle grand zygomatique*, which is situate obliquely at the fore-part and sides of the face. It is a small, rounded muscle; arises from the outer surface of the os malæ, and is inserted at the commissure of the lips, which it raises and draws outwards. It acts principally in laughing. 2. *Zygomat'icus minor*, (F.) *Petit Zygomato-labial* (Ch.), *Petit Zygomatique*, does not always exist. It is situate on the inner side of the last; arises from the outer surface of the os malæ, and is inserted at the corner of the mouth, or rather into the upper lip, which it raises and draws outwards.

Zygomatic Process, *Proces'sus zygomat'icus*, *Apoph'ysis Zygomat'ica*, *Malar process*, *Jugal process*, arises from the outer surface of the temporal bone by two roots, one of which is transverse, (*Condyle du temporal*, Ch.,) and the other longitudinal: between them is the glenoid cavity. The process passes forwards, and is articulated with the posterior angle of the os malæ, with which it forms a bony bridge, called the *Zygomat'ic arch*, *Pars zygomat'icus*, *Arcus zygomat'icus*, (F.) *Arcade Zygomatique*. The cavity, beneath this bridge, is sometimes called *Zygo'ma*.

Zygomatic Suture is placed between the zygomatic parts of the temporal and cheek bones; and slants obliquely downwards and backwards.

*ZYGOMATIQUE GRAND*, Zygomaticus major—*z. Petit*, Zygomaticus minor.

*ZYGOMATO-LABIAL*, Zygomaticus major—*z. Labial, petit*, Zygomaticus major—*z. Maxillaire*, Masseter—*z. Oriculaire*, Anterior auris.

ZYGOPHYL'LUM FABA'GO, (F.) *Fabagelle*. A Syrian and Mauritanic plant, possessed of an acrid and bitter tasts. It has vermifuge properties. The Arabs believe that the recently expressed juice of *Zygophyllum simplex*, is capable of removing specks from the cornea.

ZYMA, Ferment.

ZYMOMA, Ferment.

ZYMOSIS, Fermentation, see Zymotic.

ZYMOT'IC, *Zymot'icus*, from ζυμοω, 'to ferment.' An epithet proposed for any epidemic, endemic, or contagious affection. *Zymosis* is used to signify such an affection.

ZYTHOGALA, Posset.

ZYTHUM, Cerevisia.

ZYTHUS, Cerevisia.

THE END.

# CATALOGUE

OF

# BLANCHARD & LEA'S

# MEDICAL AND SURGICAL PUBLICATIONS.

---

### TO THE MEDICAL PROFESSION.

In submitting the following catalogue of our publications in medicine and the collateral sciences, we beg to remark that no exertions are spared to render the issues of our press worthy a continuance of the confidence which they have thus far enjoyed, both as regards the high character of the works themselves, and in respect to every point of typographical accuracy, and mechanical and artistical execution. Gentlemen desirous of adding to their libraries from our list, can in almost all cases procure the works they wish from the nearest bookseller, who can readily order any which may not be on hand; and who, as well as ourselves, will be happy to answer any inquiries as to price, &c.

BLANCHARD & LEA.

PHILADELPHIA, March, 1856.

---

## TWO MEDICAL PERIODICALS, FREE OF POSTAGE,

### FOR FIVE DOLLARS PER ANNUM.

THE AMERICAN JOURNAL OF THE MEDICAL SCIENCES, subject to postage, when not paid for in advance, - - - - - - - - - $5 00

THE MEDICAL NEWS AND LIBRARY, invariably in advance, - - 1 00

OR, BOTH PERIODICALS furnished, FREE OF POSTAGE, for Five Dollars remitted in advance.

---

## THE AMERICAN JOURNAL OF THE MEDICAL SCIENCES,

EDITED BY ISAAC HAYS, M. D.,

is published Quarterly, on the first of January, April, July, and October. Each number contains at least two hundred and eighty large octavo pages, handsomely and appropriately illustrated, wherever necessary. It has now been issued regularly for more than THIRTY-FIVE years, and it has been under the control of the present editor for more than a quarter of a century. Throughout this long period, it has maintained its position in the highest rank of medical periodicals both at home and abroad, and has received the cordial support of the entire profession in this country. Its list of Collaborators will be found to contain a large number of the most distinguished names of the profession in every section of the United States, rendering the department devoted to

### ORIGINAL COMMUNICATIONS

full of varied and important matter, of great interest to all practitioners.

As the aim of the Journal, however, is to combine the advantages presented by all the different varieties of periodicals, in its

### REVIEW DEPARTMENT

will be found extended and impartial reviews of all important new works, presenting subjects of novelty and interest, together with very numerous

### BIBLIOGRAPHICAL NOTICES,

including nearly all the medical publications of the day, both in this country and Great Britain, with a choice selection of the more important continental works. This is followed by the

## QUARTERLY SUMMARY,

being a very full and complete abstract, methodically arranged, of the

## IMPROVEMENTS AND DISCOVERIES IN THE MEDICAL SCIENCES.

This department of the Journal, so important to the practising physician, is the object of especial care on the part of the editor. It is classified and arranged under different heads, thus facilitating the researches of the reader in pursuit of particular subjects, and will be found to present a very full and accurate digest of all observations, discoveries, and inventions recorded in every branch of medical science. The very extensive arrangements of the publishers are such as to afford to the editor complete materials for this purpose, as he not only regularly receives

### ALL THE AMERICAN MEDICAL AND SCIENTIFIC PERIODICALS,

but also twenty or thirty of the more important Journals issued in Great Britain and on the Continent, thus enabling him to present in a convenient compass a thorough and complete abstract of everything interesting or important to the physician occurring in any part of the civilized world.

An evidence of the success which has attended these efforts may be found in the constant and steady increase in the subscription list, which renders it advisable for gentlemen desiring the Journal, to make known their wishes at an early day, in order to secure a year's set with certainty, the publishers having frequently been unable to supply copies when ordered late in the year. To their old subscribers, many of whom have been on their list for twenty or thirty years, the publishers feel that no promises are necessary; but those who may desire for the first time to subscribe, can rest assured that no exertion will be spared to maintain the Journal in the high position which it has occupied for so long a period.

---

By reference to the terms it will be seen that, in addition to this large amount of valuable and practical information on every branch of medical science, the subscriber, by paying in advance, becomes entitled, without further charge, to

## THE MEDICAL NEWS AND LIBRARY,

a monthly periodical of thirty-two large octavo pages. Its "NEWS DEPARTMENT" presents the current information of the day, while the "LIBRARY DEPARTMENT" is devoted to presenting standard works on various branches of medicine. Within a few years, subscribers have thus received, without expense, the following works which have passed through its columns:—

WATSON'S LECTURES ON THE PRACTICE OF PHYSIC.
BRODIE'S CLINICAL LECTURES ON SURGERY.
TODD AND BOWMAN'S PHYSIOLOGICAL ANATOMY AND PHYSIOLOGY OF MAN.
724 pages, with numerous wood-cuts, being all that has yet appeared in England.
WEST'S LECTURES ON THE DISEASES OF INFANCY AND CHILDHOOD.
MALGAIGNE'S OPERATIVE SURGERY, with wood-cuts.
SIMON'S LECTURES ON GENERAL PATHOLOGY.
BENNETT ON PULMONARY TUBERCULOSIS, with wood-cuts, and
WEST ON ULCERATION OF THE OS UTERI.

While the year 1855, presents

### BROWN ON THE SURGICAL DISEASES OF FEMALES.

HANDSOMELY ILLUSTRATED ON WOOD,

Which will be continued and completed in 1856.

The diseases treated in this volume have hitherto not received from writers of systematic works the attention to which their importance entitles them. In treatises on female diseases they have been but little noticed, as belonging more properly to the surgeon, while our surgical text-books have in like manner referred them to the writer on midwifery and female affections. In supplying this palpable vacancy in medical literature, Mr. Brown has brought to his subject the result of many years of observation and experience, and his labors will prove of much value to all practitioners. The publishers therefore flatter themselves that in securing this volume for the "LIBRARY DEPARTMENT" of the "MEDICAL NEWS" they will meet the wishes of their numerous subscribers, who will thus receive this highly important work free of all expense.

---

It will thus be seen that for the small sum of FIVE DOLLARS, paid in advance, the subscriber will obtain a Quarterly and a Monthly periodical,

### EMBRACING ABOUT FIFTEEN HUNDRED LARGE OCTAVO PAGES,

mailed to any part of the United States, free of postage.

These very favorable terms are now presented by the publishers with the view of removing all difficulties and objections to a full and extended circulation of the Medical Journal to the office of every member of the profession throughout the United States. The rapid extension of mail facilities, will now place the numbers before subscribers with a certainty and dispatch not heretofore attainable; while by the system now proposed, every subscriber throughout the Union is placed upon an equal footing, at the very reasonable price of Five Dollars for two periodicals, without further expense.

Those subscribers who do not pay in advance will bear in mind that their subscription of Five Dollars will entitle them to the Journal only, without the News, and that they will be at the expense of their own postage on the receipt of each number. The advantage of a remittance when ordering the Journal will thus be apparent.

As the Medical News and Library is in no case sent without advance payment, its subscribers will always receive it free of postage.

It should also be borne in mind that the publishers will now take the risk of remittances by mail, when the letter inclosing the amount is registered under the new Postage Act, and the Postmaster's certificate of inclosure retained, to be forwarded in cases of loss.

Address BLANCHARD & LEA, PHILADELPHIA.

## ALLEN (J. M.), M. D.,

Professor of Anatomy in the Pennsylvania Medical College, &c.

### THE PRACTICAL ANATOMIST; or, The Student's Guide in the Dissecting-ROOM. With over 200 illustrations. In one handsome royal 12mo. volume. (*Now Ready.*)

In the arrangement of this work the author has endeavored to present a complete and thorough course of dissections in a clearer and more available form for practical use in the dissecting-room, than has as yet been accomplished. His long experience as a teacher of anatomy has given him a familiarity with the wants of students, and has shown him the best modes of obviating or relieving the difficulties which present themselves in the progress of dissection. As adapted to the course pursued in our colleges, and containing ample practical directions and instructions, in addition to the anatomical details presented, it possesses claims to the immediate attention of teachers and students. It will appear in time for the Fall session of the present year.

## ANALYTICAL COMPENDIUM

### OF MEDICAL SCIENCE, containing Anatomy, Physiology, Surgery, Midwifery, Chemistry, Materia Medica, Therapeutics, and Practice of Medicine. By JOHN NEILL, M. D., and F. G. SMITH, M. D. Second and enlarged edition, one thick volume royal 12mo. of over 1000 pages, with 350 illustrations. ☞ See NEILL.

## ABEL (F. A.), F. C. S.

Professor of Chemistry in the Royal Military Academy, Woolwich.

AND

## C. L. BLOXAM,

Formerly First Assistant at the Royal College of Chemistry.

### HANDBOOK OF CHEMISTRY, Theoretical, Practical, and Technical, with a Recommendatory Preface by Dr. HOFMANN. In one large octavo volume of 662 pages, with illustrations. (*Just Issued.*)

It must be understood that this is a work fitted for the earnest student, who resolves to pursue for himself a steady search into the chemical mysteries of creation. For such a student the 'Handbook' will prove an excellent guide, since he will find in it, not merely the approved modes of analytical investigation, but most descriptions of the apparatus necessary, with such manipulatory details as rendered Faraday's 'Chemical Manipulations' so valuable at the time of its publication. Beyond this, the importance of the work is increased by the introduction of much of the technical chemistry of the manufactory."—*Dr. Hofmann's Preface.*

## ASHWELL (SAMUEL), M. D.,

Obstetric Physician and Lecturer to Guy's Hospital, London.

### A PRACTICAL TREATISE ON THE DISEASES PECULIAR TO WOMEN.

Illustrated by Cases derived from Hospital and Private Practice. Third American, from the Third and revised London edition. In one octavo volume, of 528 pages. (*Now Ready.*)

The most useful practical work on the subject in the English language.—*Boston Med. and Surg. Journal.*

The most able, and certainly the most standard and practical, work on female diseases that we have yet seen.—*Medico-Chirurgical Review.*

We commend it to our readers as the best practical treatise on the subject which has yet appeared —*London Lancet.*

The young practitioner will find it invaluable, while those who have had most experience will yet find something to learn, and much to commend, in a book which shows so much patient observation, practical skill, and sound sense.—*British and Foreign Med. Review.*

With no work are we acquainted, in which the pleasant and the useful are more happily blended. It combines the greatest elegance of style with the most sound and valuable practical information. We feel justified in recommending it, in unqualified terms, to our readers, as a book from which they can scarcely fail to derive both pleasure and improvement. It is truly a model for medical compositions.—*Southern Med. and Surg. Journal.*

## ARNOTT (NEILL), M. D.

### ELEMENTS OF PHYSICS; or Natural Philosophy, General and Medical.

Written for universal use, in plain or non-technical language. A new edition, by ISAAC HAYS, M. D. Complete in one octavo volume, of 484 pages, with about two hundred illustrations.

## BENNETT (HENRY), M. D.

### A PRACTICAL TREATISE ON INFLAMMATION OF THE UTERUS,

ITS CERVIX AND APPENDAGES, and on its connection with Uterine Disease. Fourth American, from the third and revised London edition. In one neat octavo volume, of 430 pages, with wood-cuts. *Just Issued.*)

This edition will be found materially improved over its predecessors, the author having carefully revised it, and made considerable additions, amounting to about seventy-five pages.

This edition has been carefully revised and altered, and various additions have been made, which render it more complete, and, if possible, more worthy of the high appreciation in which it is held by the medical profession throughout the world. A copy should be in the possession of every physician.—*Charleston Med. Journal and Review.*

We are firmly of opinion that in proportion as a knowledge of uterine diseases becomes more appreciated, this work will be proportionably established as a text-book in the profession.—*The Lancet.*

When, a few years back, the first edition of the present work was published, the subject was one almost entirely unknown to the obstetrical celebrities of the day; and even now we have reason to know that the bulk of the profession are not fully alive to the importance and frequency of the disease of which it takes cognizance. The present edition is so much enlarged, altered, and improved, that it can scarcely be considered the same work.—*Dr. Ranking's Abstract.*

## BROWN (ISAAC BAKER),

Surgeon-Accoucheur to St. Mary's Hospital, &c.

### ON SOME DISEASES OF WOMEN ADMITTING OF SURGICAL TREATMENT.

With handsome illustrations. One vol. 8vo. (*At Press.*)

Publishing in the "Medical News and Library" for 1855 and 1856. See preceding page.

Mr. Brown has earned for himself a high reputation in the operative treatment of sundry diseases and injuries to which females are peculiarly subject. We can truly say of his work that it is an important addition to obstetrical literature. The operative suggestions and contrivances which Mr. Brown describes, exhibit much practical sagacity and skill, and merit the careful attention of every surgeon-accoucheur.—*Association Journal.*

We have no hesitation in recommending this book to the careful attention of all surgeons who make female complaints a part of their study and practice.—*Dublin Quarterly Journal.*

## BENNETT (J. HUGHES), M. D., F. R. S. E.,

Professor of Clinical Medicine in the University of Edinburgh, &c.

### THE PATHOLOGY AND TREATMENT OF PULMONARY TUBERCULOSIS,

and on the Local Medication of Pharyngeal and Laryngeal Diseases frequently mistaken for or associated with, Phthisis. In one handsome octavo volume, with beautiful wood-cuts. pp. 130. (*Lately Issued.*)

## BILLING (ARCHIBALD), M. D.

### THE PRINCIPLES OF MEDICINE.

Second American, from the Fifth and Improved London edition. In one handsome octavo volume, extra cloth, 250 pages.

## BLAKISTON (PEYTON), M. D., F. R. S., &c.

### PRACTICAL OBSERVATIONS ON CERTAIN DISEASES OF THE CHEST,

and on the Principles of Auscultation. In one volume, 8vo., pp. 384.

## BURROWS (GEORGE), M. D.

### ON DISORDERS OF THE CEREBRAL CIRCULATION,

and on the Connection between the Affections of the Brain and Diseases of the Heart. In one 8vo. vol., with colored plates, pp. 216.

## BUDD (GEORGE), M. D., F. R. S.,

Professor of Medicine in King's College, London.

### ON DISEASES OF THE LIVER.

Second American, from the second and enlarged London edition. In one very handsome octavo volume, with four beautifully colored plates, and numerous wood-cuts. pp. 468. New edition. (*Lately Issued.*)

The full digest we have given of the new matter introduced into the present volume, is evidence of the value we place on it. The fact that the profession has required a second edition of a monograph such as that before us, bears honorable testimony to its usefulness. For many years, Dr. Budd's work must be the authority of the great mass of British practitioners on the hepatic diseases; and it is satisfactory that the subject has been taken up by so able and experienced a physician.—*British and Foreign Medico-Chirurgical Review.*

BY THE SAME AUTHOR. (*Just Ready.*)

### ON THE ORGANIC DISEASES AND FUNCTIONAL DISORDERS OF THE STOMACH.

In one neat octavo volume.

While special treatises have been multiplying upon almost all the different classes of diseases, there has long been felt the want of an authoritative work on the disorders of the stomach, which constitute, perhaps, a larger proportion of the daily practice of the physician than any other class of maladies. To supply this want has been the object of the author, and his reputation is an ample guarantee of the value of his labors.

From the high position occupied by Dr. Budd as a teacher, a writer, and a practitioner, it is almost needless to state that the present book may be consulted with great advantage. It is written in an easy style, the subjects are well arranged, and the practial precepts, both of diagnosis and treatment, denote the character of a thoughtful and experienced physician.—*London Med. Times and Gazette*, December, 1855.

## BUSHNAN (J. S.), M. D.

### THE PHYSIOLOGY OF ANIMAL AND VEGETABLE LIFE;

a Popular Treatise on the Functions and Phenomena of Organic Life. In one handsome royal 12mo. volume, with over one hundred illustrations. pp. 234.

## BIRD (GOLDING), A. M., M. D., &c.

### URINARY DEPOSITS: THEIR DIAGNOSIS, PATHOLOGY, AND THERAPEUTICAL INDICATIONS.

A new and enlarged American, from the last improved London edition. With over sixty illustrations. In one royal 12mo. volume, extra cloth. pp. 372.

It can scarcely be necessary for us to say anything of the merits of this well-known Treatise, which so admirably brings into practical application the results of those microscopical and chemical researches regarding the physiology and pathology of the urinary secretion, which have contributed so much to the increase of our diagnostic powers, and to the extension and satisfactory employment of our therapeutic resources. In the preparation of this new edition of his work, it is obvious that Dr. Golding Bird has spared no pains to render it a faithful representation of the present state of scientific knowledge on the subject it embraces.—*The British and Foreign Medico-Chirurgical Review.*

BY THE SAME AUTHOR.

### ELEMENTS OF NATURAL PHILOSOPHY;

being an Experimental Introduction to the Physical Sciences. Illustrated with nearly four hundred wood-cuts. From the third London edition. In one neat volume, royal 12mo. pp. 402.

## BARTLETT (ELISHA), M. D.

**THE HISTORY, DIAGNOSIS, AND TREATMENT OF THE FEVERS OF THE UNITED STATES.** Third edition, revised and improved. In one octavo volume, of six hundred pages, beautifully printed, and strongly bound.

The masterly and elegant treatise, by Dr. Bartlett is invaluable to the American student and practitioner.—*Dr. Holmes's Report to the Nat. Med. Association.*

We regard it, from the examination we have made of it, the best work on fevers extant in our language, and as such cordially recommend it to the medical public.—*St. Louis Medical and Surgical Journal.*

Take it altogether, it is the most complete history of our fevers which has yet been published, and every practitioner should avail himself of its contents.—*The Western Lancet.*

Of the value and importance of such a work, it is needless here to speak; the profession of the United States owe much to the author for the very able volume which he has presented to them, and for the careful and judicious manner in which he has executed his task. No one volume with which we are acquainted contains so complete a history of our fevers as this. To Dr. Bartlett we owe our best thanks for the very able volume he has given us, as embodying certainly the most complete, methodical, and satisfactory account of our fevers anywhere to be met with.—*The Charleston Med. Journal and Review.*

## BUCKLER (T. H.), M. D.,

Formerly Physician to the Baltimore Almshouse Infirmary, &c.

**ON THE ETIOLOGY, PATHOLOGY, AND TREATMENT OF FIBRO-BRONCHITIS AND RHEUMATIC PNEUMONIA.** In one 8vo. volume, extra cloth. pp. 150.

## BOWMAN (JOHN E.), M. D.

**PRACTICAL HANDBOOK OF MEDICAL CHEMISTRY.** Second American, from the third and revised English Edition. In one neat volume, royal 12mo., with numerous illustrations. pp. 288. (*Now Ready.*)

BY THE SAME AUTHOR.

**INTRODUCTION TO PRACTICAL CHEMISTRY, INCLUDING ANALYSIS.** With numerous illustrations. In one neat volume, royal 12mo. pp. 350.

## BARLOW (GEORGE H.), M. D.

**A MANUAL OF THE PRACTICE OF MEDICINE.** With Notes and Additions by the American Editor. In one octavo volume. (*Now Ready.*)

The position of the author as physician to Guy's Hospital and other large public institutions, is a sufficient guarantee of the extent and value of the experience which is here systematically recorded and condensed. His aim throughout has been to produce a *practical* work, on which the student can rely as a guide, and to which the practitioner can refer with confidence. The additions by the editor comprise chapters on Cerebro-spinal Meningitis, Cholera Infantum, and Yellow Fever, besides numerous notes wherever the diseases or practice of this country seemed to render them necessary or desirable.

## BEALE (LIONEL JOHN), M. R. C. S., &c.

**THE LAWS OF HEALTH IN RELATION TO MIND AND BODY.** A Series of Letters from an old Practitioner to a Patient. In one volume, royal 12mo. pp. 296.

## BLOOD AND URINE (MANUALS ON).

**BY JOHN WILLIAM GRIFFITH, G. OWEN REESE, AND ALFRED MARKWICK.** One thick volume, royal 12mo., extra cloth, with plates. pp. 460.

## BRODIE (SIR BENJAMIN C.), M. D., &c.

**CLINICAL LECTURES ON SURGERY.** 1 vol. 8vo., cloth. 350 pp.

## COLOMBAT DE L'ISERE.

**A TREATISE ON THE DISEASES OF FEMALES, and on the Special Hygiene of their Sex.** Translated, with many Notes and Additions, by C. D. Meigs, M. D. Second edition, revised and improved. In one large volume, octavo, with numerous wood-cuts. pp. 720.

The treatise of M. Colombat is a learned and laborious commentary on these diseases, indicating very considerable research, great accuracy of judgment, and no inconsiderable personal experience. With the copious notes and additions of its experienced and very erudite translator and editor, Dr. Meigs, it presents, probably, one of the most complete and comprehensive works on the subject we possess.—*American Med. Journal.*

## CURLING (T. B.), F. R. S.,

Surgeon to the London Hospital, &c.

**A PRACTICAL TREATISE ON DISEASES OF THE TESTIS, SPERMATIC CORD, AND SCROTUM.** Second American, from the second and enlarged English edition. In one handsome octavo volume, with numerous illustrations. (*At Press.*)

## COPLAND (JAMES), M. D., F. R. S., &c.

**OF THE CAUSES, NATURE, AND TREATMENT OF PALSY AND APOPLEXY.** In one volume, royal 12mo., extra cloth. pp. 326.

## CARPENTER (WILLIAM B.), M. D., F. R. S., &c.,

Examiner in Physiology and Comparative Anatomy in the University of London.

### PRINCIPLES OF HUMAN PHYSIOLOGY; with their chief applications to

Psychology, Pathology, Therapeutics, Hygiene, and Forensic Medicine. A new American, from the last and revised London edition. With nearly three hundred illustrations. Edited, with additions, by FRANCIS GURNEY SMITH, M. D., Professor of the Institutes of Medicine in the Pennsylvania Medical College, &c. In one very large and beautiful octavo volume, of about nine hundred large pages, handsomely printed and strongly bound in leather, with raised bands. (*Now Ready.*)

The most complete work on the science in our language.—*Am. Med. Journal.*

The most complete exposition of physiology which any language can at present give.—*Brit. and For. Med.-Chirurg. Review.*

We have thus adverted to some of the leading "additions and alterations," which have been introduced by the author into this edition of his physiology. These will be found, however, very far to exceed the ordinary limits of a new edition, "the old materials having been incorporated with the new, rather than the new with the old." It now certainly presents the most complete treatise on the subject within the reach of the American reader; and while, for availability as a text-book, we may perhaps regret its growth in bulk, we are sure that the student of physiology will feel the impossibility of presenting a thorough digest of the facts of the science within a more limited compass.—*Medical Examiner.*

The greatest, the most reliable, and the best book on the subject which we know of in the English language.—*Stethoscope.*

The most complete work now extant in our language.—*N. O. Med. Register.*

The changes are too numerous to admit of an extended notice in this place. At every point where the recent diligent labors of organic chemists and microgaphers have furnished interesting and valuable facts, they have been appropriated, and no pains have been spared, in so incorporating and arranging them that the work may constitute one harmonious system.—*Southern Med. and Surg. Journal.*

The best text-book in the language on this extensive subject.—*London Med. Times.*

A complete cyclopædia of this branch of science.—*N. Y. Med. Times.*

The standard of authority on physiological subjects. * * * In the present edition, to particularize the alterations and additions which have been made, would require a review of the whole work, since scarcely a subject has not been revised and altered, added to, or entirely remodelled to adapt it to the present state of the science.—*Charleston Med. Journ.*

Any reader who desires a treatise on physiology may feel himself entirely safe in ordering this.—*Western Med. and Surg. Journal.*

From this hasty and imperfect allusion it will be seen by our readers that the alterations and additions to this edition render it almost a new work—and we can assure our readers that it is one of the best summaries of the existing facts of physiological science within the reach of the English student and physician.—*N. Y. Journal of Medicine.*

The profession of this country, and perhaps also of Europe, have anxiously and for some time awaited the announcement of this new edition of Carpenter's Human Physiology. His former editions have for many years been almost the only text-book on Physiology in all our medical schools, and its circulation among the profession has been unsurpassed by any work in any department of medical science.

It is quite unnecessary for us to speak of this work as its merits would justify. The mere announcement of its appearance will afford the highest pleasure to every student of Physiology, while its perusal will be of infinite service in advancing physiological science.—*Ohio Med. and Surg. Journ.*

BY THE SAME AUTHOR. (*Now Ready.*)

### PRINCIPLES OF COMPARATIVE PHYSIOLOGY.

New American, from the Fourth and Revised London edition. In one large and handsome octavo volume, with over three hundred beautiful illustrations. pp. 752.

The delay which has existed in the appearance of this work has been caused by the very thorough revision and remodelling which it has undergone at the hands of the author, and the large number of new illustrations which have been prepared for it. It will, therefore, be found almost a new work, and fully up to the day in every department of the subject, rendering it a reliable text-book for all students engaged in this branch of science. Every effort has been made to render its typographical finish and mechanical execution worthy of its exalted reputation, and creditable to the mechanical arts of this country.

This book should not only be read but thoroughly studied by every member of the profession. None are too wise or old, to be benefited thereby. But especially to the younger class would we cordially commend it as best fitted of any work in the English language to qualify them for the reception and comprehension of those truths which are daily being developed in physiology.—*Medical Counsellor.*

Without pretending to it, it is an Encyclopedia of the subject, accurate and complete in all respects—a truthful reflection of the advanced state at which the science has now arrived.—*Dublin Quarterly Journal of Medical Science.*

A truly magnificent work—in itself a perfect physiological study.—*Ranking's Abstract.*

This work stands without its fellow. It is one few men in Europe could have undertaken; it is one no man, we believe, could have brought to so successful an issue as Dr. Carpenter. It required for its production a physiologist at once deeply read in the labors of others, capable of taking a general, critical, and unprejudiced view of those labors, and of combining the varied, heterogeneous materials at his disposal, so as to form an harmonious whole. We feel that this abstract can give the reader a very imperfect idea of the fulness of this work, and no idea of its unity, of the admirable manner in which material has been brought, from the most various sources, to conduce to its completeness, of the lucidity of the reasoning it contains, or of the clearness of language in which the whole is clothed. Not the profession only, but the scientific world at large, must feel deeply indebted to Dr. Carpenter for this great work. It must, indeed, add largely even to his high reputation.—*Medical Times.*

BY THE SAME AUTHOR. (*Preparing.*)

### PRINCIPLES OF GENERAL PHYSIOLOGY, INCLUDING ORGANIC CHEMISTRY AND HISTOLOGY.

With a General Sketch of the Vegetable and Animal Kingdom. In one large and very handsome octavo volume, with several hundred illustrations.

The subject of general physiology having been omitted in the last edition of the author's "Comparative Physiology," he has undertaken to prepare a volume which shall present it more thoroughly and fully than has yet been attempted, and which may be regarded as an introduction to his other works.

## CARPENTER (WILLIAM B.), M. D., F. R. S.,

Examiner in Physiology and Comparative Anatomy in the University of London.

### ELEMENTS (OR MANUAL) OF PHYSIOLOGY, INCLUDING PHYSIOLOGICAL ANATOMY.

Second American, from a new and revised London edition. With one hundred and ninety illustrations. In one very handsome octavo volume. pp. 566.

In publishing the first edition of this work, its title was altered from that of the London volume, by the substitution of the word "Elements" for that of "Manual," and with the author's sanction the title of "Elements" is still retained as being more expressive of the scope of the treatise.

To say that it is the best manual of Physiology now before the public, would not do sufficient justice to the author.—*Buffalo Medical Journal.*

In his former works it would seem that he had exhausted the subject of Physiology. In the present, he gives the essence, as it were, of the whole.—*N. Y. Journal of Medicine.*

Those who have occasion for an elementary treatise on Physiology, cannot do better than to possess themselves of the manual of Dr. Carpenter.—*Medical Examiner.*

The best and most complete exposé of modern Physiology, in one volume, extant in the English language.—*St. Louis Medical Journal.*

With such an aid in his hand, there is no excuse for the ignorance often displayed respecting the subjects of which it treats. From its unpretending dimensions, it may not be so esteemed by those anxious to make a parade of their erudition; but whoever masters its contents will have reason to be proud of his physiological acquirements. The illustrations are well selected and finely executed.—*Dublin Med. Press.*

BY THE SAME AUTHOR. (*Nearly Ready.*)

### THE MICROSCOPE AND ITS REVELATIONS.

In one handsome volume, with several hundred beautiful illustrations.

Various literary engagements have delayed the author's progress with this long expected work. It is now, however, in an advanced state of preparation, and may be expected in a few months. The importance which the microscope has assumed within the last few years, both as a guide to the practising physician who wishes to avail himself of the progress of his science, and as an indispensable assistant to the physiological and pathological observer, has caused the want to be severely felt of a volume which should serve as a guide to the learner and a book of reference to the more advanced student. This want Dr. Carpenter has endeavored to supply in the present volume. His great practical familiarity with the instrument and all its uses, and his acknowledged ability as a teacher, are a sufficient guarantee that the work will prove in every way admirably adapted to its purpose, and superior to any as yet presented to the scientific world.

BY THE SAME AUTHOR.

### A PRIZE ESSAY ON THE USE OF ALCOHOLIC LIQUORS IN HEALTH AND DISEASE.

New edition, with a Preface by D. F. CONDIE, M. D., and explanations of scientifio words. In one neat 12mo. volume. pp. 178. (*Just Issued.*)

---

## CHELIUS (J. M.), M. D.,

Professor of Surgery in the University of Heidelberg, &c.

### A SYSTEM OF SURGERY.

Translated from the German, and accompanied with additional Notes and References, by JOHN F. SOUTH. Complete in three very large octavo volumes, of nearly 2200 pages, strongly bound, with raised bands and double titles.

We do not hesitate to pronounce it the best and most comprehensive system of modern surgery with which we are acquainted.—*Medico-Chirurgical Review.*

The fullest and ablest digest extant of all that relates to the present advanced state of surgical pathology.—*American Medical Journal.*

The most learned and complete systematic treatise now extant.—*Edinburgh Medical Journal.*

---

## CLYMER (MEREDITH), M. D., &c.

### FEVERS; THEIR DIAGNOSIS, PATHOLOGY, AND TREATMENT.

Prepared and Edited, with large Additions, from the Essays on Fever in Tweedie's Library of Practical Medicine. In one octavo volume, of 600 pages.

---

## CHRISTISON (ROBERT), M. D., V. P. R. S. E., &c.

### A DISPENSATORY; or, Commentary on the Pharmacopœias of Great Britain and the United States;

comprising the Natural History, Description, Chemistry, Pharmacy, Actions, Uses, and Doses of the Articles of the Materia Medica. Second edition, revised and improved, with a Supplement containing the most important New Remedies. With copious Additions, and two hundred and thirteen large wood-engravings. By R. EGLESFELD GRIFFITH, M. D. In one very large and handsome octavo volume, of over 1000 pages.

It is not needful that we should compare it with the other pharmacopœias extant, which enjoy and merit the confidence of the profession: it is enough to say that it appears to us as perfect as a Dispensatory, in the present state of pharmaceutical science, could be made. If it omits any details pertaining to this branch of knowledge which the student has a right to expect in such a work, we confess the omission has escaped our scrutiny. We cordially recommend this work to such of our readers as are in need of a Dispensatory. They cannot make choice of a better.—*Western Journ. of Medicine and Surgery.*

There is not in any language a more complete and perfect Treatise.—*N. Y. Annalist.*

In conclusion, we need scarcely say that we strongly recommend this work to all classes of our readers. As a Dispensatory and commentary on the Pharmacopœias, it is unrivalled in the English or any other language.—*The Dublin Quarterly Journal.*

We earnestly recommend Dr. Christison's Dispensatory to all our readers, as an indispensable companion, not in the Study only, but in the Surgery also.—*British and Foreign Medical Review.*

## CONDIE (D. F.), M. D., &c.

### A PRACTICAL TREATISE ON THE DISEASES OF CHILDREN. Fourth edition, revised and augmented. In one large volume, 8vo., of nearly 750 pages. (*Lately Issued.*)

FROM THE AUTHOR'S PREFACE.

The demand for another edition has afforded the author an opportunity of again subjecting the entire treatise to a careful revision, and of incorporating in it every important observation recorded since the appearance of the last edition, in reference to the pathology and therapeutics of the several diseases of which it treats.

In the preparation of the present edition, as in those which have preceded, while the author has appropriated to his use every important fact that he has found recorded in the works of others, having a direct bearing upon either of the subjects of which he treats, and the numerous valuable observations—pathological as well as practical—dispersed throughout the pages of the medical journals of Europe and America, he has, nevertheless, relied chiefly upon his own observations and experience, acquired during a long and somewhat extensive practice, and under circumstances peculiarly well adapted for the clinical study of the diseases of early life.

Every species of hypothetical reasoning has, as much as possible, been avoided. The author has endeavored throughout the work to confine himself to a simple statement of well-ascertained pathological facts, and plain therapeutical directions—his chief desire being to render it what its title imports it to be, A PRACTICAL TREATISE ON THE DISEASES OF CHILDREN.

Dr. Condie's scholarship, acumen, industry, and practical sense are manifested in this, as in all his numerous contributions to science.—*Dr. Holmes's Report to the American Medical Association.*

Taken as a whole, in our judgment, Dr. Condie's Treatise is the one from the perusal of which the practitioner in this country will rise with the greatest satisfaction.—*Western Journal of Medicine and Surgery.*

One of the best works upon the Diseases of Children in the English language.—*Western Lancet.*

Perhaps the most full and complete work now before the profession of the United States; indeed, we may say in the English language. It is vastly superior to most of its predecessors.—*Transylvania Med. Journal.*

We feel assured from actual experience that no physician's library can be complete without a copy of this work.—*N. Y. Journal of Medicine.*

A veritable pædiatric encyclopædia, and an honor to American medical literature.—*Ohio Medical and Surgical Journal.*

We feel persuaded that the American medical profession will soon regard it not only as a very good, but as the VERY BEST "Practical Treatise on the Diseases of Children."—*American Medical Journal.*

We pronounced the first edition to be the best work on the diseases of children in the English language, and, notwithstanding all that has been published, we still regard it in that light.—*Medical Examiner.*

---

## COOPER (BRANSBY B.), F. R. S.,

Senior Surgeon to Guy's Hospital, &c.

### LECTURES ON THE PRINCIPLES AND PRACTICE OF SURGERY.

In one very large octavo volume, of 750 pages. (*Lately Issued.*)

For twenty-five years Mr. Bransby Cooper has been surgeon to Guy's Hospital; and the volume before us may be said to consist of an account of the results of his surgical experience during that long period. We cordially recommend Mr. Bransby Cooper's Lectures as a most valuable addition to our surgical literature, and one which cannot fail to be of service both to students and to those who are actively engaged in the practice of their profession.—*The Lancet.*

---

## COOPER (SIR ASTLEY P.), F. R. S., &c.

### A TREATISE ON DISLOCATIONS AND FRACTURES OF THE JOINTS.

Edited by BRANSBY B. COOPER, F. R. S., &c. With additional Observations by Prof. J. C. WARREN. A new American edition. In one handsome octavo volume, of about 500 pages, with numerous illustrations on wood.

BY THE SAME AUTHOR.

### ON THE ANATOMY AND TREATMENT OF ABDOMINAL HERNIA.

One large volume, imperial 8vo., with over 130 lithographic figures.

BY THE SAME AUTHOR.

### ON THE STRUCTURE AND DISEASES OF THE TESTIS, AND ON THE THYMUS GLAND.

One vol. imperial 8vo., with 177 figures, on 29 plates.

BY THE SAME AUTHOR.

### ON THE ANATOMY AND DISEASES OF THE BREAST, with twenty-five Miscellaneous and Surgical Papers.

One large volume, imperial 8vo., with 252 figures, on 36 plates.

These last three volumes complete the surgical writings of Sir Astley Cooper. They are very handsomely printed, with a large number of lithographic plates, executed in the best style, and are presented at exceedingly low prices.

---

## CARSON (JOSEPH), M. D.,

Professor of Materia Medica and Pharmacy in the University of Pennsylvania.

### SYNOPSIS OF THE COURSE OF LECTURES ON MATERIA MEDICA AND PHARMACY, delivered in the University of Pennsylvania.

Second and revised edition. In one very neat octavo volume, of 208 pages. (*Now Ready.*)

## CHURCHILL (FLEETWOOD), M. D., M. R. I. A.

### ON THE THEORY AND PRACTICE OF MIDWIFERY. A new American, from the last and improved English edition. Edited, with Notes and Additions, by D. Francis Condie, M. D., author of a "Practical Treatise on the Diseases of Children," &c. With 139 illustrations. In one very handsome octavo volume, pp. 510. (*Lately Issued.*)

To bestow praise on a book that has received such marked approbation would be superfluous. We need only say, therefore, that if the first edition was thought worthy of a favorable reception by the medical public, we can confidently affirm that this will be found much more so. The lecturer, the practitioner, and the student, may all have recourse to its pages, and derive from their perusal much interest and instruction in everything relating to theoretical and practical midwifery.—*Dublin Quarterly Journal of Medical Science.*

A work of very great merit, and such as we can confidently recommend to the study of every obstetric practitioner.—*London Medical Gazette.*

This is certainly the most perfect system extant. It is the best adapted for the purposes of a text-book, and that which he whose necessities confine him to one book, should select in preference to all others.—*Southern Medical and Surgical Journal.*

The most popular work on midwifery ever issued from the American press.—*Charleston Med. Journal.*

Were we reduced to the necessity of having but *one* work on midwifery, and *permitted to choose*, we would unhesitatingly take Churchill.—*Western Med. and Surg. Journal.*

It is impossible to conceive a more useful and elegant manual than Dr. Churchill's Practice of Midwifery.—*Provincial Medical Journal.*

Certainly, in our opinion, the very best work on the subject which exists.—*N. Y. Annalist.*

No work holds a higher position, or is more deserving of being placed in the hands of the tyro, the advanced student, or the practitioner.—*Medical Examiner.*

Previous editions, under the editorial supervision of Prof R. M. Huston, have been received with marked favor, and they deserved it; but this, reprinted from a very late Dublin edition, carefully revised and brought up by the author to the present time, does present an unusually accurate and able exposition of every important particular embraced in the department of midwifery. * * The clearness, directness, and precision of its teachings, together with the great amount of statistical research which its text exhibits, have served to place it already in the foremost rank of works in this department of remedial science.—*N. O. Med. and Surg. Journal.*

In our opinion, it forms one of the best if not the very best text-book and epitome of obstetric science which we at present possess in the English language.—*Monthly Journal of Medical Science.*

The clearness and precision of style in which it is written, and the great amount of statistical research which it contains, have served to place it in the first rank of works in this department of medical science.—*N. Y. Journal of Medicine.*

Few treatises will be found better adapted as a text-book for the student, or as a manual for the frequent consultation of the young practitioner.—*American Medical Journal.*

BY THE SAME AUTHOR.

### ON THE DISEASES OF INFANTS AND CHILDREN. In one large and handsome volume of over 600 pages.

We regard this volume as possessing more claims to completeness than any other of the kind with which we are acquainted. Most cordially and earnestly, therefore, do we commend it to our professional brethren, and we feel assured that the stamp of their approbation will in due time be impressed upon it. After an attentive perusal of its contents, we hesitate not to say, that it is one of the most comprehensive ever written upon the diseases of children, and that, for copiousness of reference, extent of research, and perspicuity of detail, it is scarcely to be equalled, and not to be excelled, in any language.—*Dublin Quarterly Journal.*

After this meagre, and we know, very imperfect notice of Dr. Churchill's work, we shall conclude by saying, that it is one that cannot fail from its copiousness, extensive research, and general accuracy, to exalt still higher the reputation of the author in this country. The American reader will be particularly pleased to find that Dr. Churchill has done full justice throughout his work to the various American authors on this subject. The names of Dewees, Eberle, Condie, and Stewart, occur on nearly every page, and these authors are constantly referred to by the author in terms of the highest praise, and with the most liberal courtesy.—*The Medical Examiner.*

The present volume will sustain the reputation acquired by the author from his previous works. The reader will find in it full and judicious directions for the management of infants at birth, and a compendious, but clear account of the diseases to which children are liable, and the most successful mode of treating them. We must not close this notice without calling attention to the author's style, which is perspicuous and polished to a degree, we regret to say, not generally characteristic of medical works. We recommend the work of Dr. Churchill most cordially, both to students and practitioners, as a valuable and reliable guide in the treatment of the diseases of children.—*Am. Journ. of the Med. Sciences.*

We know of no work on this department of Practical Medicine which presents so candid and unprejudiced a statement or posting up of our actual knowledge as this.—*N. Y. Journal of Medicine.*

Its claims to merit both as a scientific and practical work, are of the highest order. Whilst we would not elevate it above every other treatise on the same subject, we certainly believe that very few are equal to it, and none superior.—*Southern Med. and Surgical Journal.*

BY THE SAME AUTHOR.

### ESSAYS ON THE PUERPERAL FEVER, AND OTHER DISEASES PECULIAR TO WOMEN. Selected from the writings of British Authors previous to the close of the Eighteenth Century. In one neat octavo volume, of about four hundred and fifty pages.

To these papers Dr. Churchill has appended notes, embodying whatever information has been laid before the profession since their authors' time. He has also prefixed to the Essays on Puerperal Fever, which occupy the larger portion of the volume, an interesting historical sketch of the principal epidemics of that disease. The whole forms a very valuable collection of papers, by professional writers of eminence, on some of the most important accidents to which the puerperal female is liable.—*American Journal of Medical Sciences.*

## CHURCHILL (FLEETWOOD), M. D., M. R. I. A., &c.

### ON THE DISEASES OF WOMEN; including those of Pregnancy and Childbed.

A new American edition, revised by the Author. With Notes and Additions, by D Francis Condie, M. D., author of "A Practical Treatise on the Diseases of Children." In one large and handsome octavo volume, with wood-cuts, pp. 684. (*Just Issued.*)

We now regretfully take leave of Dr. Churchill's book. Had our typographical limits permitted, we should gladly have borrowed more from its richly stored pages. In conclusion, we heartily recommend it to the profession, and would at the same time express our firm conviction that it will not only add to the reputation of its author, but will prove a work of great and extensive utility to obstetric practitioners.—*Dublin Medical Press.*

Former editions of this work have been noticed in previous numbers of the Journal. The sentiments of high commendation expressed in those notices, have only to be repeated in this; not from the fact that the profession at large are not aware of the high merits which this work really possesses, but from a desire to see the principles and doctrines therein contained more generally recognized, and more universally carried out in practice.—*N. Y. Journal of Medicine.*

We know of no author who deserves that approbation, on "the diseases of females," to the same extent that Dr. Churchill does. His, indeed, is the only thorough treatise we know of on the subject; and it may be commended to practitioners and students as a masterpiece in its particular department. The former editions of this work have been commended strongly in this journal, and they have won their way to an extended, and a well-deserved popularity. This fifth edition, before us, is well calculated to maintain Dr. Churchill's high reputation. It was revised and enlarged by the author, for his American publishers, and it seems to us that there is scarcely any species of desirable information on its subjects that may not be found in this work.—*The Western Journal of Medicine and Surgery.*

We are gratified to announce a new and revised edition of Dr. Churchill's valuable work on the diseases of females We have ever regarded it as one of the very best works on the subjects embraced within its scope, in the English language; and the present edition, enlarged and revised by the author, renders it still more entitled to the confidence of the profession. The valuable notes of Prof. Huston have been retained, and contribute, in no small degree, to enhance the value of the work. It is a source of congratulation that the publishers have permitted the author to be, in this instance, his own editor, thus securing all the revision which an author alone is capable of making.—*The Western Lancet.*

As a comprehensive manual for students, or a work of reference for practitioners, we only speak with common justice when we say that it surpasses any other that has ever issued on the same subject from the British press.—*The Dublin Quarterly Journal.*

## DICKSON (S. H.), M. D.,

Professor of Institutes and Practice of Medicine in the Medical College of South Carolina.

### ELEMENTS OF MEDICINE; a Compendious View of Pathology and Therapeutics, or the History and Treatment of Diseases.

In one large and handsome octavo volume of nearly 800 pages (*Now Ready.*)

As a text-book on the Practice of Medicine for the student, and as a condensed work of reference for the practitioner, this volume will have strong claims on the attention of the American profession. Few physicians have had wider opportunities, than the author, for observation and experience, and few perhaps have used them better. As the result of a life of study and practice, therefore, the present volume will doubtless be received with the welcome it deserves.

*From the Preface.*

The present volume is intended as an aid to young men who have engaged in the study of medicine, to physicians who have recently assumed the responsibilities of practice, and to my fellow professors of the Institutes of Medicine, and private instructors who have felt the difficulty of communicating to the two first classes the knowledge which they are earnestly seeking to acquire. Having been a teacher of medicine for thirty years, and a student more than forty, I must have accumulated some experience in both characters. I have prepared and printed for those in attendance on my lectures many successive manuals or text-books. I have also written and published several volumes on medical subjects in general. The following pages are the result of a careful collation of all that has been esteemed valuable in both, with such matter as continued study and enlarged experience has enabled me to add.

## DEWEES (W. P.), M. D., &c.

### A COMPREHENSIVE SYSTEM OF MIDWIFERY.

Illustrated by occasional Cases and many Engravings. Twelfth edition, with the Author's last Improvements and Corrections. In one octavo volume, of 600 pages. (*Just Issued.*)

BY THE SAME AUTHOR.

### A TREATISE ON THE PHYSICAL AND MEDICAL TREATMENT OF CHILDREN.

Tenth edition. In one volume, octavo, 548 pages. (*Just Issued.*)

BY THE SAME AUTHOR.

### A TREATISE ON THE DISEASES OF FEMALES.

Tenth edition. In one volume, octavo, 532 pages, with plates. (*Just Issued.*)

## DANA (JAMES D).

### ZOOPHYTES AND CORALS.

In one volume, imperial quarto, extra cloth, with wood-cuts. Also, AN ATLAS, in one volume, imperial folio, with sixty-one magnificent plates, colored after nature. Bound in half morocco.

## DE LA BECHE (SIR HENRY T.), F. R. S., &c.

### THE GEOLOGICAL OBSERVER.

In one very large and handsome octavo volume, of 700 pages. With over three hundred wood-cuts. (*Lately Issued.*)

## DRUITT (ROBERT), M. R. C. S., &c.

### THE PRINCIPLES AND PRACTICE OF MODERN SURGERY.

A new American, from the improved London edition. Edited by F. W. SARGENT, M. D., author of "Minor Surgery," &c. Illustrated with one hundred and ninety-three wood-engravings. In one very handsomely printed octavo volume, of 576 large pages.

Dr. Druitt's researches into the literature of his subject have been not only extensive, but well directed; the most discordant authors are fairly and impartially quoted, and, while due credit is given to each, their respective merits are weighed with an unprejudiced hand. The grain of wheat is preserved, and the chaff is unmercifully stripped off. The arrangement is simple and philosophical, and the style, though clear and interesting, is so precise, that the book contains more information condensed into a few words than any other surgical work with which we are acquainted.—*London Medical Times and Gazette*, February 18, 1854.

No work, in our opinion, equals it in presenting so much valuable surgical matter in so small a compass.—*St. Louis Med. and Surgical Journal.*

Druitt's Surgery is too well known to the American medical profession to require its announcement anywhere. Probably no work of the kind has ever been more cordially received and extensively circulated than this. The fact that it comprehends in a comparatively small compass, all the essential elements of theoretical and practical Surgery—that it is found to contain reliable and authentic information on the nature and treatment of nearly all surgical affections—is a sufficient reason for the liberal patronage it has obtained. The editor, Dr. F. W. Sargent, has contributed much to enhance the value of the work, by such American improvements as are calculated more perfectly to adapt it to our own views and practice in this country. It abounds everywhere with spirited and life-like illustrations, which to the young surgeon, especially, are of no minor consideration. Every medical man frequently needs just such a work as this, for immediate reference in moments of sudden emergency, when he has not time to consult more elaborate treatises.—*The Ohio Medical and Surgical Journal.*

The author has evidently ransacked every standard treatise of ancient and modern times, and all that is really practically useful at the bedside will be found in a form at once clear, distinct, and interesting.—*Edinburgh Monthly Medical Journal.*

Druitt's work, condensed, systematic, lucid, and practical as it is, beyond most works on Surgery accessible to the American student, has had much currency in this country, and under its present auspices promises to rise to yet higher favor.—*The Western Journal of Medicine and Surgery.*

The most accurate and ample resumé of the present state of Surgery that we are acquainted with.—*Dublin Medical Journal.*

A better book on the principles and practice of Surgery as now understood in England and America, has not been given to the profession.—*Boston Medical and Surgical Journal.*

An unsurpassable compendium, not only of Surgical, but of Medical Practice.—*London Medical Gazette.*

This work merits our warmest commendations, and we strongly recommend it to young surgeons as an admirable digest of the principles and practice of modern Surgery.—*Medical Gazette.*

It may be said with truth that the work of Mr. Druitt affords a complete, though brief and condensed view, of the entire field of modern surgery. We know of no work on the same subject having the appearance of a manual, which includes so many topics of interest to the surgeon; and the terse manner in which each has been treated evinces a most enviable quality of mind on the part of the author, who seems to have an innate power of searching out and grasping the leading facts and features of the most elaborate productions of the pen. It is a useful handbook for the practitioner, and we should deem a teacher of surgery unpardonable who did not recommend it to his pupils. In our own opinion, it is admirably adapted to the wants of the student.—*Provincial Medical and Surgical Journal.*

## DUNGLISON, FORBES, TWEEDIE, AND CONOLLY.

### THE CYCLOPÆDIA OF PRACTICAL MEDICINE:

comprising Treatises on the Nature and Treatment of Diseases, Materia Medica, and Therapeutics, Diseases of Women and Children, Medical Jurisprudence, &c. &c. In four large super royal octavo volumes, of 3254 double-columned pages, strongly and handsomely bound.

*** This work contains no less than four hundred and eighteen distinct treatises, contributed by sixty-eight distinguished physicians.

The most complete work on Practical Medicine extant; or, at least, in our language.—*Buffalo Medical and Surgical Journal.*

For reference, it is above all price to every practitioner.—*Western Lancet.*

One of the most valuable medical publications of the day—as a work of reference it is invaluable.—*Western Journal of Medicine and Surgery.*

It has been to us, both as learner and teacher, a work for ready and frequent reference, one in which modern English medicine is exhibited in the most advantageous light.—*Medical Examiner.*

We rejoice that this work is to be placed within the reach of the profession in this country, it being unquestionably one of very great value to the practitioner. This estimate of it has not been formed from a hasty examination, but after an intimate acquaintance derived from frequent consultation of it during the past nine or ten years. The editors are practitioners of established reputation, and the list of contributors embraces many of the most eminent professors and teachers of London, Edinburgh, Dublin, and Glasgow. It is, indeed, the great merit of this work that the principal articles have been furnished by practitioners who have not only devoted especial attention to the diseases about which they have written, but have also enjoyed opportunities for an extensive practical acquaintance with them, and whose reputation carries the assurance of their competency justly to appreciate the opinions of others, while it stamps their own doctrines with high and just authority.—*American Medical Journ.*

## DUNGLISON (ROBLEY), M. D.,

Professor of the Institutes of Medicine in the Jefferson Medical College, Philadelphia.

### HUMAN HEALTH;

or, the Influence of Atmosphere and Locality, Change of Air and Climate, Seasons, Food, Clothing, Bathing, Exercise, Sleep, &c. &c., on Healthy Man; constituting Elements of Hygiene. Second edition, with many modifications and additions. In one octavo volume, of 464 pages.

## DUNGLISON (ROBLEY), M. D.,

Professor of Institutes of Medicine in the Jefferson Medical College, Philadelphia.

MEDICAL LEXICON; a Dictionary of Medical Science, containing a concise Explanation of the various Subjects and Terms of Physiology, Pathology, Hygiene, Therapeutics, Pharmacology, Obstetrics, Medical Jurisprudence, &c. With the French and other Synonymes; Notices of Climate and of celebrated Mineral Waters; Formulæ for various Officinal, Empirical, and Dietetic Preparations, etc. TWELFTH EDITION, revised. In one very thick octavo volume, of over nine hundred large double-columned pages, strongly bound in leather, with raised bands. (*Just Issued.*)

Every successive edition of this work bears the marks of the industry of the author, and of his determination to keep it fully on a level with the most advanced state of medical science. Thus nearly FIFTEEN THOUSAND WORDS have been added to it within the last few years. As a complete Medical Dictionary, therefore, embracing over FIFTY THOUSAND DEFINITIONS, in all the branches of the science, it is presented as meriting a continuance of the great favor and popularity which have carried it, within no very long space of time, to a twelfth edition.

Every precaution has been taken in the preparation of the present volume, to render its mechanical execution and typographical accuracy worthy of its extended reputation and universal use. The very extensive additions have been accommodated, without materially increasing the bulk of the volume by the employment of a small but exceedingly clear type, cast for this purpose. The press has been watched with great care, and every effort used to insure the verbal accuracy so necessary to a work of this nature. The whole is printed on fine white paper; and, while thus exhibiting in every respect so great an improvement over former issues, it is presented at the original exceedingly low price.

We welcome it cordially; it is an admirable work, and indispensable to all literary medical men. The labor which has been bestowed upon it is something prodigious. The work, however, has now been done, and we are happy in the thought that no human being will have again to undertake the same gigantic task Revised and corrected from time to time, Dr. Dunglison's "Medical Lexicon" will last for centuries.—*British and Foreign Med. Chirurg. Review.*

The fact that this excellent and learned work has passed through eight editions, and that a ninth is rendered necessary by the demands of the public, affords a sufficient evidence of the general appreciation of Dr. Dunglison's labors by the medical profession in England and America. It is a book which will be of great service to the student, in teaching him the meaning of all the technical terms used in medicine, and will be of no less use to the practitioner who desires to keep himself on a level with the advance of medical science.—*London Medical Times and Gazette.*

In taking leave of our author, we feel compelled to confess that his work bears evidence of almost incredible labor having been bestowed upon its composition.—*Edinburgh Journal of Med. Sciences.*

A miracle of labor and industry in one who has written able and voluminous works on nearly every branch of medical science. There could be no more useful book to the student or practitioner, in the present advancing age, than one in which would be found, in addition to the ordinary meaning and derivation of medical terms—so many of which are of modern introduction—concise descriptions of their explanation and employment; and all this and much more is contained in the volume before us. It is therefore almost as indispensable to the other learned professions as to our own. In fact, to all who may have occasion to ascertain the meaning of any word belonging to the many branches of medicine. From a careful examination of the present edition, we can vouch for its accuracy, and for its being brought quite up to the date of publication; the author states in his preface that he has added to it about four thousand terms, which are not to be found in the preceding one.—*Dublin Quarterly Journal of Medical Sciences.*

On the appearance of the last edition of this valuable work, we directed the attention of our readers to its peculiar merits; and we need do little more than state, in reference to the present reissue, that, notwithstanding the large additions previously made to it, no fewer than four thousand terms, not to be found in the preceding edition, are contained in the volume before us.—Whilst it is a wonderful monument of its author's erudition and industry, it is also a work of great practical utility, as we can testify from our own experience; for we keep it constantly within our reach, and make very frequent reference to it, nearly always finding in it the information we seek. —*British and Foreign Med.-Chirurg. Review.*

It has the rare merit that it certainly has no rival in the English language for accuracy and extent of references. The terms generally include short physiological and pathological descriptions, so that, as the author justly observes, the reader does not possess in this work a mere dictionary, but a book, which, while it instructs him in medical etymology, furnishes him with a large amount of useful information. The author's labors have been properly appreciated by his own countrymen; and we can only confirm their judgment, by recommending this most useful volume to the notice of our cisatlantic readers. No medical library will be complete without it.—*London Med. Gazette.*

It is certainly more complete and comprehensive than any with which we are acquainted in the English language. Few, in fact, could be found better qualified than Dr. Dunglison for the production of such a work. Learned, industrious, persevering, and accurate, he brings to the task all the peculiar talents necessary for its successful performance; while, at the same time, his familiarity with the writings of the ancient and modern "masters of our art," renders him skilful to note the exact usage of the several terms of science, and the various modifications which medical terminology has undergone with the change of theories or the progress of improvement.—*American Journal of the Medical Sciences.*

One of the most complete and copious known to the cultivators of medical science.—*Boston Med. Journal.*

The most comprehensive and best English Dictionary of medical terms extant.—*Buffalo Medical Journal.*

BY THE SAME AUTHOR.

THE PRACTICE OF MEDICINE. A Treatise on Special Pathology and Therapeutics. Third Edition. In two large octavo volumes, of fifteen hundred pages.

Upon every topic embraced in the work the latest information will be found carefully posted up.—*Medical Examiner.*

The student of medicine will find, in these two elegant volumes, a mine of facts, a gathering of precepts and advice from the world of experience, that will nerve him with courage, and faithfully direct him in his efforts to relieve the physical sufferings of the race.—*Boston Medical and Surgical Journal.*

It is certainly the most complete treatise of which we have any knowledge.—*Western Journal of Medicine and Surgery.*

One of the most elaborate treatises of the kind we have.—*Southern Med. and Surg. Journal.*

## DUNGLISON (ROBLEY), M. D.,

Professor of Institutes of Medicine in the Jefferson Medical College, Philadelphia.

**HUMAN PHYSIOLOGY.** Seventh edition. Thoroughly revised and extensively modified and enlarged, with nearly five hundred illustrations. In two large and handsomely printed octavo volumes, containing nearly 1450 pages.

It has long since taken rank as one of the medical classics of our language. To say that it is by far the best text-book of physiology ever published in this country, is but echoing the general testimony of the profession.—*N. Y. Journal of Medicine.*

There is no single book we would recommend to the student or physician, with greater confidence than the present, because in it will be found a mirror of almost every standard physiological work of the day. We most cordially recommend the work to every member of the profession, and no student should be without it. It is the completest work on Physiology in the English language, and is highly creditable to the author and publishers.—*Canadian Medical Journal.*

The most complete and satisfactory system of Physiology in the English language.—*Amer. Med. Journal.*

The best work of the kind in the English language.—*Silliman's Journal.*

The most full and complete system of Physiology in our language.—*Western Lancet.*

BY THE SAME AUTHOR. (*Just Issued.*)

**GENERAL THERAPEUTICS AND MATERIA MEDICA;** adapted for a Medical Text-book. Fifth edition, much improved. With one hundred and eighty-seven illustrations. In two large and handsomely printed octavo vols., of about 1100 pages.

The new editions of the United States Pharmacopœia and those of London and Dublin, have rendered necessary a thorough revision of this work. In accomplishing this the author has spared no pains in rendering it a complete exponent of all that is new and reliable, both in the departments of Therapeutics and Materia Medica. The book has thus been somewhat enlarged, and a like improvement will be found in every department of its mechanical execution. As a convenient text-book for the student, therefore, containing within a moderate compass a satisfactory resumé of its important subject, it is again presented as even more worthy than heretofore of the very great favor which it has received.

In this work of Dr. Dunglison, we recognize the same untiring industry in the collection and embodying of facts on the several subjects of which he treats, that has heretofore distinguished him, and we cheerfully point to these volumes, as two of the most interesting that we know of. In noticing the additions to this, the fourth edition, there is very little in the periodical or annual literature of the profession, published in the interval which has elapsed since the issue of the first, that has escaped the careful search of the author. As a book for reference, it is invaluable.—*Charleston Med. Journal and Review.*

It may be said to be *the* work now upon the subjects upon which it treats.—*Western Lancet.*

As a text-book for students, for whom it is particularly designed, we know of none superior to it.—*St. Louis Medical and Surgical Journal.*

It purports to be a new edition, but it is rather a new book, so greatly has it been improved, both in the amount and quality of the matter which it contains.—*N. O. Medical and Surgical Journal.*

We bespeak for this edition, from the profession, an increase of patronage over any of its former ones, on account of its increased merit.—*N. Y. Journal of Medicine.*

We consider this work unequalled.—*Boston Med. and Surg. Journal.*

BY THE SAME AUTHOR.

**NEW REMEDIES, WITH FORMULÆ FOR THEIR ADMINISTRATION.** Sixth edition, with extensive Additions. In one very large octavo volume, of over 750 pages.

One of the most useful of the author's works.—*Southern Medical and Surgical Journal.*

This well-known and standard book has now reached its sixth edition, and has been enlarged and improved by the introduction of all the recent gifts to therapeutics which the last few years have so richly produced, including the anæsthetic agents, &c. This elaborate and useful volume should be found in every medical library, for as a book of reference, for physicians, it is unsurpassed by any other work in existence, and the double index for diseases and for remedies, will be found greatly to enhance its value.—*New York Med. Gazette.*

The great learning of the author, and his remarkable industry in pushing his researches into every source whence information is derivable, has enabled him to throw together an extensive mass of facts and statements, accompanied by full reference to authorities; which last feature renders the work practically valuable to investigators who desire to examine the original papers.—*The American Journal of Pharmacy.*

## DE JONGH (L. J.), M. D., &c.

**THE THREE KINDS OF COD-LIVER OIL,** comparatively considered, with their Chemical and Therapeutic Properties. Translated, with an Appendix and Cases, by EDWARD CAREY, M. D. To which is added an article on the subject from "Dunglison on New Remedies." In one small 12mo. volume, extra cloth.

## DAY (GEORGE E.), M. D.

**A PRACTICAL TREATISE ON THE DOMESTIC MANAGEMENT AND MORE IMPORTANT DISEASES OF ADVANCED LIFE.** With an Appendix on a new and successful mode of treating Lumbago and other forms of Chronic Rheumatism. One volume, octavo, 226 pages.

## FRICK (CHARLES), M. D.

**RENAL AFFECTIONS;** their Diagnosis and Pathology. With illustrations. One volume, royal 12mo., extra cloth.

## ERICHSEN (JOHN),

Professor of Surgery in University College, London, &c.

### THE SCIENCE AND ART OF SURGERY; BEING A TREATISE ON SURGICAL INJURIES, DISEASES, AND OPERATIONS.

Edited by JOHN H. BRINTON, M. D. Illustrated with three hundred and eleven engravings on wood. In one large and handsome octavo volume, of over nine hundred closely printed pages. (*Just Issued.*)

It is, in our humble judgment, decidedly the best book of the kind in the English language. Strange that just such books are not oftener produced by public teachers of surgery in this country and Great Britain. Indeed, it is a matter of great astonishment, but no less true than astonishing, that of the many works on surgery republished in this country within the last fifteen or twenty years as text-books for medical students, this is the only one, that even approximates to the fulfilment of the peculiar wants of young men just entering upon the study of this branch of the profession.—*Western Jour. of Med. and Surgery.*

Embracing, as will be perceived, the whole surgical domain, and each division of itself almost complete and perfect, each chapter full and explicit, each subject faithfully exhibited, we can only express our estimate of it in the aggregate. We consider it an excellent contribution to surgery, as probably the best single volume now extant on the subject, and with great pleasure we add it to our text-books.—*Nashville Journal of Medicine and Surgery.*

Its value is greatly enhanced by a very copious well-arranged index. We regard this as one of the most valuable contributions to modern surgery. To one entering his novitiate of practice, we regard it the most serviceable guide which he can consult. He will find a fulness of detail leading him through every step of the operation, and not deserting him until the final issue of the case is decided. For the same reason we recommend it to those whose routine of practice lies in such parts of the country that they must rarely encounter cases requiring surgical management.—*Stethoscope.*

Prof. Erichsen's work, for its size, has not been surpassed; his nine hundred and eight pages, profusely illustrated, are rich in physiological, pathological, and operative suggestions, doctrines, details, and processes; and will prove a reliable resource for information, both to physician and surgeon, in the hour of peril.—*N. O. Med. and Surg. Journal.*

We are acquainted with no other work wherein so much good sense, sound principle, and practical inferences, stamp every page. To say more of the volume would be useless; to say less would be doing injustice to a production which we consider above all others at the present day, and superior and more complete than the many excellent treatises of the English and Scotch surgeons, and this is no small encomium.—*American Lancet.*

---

## ELLIS (BENJAMIN), M. D.

### THE MEDICAL FORMULARY:

being a Collection of Prescriptions, derived from the writings and practice of many of the most eminent physicians of America and Europe. Together with the usual Dietetic Preparations and Antidotes for Poisons. To which is added an Appendix, on the Endermic use of Medicines, and on the use of Ether and Chloroform. The whole accompanied with a few brief Pharmaceutic and Medical Observations. Tenth edition, revised and much extended by ROBERT P. THOMAS, M. D., Professor of Materia Medica in the Philadelphia College of Pharmacy. In one neat octavo volume, of two hundred and ninety-six pages. (*Lately Issued.*)

After an examination of the new matter and the alterations, we believe the reputation of the work built up by the author, and the late distinguished editor, will continue to flourish under the auspices of the present editor, who has the industry and accuracy, and, we would say, conscientiousness requisite for the responsible task.—*American Journal of Pharmacy*, March, 1854.

It will prove particularly useful to students and young practitioners, as the most important prescriptions employed in modern practice, which lie scattered through our medical literature, are here collected and conveniently arranged for reference.—*Charleston Med. Journal and Review.*

---

## FOWNES (GEORGE), PH. D., &c.

### ELEMENTARY CHEMISTRY; Theoretical and Practical.

With numerous illustrations. A new American, from the last and revised London edition. Edited, with Additions, by ROBERT BRIDGES, M. D. In one large royal 12mo. volume, of over 550 pages, with 181 wood-cuts, sheep, or extra cloth. (*Now Ready.*)

We know of no better text-book, especially in the difficult department of organic chemistry, upon which it is particularly full and satisfactory. We would recommend it to preceptors as a capital "office book" for their students who are beginners in Chemistry. It is copiously illustrated with excellent wood-cuts, and altogether admirably "got up."—*N. J. Medical Reporter*, March, 1854.

A standard manual, which has long enjoyed the reputation of embodying much knowledge in a small space. The author has achieved the difficult task of condensation with masterly tact. His book is concise without being dry, and brief without being too dogmatical or general.—*Virginia Med. and Surgical Journal.*

The work of Dr. Fownes has long been before the public, and its merits have been fully appreciated as the best text-book on chemistry now in existence. We do not, of course, place it in a rank superior to the works of Brande, Graham, Turner, Gregory, or Gmelin, but we say that, as a work for students, it is preferable to any of them.—*London Journal of Medicine.*

A work well adapted to the wants of the student. It is an excellent exposition of the chief doctrines and facts of modern chemistry. The size of the work, and still more the condensed yet perspicuous style in which it is written, absolve it from the charges very properly urged against most manuals termed popular.—*Edinburgh Monthly Journal of Medical Science.*

---

## FLINT (AUSTIN), M. D.,

Professor of the Theory and Practice of Medicine in the University of Louisville, &c.

### PHYSICAL EXPLORATION AND DIAGNOSIS OF DISEASES AFFECTING THE ORGANS OF RESPIRATION.

In one handsome octavo volume. (*Now Ready.*)

The reputation already acquired by the author with respect to his researches on this and kindred topics, is sufficient guarantee that he will accomplish his object in presenting the student with a good practical text-book, which will facilitate the acquirement of a knowledge of this difficult subject. The work will be ready in time for the Fall sessions.

## FERGUSSON (WILLIAM), F. R. S.,

Professor of Surgery in King's College, London, &c.

### A SYSTEM OF PRACTICAL SURGERY.

Fourth American, from the third and enlarged London edition. In one large and beautifully printed octavo volume, of about seven hundred pages, with three hundred and ninety-three handsome illustrations. (*Just Issued.*)

The most important subjects in connection with practical surgery which have been more recently brought under the notice of, and discussed by, the surgeons of Great Britain, are fully and dispassionately considered by Mr. Fergusson, and that which was before wanting has now been supplied, so that we can now look upon it as a work on practical surgery instead of one on operative surgery alone. There was some ground formerly for the complaint before alluded to, that it dwelt too exclusively on operative surgery; but this defect is now removed, and the book is more than ever adapted for the purposes of the practitioner, whether he confines himself more strictly to the operative department, or follows surgery on a more comprehensive scale.—*Medical Times and Gazette.*

No work was ever written which more nearly comprehended the necessities of the student and practitioner, and was more carefully arranged to that single purpose than this.—*N. Y. Med. and Surg. Journal.*

The addition of many new pages makes this work more than ever indispensable to the student and practitioner.—*Ranking's Abstract.*

Among the numerous works upon surgery published of late years, we know of none we value more highly than the one before us. It is perhaps the very best we have for a text-book and for ordinary reference, being concise and eminently practical.—*Southern Med. and Surg. Journal.*

## GRAHAM (THOMAS), F. R. S.,

Professor of Chemistry in University College, London, &c.

### THE ELEMENTS OF CHEMISTRY.

Including the application of the Science to the Arts. With numerous illustrations. With Notes and Additions, by Robert Bridges, M. D., &c. &c. Second American, from the second and enlarged London edition

PART I. (*Lately Issued*) large 8vo., 430 pages, 185 illustrations.
PART II. (*Preparing*) to match.

The great changes which the science of chemistry has undergone within the last few years, render a new edition of a treatise like the present, almost a new work. The author has devoted several years to the revision of his treatise, and has endeavored to embody in it every fact and inference of importance which has been observed and recorded by the great body of chemical investigators who are so rapidly changing the face of the science. In this manner the work has been greatly increased in size, and the number of illustrations doubled; while the labors of the editor have been directed towards the introduction of such matters as have escaped the attention of the author, or as have arisen since the publication of the first portion of this edition in London, in 1850. Printed in handsome style, and at a very low price, it is therefore confidently presented to the profession and the student as a very complete and thorough text-book of this important subject.

## GRIFFITH (ROBERT E.), M. D., &c.

### A UNIVERSAL FORMULARY,

containing the methods of Preparing and Administering Officinal and other Medicines. The whole adapted to Physicians and Pharmaceutists. Second Edition, thoroughly revised, with numerous additions, by Robert P. Thomas, M. D., Professor of Materia Medica in the Philadelphia College of Pharmacy. In one large and handsome octavo volume, of over six hundred pages, double columns. (*Just Issued.*)

It was a work requiring much perseverance, and when published was looked upon as by far the best work of its kind that had issued from the American press, being free of much of the trashy, and embracing most of the non-officinal formulæ used or known in American, English, or French practice, arranged under the heads of the several constituent drugs, placing the receipt under its more important constituent. Prof. Thomas has certainly "improved," as well as added to this Formulary, and has rendered it additionally deserving of the confidence of pharmaceutists and physicians.—*American Journal of Pharmacy.*

We are happy to announce a new and improved edition of this, one of the most valuable and useful works that have emanated from an American pen. It would do credit to any country, and will be found of daily usefulness to practitioners of medicine; it is better adapted to their purposes than the dispensatories.—*Southern Med. and Surg. Journal.*

A new edition of this well-known work, edited by R. P. Thomas, M. D., affords occasion for renewing our commendation of so useful a handbook, which ought to be universally studied by medical men of every class, and made use of by way of reference by office pupils, as a standard authority. It has been much enlarged, and now condenses a vast amount of needful and necessary knowledge in small compass. The more of such books the better for the profession and the public.—*N. Y. Med. Gazette.*

It is one of the most useful books a country practitioner can possibly have in his possession.—*Medical Chronicle.*

The amount of useful every-day matter, for a practicing physician, is really immense.—*Boston Med. and Surg. Journal.*

This is a work of six hundred and fifty one pages, embracing all on the subject of preparing and administering medicines that can be desired by the physician and pharmaceutist.—*Western Lancet.*

In short, it is full and complete work of the kind, and should be in the hands of every physician and apothecary. *O. Med. and Surg. Journal.*

We predic a great sale for this work, and we especially recommend it to all *medical* teachers.—*Richmond Stethoscope.*

This edition of Dr. Griffith's work has been greatly improved by the revision and ample additions of Dr. Thomas, and is now, we believe, one of the most complete works of its kind in any language. The additions amount to about seventy pages, and no effort has been spared to include in them all the recent improvements which have been published in medical journals, and systematic treatises. A work of this kind appears to us indispensable to the physician, and there is none we can more cordially recommend.—*N. Y. Journal of Medicine.*

BY THE SAME AUTHOR.

### MEDICAL BOTANY;

or, a Description of all the more important Plants used in Medicine, and of their Properties, Uses, and Modes of Administration. In one large octavo volume, of 704 pages, handsomely printed, with nearly 350 illustrations on wood.

## GREGORY (WILLIAM), F. R. S. E.,

### LETTERS TO A CANDID INQUIRER ON ANIMAL MAGNETISM.

In one neat volume, royal 12mo., extra cloth. pp. 384.

## GROSS (SAMUEL D.), M. D.,

Professor of Surgery in the University of Louisville, &c.

## A PRACTICAL TREATISE ON THE DISEASES, INJURIES, AND MALFORMATIONS OF THE URINARY BLADDER, THE PROSTATE GLAND, AND THE URETHRA.

Second Edition, revised and much enlarged, with one hundred and eighty-four illustrations. In one large and very handsome octavo volume, of over nine hundred pages. (*Now Ready.*)

The author has availed himself of the opportunity afforded by a call for a new edition of this work, to thoroughly revise and render it in every respect worthy, so far as in his power, of the very flattering reception which has been accorded to it by the profession. The new matter thus added amounts to almost one-third of the original work, while the number of illustrations has been nearly doubled. These additions pervade every portion of the work, which thus has rather the aspect of a new treatise than a new edition. In its present improved form, therefore, it may confidently be presented as a complete and reliable storehouse of information on this important class of diseases, and as in every way fitted to maintain the position which it has acquired in Europe and in this country, as the standard of authority on the subjects treated of.

On the appearance of the first edition of this work, the leading English medical review predicted that it would have a "permanent place in the literature of surgery worthy to rank with the best works of the present age." This prediction has been amply fulfilled. Dr. Gross's treatise has been found to supply completely the want which has been felt ever since the elevation of surgery to the rank of science, of a good practical treatise on the diseases of the bladder and its accessory organs. Philosophical in its design, methodical in its arrangement, ample and sound in its practical details, it may in truth be said to leave scarcely anything to be desired on so important a subject, and with the additions and modifications resulting from future discoveries and improvements, it will probably remain one of the most valuable works on this subject so long as the science of medicine shall exist.—*Boston Med. and Surg. Journal*, June 7, 1855.

A volume replete with truths and principles of the utmost value in the investigation of these diseases.—*American Medical Journal.*

Dr. Gross has brought all his learning, experience, tact, and judgment to the task, and has produced a work worthy of his high reputation. We feel perfectly safe in recommending it to our readers as a monograph unequalled in interest and practical value by any other on the subject in our language.—*Western Journal of Med. and Surg.*

It has remained for an American writer to wipe away this reproach; and so completely has the task been fulfilled, that we venture to predict for Dr. Gross's treatise a permanent place in the literature of surgery, worthy to rank with the best works of the present age. Not merely is the matter good, but the getting up of the volume is most creditable to transatlantic enterprise; the paper and print would do credit to a first-rate London establishment; and the numerous wood-cuts which illustrate it, demonstrate that America is making rapid advances in this department of art. We have, indeed, unfeigned pleasure in congratulating all concerned in this publication, on the result of their labours; and experience a feeling something like what animates a long-expectant husbandman, who, oftentimes disappointed by the produce of a favorite field, is at last agreeably surprised by a stately crop which may bear comparison with any of its former rivals. The grounds of our high appreciation of the work will be obvious as we proceed; and we doubt not that the present facilities for obtaining American books will induce many of our readers to verify our recommendation by their own perusal of it.—*British and Foreign Medico-Chirurgical Review.*

Whoever will peruse the vast amount of valuable practical information it contains, and which we have been unable even to notice, will, we think, agree with us, that there is no work in the English language which can make any just pretensions to be its equal.—*N. Y. Journal of Medicine.*

BY THE SAME AUTHOR. (*Just Issued*).

## A PRACTICAL TREATISE ON FOREIGN BODIES IN THE AIR-PASSAGES.

In one handsome octavo volume, with illustrations. pp. 468.

A very elaborate work. It is a complete summary of the whole subject, and will be a useful book of reference.—*British and Foreign Medico-Chirurg. Review.*

A highly valuable book of reference on a most important subject in the practice of medicine. We conclude by recommending it to our readers, fully persuaded that its perusal will afford them much practical information well conveyed, evidently derived from considerable experience and deduced from an ample collection of facts.—*Dublin Quarterly Journal*, May, 1855.

In this valuable monograph Dr. Gross has certainly struck a new lead in Surgery, and is entitled to the credit of having illustrated and systematized a most interesting and hitherto a most neglected department of surgical pathology and practice.—*St. Louis Med. and Surg. Journal*, May, 1855.

Surgical authors, isolated reports in medical periodicals and modern surgeons 'blend their common toil" to make a book which exhausts the subject, and must forever remain the standard work on the management of this accident.—*Buffalo Med. Journ.*

We consider this work one of the most important of the recent additions to practical surgery. Containing all that has been recorded relating to the class of accidents of which it treats, admirably arranged and systematized, it should find a place in every medical library.—*Montreal Med. Chronicle.*

BY THE SAME AUTHOR. (*Preparing.*)

## A SYSTEM OF SURGERY; Diagnostic, Pathological, Therapeutic, and Operative.

With very numerous engravings on wood.

BY THE SAME AUTHOR.

## ELEMENTS OF PATHOLOGICAL ANATOMY; illustrated by colored Engravings, and two hundred and fifty wood-cuts.

Second edition, thoroughly revised and greatly enlarged. In one very large and handsome imperial octavo volume. pp. 822.

We recommend it as the most complete, and, on the whole, the least defective compilation on the subject in the English language.—*Brit. and For. Med. Journal.*

It is altogether the most complete exposition of Pathological Anatomy in our language.—*American Journal of Medical Sciences.*

It is the most complete and useful systematic work on Pathological Anatomy in the English language. The colored engravings and wood-cuts are exceedingly well executed, and the entire getting up of the work does much credit to the enterprising publishers. We regard it as one of the most valuable works ever issued from the American press, and it does great honor alike to the author, and the country of his birth.—*N. Y. Journal of Medicine.*

We commend it to the attention of the profession as one of the best extant upon the subject on which it treats.—*Southern Journal Med. and Pharmacy.*

### GLUGE (GOTTLIEB), M. D.,

Professor of Physiology and Pathological Anatomy in the University of Brussels, &c.

## AN ATLAS OF PATHOLOGICAL HISTOLOGY.

Translated, with Notes and Additions, by JOSEPH LEIDY, M. D., Professor of Anatomy in the University of Pennsylvania. In one volume, very large imperial quarto, with three hundred and twenty figures, plain and colored, on twelve copperplates.

This being, as far as we know, the only work in which pathological histology is separately treated of in a comprehensive manner, it will, we think, for this reason, be of infinite service to those who desire to investigate the subject systematically, and who have felt the difficulty of arranging in their mind the unconnected observations of a great number of authors. The development of the morbid tissues, and the formation of abnormal products, may now be followed and studied with the same ease and satisfaction as the best arranged system of physiology.—*American Med. Journal.*

### GARDNER (D. PEREIRA), M. D.

## MEDICAL CHEMISTRY,

for the use of Students and the Profession: being a Manual of the Science, with its Applications to Toxicology, Physiology, Therapeutics, Hygiene, &c. In one handsome royal 12mo. volume, of about 400 pages, with illustrations.

### HASSE (C. E.), M. D.

## AN ANATOMICAL DESCRIPTION OF THE DISEASES OF RESPIRATION AND CIRCULATION.

Translated and Edited by SWAINE. In one volume, octavo.

### HARRISON (JOHN), M. D.

## AN ESSAY TOWARDS A CORRECT THEORY OF THE NERVOUS SYSTEM.

In one octavo volume, 292 pages.

### HUNTER (JOHN).

## TREATISE ON THE VENEREAL DISEASE.

With copious Additions, by DR. PH. RICORD, Surgeon to the Venereal Hospital of Paris. Edited, with additional Notes, by F. J. BUMSTEAD, M. D. In one octavo volume, with plates. (*Now Ready.*) ☞ See RICORD.

ALSO, HUNTER'S COMPLETE WORKS, with Memoir, Notes, &c. &c. In four neat octavo volumes, with plates.

### HUGHES (H. M.), M. D.,

Assistant Physician to Guy's Hospital, &c.

## A CLINICAL INTRODUCTION TO THE PRACTICE OF AUSCULTATION,

and other Modes of Physical Diagnosis, in Diseases of the Lungs and Heart. Second American from the Second and Improved London Edition. In one royal 12mo. vol. pp. 304.

### HORNER (WILLIAM E.), M. D.,

Professor of Anatomy in the University of Pennsylvania.

## SPECIAL ANATOMY AND HISTOLOGY.

Eighth edition. Extensively revised and modified. In two large octavo volumes, of more than one thousand pages, handsomely printed, with over three hundred illustrations.

This work has enjoyed a thorough and laborious revision on the part of the author, with the view of bringing it fully up to the existing state of knowledge on the subject of general and special anatomy. To adapt it more perfectly to the wants of the student, he has introduced a large number of additional wood-engravings, illustrative of the objects described, while the publishers have endeavored to render the mechanical execution of the work worthy of the extended reputation which it has acquired. The demand which has carried it to an EIGHTH EDITION is a sufficient evidence of the value of the work, and of its adaptation to the wants of the student and professional reader.

### HOBLYN (RICHARD D.), A. M.

## A DICTIONARY OF THE TERMS USED IN MEDICINE AND THE COLLATERAL SCIENCES.

New and much improved American Edition. Revised, with numerous Additions, from the last London edition, by ISAAC HAYS, M. D., &c. In one large royal 12mo. volume, of over five hundred pages, double columns. (*Now Ready.*)

In passing this work a second time through the press, the editor has subjected it to a very thorough revision, making such additions as the progress of science has rendered desirable, and supplying any omissions that may have previously existed. The extent of these additions may be estimated from the fact that this edition contains about one-third more matter than the previous one, notwithstanding which it has been kept at the former very moderate rate. As a concise and convenient Dictionary of Medical Terms, at an exceedingly low price, it will therefore be found of great value to the student and practitioner.

### JONES (T. WHARTON), F. R. S., &c.

## THE PRINCIPLES AND PRACTICE OF OPHTHALMIC MEDICINE AND SURGERY.

Edited by ISAAC HAYS, M. D., &c. In one very neat volume, large royal 12mo., of 529 pages, with four plates, plain or colored, and ninety-eight wood-cuts.

The work amply sustains, in every point the already high reputation of the author as an ophthalmic surgeon as well as a physiologist and pathologist. The book is evidently the result of much labor and research, and has been written with the greatest care and attention. We entertain little doubt that this book will become what its author hoped it might become, a manual for daily reference and consultation by the student and the general practitioner. The work is marked by that correctness, clearness, and precision of style which distinguish all the productions of the learned author.—*British and Foreign Medical Review.*

## JONES (C. HANDFIELD), F. R. S., & EDWARD H. SIEVEKING, M.D.,

Assistant Physicians and Lecturers in St. Mary's Hospital, London.

### A MANUAL OF PATHOLOGICAL ANATOMY. First American Edition,

Revised. With three hundred and ninety-seven handsome wood engravings. In one large and beautiful octavo volume of nearly seven hundred and fifty pages. (*Just Issued.*)

In a work like the present, intended as a text-book for the student of pathology, accurate engravings of the various results of morbid action are of the greatest assistance. The American publishers have, therefore, considered that the value of the work might be enhanced by increasing the number of illustrations, and, with this object, many wood-cuts, from the best authorities, have been introduced, increasing the number from one hundred and sixty-seven, in the London Edition, to three hundred and ninety-seven in this. The selection of these wood-cuts has been made by a competent member of the profession, who has supervised the progress of the work through the press, with the view of securing an accurate reprint, and of correcting such errors as had escaped the attention of the authors.

With these improvements, the volume is therefore presented in the hope of supplying the acknowledged want of a work which, within a moderate compass, should embody a condensed and accurate digest of the present state of pathological science, as extended by recent microscopical, chemical, and physiological researches.

As a concise text-book, containing, in a condensed form, a complete outline of what is known in the domain of Pathological Anatomy, it is perhaps the best work in the English language. Its great merit consists in its completeness and brevity, and in this respect it supplies a great desideratum in our literature. Heretofore the student of pathology was obliged to glean from a great number of monographs, and the field was so extensive that but few cultivated it with any degree of success. The authors of the present work have sought to correct this defect by placing before the reader a summary of ascertained facts, together with the opinions of the most eminent pathologists both of the Old and New World. As a simple work of reference, therefore, it is of great value to the student of pathological anatomy, and should be in every physician's library.—*Western Lancet.*

We urge upon our readers and the profession generally the importance of informing themselves in regard to modern views of pathology, and recommend to them to procure the work before us as the best means of obtaining this information.—*Stethoscope.*

In offering the above titled work to the public, the authors have not attempted to intrude new views on their professional brethren, but simply to lay before them, what has long been wanted, an outline of the present condition of pathological anatomy. In this they have been completely successful. The work is one of the best compilations which we have ever perused. The opinions and discoveries of all the leading pathologists and physiologists are engrossed, so that by reading any subject treated in the book you have a synopsis of the views of the most approved authors.—*Charleston Medical Journal and Review.*

We have no hesitation in recommending it as worthy of careful and thorough study by every member of the profession, old, or young.—*N. W. Med. and Surg. Journal.*

From the casual examination we have given we are inclined to regard it as a text-book, plain, rational, and intelligible, such a book as the practical man needs for daily referenee. For this reason it will be likely to be largely useful, as it suits itself to those busy men who have little time for minute investigation, and prefer a summary to an elaborate treatise.—*Buffalo Medical Journal.*

## KIRKES (WILLIAM SENHOUSE), M. D.,

Demonstrator of Morbid Anatomy at St. Bartholomew's Hospital, &c.; and

## JAMES PAGET, F. R. S.,

Lecturer on General Anatomy and Physiology in St. Bartholomew's Hospital.

### A MANUAL OF PHYSIOLOGY. Second American, from the second and

improved London edition. With one hundred and sixty-five illustrations. In one large and handsome royal 12mo. volume. pp. 550. (*Just Issued.*)

In the present edition, the Manual of Physiology has been brought up to the actual condition of the science, and fully sustains the reputation which it has already so deservedly attained. We consider the work of MM. Kirkes and Paget to constitute one of the very best handbooks of Physiology we possess —presenting just such an outline of the science, comprising an account of its leading facts and generally admitted prineiples, as the student requires during his attendance upon a course of lectures, or for reference whilst preparing for examination.— *Am. Medical Journal.*

We need only say, that, without entering into discussions of unsettled questions, it contains all the recent improvements in this department of medical science. For the student beginning this study, and the practitioner who has but leisure to refresh his memory, this book is invaluable, as it contains all that it is important to know, without special details, which are read with interest only by those who would make a specialty, or desire to possess a critical knowledge of the subject.—*Charleston Medical Journal.*

One of the best treatises that can be put into the hands of the student.—*London Medical Gazette.*

Particularly adapted to those who desire to possess a concise digest of the facts of Human Physiology.—*British and Foreign Med.-Chirurg. Review.*

We conscientiously recommend it as an admirable "Handbook of Physiology."—*London Journal of Medicine.*

## KNAPP (F.), PH. D., &c.

### TECHNOLOGY; or, Chemistry applied to the Arts and to Manufactures. Edited,

with numerous Notes and Additions, by Dr. EDMUND RONALDS and Dr. THOMAS RICHARDSON. First American edition, with Notes and Additions, by Prof. WALTER R. JOHNSON. In two handsome octavo volumes, printed and illustrated in the highest style of art, with about five hundred wood-engravings.

## LONGET (F. A.)

### TREATISE ON PHYSIOLOGY. With numerous Illustrations. Translated

from the French by F. G. Smith, M. D., Professor of Institutes of Medicine in the Pennsylvania Medical College. (*Preparing.*)

## LALLEMAND (M.).

### THE CAUSES, SYMPTOMS, AND TREATMENT OF SPERMATORRHŒA. Translated and edited by HENRY J. McDOUGAL. In one volume, octavo, 320 pages.

Second American edition. (*Just Issued.*)

## LEHMANN (G. C.)

### PHYSIOLOGICAL CHEMISTRY.

Translated by GEORGE E. DAY, M. D., and edited by Prof. R. E. ROGERS, of the University of Pennsylvania. In two large octavo volumes, with nearly two hundred illustrations. (*Now Ready.*)

This great work, universally recognized as the most complete and authoritative exposition of its intricate and important subject in its most advanced condition, has received every care during its passage through the press, under the superintendence of Prof. Rogers, to insure the entire accuracy indispensable to a work of this character. It has also been improved by the distribution in the appropriate places throughout the text of the numerous additions and corrections embodied in the Appendix, while a number of illustrations have been introduced from "Funke's Atlas of Physiological Chemistry," and an Appendix of Plates has been added. The publishers, therefore, trust that it will be found a complete and accurate edition, and in every respect worthy of the reputation of the work.

The progress of research in this department is so rapid, that Prof. Lehmann's treatise must be regarded as having completely superseded that of Simon; and all who desire to possess a systematic work on Physiological Chemistry by a man who is thoroughly qualified, both by his physiological and chemical acquirements, by his own eminence as an experimentalist, and by the philosophic impartiality of his habits of thought, to afford a comprehensive and exact view of its present aspect, should lose no time in attaching themselves to the Society by which it is in course of publication.—*British and Foreign Medico-Chirurgical Review.*

The work of Lehmann stands unrivalled as the most comprehensive book of reference and information extant on every branch of the subject on which it treats.—*Edinburg Monthly Journal of Medical Science.*

BY THE SAME AUTHOR. (*Now Ready.*)

### CHEMICAL PHYSIOLOGY.

Translated, with numerous additions, by J. CHESTON MORRIS, M. D., with an Introduction by Prof. S. JACKSON, of the University of Pennsylvania. In one handsome octavo volume, with illustrations.

The original of this work, though but lately issued by its distinguished author, has already assumed the highest position, as presenting in their latest development the modern doctrines and discoveries in the chemistry of life. The numerous additions by the translator, and the Introduction by Professor JACKSON will render its physiological aspect more complete than designed by the author, and will adapt it for use as a text-book of physiology, presenting more thoroughly than has yet been attempted, the modifications arising from the vast impulse which organic chemistry has received within a few years past.

## LAWRENCE (W.), F. R. S., &c.

### A TREATISE ON DISEASES OF THE EYE.

A new edition, edited, with numerous additions, and 243 illustrations, by ISAAC HAYS, M. D., Surgeon to Wills Hospital, &c. In one very large and handsome octavo volume, of 950 pages, strongly bound in leather with raised bands. (*Lately Issued.*)

This work is so universally recognized as the standard authority on the subject, that the publishers in presenting this new edition have only to remark that in its preparation the editor has carefully revised every portion, introducing additions and illustrations wherever the advance of science has rendered them necessary or desirable. The various important contributions to ophthalmological science, recently made by Dalrymple, Jacob, Walton, Wilde, Cooper, &c., both in the form of separate treatises and contributions to periodicals, have been carefully examined by the editor, and, combined with the results of his own experience, have been freely introduced throughout the volume, rendering it a complete and thorough exponent of the most advanced state of the subject.

This admirable treatise—the safest guide and most comprehensive work of reference, which is within the reach of the profession.—*Stethoscope.*

This standard text-book on the department of which it treats, has not been superseded, by any or all of the numerous publications on the subject heretofore issued. Nor with the multiplied improvements of Dr. Hays, the American editor, is it at all likely that this great work will cease to merit the confidence and preference of students or practitioners. Its ample extent—nearly one thousand large octavo pages—has enabled both author and editor to do justice to all the details of this subject, and condense in this single volume the present state of our knowledge of the whole science in this department, whereby its practical value cannot be excelled. We heartily commend it, especially as a book of reference, indispensable in every medical library. The additions of the American editor very greatly enhance the value of the work, exhibiting the learning and experience of Dr. Hays, in the light in which he ought to be held, as a standard authority on all subjects appertaining to this specialty.—*N. Y. Med. Gaz.*

## LEE (ROBERT), M. D., F. R. S., &c.

### CLINICAL MIDWIFERY;

comprising the Histories of Five Hundred and Forty-five Cases of Difficult, Preternatural, and Complicated Labor, with Commentaries. From the second London edition. In one royal 12mo. volume, extra cloth, of 238 pages.

## LUDLOW (J. L.), M. D.,

Lecturer on Clinical Medicine at the Philadelphia Almshouse, &c.

### A MANUAL OF EXAMINATIONS

upon Anatomy and Physiology, Surgery, Practice of Medicine, Chemistry, Obstetrics, Materia Medica, Pharmacy, and Therapeutics. Designed for Students of Medicine throughout the United States. A new edition, revised and improved. In one large royal 12mo. volume, with several hundred illustrations. (*Preparing.*)

## LISTON (ROBERT), F. R. S., &c.

### LECTURES ON THE OPERATIONS OF SURGERY,

and on Diseases and Accidents requiring Operations. Edited, with numerous Additions and Alterations, by T. D. MÜTTER, M. D. In one large and handsome octavo volume, of 566 pages, with 216 wood-cuts.

## LA ROCHE (R.), M. D., &c.

### PNEUMONIA; its Supposed Connection, Pathological and Etiological, with Autumnal Fevers, including an Inquiry into the Existence and Morbid Agency of Malaria. In one handsome octavo volume, extra cloth, of 500 pages.

A more simple, clear, and forcible exposition of the groundless nature and dangerous tendency of certain pathological and etiological heresies, has seldom been presented to our notice.—*N. Y. Journal of Medicine and Collateral Science.*

This work should be carefully studied by Southern physicians, embodying as it does the reflections of an original thinker and close observer on a subject peculiarly their own.—*Virginia Med. and Surgical Journal.*

BY THE SAME AUTHOR. (*Now Ready.*)

### YELLOW FEVER, considered in its Historical, Pathological, Etiological, and Therapeutical Relations. Including a Sketch of the Disease as it has occurred in Philadelphia from 1699 to 1854, with an examination of the connections between it and the fevers known under the same name in other parts of temperate as well as in tropical regions. In two large and handsome octavo volumes of nearly 1500 pages.

The publishers are happy in being able at length to present to the profession this great work, which they are assured will be regarded as an honor to the medical literature of the country. As the result of many years of personal observation and study, as embodying an intelligent *résumé* of all that has been written regarding the disease, and as exhausting the subject in all its various aspects, these volumes must at once take the position of the standard authority and work of reference on the many important questions brought into consideration.

*From Professor S. H. Dickson, Charleston, S. C., September* 18, 1855.

A monument of intelligent and well applied research, almost without example. It is, indeed, in itself, a large library, and is destined to constitute the special resort as a book of reference, in the subject of which it treats, to all future time.

This truly great work has just appeared in two large octavo volumes, and while it will be hailed throughout our country as a most timely and desirable contribution to American Medical Literature, it will be sought for and read with avidity abroad, for its author has a world-wide reputation in scholastic and practical medicine. Dr. La Roche has an accurate and thorough knowledge of the subject, acquired by ample experience and opportunities for investigations both at home and abroad, while he brings to his task peculiar qualifications by his profound learning in all that appertains to the science and art of healing. We recommend it to the profession and the public as an able and elaborate *résumé* of all that is known on the subject of Yellow Fever, with a vast amount of information upon every aspect of this important topic, upon which the author has expended an amount of industry and genius which can never be adequately rewarded, however appreciated by his brethren.—*N. Y. Medical Gazette*, October, 1855.

## LARDNER (DIONYSIUS), D. C. L., &c.

### HANDBOOKS OF NATURAL PHILOSOPHY AND ASTRONOMY.

Revised, with numerous Additions, by the American editor. First Course, containing Mechanics, Hydrostatics, Hydraulics, Pneumatics, Sound, and Optics. In one large royal 12mo. volume, of 750 pages, with 424 wood-cuts. Second Course, containing Heat, Electricity, Magnetism, and Galvanism, one volume, large royal 12mo., of 450 pages, with 250 illustrations. Third Course (*now ready*), containing Meteorology and Astronomy, in one large volume, royal 12mo. of nearly eight hundred pages, with thirty-seven plates and two hundred wood-cuts. The whole complete in three volumes, of about two thousand large pages, with over one thousand figures on steel and wood. Any volume sold separate.

The various sciences treated in this work will be found brought thoroughly up to the latest period.

## MACKENZIE (W.), M. D.,

Surgeon Oculist in Scotland in ordinary to Her Majesty, &c. &c.

### A PRACTICAL TREATISE ON DISEASES AND INJURIES OF THE EYE. To which is prefixed an Anatomical Introduction explanatory of a Horizontal Section of the Human Eyeball, by Thomas Wharton Jones, F. R. S. From the Fourth Revised and Enlarged London Edition. With Notes and Additions by Addinell Hewson, M. D., Surgeon to Wills Hospital, &c. &c. In one very large and handsome octavo volume, with plates and numerous wood-cuts. (*Now Ready.*)

The treatise of Dr. Mackenzie indisputably holds the first place, and forms, in respect of learning and research, an Encyclopædia unequalled in extent by any other work of the kind, either English or foreign. —*Dixon on Diseases of the Eye.*

Few modern books on any department of medicine or surgery have met with such extended circulation, or have procured for their authors a like amount of European celebrity. The immense research which it displayed, the thorough acquaintance with the subject, practically as well as theoretically, and the able manner in which the author's stores of learning and experience were rendered available for general use, at once procured for the first edition, as well on the continent as in this country, that high position as a standard work which each successive edition has more firmly established, in spite of the attractions of several rivals of no mean ability. This, the fourth edition, has been in a great measure re-written; new matter, to the extent of one hundred and fifty pages, has been added, and in several instances formerly expressed opinions have been modified in accordance with the advances in the science which have been made of late years. Nothing worthy of repetition upon any branch of the subject appears to have escaped the author's notice. We consider it the duty of every one who has the love of his profession and the welfare of his patient at heart, to make himself familiar with this the most complete work in the English language upon the diseases of the eye. —*Med. Times and Gazette.*

The fourth edition of this standard work will no doubt be as fully appreciated as the three former editions. It is unnecessary to say a word in its praise, for the verdict has already been passed upon it by the most competent judges, and "Mackenzie on the Eye" has justly obtained a reputation which it is no figure of speech to call world-wide.—*British and Foreign Medico-Chirurgical Review.*

This new edition of Dr. Mackenzie's celebrated treatise on diseases of the eye, is truly a miracle of industry and learning. We need scarcely say that he has entirely exhausted the subject of his specialty. —*Dublin Quarterly Journal.*

## MEIGS (CHARLES D.), M. D.,

Professor of Obstetrics, &c. in the Jefferson Medical College, Philadelphia.

### ON THE NATURE, SIGNS, AND TREATMENT OF CHILDBED FEVER.

In a Series of Letters addressed to the Students of his Class. In one handsome octavo volume, of three hundred and sixty-five pages. (*Now Ready.*)

The instructive and interesting author of this work, whose previous labors in the department of medicine which he so sedulously cultivates, have placed his countrymen under deep and abiding obligations, again challenges their admiration in the fresh and vigorous, attractive and racy pages before us. It is a delectable book. * * * This treatise upon child-bed fevers will have an extensive sale, being destined, as it deserves, to find a place in the library of every practitioner who scorns to lag in the rear of his brethren.—*Nashville Journal of Medicine and Surgery.*

This book will add more to his fame than either of those which bear his name. Indeed we doubt whether any material improvement will be made on the teachings of this volume for a century to come, since it is so eminently practical, and based on profound knowledge of the *science* and consummate skill in the *art* of healing, and ratified by an ample and extensive experience, such as few men have the industry or good fortune to acquire.—*N. Y. Med. Gazette.*

BY THE SAME AUTHOR.

### WOMAN: HER DISEASES AND THEIR REMEDIES.

A Series of Lectures to his Class. Third and Improved edition. In one large and beautifully printed octavo volume. (*Just Issued.*) pp. 672.

The gratifying appreciation of his labors, as evinced by the exhaustion of two large impressions of this work within a few years, has not been lost upon the author, who has endeavored in every way to render it worthy of the favor with which it has been received. The opportunity thus afforded for a second revision has been improved, and the work is now presented as in every way superior to its predecessors, additions and alterations having been made whenever the advance of science has rendered them desirable. The typographical execution of the work will also be found to have undergone a similar improvement and the work is now confidently presented as in every way worthy the position it has acquired as the standard American text-book on the Diseases of Females.

It contains a vast amount of practical knowledge, by one who has accurately observed and retained the experience of many years, and who tells the result in a free, familiar, and pleasant manner.—*Dublin Quarterly Journal.*

There is an off-hand fervor, a glow, and a warm-heartedness infecting the effort of Dr. Meigs, which is entirely captivating, and which absolutely hurries the reader through from beginning to end. Besides, the book teems with solid instruction, and it shows the very highest evidence of ability, viz., the clearness with which the information is presented. We know of no better test of one's understanding a subject than the evidence of the power of lucidly explaining it. The most elementary, as well as the obscurest subjects, under the pencil of Prof. Meigs, are isolated and made to stand out in such bold relief, as to produce distinct impressions upon the mind and memory of the reader.—*The Charleston Med. Journal.*

Professor Meigs has enlarged and amended this great work, for such it unquestionably is, having passed the ordeal of criticism at home and abroad, but been improved thereby; for in this new edition the author has introduced real improvements, and increased the value and utility of the book immeasurably. It presents so many novel, bright, and sparkling thoughts; such an exuberance of new ideas on almost every page, that we confess ourselves to have become enamored with the book and its author; and cannot withhold our congratulations from our Philadelphia confreres, that such a teacher is in their service.—*N. Y. Med. Gazette.*

BY THE SAME AUTHOR.

### OBSTETRICS: THE SCIENCE AND THE ART.

Second edition, revised and improved. With one hundred and thirty-one illustrations. In one beautifully printed octavo volume, of seven hundred and fifty-two large pages. (*Lately Published.*)

The rapid demand for a second edition of this work is a sufficient evidence that it has supplied a desideratum of the profession, notwithstanding the numerous treatises on the same subject which have appeared within the last few years. Adopting a system of his own, the author has combined the leading principles of his interesting and difficult subject, with a thorough exposition of its rules of practice, presenting the results of long and extensive experience and of familiar acquaintance with all the modern writers on this department of medicine. As an American Treatise on Midwifery, which has at once assumed the position of a classic, it possesses peculiar claims to the attention and study of the practitioner and student, while the numerous alterations and revisions which it has undergone in the present edition are shown by the great enlargement of the work, which is not only increased as to the size of the page, but also in the number.

BY THE SAME AUTHOR. (*Lately Published.*)

### A TREATISE ON ACUTE AND CHRONIC DISEASES OF THE NECK OF THE UTERUS.

With numerous plates, drawn and colored from nature in the highest style of art. In one handsome octavo volume, extra cloth.

The object of the author in this work has been to present in a small compass the practical results of his long experience in this important and distressing class of diseases. The great changes introduced into practice, and the accessions to our knowledge on the subject, within the last few years, resulting from the use of the metroscope, brings within the ordinary practice of every physician numerous cases which were formerly regarded as incurable, and renders of great value a work like the present combining practical directions for diagnosis and treatment with an ample series of illustrations, copied accurately from colored drawings made by the author, after nature.

BY THE SAME AUTHOR.

### OBSERVATIONS ON CERTAIN OF THE DISEASES OF YOUNG CHILDREN.

In one handsome octavo volume, of 214 pages.

## MACLISE (JOSEPH), SURGEON.

### SURGICAL ANATOMY.

Forming one volume, very large imperial quarto. With sixty-eight large and splendid Plates, drawn in the best style and beautifully colored. Containing one hundred and ninety Figures, many of them the size of life. Together with copious and explanatory letter-press. Strongly and handsomely bound in extra cloth, being one of the cheapest and best executed Surgical works as yet issued in this country.

Copies can be sent by mail, in five parts, done up in stout covers.

This great work being now concluded, the publishers confidently present it to the attention of the profession as worthy in every respect of their approbation and patronage. No complete work of the kind has yet been published in the English language, and it therefore will supply a want long felt in this country of an accurate and comprehensive Atlas of Surgical Anatomy to which the student and practitioner can at all times refer, to ascertain the exact relative position of the various portions of the human frame towards each other and to the surface, as well as their abnormal deviations. The importance of such a work to the student in the absence of anatomical material, and to the practitioner when about attempting an operation, is evident, while the price of the book, notwithstanding the large size, beauty, and finish of the very numerous illustrations, is so low as to place it within the reach of every member of the profession. The publishers therefore confidently anticipate a very extended circulation for this magnificent work.

One of the greatest artistic triumphs of the age in Surgical Anatomy.—*British American Medical Journal.*

Too much cannot be said in its praise; indeed, we have not language to do it justice.—*Ohio Medical and Surgical Journal.*

The most admirable surgical atlas we have seen. To the practitioner deprived of demonstrative dissections upon the human subject, it is an invaluable companion.—*N. J. Medical Reporter.*

The most accurately engraved and beautifully colored plates we have ever seen in an American book—one of the best and cheapest surgical works ever published.—*Buffalo Medical Journal.*

It is very rare that so elegantly printed, so well illustrated, and so useful a work, is offered at so moderate a price.—*Charleston Medical Journal.*

Its plates can boast a superiority which places them almost beyond the reach of competition.—*Medical Examiner.*

Every practitioner, we think, should have a work of this kind within reach.—*Southern Medical and Surgical Journal.*

No such lithographic illustrations of surgical regions have hitherto, we think, been given.—*Boston Medical and Surgical Journal.*

As a surgical anatomist, Mr. Maclise has probably no superior.—*British and Foreign Medico-Chirurgical Review.*

Of great value to the student engaged in dissecting, and to the surgeon at a distance from the means of keeping up his anatomical knowledge.—*Medical Times.*

The mechanical execution cannot be excelled.—*Transylvania Medical Journal.*

A work which has no parallel in point of accuracy and cheapness in the English language.—*N. Y. Journal of Medicine.*

To all engaged in the study or practice of their profession, such a work is almost indispensable.—*Dublin Quarterly Medical Journal.*

No practitioner whose means will admit should fail to possess it.—*Ranking's Abstract.*

Country practitioners will find these plates of immense value.—*N. Y. Medical Gazette.*

We are extremely gratified to announce to the profession the completion of this truly magnificent work, which, as a whole, certainly stands unrivalled, both for accuracy of drawing, beauty of coloring, and all the requisite explanations of the subject in hand.—*The New Orleans Medical and Surgical Journal.*

This is by far the ablest work on Surgical Anatomy that has come under our observation. We know of no other work that would justify a student, in any degree, for neglect of actual dissection. In those sudden emergencies that so often arise, and which require the instantaneous command of minute anatomical knowledge, a work of this kind keeps the details of the dissecting-room perpetually fresh in the memory.—*The Western Journal of Medicine and Surgery.*

☞ The very low price at which this work is furnished, and the beauty of its execution, require an extended sale to compensate the publishers for the heavy expenses incurred.

---

## MULLER (PROFESSOR J.), M. D.

### PRINCIPLES OF PHYSICS AND METEOROLOGY.

Edited, with Additions, by R. Eglesfeld Griffith, M. D. In one large and handsome octavo volume, extra cloth, with 550 wood-cuts, and two colored plates. pp. 636.

The Physics of Müller is a work superb, complete, unique: the greatest want known to English Science could not have been better supplied. The work is of surpassing interest. The value of this contribution to the scientific records of this country may be duly estimated by the fact that the cost of the original drawings and engravings alone has exceeded the sum of £2,000.—*Lancet.*

---

## MAYNE (JOHN), M. D., M. R. C. S.

### A DISPENSATORY AND THERAPEUTICAL REMEMBRANCER.

Comprising the entire lists of Materia Medica, with every Practical Formula contained in the three British Pharmacopœias. With relative Tables subjoined, illustrating, by upwards of six hundred and sixty examples, the Extemporaneous Forms and Combinations suitable for the different Medicines. Edited, with the addition of the Formulæ of the United States Pharmacopœia, by R. Eglesfeld Griffith, M. D. In one 12mo. volume, extra cloth, of over 300 large pages.

---

## MATTEUCCI (CARLO).

### LECTURES ON THE PHYSICAL PHENOMENA OF LIVING BEINGS.

Edited by J. Pereira, M. D. In one neat royal 12mo. volume, extra cloth, with cuts, 388 pages.

## MILLER (JAMES), F. R. S. E.,

Professor of Surgery in the University of Edinburgh, &c.

### PRINCIPLES OF SURGERY.

A new American, from the third and revised Edinburgh edition. In one large and very beautiful volume, of about seven hundred pages, with two hundred and forty exquisite illustrations on wood. *(Now Ready.)*

This edition is far superior, both in the abundance and quality of its material, to any of the preceding. We hope it will be extensively read, and the sound principles which are herein taught treasured up for future application. The work takes rank with Watson's Practice of Physic; it certainly does not fall behind that great work in soundness of principle or depth of reasoning and research. No physician who values his reputation, or seeks the interests of his clients, can acquit himself before his God and the world without making himself familiar with the sound and philosophical views developed in the foregoing book.—*New Orleans Med. and Surg. Journal.*

Without doubt the ablest exposition of the principles of that branch of the healing art in any language. This opinion, deliberately formed after a careful study of the first edition, we have had no cause to change on examining the second. This edition has undergone thorough revision by the author; many expressions have been modified, and a mass of new matter introduced. The book is got up in the finest style, and is an evidence of the progress of typography in our country.—*Charleston Medical Journal and Review.*

We recommend it to both student and practitioner, feeling assured that as it now comes to us, it presents the most satisfactory exposition of the modern doctrines of the principles of surgery to be found in any volume in any language.—*N. Y. Journal of Medicine.*

BY THE SAME AUTHOR. *(Lately Published.)*

### THE PRACTICE OF SURGERY.

Third American from the second Edinburgh edition. Edited, with Additions, by F. W. Sargent, M. D, one of the Surgeons to Will's Hospital, &c. Illustrated by three hundred and nineteen engravings on wood. In one large octavo volume, of over seven hundred pages.

No encomium of ours could add to the popularity of Miller's Surgery. Its reputation in this country is unsurpassed by that of any other work, and, when taken in connection with the author's *Principles of Surgery*, constitutes a whole, without reference to which no conscientious surgeon would be willing to practice his art. The additions, by Dr. Sargent, have materially enhanced the value of the work.—*Southern Medical and Surgical Journal.*

It is seldom that two volumes have ever made so profound an impression in so short a time as the "Principles" and the "Practice" of Surgery by Mr. Miller—or so richly merited the reputation they have acquired. The author is an eminently sensible, practical, and well-informed man, who knows exactly what he is talking about and exactly how to talk it.—*Kentucky Medical Recorder.*

The two volumes together form a complete exposé of the present state of Surgery, and they ought to be on the shelves of every surgeon.—*N. J. Med. Reporter.*

By the almost unanimous voice of the profession, his works, both on the principles and practice of surgery have been assigned the highest rank. If we were limited to but one work on surgery, that one should be Miller's, as we regard it as superior to all others.—*St. Louis Med. and Surg. Journal.*

The author distinguished alike as a practitioner and writer, has in this and his "Principles," presented to the profession one of the most complete and reliable systems of Surgery extant. His style of writing is original, impressive, and engaging, energetic, concise, and lucid. Few have the faculty of condensing so much in small space, and at the same time so persistently holding the attention; indeed, he appears to make the very process of condensation a means of eliminating attractions. Whether as a text-book for students or a book of reference for practitioners, it cannot be too strongly recommended.—*Southern Journal of the Medical and Physical Sciences.*

## MALGAIGNE (J. F.).

### OPERATIVE SURGERY,

based on Normal and Pathological Anatomy. Translated from the French, by Frederick Brittan, A. B., M. D. With numerous illustrations on wood. In one handsome octavo volume, of nearly six hundred pages.

## MOHR (FRANCIS) PH. D., AND REDWOOD (THEOPHILUS).

### PRACTICAL PHARMACY.

Comprising the Arrangements, Apparatus, and Manipulations of the Pharmaceutical Shop and Laboratory. Edited, with extensive Additions, by Prof. William Procter, of the Philadelphia College of Pharmacy. In one handsomely printed octavo volume, of 570 pages, with over 500 engravings on wood.

## NEILL (JOHN), M. D.,

Professor of Surgery in the Pennsylvania Medical College, &c.

### OUTLINES OF THE ARTERIES.

With short Descriptions. Designed for the Use of Medical Students. With handsome colored plates. Second and improved edition. In one octavo volume, extra cloth.

### OUTLINES OF THE NERVES.

With short Descriptions. Designed for the Use of Medical Students. With handsome plates. Second and improved edition. In one octavo volume, extra cloth.

### OUTLINES OF THE VEINS AND LYMPHATICS.

With short Descriptions. Designed for the Use of Medical Students. With handsome colored plates. In one octavo volume, extra cloth.

ALSO—The three works done up in one handsome volume, half bound, with numerous plates, presenting a complete view of the Circulatory, Nervous, and Lymphatic Systems.

This book should be in the hand of every medical student. It is cheap, portable, and precisely the thing needed in studying an important, though difficult part of Anatomy.—*Boston Med. and Surg. Journal.*

We recommend every student of medicine to purchase a copy of this work, as a labor-saving machine, admirably adapted to refresh the memory, with knowledge gained by lectures, dissections, and the reading of larger works.—*N. Y. Journal of Medicine.*

This work is from the pen of a Philadelphia anatomist, whose familiar knowledge of the subject has been aided by the press, the result of which is a volume of great beauty and excellence. Its fine execution commends it to the student of Anatomy. It requires no other recommendations.—*Western Journ. of Medicine and Surgery.*

## NEILL (JOHN), M. D.,

Surgeon to the Pennsylvania Hospital, &c.; and

## FRANCIS GURNEY SMITH, M. D.,

Professor of Institutes of Medicine in the Pennsylvania Medical College.

**AN ANALYTICAL COMPENDIUM OF THE VARIOUS BRANCHES OF MEDICAL SCIENCE**; for the Use and Examination of Students. A new edition, revised and improved. In one very large and handsomely printed royal 12mo. volume, of about one thousand pages, with three hundred and seventy-four illustrations on wood. Strongly bound in leather, with raised bands. (*Now Ready.*)

The speedy sale of a large impression of this work has afforded to the authors gratifying evidence of the correctness of the views which actuated them in its preparation. In meeting the demand for a second edition, they have therefore been desirous to render it more worthy of the favor with which it has been received. To accomplish this, they have spared neither time nor labor in embodying in it such discoveries and improvements as have been made since its first appearance, and such alterations as have been suggested by its practical use in the class and examination-room. Considerable modifications have thus been introduced throughout all the departments treated of in the volume, but more especially in the portion devoted to the "Practice of Medicine," which has been entirely rearranged and rewritten.

Notwithstanding the enlarged size and improved execution of this work, the price has not been increased, and it is confidently presented as one of the cheapest volumes now before the profession.

In the rapid course of lectures, where work for the students is heavy, and review necessary for an examination, a compend is not only valuable, but it is almost a sine qua non. The one before us is, in most of the divisions, the most unexceptionable of all books of the kind that we know of. The newest and soundest doctrines and the latest improvements and discoveries are explicitly, though concisely, laid before the student. Of course it is useless for us to recommend it to all last course students, but there is a class to whom we very sincerely commend this cheap book as worth its weight in silver—that class is the graduates in medicine of more than ten years' standing, who have not studied medicine since. They will perhaps find out from it that the science is not exactly now what it was when they left it off.—*The Stethoscope.*

Having made free use of this volume in our examinations of pupils, we can speak from experience in recommending it as an admirable compend for students, and as especially useful to preceptors who examine their pupils. It will save the teacher much labor by enabling him readily to recall all of the points upon which his pupils should be examined. A work of this sort should be in the hands of every one who takes pupils into his office with a view of examining them; and this is unquestionably the best of its class. Let every practitioner who has pupils provide himself with it, and he will find the labor of refreshing his knowledge so much facilitated that he will be able to do justice to his pupils at very little cost of time or trouble to himself.—*Transylvania Med. Journal.*

## NELIGAN (J. MOORE), M. D., M. R. I. A., &c.

**A PRACTICAL TREATISE ON DISEASES OF THE SKIN.** In one neat royal 12mo. volume, of 334 pages.

BY THE SAME AUTHOR. (*Just Ready.*)

**ATLAS OF CUTANEOUS DISEASES.** In one beautiful quarto volume, with splendid colored plates, presenting nearly one hundred elaborate representations of disease.

This beautiful volume is intended to accompany the author's "Treatise on Diseases of the Skin," so favorably received by the profession some years since. In the description of the plates, reference is made to the chapter and page of the "Treatise," so that together the two constitute, at a much smaller cost than has been hitherto attempted, a complete work of reference for the Diagnosis and Treatment of this difficult class of diseases, which, more than any other, perhaps, require this mode of pictorial elucidation.

Dr. Neligan deserves our best thanks for this attempt to supply a want which has been long felt. For a small sum he here presents us with an Atlas containing some ninety plates of the more common and rarer forms of affections of the skin, and for the benefit of those who possess his useful Manual, he supplies with each illustration a reference to the chapter of that work where the disease receives special mention. Great care has evidently been taken to procure proper subjects for the artist and the daguerreotype, which has been employed in several of the plates, "to secure correctness in the design."—*Edinburgh Medical Journal*, September, 1855.

## OWEN (PROF. R.),

Author of "Lectures on Comparative Anatomy," "Archetype of the Skeleton," &c.

**ON THE DIFFERENT FORMS OF THE SKELETON, AND OF THE TEETH.** One vol. royal 12mo., with numerous illustrations. (*Just Issued.*)

## PANCOAST (J.), M. D.,

Professor of Anatomy in the Jefferson Medical College, Philadelphia, &c.

**OPERATIVE SURGERY; or, A Description and Demonstration of the various Processes of the Art**; including all the New Operations, and exhibiting the State of Surgical Science in its present advanced condition. Complete in one royal 4to. volume, of 380 pages of letter-press description and eighty large 4to. plates, comprising 486 illustrations. Second edition, improved.

This excellent work is constructed on the model of the French Surgical Works by Velpeau and Malgaigne; and, so far as the English language is concerned, we are proud as an American to say that, OF ITS KIND IT HAS NO SUPERIOR.—*N. Y. Journal of Medicine.*

## PARKER (LANGSTON),

Surgeon to the Queen's Hospital, Birmingham.

**THE MODERN TREATMENT OF SYPHILITIC DISEASES, BOTH PRIMARY AND SECONDARY**; comprising the Treatment of Constitutional and Confirmed Syphilis, by a safe and successful method. With numerous Cases, Formulæ, and Clinical Observations. From the Third and entirely rewritten London edition. In one neat octavo volume, of 316 pages. (*Just Issued.*)

*(Now Complete.)*

## PEREIRA (JONATHAN), M. D., F. R. S., AND L. S.

## THE ELEMENTS OF MATERIA MEDICA AND THERAPEUTICS.

Third American edition, enlarged and improved by the author; including Notices of most of the Medicinal Substances in use in the civilized world, and forming an Encyclopædia of Materia Medica. Edited, with Additions, by JOSEPH CARSON, M. D., Professor of Materia Medica and Pharmacy in the University of Pennsylvania. In two very large octavo volumes of 2100 pages, on small type, with over four hundred and fifty illustrations.

VOLUME I.—Lately issued, containing the Inorganic Materia Medica, over 800 pages, with 145 illustrations.

VOLUME II.—Now ready, embraces the Organic Materia Medica, and forms a very large octavo volume of 1250 pages, with two plates and three hundred handsome wood-cuts.

The present edition of this valuable and standard work will enhance in every respect its well-deserved reputation. The care bestowed upon its revision by the author may be estimated by the fact that its size has been increased by about five hundred pages. These additions have extended to every portion of the work, and embrace not only the materials afforded by the recent editions of the pharmacopœias, but also all the important information accessible to the care and industry of the author in treatises, essays, memoirs, monographs, and from correspondents in various parts of the globe. In this manner the work comprises the most recent and reliable information respecting all the articles of the Materia Medica, their natural and commercial history, chemical and therapeutical properties, preparation, uses, doses, and modes of administration, brought up to the present time, with a completeness not to be met with elsewhere. A considerable portion of the work which preceded the remainder in London, has also enjoyed the advantage of a further revision by the author expressly for this country, and in addition to this the editor, Professor Carson, has made whatever additions appeared desirable to adapt it thoroughly to the U. S. Pharmacopœia, and to the wants of the American profession. An equal improvement will likewise be observable in every department of its mechanical execution. It is printed from new type, on good white paper, with a greatly extended and improved series of illustrations.

Gentlemen who have the first volume are recommended to complete their copies without delay. The first volume will no longer be sold separate.

When we remember that Philology, Natural History, Botany, Chemistry, Physics, and the Microscope, are all brought forward to elucidate the subject, one cannot fail to see that the reader has here a work worthy of the name of an encyclopedia of Materia Medica. Our own opinion of its merits is that of its editors, and also that of the whole profession, both of this and foreign countries—namely, "that in copiousness of details, in extent, variety, and accuracy of information, and in lucid explanation of difficult and recondite subjects, it surpasses all other works on Materia Medica hitherto published." We cannot close this notice without alluding to the special additions of the American editor, which pertain to the prominent vegetable productions of this country, and to the directions of the United States Pharmacopœia, in connection with all the articles contained in the volume which are referred to by it. The illustrations have been increased, and this edition by Dr. Carson cannot well be regarded in any other light than that of a treasure which should be found in the library of every physician.—*New York Journal of Medical and Collateral Science*, March, 1854.

The third edition of his "Elements of Materia Medica, although completed under the supervision of others, is by far the most elaborate treatise in the English language, and will, while medical literature is cherished, continue a monument alike honorable to his genius, as to his learning and industry.—*American Journal of Pharmacy*, March, 1854.

The work, in its present shape, and so far as can be judged from the portion before the public, forms the most comprehensive and complete treatise on materia medica extant in the English language.—Dr. Pereira has been at great pains to introduce into his work, not only all the information on the natural, chemical, and commercial history of medicines, which might be serviceable to the physician and surgeon, but whatever might enable his readers to understand thoroughly the mode of preparing and manufacturing various articles employed either for preparing medicines, or for certain purposes in the arts connected with materia medica and the practice of medicine. The accounts of the physiological and therapeutic effects of remedies are given with great clearness and accuracy, and in a manner calculated to interest as well as instruct the reader.—*The Edinburgh Medical and Surgical Journal.*

## PEASLEE (E. R.), M. D.,

Professor of Anatomy and Physiology in Dartmouth College, &c.

## HUMAN HISTOLOGY, in its applications to Physiology and General Pathology;

designed as a Text-Book for Medical Students. With numerous illustrations. In one handsome royal 12mo. volume. *(Preparing.)*

The subject of this work is one, the growing importance of which, as the basis of Anatomy and Physiology, demands for it a separate volume. The book will therefore supply an acknowledged deficiency in medical text-books, while the name of the author, and his experience as a teacher for the last thirteen years, is a guarantee that it will be thoroughly adapted to the use of the student.

## PIRRIE (WILLIAM), F. R. S. E.,

Professor of Surgery in the University of Aberdeen.

## THE PRINCIPLES AND PRACTICE OF SURGERY. Edited by JOHN NEILL, M. D., Professor of Surgery in the Penna. Medical College, Surgeon to the Pennsylvania Hospital, &c. In one very handsome octavo volume, of 780 pages, with 316 illustrations.

We know of no other surgical work of a reasonable size, wherein there is so much theory and practice, or where subjects are more soundly or clearly taught.—*The Stethoscope.*

There is scarcely a disease of the bone or soft parts, fracture, or dislocation, that is not illustrated by accurate wood-engravings. Then, again, every instrument employed by the surgeon is thus represented. These engravings are not only correct, but really beautiful, showing the astonishing degree of perfection to which the art of wood-engraving has arrived. Prof. Pirrie, in the work before us, has elaborately discussed the principles of surgery, and a safe and effectual practice predicated upon them. Perhaps no work upon this subject heretofore issued is so full upon the science of the art of surgery.—*Nashville Journal of Medicine and Surgery.*

One of the best treatises on surgery in the English language.—*Canada Med. Journal.*

Our impression is, that, as a manual for students, Pirrie's is the best work extant.—*Western Med. and Surg. Journal.*

## PARRISH (EDWARD),

Lecturer on Practical Pharmacy and Materia Medica in the Pennsylvania Academy of Medicine, &c.

### A PRACTICAL INTRODUCTION TO PHARMACY.

Designed as a Text-Book for the Student, and as a Guide to the Physician and Pharmaceutist. With numerous Formulæ and over 200 Illustrations. In one handsome octavo volume. (*Now Ready.*)

The want of an elementary text-book on this subject has long been felt and acknowledged While vast stores of information on all the collateral branches of pharmacy are contained in such works as Mohr and Redwood, the U. S. Dispensatory, the Pharmacopœia, Pereira, and others, there has been no compendious manual presenting within a moderate compass, and in systematic order, the innumerable minor details which make up the everyday business of those who dispense medicines. It has been the object of the author to supply this want, and while to the pharmaceutist such a work is manifestly indispensable, its utility will hardly be less to the country practitioner, residing at a distance from drug stores, and obliged to dispense the remedies which he prescribes. Familiarized with the elements of therapeutics and the essentials of materia medica, by his attendance at lectures, he has hitherto been obliged to learn for himself the details of prescribing, compounding, and preparing medicines. The volume commences with a chapter on the "outfit" of the country physician, describing the different articles, their various kinds and comparative advantages; the Pharmacopœia is described, explained, and commented upon, its contents classified and arranged so as to be easily comprehended and referred to; all the operations of pharmacy are given in minute detail, and under each head the various preparations are specified to which it is applicable, with directions for making them, giving in this manner a comprehensive and practical view of the materia medica, with much valuable information regarding all the more important articles. All the officinal formulæ are thus presented, with directions for their preparation and use, together with many empirical ones of interest, and numerous new ones derived from the practice of distinguished physicians. Especial attention has been bestowed on the NEW REMEDIES, the more important of which are minutely described, particularly those derived from our indigenous plants, which have of late attracted so much attention, and which the author has thoroughly investigated. The chapters on extemporaneous pharmacy contain clear and accurate instructions for writing prescriptions, selecting, combining, dispensing, and compounding medicines, making powders, pills, mixtures, ointments, &c. &c., with formulæ; and the work concludes with an appendix of valuable hints and advice to those purchasing articles connected with their profession. Numerous tables interspersed throughout elucidate the various subjects, which are rendered still clearer by a large number of engravings. Care has been taken in all instances to indicate and describe the simplest apparatus and procedures affording satisfactory results. The long experience of the author, both as a teacher of pharmacy, and as a practical pharmaceutist, is sufficient guarantee of his familiarity with the wants and necessities of the student, and of his ability to satisfy them.

---

## ROKITANSKY (CARL), M. D.,

Curator of the Imperial Pathological Museum, and Professor at the University of Vienna, &c.

### A MANUAL OF PATHOLOGICAL ANATOMY.

Four volumes octavo, bound in two. (*Now Ready.*)

Vol. I.—Manual of General Pathological Anatomy. Translated by W. E. SWAINE.
Vol. II.—Pathological Anatomy of the Abdominal Viscera. Translated by EDWARD SIEVEKING, M. D.
Vol. III.—Pathological Anatomy of the Bones, Cartilages, Muscles, and Skin, Cellular and Fibrous Tissue, Serous and Mucous Membrane, and Nervous System. Translated by C. H. MOORE.
Vol. IV.—Pathological Anatomy of the Organs of Respiration and Circulation. Translated by G. E. DAY.

To render this large and important work more easy of reference, and at the same time less cumbrous and costly, the publishers have arranged the four volumes in two, retaining, however, the separate paging, &c.

The publishers feel much pleasure in presenting to the profession of the United States the great work of Prof. Rokitansky, which is universally referred to as the standard of authority by the pathologists of all nations. Under the auspices of the Sydenham Society of London, the combined labor of four translators has at length overcome the almost insuperable difficulties which have so long prevented the appearance of the work in an English dress, while the additions made from various papers and essays of the author present his views on all the topics embraced, in their latest published form. To a work so widely known, eulogy is unnecessary, and the publishers would merely state that it contains the results of not less than THIRTY THOUSAND *post-mortem* examinations made by the author, diligently compared, generalized, and wrought into one complete and harmonious system.

---

## RIGBY (EDWARD), M. D.,

Physician to the General Lying-in Hospital, &c.

### A SYSTEM OF MIDWIFERY.

With Notes and Additional Illustrations. Second American Edition. One volume octavo, 422 pages.

---

## ROYLE (J. FORBES), M. D.

### MATERIA MEDICA AND THERAPEUTICS;

including the Preparations of the Pharmacopœias of London, Edinburgh, Dublin, and of the United States. With many new medicines. Edited by JOSEPH CARSON, M. D., Professor of Materia Medica and Pharmacy in the University of Pennsylvania. With ninety-eight illustrations. In one large octavo volume, of about seven hundred pages.

This work is, indeed, a most valuable one, and will fill up an important vacancy that existed between Dr. Pereira's most learned and complete system of Materia Medica, and the class of productions on the other extreme, which are necessarily imperfect from their small extent.—*British and Foreign Medical Review.*

## RAMSBOTHAM (FRANCIS H.), M. D.

### THE PRINCIPLES AND PRACTICE OF OBSTETRIC MEDICINE AND SURGERY, in reference to the Process of Parturition. A new and enlarged edition, thoroughly revised by the Author. With Additions by W. V. KEATING, M. D. In one large and handsome imperial octavo volume, of 650 pages, with sixty-four beautiful Plates, and numerous Wood-cuts in the text, containing in all nearly two hundred large and beautiful figures. (*Now Ready.*)

In calling the attention of the profession to the new edition of this standard work, the publishers would remark that no efforts have been spared to secure for it a continuance and extension of the remarkable favor with which it has been received. The last London issue, which was considerably enlarged, has received a further revision from the author, especially for this country. Its passage through the press here has been supervised by Dr. Keating, who has made numerous additions with a view of presenting more fully whatever was necessary to adapt it thoroughly to American modes of practice. In its mechanical execution, a like superiority over former editions will be found. The plates have all been re-engraved in a new and beautiful style; many additional illustrations have been introduced, and in every point of typographical finish it will be found one of the handsomest issues of the American press. In its present improved and enlarged form the publishers therefore confidently ask for it a place in every medical library, as a text-book for the student, or a manual for daily reference by the practitioner.

*From Prof. Hodge, of the University of Pa.*

To the American public, it is most valuable, from its intrinsic undoubted excellence, and as being the best authorized exponent of British Midwifery. Its circulation will, I trust, be extensive throughout our country.

The publishers have shown their appreciation of the merits of this work and secured its success by the truly elegant style in which they have brought it out, excelling themselves in its production, especially in its plates. It is dedicated to Prof. Meigs, and has the emphatic endorsement of Prof. Hodge, as the best exponent of British Midwifery. We know of no text-book which deserves in all respects to be more highly recommended to students, and we could wish to see it in the hands of every practitioner, for they will find it invaluable for reference.—*Med. Gazette.*

But once in a long time some brilliant genius rears his head above the horizon of science, and illuminates and purifies every department that he investigates; and his works become types, by which innumerable imitators model their feeble productions. Such a genius we find in the younger Ramsbotham, and such a type we find in the work now before us. The binding, paper, type, the engravings and woodcuts are all so excellent as to make this book one of the finest specimens of the art of printing that have given such a world-wide reputation to its enterprising and liberal publishers. We welcome Ramsbotham's Principles and Practice of Obstetric Medicine and Surgery to our library, and confidently recommend it to our readers, with the assurance that it will not disappoint their most sanguine expectations.—*Western Lancet.*

It is unnecessary to say anything in regard to the utility of this work. It is already appreciated in our country for the value of the matter, the clearness of its style, and the fulness of its illustrations. To the physician's library it is indispensable, while to the student as a text-book, from which to extract the material for laying the foundation of an education on obstetrical science, it has no superior.—*Ohio Med. and Surg. Journal.*

We will only add that the student will learn from it all he need to know, and the practitioner will find it, as a book of reference, surpassed by none other.—*Stethoscope.*

The character and merits of Dr. Ramsbotham's work are so well known and thoroughly established, that comment is unnecessary and praise superfluous. The illustrations, which are numerous and accurate, are executed in the highest style of art. We cannot too highly recommend the work to our readers.—*St. Louis Med. and Surg. Journal.*

---

## RICORD (P.), M. D.,

Surgeon to the Hôpital du Midi, Paris, &c.

### ILLUSTRATIONS OF SYPHILITIC DISEASE. Translated from the French, by THOMAS F. BETTON, M. D. With the addition of a History of Syphilis, and a complete Bibliography and Formulary of Remedies, collated and arranged, by PAUL B. GODDARD, M. D. With fifty large quarto plates, comprising one hundred and seventeen beautifully colored illustrations. In one large and handsome quarto volume.

BY THE SAME AUTHOR. (*Lately Published.*)

### A TREATISE ON THE VENEREAL DISEASE. By JOHN HUNTER, F. R. S. With copious Additions, by PH. RICORD, M. D. Edited, with Notes, by FREEMAN J. BUMSTEAD, M. D. In one handsome octavo volume, of 520 pages, with plates.

Every one will recognize the attractiveness and value which this work derives from thus presenting the opinions of these two masters side by side. But, it must be admitted, what has made the fortune of the book, is the fact that it contains the "most complete embodiment of the veritable doctrines of the Hôpital du Midi," which has ever been made public. The doctrinal ideas of M. Ricord, ideas which, if not universally adopted, are incontestably dominant, have heretofore only been interpreted by more or less skilful secretaries, sometimes accredited and sometimes not.

In the notes to Hunter, the master substitutes himself for his interpreters, and gives his original thoughts to the world, in a summary form it is true, but in a lucid and perfectly intelligible manner. In conclusion we can say that this is incontestably the best treatise on syphilis with which we are acquainted, and, as we do not often employ the phrase, we may be excused for expressing the hope that it may find a place in the library of every physician.—*Virginia Med. and Surg. Journal.*

BY THE SAME AUTHOR.

### LETTERS ON SYPHILIS, addressed to the Chief Editor of the Union Médicale. With an Introduction, by Amédée Latour. Translated by W. P. Lattimore, M. D. In one neat octavo volume of 270 pages.

BY THE SAME AUTHOR.

### A PRACTICAL TREATISE ON VENEREAL DISEASES. With a Therapeutical Summary and Special Formulary. Translated by SIDNEY DOANE, M. D. Fourth edition. One volume, octavo, 340 pages.

## SMITH (HENRY H.),

Professor of Surgery in the University of Pennsylvania, &c.

### MINOR SURGERY; or, Hints on the Every-day Duties of the Surgeon.

Illustrated by two hundred and forty-seven illustrations. Third and enlarged edition. In one handsome royal 12mo. volume. pp. 456.

And a capital little book it is. . . Minor Surgery, we repeat, is really Major Surgery, and anything which teaches it is worth having. So we cordially recommend this little book of Dr. Smith's.—*Med.-Chir. Review.*

This beautiful little work has been compiled with a view to the wants of the profession in the matter of bandaging, &c., and well and ably has the author performed his labors. Well adapted to give the requisite information on the subjects of which it treats.—*Medical Examiner.*

The directions are plain, and illustrated throughout with clear engravings.—*London Lancet.*

One of the best works they can consult on the subject of which it treats.—*Southern Journal of Medicine and Pharmacy.*

A work such as the present is therefore highly useful to the student, and we commend this one to their attention.—*American Journal of Medical Sciences.*

No operator, however eminent, need hesitate to consult this unpretending yet excellent book. Those who are young in the business would find Dr. Smith's treatise a necessary companion, after once understanding its true character.—*Boston Med. and Surg. Journal.*

No young practitioner should be without this little volume; and we venture to assert, that it may be consulted by the senior members of the profession with more real benefit, than the more voluminous works.—*Western Lancet.*

BY THE SAME AUTHOR, AND

## HORNER (WILLIAM E.), M. D.,

Late Professor of Anatomy in the University of Pennsylvania.

### AN ANATOMICAL ATLAS, illustrative of the Structure of the Human Body.

In one volume, large imperial octavo, with about six hundred and fifty beautiful figures.

These figures are well selected, and present a complete and accurate representation of that wonderful fabric, the human body. The plan of this Atlas, which renders it so peculiarly convenient for the student, and its superb artistical execution, have been already pointed out. We must congratulate the student upon the completion of this Atlas, as it is the most convenient work of the kind that has yet appeared; and we must add, the very beautiful manner in which it is "got up" is so creditable to the country as to be flattering to our national pride.—*American Medical Journal.*

## SARGENT (F. W.), M. D.

### ON BANDAGING AND OTHER OPERATIONS OF MINOR SURGERY.

Second edition, enlarged. One handsome royal 12mo. vol., of nearly 400 pages, with 182 wood-cuts. (*Now Ready.*)

The very best manual of Minor Surgery we have seen; an American volume, with nearly four hundred pages of good practical lessons, illustrated by about one hundred and thirty wood-cuts. In these days of "trial," when a doctor's reputation hangs upon a clove hitch, or the roll of a bandage, it would be well, perhaps, to carry such a volume as Mr. Sargent's always in our coat-pocket, or, at all events, to listen attentively to his instructions at home.—*Buffalo Med. Journal.*

We have carefully examined this work, and find it well executed and admirably adapted to the use of the student. Besides the subjects usually embraced in works on Minor Surgery, there is a short chapter on bathing, another on anæsthetic agents, and an appendix of formulæ. The author has given an excellent work on this subject, and his publishers have illustrated and printed it in most beautiful style.—*The Charleston Medical Journal.*

## SKEY (FREDERICK C.), F. R. S., &c.

### OPERATIVE SURGERY.

In one very handsome octavo volume of over 650 pages, with about one hundred wood-cuts.

## SHARPEY (WILLIAM), M. D., JONES QUAIN, M. D., AND RICHARD QUAIN, F. R. S., &c.

### HUMAN ANATOMY.

Revised, with Notes and Additions, by JOSEPH LEIDY, M. D. Complete in two large octavo volumes, of about thirteen hundred pages. Beautifully illustrated with over five hundred engravings on wood.

It is indeed a work calculated to make an era in anatomical study, by placing before the student every department of his science, with a view to the relative importance of each; and so skilfully have the different parts been interwoven, that no one who makes this work the basis of his studies, will hereafter have any excuse for neglecting or undervaluing any important particulars connected with the structure of the human frame; and whether the bias of his mind lead him in a more especial manner to surgery, physic, or physiology, he will find here a work at once so comprehensive and practical as to defend him from exclusiveness on the one hand, and pedantry on the other.—*Journal and Retrospect of the Medical Sciences.*

We have no hesitation in recommending this treatise on anatomy as the most complete on that subject in the English language; and the only one, perhaps, in any language, which brings the state of knowledge forward to the most recent discoveries.—*The Edinburgh Med. and Surg. Journal.*

Admirably calculated to fulfil the object for which it is intended.—*Provincial Medical Journal.*

The most complete Treatise on Anatomy in the English language.—*Edinburgh Medical Journal.*

There is no work in the English language to be preferred to Dr. Quain's Elements of Anatomy.—*London Journal of Medicine.*

## STANLEY (EDWARD).

### A TREATISE ON DISEASES OF THE BONES.

In one volume, octavo, extra cloth, 286 pages.

## SOLLY (SAMUEL), F. R. S.

### THE HUMAN BRAIN; its Structure, Physiology, and Diseases.

With a Description of the Typical Forms of the Brain in the Animal Kingdom. From the Second and much enlarged London edition. In one octavo volume of 500 pages, with 120 wood-cuts.

### STILLÉ (ALFRED), M. D.

**PRINCIPLES OF GENERAL AND SPECIAL THERAPEUTICS.** In handsome octavo. (*Preparing.*)

### SIMON (JOHN), F. R. S.

**GENERAL PATHOLOGY,** as conducive to the Establishment of Rational Principles for the Prevention and Cure of Disease. A Course of Lectures delivered at St. Thomas's Hospital during the summer Session of 1850. In one neat octavo volume, of 212 pages.

### SMITH (W. TYLER), M. D.,

Physician Accoucheur to St. Mary's Hospital, &c.

**ON PARTURITION, AND THE PRINCIPLES AND PRACTICE OF OBSTETRICS.** In one large duodecimo volume, of 400 pages.

BY THE SAME AUTHOR.—(*Now Ready.*)

**A PRACTICAL TREATISE ON THE PATHOLOGY AND TREATMENT OF LEUCORRHŒA.** With numerous illustrations. In one very handsome octavo volume of about 250 pages.

The investigation of the pathology and treatment of leucorrhœa is a task that may well engage the time and energies of the most philosophical and skilled physician; and there are few men more capable of conducting and deducing important observations from such a study than the author of the present treatise. Dr. Tyler Smith's previous researches not less than his devotion to physiology and scientific medicine, point him out as one eminently calculated to throw light on many subjects, which less able men might fail to elucidate. We consequently take his work in hand with high expectations and we have not been in the least disappointed. The foregoing cursory examination of Dr. Tyler Smith's work will be sufficient to prove its value, and we hope more than enough to induce every practitioner to study it for himself.—*The Lancet.*

The above list contains simply the general headings of the different chapters; to have enumerated all the subjects discussed, or to have made further extracts, would have compelled us much to exceed our limits. This, however, we scarcely regret; because we think a perusal of the extracts given will induce the reader to examine the work for himself; and we would advise all who are anxious for correct ideas respecting these discharges, and their sources, to possess themselves of it.—*Dublin Med. Press.*

### SIBSON (FRANCIS), M. D.,

Physician to St. Mary's Hospital.

**MEDICAL ANATOMY.** Illustrating the Form, Structure, and Position of the Internal Organs in Health and Disease. In large imperial quarto, with splendid colored plates. To match "Maclise's Surgical Anatomy." Part I. (*Nearly Ready.*)

### SCHOEDLER (FRIEDRICH), PH. D.,

Professor of the Natural Sciences at Worms, &c.

**THE BOOK OF NATURE;** an Elementary Introduction to the Sciences of Physics, Astronomy, Chemistry, Mineralogy, Geology, Botany, Zoology, and Physiology. First American edition, with a Glossary and other Additions and Improvements; from the second English edition. Translated from the sixth German edition, by HENRY MEDLOCK, F. C. S., &c. In one thick volume, small octavo, of about seven hundred pages, with 679 illustrations on wood. Suitable for the higher Schools and private students. (*Now Ready.*)

### TOMES (JOHN), F. R. S.

**A MANUAL OF DENTAL PRACTICE.** Illustrated by numerous engravings on wood. In one handsome volume. (*Preparing.*)

### TRANSACTIONS OF THE AMERICAN MEDICAL ASSOCIATION.

**VOLUME VIII,** for 1855, 8vo., extra cloth. (*Nearly Ready.*)

A few complete sets can still be had, in eight volumes, price $38. Applications and remittances to be made to CASPAR WISTER, M. D., Treasurer, Philadelphia.

*** These volumes are published by and sold for account of the Association.

### TODD (R. B.), M. D., AND BOWMAN (WILLIAM), F. R. S.

**PHYSIOLOGICAL ANATOMY AND PHYSIOLOGY OF MAN.** With numerous handsome wood-cuts. Parts I, II, and III, in one octavo volume, 552 pages. Part IV will complete the work.

The first portion of Part IV, with numerous original illustrations, was published in the Medical News and Library for 1853, and the completion will be issued immediately on its appearance in London. Those who have subscribed since the appearance of the preceding portion of the work can have the three parts by mail, on remittance of $2 50 to the publishers.

### TOYNBEE (JOSEPH), F. R. S.,

Aural Surgeon to St. Mary's Hospital, &c.

**A MANUAL OF AURAL SURGERY;** being a complete Treatise on Diseases of the Ear. Illustrated with numerous engravings on wood, from original drawings. In one octavo volume. (*Preparing.*)

## TANNER (T. H.), M. D.

Physician to the Hospital for Women, &c.

### A MANUAL OF CLINICAL MEDICINE AND PHYSICAL DIAGNOSIS.

To which is added The Code of Ethics of the American Medical Association. In one neat volume, small 12mo., extra cloth. (*Now Ready.*)

The object of this little work is to furnish the practitioner, in a condensed and convenient compass, and at a trifling cost, with a guide for the daily exigencies of his practice. A large portion of the volume is occupied with details of diagnostic symptoms, classified under the different seats of disease. This, in itself, is well worth the price of the book, but in addition, there will be found an immense amount of information, not usually touched upon in the systematic works, or scattered throughout many different volumes—such as general rules for conduct, taking notes, clinical examination of children and of the insane, post-mortem examinations, medico-legal examinations, examinations for life insurance, instruments employed in diagnosis, such as the microscope, tests, the spirometer, dynamometer, stethometer, stethoscope, pleximeter, ophthalmoscope, speculum, uterine sound, &c.; directions for the chemical and microscopical examination of the blood, urine, sputa, &c. &c.; with many other subjects of equal importance which hitherto the young practitioner has had to learn in a great measure from experience alone. Although necessarily treated in a condensed manner, the topics will be found to embrace the latest and most approved modes of procedure, while the addition of the admirable "Code of Ethics" of the American Medical Association renders it complete as a guide for the student and as a manual of daily reference for the younger practitioner.

Those who desire to use it as a vade-mecum for the pocket, can obtain copies neatly done up in flexible cloth.

## TAYLOR (ALFRED S.), M. D., F. R. S.,

Lecturer on Medical Jurisprudence and Chemistry in Guy's Hospital.

### MEDICAL JURISPRUDENCE. Third American, from the fourth and improved

English Edition. With Notes and References to American Decisions, by EDWARD HARTSHORNE, M. D. In one large octavo volume, of about seven hundred pages. (*Just Issued.*)

We know of no work on Medical Jurisprudence which contains in the same space anything like the same amount of valuable matter.—*N. Y. Journal of Medicine.*

No work upon the subject can be put into the hands of students either of law or medicine which will engage them more closely or profitably; and none could be offered to the busy practitioner of either calling, for the purpose of casual or hasty reference, that would be more likely to afford the aid desired. We therefore recommend it as the best and safest manual for daily use.—*American Journal of Medical Sciences.*

BY THE SAME AUTHOR.

### ON POISONS, IN RELATION TO MEDICAL JURISPRUDENCE AND

MEDICINE. Edited, with Notes and Additions, by R. E. GRIFFITH, M. D. In one large octavo volume, of 688 pages.

The most elaborate work on the subject that our literature possesses.—*British and Foreign Medico-Chirurgical Review.*

One of the most practical and trustworthy works on Poisons in our language.—*Western Journal of Medicine.*

## THOMSON (A. T.), M. D., F. R. S., &c.

### DOMESTIC MANAGEMENT OF THE SICK ROOM, necessary in aid of

Medical Treatment for the Cure of Diseases. Edited by R. E. GRIFFITH, M. D. In one large royal 12mo. volume, with wood-cuts, 360 pages

## WATSON (THOMAS), M. D., &c.

### LECTURES ON THE PRINCIPLES AND PRACTICE OF PHYSIC.

Third American, from the last London edition. Revised, with Additions, by D. FRANCIS CONDIE, M. D., author of a "Treatise on the Diseases of Children," &c. In one octavo volume, of nearly eleven hundred large pages, strongly bound with raised bands.

To say that it is the very best work on the subject now extant, is but to echo the sentiment of the medical press throughout the country.—*N. O. Medical Journal.*

Of the text-books recently republished Watson is very justly the principal favorite.—*Holmes's Rep. to Nat. Med. Assoc.*

By universal consent the work ranks among the very best text-books in our language.—*Illinois and Indiana Med. Journal.*

Regarded on all hands as one of the very best, if not the very best, systematic treatise on practical medicine extant.—*St. Louis Med. Journal.*

Confessedly one of the very best works on the principles and practice of physic in the English or any other language.—*Med. Examiner.*

As a text-book it has no equal; as a compendium of pathology and practice no superior.—*New York Annalist.*

We know of no work better calculated for being placed in the hands of the student, and for a text-book; on every important point the author seems to have posted up his knowledge to the day.—*Amer. Med. Journal.*

One of the most practically useful books that ever was presented to the student.—*N. Y. Med. Journal.*

## WHAT TO OBSERVE

### AT THE BEDSIDE AND AFTER DEATH, IN MEDICAL CASES.

Published under the authority of the London Society for Medical Observation. A new American, from the second and revised London edition. In one very handsome volume, royal 12mo., extra cloth. (*Now Ready.*)

The demand which has so rapidly exhausted the first edition of this little work, shows that the advantages it offers to the profession have been duly appreciated, and has stimulated the authors to render it more worthy of its reputation. It has therefore been thoroughly revised, and such improvements (among which is a section on TREATMENT) have been made as further experience in its use has shown to be desirable.

To the observer who prefers accuracy to blunders and precision to carelessness, this little book is invaluable.—*N. H. Journal of Medicine.*

One of the finest aids to a young practitioner we have ever seen.—*Peninsular Journal of Medicine.*

## WILSON (ERASMUS), M. D., F. R. S.,

Lecturer on Anatomy, London.

### A SYSTEM OF HUMAN ANATOMY, General and Special. Fourth American, from the last English edition. Edited by PAUL B. GODDARD, A. M., M. D. With two hundred and fifty illustrations. Beautifully printed, in one large octavo volume, of nearly six hundred pages.

In many, if not all the Colleges of the Union, it has become a standard text-book. This, of itself, is sufficiently expressive of its value. A work very desirable to the student; one, the possession of which will greatly facilitate his progress in the study of Practical Anatomy.—*New York Journal of Medicine.*

Its author ranks with the highest on Anatomy.—*Southern Medical and Surgical Journal.*

It offers to the student all the assistance that can be expected from such a work.—*Medical Examiner.*

The most complete and convenient manual for the student we possess.—*American Journal of Medical Science.*

In every respect, this work as an anatomical guide for the student and practitioner, merits our warmest and most decided praise.—*London Medical Gazette.*

BY THE SAME AUTHOR.

### THE DISSECTOR; or, Practical and Surgical Anatomy. Modified and Rearranged, by PAUL BECK GODDARD, M. D. A new edition, with Revisions and Additions. In one large and handsome volume, royal 12mo., of 458 pages, with 115 illustrations.

In passing this work again through the press, the editor has made such additions and improvements as the advance of anatomical knowledge has rendered necessary to maintain the work in the high reputation which it has acquired in the schools of the United States, as a complete and faithful guide to the student of practical anatomy. A number of new illustrations have been added, especially in the portion relating to the complicated anatomy of Hernia. In mechanical execution the work will be found superior to former editions.

BY THE SAME AUTHOR.

### ON DISEASES OF THE SKIN. Third American, from the third London edition. In one neat octavo volume, of about five hundred pages, extra cloth. (*Just Issued.*)

Also, to be had done up with fifteen beautiful steel plates, of which eight are exquisitely colored; representing the Normal and Pathological Anatomy of the Skin, together with accurately colored delineations of more than sixty varieties of disease, most of them the size of nature. The Plates are also for sale separate, done up in boards.

The "Diseases of the Skin," by Mr. Erasmus Wilson, may now be regarded as the standard work in that department of medical literature. The plates by which this edition is accompanied leave nothing to be desired, so far as excellence of delineation and perfect accuracy of illustration are concerned.—*Medico-Chirurgical Review.*

BY THE SAME AUTHOR.

### ON CONSTITUTIONAL AND HEREDITARY SYPHILIS, AND ON SYPHILITIC ERUPTIONS. In one small octavo volume, beautifully printed, with four exquisite colored plates, presenting more than thirty varieties of syphilitic eruptions.

BY THE SAME AUTHOR. (*Now Ready.*)

### HEALTHY SKIN; A Popular Treatise on the Skin and Hair, their Preservation and Management. Second American, from the fourth London edition. One neat volume, royal 12mo., of about 300 pages, with numerous illustrations.

Copies can be had done up in paper covers for mailing, price 75 cents.

## WHITEHEAD (JAMES), F. R. C. S., &c.

### THE CAUSES AND TREATMENT OF ABORTION AND STERILITY; being the Result of an Extended Practical Inquiry into the Physiological and Morbid Conditions of the Uterus. Second American Edition. In one volume, octavo, 368 pages. (*Now Ready.*)

Such are the advances made from year to year in this department of our profession, that the practitioner who does not consult the recent works on the complaints of females, will soon find himself in the rear of his more studious brethren. This is one of the works which must be studied by those who would know what the present state of our knowledge is respecting the causes and treatment of abortion and sterility.—*The Western Journal of Medicine and Surgery.*

## WALSHE (W. H.), M. D.,

Professor of the Principles and Practice of Medicine in University College, London.

### DISEASES OF THE HEART, LUNGS, AND APPENDAGES; their Symptoms and Treatment. In one handsome volume, large royal 12mo., 512 pages.

We consider this as the ablest work in the English language, on the subject of which it treats; the author being the first stethoscopist of the day.—*Charleston Medical Journal.*

## WILDE (W. R.),

Surgeon to St. Mark's Ophthalmic and Aural Hospital, Dublin.

### AURAL SURGERY, AND THE NATURE AND TREATMENT OF DISEASES OF THE EAR. In one handsome octavo volume of 476 pages, with illustrations.

This work certainly contains more information on the subject to which it is devoted than any other with which we are acquainted. We feel grateful to the author for his manful effort to rescue this department of surgery from the hands of the empirics who nearly monopolize it. We think he has successfully shown that aural diseases are not beyond the resources of art; that they are governed by the same laws, and amenable to the same general methods of treatment as other morbid processes. The work is not written to supply the cravings of popular patronage, but it is wholly addressed to the profession, and bears on every page the impress of the reflections of a sagacious and practical surgeon.—*Va. Surg. and Med. Journal.*

## WEST (CHARLES), M. D.,

Physician to the Hospital for Sick Children, &c.

### LECTURES ON THE DISEASES OF INFANCY AND CHILDHOOD.

Second American, from the Second and Enlarged London edition. In one volume, octavo, of nearly five hundred pages. (*Just Issued.*)

We take leave of Dr. West with great respect for his attainments, a due appreciation of his acute powers of observation, and a deep sense of obligation for this valuable contribution to our professional literature. His book is undoubtedly in many respects the best we possess on diseases of children. The extracts we have given will, we hope, satisfy our readers of its value; and yet in all candor we must say that they are even inferior to some other parts, the length of which prohibited our entering upon them. That the book will shortly be in the hands of most of our readers we do not doubt, and it will give us much pleasure if our strong recommendation of it may contribute towards the result.—*The Dublin Quarterly Journal of Medical Science.*

Dr. West has placed the profession under deep obligation by this able, thorough, and finished work upon a subject which almost daily taxes to the utmost the skill of the general practitioner. He has with singular felicity threaded his way through all the tortuous labyrinths of the difficult subject he has undertaken to elucidate, and has in many of the darkest corners left a light, for the benefit of succeeding travellers, which will never be extinguished. Not the least captivating feature in this admirable performance is its easy, conversational style, which acquires force from its very simplicity, and leaves an impression upon the memory, of the truths it conveys, as clear and refreshing as its own purity. The author's position secured him extraordinary facilities for the investigation of children's diseases, and his powers of observation and discrimination have enabled him to make the most of these great advantages.—*Nashville Medical Journal.*

BY THE SAME AUTHOR. (*Just Issued*)

### AN ENQUIRY INTO THE PATHOLOGICAL IMPORTANCE OF ULCERATION OF THE OS UTERI.

Being the Croonian Lectures for the year 1854. In one neat octavo volume, extra cloth.

---

## WILLIAMS (C. J. B.), M. D., F. R. S.,

Professor of Clinical Medicine in University College, London, &c.

### PRINCIPLES OF MEDICINE; comprising General Pathology and Therapeutics, and a brief general view of Etiology, Nosology, Semeiology, Diagnosis, Prognosis, and Hygienics.

Edited, with Additions, by MEREDITH CLYMER, M. D. Fourth American, from the last and enlarged London edition. In one octavo volume, of 476 pages. (*Lately Issued.*)

It possesses the strongest claims to the attention of the medical student and practitioner, from the admirable manner in which the various inquiries in the different branches of pathology are investigated, combined, and generalized by an experienced practical physician, and directly applied to the investigation and treatment of disease.—EDITOR'S PREFACE.

The best exposition in our language, or, we believe, in any language, of rational medicine, in its present improved and rapidly improving state.—*British and Foreign Medico-Chirurg. Review.*

Few books have proved more useful, or met with a more ready sale than this, and no practitioner should regard his library as complete without it.—*Ohio Med. and Surg. Journal.*

BY THE SAME AUTHOR.

### A PRACTICAL TREATISE ON DISEASES OF THE RESPIRATORY ORGANS;

including Diseases of the Larynx, Trachea, Lungs, and Pleuræ. With numerous Additions and Notes, by M. CLYMER, M. D. With wood-cuts. In one octavo volume, pp. 508.

---

## YOUATT (WILLIAM), V. S.

### THE HORSE.

A new edition, with numerous illustrations; together with a general history of the Horse; a Dissertation on the American Trotting Horse; how Trained and Jockeyed; an Account of his Remarkable Performances; and an Essay on the Ass and the Mule. By J. S. SKINNER, formerly Assistant Postmaster-General, and Editor of the Turf Register. One large octavo volume.

BY THE SAME AUTHOR.

### THE DOG.

Edited by E. J. LEWIS, M. D. With numerous and beautiful illustrations. In one very handsome volume, crown 8vo., crimson cloth, gilt.

---

## ILLUSTRATED MEDICAL CATALOGUE.

BLANCHARD & LEA have now ready a Catalogue of their Medical, Surgical, and Scientific Publications, containing descriptions of the works, with Notices of the Press, and specimens of the Illustrations, making a pamphlet of sixty-four large octavo pages. It has been prepared with great care, and without regard to expense, forming one of the most beautiful specimens of typographical execution as yet issued in this country. Copies will be sent by mail, and the postage paid, on application to the Publishers, by inclosing two three cent postage stamps.

Catalogues of Blanchard & Lea's numerous Miscellaneous and Educational Publications will be forwarded free by mail, on application.
